Further, I was most impressed by your column outlining the strategy followed by the New York Chapter. It makes eminent good sense. Also, your positiveness where the UN is concerned and the importance of the UNA in keeping it moving was extremely well stated.

See you soon.

Sincerely yours,

ORVILLE L. FREEMAN.●

A U.S. SIGNATURE ON THE LAW OF THE SEA TREATY IS WHAT THE SOVIET UNION WANTS

HON. DON YOUNG

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Monday, February 28, 1983

● Mr. YOUNG of Alaska. Mr. Speaker, on February 21, 1983, TASS, the Soviet news agency, reviewed an article written for the New York Times by Presidential Counselor Edwin Meese. The article, which concerned the U.S. decision not to sign the Law of the Sea Treaty, was considered by TASS to be an example of "U.S. hegemonist ambitions."

TASS points out that deep-sea mineral resources include such strategic minerals as cobalt and magnesium,[1] which are used in steel production and for the manufacture of jet engines. TASS calls a recent agreement between the United States and its allies a "downright imperialist" document. According to the Soviet Union, "U.S. sabotage of the Law of the Sea Convention shows that the Reagan administration puts its imperial, materialistic ambitions above the interests of an overwhelming majority of the countries of the world community."

Before U.S. supporters of the Law of the Sea Treaty begin applauding the Soviet statements, let me bring a few facts to light. When the final draft of the treaty text was put to a vote last year, the United States voted against it. The U.S.S.R. and a number of Soviet-bloc countries abstained. The United States has refused to sign the treaty; the Soviet Union has signed, but has not ratified, the treaty. This Congress has passed a domestic seabed mining law, the Deep Seabed Hard Minerals Act. The Soviet Union has similar laws on its books, passed before the Law of the Sea Treaty was signed. The Soviet Union does not want the treaty any more than the United States does.

What the Soviets do want is full U.S. participation in the treaty regime. Major U.S. mining companies have stated that they would be unlikely to mine if the United States were to participate in the treaty. TASS is correct: Cobalt and manganese are important to the U.S. defense and industrial base. If we do not get these materials from the seabed, where will they come from? Not from mineral deposits in the United States, which are rapidly being locked up in wilderness status. What about foreign sources? In 1980, the United States imported 93 percent of its cobalt from such stable countries as Zaire, Zambia, and Finland. We imported 97 percent of our manganese from Gabon, Brazil, and the Republic of South Africa, among others: 73 percent of our nickel supply—a material that was not mentioned in the article but which is present on the deep seabed—came from Canada, Norway, New Caledonia, and the Dominican Republic. Let us not forget that, a few years ago, Canada called for a nickel OPEC to control world supply and price of nickel.

If by chance U.S. companies do decide to mine under the treaty, we have another problem. Those companies would have to share their sensitive defense-related technology with the multinational enterprise created under the treaty. I am sure the Soviets would welcome the opportunity to keep track of U.S. technology. The Soviets could also save some money: Part of the revenue derived from seabed mining would go to such organizations as the Palestine Liberation Organization and other national liberation groups.

Mr. Speaker, I suggest that we ignore the false tears being shed by the Soviet Union on behalf of a new world order and recognize the Law of the Sea Treaty for what it is: an attempt by a number of nations to rob from the rich and keep for themselves. The United States made the right decision when it refused to sign the treaty. Now let us move forward with the establishment of customary international law that benefits U.S. interests. Let us put the Law of the Sea Treaty behind us and take positive steps—such as establishing an exclusive economic zone and continuing negotiations on reciprocating states agreements—that will show the world community that the United States intends to act fairly but firmly in the area of oceans policy.

MEESE'S ARTICLE ON LOS CONVENTION REVIEWED

["Why Is Washington Against the 'Charter of the Seas'?"—TASS headline]

[Text] Moscow February 21 TASS—TASS political news analyst Robert Serebrennikov writes:

In an article in the New York Times, presidential adviser Edwin Meese reveals the true aims behind the Washington administration's open sabotage of the Law of the Sea [LOS] Convention. This important international code, the first to establish universal rules for the exploration and exploitation of the world ocean and its resources, has already been signed by 119 states.

"The sea-bed resources—an important alternative for the future"—Meese stated. But what sort of a future is visualised by the influential adviser to the Washington administration, who is referred to as Reagan's "right hand"? With a brazenness that is the hallmark of the present U.S. Administration, he makes no secret of Washington's ambitions and militarist designs.

The convention's chief problem is the ban of deep-sea extraction of mineral resources, Meese says. Of all the mineral resources of the sea bed, the U.S., in his own admission, is interested above all in the important quantities of such strategic minerals as magnesium and cobalt needed for the production of steel, jet engines and other important components of U.S. defence and industrial base.

The programme to divide the world ocean according to U.S. wishes is candidly explained by Meese through statements that at present the U.S. has to rely on imports to make up for its shortage of strategic materials. However, Meese complains, many foreign suppliers are unreliable and in some case the resources have been depleted.

In working out the plan for an uncontrolled exploitation and plunder of the seabed resources, the U.S. military-industrial complex and the Pentagon do not like to see the establishment of control over the extraction of valuable minerals in international waters, or the development of practical measures to organise effective international cooperation in using the sea-bed resources in the interests of all countries and peoples, as provided for by the Law of the Sea Convention.

These U.S. circles are especially displeased with the convention provisions which declare the mineral resources on the floor of the world ocean's international areas to be the "common heritage of mankind", and set norms for their exploitation.

In its bid to achieve military superiority, the Washington administration is making increasing use of material and strategic resources within the framework of carrying out an unprecedented nuclear-missile arms build-up. It strives to extend its great-power

[1] This appears to be a mistranslation; the mineral is manganese, not magnesium.

"U.S. vital interests" concepts on to the seas, the sea-bed and the subsoil thereof.

That is why Washington is trying to torpedo the Law of the Sea Convention—that universal "charter of the seas" which is an obstacle in the way of the U.S. hegemonist ambitions.

That is why the Reagan administration is stepping up its furious assault on the convention. It has refused to contribute its share to the budget of the preparatory commission which is working out the modalities for the practical implementation of the Law of the Sea Convention. In September 1982, the U.S. concluded, with three West European countries, a downright imperialist separate agreement on the exploration exploitation of mineral resources in the world ocean. That collusion actually aims at disrupting the convention, and amounts to an arbitrary claim to the most promising parts of the ocean floor, and to dividing the world ocean in the interests of imperialism. The U.S. sabotage of the Law of the Sea Convention shows that the Reagan administration puts its imperial, militarist ambitions above the interests of an overwhelming majority of the countries of the world community.

SEABED? NO, BED OF NAILS

(By Edwin Meese 3d)

WASHINGTON.—The Law of the Sea Treaty failed to achieve international consensus at Jamaica's Montego Bay. The United States and 46 other nations, together accounting for more than half the global gross domestic product, withheld their signatures. Twenty-two abstained, and 24 did not attend. Thus, the way is cleared to develop more promising arrangements.

This is as it should be. For had the treaty been universally accepted, it would have undermined the future national and economic security of the United States and many of its allies.

The treaty's main problems lay in its restrictions on deep seabed mining. The seabed contains vast quantities of such strategic minerals as manganese and cobalt, which are necessary to manufacture steel, jet engines and other vital products essential to our defense and industrial base. The United States and other countries must now rely heavily on imports to meet their strategic-mineral needs. Yet many foreign suppliers are not reliable, and in other cases higher-grade ores are being depleted. The seabed's resources therefore represent an important future alternative.

At present, all nations have the right to mine the seabed under the doctrine of "freedom of the seas." According to international law, the resources of the ocean floor belong to no one. They are the legitimate property of whoever undertakes the expense and risks of bringing them to the surface. The Law of the Sea Treaty stands this principle on its head. It asserts that the seabed's minerals are "the common heritage of mankind," meaning that they belong collectively to all nations. While the concept sounds noble, in practice it implies that no nation has the right to mine without permission from the "body of the whole"—effectively repealing "freedom of the seas" as it applies to ocean mining.

The treaty would do this by creating an "International Seabed Authority" modeled loosely on that United Nations, to govern seabed mineral production. The authority's assembly, like its United Nations counterpart, would be dominated by the developing countries. These nations in the past have not only been hostile to the United States and free-world interests but in the United Nations have supported the Soviet position as much as 80 percent of the time. The structure of the authority's executive council would help them succeed. Unlike the Security Council, the executive council would have no permanent members and no great-power veto—two provisions that have protected our interests in the United Nations. Thus, had America agreed to the treaty, we would have entrusted our own and our allies' access to the seabed's minerals to the goodwill of nations that have, for the most part, opposed our objectives.

The authority's control over seabed mining would have been virtually complete. The authority would have its own mining company (the "Enterprise"), which would enjoy preferential treatment and generous subsidies, financed primarily by its would-be competitors. Private or national companies wishing to mine would first have to apply for a license, which the authority would not be obliged to approve. If it were granted a license, a firm would be required to survey two mining sites, one of which the Enterprise would appropriate for its own use. The authority could compel competing firms to hand over their mining technology to the Enterprise or the developing countries, quite possibly choking off creation of needed technology in the first place. It could also limit the quantity of minerals that could be extracted.

Even the most enthusiastic companies might well balk at accepting these terms on top of mining's inherent risk and expense. American mining firms, in particular, have already stated that they would not mine under the treaty's provisions. For this reason, the treaty poses a threat to both the industrialized countries as well as the developing nations, who will need strategic minerals as their own economies mature. For no one will benefit from the seabed's riches if the minerals remain on the ocean floor.

Nor can these problems be solved, as some have argued, by the Law of the Sea's "preparatory commission," which only sets the detailed rules for implementing the treaty and cannot change its substance. What is needed instead is an arrangement that will reaffirm customary international law.

One of the Reagan Administration's first efforts has been to review how those areas of consensus and traditional law in the treaty, such as overflight and navigation rights, can be reinforced. Second, we need to develop alternative ways, outside the limiting framework of the treaty, to preserve all nations' access to the seabed's mineral resources. The United States will continue to work with other countries toward the creation of such arrangements.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, March 1, 1983, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

MARCH 2

8:30 a.m.

Appropriations

*Labor, Health and Human Services, Education, and Related Agencies Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1984 for the Occupational Safety and Health Administration, Mine Safety and Health Administration, departmental management, and the President's Committee on Employment of the Handicapped, all of the Department of Labor.

SD-116

9:00 a.m.

Appropriations

*Interior and Related Agencies Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1984 for certain programs of the Department of the Interior and related agencies.

SD-138

*Judiciary

To hold hearings on low-level radioactive waste disposal compacts.

SD-226

9:30 a.m.

Appropriations

Commerce, Justice, State, the Judiciary, and Related Agencies Subcommittee

To hold hearings on proposed budget estimates for fiscal year 1984 for the Board for International Broadcasting, Federal Communications Commission, Federal Trade Commission, and the Japan-United States Friendship Commission.

S-146, Capitol

Banking, Housing, and Urban Affairs

International Finance and Monetary Policy Subcommittee

To hold hearings on S. 397, proposed Export Administration Act Amendments, S. 407, proposed Export Administration Enforcement Act, and S. 434, proposed Office of Strategic Trade Act.

SD-538

10:00 a.m.

Agriculture, Nutrition, and Forestry

Business meeting, to mark up S. 14, S. 18, S. 77, S. 100, title V of S. 124, S. 251, S. 398, S. 490, and S. 575, measures to develop and expand markets for U.S. agricultural commodities.

SR-332

Armed Services

To resume hearings to review those items in the President's budget for fiscal year 1984 which fall within its legislative jurisdiction and consider recommendations which it will make thereon to the Budget Committee, fo-

cusing on Navy/Marine Corps programs.
SD-628

Commerce, Science, and Transportation
Business, Trade, and Tourism Subcommittee
To hold hearings on S. 212, authorizing funds for fiscal years 1984 through 1986 for the U.S. Travel and Tourism Administration, Department of Commerce.
SR-253

Finance
Business meeting, to consider the nominations of Margaret M. Heckler, of Massachusetts, to be Secretary of Health and Human Services, and John A. Svahn, of Maryland, to be Under Secretary of Health and Human Services, S. 446 and S. 527, bills to revise certain IRS provisions with respect to the tax treatment of agricultural commodities received under a payment-in-kind program, S. 144, to establish the concept of reciprocity of market access as an objective for U.S. trade policy where American products are competitive, and to consider those items in the President's budget for fiscal year 1984 which fall within its legislative jurisdiction, and recommendations which it will make thereon to the Budget Committee.
SD-215

Foreign Relations
To hold hearings on proposed authorizations for the U.S. Information Agency.
SD-419

Governmental Affairs
Civil Service, Post Office, and General Services Subcommittee
To hold hearings on S. 450, proposed Mail Order Consumer Protection Amendments.
SD-342

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume oversight hearings on the implementation of vocational education programs administered by the Department of Education.
SD-430

Joint Economic
To hold hearings to examine the impact of the President's new federalism program on State and local government.
2247 Rayburn Building

10:30 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

11:00 a.m.
Judiciary
To resume oversight hearings on organized crime in the United States.
SD-226

11:30 a.m.
Foreign Relations
To hold hearings on proposed authorizations for the Board for International Broadcasting.
SD-419

2:00 p.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Peace Corps, and the Inter-American Foundation.
S-126, Capitol

Appropriations
Interior and Related Agencies Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1984 for the Department of the Interior and related agencies.
SD-138

Foreign Relations
Near Eastern and South Asian Affairs Subcommittee
To hold hearings on the Middle East.
SD-419

3:00 p.m.
Labor and Human Resources
To hold hearings on the nomination of Margaret M. Heckler, of Massachusetts, to be Secretary of Health and Human Services.
SD-430

MARCH 3

9:00 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on proposed legislation authorizing funds for the earthquake hazard reduction program.
SR-253

*Judiciary
Security and Terrorism Subcommittee
To resume hearings, in closed session, on proposed budget requests for fiscal year 1984 for the Drug Enforcement Administration.
SD-226

9:30 a.m.
Appropriations
Agriculture, Rural Development and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Animal and Plant Health Inspection Service, Food Safety and Inspection Service, and the Federal Grain Inspection Service, Department of Agriculture.
SD-124

Governmental Affairs
Intergovernmental Relations Subcommittee
To hold oversight hearings to discuss Executive Order 12372 which rescinds OMB Circular A-95 as of April 30, 1983, relating to the intergovernmental consultation process, and the proposed rules that implement the order.
SD-342

Rules and Administration
To hold hearings on S. Con. Res. 7, to authorize and provide for a bust of Carl Hayden to be placed in the Capitol.
SR-301

10:00 a.m.
Appropriations
Defense Subcommittee
To hold hearings to review budget estimates for fiscal year 1984 for research, development, and acquisition programs of the Department of Defense.
SD-192

Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for certain programs of the Agency for International Development.
S-126, Capitol

Appropriations
Transportation and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the U.S. Coast Guard, Department of Transportation.
SD-138

Budget
To resume hearings in preparation for reporting the first concurrent resolution on the fiscal year 1984 congressional budget.
SD-608

Finance
To resume hearings to review structural unemployment initiatives developed by the administration, and to discuss the current state of the national unemployment situation.
SD-215

Foreign Relations
Closed briefing on worldwide intelligence matters.
S-116, Capitol

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To continue oversight hearings on the implementation of vocational education programs administered by the Department of Education.
SD-430

Select on Intelligence
Budget Authorization Subcommittee
To resume closed hearings on proposed legislation authorizing funds for fiscal year 1984 for the intelligence community.
S-407, Capitol

10:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold hearings on proposed legislation authorizing funds for the National Science Foundation.
SR-253

11:00 a.m.
Judiciary
To continue oversight hearings on organized crime in the United States.
SD-226

1:00 p.m.
*Judiciary
Immigration and Refugee Policy Subcommittee
Business meeting, to consider pending calendar business.
SD-234

2:00 p.m.
Appropriations
Foreign Operations Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1984 for certain programs of the Agency for International Development.
S-126, Capitol

Appropriations
Energy and Water Development Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for solar and renewable energy programs of the Department of Energy.
SD-192

Select on Intelligence
Budget Authorization Subcommittee
To continue closed hearings on proposed legislation authorizing funds for fiscal year 1984 for the Intelligence community.
S-407, Capitol

3:30 p.m.
Select on Ethics
To hold a general business meeting.
Room to be announced

MARCH 4

9:00 a.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Economic Regulatory Administration, Energy Information Administration, and the Office of Hearings and Appeals, all of the Department of Energy.
SD-192

9:30 a.m.
Appropriations
Business meeting, to consider proposed legislation appropriating funds for job assistance programs, committee report to the Budget Committee, and budget deferrals of the Economic Development Administration of the Department of Commerce, and the Department of Agriculture.
SD-192
Energy and Natural Resources
Energy Research and Development Subcommittee
To resume hearings on the President's budget request for fiscal year 1984 for the Department of Energy's research and development programs, focusing on nuclear energy programs (other than breeder reactor programs).
SD-366
Joint Economic
To hold hearings on the employment-unemployment situation for the month of February.
SD-628

10:00 a.m.
Finance
To hold hearings on the administration's new federalism proposal.
SD-215
Judiciary
To hold hearings on S. 216, proposed Federal Anti-Tampering Act.
SD-226

MARCH 7

8:30 a.m.
Appropriations
Labor, Health and Human Services; Education, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Department of Education.
SD-138

9:30 a.m.
Judiciary
Constitution Subcommittee
To resume hearings on the legal ramifications of constitutional amendment proposals, including S. J. Res. 3, with the specific goal of reversing the Supreme Court's decision in Roe against Wade, relating to the right to abortion.
SD-226

10:00 a.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1983 for the U.S. Representative to the United Nations, and voluntary contributions to international organizations and programs of the United Nations.
SD-192
Energy and Natural Resources
To hold oversight hearings on the implementation of the Energy Emergency Preparedness Act (P.L. 97-229).
SD-366
Judiciary
Immigration and Refugee Policy Subcommittee
To resume hearings on S. 529, to revise and reform the Nation's immigration laws.
SD-418

MARCH 8

8:30 a.m.
*Energy and Natural Resources
Energy Conservation and Supply Subcommittee
To hold hearings to review the President's budget request for fiscal year 1984 for the Department of Energy's conservation and supply programs.
SD-366

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold closed hearings on proposed legislation authorizing funds for the National Aeronautics and Space Administration.
SR-253
Energy and Natural Resources
*Energy Conservation and Supply Subcommittee
To hold hearings on S. 589, authorizing funds for fiscal year 1984 for capital improvement projects on Guam.
SD-366

10:00 a.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Export-Import Bank of the United States.
S-126, Capitol
Appropriations
Transportation and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the U.S. Railway Association, and Conrail.
SD-138
Environment and Public Works
Environmental Pollution Subcommittee
To hold hearings on S. 431, authorizing funds for fiscal years 1983 through 1987 for clean water programs, and S. 432, extending the 1984 compliance date for certain requirements of the Clean Water Act.
SD-406
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To hold hearings on the proposed Education for Economic Security Act, and to review math and science education programs in elementary and secondary schools.
SD-430
Select on Intelligence
Budget Authorization Subcommittee
To resume closed hearings on proposed legislation authorizing funds for fiscal year 1984 for the intelligence community.
S-407, Capitol
Joint Economic
To resume hearings to examine the impact of the President's new federalism program on State and local government.
2212 Rayburn Building

11:30 a.m.
Veterans' Affairs
To hold hearings to receive legislative recommendations for fiscal year 1984 from the Veterans of Foreign Wars.
SR-325

2:00 p.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Holocaust Memorial Council, and the National Endowment for the Arts.
SD-192
Appropriations
Energy and Water Development Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for energy research and environment programs of the Department of Energy.
SD-192
Select on Intelligence
Budget Authorization Subcommittee
To continue closed hearings on proposed legislation authorizing funds for fiscal year 1984 for the intelligence community.
S-407, Capitol

MARCH 9

8:30 a.m.
Appropriations
Labor, Health and Human Services, Education, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for elementary and secondary education, education block grant, and impact aid.
SD-124

9:00 a.m.
Commerce, Science, and Transportation
Communications Subcommittee
To hold hearings on proposed legislation authorizing funds for the Federal Communications Commission.
SR-232A

9:30 a.m.
Agriculture, Nutrition, and Forestry
Soil and Water Conservation Subcommittee
To hold hearings on proposed legislation providing for soil and water conservation programs.
SR-328A
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To continue hearings on proposed legislation authorizing funds for the National Aeronautics and Space Administration.
SR-253
Energy and Natural Resources
To hold hearings on proposed legislation relating to natural gas policy.
SD-366
*Governmental Affairs
Permanent Subcommittee on Investigations
To hold closed hearings to investigate alleged involvement of organized crime and mismanagement of funds in

the hotel and restaurant workers union (HEREIU).
SD-342

10:00 a.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings to review the current status of the multilateral development banks of the Department of the Treasury.
SD-192

Appropriations
Transporation and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Architectural and Transportation Barriers Compliance Board, and the Office of the Inspector General and the Office of the Secretary, Department of Transportation.
SD-138

Environment and Public Works
Environmental Pollution Subcommittee
To continue hearings on S. 431, authorizing funds for fiscal years 1983 through 1987 for clean water programs, and S. 432, extending the 1984 compliance date for certain requirements of the Clean Water Act.
SD-406

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To continue hearings on the proposed Education for Economic Security Act, and to review math and science education programs in elementary and secondary schools.
SD-430

Veterans' Affairs
To hold hearings on proposed legislation providing for veterans' health care services.
SR-418

1:30 p.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To resume hearings on proposed legislation authorizing funds for the National Science Foundation.
SR-253

2:00 p.m.
Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the National Park Service of the Department of the Interior.
SD-192

MARCH 10

8:30 a.m.
Appropriations
Labor, Health and Human Services, Education, and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for vocational and adult education, education for the handicapped, and rehabilitation services and handicapped research.
SD-192

9:00 a.m.
Commerce, Science, and Transportation
To resume hearings on proposed legislation authorizing funds for fiscal year 1984 for the National Oceanic and Atmospheric Administration, Department of Commerce, focusing on fisheries programs.
SR-253

9:30 a.m.
*Appropriations
Commerce, Justice, State, the Judiciary, and Related Agencies Subcommittee
To hold hearings to receive testimony from the Secretary of Commerce on the overall budget for the Department of Commerce, and on proposed budget estimates for fiscal year 1984 for general administration, Economic Development Administration, International Trade Administration, U.S. Travel and Tourism Administration, Patent and Trademark Office, National Telecommunications and Information Administration, National Bureau of Standards, Minority Business Development Administration, Economic and Statistical Analysis, and the Bureau of the Census.
S-146, Capitol

Energy and Natural Resources
To continue hearings on proposed legislation relating to natural gas policy.
SD-366

10:00 a.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for certain programs under the subcommittee's jurisdiction.
SD-126, Capitol

Appropriations
HUD-Independent Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Veterans Administration.
SD-124

Commerce, Science, and Transportation
Surface Transportation Subcommittee
To resume hearings on automobile safety, focusing on occupant protection.
SD-562

Environment and Public Works
Environmental Pollution Subcommittee
To continue hearings on S. 431, authorizing funds for fiscal years 1983 through 1987 for clean water programs, and S. 432, extending the 1984 compliance date for certain requirements of the Clean Water Act.
SD-406

*Judiciary
Separation of Powers Subcommittee
To hold closed hearings on the Taiwan Communique.
SD-226

Labor and Human Resources
Alcoholism and Drug Abuse Subcommittee
To hold hearings on problems occurring from the manufacture and distribution of imitation controlled substances, known as look-alike drugs.
SD-628

Select on Intelligence
Budget Authorization Subcommittee
To resume closed hearings on proposed legislation authorizing funds for fiscal year 1984 for the intelligence community.
S-407, Capitol

2:00 p.m.
Appropriations
Foreign Operations Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for certain programs under the subcommittee's jurisdiction.
S-126, Capitol

Appropriations
Interior and Related Agencies Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Geological Survey of the Department of the Interior.
SD-192

Appropriations
Energy and Water Development Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1984 for the Federal Energy Regulatory Commission of the Department of Energy, and the Nuclear Regulatory Commission.
SD-192

Environment and Public Works
Nuclear Regulation Subcommittee
To hold hearings on proposed legislation authorizing funds for fiscal years 1984 and 1985 for the Nuclear Regulatory Commission.
SD-406

MARCH 11

9:00 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To continue hearings on automobile safety, focusing on the role of government and industry in bringing improved car safety technology to the marketplace.
SR-253

9:30 a.m.
Energy and Natural Resources
To continue hearings on proposed legislation relating to natural gas policy.
SD-366

10:00 a.m.
Finance
To hold hearings to examine certain tax preferences for banks, credit unions, savings and loan associations, and other financial services.
SD-215

Select on Intelligence
Budget Authorization Subcommittee
To continue closed hearings on proposed legislation authorizing funds for fiscal year 1984 for the intelligence community.
SD-407, Capitol

MARCH 12

9:30 a.m.
Energy and Natural Resources
To continue hearings on proposed legislation relating to natural gas policy.
SD-366

MARCH 14

8:30 a.m.
Appropriations
Labor, Health and Human Services, Education, and Related Agencies Subcommittee

HOUSE OF REPRESENTATIVES—*Tuesday, March 1, 1983*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

We express our appreciation to You, O God, for all the gifts of life. In spite of the turmoil that people face and the uncertainty of tomorrow, we yet are aware that today is a day of grace, in which we have opportunity to live and love and serve. Make us conscious of the blessings of this day and the ways we have to live our lives in thanksgiving for all the good promises that are ours. For this day and all Your mercies, O God, we offer this our prayer. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 65. Concurrent resolution welcoming Her Majesty Queen Elizabeth II and His Royal Highness The Prince Philip, Duke of Edinburgh, on their official visit to the United States.

The message also announced that the Vice President, pursuant to the provisions of Public Law 86-380, appointed Mr. ROTH and Mr. DURENBERGER as members, on the part of the Senate, of the Advisory Commission on Intergovernmental Relations.

The message also announced that the President pro tempore, pursuant to the provisions of Public Law 94-118, appointed Mr. ROTH as a member, on the part of the Senate, of the Japan-United States Friendship Commission.

The message also announced that the Vice President, pursuant to the provisions of Public Law 83-420, appointed Mr. D'AMATO as a member, on the part of the Senate, of the board of directors of Gallaudet College.

The message also announced that the Vice President, pursuant to the provisions of Public Law 81-754, appointed Mr. HATFIELD as a member, on the part of the Senate, of the National Historical Publications and Records Commission.

The message also announced that the President pro tempore, pursuant to the provisions of Public Law 96-388, as amended by Public Law 97-84, appointed Mr. BOSCHWITZ, Mr. DANFORTH, and Mr. DOLE as members, on the part of the Senate, of the U.S. Holocaust Memorial Council.

ETERNAL HOSTILITY TO TYRANNY

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, we learned last week that the Justice Department, the constitutional guardian of our liberties, has recently established itself as a ratings and censorship bureau over the films which Americans are expected to see.

I would remind the Department of Justice of an American birthright—the subject of Thomas Jefferson's remarks when he said, "I have sworn eternal hostility to every form of tyranny over the mind of man."

The Bill of Rights guarantees the freedom of mind and the American birthright, but we have learned that we must constantly defend them, and apparently not all of the would-be tyrants are foreign in origin.

Perhaps the Appropriations Committee would be well advised to review the budget of the Department of Justice to determine how much of it is being spent for the suppression of free inquiry.

Every age has its cranks and bullies who would presume to tell the rest of us what we can think about, and with this new act of attempted coercion fresh upon our minds, should take note that it is particularly dangerous for the executive branch to try this kind of tyranny. They are wrong over there if they think the taxpayers are willing to pay for it.

THE NEED FOR A POLITICAL INITIATIVE ON EL SALVADOR

(Mr. McHUGH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McHUGH. Mr. Speaker, having just returned from a trip to El Salvador, I would like to comment briefly on press reports that the President is considering a substantial increase in military assistance to that government, including an increase in U.S. personnel.

For the past 2 years, Mr. Speaker, the United States has been pursuing a military solution in El Salvador. Yet, despite the fact that we have provided almost $144 million in military aid since fiscal year 1981, the military situation is obviously deteriorating rather than improving.

This underscores my view, and the view of an increasing number of Americans, that there cannot be a purely military solution to the problems in El Salvador. While U.S. military aid can probably prevent a victory by the opposition, at least in the short term, it cannot defeat the opposition, and thus the war will only continue and intensify. This will inevitably lead to increasing polarization in this country and in Central America itself.

It is time, Mr. Speaker, for the administration to reassess U.S. policy and, in consultation with Congress, to explore the possibility of achieving a political solution in El Salvador that addresses the underlying causes of the conflict in that nation. This does not mean turning over power to the opposition through negotiations but rather a demonstrated willingness to discuss without preconditions the basis for a political settlement within the context of free elections.

If the administration is willing to do this, I believe that many of us in Congress would be willing to work with the administration in an effort to stabilize the immediate situation as a basis for moving toward a political solution. However, if the administration continues to ignore congressional concerns and continues down the present path of ever-increasing military involvement, I believe there will be increasing divisiveness in this country and further deterioration in El Salvador.

In short, it is my hope that the Reagan administration will not move forward with proposals to deepen our military involvement in El Salvador until it has explored the possibilities for achieving a bipartisan consensus on U.S. policy. Many of us believe that it is worth the time and effort to see whether such a consensus can be achieved.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Hasty action by the administration can only undermine such efforts. Specific action should follow rather than precede efforts to achieve a bipartisan consensus between the administration and Congress on U.S. policy in El Salvador.

SUPPORT URGED FOR NATIONAL DEVELOPMENT INVESTMENT ACT

(Mr. CLARKE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CLARKE. Mr. Speaker, today the Economic Development Subcommittee of the Public Works and Transportation Committee is considering H.R. 10, the National Development Investment Act.

One section of this bill provides for the continuation of the Appalachian Regional Commission, a program which has been of invaluable help to the whole Appalachian area but which would be ended under the administration's proposed budget.

This Commission has brought highways and economic development, hospital construction, vocational education facilities, day care centers, water systems, sewer systems, libraries, and many other projects which are yielding permanent benefits to the people of the Appalachian area. Most of these projects could not have been funded by local governments without ARC help.

The Appalachian Commission has reduced unemployment and raised the whole level of education and training in the region.

Several hundred counties in Appalachia have not participated fully in the work of the Commission and still need help even as the overall ARC program is being phased down from its original level. For this reason, Mr. Speaker, I urge strong support of H.R. 10.

ELECTION OF MEMBERS TO STANDING COMMITTEES

Mr. MICHEL. Mr. Speaker, I offer a privileged resolution (H. Res. 108) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 108

Resolved, That the following named Members be, and they are hereby, elected to the following standing committees of the House of Representatives;

Committee on the Budget: Phil Gramm, Texas, to rank following Representative Bethune, Arkansas;

Committee on Government Operations: Larry Craig, Idaho;

Committee on Public Works and Transportation: Lynn Martin, Illinois, to rank following Representative Daub, Nebraska;

Committee on Veterans' Affairs: Phil Gramm, Texas, to rank after Representative Denny Smith, Oregon.

The resolution was agreed to.

A motion to reconsider was laid on the table.

NO REASON FOR EXORBITANT NATURAL GAS PRICES

(Mr. ROTH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROTH. Mr. Speaker, when we have a glut of natural gas, there is no reason our consumers are facing exorbitant natural gas prices. In the lame-duck session, late last year, we should have addressed this issue and faced this issue squarely, as many of us pleaded; but there were forces here in Congress who saw it differently.

Now is preeminently the time for us to act, and we must have answers to some nagging questions.

First, why are we purchasing natural gas from Algeria or even Canada at three times the market price?

Second, why, under the lower cost contracts signed in the last 6 months, lowering the producers' costs, have consumers' costs continued to go up and up?

These questions must be answered, and Congress must act now in the best interests of all the people.

FORMER DEFENSE OFFICIALS MISSED THE BOAT ON DEFENSE

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, one of the prominent headlines in this morning's news read, "Defense Cuts of $135 Billion Urged." I was gratified to see that an accompanying headline underscored the fact that these are former administration officials who are leading this charge against defense spending.

These are the same former high officials who presided over our Nation's crumbling defense posture during the last two decades. These same former national defense policymakers are partly responsible for the now critical rebuilding of our aged weapons systems, the need to modernize our Navy and Air Force with adequate ships and planes, and our need to boost military pay to attract quality soldiers.

These same former officials neglected to foresee two decades of an unsurpassed offensive military machine being assembled in the Soviet Union, as well as an overwhelming arsenal of missiles being targeted toward Western Europe.

These former officials missed the boat then; they are discredited. They certainly are not privy to the knowledge our leaders have today. Why should we listen to them now?

EL SALVADOR: TIME TO NEGOTIATE, NOT ESCALATE

(Mr. LEACH of Iowa asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LEACH of Iowa. Mr. Speaker, at the very moment when parties throughout Central America are signaling increased willingness to consider a negotiated rather than a military settlement to conflicts in the region, when the armed opposition in El Salvador has announced a unilateral cease-fire, and on the eve of the historic visit to the region by His Holiness Pope John Paul II—a human symbol of peace and reconciliation—the approach of the Reagan administration appears to be a one-note litany of more money, more guns, more bullets and now the possibility of more advisers, whose noncombatant role is, ominously, said to be under review.

The administration continues to blunder ahead under the mistaken conception that one-dimensional military options will solve deep-seated political and social problems. At a time when we desperately need a flexible two-track policy of firmness in support of democratic ideals coupled with a willingness to seek negotiated settlements to avoid further bloodshed, the administration seems committed to a program that might be labeled all stick and no carrot.

Once again we see applied that misguided principle which helped shape our effort in Southeast Asia two decades ago—if the policy does not work, double the money and men and try again. This domino theory of decisionmaking may cause us to stumble unwittingly into a wider war in Central America that neither we nor our southern neighbors desire.

Mr. Speaker, now is the time to negotiate, not escalate. We simply must cease treating our neighbors to the south as pawns in an East-West conflict. Protecting the pride of politicians in America must never be considered more important than saving the lives of innocent Third World people.

Instead of further sabre-rattling, the administration should signal American willingness to explore more peaceful approaches to the problems in El Salvador and in Central America as a whole. A first step on the path to peace, I am convinced, would be the appointment of a prestigious special envoy who would be empowered to work with all interested parties in the region to find solutions to the kinds of social and political problems that bombs and guns will only exacerbate.

Mr. Speaker, as one Member of Congress, I object strenuously to the administration's tapping of an additional $60 million from the Government's unforeseen emergency fund to buy more guns for El Salvador's military.

The unforeseen emergency in America today is the joblessness of our people, not the failure of an interventionist foreign policy.

A REALISTIC COHERENT DEFENSE STRATEGY NEEDED

(Mrs. ROUKEMA asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. ROUKEMA. Mr. Speaker, the projected Federal deficits are both disturbing and unacceptable. There can no longer be any question but that we must change the structure of Federal spending. A necessary part of this effort must be to change the anticipated spending levels for defense acquisitions. We must have a realistic and coherent defense strategy or face the consequences—confiscatory taxes, unacceptably high deficits or both.

Outside of the Congress the momentum for this change continues to build. The cover of time magazine, the discussions of the Business Roundtable, the report of the National Governor's Conference all agree. We cannot allow defense spending to increase by 10 percent. The economy cannot accommodate such a jump, and the American people will not tolerate such reckless growth. If we do not begin now to examine our major defense investments, events will overtake us and the damage to our economic well-being—as well as our defense capabilities—will be irrevocable.

The facts are clear. We must reduce our procurement account. It is procurement which the administration would triple between 1980 and 1984. It is procurement which would double again between 1984 and 1988. We would rather work with the administration—but we can, if we must, work without them.

I call upon my Republican colleagues to join with me in seeking Secretary Weinberger's leadership and cooperation.

The decisions we make today on major investment programs will determine, for this decade and beyond, not only our defense capability but the success or failure of our entire economic program.

□ 1215

EROSION CONTINUES TO THREATEN VIRGINIA'S TANGIER ISLAND

(Mr. BATEMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BATEMAN. Mr. Speaker, I am today introducing legislation to authorize the Army Corps of Engineers to construct an erosion control structure on Tangier Island, Va. This project was previously approved by the House as section 103 of the Water Resources Development Act of 1979, legislation which never received final congressional action.

Unfortunately, erosion on this Chesapeake Bay island has not slowed, and prompt action is imperative, if the unique community on the island is to be saved. The inhabitants are direct descendants of early English settlers. Like their 17th century forebears, the 20th century islanders speak with an Elizabethan accent, and make their living off the resources of the bay. Forcing the members of this traditional community off the island would cause grave social and economic hardships for them, and would significantly diminish the diversity of America's cultural heritage.

The erosion of the island also threatens two federally funded construction projects, a water treatment plant and an airport. The water treatment plant, currently under construction, has been funded with $3.5 million from the Environmental Protection Agency, and the Department of Housing and Urban Development. The airport has received $650,000 in Federal funds during several phases of construction over the last 15 years. To allow this substantial Federal investment to be endangered would, of course, be most unfortunate.

I urgently solicit the support and assistance of all Members of Congress in gaining approval of this important project.

MORATORIUM ON SEAL HUNT IN CANADA

(Mr. JEFFORDS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. JEFFORDS. Mr. Speaker, under the terms of House Concurrent Resolution 236 and Senate Resolution 266, both passed in the 97th Congress, today is the National Day of the Seal.

How fitting and gratifying it is, then, to get the news that yesterday the Council of Ministers of the European Community voted a 2-year ban on the import of products from young harp seals. This action is the result of years of work by many citizens around the world who have expressed outrage at the brutal clubbing of baby harp seals on the ice floes off Newfoundland every year around this time. Many of these concerned citizens are serving in the U.S. Congress. Over the last year, a majority of the Members of this House have joined me in sending telexes to the Europeans urging them to enact this ban.

This 2-year moratorium comes on the heels of a temporary, voluntary ban which expired today. Taken together, these two actions, along with a similar U.S. policy contained in our Marine Mammal Protection Act, have all but stopped the clubbing of these baby seals. For the first time in anyone's memory, the Canadian Government has called off the hunt this year. Given that there will be almost no market for the white pelts in the next 2 years, it appears likely that the hunt can be stopped indefinitely.

To all of you who have joined me in trying to raise this issue in Europe and around the world, I want to take this opportunity to thank you. As one who has witnessed the seal hunt first hand, I can tell you that today marks one small step toward a more humane world.

CONCERN FOR SAFETY OF U.S. TROOPS IN LEBANON

(Mr. SKELTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. SKELTON. Mr. Speaker, this is the third time I have addressed this body regarding the U.S. Marines in Lebanon, and each time my concern for their safety has grown.

Last week, the administration speculated that it would increase the size and duration of the U.S. presence in Lebanon. I have written the President, telling him that I believe this action would be ill advised under current circumstances and urging him to bring our troops home. I wish to submit the text of that letter for the RECORD.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., March 1, 1983.

Hon. RONALD REAGAN,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I am distressed to learn of your administration's speculation of increasing the size of the U.S. Marine contingent in Lebanon. Once again, I must appeal to you to bring our troops home.

At the time of their deployment in September of 1982, you advised Congress that the Marines would be in Lebanon for a limited period of time and that there was no intention of our troops becoming involved in hostilities. It has become apparent that neither of these criterion exists at this time. Inasmuch as the 1973 War Powers Act limits to 60-90 days your authority to commit troops to hostile or potentially hostile areas without Congressional approval or a declaration of war, and considering that your compliance with the War Powers Act has already been called into question, I think you would be poorly advised to increase the U.S. presence in Lebanon under current circumstances.

In the interest of protecting the lives of American Servicemen, I urge you to bring our boys home.

With best regards,
Very truly yours,

IKE SKELTON,
Member of Congress.

KEY POINTS IN CONSIDERATION OF UPCOMING JOBS BILL

(Mr. EDGAR asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EDGAR. Mr. Speaker, as we move ahead with consideration of an emergency stimulus package to deal with the current unacceptable rate of unemployment, I think it is important to consider some key points:

First, any jobs package should be targeted both toward needed projects and activities and toward those areas of the Nation which are experiencing the most dire unemployment problems.

Second, we ought to spend money in those labor intensive fields which provide the greatest stimulus effect on the overall economy. We should not be appropriating money that will sit on the shelf waiting to be expended.

The sketchy reports that we have received thus far on the activities of the Appropriations Committee leads me to have some worries about these key points. The jobs bill that the committee is going to present to us this week contains very little assurance that money will go where it is needed most. Do we really need over half a billion dollars for emergency water resource development, while employment training and assistance is funded only at $200 million and health care programs at only $80 under the current formulation of the jobs bill?

Last Thursday I introduced a bill which would target Federal assistance for repairing water supply infrastructure to those distressed regions of the country which have traditionally been ineligible for Federal water development funds.

Today I am introducing a jobs bill that would target stimulus to a series of labor-intensive, environmentally beneficial programs ranging from public transportation to enhancement of fish and wildlife management facilities. I am introducing the bill in an effort to promote a discussion of alternatives to the more traditional types of public works projects often criticized for their environmental impact. My bill would create new programs in areas ignored or underfunded in past efforts to develop energy and water resources. Conservation of resources and rehabilitation of existing facilities would be emphasized.

It is my hope that future efforts to stimulate the economy and create jobs will take into account the need to protect the environment and will recognize the jobs-creating potential of resource conservation.

The legislation is also different from previous efforts at public works jobs creation in that safeguards are established through citizen review boards to insure that program money is wisely spent on needed projects for the benefit of the environment.

The bill is a progressive attempt to wed environmental concerns with efforts to deal firmly with unemployment and steer our national economy toward recovery and growth.

HOUR OF MEETING ON TOMORROW

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House convenes tomorrow, Wednesday, March 2, 1983, it convene at 12 o'clock noon.

The SPEAKER pro tempore (Mr. ALEXANDER). Is there objection to the request of the gentleman from Texas?

There was no objection.

FORFEITURE A TOOL IN FIGHTING DRUG TRAFFICKERS

(Mr. HUGHES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUGHES. Mr. Speaker, at the National Governor's Conference this weekend, the Attorney General and the FBI Director said that we need new tools to combat drug trafficking, such as better means of seizing the profits of drug traffickers, and using those forfeited profits to finance other antidrug efforts.

What they did not say to Governors was that the President had such a bill on his desk last year, and that it was vetoed at their urging. They objected to a provision which they called radical that would coordinate drug enforcement efforts among the various departments and agencies of Government.

Actually, that approach was not radical at all. We have in fact had, since 1979, a drug-coordinating office, although its role has been relegated to essentially education and demand reduction, rather than coordinating overall policy and enforcement.

As chairman of the Crime Subcommittee, I have assured both the White House and the Justice Department that I will continue to work with them in a joint effort to fight crime and combat drug abuse and trafficking. That effort is not well served, however, when the Justice Department unveils so-called bold new initiatives that it in fact torpedoed just a few months ago.

JOBS TELETHON PROGRAM PROVES EFFECTIVE

(Mr. KOSTMAYER asked and was given permission to address the House for 1 minute.)

Mr. KOSTMAYER. Mr. Speaker, today the House will consider the American Conservation Corps bill, putting thousands of young men and women in this country back to work. But, Mr. Speaker, that is only part of the answer to national unemployment. I think the other half of the solution can be found, not here in Washington but back home in our congressional districts.

This past Saturday and Sunday in Bucks County and eastern Montgomery County, Pa., we organized a jobs telethon, urging people without work to call us. We received almost 4,000 telephone calls from the unemployed this past weekend and today, Tuesday, we are asking employers who have jobs available to call us. In the first hour this morning we received over 200 job offers for people who were looking for work.

This, I think, can help form part of the solution, with the private sector and the public sector working together, working here in Washington and at home as well.

Mr. Speaker, I urge other Members of the House to consider the jobs telethon idea. It will not solve the unemployment problem in America overnight, but at least in southeastern Pennsylvania we have helped put several hundred people back to work.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1310, EMERGENCY MATHEMATICS AND SCIENCE EDUCATION ACT

Mr. MOAKLEY, from the Committee on Rules, submitted a privileged report (Rept. No. 98-10) on the resoluton (H. Res. 109) providing for the consideration of the bill (H.R. 1310) to provide assistance to improve elementary, secondary, and postsecondary education in mathematics and science; to provide a national policy for engineering, technical, and scientific personnel; to provide for cost sharing by the private sector in training of such personnel; and for other purposes, which was referred to the House Calendar and ordered to be printed.

AMERICAN CONSERVATION CORPS ACT OF 1983

Mr. SEIBERLING. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 999) to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public or Indian lands, and for other purposes, as amended.

The Clerk read as follows:

H.R. 999

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "American Conservation Corps Act of 1983".

CONGRESSIONAL FINDINGS AND PURPOSE

SEC. 2. (a) FINDINGS.—The Congress finds that—

(1) public lands, resources, and facilities, including parks, rangelands, wildlife refuges, forests, water resources, fishery facilities, historic and cultural sites, and urban and community resources, have become subject to increasing public use and resource production demands;

(2) the condition of many of these lands, resources, and facilities has deteriorated as a result of these increasing uses and demands and as a result of the inability of Government agencies to adequately staff and fund the maintenance necessary to arrest the deterioration;

(3) public land management agencies have a responsibility to assure that public lands and resources are managed—

(A) to assure continued productivity,

(B) to protect public health and safety, and

(C) to assure their wise and economic conservation, maintenance, and use;

(4) a program designed to systematically guide and enhance the conservation, rehabilitation, and improvement of our public lands, resources, and facilities is urgently needed; and

(5) youth conservation programs have proven highly successful and cost effective in providing training and jobs for unemployed youth and in assisting land management agencies at all levels of government to reduce the backlog of neglected public land conservation, rehabilitation and improvement projects and to carry out other public land resource management work.

(b) PURPOSE.—It is the purpose of this Act to—

(1) reduce the backlog of conservation, rehabilitation, and improvement work on the public lands, prevent the further deterioration of public lands and resources and facilities, conserve energy and restore and maintain community lands, resources, and facilities;

(2) establish an American Conservation Corps to carry out a program to improve, restore, maintain, and conserve public lands and resources in the most cost-effective manner;

(3) use such program to assist State and local governments in carrying out needed public land and resource conservation, rehabilitation, and improvement projects;

(4) provide for implementation of the program in such manner as will foster conservation and the wise use of natural and cultural resources through the establishment of working relationships among the Federal, State, and local governments, Indian tribes, and other public and private organizations; and

(5) use this program to increase (by training and other means) employment opportunities for young men and women especially those who are economically, socially, physically, or educationally disadvantaged and who may not otherwise be productively employed.

DEFINITIONS

SEC. 3. For purposes of this Act:

(1) The term "Secretary" means the Secretary of the Interior, except where otherwise expressly provided.

(2) The terms "public lands" and "publicly owned lands" mean any lands and waters (or interest therein) owned or administered by the United States or by any agency or instrumentality of a State or local government.

(3) The term "program" means the public lands conservation, rehabilitation, and improvement program established under this Act.

(4) The term "program agency" means any Federal agency or instrumentality with responsibility for the management of any public or Indian lands, any State agency designated by the Governor to manage the program in that State, and the governing body of any Indian tribe.

(5) The term "Indian tribe" means any Indian tribe, band, nation, or other group which is recognized as an Indian tribe by the Secretary. Such term also includes any Native village corporation, regional corporation, and Native group established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1701 et seq.).

(6) The term "Indian" means a person who is a member of an Indian tribe.

(7) The term "Indian lands" means any real property owned by an Indian tribe, any real property held in trust by the United States for individual Indians or Indian tribes, and any real property held by individual Indians or Indian tribes which is subject to restrictions on alienation imposed by the United States.

(8) The term "employment security service" means the agency in each of the several States with responsibility for the administration of unemployment and employment programs, and the oversight of local labor conditions.

(9) The term "chief administrator" means the head of any program agency as that term is defined in paragraph (4).

(10) The term "enrollee" means any individual enrolled in the American Conservation Corps in accordance with section 5.

(11) The term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands, American Samoa, the Commonwealth of the Northern Mariana Islands, and the Trust Territories of the Pacific Islands.

PUBLIC LANDS CONSERVATION, REHABILITATION, AND IMPROVEMENT PROGRAM

SEC. 4. (a) ESTABLISHMENT AND ADMINISTRATION OF PROGRAM.—Not later than ninety days after the enactment of this Act, the Secretary, in cooperation with the Secretary of Agriculture and after consultation with the Secretary of Labor, shall establish and administer a public lands conservation, rehabilitation, and improvement program to carry out the purposes of this Act. Under such program, the Secretary shall provide assistance to program agencies for the establishment and operation of residential and nonresidential American Conservation Corps centers and for the implementation by the American Conservation Corps of projects designed to carry out such purposes.

(b) PROJECTS INCLUDED.—The program established under this section may include, but shall not be limited to, projects such as—

(1) forestry, nursery, and silvicultural operations;

(2) wildlife habitat conservation, rehabilitation, and improvement;

(3) rangeland conservation, rehabilitation, and improvement;

(4) recreational area development, maintenance, and improvement;

(5) urban revitalization;

(6) historical and cultural site preservation and maintenance;

(7) fish culture and habitat maintenance and improvement and other fishery assistance;

(8) road and trail maintenance and improvement;

(9) erosion, flood, drought, and storm damage assistance and control;

(10) stream, lake, and waterfront harbor and port improvement, and pollution control;

(11) insect, disease, rodent, and fire prevention, and control;

(12) improvement of abandoned railroad bed and right-of-way;

(13) energy conservation projects and renewable resource enhancement;

(14) recovery of biomass from public lands, particularly forestlands; and

(15) reclamation and improvement of strip-mined lands.

(c) PREFERENCE FOR CERTAIN PROJECTS.—The program shall provide a preference for those projects which—

(1) will provide long-term benefits to the public;

(2) will provide meaningful work experience to the enrollee involved;

(3) will be labor intensive; and

(4) can be planned and initiated promptly.

(d) LIMITATION TO PUBLIC LANDS.—Projects to be carried out under the program shall be limited to projects on public lands or Indian lands except where a project involving other lands will provide a documented public benefit and reimbursement will be provided to the program agency for that portion of the total costs of the program which does not provide a public benefit. Notwithstanding any other provision of law, any reimbursement referred to in the preceding sentence shall be retained by the program agency and shall be used by the agency for purposes of carrying out other projects under the program.

(e) CONSISTENCY.—The Secretary and the chief administrators of other program agencies shall assure that projects selected and carried out under this Act for conservation, rehabilitation, or improvement of any public lands are consistent with the provisions of law and policies relating to the management and administration of such lands, with all other applicable provisions of law, and with all management, operational, and other plans and documents which govern the administration of the area.

(f) CONSERVATION CENTERS.—(1) Each program agency may apply to the Secretary for approval of conservation centers to carry out projects under this Act.

(2) Applications for approval of conservation centers shall be submitted to the Secretary in such manner as the Secretary may prescribe. Each application shall contain, in such detail as the Secretary deems necessary—

(A) a comprehensive description of the objectives and performance goals for the conservation center and a description of the types of projects to be carried out, including a description of the types and duration of training (including work experience) to be provided;

(B) a description of the facilities and equipment to be available for use in the center;

(C) an estimate of the number of enrollees and crew leaders necessary for the proposed projects, the length of time for which the services of such personnel will be required, and the services which will be required for their support;

(D) a plan for managing the conservation center, supplying the necessary equipment

and material, and administering the payroll; and

(E) such other information as the Secretary shall prescribe.

(3) In approving conservation centers, the Secretary shall give due consideration to the cost and means of transportation available between the center and the homes of the enrollees who may be assigned to those centers. The location and type of conservation centers shall be selected in such manner as will increase the enrollment of economically, socially, physically, and educationally disadvantaged youths, and of youths from areas of high unemployment.

(g) LOCAL GOVERNMENT PARTICIPATION.—Any State carrying out a program under this Act shall provide a mechanism under which local governments in the State may be approved by the State to participate in the program and to carry out projects in accordance with the requirements of this Act.

(h) AGREEMENTS.—Program agencies may enter into contracts and other appropriate arrangements with local government agencies and nonprofit organizations for the management of conservation centers under the program.

(i) JOINT PROJECTS.—The Secretary is authorized to develop jointly with the Secretary of Labor regulations designed to allow, where appropriate, joint projects in which activities supported by funds authorized under this Act are coordinated with activities supported by funds authorized under employment and training statutes administered by the Department of Labor (including the Job Training Partnership Act). Such regulations shall provide standards for approval of joint projects which meet both the purposes of this Act and the purposes of such employment and training statutes under which funds are available to support the activities proposed for approval. Such regulations shall also establish a single mechanism for approval of joint projects developed at the State or local level.

ENROLLMENT, FUNDING, AND MANAGEMENT

SEC. 5. (a) ENROLLMENT IN PROGRAM.—(1) Enrollment in the American Conservation Corps shall be limited to individuals who, at the time of enrollment, are—

(A) unemployed;

(B) not less than sixteen or more than twenty-five years of age (except that programs limited to the months of June, July, and August may include individuals not less than fifteen years and not more than twenty-one years of age at the time of their enrollment); and

(C) citizens or lawful permanent residents of the United States or lawfully admitted alien parolees or refugees.

(2) Except in the case of a program limited to the months of June, July, and August, individuals who at the time of applying for enrollment have attained age sixteen but not attained age nineteen, and who are no longer enrolled in any secondary school shall not be enrolled unless they give adequate written assurances, under criteria to be established by the Secretary, that they did not leave school for the express purpose of enrolling.

(3) The selection of enrollees to serve in the American Conservation Corps in any conservation center shall be the responsibility of the chief administrator of the program agency. Enrollees shall be selected from those qualified persons who have—

(A) applied to, or been recruited by, the program agency, a State employment security service, an administrative entity under the Job Training Partnership Act, community or community-based nonprofit organization, the sponsor of an Indian program, or the sponsor of a migrant or seasonal farmworker program; and

(B) been screened for eligibility and referred to the program agency by the State employment security service.

(4) In the recruitment and selection of enrollees, special consideration shall be given to both—

(A) economically, socially, physically, and educationally disadvantaged youths, and

(B) youths residing in areas, both rural and urban, which have substantial unemployment.

(5)(A) Except for a program limited to the months of June, July, and August, any qualified individual selected for enrollment may be enrolled for a period not to exceed twenty-four months. When the term of enrollment does not consist of one continuous twenty-four-month term, the total of shorter terms may not exceed twenty-four months.

(B) No individual may remain enrolled in the American Conservation Corps after that individual has attained the age of twenty-six.

(b) SERVICES, FACILITIES, SUPPLIES, ET CETERA.—The program agency shall provide such quarters, board, medical care, transportation, and other services, facilities, supplies, and equipment as the Secretary deems necessary for conservation centers. Whenever possible, the Secretary shall make arrangements with the Secretary of Defense to have such logistical support provided by a military installation near the proposed center, including the provision of temporary tent centers where needed. The Secretary shall establish basic standards of health, nutrition, sanitation, and safety for all conservation centers, and shall assure that such standards are enforced.

(c) CONSERVATION CENTER MANAGEMENT AND PROJECT SUPERVISION.—(1) Every conservation center shall have sufficient supervisory staff appointed by the chief administrator which may include enrollees who have displayed exceptional leadership qualities.

(2) No project shall be undertaken without the on-site presence of knowledgeable and competent supervision, and all projects undertaken shall be documented in advance in an approved written project plan prepared in accordance with the provisions of section 4(e) of this Act.

(d) FUNDING.—(1) The Secretary may award grants to, or enter into agreements with, program agencies for the funding and operation of conservation centers approved by the Secretary under this Act.

(2) The Secretary shall not make any grant to, or enter into any agreement with any program agency for the funding of any conservation center under this Act unless such agency certifies that projects carried out by the conservation center will not—

(A) result in the displacement of individuals currently employed (either directly or under contract with any private contractor) by the program agency concerned (including partial displacement through reduction of nonovertime hours, wages, or employment benefits);

(B) result in the employment of any individual when any other person is in a layoff status from the same or substantially equivalent job within the jurisdiction of the program agency concerned; or

(C) impair existing contracts for services.

(3) Of the sums appropriated pursuant to paragraphs (6) (A) and (B) to carry out this Act for any fiscal year—

(A) not less than 35 per centum shall be made available by the Secretary for expenditure by State program agencies;

(B) not less than 25 per centum shall be made available by the Secretary for expenditure pursuant to agreements with the Secretary of Agriculture;

(C) not less than 25 per centum shall be made available by the Secretary for expenditure by program agencies within the Department of the Interior;

(D) not less than 5 per centum shall be made available by the Secretary for expenditure by the governing bodies of participating Indian tribes; and

(E) the remaining amount shall be made available by the Secretary for expenditure by other Federal program agencies and for demonstration projects or projects of special merit carried out by any program agency or by any nonprofit organization or local government which is undertaking or proposing to undertake projects consistent with the purposes of this Act;

10 per centum of the amount disbursed to State agencies under subparagraph (A) (or to local governments within the State where paragraph (4) applies) and 10 per centum of the amount disbursed to State agencies under paragraph (6)(C) shall be divided equally among the States and 90 per centum of such amount shall be distributed among such States proportionately according to the total youth population of such States between the ages of fifteen and twenty-five (as determined on the basis of the most recent census). Any State receiving funds under subparagraph (A) or under paragraph (6)(C) for the operation of any conservation center shall be required to provide not less than 15 per centum of the cost of operation of such center. Any State receiving funds under subparagraph (A) or under paragraph (6)(C) for any fiscal year shall provide not less than 10 per centum of such funds to local governments approved by the State under section 4(g) to carry out projects under this Act unless no such local government in that State is approved before the end of such fiscal year. In any case where no such local government is approved before the end of such fiscal year, such 10 per centum may be expended by the State in accordance with this Act.

(4) If, at the commencement of any fiscal year, any State does not have a program agency designated by the Governor to manage the program in that State, then during such fiscal year each local government within such State may establish a program agency to carry out the program within the political subdivision which is under the jurisdiction of such local government. In any such case, the State share (or a reasonable portion thereof, including amounts authorized to be appropriated pursuant to paragraph (6)(C)) for such State may be made available by the Secretary for expenditure by such local government program agencies to carry out the program within such political subdivisions. Such local government program agencies shall be in all respects subject to the same requirements as State program agencies. Where more than one local government within a State has established a program agency under this subsection, the Secretary shall allocate funds between such agencies in such manner as he deems equitable.

(5) Payments under grants under this section may be made in advance or by way of reimbursement and at such intervals and on such conditions as the Secretary finds necessary.

(6)(A) There is authorized to be appropriated to the Secretary for purposes of carrying out this Act $50,000,000 for the fiscal year 1983, and the amount determined under subparagraph (B) for each of the fiscal years 1984 through 1989 from so much of the following amounts as would otherwise be credited to miscellaneous receipts in the Treasury—

(i) all franchise fees estimated to be collected for the fiscal year concerned by the Secretary and Secretary of Agriculture; and

(ii) all receipts estimated to be due and payable to the United States for the fiscal year concerned from (I) permit fees (including fees for special use permits) imposed by the Secretary or the Secretary of Agriculture, (II) sales of timber by the Secretary or the Secretary of Agriculture, and (III) leasing activities of the Secretary and the Secretary of Agriculture other than leasing activities under the Mineral Leasing Act of 1920 (30 U.S.C. 181 et seq.) or under the Mineral Leasing Act for Acquired Lands (30 U.S.C. 351 et seq.).

Such sums shall remain available until expended. Appropriations under this section shall be made without fiscal year limitation.

(B) The amount authorized to be appropriated under subparagraph (A) for each of the fiscal years 1984 through 1989 shall be $250,000,000.

(C) In addition to other amounts authorized to be appropriated for purposes of paragraph (3)(A), from so much of the amounts referred to in subparagraph (A) (i) and (ii) as would otherwise be credited to miscellaneous receipts in the Treasury, there is authorized to be appropriated to the Secretary for expenditure by State program agencies—

(i) $10,000,000 for the fiscal year 1983; and

(ii) $50,000,000 for each of the fiscal years 1984 through 1989.

(7) Contract authority under this Act shall be subject to the availability of appropriations.

(8) Funds provided under this Act shall only be used for activities which are in addition to those which would otherwise be carried out in the area in the absence of such funds.

(9) Not more than 10 percent of the funds made available to any program agency for projects during each fiscal year may be used for the purchase of major capital equipment.

FEDERAL EMPLOYEE STATUS

SEC. 6. (a) IN GENERAL.—Except as otherwise specifically provided in the following paragraphs, enrollees and crew leaders shall not be deemed Federal employees and shall not be subject to the provisions of law relating to Federal employment:

(1) For purposes of the Internal Revenue Code of 1954 and title II of the Social Security Act, enrollees and crew leaders shall be deemed employees of the United States and any service performed by any person as an enrollee shall be deemed to be performed in the employ of the United States.

(2) For purposes of subchapter I of chapter 81 of title 5, United States Code, relating to the compensation of Federal employees for work injuries, enrollees and crew leaders shall be deemed civil employees of the United States within the meaning of the term "employee" as defined in section 8101 of title 5, United States Code, and the provisions of that subchapter shall apply, except—

(A) the term "performance of duty" shall not include any act of an enrollee member or crew leader while absent from his or her assigned post of duty, except while participating in an activity authorized by or under the direction and supervision of the Secretary or the conservation center supervisory staff (including an activity while on pass or during travel to or from such post of duty); and

(B) compensation for disability shall not begin to accrue until the day following the date on which the injured enrollee's or crew leader's employment is terminated.

(3) For purposes of chapter 171 of title 28, United States Code, relating to tort claims procedure, enrollees and crew leaders shall be deemed employees of the United States within the meaning of the term "employee of the Government" as defined in section 2671 of title 28, United States Code.

(4) For purposes of section 5911 of title 5, United States Code, relating to allowances for quarters, enrollees and crew leaders shall be deemed employees of the United States within the meaning of the term "employee" as defined in that section.

(b) AMENDMENT OF TITLE 5.—Section 8332(b) of title 5, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (11);

(2) by striking out the period at the end of paragraph (12) and inserting in lieu thereof "; and"; and

(3) by adding after paragraph (12) the following new paragraph:

"(13) service as an enrollee or crew leader only if the enrollee or crew leader in the American Conservation Corps later becomes subject to this subchapter.".

USE OF VOLUNTEERS

SEC. 7. (a) Where any program agency has authority to use volunteer services in carrying out functions of the agency, such agency may use volunteer services for purposes of assisting projects related to conservation centers established under this Act and may expend funds made available for those purposes to the agency, including funds made available under this Act, to provide for services or costs incidental to the utilization of such volunteers, including transportation, supplies, lodging, subsistence, recruiting, training, and supervision.

(b)(1) The Secretary may recruit, without regard to the civil service classification laws, rules or regulations, the services of individuals contributed without compensation as volunteers for aiding or in facilitating the activities administered by the Secretary through the Bureau of Land Management.

(2) In accepting such services, the Secretary—

(A) shall not permit the use of volunteers in hazardous duty or law enforcement work, or in policymaking processes or to displace any employee, enrollee, crew leader, or other participant under this Act; and

(B) may provide for services or costs incidental to the utilization of volunteers, including transportation, supplies, lodging, subsistence, recruiting, training, and supervision.

(3) Volunteers under this subsection shall not be deemed employees of the United States except for the purposes of the tort claims provisions of title 28, United States Code, and subchapter I of chapter 81 of title 5, United States Code, relating to compensation for work injuries.

SPECIAL RESPONSIBILITIES OF THE SECRETARY

SEC. 8. (a) PAY.—The Secretary shall establish standards for—

(1) rates of pay for enrollees which shall be not less than the wage required by section 6(a)(1) of the Fair Labor Standards Act of 1938 (29 U.S.C. 206(a)(1));

(2) rates of pay for crew leaders which shall be at a wage comparable to the compensation in effect for grades GS-3 to GS-7; and

(3) reasonable hours and conditions of employment.

(b) COORDINATION.—The Secretary and the chief administrators of other program agencies carrying out programs under this Act shall coordinate the programs with related Federal, State, local, and private activities.

(c) MILITARY EXEMPTION STUDY.—The Secretary, in consultation with the Secretary of Defense and others as may be appropriate, shall conduct a study to determine the feasibility and desirability of various forms of public service (such as accorded by this Act and other public service programs) being substitutable for service under the Military Selective Service Act (50 U.S.C. App. 456). A report containing the results of the study shall be submitted to Congress not later than one year after the enactment of this Act.

EDUCATION, GUIDANCE, AND PLACEMENT

SEC. 9. (a) ACADEMIC CREDIT.—Whenever possible, the Secretary shall make arrangements for the award of academic credit by educational institutions and agencies to enrollees for competencies developed from work experience under this Act.

(b) STUDY.—(1) Program agencies shall use not more than 10 percent of the funds available to them to provide training and educational materials and services for enrollees and may enter into arrangements with academic institutions or education providers, to include local education agencies, community colleges, four-year colleges, area vocational-technical schools and community based organizations, for academic study by enrollees during nonworking hours to upgrade literacy skills, obtain a high school diploma or its equivalency, or college degrees, or enhance employable skills. Enrollees who have not obtained a high school diploma or its equivalency shall have priority to receive services under this subsection. Whenever possible, an enrollee seeking study or training not provided at his or her conservation center shall be offered assignment to a conservation center providing such study or training.

(2) Standards and procedures with respect to the awarding of academic credit and certifying educational attainment in programs conducted under subsection (b)(1) of this section shall be consistent with the requirement of applicable State and local law and regulation.

(c) CERTIFICATION.—The program agencies shall provide certification of the training skills acquired by enrollees who have participated in the program.

(d) GUIDANCE AND PLACEMENT.—The program agency shall provide such job guidance and placement information and assistance for enrollees as may be necessary. Such assistance shall be provided in coordination with appropriate State, local, and private agencies and organizations.

EVALUATION AND PILOT PROJECTS

SEC. 10. (a) RESEARCH AND EVALUATION.—The Secretary shall provide for research and evaluation to—

(1) determine costs and benefits, tangible and otherwise, of work performed under this Act and of training and employable skills and other benefits gained by enrollees, and

(2) identify options for improving program productivity and youth benefits, including improved alternatives for: organization, subjects, sponsorship, and funding of work projects; recruitment and personnel policies; siting and functions of conservation centers; work and training regimes for youth of various origins and needs; and cooperative arrangements with programs, persons and institutions not covered under this Act.

(b) DEMONSTRATIONS.—The Secretary may authorize pilot or experimental projects to demonstrate or test new or alternative arrangements or subjects of work and training for programs under this Act, which may include alternatives identified under subsection (a)(2).

(c) CCC SITES.—The Secretary, in consultation with the Secretary of Agriculture, shall study sites at which Civilian Conservation Corps activities were undertaken for purposes of determining a suitable location and means to commemorate the Civilian Conservation Corps. Not later than one year after the date of the enactment of this Act, the Secretary shall submit a report to the Congress containing the results of the study carried out under this section. The report shall include cost estimates and recommendations for any legislative action.

ANNUAL REPORT

SEC. 11. The Secretary shall prepare and submit to the President and to the Congress at least once each year a report detailing the activities carried out under this Act. Such report shall be submitted not later than December 31 of each year following the date of enactment of this Act. The report shall describe (1) conservation work procedures, accomplishments and benefits; (2) the extent to which youth who are economically, socially, physically or educationally disadvantaged have been enrolled in and benefited by the program; (3) other youth benefits; and (4) problems and opportunities encountered in carrying out the Act which require attention. The Secretary shall include in such report such recommendations as he considers appropriate.

LABOR MARKET INFORMATION

SEC. 12. The Secretary of Labor shall make available to the Secretary and to any program agency under this Act such labor market information as is appropriate for use in carrying out the purposes of this Act.

EMPLOYEE APPEAL RIGHTS

SEC. 13. (a) In the case of—

(1) the displacement of a Federal employee or the failure to reemploy a Federal employee in a layoff status, contrary to a certification under section 5(d)(2) (A) or (B) of this Act, or

(2) the displacement of a Federal employee by reason of the use of one or more volunteers under section 7(b)(2)(A) of this Act,

such employee is entitled to appeal such action to the Merit Systems Protection Board under section 7701 of title 5, United States Code.

(b) In the case of—

(1) the displacement of any other individual employed (either directly or under contract with any private contractor) by a program agency or grantee, or the failure to reemploy an employee in layoff status, contrary to a certification under section 205(d)(2) (A) or (B) of this Act, or

(2) the displacement of such individual by reason of the use of one or more volunteers under section 7(b)(2)(A) of this Act,

the requirements contained in section 144 of the Job Training Partnership Act (Public Law 97-300) shall apply, and such individual shall be deemed an interested person for purposes of the application of such requirements.

(c) For purposes of this section, the term "displacement" includes, but is not limited to, any partial displacement through reduction of nonovertime hours, wages, or employment benefits.

The SPEAKER pro tempore (Mr. SKELTON). Is a second demanded?

Mr. YOUNG of Alaska. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. SEIBERLING) will be recognized for 20 minutes, and the gentleman from Alaska (Mr. YOUNG) will be recognized for 20 minutes.

The Chair now recognizes the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am pleased to bring to the floor H.R. 999, the American Conservation Corps Act of 1983. This act would establish a program similar in concept to the Civilian Conservation Corps of the 1930's.

Like the old CCC, the American Conservation Corps would have two basic goals—to help provide jobs for our Nation's young people and to help conserve our public lands and community resources.

H.R. 999 has 187 cosponsors in the House, representing 46 States and territories. The bill is essentially identical to H.R. 4861 which passed the House during the 97th Congress by a wide margin (291-102).

This legislation was the outgrowth of oversight hearings held in 1981 on two programs slated for termination by the administration—the Youth Conservation Corps, a summer program, and the Young Adult Conservation Corps, a year-round program. We found that the previous programs were cost effective in accomplishing needed conservation work and in providing jobs for unemployed youth. The YCC returned an average of $1.04 in work for each dollar expended; the YACC returned $1.20. In many cases, the value of the work was four or five times the amount expended.

Equally important, agencies who used the programs found them extremely helpful in supplementing their conservation and maintenance programs. Young people who participated testified to the value of the programs for them; they learned new skills and work habits, and gained a better understanding of themselves and the outside world. Indeed, in the YACC program, over 70 percent of the youth went on to "positive placements"—that is, back to school, or to better jobs or the military.

H.R. 999 would essentially establish a consolidated program that is more directed to serving disadvantaged youth. It is aimed at enhancing, but not duplicating, other training and job programs.

The American Conservation Corps would be administered by the Secretary of the Interior in cooperation with the Secretaries of Agriculture and Labor. The program would be funded from certain Federal revenues from various permitting and leasing activities.

The basic appropriations ceiling would be limited to $50 million in fiscal 1983 and $250 million annually thereafter through fiscal 1989. Of these amounts, 35 percent would be distributed to States, 25 percent each to the Departments of Interior and Agriculture, 5 percent to participating Indian tribes, and 10 percent to other Federal agencies—such as the Tennessee Valley Authority—and for special projects. An additional $10 million in fiscal 1983 and $50 million annually in fiscal years 1984-89 would be authorized for State programs. States would be required to provide 15 percent matching funds and a mechanism—including at least 10 percent of the State's funding share—for local government participation.

Conservation projects would include conservation of forests, fish, wildlife, rangelands and soils; revitalization of urban areas and preservation of historic sites; maintenance of recreational areas; energy conservation and production of renewable resources.

The program would have both a year-round and summer component. Enrollees must be unemployed and between the ages of 16 and 25 for the year-round program, and between 15 and 21 for the summer program. Special consideration in recruiting and selecting enrollees would be given to disadvantaged youth who live in areas of substantial unemployment.

Opportunities for training and academic study would be provided and certification granted for skills acquired. Volunteers could be used to supplement the program. However, no project could displace existing employees; an appeals mechanism is provided in the event that any employee is displaced.

These are some of the highlights of the legislation. In addition to the tremendous support of my colleagues on the Interior Committee and our many cosponsors, I would like to thank our colleagues from the Education and Labor Committee—in particular, CARL PERKINS, GUS HAWKINS, JOHN ERLENBORN and JIM JEFFORDS—for the work they have done in helping to improve the bill.

I would also like to thank staff members who have worked so hard on it, including Loretta Neumann, Dora

Miller, and Clay Peters from the Interior Committee; and Clark Rechtin and Beth Buehlmann from the Education and Labor Committee.

I also want to recognize the many organizations who have strongly supported the bill, and would like to insert a list of them following my remarks.

I would especially like to thank Mr. Sydney Howe, of the Human Environment Center, Mr. Rex Ressler of the American Forestry Association, Ms. Susan Harjo of the Native American Rights Fund, Mr. John Gunther of the U.S. Conference of Mayors, Mr. William Haskins of the National Urban League and Mr. John Graves of the National Association of CCC Alumni.

Last, I would like to note that a companion bill, S. 27, has been introduced in the Senate by Senators MOYNIHAN and MATHIAS. I am optimistic that we will soon see the enactment of this important legislation.

There could be no better time than now. Youth unemployment remains at all-time highs and the backlog of conservation work is growing daily. In April of this year we will celebrate the 50th anniversary of the Civilian Conservation Corps. Let us celebrate this great landmark of the past by giving our Nation a program with fresh hope for the future.

□ 1230

Mr. YOUNG of Alaska. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of the bill now under consideration, H.R. 999, legislation designed to establish the American Conservation Corps.

As my colleagues know, a bill nearly identical to this one passed the House last year, but failed to receive action by the Senate. If this legislation was meritorious and needed last year, it is all the more needed this year. Our Nation's unemployment situation is one of real desperation. I do not feel that any one single piece of legislation can be adequate and sensitive enough to solve the overall unemployment problem. It will likely take a number of individual efforts, and this bill is one of those.

This bill is modeled after the successes of a number of similar popular predecessor programs, ranging from the famous Civilian Conservation Corps (CCC) of depression days, up through the Youth Conservation Corps (YCC) and Young Adult Conservation Corps (YACC) of more current times. This bill is designed to take the best features and experiences of all of these and incorporate them into a new program to continue on where the latter two programs have left off, as they have been basically terminated through recent budget reductions.

Mr. Speaker, our public lands and resources have for decades suffered from insufficient maintenance attention due to limited funding and staffing. In addition, our national economy is currently in such condition that great numbers of people are out of work—now at a level unequaled since the end of the Great Depression. Reports from the Bureau of Labor Statistics indicate that in January 1983, total unemployment reached 10.4 percent; youth unemployment reached 22.7 percent, and minority youth unemployment 42.8 percent. Mr. Speaker, this is obviously an extremely serious matter.

This bill would combine the problem of inadequate public resources maintenance with that of major unemployment to the mutual satisfaction of each other: The maintenance needs would be addressed by the unemployed, and both needs would mutually benefit.

Moreover, past history indicates that this can be accomplished in a very cost-effective manner. The enactment and implementation of this bill will not solve the unemployment problems of all of our young people, nor will it solve all of our public resource maintenance needs, but it will help. It is at least a constructive step forward in a current environment where not much else that is tangible and proven to be workable by a good track record is around to grab hold of.

I am also inspired, Mr. Speaker, by the less tangible emotional, educational, and psychological effects that such employment can bring to our young people. This is an age where young people are being majorly shaped and influenced in attitudes and thought. The record is strong and clear, from participants in the CCC program of the 1930's to the YCC and YACC programs of today, that the life goals, career pursuits, and shorter range ambitions and attitudes of many young people are greatly influenced by the healthful, resource-related working relationships engendered by this type of program.

In both the long and the short run, a program such as this is good for America. It is an investment in both her resources and her people. What could constitute a more worthwhile objective, particularly at a time like this?

Mr. Speaker, there are several observations I would like to share with my colleagues pertaining to specific features of the bill.

I cannot overstress the importance of section 4(e) which requires that all projects selected be consistent with provisions of all laws, policies, and management, and operational plans which preexist in governing the particular resource area affected by the projects. The language of this subsection was further strengthened by the Interior Committee this year to make the point strong and clear that all projects must be supportive of the area's needs and administrative agency's mission.

The committee also strengthened the language of subsection 5(c) of the bill to complement the concerns of subsection 4(e). Language added here, as a new paragraph (2) says:

> No project shall be undertaken without the on-site presence of knowledgeable and competent supervision, and all projects undertaken shall be documented in advance in an approved written project plan prepared in accordance with the provisions of section 4(e) of this Act.

Mr. Speaker, a continuing and often credible allegation made of past youth employment programs is that they have not always performed priority conservation work projects and they too often have lacked adequate onsite supervision. A consequence can be the production of nonessential or low priority work, and in the extreme, actual damage to the resources, rather than benefit. The administration has made a major point of this concern in presenting its opposition to this legislation. I agree that to the extent that past programs have been afflicted with this type of problem, it is totally unacceptable and it absolutely must be totally rectified. These recent amendments which I have just referred to and which I instigated, are designed to address and rectify this matter.

Section 5(a)(4) provides that "special consideration" is to be given the recruitment and selection of enrollees who are disadvantaged and residing in areas of substantial unemployment.

Similarly, section 4(f)(3) provides that similar "due consideration" be given the location of conservation centers based on proximity to disadvantaged youth and those living in areas of high unemployment. While this is certainly an important and most meritorious feature of this bill, I want to also point out, as it was a subject of some discussion and quite unanimous agreement in the Interior Committee last year, that this consideration is not to be to the exclusion of youth or locations not so heavily afflicted with disadvantaged or heavy unemployment attributes. The program should have a healthy mix of youth from many backgrounds, and certainly with special consideration of and appropriate emphasis on the elements of disadvantage and high employment locales.

Mr. Speaker, while the bill—section 4(d)—allocates the funding to major recipients generally by percentages, I believe it is most important that as those major recipients suballocate the funds to subrecipients through time, that there be some degree of stability involved and advance planning of expenditure, to the maximum extent possible. I do recognize the need for flexibility and adaptability to changing situations, of course, but I do believe there needs to be some long range projection of priorities so all potential beneficiaries will have a fair idea of what changes to expect through time. For example, the Department of the Interior will have, under the bill's provisions, 25 percent of the funds for allocation to various agencies within that department.

I believe there should be developed ahead of time, at least 3-year advance projections and prioritizations of which agencies will receive how much for which projects or geographic project areas. This will provide better stability for the program, particularly for staffing and program supervision purposes. Last minute major changes and funding diversions are disruptive to program efficiency, staffing, and good morale of personnel.

Mr. Speaker, this is a bill which is urgently needed. It will do a lot of good for both our youth and our Nation's physical resources. We need it now.

The bill has the bipartisan support of the two committees which have worked on it—the Committee on Interior and Insular Affairs and the Committee on Education and Labor. I urge my colleagues to vote for the adoption of this important legislation.

Mr. Speaker, I yield 3 minutes to the gentleman from Vermont (Mr. JEFFORDS).

Mr. JEFFORDS. Mr. Speaker, I am pleased to be able to support the American Conservation Corps Act again this year. I hope that during our consideration of this bill here today, we will give some thought about how we can best put the unemployed back to work. Although there seems to be a bipartisan consensus on the need for a jobs bill, I believe we must look harder at the proposals before us to determine whether they effectively provide jobs for those who need them most.

Fortunately, the ACC proposal before us today addresses the unemployment problem in a constructive, cost-effective way. First, it concentrates on hiring the unemployed, giving special emphasis to disadvantaged youth and those who live in areas of high unemployment.

Second, the programs created by this bill are labor-intensive. According to CRS estimates, they would create 20,000 year-round jobs and 50,000 summer jobs.

In terms of targeting Federal efforts toward getting the unemployed back to work, I believe this bill takes an infinitely better approach than what we are considering in the supplemental appropriations bill that is scheduled for action this week. Now, public works has its place in Federal policy and some of the work outlined in the $4.6 billion measure needs to be done. In my opinion much of it does not need to be done. However, the point is that we must not kid ourselves into thinking that a public works bill is the best way to create jobs with Federal policy.

If our last public works program, the Local Public Works (LPW) of the late 1970's, is any indication, we may put more unemployed people back to work with the $250 million spent on the American Conservation Corps than we will be by spending $4.6 billion on public works. According to CRS, under the LPW only 13 percent of those given jobs were actually unemployed just prior to being hired. In addition, the ratio of labor to nonlabor costs was 1 to 3 and the cost per slot of direct employment was $64,500.

In fact, while total employment under the public works program we will consider will run into the tens of thousands, if the recent past is any guide only about 9,000 of these workers will actually be taken off the unemployment rolls by the program.

I cite these figures only to point out that a jobs program has to encompass more than just public works. Conservation work, such as that provided for under this bill, offers a way to perform the backlog of needed conservation work in this country at a reasonable cost and in a way that will help put some people to work who do not currently have jobs.

Mr. SEIBERLING. Mr. Speaker, I yield 5 minutes to the gentleman from Kentucky (Mr. PERKINS), and I will ask the gentleman to yield briefly to me.

Mr. PERKINS. I yield to the gentleman from Ohio.

Mr. SEIBERLING. Mr. Speaker, I want to thank the gentleman from Kentucky (Mr. PERKINS) for the tremendous help that he has given in getting this bill expeditiously through his committee and for the great support that he has given to it, both in this Congress and the last. I certainly do appreciate it.

Mr. PERKINS. Mr. Speaker, let me first thank my colleague, the gentleman from Ohio, for his remarks. I think the gentleman from Ohio is more responsible for keeping the idea of youth conservation jobs programs alive than any other Member of the House.

Mr. Speaker, I rise in support of the motion to suspend the rules of the House and pass the bill H.R. 999, the American Conservation Corps Act of 1983.

When 22 years ago last month, during the first session of the 87th Congress, I introduced the first legislation to establish a Youth Conservation Corps (YCC). Actually, I authored three bills during that Congress to create the YCC, one of which was reported by the Education and Labor Committee, only to die in the Rules Committee before we could get it to the floor of the House for a vote.

The very first bill I introduced in the next Congress represented another attempt to establish the YCC. Unfortunately, despite hard work on the part of myself and other supporters, we were again unable to win passage before the 88th Congress came to a close.

During every Congress which followed, I continued to cosponsor attempts to create the YCC. I believed then, as I do now, that there was need for a program modeled after President Roosevelt's Civilian Conservation Corps, which would provide American youth with work and training opportunities and, at the same time, protect and improve public lands and resources.

Gradually, those who believed as I did in the need for a Youth Conservation Corps—like Senator SCOOP JACKSON and former Congressman Lloyd Meeds—began to win friends and influence people for our way of thinking.

Finally, in 1970, 9 years after my first attempt, we were able to pass legislation which created the first Youth Conservation Corps. Although that measure only established the program on a demonstration basis, we had our foot in the door. In 1972, during the 92d Congress, I was among the original cosponsors of successful legislation to expand and reauthorize the YCC for 2 years. Then, in 1974, I cosponsored a bill to greatly expand the scope of YCC activities and to make the authority for the program permanent, and that bill became law.

Unfortunately, the old YCC program fell prey in 1981 to the meat ax style of budget cutting advanced so formidably by the current administration. In addition, we lost the Young Adult Conservation Corps (CETA, title VIII) at that time as well. Those were sad days for me, indeed. However, today I see new hope on the horizon.

So, in keeping with the history of my commitment to youth conservation employment efforts, I am pleased to have assisted in the development of the legislation on behalf of which I now speak.

The bill before us today is fundamentally the same as H.R. 4861, which was passed by the House under suspension of the rules twice during the 97th Congress, but which never received consideration by the Senate. As was the case with H.R. 4861 last year, H.R. 999 has been reported favorably by both the Education and Labor and Interior and Insular Affairs Committees, by a 26 to 2 vote and a voice vote, respectively. The bill currently has 187 cosponsors, coming from both sides of the aisle.

H.R. 999 addresses simultaneously two distressing problems now confronting this Nation: Youth unemployment of epidemic proportions and the accelerating deterioration of public lands and facilities.

Bureau of Labor Statistics data released in January indicate that the rate of overall youth unemployment in December 1982 reached a distressing 23 percent, while the minority youth unemployment rate was an abhorrent 49.5 percent. Furthermore, the unemployment figures I have just quoted do not even include those youths who have given up looking for jobs, whose numbers are now legion.

The increased usage, decreased maintenance and resulting decline of our public lands and facilities—parks, forests, wildlife refuges, and so forth—is widespread and well known to all of us.

The bill now before the House has been formulated to combat both of these critical national illnesses. It is a legacy of the sound and historically proven legislative judgment which half a century ago provided this Nation with the Civilian Conservation Corps. Additionally, the bill has at its foundation the successful elements of two more recent youth conservation employment programs: The Youth Conservation Corps and the Young Adult Conservation Corps. Before their demise in fiscal year 1981, these two programs produced benefits in the form of needed conservation work which exceeded total program costs, while employing hundreds of thousands of otherwise jobless youth.

However, I must bring to the attention of my colleagues several important improvements which make H.R. 999 very different from these past youth conservation efforts.

Unlike either the YCC or the YACC, the American Conservation Corps gives special consideration in recruiting and selecting enrollees to disadvantaged youth and youth from areas of high unemployment, so that job opportunities are better targeted to those most in need.

Also unlike its predecessors, H.R. 999 establishes a funding mechanism which insures that at least a portion of the revenues derived from public lands are reinvested in those lands to guarantee their continued preservation and productivity. This is achieved by requiring that funds appropriated to support the American Conservation Corps come from unallocated receipts generated by such activities as timber cutting, mineral leasing and franchising on public lands.

This bill also embodies a newly enhanced role for both State and local governments through its requirement that at least 35 percent of the funds be allocated to the States and that 10 percent of such funds be made available to local governments for the operation of ACC projects.

A number of amendments added to the bill last year by the Education and Labor Committee provide for better coordination of American Conservation Corps projects with related employment and training programs administered by the Department of Labor, in order to minimize duplication and expand scarce resources. Perhaps the hallmark of this improved coordination is the authority provided to the Secretaries of the Interior and Labor to establish standards and mechanisms for approval of joint, separately funded projects combining ACC activities with those funded under such statutes as the newly enacted Job Training Partnership Act.

The major amendment added to the bill by our committee this year is designed to improve the career potential of ACC enrollees after their participation by requiring that program agencies spend not more than 10 percent of their funds to provide education services to enrollees during nonworking hours, with priority for those without high school diplomas.

Finally, H.R. 999 includes strong provisions to prohibit the displacement of Federal, State, and local government and private sector employees as the result of implementation of the act, so that we do not inadvertently create unemployment in our effort to cure it.

This bill represents a unique opportunity for the Members of the House of Representatives. Far too rarely do we get the opportunity in a single vote to address at once two problems as urgent as youth unemployment and the deterioration of public lands. This legislation represents the wisest kind of investment this country can possibly make: An investment in the present and future welfare of its people and its natural bounty. These make up the true wealth of this Nation. Remember one simple, historical fact—all that America is now, or ever has been, has sprung from her most precious and only original resources: Her people and her land. The question now before us is, Will we make a vitally needed, sound and long overdue investment in both?

I urge my colleagues to join me in seizing this golden opportunity by voting to suspend the rules and pass the bill H.R. 999.

Mr. YOUNG of Alaska. Mr. Speaker, I yield 3½ minutes to the gentleman from Nebraska (Mr. BEREUTER).

Mr. BEREUTER. Mr. Speaker, on numerous occasions in the past year and a half, I have risen to express my strong support for the creation of an American Conservation Corps. Today I rise again to urge my colleagues to support this worthy legislation.

Much talk is heard in Washington these days of make-work jobs bills, budget-busters with little purpose but to prime the pumps of Members' reelection campaigns. The American Conservation Corps, I can assure you, is not a slickly packaged version of the typical pork barrel boondoggle which saps the Federal Treasury and fosters public cynicism about their Government.

The American Conservation Corps builds upon a proven concept, first tested in the Depression by the Civilian Conservation Corps. It merges the present day Young Adult Conservation Corps and the Youth Conservation Corps, but eliminates the past flaws in administrative structure which kept both programs from reaching their full potential. I know that this Member, and I am sure many others, heard many positive comments about the benefits of the YACC and the YCC from program participants, program managers, and community leaders. The American Conservation Corps, with its solid administrative structure, can multiply those benefits throughout the United States.

I also know that, in the course of visiting national parks during the last year, and talking to superintendents and to other personnel from the National Park Service, we saw a good many trails were not open, grass was not mowed, a variety of other tasks once accomplished by the YACC or YCC were not accomplished. In other cases, professionals were moved from their professional responsibilities to pick up the slack.

Several States have already recognized the value of this type of youth conservation corps program. Eighteen hundred young people are at work in California now with 300 recently de-

tailed to perform emergency flood rehabilitation work. They have also labored in the hot Sun to clean miles of creek bed in San Luis Obispo County damaged by an oil spill.

Last summer 250 young Iowans from ages 14 to 19 toiled for minimum wage at 15 sites across the State. Eight Connecticut State installations will benefit from the labors of 60 young corpsmembers under that State's recently enacted youth conservation program. Similar projects are in operation or under debate in more than a dozen other States.

No one expects that these young workers will accomplish miracles, that they will build great wonders of the world or perform highly skilled tasks. However, the young workers of the American Conservation Corps will do the backbreaking, unglamorous tasks which are nonetheless essential to the preservation of our natural resources while learning important worker skills, facts, and attitudes. They accomplish the work in a cost-effective manner. Most importantly, they will gain personally from the knowledge that they are engaged in a beneficial work experience.

All 50 States will benefit from this program. Perhaps 100,000 disadvantaged youths will ultimately be employed. Needed conservation work will be completed at a minimal cost. The American Conservation Corps will be a wise investment of public funds. I strongly urge you to vote for H.R. 999.

Mr. SEIBERLING. Mr. Speaker, I wish to recognize at this time the tremendous support and leadership given to this legislation by Chairman UDALL of the Committee on Interior and Insular Affairs, and I yield 1 minute to the gentleman from Arizona.

Mr. UDALL. Mr. Speaker, I am proud to rise in support today of H.R. 999, the American Conservation Corps Act. The bill reported by my committee is very similar to legislation presented to the House in June 1982 and passed at that time by a nearly 3 to 1 margin. As was the case last year, the bill thus enjoys, I believe, broad bipartisan support.

And well it should. This measure goes after two problems that need to be addressed—the conservation of our natural, cultural, and recreational resources and the intolerable levels of unemployment in this country, especially among younger Americans. Even better, our history and experience with programs like the American Conservation Corps—and we go back a long way in this century with a tradition of putting young people to work on our lands and recreation areas—give us strong evidence that these programs are cost-effective. The Youth Conservation Corps is estimated to have returned on a national average $1.04 of benefits for every dollar invested and the Young Adult Conservation Corps did even better—$1.20 for every dollar invested.

And the benefits derived are ones that are important to Americans and which, I believe, have been hurting disproportionately in recent years. The conservation and improvement of our forests, fish and wildlife, western rangelands, and recreation sites, even historic sites and other urban areas. This work needs to be done, and if it is not done now, it will only cost us more to do in the future.

In addition, we have built on the extensive experience with similar programs in the past to design one that is right for the times. Of the $300 million that would be authorized annually from fiscal year 1983 through fiscal year 1984, 35 percent of the funds would be distributed and controlled by the States because they have the organizational structure and the knowledge needed to target these funds the best. The rest would be divided up between the Departments of the Interior and Agriculture, to participating Indian tribes, and to other agencies to insure broad use of program funds.

The source of these funds would be revenues from the leasing of various minerals on Federal lands—the reinvestment of funds from a dwindling resource into the production and conservation of a last resource. This is a principle that has worked extremely well in the past—and I offer the land and water conservation fund as a prime example.

The program is targeted to young people between the ages of 16 and 25 for the year-round employment and 15 and 21 for summer employment. I know from experience that there are countless thousands of these young people who want to do the kind of work the American Conservation Corps would give them the chance to do.

Mr. Speaker, this is an excellent bill and attacks significant problems in the best traditions of our country.

Recently, I received a letter from a constituent of mine in Tucson who told me:

> I'm writing to you to ask that you and your fellows reinstate the Young Adult Conservation Corps. The corps will get some of the people who are out of work a job. I know that this will be hard to do with the cuts in the budget. It's time to stop horsing around and get people back to work.

Mr. YOUNG of Alaska. Mr. Speaker, I yield 3 minutes to the gentleman from Wisconsin (Mr. GUNDERSON).

Mr. GUNDERSON. Mr. Speaker, I suspect that very few of the Members of this body would want to stand up here today and say that we do not need to do something about youth unemployment in this country. I certainly think we need to do something. And I think when we look at bills in this area, we all recognize that we need to do a lot more than what the administration has proposed thus far in terms of only altering the subminimum wage to deal with youth unemployment in this country.

When you look at any kind of an employment or jobs bill, I think there are four criteria that become all important:

□ 1245

First, obviously is that you have to provide employment and the bill before us does that.

Second, you have to provide some tool for education and the bill, with the amendment provided from the Education and Labor Committee, does just that.

But, third and fourth, you also have to provide some specific job training and job placement for any job program to be successful on its merits at its end as well as at its beginning. I am afraid that the bill before us today does not do that.

I think we would be remiss as a legislative and deliberative body if we just stood up here and passed this kind of legislation without recognizing that we have some problems that need to be solved before this bill goes to the President if we hope that it is going to be signed into law.

Certain benefits were provided by the predecessor programs to the bill we are looking at today—the Civilian Conservation Corps, the Youth Conservation Corps, and the Young Adult Conservation Corps. However the problem with the bill before us today is it is nothing more than simply a consolidation of two of the programs I have just mentioned, the Youth Conservation Corps and the Young Adult Conservation Corps.

Let us just for a second take a look at the history of those programs. It was not only President Reagan but also President Carter who said that these programs ought to be eliminated since they were not cost effective and not serving the purposes for which they were intended. The Young Adult Conservation Corps located 50 percent of its 1,700 projects in 10 States west of the Mississippi that have but 19 percent of the population of our country. Only 33 percent of the Young Adult Conservation Corps participants were actually economically disadvantaged young people. It cost about $12,100 to serve one enrollee for 1 year in the Young Adult Conservation Corps.

And when you look at the cumulative value of the Youth Conservation Corps from 1971 through 1980, it was $319 million, and that is $15 million less than the total program appropriations during those same years. In other words, we did not even get a dollar for a dollar return on these programs.

As we look at H.R. 999, the bill before us today, we find that there are many corrections and modifications that need to be made. There are many opportunities for us to make this youth employment bill a responsible piece of legislation and not just simply an emotional response of throwing money at a problem. For example, requirements for private sector participation and involvement, similar to the job training partnership, should be included. Although the type of work to be performed—conservation—somewhat precludes a large private sector role, business participation in the planning and assessment processes could prove valuable through cost planning and selection of sites and projects. State Job Training Coordinating Council reviews of conservation center site proposals and projects and Private Industry Council reviews of local plans are worthwhile examples of such private sector participation.

The provisions requiring labor information sharing and guidance and job placement are encouraging—but further and expanded efforts are required. As I mentioned earlier, the adoption in committee of an amendment setting aside 10 percent of the funds available for education purposes, much like the past CCC once did, is also commendable. But further education-related activities are warranted to make American Conservation Corps enrollees marketable upon ending their participation.

In addition, past programs have found themselves severely limited by Department of Labor regulations prohibiting travel beyond 250 miles from home. The planned participation of urban youth at rural camps was thus limited. Although attention must be paid to the potential for worker displacement, the promulgation of similar regulations would only work to restrict the national impact of the program.

Several other questions remain unresolved in my mind. For instance, should we consider a change in emphasis in these youth conservation programs from projects based upon onsite living accommodations to projects based upon a day camp precedent. The various costs associated with lodging and food would be considerably reduced by such a change in emphasis.

In addition, one must wonder why we are providing an authorization through 1989 for a program designed to provide youth employment in a period of economic emergency. Clearly, no one in this body believes that our current economic difficulties will run until the beginning of the next decade.

Finally, we should also remember that only last year we passed the historic Job Training Partnership Act which contained important provisions for youth training. Up to 40 percent of the funds allocated for the service delivery areas shall be used for youth training under this bill. The bill also provides for summer youth institutes. Should we not channel our funds to these programs which will provide our youth the skills necessary for long-term employment.

We all must remember that this program, and other similar programs are not ends in themselves, but are simply a step toward a better future for these young Americans. Again, it is not my intent to question the objectives of these programs. That is not to say that improvements are not required, though, which will better facilitate the attainment of our goals. The unemployed youth of our Nation deserve such an effort.

As such, I would urge the administration and the other body to take a hard look at this program and to either improve it with some of the suggestions I have made or to present alternatives which will serve our youth more quickly and adequately.

Mr. SEIBERLING. Mr. Speaker, I yield 1 minute to the gentleman from Minnesota (Mr. VENTO) and I want to thank him for his tremendous support of this legislation.

Mr. VENTO. Mr. Speaker, I rise in support of H.R. 999, and wish to commend the Interior Committee on which I serve, and the Education and Labor Committee for moving expeditiously to report H.R. 999 for the full House's consideration. The legislation before us, draws our attention to and properly focuses on the important issues of youth unemployment and the protection of our natural resource base. With youth unemployment at record levels, this bill will provide a cost-effective program by which we can offer our unemployed young people meaningful conservation jobs that foster in them a value and understanding of our natural resources and in doing so, show them that they are a worthwhile part of what makes this country as great as it is.

In my own State of Minnesota, we have had a successful Federal-State conservation program for a number of years. Before Reagan administration budget cuts took hold, between 500 and 600 young Minnesotans were involved in a coordinated effort to rehabilitate and upgrade Minnesota State parks, historic sites, game refuges, and wildlife areas. With the demise of the YCC and YACC programs, the resource managers within the State of Minnesota have been hard pressed to respond to conservation and rehabilitation needs.

The need for resource conservation work is well documented. H.R. 999 is a means by which we can meet this need in a cost-effective way while achieving important social goals. In the present time of fiscal restraint, this legislation will deliver services of a greater value than the cost of the program. With funds to carry out the program coming from the sale and use of our natural resources, we are recognizing the need to retrench funds back into the resource base.

H.R. 999 is designed to promote the development of our greatest natural resource—our young people. The unemployment rate that exists among our youth, especially minority and economically disadvantaged youth, is a national shame. At a time when we should be promoting the development of our young people to become productive members of our society, the stark figures of youth unemployment attest to our inability to make use of the minds, energy, and ambition our young people possess.

Shortly, this House will begin the consideration of emergency jobs legislation. H.R. 999 gives us the opportunity to work hand-in-hand with that effort to alleviate the tragic statistics of youth unemployment. In a modest way, the American Conservation Corps program is a step that says we are going to do something with regard to addressing the serious youth unemployment tragedy.

Sympathy for the problem is not enough. There needs to be some action. The American Conservation Corps program fits that need. If we are serious about the problems we face in maintaining our natural resources and providing for the growth and development of our young people, then we will enact H.R. 999, I urge its passage.

Mr. YOUNG of Alaska. Mr. Speaker, I yield 1 minute to the gentleman from Wisconsin (Mr. PETRI).

Mr. PETRI. Mr. Speaker, I rise in support of H.R. 999, the American Conservation Corps Act. The purpose of this legislation is twofold: To provide jobs and training for young people who need them and to accomplish needed conservation work in a cost-effective way.

We are all very much aware of the terrible unemployment problem our country is facing, and there is a great demand to do something about it. The question is, "What?" The bill before us provides one good answer. It will provide a lot of jobs for the money and it will help one of our hardest hit groups—our unemployed youth.

Unlike some of the big pork-barrel projects lurking in the other so-called jobs bills, the projects this bill will fund will tend to be labor-intensive, inexpensive, and cost-effective. At the same time, they will provide useful work experience for the young people to be served and will help them secure follow-on employment.

If we are going to pass jobs bills in this Congress, the present legislation

is a good place to start, and I urge all my colleagues to support it.

Mr. SEIBERLING. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania (Mr. HARRISON).

Mr. HARRISON. Mr. Speaker, I just wanted to add to the remarks that have already been made in support of this bill that it is indeed a bill that is truly labor intensive.

I am delighted to say that the language in the bill that is before us now provides that only 10 percent of the funds which it authorizes can be used for the purchase of capital equipment. The rest of its money will be used to put people to work and to put them to work very soon.

The bipartisan support that this legislation has received is, I believe, indicative of the reawakening of our social responsibilities. We cannot stand idle while our unemployed young people stagnate and our land deteriorates around us. This bill is a big step in the right direction.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. HARRISON. I yield to the gentleman from Ohio.

Mr. SEIBERLING. I just want to thank and commend the gentleman for the great support he gave us in the Education and Labor Committee in helping get this legislation through.

Mr. HARRISON. I thank the gentleman.

Mr. SEIBERLING. Mr. Speaker, I yield such time as he may consume to the gentleman from Michigan (Mr. ALBOSTA).

Mr. ALBOSTA. Mr. Speaker, unemployment continues to be our Nation's most serious problem. The American Conservation Corps Act of 1983 will help to reduce our high unemployment rate. Parts of my district in Michigan have an unemployment rate of 25.7 percent. Furthermore, Michigan's teenagers face an unemployment rate of 29 percent. These figures are shameful when we think of what they mean in terms of human suffering and abandoned hopes.

During the 1930's when our Nation was facing similar problems of unemployment, the Civilian Conservation Corps came to the rescue of many by providing jobs to improve our public lands. The Civilian Conservation Corps was successful in reducing unemployment during that tragic time, and I believe that the American Conservation Corps will be equally successful during our present crisis.

The ACC will provide our youth with meaningful employment while working on our country's needs for conservation and revitalization. This is not a "make-work" bill: It will provide the funds to employ over 100,000 young people in a variety of jobs including the cleaning of public lands, developing recreational areas and preserving our historic sites. All of these activities will benefit our country and enhance and preserve the quality of our life.

We need to provide our youth with constructive work instead of abandoning them to empty days which can lead to further problems such as crime. In this way, our youth will not only be learning the value of working but will be making a contribution to our country's resources. We need to remember that our youth are our Nation's future and that we must provide them with hope in that future.

I urge my colleagues to approve the American Conservation Corps Act of 1983 and I hope the Senate will speed this legislation to enactment.

Mr. YOUNG of Alaska. Mr. Speaker, I yield 4 minutes to the gentleman from Utah (Mr. MARRIOTT).

Mr. MARRIOTT. Mr. Speaker, I would like to have a colloquy with my friend from Ohio (Mr. SEIBERLING).

First of all, I do rise in support of this legislation. I think the cost-benefit ratio is good enough and I think it will in fact, in the long run, not cost us any money.

On the rationing of the money, though, I am a little bit concerned about the formula. As I understand it, of the $252 million that this bill has in it, each State will roughly collect $500,000 and then the other 90 percent of the money will be allocated based on population of young people between whatever the ages are, 18 and 25.

I am wondering whether or not that represents a thoughtful allocation of those resources.

Most of the public lands are going to be in the West. It looks to me like many of these jobs, if in fact the intent of the bill is to do something on the public lands, are going to be spent in the East or in areas that may not be cost effective in terms of doing something about the parks.

I am wondering if the chairman of the subcommittee could just address for a minute that issue in terms of the rationing of these dollars.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. MARRIOTT. I yield to the gentleman.

Mr. SEIBERLING. I think the gentleman is focusing only the State's side of this thing and he needs to look at both sides. Most of the Federal lands are in the West.

Between the Department of the Interior and the Department of Agriculture they will get 50 percent of all of the money authorized by this legislation. That 50 percent obviously is going to be spent where most of the lands under their control are located.

So, in addition to that, the State of Utah as well as the other States get the State allocation, as the gentleman has outlined, so that they will get a double-barreled shot, if you will, one through the Federal allocation and one through the State allocation.

Mr. MARRIOTT. I want to make sure I understand that because that is not the way I read the bill.

I read the bill that even though some of these different agencies will administer the funds, that all 90 percent of the funds will be allocated strictly on population and only 10 percent goes to each State equally and the other 90 percent is strictly a population figure based on the latest census.

Is that not the case?

Mr. SEIBERLING. No, that is not the case. That is only true of the State apportionment of the State allocation. The Federal agencies will allocate the funds in accordance with their needs and priorities in dealing with Federal lands. So it is not a case where there is just one formula. You have in effect two different channels through which this money goes, one through the Federal agencies and one through the States.

I would like to just mention one other thing. It is important to have a balance between the States between land and people. This legislation stresses that special consideration be given to hiring disadvantaged youth and youth from areas of high unemployment. Some of those areas are rural but many of them, of course, are urban, and we do not want this to just be a rural youth program. That is why it is desirable to have this balance.

Mr. MARRIOTT. I understand and accept that explanation. I do agree with the bill. I think it is a good bill, but I want to make sure the money is used properly and goes to the place that it will do the most good.

I thank the gentleman for his input.

Mr. SEIBERLING. I thank the gentleman for his support.

The SPEAKER pro tempore. The gentleman from Alaska (Mr. YOUNG) has 4½ minutes remaining and the gentleman from Ohio (Mr. SEIBERLING) has 8 minutes remaining.

Mr. SEIBERLING. Mr. Speaker, I yield 1 minute to the gentleman from Oregon (Mr. WEAVER). I also thank him and commend him for the great support he has given to this legislation.

Mr. WEAVER. Mr. Speaker, in the 1930's a young man named Sid Liken came from the State of Connecticut to the State of Oregon in the Civilian Conservation Corps. This young man stayed in Oregon, went into the lumber business, and became one of Oregon's outstanding businessmen and citizens.

There are many, many others like him who came from the cities of the East to Oregon and have settled there. They write me letters constantly. You can go through Oregon and see the

quality of the work the CCC did. It is outstanding.

This program today can be the same and render the same value to people like Sid Liken. I cannot express enough of my true appreciation to my colleague, chairman of the Subcommittee on Public Lands, JOHN SEIBERLING. This is an outstanding man and an outstanding leader in the Congress, and I congratulate him on his work in bringing this bill before us.

Mr. YOUNG of Alaska. Mr. Speaker, I yield the time that I have remaining, 4½ minutes, to the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. Mr. Speaker, I hate to interrupt this love in for this legislation, but I cannot stand mute and allow the record to appear that there is unanimous support for this program because there are too many important questions about this type of legislation, about this specific bill, that have not been answered yet.

So I would like to just enumerate some of the basic questions that I do not think have been addressed here.

First, is the work to be performed of high priority or, in other words, is there a real need for it? Or is this strictly just makeshift-type work.

As a result of that, will the skills that would be acquired or learned, if any, be skills that could be used in other jobs?

Does this duplicate other programs now serving disadvantaged youth? I think the answer to that question clearly is yes because of some of the bills we have already passed last year.

Another question is: Is the amount of money justified for this new program? We are talking about $300 million annually for a new program.

It is easy for us all to stand up here and say, "Oh, yes, we support this new jobs program for young people" because it makes good politics to support it. But I would urge my colleagues to look beyond the title, look beyond what we have heard here today, and ask yourselves can you really justify this program, a new program that still needs, in my opinion, a lot of work on it, a program that was considered in a previous Congress but did not pass.

I just think there are too many questions here. This bill is brought up under suspension of the rules. I think we ought to consider it more. I think amendments ought to be in order and they are not under this process.

So I would urge my colleagues to vote "no."

□ 1300

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. LOTT. Mr. Speaker, I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr Speaker, I thank the gentleman for yielding.

We have here a perfect symbol of the old politics of the 1930's, the game playing, the program, so that some Member of Congress can go home and say, "I got some jobs for people out of work."

These are not permanent jobs. They may not be useful jobs. They are probably the most expensive jobs that we will ever have.

I thank the gentleman for bringing our attention to this factor.

The responsibility of the Congress is to get the deficits down so we can create some real jobs in this economy.

I wish to associate myself with the remarks of the gentleman from Mississippi.

Mr. Speaker, again the forces of profligacy would have us believe the Federal Government is an effective, efficient spender of our peoples' moneys. They tell us that this particular bill will only cost $300 million per year.

There has been no showing that useful work will be well done. There has been no showing of need. There has been no showing that it will create permanent jobs.

In short, it is the old politics of the 1930's. These are very expensive jobs. Our responsibility is to lower the defict by defeating bills like this. That would create real jobs.

Mr. SEIBERLING. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I would be glad to yield to the distinguished chairman of the committee.

Mr. SEIBERLING. Well, first of all, the gentleman asked whether these are real jobs.

I assure the gentleman that on the basis of the hearings we have had on the YCC and the YAC, both of which are now defunct——

Mr. LOTT. Did we not just have one of those programs phased out?

Mr. SEIBERLING. No. We passed the Jobs Training Partnership Act, which is a training act, no jobs.

This is a jobs bill with a training feature in it. This is real work that needs to be done.

I have park superintendents from the national park systems. I have national forest supervisors. I have local people in States and local governments, all coming to me and saying, "We need this work to be done. We need reforestation. We need trails made. We need bridges and we have no one to do it."

These people can do this sort of thing. We have had young people from YCC and YACC testify and they brought tears to our eyes as to the kind of tremendous thing it did for them in learning what it means to have a work experience, to work with other people and to have some concept of how to do things that people want and need done.

The placement record of the YCC and YACC is 70 percent. That is a very high placement record of putting young people back into either the education system who were dropouts or into jobs or the military.

So I suggest that this is real. This is not just make work.

Second, in terms of expense, our testimony showed that we got more than a dollar in output in terms of real value back for every dollar spent in both those programs.

This is an improvement, based on the hearings and the criticism of the old program; so I assure you that this has been carefully thought through. It is a real meaningful program.

Mr. Speaker, I yield 2 minutes to the gentleman from Puerto Rico (Mr. CORRADA).

Mr. CORRADA. Mr. Speaker, I thank the gentleman for yielding me this time, and I would like to commend the gentleman from Ohio and the gentleman from Alaska for handling this bill here on the floor.

I am pleased to rise in strong support of H.R. 999, the American Conservation Corps Act of 1983. This important legislation will address the critical problems of unemployment among disadvantaged youth.

This proposal was needed last year and it is needed now. Unemployment exceeds 10 percent and for black and other minorities youth it averages a staggering 25 percent. We must act now. This legislation will address two important problems: youth unemployment and the need to restore and conserve our Nation's public lands.

This is not a make work bill; it addresses an area on which work is needed and it is cost effective in the way government funding is used.

In Puerto Rico, the conservation corps has been duplicated at the State level, teaching many of our underprivileged youngsters to take pride in their land and to value their abilities to make contributions to the labor force. Passage of this bill will foster other such programs, and will reinforce existing State efforts in this area. The $50 million appropriation level in this bill would allow an extension of services to the community well beyond its monetary value.

This proposal has already been the subject of extensive hearings and discussion during the 97th Congress by the Interior and Insular Affairs Committee and the Education and Labor Committee. I serve on both committees and can vouch for the serious consideration undergone by the proposal.

I urge my colleagues to vote in favor of this legislation and I hope that action by the other body will be swift so that we may provide relief to the thousands of economically and educa-

tionally disadvantaged youth throughout the Nation.

Mr. SEIBERLING. Mr. Speaker, I yield 1 minute to the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, I rise in strong support of H.R. 999, the American Conservation Act of 1983.

I commend my colleague, the gentleman from Ohio (Mr. SEIBERLING), for his leadership in guiding this bill through the committee process and to the floor today. This is a good bill—the result of hard work and close examination by the committee and to my good friend DON YOUNG of Alaska whose hard work and perserverance helped fashion this important legislation.

Every Member of the Houses knows the economic problems we face as a nation. Unemployment—by far the most pressing and most devastating element of a recession—is still a major concern. With over 11 million Americans out of work, the jobless rate remains unacceptably high. Among the youth of our Nation, the unemployment rate is 22.7 percent nationally. To address this problem, the ACC proposal is targeted at this group with the highest rate of unemployment. When the program is in full swing, the American Conservation Corps could begin in time to help the growing number of jobless. Some estimate that youth could be put to work in 30 to 60 days from the time of enactment.

Besides increasing employment in a group that is experiencing the highest annual rate of unemployment, the work of the Corps is worthwhile and needed. This is not a make-work program: it is hard work. ACC projects would include conservation of forests and rangelands; revitalization of urban areas; preservation of historical and cultural sites; development and maintenance of recreational areas, roads, trails, and so forth. The ACC will serve a productive and useful purpose. The program will actually save public funds by performing needed labor-intensive services at the lowest possible cost.

The end results of such a program are certainly important, but as Members of Congress we must consider the cost effectiveness of each and every proposal brought before us.

This bill is no different. Programs like the ACC have a clear and demonstrated record of success. Evidence based on the performance of recent Youth Corps work is impressive. In the case of the YACC, for each $1 spent on this program, $1.20 was returned in the value of the work, averaged nationwide.

Mr. Speaker, I urge my colleagues—on both sides of the aisle—to support this bill. The ACC program is labor-intensive, cost-effective, targeted to a specific group where the problem is the worst. The program design and purpose is simple—to provide jobs for youth in a troubled economy while at the same time addressing legitimate conservation needs.

Mr. SEIBERLING. Mr. Speaker, I thank the gentleman from Massachusetts (Mr. CONTE) for his invaluable support.

I yield 1 minute to the gentleman from New Mexico (Mr. RICHARDSON).

Mr. RICHARDSON. Mr. Speaker, I rise in strong support of H.R. 999, the American Conservation Corps Act of 1983. This act is designed to help alleviate two of the Nation's most crucial problems: Youth unemployment, particularly among minorities and the disadvantaged, and the conservation of our Nation's natural resources.

As we are well aware, Mr. Speaker, the Nation continues to suffer from extremely high unemployment; 25 percent among youth and 52.3 percent among minority youth.

At a time when the administration is further cutting jobs training programs and conservation projects, the country desperately needs the American Conservation Corps to train and employ the Nation's youth in the worthy and much needed tasks of preserving our forests, wildlife, rangelands, and recreational areas.

Five percent of the American Conservation Corps funding is earmarked for Indian tribes. Mr. Speaker, native Americans in my district in New Mexico and in the entire Nation are suffering from the highest unemployment rate of any segment of the American society. Indian unemployment ranges from 45 to 55 percent. In 1981, Indian unemployment stood at 43 percent. Today, unemployment on the Navajo Reservation alone stands at roughly 75 percent.

At a time when jobs are extremely difficult to find, it is disheartening to see further massive cuts directed at minority youth. Enactment of the American Conservation Corps Act would provide much needed jobs in my district to those unemployed Indian and Hispanic youth who have been ravaged by joblessness and the desertion of the Federal Government.

The minority population in my district, Mr. Speaker, comprised of Hispanic and Indians, numbers over 60 percent of the population.

We must send out a signal to all unemployed Americans who have been left behind by this cruel recession that we in Congress care.

I urge Members of this body to vote for this bill.

Mr. SIEBERLING. Mr. Speaker, I yield 1 minute to the gentleman from California (Mr. PANETTA).

Mr. PANETTA. Mr. Speaker, as a cosponsor of the legislation, I want to commend the chairman and the committee for expediting this legislation to the floor.

This is really an investment in this country. Let me tell you that in California we have a living example of the CCC that has been in operation for the last few years. It is the most effective government operation to help people. It is assisting communities in disasters. It is assisting communities when it comes to water reclamation. It is assisting communities when it comes to conservation.

It is supported by Republicans and Democrats, by liberals and conservatives in the California Legislature, because they see a meaningful effort trying to assist people and it has worked very effectively.

Second, and perhaps just as importantly, it is a resurrection, hopefully, of the sense of national service in this country among our young people.

This is not just a jobs bill. It ought not to be viewed as just a jobs bill. It is a service bill and it is intended, hopefully, to resurrect some sense of service among our young people that they have to return something back to this country; so because of that, I commend the gentleman for his presentation.

Mr. SEIBERLING. Mr. Speaker, I commend the gentleman for his outstanding statement.

I yield 1 minute to the gentleman from Washington (Mr. DICKS).

Mr. DICKS. Mr. Speaker, I have been a supporter of the Youth Conservation Corps, a program which provides jobs for young men and women while accomplishing essential activities such as reforestation, flood control, improvements in our national parks, and soil conservation. After visiting Youth Conservation Corps camps in my district and viewing the work they are doing, I am even more convinced that the program deserves our support. Not only do these young people gain valuable work experience, but the Federal Government gets a bargain. This work has to be done, and it would be accomplished at greater cost if it were not for the YCC. As the distinguished sponsor of the bill, Mr. SEIBERLING, has pointed out, the Youth Conservation Corps workers return $1.04 for every $1 of funds expended. I would like to add my endorsement to the concept of combining the functions of the Youth Conservation Corps and the Young Adult Conservation Corps to provide jobs for 16- to 25-year-old youths, at a time when this group is experiencing extraordinary high unemployment. The American Conversation Corps will be a worthy successor to the YCC and the YACC. With unemployment now even higher than when the House of Representatives passed the American Conservation Corps Act of 1982, I hope that our action on this legislation will be expeditious, and that it will be followed by prompt passage in the

Senate. The American Conservation Corps is an ideal combination of employment training, care of our natural resources and effective use of Federal funds.

Mr. SEIBERLING. Mr. Speaker, 2 weeks ago my youngest son was held up at pistol point at the door of my house on Capitol Hill by two teenage youth.

I can only say that I do not have any feeling of antipathy toward those youth. They were not caught. I do not know who they were, but that is the situation that is resulting from the fact that we have 50 percent black youth unemployment and 20-plus youth unemployment in our communities and our cities.

It is time we gave those young people an alternative; namely, meaningful jobs at some pay that enables them to hold their heads up and not hold a gun at the heads of our young people.

So I urge everyone to put some investment in the youth of our country through this legislation.

● Mr. BOLAND. Mr. Speaker, I am pleased to be a cosponsor of H.R. 999, and I want to urge my colleagues to adopt this important legislation. The gentleman from Ohio (Mr. SEIBERLING) is to be complimented for bringing this bill to the floor as quickly as he has done.

As the Members of this House know, H.R. 999 would establish the American Conservation Corps (ACC) to provide jobs and training for unemployed young people. Corps members would do needed conservation work on public lands. The ACC would be patterned on one of the most successful programs ever established by Congress, the Civilian Conservation Corps (CCC) of the 1930's.

I do not know if we can recreate the CCC, but I do know that we have a serious problem with youth unemployment in this country, particularly among members of minority groups, and that something needs to be done to begin to address that problem. The energy and enthusiasm of these young people need to be directed toward productive activities. They need training and a job that will teach them the skills necessary to move on to other forms of employment and thereby support themselves and their families. I believe that the ACC can provide this type of work experience and, at the same time, accomplish a number of necessary conservation-related projects on public lands.

The ACC will be an investment in the future of this country; an investment in both its land and its people. It is not going to cure all of the economic problems that result in youth unemployment, but I believe it can have an important impact on the lives of thousands of young people. It is a program that deserves support, and I hope that it will be overwhelmingly approved by the House of Representatives.●

● Mr. LAGOMARSINO. Mr. Speaker, I rise in support of H.R. 999, a bill on which I am an original cosponsor. With youth unemployment in our country at a critical level of 24.5 percent and 52.5 percent among minority youth, I feel it is imperative that Congress act to assist these young people attempting to break into the working world. While creating an estimated 100,000 positions for our Nation's youth, the American Conservation Corps program will also help to rehabilitate and conserve our public lands and community resources.

Based on the successful YCC and YACC programs in the past, the ACC program will, I am confident, provide numerous benefits for our country. Serving on the House Interior Committee for many years, I have become fully aware of the erosion and deterioration of our precious natural resources. This bill would allow us to fulfill our responsibilities as stewards of our land in a cost-effective manner. More importantly, as stewards of our children, it will enable us to provide these young people with job opportunities and a possible lifetime career in the conservation area.

I realize the fiscal constraints under which our Government is operating today; however, I feel this program, which would speak to the dual problems of rising unemployment among our youth, especially the disadvantaged youth, as well as the loss of funds for maintenance of our public properties, is well worth the required modest expenditure.

H.R. 999 has been endorsed by both the House Interior Committee and the Education and Labor Committee. I would hope that my colleagues will overwhelmingly support this important bipartisan effort to provide training and jobs for our young people, and at the same time, allow them the opportunity to preserve our Nation's valuable resources for their futures.●

● Mr. BOSCO. Mr. Speaker, I have asked to speak on the bill before us today to establish an American Conservation Corps because of my first-hand knowledge of the experience of the California Conservation Corps—a State-initiated program that is one of the successes on which this national legislation is based.

In considering this legislation (H.R. 999), it is important for us to recognize that initiatives already have been taken in at least 14 States to establish and operate State youth conservation corps activities that would benefit from H.R. 999, and that proposals along the same lines are now being considered in at least 13 other States.

It also is important that we recognize the degree to which H.R. 999 would authorize a Federal-State cost-sharing partnership with those States that operate State corps, as well as encourage the other States to take similar initiatives.

Indeed, this legislation is designed to provide more cost-sharing support to the States than funding for corps activities to be operated by Federal natural resource agencies.

At a fiscal year 1984-89 level of $300 million in annual appropriations, H.R. 999 provides that the States would receive $137.5 million (or about 46 percent); and the Interior Department agencies—including National Park Service, Bureau of Land Management, and Fish and Wildlife Service—$62.5 million (or about 21 percent), and the Department of Agriculture—primarily Forest Service—$62.5 million (or 21 percent) also. Thus, the States' allocation of $137.5 million (46 percent) is more than the Federal agencies' combined allocation of $125 million (42 percent).

The bill also provides that $25 million (about 8 percent) be for projects of special merit—for which State, local government, and private organizations would compete—and for other Federal agencies. The remaining $12.5 million is earmarked for Indian tribes (about 4 percent).

Mr. Speaker, as a former chairman of the budget subcommittee of the California Legislature that ordered an evaluation of the cost-effectiveness of the California Conservation Corps program, I can testify to the value my State has received from that CCC since its beginnings in 1976. We have found that for each $1 of State funds spent on the CCC, $1.65 in benefits is returned.

I can also speak to the physical benefits of the California Corps to the people of my State through performance of its tasks. These include serving as an emergency quick-response force when fires, floods or other natural disasters occur, and assisting local, State, and Federal agencies in conserving and improving natural and community resources.

In my own district, on the north coast of California, corps members have planned 3 million trees of value to my area's forest-based timber industry, and collected tons of seed cones to replenish the State's forestry seed bank.

Corps members have opened more than 100 miles of debris-jammed streams along the north coast that are spawning areas for salmon and steelhead. In addition, they have rescued trapped fish, restored storm-damaged rearing ponds, tagged thousands of salmon, and renovated fish hatcheries. This is especially good news for all of those in my district who depend heavily on our sport and commercial fishing industry.

There is, however, another kind of benefit from the corps' work that

cannot be measured as traditional economic benefits or evaluated in terms of cost effectiveness. I am thinking of the young minds and bodies that have been strengthened by their service in the CCC and the young citizens—and the CCC has had 17,000 enrollees since 1976—who have developed a sense of their usefulness in society. It is impossible to attach dollar amounts to the character building provided by the CCC experience in California.

Mr. Speaker, some details of the initiatives being taken by other States have been brought together by the Human Environment Center, of 810 18th Street NW., Washington, D.C. 20006. The center's February 1983 newsletter includes the following about activities in States where State corps members already are at work, and in States where corps proposals are now being considered. I ask unanimous consent to insert excerpts from this newsletter at this point.

CORPS MEMBERS AT WORK

Connecticut: The 1982 Connecticut legislation created a corps with one-sentence Yankee brevity: "The commissioner of environmental protection shall establish and operate a Connecticut Conservation Corps program, for the employment of young adults at facilities maintained and operated by the division of conservation and preservation of the department of environmental protection."

Under a $525,000 first-year appropriation, some 60 corpsmembers serve in year-round day-work "terms" at eight State installations. Forestry, park, and fish and wildlife projects are emphasized. Enrollees, age 18 to 25, are approximately 30 percent female and primarily from economically disadvantaged families, although such targeting is not mandated. They work a 40-hour week at the Connecticut minimum wage of $3.37/hr.

Gov. William O'Neill said, "The Federal cutbacks have left a void. . . . The basic design of the program is to provide initial or interim employment for young people, hopefully leading to permanent and unsubsidized jobs." (Contact: Richard Couch, 203/566-5026.)

Iowa: The new Iowa Youth Corps, enrolling those age 14 to 19 at minimum wage, combines a summer program open to all youth and an in-school component for the economically, socially or physically disadvantaged. The 1982 summer program applied $220,000 in State funds to engage 250 enrollees in 15 non-residential conservation projects. The in-school operation, with less conservation emphasis thus far, employs and trains youth for 18 hours weekly. School districts, local governments or other non-state sources provide 30% of each project's costs. The present State outlay of $808,000 may rise to $900,000 next year. (Contact: Phillip Smith or Jo An Callison, 515/281-3711.)

Elsewhere: Ohio has 102 Civilian Corpsmembers in two residential camps, and Minnesota sustains a smaller year-round program. Several states ran modest summer corps programs in 1982, using combinations of state and private financing and/or funds remaining from terminated Federal programs. These included: Alaska, Illinois, Kansas, Maine, Minnesota, Pennsylvania, Washington and Wisconsin. Renewal of such programs in 1983 depends on state legislatures and Congressional action on the proposed ACC year-round and summer program.

STATE CORPS PROPOSALS

Wisconsin: The State's Conservation Work Projects Board held a lively Nov. 12 conference on "A CCC for Wisconsin?" Some 100 participants from public and private agencies across the State discussed needs of State youth, urban and rural work to be done, and options for youth training, protection of other workers, and funding of a year-round corps—and they answered "yes" to the conference-title question. Conference leaders were to report their findings to incoming Gov. Anthony Earl and senior legislators in late January. Human Environment Center Executive Director Syd Howe addressed the November gathering, describing American Conservation Corps developments toward a Federal-state-local partnership program and corps activities in other states. (Contact: Ellen O'Brien Saunders, 608/226-0567.)

Elsewhere: The Human Environment Center is aware of initiatives for year round corps programs under consideration in Arkansas, Florida, Illinois, Maryland (authorized in 1982 but not funded), New York, South Carolina, Texas, Virginia, Washington and Wyoming. Backers of these initiatives are closely watching prospects for American Conservation Corps primary funding, with a state match.

Since the center's newsletter was issued, it has learned that State youth corps proposals also are being considered in Alabama and Oregon.

In Oregon, the 1983 legislature is considering legislation to establish an Oregon Civilian Conservation Corps at a level of 400 to 500 enrolees between the ages of 17 and 23. The Oregon CCC bill appears to be carefully constructed, drawing from the experience of both past and existing corps programs. According to its legislative sponsors, it is based on the California CCC experience, and also includes features from both the national CCC of the thirties and the Ohio Department of Natural Resource's current CCC operation.

The Oregon corps' activities, its sponsors say, will be tailored to fit problems peculiar to Oregon, with three primary objectives: "strengthening the work ethic of Oregon's young adults; providing them employment, skills-training and education, and maintaining, protecting and conserving the valuable resources of the State."

It will be designed to do public service and emergency work in both urban and rural areas, such as: Disaster and emergency relief, forest firefighting, flood control, fish and wildlife habitat improvement, forest improvement and revegetation, park and recreation facility improvement, construction work for municipalities and schools, solar energy projects, and historical site rehabilitation. Working out of six work centers, the proposed Oregon CCC will contract its services to other governmental units on a nonreimbursement basis. Each sponsor need only supply the necessary tools and equipment.

(Contacts, at the Oregon State Capitol, are Representative Rick Bauman and Steven Frantz, 503/378-8782.)●

● Mr. ROYBAL. Mr. Speaker, as many of my colleagues are aware, I am one of only a few current Members of this body to have served in the Civilian Conservation Corps.

It is my understanding that the House will be considering a bill to authorize a new version of the CCC, the American Conservation Corps, within the next few days and, as one with first hand experience, I would like to share the reasons behind my sponsorship and avid support for this measure.

Back in the 1930's, the most crucial problem facing this Nation was unemployment. Unfortunately, the situation is much the same today. During the Depression, there simply were no jobs for young people—especially those living in urban areas. As we are all too well aware, urban youth unemployment now exceeds 50 percent on some of our cities.

When the opportunity to join the CCC became available, I jumped at it because—much like the millions of out of work young men and women today—I desperately wanted a job.

What I ultimately received from the CCC, however, was much more than a job. I gained experience, I earned enough money to enable me to go to college and I maintained a sense of pride and dignity that comes with working and making a contribution. I can say with all honesty that I credit the CCC with helping me become a Member of this body.

The CCC was a good program then, and the ACC can be a good program now, and I strongly urge my colleagues to vote for its establishment. I personally feel that it is vital that we provide the jobless youth of the great recession of the 1980's the same opportunities that were provided my generation during the Great Depression.●

● Mrs. BOXER. Mr. Speaker, I trust that H.R. 999 the American Conservation Corps Act will become law. I am familiar with a recent prototype of the ACC in my home State of California known as the California Conservation Corps.

The California program is one of the most successful programs operated by the State government in recent years. It provides job training and is a constructive character building program for hundreds of young people who might otherwise be unemployed and idle. I am sure that many young lives have been touched in a way that will have a positive, lasting impact as a result of participation in this program.

Furthermore, its exceptionally cost-efficient benefits to our natural environment have been needed and appre-

ciated. Members of the CCC provide aid to victims of natural disasters such as floods, and work to prevent disasters through fire prevention and flood control projects. They are useful in doing work needed to maintain and improve State parks, among other needed activities.

The potential on a national level is obviously much greater. Like the CCC, the ACC should never be advertised as an easy job. It is not. It is an opportunity to do some honest, hard work which benefits the participant and our country. In this time of unemployment, I can not think of a more appropriate and needed Government undertaking.●

● Mr. BOUCHER. Mr. Speaker, as a cosponsor of H.R. 999 which establishes the American Conservation Corps and as a member of the House Education and Labor Committee which reported this measure, I rise to urge my colleagues to support this important bill.

The Conservation Corps bill establishes a carefully constructed program designed to address two serious problems confronting our Nation: The deterioration of public lands, national parks and natural resources; and record high levels of youth unemployment.

Because of tight budgets and increasing costs, parks and natural resources have suffered from deferred maintenance and delayed conservation work. Erosion control, forestry management, road and trail maintenance, and other conservation projects have accumulated because of inadequate resources. The cost of catching up will grow higher the longer we delay the necessary work that must be done.

Meanwhile, the unemployment rate among people between the ages of 16 and 25 years of age has been in the 20 percent range for more than 1 year now. Employment and training opportunities for young people in rural and urban areas alike are severely limited. The ramifications of youth unemployment go far beyond the immediate lack of employment; the lost work experience and self-discipline that comes from employment will handicap these young people for years to come when job opportunities are more plentiful.

The American Conservation Corps program under consideration today is the latest incarnation of a series of successful and productive programs that began with the Civilian Conservation Corps during the Depression. These programs have worked and they have worked well. H.R. 999 has been drafted with the full benefit of our experience with the CCC, the Youth Conservation Corps, and the Young Adult Conservation Corps. The Education and Labor Committee, working in concert with the House Interior Committee, has reported a targeted, precise bill. The committees understand the issues, the importance of good administration, and the vital need for action.

To anyone who might skeptically label this bill "make work" or "leaf raking," I say, come to southwest Virginia where the unemployment rate in many counties exceeds 25 percent and where the youth unemployment rate may be double that. Come to southwest Virginia where we have some of the most beautiful national parks and forests in the Nation with countless maintenance and conservation projects waiting to be done. And come to southwest Virginia to explain to the young men and women who cannot find work that they do not need training and they do not need employment.

H.R. 999 is a good bill. It is carefully crafted to put young people to work and provide them with useful experience. I strongly urge my colleagues to support enactment of the American Conservation Corps.●

● Mr. ROE. Mr. Speaker, I rise today to strongly urge my colleagues to approve the American Conservation Corps Act of 1983; a measure I consider to be one of the most important we will consider in this Chamber during the 98th Congress.

Passage of this unique bill, which I am proud to have sponsored, will send an important message to the young people of our Nation that they have not been forgotten in our battle against record-setting unemployment rates.

Nationwide, the unemployment rate for young people is nearly 25 percent, while joblessness for minority youths has skyrocketed to a staggering 53 percent.

This highly important measure we are considering today will provide these young Americans with desperately needed work, while at the same time restoring neglected communities and natural resources. The cost of this endeavor will be minimal, while the benefits are many fold.

The youth conservation work program to be created under the bill is modeled after the Civilian Conservation Corps or CCC of the 1930's. In addition to creating an estimated 100,000 jobs for our unemployed youth, with a special emphasis on finding work for disadvantaged youth, the American Conservation Corps projects will greatly improve the quality of life in both urban and rural areas.

Make no mistake, this is not a make-work jobs program. Among the projects to be created under the American Conservation Corps are the revitalization of urban areas and historical sites, maintenance of recreational areas and forests and soil conservation projects.

Importantly, the program would not cost the American taxpayer any additional money, as it would be funded by Federal revenues generated by offshore oil, gas leasing and other permit fees.

Our young people are our greatest natural resource. The American Conservation Corps Act is a cost-effective and efficient way to accomplish needed conservation work throughout the country while providing jobs and training to our disadvantaged youth.

The 98th Congress has dedicated itself to solving our Nation's continuing unemployment dilemma. Passage of this legislation would go a long way toward accomplishing that objective.●

● Mr. BIAGGI. Mr. Speaker, I am proud to rise as a cosponsor of H.R 999, a bill to establish an American Conservation Corps. I consider it most appropriate that one of the first bills which the 98th Congress is considering addresses our Nation's most serious domestic problem—unemployment.

The most chronic element of the unemployment problem that we face is that of youth unemployment. H.R. 999 goes to the very heart of this problem by providing $60 million in fiscal year 1983 and $300 million per year for the fiscal years 1984 through 1989 for programs and projects to put young people back to work.

This legislation provides a variety of employment options for young people ranging from full-time, year-round employment to more temporary summer employment. Eligible individuals in the full-time employment program would be those persons aged 16 to 25 while the summer employment program would concentrate on those young people between the ages of 15 and 21. Special consideration in both programs would be on hiring the economically, socially, physically, or emotionally disadvantaged youth or to youth from areas of high unemployment.

The most salient feature of this legislation is the fact that it provides meaningful employment opportunities for young people. It is modeled after one of the most successful of programs from the New Deal era and is in response to economic problems as severe as we had in that era.

The bill would include among its eligible projects those related to conservation of forests, revitalization of urban areas, and development and maintenance of recreational areas and roads.

Unemployment is a gaping national wound which must be healed. I have some reservations about proceeding along the lines that we are—passing one bill at a time. I believe all viable job-creating bills should be considered as one coordinated employment strategy. However in the absence of no action, one must work for passage of bills such as H.R. 999 which proposes in good faith to try and remedy the disgrace of youth unemployment.

The problems of youth unemployment, especially among minority youth, took on its severity well before the national rate reached the disastrous 10-percent rate last October. Unemployment among black youths in some of our major cities has hovered around 40 percent in recent years—and the specter of seeing able-bodied young people idle and in the streets is something we should commit ourselves to changing. H.R. 999 takes on such a commitment.

Our Nation, I believe, has learned its lessons about the shortcomings of public service employment. We have heard too much in the way of abuses—had charges of make work thrown at programs such as CETA. What makes H.R. 999 so markedly different is that it has an accountability feature—the average American whose tax dollars are financing these jobs will be able to see tangible benefits in their community. All levels of government would be involved in the funding of these jobs so all would have a stake in their being productive.

I believe that we are taking the right step here today but we must go well beyond this bill and attack the unemployment problem the only way we can—by providing jobs. It is shameful that 11 million men and women today are unemployed. It is incumbent upon us to muster all our energies and pass legislation which will relieve the problem. We need to put people back to work for their own dignity and for the betterment of our economy. Increased employment could help resolve another pressing domestic crisis—the social security system. One of the main reasons why the system is at the verge of collapse is the declining number of contributors to beneficiaries. It has slipped from 5:1 to closer to 3:1. Unemployment aggravates this situation as most of those unemployed could be contributors to social security.

I hope my colleagues will vote in favor of this bill and the Senate and President will act with equal dispatch. There is no need to study unemployment. It has reached all of our districts—is affecting our friends, our relatives. Our national resolve must be raised, and passage of H.R. 999 is a good way to start.●

● Mr. WEISS. Mr. Speaker, the most pressing economic problem faced by our Nation today is unemployment. One of the most distressing aspects of that problem is the horrendous level of unemployment among our Nation's youth. Today, unemployment among teenagers is over 20 percent, and it reaches still more intolerable levels in minority communities. Minority youth unemployment in New York City is 50 percent, and the national average is above 45 percent. These unemployed young people represent a tremendous potential contribution to the economic livelihood of our Nation, yet their time and talents are going to waste.

In response to this pressing problem, the Congress is acting in a wise and timely fashion in establishing the American Conservation Corps (ACC). The ACC will provide jobs for as many as 100,000 young men and women between the ages of 16 and 25. Laudably, the ACC will be especially targeted toward economically, socially, physically, or educationally disadvantaged youth and youth from areas of high unemployment.

The ACC is rooted in a long tradition of pragmatic employment programs begun with the Civilian Conservation Corps of the 1930's. More recently, the Youth Conservation Corps was established to provide youths aged 15 to 18 with public conservation jobs in the summer, followed by the Young Adult Conservation Corps which provided year-round conservation work for young people aged 16 to 23. Shortsighted cutbacks by the Reagan administration in the name of fiscal austerity have all but dismantled these programs. Thus the ACC represents an attempt by the Congress to revitalize an effective youth employment strategy at a time of intense need.

The jobs created by the ACC are not "makework" jobs as the administration claims. Young workers will be engaged in projects involving energy conservation, road and trail development and maintenance, revitilization of urban areas, and preservation of historic and cultural sites and other activities which are vitally needed. As one of the many initiatives which we must undertake to curb unemployment, the establishment of the American Conservation Corps is a significant and exemplary step toward putting America back to work.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. SEIBERLING) that the House suspend the rules and pass the bill, H.R. 999, as amended.

The question was taken.

Mr. FRENZEL. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 301, nays 87, not voting 44, as follows:

□ 1300

The Clerk announced the following pairs:

On this vote:

Mr. Jones of Tennessee and Mr. Guarini for, with Mr. McDonald against.

Mr. WINN and Mr. BURTON of Indiana changed their votes from "yea" to "nay."

Mr. SHARP changed his vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. SIKORSKI. Mr. Speaker, I was unavoidably absent, missing the vote by 10 seconds, on rollcall No. 10, the passage under suspension of the rules of the bill, H.R. 999, American Conservation Corps authorization. I am a cosponsor of the legislation and support its passage.

□ 1330

GENERAL LEAVE

Mr. SEIBERLING. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just considered and passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

REPORT ON RAILROAD RETIREMENT SYSTEM—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Energy and Commerce:

(For message, see proceedings of the Senate of today, Tuesday, March 1, 1983.)

REPORT ON H.R. 1718, ESSENTIAL AND PRODUCTIVE JOBS AND UNEMPLOYMENT COMPENSATION APPROPRIATION BILL, 1983

Mr. WHITTEN, from the Committee on Appropriations, submitted a privileged report (Rept. No. 98-11) on the bill (H.R. 1718) making appropriations to provide emergency expenditures to meet neglected urgent needs, to protect and add to the national wealth, resulting in not make-work but productive jobs for women and men and to help provide for the indigent and homeless for the fiscal year 1983, and for other purposes, which was referred to the Union Calendar and ordered to be printed.

The SPEAKER pro tempore. All points of order on the bill have previously been reserved.

PROVIDING PERMANENT STAFF FOR PERMANENT SELECT COMMITTEE ON INTELLIGENCE

Mr. MOAKLEY. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 58 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 58

Resolved, That (a) clause 6(a)(2) and clause 6(b)(2) of rule XI of the Rules of the House of Representatives are amended by striking "(except the Committee on Standards of Official Conduct)" and inserting in lieu thereof "(except the Committee on Standards of Official Conduct and the Permanent Select Committee on Intelligence)".

(b) Clause 4 of rule XLVIII of the Rules of the House of Representatives is amended by striking "(6)(c)" and inserting in lieu thereof "(6) (a), (b), (c)".

The SPEAKER pro tempore. The gentleman from Massachusetts (Mr. MOAKLEY) is recognized for 1 hour.

Mr. MOAKLEY. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Tennessee (Mr. QUILLEN), and, pending that, I yield myself such time as I may consume.

Mr. Speaker, the resolution (H. Res. 58) amends the rules of the House to provide permanent professional and clerical staff for the Permanent Select Committee on Intelligence, on a nonpartisan basis. Although the resolution easily is subject to misinterpretation, it is an important institutional reform which deserves the complete support of the House.

In 1946, Congress undertook a massive reform of the House committee structure which included the consolidation of its 48 standing committees into 19. The Legislative Reorganization Act of 1946 also made an important policy decision to provide for statutory staff. The basic concept is that, if a standing committee is to exist at all, it is entitled to at least the minimum level of support it needs to function at all.

This position was reaffirmed by the House as recently as 1974 by the adoption of the Committee Reform Amendments of 1974 (H. Res. 988, 93d Congress); as the committee responsible for the measure observed:

> Committees have enabled the House of Representatives to meet the legislative demands of a modern society while remaining independent of the executive branch. To a significant degree, professional and clerical staff resources have helped them to do so.[1]

Through funding resolutions, pursuant to clause 5 of rule XI, the House retains the right to supervise committee investigations. If the House doubts the adequacy of a committee's work, ample recourse exists to change its composition or leadership, to alter its responsibilities, or to abolish it altogether. But the basic intent of clause 6 of rule XI, for the 37 years it has been carried in the rules of the House, has been to insure that this cannot be done through the backdoor device of failing to provide the minimum staffing of 30 positions.

Few committees could compete with the Permanent Select Committee on Intelligence for a legitimate claim on this continuous guarantee of adequate staff resources to maintain truly independent review of the programs it oversees. The entire legislative history surrounding the establishment of the committee (H. Res. 658, 95th Congress), and its companion committee in the other House, confirms the recognition by Congress of the need to strengthen both the caliber and independence of congressional oversight of intelligence activities in a manner consistent with national security requirements.

Mr. Speaker, the resolution (H. Res. 58) simply confirms the obvious fact

[1] Report (H. Rept. 93-916) of the Select Committee on Committees to accompany House Resolution 988, 93d Congress.

that the Permanent Select Committee on Intelligence is a standing committee, in all but name, and, as such, is entitled to the protections of clause 6 of rule XI.

The reasons for the fiction of listing the committee as a select committee continue to exist. They are all valid and accepted by the membership of the House. Specifically, I refer to the following:

First, for substantial reason, clause 2 of rule XLVIII limits service on the committee to 6 years. This rotation is considered essential to avoiding problems that have existed in the past, by keeping the committee at a reasonable distance from the community it oversees.

Second, to better coordinate the work of the committee with the appropriate legislative committees, it was considered necessary to enable Members to take seats without regard to numerical restrictions imposed by rules of both majority and minority caucuses. This feature has enabled the committee to recruit, from both sides of the aisle, Members of high caliber and dedication who might not otherwise have been able to accept a seat on a committee subject to term limitations.

Third, the designation as a select committee served to better identify the unique structure of the committee's jurisdiction which, with respect to intelligence activities, cuts across the agency and program responsibilities of various standing committees.

And, finally, select committees are appointed by the Speaker, although, of course, he acts on the recommendation of the minority leadership in regards to their appointments. This was considered important in regards to a committee which handles such sensitive subjects.

For these reasons, it was necessary to call the committee a select committee. But there is a clear understanding that select committees are temporary creations designed to carry out certain investigations outside the normal legislative structure. The Permanent Select Committee on Intelligence, on the other hand, clearly is permanent and it has a legislative and oversight jurisdiction which is clear and important.

The resolution (H. Res. 58) slightly departs from the normal application of the rule by requiring a nonpartisan staff. The agreement between the chairman, the gentleman from Massachusetts (Mr. BOLAND), and the ranking minority member, the gentleman from Virginia (Mr. ROBINSON), contributes significantly to the purposes of the resolution and is characteristic of the manner in which the very able gentleman and their colleagues have managed the committee since it was established in 1977. As explained by the gentleman from Virginia:

Most of the committee's operations are nonpartisan. They are so because of the way the staff approaches those subjects, and because of the attitude of Members. Both are attributes particularly needed on a committee with our sensitive responsibilities.

Where this committee has disagreed on issues, I am able to say that it has been on matters of public legislation. Those disagreements helped the House work its will on important elements of public policy affecting intelligence. The staff support provided to the minority in those cases was attuned to its members' desires, and I do not complain about the proportion of staff available for this purpose.[2]

I hasten to point out that this provision was the subject of some dispute during consideration in the Committee on Rules. It is, to the best of my knowledge, the only aspect of this measure which has raised any controversy at all.

The Committee on Rules concurs in the judgment of the chairman and ranking minority member of the select committee and considers it important that the rule, in providing statutory staff to the select committee, should specifically provide for nonpartisan staff. For this reason, the committee rejected an amendment to the resolution, offered by the gentleman from Mississippi (Mr. LOTT), to strike that provision.

In doing so, Mr. Speaker, the committee was not insensitive to the legitimate concerns raised by the amendment. The committee recognizes that the provision is subject to some potential for abuse but defers to the judgment of the gentleman charged by the House with the management of the select committee, the gentleman from Massachusetts and the gentleman from Virginia, that the principle of nonpartisan staffing is important enough to warrant such language in the rule.

I personally do not regard the danger as significant and it is certainly not without remedy. I would note that significant problems developed with a predecessor select committee in 1975 and the Committee on Rules intervened promptly and forcefully to bring forward a resolution (H. Res. 591, 94th Congress) which extinguished that select committee. Since the establishment of the select committee in 1977, the Committee on Rules has exercised its oversight jurisdiction carefully and the rules relating to the committee have been amended five times.

It should be noted that the select committee has operated under funding resolutions which provide no procedural protection to the minority for 5½ years and no complaint was voiced by the committee's minority with respect to committee operations.

[2] Testimony of the Honorable J. Kenneth Robinson, before the Committee on Rules, Feb. 23, 1983.

Mr. Speaker, I would wish to make clear that the intent of limiting the applicability of clause 6(a)(2) and clause 6(b)(2) of rule XI relates only to nonpartisan staffing. Any use of the rule to deprive the minority of its right to adequate and appropriate staff support would be a violation of the spirit and intent of the resolution and, in such a case, it would be the responsibility of the Committee on Rules to report to the House on an appropriate remedy.

The resolution (H. Res. 58) is a nonpartisan and appropriate agreement. I urge the adoption of the resolution and hope that the Members of the House will appreciate the importance of the vote on the resolution in demonstrating the commitment of the House to effective, nonpolitical oversight of national security matters.

Mr. Speaker, I reserve the balance of my time.

Mr. QUILLEN. Mr. Speaker, I yield myself as much time as I may use.

Mr. Speaker, this is a good change in the rules, in my opinion. This committee should be nonpartisan. I do not know of another committee in the House that has worked so hard to keep itself nonpartisan as this committee. It does a great job under the chairman, the gentleman from Massachusetts (Mr. BOLAND), and the gentleman from Virginia (Mr. ROBINSON), the ranking minority member. Both have testified before the Rules Committee that this would not disrupt the rights of the minority because, during the 5½ years that the committee has been in operation, they have worked hand-in-hand together.

I served on the Ethics Committee for a number of years, and the staff there is nonpartisan. I speak to you today as a minority Member of this House.

□ 1345

I want the minority to be protected always. But I think if we become partisan in the Select Committee on Intelligence that we are going to destroy its effectiveness, and the committee does a great job.

Mr. Speaker, I urge the change in the rule and a favorable vote on the resolution.

Mr. Speaker, I yield 4 minutes to the gentleman from Mississippi (Mr. LOTT).

Mr. LOTT. I thank the gentleman for yielding.

Mr. Speaker, first I want to commend the distinguished chairman, the gentleman from Massachusetts (Mr. BOLAND) and the distinguished ranking member, the gentleman from Virginia (Mr. ROBINSON) for the job that they have done with this Select Committee on Intelligence. They have been active, they have been effective, and they have been nonpartisan. I think it

is to their credit and, therefore, a favorable reflection on this body that we have a Select Committee on Intelligence that has been acting in the way that it has.

Therefore, I think Members on both sides of the aisle are inclined to honor the request that is contained in this resolution, House Resolution 58, from the Select Committee on Intelligence. I think, as a matter of fact, it is a permanent committee and that there is justification for that and therefore I think there is a need for the permanent staff.

I have no complaints with that, even though it is still designated as a select committee. But I must confess that I do have misgivings about the change that is provided here that would not allow the minority even to have the option of appointing its own staff.

I am not arguing at all that we should have a partisan staff. As a matter of fact, I think the contrary is true.

There is no doubt in my mind that the distinguished chairman of the committee and the ranking member have made sure there was no partisanship and there was adequate staffing for any Member on either side of the aisle that needed staff assistance.

But it is a precedent we are setting here, in my opinion, and I would like to put my colleagues on this side of the aisle and the entire House on notice that this is a precedent.

While there are committees here in the House, notably, I think the Armed Services Committee, and to a degree, the Appropriations Committee, that do not have designated minority staff as such, they still have that right under the law that we passed in 1970 to claim minority staff if they need it.

The only committee in the House that does not have that authority is, as I understand it, our Ethics Committee where the makeup of the committee is truly nonpartisan or bipartisan with a 6-6 makeup. The Select Committee on Intelligence has a 9-to-5 makeup. And while I have no doubts about what would happen with the present chairman if the ranking member needed minority staff, we are, in fact, giving up that opportunity from the minority standpoint, and it is at least conceivable that someday if this precedent is carried forth that there would be a partisan staff since the staff would be totally controlled by a 9-to-5 vote of the majority members of the committee.

I just want to point out my concerns that in our zeal to make sure that this Select Committee on Intelligence is nonpartisan, we, in the minority, are giving up our right under the law to have the opportunity to claim this one-third staffing.

After discussions with the gentleman from Virginia and others on this side of the aisle, I will not ask for defeat of the previous question and I will not ask for a division of the question. But it is a concession in the interests of making this truly a nonpartisan committee on the part of the minority and I would like for the RECORD to show now that we are making that concession.

I would urge the members of this committee both now and in the future to make every effort to make sure that the activities of the committee and the staffing are truly nonpartisan.

I yield back the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as always, my friend from Mississippi (Mr. LOTT) is effective and alert in guarding the rights of the minority and the committee is not insensitive to the legitimate concerns raised by the gentleman.

The committee recognizes that the provision is subject to some potential for abuse but defers to the judgment of the gentlemen charged by the House with the management of the select committee, the gentleman from Massachusetts and the gentleman from Virginia, that the principle of nonpartisan staffing is important enough to warrent such language in the rule.

Mr. Speaker, I would like to take a moment to establish two principles in the legislative history which I hope will offer some assurance to the distinguished gentleman from Mississippi.

First, I wish to associate myself with the gentleman's comments. I agree that the provisions about which he is concerned could not properly be applied to any other committee of which I am aware and the Committee on Rules does not intend that paragraph (a) of the resolution (H. Res. 58) may be relied upon as any kind of precedent.

Second, as manager for the Committee on Rules, I would wish to clearly specify that the intent of limiting the applicability of clause 6(a)(2) and clause 6(b)(2) of rule XI relates only to nonpartisan staffing.

Any use of the rule to deprive the minority of its right to adequate and appropriate staff support would be a violation of both the spirit and intent of the resolution and, in such a case, it would be the responsibility of the Committee on Rules to report to the House on an appropriate remedy.

Mr. BOLAND. Mr. Speaker, will the gentleman yield?

Mr. MOAKLEY. I am glad to yield to my dear friend, chairman of the Select Committee on Intelligence, the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. I appreciate my colleague yielding. I can understand the concern of the distinguished minority whip, the gentleman from Mississippi (Mr. LOTT). I think he expressed it very well and very emphatically.

Let me for the minority make some legislative history on this particular rule. Let me say my interpretation of the rule is that the staff must be nonpartisan. But understanding this, the minority must be given the staff support that it requires and I have no objection to that.

Since the legislative history indicates this, I am sure that anyone who succeeds to the chairmanship of this committee or someone who serves in the majority on this committee would agree with that position. That has been our position over the past 5 years that we have been in existence, and that would be the position I would hope of all of those who will join this committee in the years ahead.

As the gentleman from Mississippi has indicated, there would be some concern because this is a committee where there is a revolving membership in that Members cannot serve for a longer period of time than 6 years after the completion of this particular Congress, the 98th Congress.

So the gentleman from Mississippi does state some concern.

Let me say that we have discussed this fully within the committee itself, the majority and minority, and we have never had any problems with it. The question is whether or not we would have any problems with it in the future.

So from the point of view of establishing the legislative history as outlined by my distinguished colleague from Massachusetts, my own particular position as chairman of the Select Committee on Intelligence, I would agree with that interpretation and would hope that would be the way in which any chairman or any members of the majority would act in the years that face us in the future.

Mr. QUILLEN. Mr. Speaker, I yield 3 minutes to the gentleman from Virginia (Mr. ROBINSON).

Mr. ROBINSON. Mr. Speaker, I appreciate very much what the gentleman from Mississippi (Mr. LOTT) had to say, the flattering things he said about our Committee on Intelligence. Were I in the same position as he in terms of being the minority whip I would think it my duty to call to the attention of the minority the fact that this situation exists and that we are giving up something.

That having been said, and having served on the Permanent Select Committee on Intelligence since its inception, I want to tell you in my view there is no other committee of the House that is in a similar situation. There is no other committee of this House where it is so important to maintain a high credibility and yet a low profile.

That being said, I think that any time that you move in the direction of a partisan staff you immediately gen-

erate to a degree partisanship because that is almost inevitable.

In the time that I have been on the committee since it was founded there have been rare instances where a Member has complained that he is not getting the kind of staff support that he thinks he is entitled as a member of the committee, but that has happened just as often on the side of the majority as it has on the side of the minority.

So, again, the committee has been impartial with regard to the way that it treats those matters.

I fully support this resolution as it is presently drafted. I think the House would make a grave error if it moved in the direction of a partisan staff and I hope that we will see this resolution approved as it has been presented.

I nevertheless appreciate the reassurances the gentleman from Massachusetts (Mr. MOAKLEY) has given us with regard to the way that the Rules Committee feels about how it looks at this matter because I think that is a guarantee that we are going to see it work the way it should.

I yield back the balance of my time.

Mr. QUILLEN. Mr. Speaker, I urge the adoption of the resolution. I have no further requests for time, and I yield back the balance of my time.

Mr. MOAKLEY. Mr. Speaker, I have no further requests for time, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

NO JUSTIFICATION FOR NATURAL GAS DEREGULATION

(Mr. LUKEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUKEN. Mr. Speaker, the President has announced his plan for the deregulation of natural gas. In the name of marketplace forces, the President is prepared to place all natural gas consumers, homeowners and businesses alike at the mercy of any industry lacking the necessary ingredient—competition.

The net effect of this proposal is that the President fulfills a campaign promise made to the major oil companies to deregulate. These companies hold upward of 80 percent of the old gas. This is gas that was explored for, drilled and sold at a controlled price which was sufficient to profit these companies at that time. There is no economic justification to allow these prices to increase today, especially when we consider that gas prices are already too high and current supplies are abundant. By allowing old gas to increase in price, we remove the last, albeit, threadbare cushion for the consumer.

All of our constituents who burn natural gas to heat their homes know that there is no price comparison, no transfer from one fuel source or company to another, no ability to respond to escalating prices in a normal fashion. There is no benefit to the consumer under the President's plan. Estimates of costs to consumers under this plan have been placed as high as $60 billion. While I think that figure will be amended as we get a better handle on the effects of the President's plan, it is clear that we have provided no relief for our citizens.

Changes are necessary in the NGPA, but not the type that would tilt the marketplace further from the consumer and business user.

While there appears to be no economic justification for increasing prices perhaps we should attempt to understand the President's basic reasons for sending this proposal forward. It appears that he believes the current oil price decrease is due in part to his actions upon taking office to deregulate oil prices. Whether or not the facts support that claim is debatable, but the assumption that what worked for oil will work for natural gas is plain wrong. With considerably shorter contract periods and a diverse means of transporting the fuel, one can make the case that there is greater potential for allowing a consumer to shop for price in oil. However, natural gas is a monopoly industry from the time a contract is signed between a supplier and a pipeline company. From that time forward, costs are passed on with no regard for what the market will accept until the consumer who is consuming less gas today pays 30 percent more than last year. This monopoly arrangement is not altered at all by the President's proposal, rather it is aided by removing Federal controls.

There can be no restraint or downward pressure on natural gas prices in an industry that allows noncompetitive practices such as take-or-pay contracts. The administration's proposal is to limit take-or-pay contracts to volumes of 70 percent at the discretion of the pipeline and supplier. The discretion to renegotiate currently exists and there has been little success. The administration also provides for a floating gas cap to cover price increases as a substitute to current fraud and abuse language that exists in NGPA. While we can cheer the administration's attempts at some form of consumer protection, we should be aware that all of these items cease to exist by January 1, 1986. Since no one believes that we will pass this bill tomorrow, the degree of consumer protection decreases as time marches on.

□ 1400

FIRE AT CENTRALIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. HARRISON) is recognized for 30 minutes.

Mr. HARRISON. Mr. Speaker, there is a town in my district called Centralia. It might easily be found in your district or in the district of any Member of this House. It is a small town; not quite 1,200 people live there. In many ways, they are ordinary people: The kind of decent, hardworking, problem-solving, giving-not-taking people, who are the backbone of this country; but there are some things that make Centralia special. Most of its people have resided there all their lives; many of them have lived in the same house for more than 25 years. It is a town where children who were born at the same time went to the same schools, played at the same games, worshipped in the same churches, worked in the same mines and factories, and have come to their middle and older years with a special sense of belonging to each other and to Centralia.

Ninety-four percent of the people own their own homes. They are not palatial; the architecture is not extraordinary; but when you go inside these houses, you find that they are remarkably clean, neat, well-decorated, renewed, modernized, up to date. The pride of the people of Centralia is now and long has been their homes. The fear of the people of Centralia is that their homes and their lives are in jeopardy.

Because there is one other thing that makes Centralia special—for 21 years a fire has raged beneath its surface. In May 1962, while John F. Kennedy was in the second year of his Presidency, before the Vietnamese war was a major conflict, while our space program was still in its infancy, before words like "medicare" and "medicaid" had passed into the common vocabulary, before OPEC, stagflation or Watergate, before so many of the problems that this Nation has solved or is contending with, a fire broke out in a garbage disposal site on the outskirts of town. At first, borough officials tried using water and clay to extinguish the smoldering garbage; but the effort did not succeed and within 2 months the above ground fire had ignited a below ground seam of anthracite.

Once begun, an anthracite fire will burn indefinitely as long as there is a supply of oxygen to keep it going and more anthracite to burn. For 21 years that fire has burned; and it has spread across the periphery of the town, under its streets, under its yards, under the homes of Centralia.

The fire has, at times, raised the ground temperature so high that news reporters have been able to fry bacon and eggs on the rocks by the side of the road. It has spewed forth carbon dioxide at hazardous levels. Even worse is the carbon monoxide, an odorless, poisonous gas, which seeps out of the ground and into the cellars. The combination of gases where the fire is worst creates a stench that pervades the air, and the smoke billowing out of the Earth sometimes collides with the fog above and makes the town of Centralia look like a scene from the inferno.

For 21 years, the fire has spread. Of course, I read about it in the newspapers. I saw the reports on television and I remember Ted Kopel's account about a year ago on "Nightline"; but the reality of Centralia did not come home to me until several weeks ago, just a few days after I was sworn in to this body. I went there because unexplained cracks were appearing in the highway which runs from Centralia to Ashland and which is the only main road connecting it with the rest of northeastern Pennsylvania. The cracks were spreading and multiplying and then, without warning, the median strip buckled and borehole readings indicated that the fire had spread under the highway and had destabilized it.

That morning, Mr. Speaker, I walked down Route 61, just outside Centralia, with a dedicated and energetic young State representative by the name of Bob Belfanti. As we walked into the fog, trying almost blindly to find the spot in the road where the cracks were worst, Bob turned to me and said as the stench hit our nostrils, "How would you like to live with that in the basement of your home every day of the year?" Until that moment, I had never truly understood what confronts the daily lives of the 1,200 people who live in that small town.

For 21 years, this fire has burned and it is not that nothing has been done about it. It is that what has been done was always too little and usually too late.

It is important, I think, to take a few minutes and review briefly the story of those years and the vast amounts of public money that have been futilely spent in a series of half-hearted and inadequate efforts by all levels of government.

When the fire first spread to the coalbed, the State in August 1962 let an excavation contract. The State spent more than $27,000 on that project, but it was not enough. The excavation did not remove all the burning coal, and so the fire spread. The State had simply done too little, too late.

The following year it tried again. Holes were bored into the underground and huge amounts of inert, nonflammable mine refuse was flushed into the fire in the hope of cutting off its access to oxygen; but again, the funds ran out before the fire was contained. The project was stopped and the fire spread.

Then the State made a third attempt. The plan this time was to dig a trench around the fire, depriving it of access to the coal outside the trench and allowing the coal inside the circle to burn itself out; but even before the project was completed, it failed, because the fire had already spread to the other side of the trench.

At this point, the State of Pennsylvania had spent more than $100,000 to no effect whatever. It was then an already beleaguered town first looked to the Federal Government. In 1965, Congress passed the Appalachian Regional Development Act, which gave the Secretary of the Interior both the authority and the responsibility to rehabilitate land that had been damaged by previous mining practices, and in particular to execute projects for extinguishing underground mine fires. A Federal-State partnership to deal with Centralia thus was born. Between then and 1973, the Commonwealth of Pennsylvania and the Department of the Interior dug bore holes to locate the fire, flushed it with water, backfilled it with inert material and trenched around it, all to no avail.

By 1973, both governments had spent more than $1,850,000 in dribs and drabs, in starts and stops, in largely uncoordinated and always inadequate efforts to contain and extinguish a fire which had begun on a single garbage heap.

During that time, in May of 1969, three families were forced to abandon their homes because the heat and the fumes were so intense as to threaten human life; and since then, 20 more families have been uprooted, forced to sacrifice their homes to save their lives.

In 1977, Congress passed the Surface Mining Control and Reclamation Act. Certainly, no one had a greater claim to its assistance than the people of Centralia; and under it, another project was begun in 1978. Almost a half a million dollars was spent, again flushing, boring, excavating and trenching, but it was not possible to encircle the fire unless some homes were acquired by condemnation.

□ 1410

There was not enough money for that and so the project was cut short, and with that, Mr. Speaker, serious efforts at fighting the fire ended. A few more residents have been moved out of the most dangerous homes. In others, gas detectors have been installed. They sound a siren when carbon monoxide has seeped in at life-threatening levels, and in some of those homes the siren goes off several times on an average day or night. And then day or night, winter or summer, the residents must run to open all their windows to let in the air and vent the poisonous gas.

The road outside Centralia is closed now and the State has spent a quarter of a million dollars to shore it up. The State will, of course, look to the Federal Government for reimbursement and sooner or later it will probably get it, and so we will go on, as long as this fire rages, meeting one crisis after another, responding to one immediate emergency by spending just enough money to get beyond it and not enough to get at the cause of it.

That is a foolish way to spend the public money, but even more importantly, it does not deal with the despair I have seen in the eyes of the people of Centralia who say to me that four Members of Congress have represented them over the last 21 years and yet nothing has been accomplished; that both political parties have sat in Harrisburg and governed in Washington, and yet nothing has been accomplished; that a whole generation has been born and raised and come to adulthood in Centralia and yet nothing has been accomplished; that for all the projects and all the money spent, the fire still rages and no one knows what will happen next.

Two years ago the Office of Surface Mining was authorized to spend $850,000 to dig 109 bore holes in an attempt to locate how far the fire had spread and, as exactly as possible, where it is now. The initial report of that study will come to the Congress in March of this year and a final report is due in May. The final report, and I would hope preliminary as well, is to contain options, to spell out ways to finally deal with this fire and what it would cost to do it, and that brings me, Mr. Speaker, to the point of these remarks and why I am here today to lay the problems of Centralia before the Members of this House.

Most immediately, it is because I have studied carefully the President's proposed budget for fiscal year 1984 and I have found more with dismay than surprise that it contains not one red cent to fight the Centralia mine fire. In purely financial terms, Mr. Speaker, we must ask what sense it makes for the Federal Government to have spent $850,000 to locate a mine fire and then to spend no money at all to put it out once it has been found.

It is no answer to say that we should wait until the economy is better and the deficit is smaller, for in the meantime the fire will simply move again and then all the money spent on the bore hole project will have been wasted.

But that is not all. I say to this House that unless something is done,

we will one day measure the cost of this mine fire in the terms of the loss of human life. That threat became clear 2 years ago when a 12-year-old boy playing in his grandmother's back yard felt the ground under him collapse and, without warning, he was plunged into a 12-foot chasm filled with carbon monoxide. Through his own quick wits and the heroism of others, Todd Dombroski was rescued that day, but neither we nor the people who live there have any guarantee that the ground below Centralia will not open up again, today or tomorrow, and that another young man or young woman, or old man or old woman, will not be swallowed, and this time forever, into the chasm and into the fumes and the fire.

So you may ask after all of this, why do the people not simply move? Why do they not abandon the town? Why do they not go somewhere else? But how do you move, Mr. Speaker, when the homes in which you have lived all your lives, when the homes into which you have poured your wealth and your time, your talent and your hopes and your dreams have absolutely no market value, for who would buy a home in Centralia today?

I am keenly aware of the importance a new Member should place on his first speech in the well of this House. He should not, for light or parochial reasons, impose on the time of his colleagues or burden the proceedings of this body. And so despite the depth of the human tragedy that confronts 1,200 men, women, and children who are my constituents, it was with great hesitation that I decided to speak today on the plight of Centralia, but I finally decided to do so because the more I thought about it, the clearer it became that the crisis which confronts Centralia goes far beyond the fate of the 1,200 people who live there; rather, Centralia is the tragic example that poses the question that confronts all of us, and most particularly those of us who are new to this body:

Why are we here? What is the function and purpose of Government? Is it the fundamental duty of Government to help people? Is it the obligation of Government to respond to natural disasters and to alleviate human suffering?

If it is, then the people who live in Centralia have a claim not only upon our conscience but upon our oath of office. Or are we to say that it is all a matter of degree; that we will respond only to those disasters which affect tens or hundreds of thousands which attract the daily attention of the media, which provide opportunities rich with promise for the next election?

Are we then to say to the people of Centralia that we cannot help you with your problem; that we cannot put out the fire that burns beneath your feet because it costs too much and you are too few; that you do not have enough influence and we do not have enough compassion? Or is it simply none of the Government's business? Is the present Secretary of the Interior right when he says that the Centralia mine fire just is not the problem because eventually it will burn out?

Of course we believe that people must first help themselves and we all believe that local governments first, and then counties and then the States, have an obligation to respond to local problems with local resources and local ingenuity, but I believe, and I think most of my colleagues here believe, that when disaster is so great that it goes beyond the ability of localities or counties or States to respond, then the obligation passes to the Federal Government, to the Government of the United States, for was this not one of the purposes for which the Founding Fathers gave birth to this Nation when they wrote its Constitution 200 years ago? This union of sovereign States was not formed only to provide for the common defense, but to promote the general welfare.

□ 1420

And so the daily tragedy which confronts the few people of Centralia poses the larger question which confronts all of us here in this House and across this Nation. What is the duty of Government? What is our responsibility to respond to disaster and to alleviate suffering?

An ordinary man who lived an extraordinary life, Harry Truman, said that he had come to the Presidency with the conviction that there was more good than evil in man, and that it was the duty of Government to help the good prevail.

Mr. Speaker, when the report from the Office of Surface Mining is before us and we know what can be done, I will ask this House in its committees and on this floor to do what must be done to end the suffering of the 1,200 valiant people of Centralia. I hope to have the support of all the Members of this House and of the Congress, for it is only by putting this fire out that we can now at long last fulfill the duty of Government by helping the good to prevail in Centralia.

CREDIT CONTROLS—A CHANCE TO DO SOMETHING MORE THAN TALK ABOUT HIGH INTEREST RATES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 10 minutes.

● Mr. ST GERMAIN. Mr. Speaker, high interest rates—despite some welcome downward trends in selected areas—continue to hold back economic recovery.

Belatedly, the Reagan administration is recognizing that something must be done about interest rates if we are to have any hope of putting people back to work in this Nation. Inflation is down, but interest rates remain at double digit levels even for big business borrowers. For small businessmen and consumers, interest rates have not budged or, at best, have moved only a fraction off historically high levels.

Last week, President Reagan suggested that commercial banks were keeping interest rates at artificially high levels.

"It is up to the banks," he said, "And there is no reason—I do not think—why the banks could not bring those interest rates down another notch or two."

Only a few days before, Secretary of the Treasury Donald Regan, bluntly stated: "Banks are doing their utmost to keep interest rates up."

And President Reagan's chief economic adviser, Martin Feldstein, chimed in with a prediction that long-term rates will not move much over "the next few months."

Mr. Speaker, we are happy to have the Reagan administration, at long last, recognize the destruction that high interest rates have brought to the economy over the past several years. The landscape is littered with the remains of businesses, farms, and jobs destroyed by runaway interest rates.

Mr. Speaker, clearly the economy needs a real reduction in interest rates—a reduction across the board that will give American families a chance to buy a home, that will allow small businessmen to reopen their doors, and that will give job-producing industries new life.

And we need more than just a short-term reduction. We need some assurances that we will never again allow people and businesses to be destroyed by the unconscionably high interest rates and the scorched-earth monetary policies of 1981 and 1982. The American people need long-range protection. They need assurance that someone will step in before the economy is crushed.

Mr. Speaker, I am happy that the President and his economic advisers are speaking out about the problem, even at this late date. But, we need more than hand wringing statements in times of ecomomic crisis. Economic jawboning means a lot more—carries a lot more weight—when there is a club in the corner in the event the lenders do not get the word.

I am today introducing the Credit Control Act of 1983 which would give

the President standby authority to control high interest rates and to make certain that credit, needed for productive purposes, is not siphoned away for high-flying speculative endeavors.

With this act in place, the President's efforts to jawbone will have true impact. The lending community will know, and the Federal Reserve will know, that the President does, indeed, have the statutory power to put words into action.

The credit control legislation I am introducing today is identical with that reported from the Banking, Finance and Urban Affairs Committee last year. This bill did not reach the floor in the closing days, but I am confident the Members of this Congress, who have seen the utter destruction caused by high interest rates in their districts, will give strong support to doing something more than talking about high interest rates.

Mr. Speaker, the legislation would reinstate the Credit Control Act of 1969 with several strengthening amendments. The 1969 act unfortunately was allowed to fall under a "sunset" provision which became effective last June 30.

The bill would give the President the power to institute credit controls "to reduce high levels of unemployment in any sector of the economy or to prevent or control inflation or recession."

The act, once triggered by the President, would be administered by the Federal Reserve Board. All aspects of credit could be controlled, including interest rates, maturities, downpayments and other terms. The President could authorize use of the powers across the full spectrum of credit or could pinpoint the controls to specific areas.

Mr. Speaker, I hope we will have early action of this legislation. Its passage will be a clear signal to the banks and other lenders and to the Federal Reserve that the Congress intends to see lower interest rates and lasting protections for the American public in the area of monetary policy.●

CURRENT LEVEL OF SPENDING AND REVENUES FOR COMMITTEE ON THE BUDGET

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. JONES) is recognized for 5 minutes.

● Mr. JONES of Oklahoma. Mr. Speaker, pursuant to the procedures of the Committee on the Budget and section 311(b) of the Congressional Budget Act of 1974, I am submitting to the RECORD a letter to the Speaker advising him of the current level of spending and revenues for fiscal year 1983:

COMMITTEE ON THE BUDGET,
Washington, D.C., February 25, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: On January 30, 1976, the Committee on the Budget outlined the procedure which it had adopted in connection with its responsibilities under Section 311 of the Congressional Budget Act of 1974 to provide estimates of the current level of revenues and spending. I am herewith transmitting the status report under S. Con. Res. 92, the First Budget Resolution for Fiscal Year 1983. This report reflects the resolution of June 24, 1982, and the current CBO estimates of budget authority, outlays, and revenues based on all completed action on spending and revenue measures as of the close of legislative business February 25, 1983.

With best wishes,
Sincerely,

JAMES R. JONES,
Chairman.

REPORT TO THE SPEAKER OF THE HOUSE OF REPRESENTATIVES FROM THE COMMITTEE ON THE BUDGET ON THE STATUS OF THE FISCAL YEAR 1983 CONGRESSIONAL BUDGET ADOPTED IN S. CON. RES. 92—REFLECTING COMPLETED ACTION AS OF FEBRUARY 25, 1983

[In millions of dollars]

	Budget authority	Outlays	Revenues
Appropriate level	822,390	769,818	665,900
Current level	830,244	800,077	606,311
Amount over resolution	7,854	30,259	
Amount under resolution			59,589

BUDGET AUTHORITY

Any measure providing budget or entitlement authority which is not included in the current level estimate for fiscal year 1983, if adopted and enacted, would cause the appropriate level of budget authority for that year as set forth in S. Con. Res. 92 to be exceeded.

OUTLAYS

Any measure providing budget or entitlement authority which is not included in the current level estimate for fiscal year 1983, if adopted and enacted, would cause the appropriate level of outlays for that year as set forth in S. Con. Res. 92 to be exceeded.

REVENUES

Any measure that would result in a revenue loss for fiscal year 1983, if adopted and enacted, would cause revenues to be less than the appropriate level for that year as set forth in S. Con. Res. 92.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., February 24, 1983.

Hon. JAMES R. JONES,
Chairman, Committee on the Budget, Washington, D.C.

DEAR MR. CHAIRMAN: In response to your request, this is to advise you of our estimate of the current level of 1983 budget authority, outlays, and revenues consistent with CBO's current economic and estimating assumptions.

[In millions of dollars]

	Budget authority	Outlays	Revenues
Current level estimate	830,244	800,077	606,311
Budget resolution (S. Con. Res. 92)	822,390	769,818	665,900
Amount over (+)/under (−) resolution	+7,854	+30,259	−59,589

Sincerely,

JAMES BLUM
(For Alice M. Rivlin, *Director*).●

LAWRENCE J. BARGETTO—AN OUTSTANDING CITIZEN AND BUSINESSMAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, it is with sadness that I report to my colleagues on the death of a fine citizen of my district, Lawrence J. Bargetto.

Lawrence Bargetto was president of Bargetto's Winery in Soquel, Calif. His winery is noted for its outstanding product, and his life was a testament to the excellence that comes of dedication and care.

In addition, though, Mr. Bargetto was one of the most dependable and concerned citizens of Soquel and Santa Cruz County. He served on the board of directors of the Soquel Creek County Water District for 21 years and was well known for his commitment to community needs. Indeed, the Bargetto winery was always available to charitable groups for wine-tastings and similar fundraising events.

I know my colleagues join me in expressing sympathy to Mr. Bargetto's wife, Beverly, and to the rest of his family. He will be greatly missed by his family, his friends, and his community.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. MORRISON of Washington (at the request of Mr. MICHEL) for today and the balance of the week on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. DEWINE) to revise and extend their remarks and include extraneous material:)

Mr. BETHUNE, for 60 minutes, on March 2, 1983.

(The following Members (at the request of Mr. LEVINE of California) to revise and extend their remarks and include extraneous material:)

Mr. MOAKLEY, for 10 minutes, today.
Mr. ST GERMAIN, for 10 minutes, today.
Mr. GONZALEZ, for 30 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. JONES of Oklahoma, for 5 minutes, today.
Mr. PANETTA, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. DEWINE) and to include extraneous matter:)

Mr. PORTER.
Mr. GUNDERSON.
Mr. JEFFORDS.
Mr. CORCORAN.
Mr. HAMMERSCHMIDT.
Mr. DANIEL B. CRANE.
Mr. SENSENBRENNER.
Mr. MICHEL.
Mr. KEMP.
Mr. COATS.
Mrs. ROUKEMA.
Mr. EVANS of Iowa.
Mr. STUMP in two instances.
Mr. DAUB.
Mr. MILLER of Ohio in three instances.
Mr. WOLF.
Mr. LENT.
Mr. BLILEY.
Mr. THOMAS of California.
Mr. MCDADE.

(The following Members (at the request of Mr. LEVINE of California) and to include extraneous matter:)

Mr. ROE in three instances.
Mr. MAVROULES.
Mr. DE LA GARZA in two instances.
Mrs. BOXER.
Mr. CLAY.
Mr. CHAPPELL.
Mr. STARK.
Mrs. BOUQUARD in five instances.
Mr. HAMILTON in 10 instances.
Mr. HANCE.
Mr. SMITH of Florida.
Mr. ALBOSTA.
Mr. UDALL.
Mr. ALEXANDER.
Mr. RODINO.
Mr. OTTINGER.
Mr. SIMON.
Mr. DYSON.
Mr. MOODY.
Mr. BEDELL.

ADJOURNMENT

Mr. HARRISON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 21 minutes p.m.), under its previous order, the House adjourned until tomorrow, Wednesday, March 2, 1983, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

432. A letter from the Secretary of Agriculture, transmitting a draft of proposed legislation to amend the Consolidated Farm and Rural Development Act; to the Committee on Agriculture.

433. A letter from the General Counsel of the Department of Defense, transmitting copy of proposed legislation to amend chapter 5 of title 37, United States Code, to extend the expiration date of the special pay provisions for reenlistment and enlistment bonuses; to the Committee on Armed Services.

434. A letter from the Secretary of Housing and Urban Development, transmitting a draft of proposed legislation to amend and extend certain Federal laws relating to housing, community and neighborhood development, and related programs, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

435. A letter from the President, Amtrak, transmitting an annual review of its basic rail passenger route system, pursuant to Public Law 91-518, section 404(c)(4)(C); to the Committee on Energy and Commerce.

436. A communication from the President of the United States, transmitting a report on international agreements transmitted to Congress after the expiration of the 60-day period specified by law, pursuant to 1 U.S.C. 112b(b); to the Committee on Foreign Affairs.

437. A letter from the Chairman, Nuclear Regulatory Commission, transmitting a report on the Commission's activities under the Freedom of Information Act during calendar year 1982, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

438. A letter from the Chairman, Federal Energy Regulatory Commission, transmitting a report on the Commission's activities under the Freedom of Information Act during calendar year 1982, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

439. A letter from the Acting Deputy Director for Current Information, Department of Agriculture, transmitting a report on the Department's activities under the Freedom of Information Act during calendar year 1982, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

440. A letter from the Acting Inspector General, Department of Labor, transmitting a report of the Department's Inspector General, pursuant to section 5(b) of Public Law 95-452; to the Committee on Government Operations.

441. A letter from the Federal Inspector, Alaska natural gas transportation system, transmitting a report on the office's activities under the Freedom of Information Act during the calendar year 1982, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

442. A letter from the staff secretary, National Security Council, transmitting a report on the Council's activities under the Freedom of Information Act during calendar year 1982, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

443. A letter from the Secretary of Interior, transmitting a report on the rental charges for noncompetitive oil leases, pursuant to section 1401(d)(2) of Public Law 97-35; to the Committee on Interior and Insular Affairs.

444. A letter from the Assistant Secretary, Department of the Interior, transmitting a draft of proposed legislation to amend the Volunteers in the Parks Act of 1969, and for other purposes; to the Committee on Interior and Insular Affairs.

445. A letter from the Marshal of the Supreme Court of the United States, transmitting his annual report of the administrative costs of protection of officials of the Supreme Court for the period December 29, 1982, to February 3, 1983, pursuant to 40 U.S.C. 13n(c) (96 Stat. 1958); to the Committee on the Judiciary.

446. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to extend the authorization for appropriations under the Atlantic Tunas Convention Act; to the Committee on Merchant Marine and Fisheries.

447. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation authorizing appropriations to the Secretary of the Interior for services necessary to the nonperforming arts functions of the John F. Kennedy Center for the Performing Arts, and for other purposes; to the Committee on Public Works and Transportation.

448. A letter from the Assistant Secretary of the Army (Civil Works), transmitting a report from the Army's Chief of Engineers on Little Lagoon at Gulf Shores, Ala., pursuant to a resolution adopted by the House Committee on Public Works and Transportation; to the Committee on Public Works and Transportation.

449. A letter from the Secretary of Energy, transmitting the sixth annual report on activities under the Electric and Hybrid Vehicle Research, Development, and Demonstration Act of 1976, pursuant to section 14 of the act; to the Committee on Science and Technology.

450. A letter from the Administrator, National Aeronautics and Space Administration, transmitting copy of proposed legislation to authorize appropriations to the National Aeronautics and Space Administration for research and development, construction of facilities, and research and program management, and for other purposes; to the Committee on Science and Technology.

451. A letter from the Comptroller General of the United States, transmitting a report on submarine construction at Electric Boat Division (MASAD-83-10, Feb. 28, 1983); jointly, to the Committees on Government Operations and Armed Services.

452. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the National Ocean Pollution Planning Act of 1978, as amended, to authorize appropriations to carry out the provisions of such act for fiscal years 1983, 1984, and 1985; jointly, to the Committees on Merchant Marine and Fisheries and Science and Technology.

453. A letter from the Secretary of the Commerce, transmitting a draft of proposed legislation to amend section 204 of the Marine Protection, Research and Sanctuaries Act of 1972, as amended, to authorize appropriations to carry out the provisions of title II of such act for fiscal years 1983, 1984, and 1985; jointly, to the Committees on Merchant Marine and Fisheries and Science and Technology.

454. A letter from the Deputy Secretary of the Treasury, transmitting a draft of pro-

posed legislation to remove the limitation on the amounts in the Department of the Treasury working capital fund; jointly, to the Committees on Ways and Means and Banking, Finance and Urban Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. PERKINS: Committee on Education and Labor. H.R. 999. A bill to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public or Indian lands, and for other purposes; with an amendment (Rept. No. 98-7, Pt. II). Referred to the Committee of the Whole House on the State of the Union.

Mr. FROST: Committee on Rules. House Resolution 109. Resolution providing for the consideration of H.R. 1310, a bill to provide assistance to improve elementary, secondary, and postsecondary education in mathematics and science; to provide a national policy for engineering, technical, and scientific personnel; to provide for cost sharing by the private sector in training such personnel; and for other purposes (Rept. No. 98-10). Referred to the House Calendar.

Mr. WHITTEN: Committee on Appropriations. H.R. 1718. A bill making appropriations to provide emergency expenditures to meet neglected urgent needs, to protect and add to the national wealth, resulting in not make-work but productive jobs for women and men and to help provide for the indigent and homeless for the fiscal year 1983, and for other purposes (Rept. No. 98-11). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BURTON of California:

H.R. 1717. A bill to amend the National Trails System Act by designating additional national scenic and historic trails, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. WHITTEN:

H.R. 1718. A bill making appropriations to provide emergency expenditures to meet neglected urgent needs, to protect and add to the national wealth, resulting in not make-work but productive jobs for women and men and to help provide for the indigent and homeless for the fiscal year 1983, and for other purposes.

By Mr. ANDREWS of North Carolina (for himself and Mr. PERKINS):

H.R. 1719. A bill to amend the Domestic Volunteer Service Act of 1973 to authorize appropriations for the fiscal years 1984, 1985, and 1986, and for other purposes; to the Committee on Education and Labor.

By Mr. KILDEE (for himself, Mr. BIAGGI, and Mr. WILLIAMS of Montana):

H.R. 1720. A bill to establish a program to provide funds for employment of unemployed individuals to repair and renovate educational facilities, and for other purposes; to the Committee on Education and Labor.

By Mr. BARNARD:

H.R. 1721. A bill to amend title 10, United States Code, to provide that periods of employment of retired members of the Armed Forces employed as administrators and instructors in Junior Reserve Officers' Training Corps programs shall be treated as active duty for purposes of recomputation of retired pay and to provide that certain amounts paid such members shall be treated as active duty allowances; to the Committee on Armed Services.

By Mr. BATEMAN:

H.R. 1722. A bill to authorize the Secretary of the Army, acting through the Chief of Engineers, to carry out certain erosion control projects in the Chesapeake Bay, Va.; to the Committee on Public Works and Transportation.

By Mr. BREAUX (for himself and Mr. FORSYTHE):

H.R. 1723. A bill to authorize appropriations through fiscal year 1986 for the Great Dismal Swamp, Minnesota Valley, Sailors' Snug Harbor, and San Francisco Bay National Wildlife Refuges; to the Committee on Merchant Marine and Fisheries.

By Mr. BREAUX (for himself, Mr. FORSYTHE, Mr. SUNIA, Mr. ROTH, Mr. MILLER of California, and Mr. WHITLEY):

H.R. 1724. A bill to provide additional revenues for projects relating to sport fish restoration and management, and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries and Ways and Means.

By Mr. CHENEY:

H.R. 1725. A bill to repeal the withholding of tax from interest and dividends; to the Committee on Ways and Means.

By Mr. CONTE:

H.R. 1726. A bill making an urgent supplemental appropriation for the Department of Labor; to the Committee on Appropriations.

By Mr. EDGAR:

H.R. 1727. A bill to provide for the establishment of a public works program for special environmental benefits and energy conservation and for other purposes; jointly, to the Committees on Agriculture, Interior and Insular Affairs, Merchant Marine and Fisheries, Energy and Commerce, Banking, Finance and Urban Affairs, and Public Works and Transportation.

By Mr. EVANS of Iowa:

H.R. 1728. A bill to establish a program of grants administered by the Environmental Protection Agency for the purpose of aiding State and local programs of pollution and abatement control; to the Committee on Education and Labor.

By Mr. GOODLING:

H.R. 1729. A bill to amend the Internal Revenue Code of 1954 to impose a temporary tax of $2 a barrel on imported petroleum products and to use the proceeds of such tax for purposes of reducing the public debt of the United States; to the Committee on Ways and Means.

By Mr. GRADISON (for himself, Mr. LUKEN, Mr. COUGHLIN, Mr. HYDE, Mr. LIVINGSTON, and Mr. SOLOMON):

H.R. 1730. A bill to amend the Internal Revenue Code of 1954 to provide a Federal income tax credit for tuition; to the Committee on Ways and Means.

By Mr. HERTEL of Michigan:

H.R. 1731. A bill to create the Reindustrialization Finance Corporation and to authorize such Corporation to issue obligations and provide loans and loan guarantees to qualifying business enterprises; to the Committee on Banking, Finance and Urban Affairs.

H.R. 1732. A bill to provide mandatory social security coverage for Members of Congress; to the Committee on Ways and Means.

By Mr. JEFFORDS:

H.R. 1733. A bill to amend title II of the Social Security Act to provide for timely notification of the Secretary of Health and Human Services by funeral homes or other appropriate persons of deceased individuals' deaths; to the Committee on Ways and Means.

By Mr. McDADE:

H.R. 1734. A bill to provide for the conservation, rehabilitation, and improvement of natural and cultural resources located on public or Indian lands, and for other purposes; jointly, to the Committees on Interior and Insular Affairs and Education and Labor.

By Mr. MITCHELL:

H.R. 1735. A bill to provide for the establishment of revitalization areas in distressed areas, to amend the Internal Revenue Code of 1954 to provide tax incentives for development in revitalization areas, and for other purposes; to the Committee on Ways and Means.

By Mr. NOWAK:

H.R. 1736. A bill to amend the Federal-State Extended Unemployment Compensation Act of 1970 to permit States to pay extended benefits on the basis of area triggers, and for other purposes; to the Committee on Ways and Means.

By Mr. O'BRIEN:

H.R. 1737. A bill to amend the Export Administration Act of 1979 to provide for congressional disapproval of export controls under that act for national security, foreign policy, or short supply reasons; to the Committee on Foreign Affairs.

By Mr. PEPPER:

H.R. 1738. A bill to establish a Homeowners Loan Corporation to provide assistance to homeowners whose mortgages are subject to foreclosure; to the Committee on Banking, Finance and Urban Affairs.

By Mr. PERKINS:

H.R. 1739. A bill to amend the Black Lung Benefits Act of 1969 to prohibit the reduction of disability benefits under the Social Security Act; to the Committee on Education and Labor.

By Mr. REGULA:

H.R. 1740. A bill to authorize the President to impose a tariff surcharge on the products of certain countries in order to offset the expense of providing U.S. defense assistance to such countries; to the Committee on Ways and Means.

By Mr. ROYBAL (for himself and Ms. MIKULSKI):

H.R. 1741. A bill to provide assistance and coordination in the provision of child-care services for children living in homes with working parents and for other purposes; to the Committee on Education and Labor.

By Mr. ST GERMAIN:

H.R. 1742. A bill to reduce interest rates, control inflation, insure the availability of credit for productive purposes, and promote economic recovery by extending the Credit Control Act; to the Committee on Banking, Finance and Urban Affairs.

By Mr. SIMON (for himself, Mrs. BOXER, Mr. LANTOS, and Mr. BURTON of California):

H.R. 1743. A bill to amend the National Labor Relations Act to authorize the Secretary of Labor to prohibit the awarding of

Federal contracts to persons who have violated certain judicial orders or orders issued by the National Labor Relations Board; to the Committee on Education and Labor.

By Mr. STARK:

H.R. 1744. A bill to amend the Tariff Act of 1930 to prevent the exportation or importation of certain vehicles; jointly, to the Committees on Ways and Means and Foreign Affairs.

By Mr. STUMP:

H.R. 1745. A bill to repeal the Metric Conversion Act of 1975 (89 Stat. 1007); to the Committee on Science and Technology.

By Mr. UDALL:

H.R. 1746. A bill to authorize appropriations for the Navajo and Hopi Indian Relocation Commission; to the Committee on Interior and Insular Affairs.

By Mr. WEAVER (for himself and Mr. AuCoin):

H.R. 1747. A bill to authorize the establishment of a scenic area to assure the protection, development, conservation, and enhancement of the scenic, natural, cultural, and other resource values of the Columbia River Gorge in the States of Oregon and Washington, to establish national policies to assist in the furtherance of this objective, and for other purposes; jointly, to the Committees on Agriculture and Interior and Insular Affairs.

By Mr. WILSON:

H.R. 1748. A bill to name the building to be constructed in Lufkin, Tex., and leased to the United States as the "Col. Homer Garrison, Jr., Federal Building"; to the Committee on Public Works and Transportation.

By Mr. BEDELL (for himself, Mr. Bereuter, Mr. Harkin, Mr. Smith of Iowa, Mr. Leach of Iowa, Mr. Tauke, Mr. Evans of Iowa, Mr. Coleman of Missouri, Mr. Boner of Tennessee, Mr. Edgar, Mr. Skelton, Mr. Vento, Mr. Forsythe, Mr. Daub, and Mr. Hughes):

H.R. 1749. A bill to require the Secretary of Agriculture, in consultation with the Secretary of the Interior, to study the effects of interbasin water transfers on agriculture and to prohibit any State from selling or otherwise transferring interstate waters located in such State for use outside such State unless all States in the drainage basin of such waters consent to such sale or transfer; jointly, to the Committees on Agriculture, Interior and Insular Affairs, and Public Works and Transportation.

By Mr. FLORIO:

H.J. Res. 162. Joint resolution to encourage the removal of foreign troops from Cyprus and the mediation of international disputes concerning the Aegean Sea; to the Committee on Foreign Affairs.

By Mr. ST GERMAIN (for himself, Mr. Gonzalez, and Mr. Wylie):

H.J. Res. 163. Joint resolution to designate the week beginning April 17, 1983, as "National Building Safety Week"; to the Committee on Post Office and Civil Service.

By Mr. STUMP (for himself, Mr. Rudd, Mr. Udall, Mr. McNulty, and Mr. McCain):

H. Con. Res. 71. Concurrent resolution to authorize and provide for a bust of Carl Hayden to be placed in the Capitol; to the Committee on House Administration.

By Mr. HANCE:

H. Res. 110. Resolution expressing the sense of the House of Representatives with respect to the maintenance of social security benefit levels; to the Committee on Ways and Means.

By Mr. HAWKINS:

H. Res. 111. Resolution providing for expenses of activities of House information systems in the 1st session of the 98th Congress; to the Committee on House Administration.

By Mr. LEACH of Iowa (for himself and Mr. Solarz):

H. Res. 112. Resolution expressing the sense of the House of Representatives concerning the future of the people of Taiwan; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

17. By the SPEAKER: Memorial of the Legislature of the Commonwealth of Virginia, relative to reactivating the U.S.S. *Missouri;* to the Committee on Armed Services.

18. Also, memorial of the Legislature of the Commonwealth of Virginia, relative to Americans missing in Southeast Asia; to the Committee on Foreign Affairs.

19. Also, memorial of the Legislature of the Territory of Guam, relative to the observance of Chamorro Week; to the Committee on Interior and Insular Affairs.

20. Also, memorial of the Legislature of the Territory of Guam, relative to the adoption of its own income tax incentives for investors and businessmen; to the Committee on Interior and Insular Affairs.

21. Also, memorial of the Legislature of the Commonwealth of Virginia, relative to the Surface Transportation Assistance Act of 1982; to the Committee on Public Works and Transportation.

22. Also, memorial of the Legislature of the Commonwealth of Virginia, relative to supplementary security income benefits; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. AKAKA introduced a bill (H.R. 1750) for the relief of Apolonio P. Tumamao and others; which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 85: Mr. Gekas and Mr. Crockett.

H.R. 287: Mr. Stangeland, Mr. Bliley, Mr. Marriott, Mr. McDonald, Mr. Hansen of Idaho, Mr. Wolf, Mr. Ireland, Mr. Martin of North Carolina, Mr. Roberts, Mr. Archer, Mr. Oxley, Mr. Broyhill, Mr. Hammerschmidt, Mr. Spence, Mr. Rudd, Mr. Badham, Mr. Stump, Mr. Hansen of Utah, and Mr. Bilirakis.

H.R. 471: Ms. Fiedler.

H.R. 500: Mr. Daniel, Mr. Mack, and Mr. Ray.

H.R. 679: Mr. Volkmer, Mr. Applegate, Mr. Hopkins, Mr. Skelton, Mr. Hyde, Mr. Skeen, and Mr. Walgren.

H.R. 704: Mr. Tauzin.

H.R. 776: Mr. Savage, Mr. Ratchford, Mr. Horton, Mr. Mitchell, Mr. Owens, Mr. Gilman, Mr. Fauntroy, Mr. Bevill, Mr. Mrazek, Mr. Stokes, Mr. Albosta, Mr. Gejdenson, Mr. Crockett, Mrs. Hall of Indiana, Mr. Davis, and Mr. Ottinger.

H.R. 777: Mr. Coyne, Mr. Sikorski, Mr. Wise, Mr. Harrison, Mr. Reid, Mr. Annunzio, Mr. Martinez, Mr. Burton of California, Mr. Stokes, Mr. Lantos, Mr. Sunia, and Mr. Owens.

H.R. 778: Mr. Sikorski, Mr. Addabbo, Mrs. Hall of Indiana, Mr. Corrado, Mr. Leland, Ms. Mikulski, Mr. Ford of Tennessee, Mr. Vandergriff, Mr. Gray, and Mr. Huckaby.

H.R. 885: Mr. Mrazek.

H.R. 912: Mr. Daniel, Mr. Jones of North Carolina, Mr. Leath of Texas, and Mr. Matsui.

H.R. 950: Mr. Nielson of Utah, Mr. English, Mr. Patman, Mr. Slattery, Mr. Gunderson, Mr. Albosta, Mr. Clinger, Mr. Stenholm, Mr. Davis, Mr. Thomas of California, Mr. Luken, Mr. Sawyer, Mr. Philip M. Crane, Mr. Mack, Mr. Edgar, Mr. Shaw, Mr. Fish, and Mr. McCandless.

H.R. 951: Mr. Garcia, Mr. Minish, Mr. McCandless, Mr. Hyde, Mr. Pritchard, Mr. Gilman, Mr. Stenholm, Ms. Oakar, Mr. Crockett, Mr. Gray, Mr. Goodling, Mr. Young of Missouri, Mr. Coughlin, Mr. Jeffords, Mr. Barnard, Mr. Luken, Mr. Fazio, Mr. Daniel B. Crane, and Mr. Robinson.

H.R. 965: Mr. Crockett, Mr. Duncan, Mr. Stokes, Mr. Solomon, Mr. Eckart, Mr. Garcia, Mr. Sunia, Mr. McCollum, Mr. Lagomarsino, Mr. Vandergriff, Mr. Gray, and Mr. Rudd.

H.R. 990: Mr. Hamilton.

H.R. 999: Mr. Harrison, Mr. Coyne, Mr. Hutto, Mr. Coelho, Mr. Wylie, Mr. Howard, Mr. Boner of Tennessee, Mr. Forsythe, Mr. Horton, Mr. Brown of California, Mr. Wortley, Mr. Harkin, Mr. Guarini, Mr. Chandler, Mr. Towns, Mrs. Schneider, Mr. Luken, Mr. Rose, and Mr. Torricelli.

H.R. 1046: Mrs. Hall of Indiana, Mr. Rogers, Mr. Bennett, Mr. Vander Jagt, Mr. Pritchard, Mr. Stokes, Mr. Ratchford, Mr. Murphy, and Mr. Corcoran.

H.R. 1050: Mr. Russo, Mr. Savage, Mr. Stark, Mr. Kostmayer, Mrs. Boxer, Mr. Burton of California, and Mr. Conable.

H.R. 1054: Mr. Dymally, Mr. Thomas of California, Mr. Dannemeyer, Mr. Chappie, Mr. Badham, Mr. Edwards of California, Mr. Fazio, Mr. Pritchard, Mr. Zschau, Mr. Lewis of California, Mr. McCandless, Mr. Lehman of California, Mr. Anderson, and Mr. Morrison of Washington.

H.R. 1055: Mr. Bates, Mr. Bennett, Mr. Bilirakis, Mr. Brown of California, Mr. Corrada, Mr. DeWine, Mr. Feighan, Mr. Fuqua, Mr. Hansen of Idaho, Mr. Ireland, Mr. Lehman of Florida, Mr. Lewis of Florida, Mr. MacKay, Mr. Mitchell, Mr. Mrazek, Mr. Nelson of Florida, Mr. Reid, Mr. Stokes, Mr. Sunia, Mr. Torricelli, Mr. Whitehurst, and Mr. Shelby.

H.R. 1155: Mr. Dymally, Mr. Oberstar, Mr. Frank, Mr. Fauntroy, Mr. Stokes, Mr. Leland, Mr. Ford of Tennessee, Mr. Ottinger, Mr. Frost, Mr. McCloskey, Mr. Dwyer of New Jersey, Mr. Savage, Mr. Edwards of California, Mr. Owens, Mr. Crockett, Mr. Mitchell, Mr. Roybal, and Mr. Rangel.

H.R. 1158: Mr. Mineta.

H.R. 1207: Mr. Sawyer, Mrs. Vucanovich, Mr. Gingrich, Mr. Hiler, Mr. Eckart, Mr. Davis, Mr. Chappie, Mr. McCain, Mrs. Smith of Nebraska, Mr. Skeen, Mr. Whittaker, and Mr. Forsythe.

H.R. 1249: Mr. Jeffords, Mr. Dicks, Mr. Morrison of Washington, Mr. Foglietta, and Mr. Feighan.

H.R. 1264: Mr. McNulty, Mr. Edgar, Mr. Bereuter, Mr. de Lugo, Mr. Mrazek, Mr. Berman, and Mr. Ford of Michigan.

H.R. 1269: Mr. FORSYTHE, Mr. MORRISON of Washington, Mr. SUNIA, Mr. OWENS, Mr. DAVIS, Mr. CLINGER, Mr. MCKERNAN, Mr. RATCHFORD, Mr. GEJDENSON, and Mr. BEREUTER.

H.R. 1272: Mr. FAZIO, Mr. GINGRICH, Mr. NICHOLS, Mr. OXLEY, Mr. SHUMWAY, and Mr. WASHINGTON.

H.R. 1286: Mr. CARR, Mr. KASTENMEIER, Mr. OTTINGER, Mr. FORD of Michigan, Mr. FAUNTROY, Mr. YATES, Mr. CONYERS, Mr. MINETA, Mr. VENTO, Mr. FRANK, Mrs. SCHROEDER, Mr. DELLUMS, Mr. SEIBERLING, Mr. SABO, Mr. MITCHELL, Mr. CROCKETT, Mr. LOWRY of Washington, Mr. MORRISON of Connecticut, Mr. WEISS, Mr. GARCIA, Mr. BURTON of California, Mr. RODINO, Mr. SCHUMER, Mr. LUNDINE, Mr. STUDDS, Mr. FEIGHAN, Mr. CLAY, and Mr. VANDERGRIFF.

H.R. 1296: Mr. BARNARD, Mr. HUNTER, Mr. ROBERT F. SMITH, and Mr. SPRATT.

H.R. 1329: Mr. WILSON.

H.R. 1355: Mr. MADIGAN.

H.R. 1419: Mr. MATSUI, Mr. DYSON, Mr. FORSYTHE, Mr. MCGRATH, Mr. TAUZIN, Mr. BEILENSON, Mr. MADIGAN, Mr. BEVILL, Mr. SAM B. HALL, JR., Mr. DWYER of New Jersey, Mr. HAMILTON, Mr. WILSON, Mr. PATMAN, Mr. JONES of North Carolina Mr. SMITH of Florida, Mr. LENT, Mr. DANIEL, Mr. ROE, Mr. VANDERGRIFF, Mr. WHITLEY, Mr. FORD of Michigan, and Mr. HUGHES.

H.R. 1436: Mr. DORGAN, Mr. DAUB, and Mr. GLICKMAN.

H.R. 1441: Mr. BONIOR of Michigan, Mr. BROYHILL, Mr. FORD of Michigan, Mr. FROST, Mr. HERTEL of Michigan, Mr. HUGHES, Ms. KAPTUR, Mr. SAWYER, Mr. TRAXLER, and Mr. O'BRIEN.

H.R. 1475: Mrs. HOLT.

H.R. 1617: Mr. BARNARD, Mr. BREAUX, Mr. CLINGER, Mr. DE LA GARZA, Mr. LONG of Louisiana, Mr. OXLEY, Mrs. ROUKEMA, and Mr. GLICKMAN.

H.R. 1659: Mr. CORCORAN, Mr. FRENZEL, and Mr. SHELBY.

H.R. 1682: Mr. AUCOIN, Mr. ROBERT F. SMITH, and Mr. CHANDLER.

H.R. 1691: Mr. BROWN of California.

H.R. 1694: Mr. GILMAN, Mr. SUNIA, and Mr. BOLAND.

H.J. Res. 22: Mr. PICKLE and Mr. HARRISON.

H.J. Res. 29: Mr. LUJAN.

H.J. Res. 62: Ms. KAPTUR, Mr. FISH, Mr. BURTON of California, Mr. CLAY, Mr. DE LUGO, Mr. VANDER JAGT, Mr. COELHO, Mr. HATCHER, Mr. PICKLE, Mr. MOODY, Mr. FORD of Tennessee, Mr. FOWLER, Mr. FRANK, Mr. JONES of Tennessee, Mr. ANNUNZIO, Mr. PORTER, Mr. ANTHONY, Mr. SKEEN, Mr. JACOBS, Mr. MINETA, Mr. SISISKY, Mr. BARNARD, Mr. WON PAT, Mr. PERKINS, Mr. PRITCHARD, Mr. RUSSO, Mr. DEWINE, Mr. RICHARDSON, Mr. ROBERTS, Mr. PRICE, Mr. HAMMERSCHMIDT, Mr. WEAVER, Mr. PURSELL, Mr. PETRI, Mrs. SCHNEIDER, Mr. BADHAM, Mr. LATTA, Mr. LOEFFLER, Mr. COATS, Mr. CROCKETT, Mr. STUMP, Mr. LEWIS of California, Mr. CONABLE, Mr. WASHINGTON, Mr. BARNES, Mr. CARR, Mr. BONIOR of Michigan, Mr. BROWN of California, Mr. CORCORAN, Mr. MARTINEZ, Mr. PATMAN, Mr. RITTER, Mr. ROWLAND, Mr. SMITH of Florida, Mr. SWIFT, Mr. HERTEL of Michigan, Mr. MCCAIN, Mr. STENHOLM, Mr. HORTON, Mr. CLINGER, Mr. FOGLIETTA, Mr. MOLINARI, Mr. HILER, Mr. HEFTEL of Hawaii, Mr. SKELTON, Mr. BILIRAKIS, Mr. DURBIN, Ms. FIEDLER, Mr. EDWARDS of Alabama, Mr. SHUMWAY, Mr. LIVINGSTON, Mr. SHAW, Mr. WILLIAMS of Ohio, Mr. PACKARD, Mr. BONER of Tennessee, Mr. SHANNON, Mr. OBERSTAR, Mr. STARK, Ms. OAKAR, Mr. CONTE, Mr. DASCHLE, Mr. YATRON, Mr. BERMAN, Mr. BREAUX, Mr. SABO, Mr. MCHUGH, Mr. FUQUA, Mr. FEIGHAN, Mr. BOEHLERT, Mr. ROBINSON, Mr. BOUCHER, Mr. GEPHARDT, Mr. LUKEN, Mr. FIELDS, Mr. DICKINSON, Mr. BROOKS, Mr. MARTIN of New York, Mr. LOWRY of Washington, Mr. CAMPBELL, Mr. ANDERSON, Mr. DYSON, Mr. MAVROULES, Mrs. HALL of Indiana, Mr. LEACH of Iowa, Mr. CARPER, Mr. CHAPPELL, Mr. CARNEY, Mr. RATCHFORD, Mr. DORGAN, Mr. SAM B. HALL, JR., Mr. MORRISON of Connecticut, Mrs. BYRON, Mr. BATES, Mr. NEAL, Mr. MARTIN of North Carolina, and Mr. DAVIS.

H.J. Res. 77: Mr. D'AMOURS, Mr. FASCELL, Mr. SUNIA, Mr. LAFALCE, Mr. WILSON, Mr. FRANK, and Mr. RUSSO.

H.J. Res. 93: Mr. SUNIA, Mr. SUNDQUIST, Mr. FAZIO, Mr. VENTO, Mr. VANDERGRIFF, Mr. SCHEUER, Mr. MCNULTY, Mr. MARTINEZ, Mr. HARRISON, Mr. HORTON, Mr. LEVINE of California, Mr. BERMAN, and Mrs. HALL of Indiana.

H.J. Res. 97: Mr. OXLEY, Mr. SHUMWAY, Mr. DYSON, Mr. SAWYER, and Mr. CORCORAN.

H.J. Res. 103: Mr. FROST, Mr. PATTERSON, Mr. SHELBY, Mr. SPENCE, and Mr. WILSON.

H.J. Res. 120: Mr. FOGLIETTA.

H.J. Res. 145: Mr. DWYER of New Jersey, Mr. VANDERGRIFF, Mr. BEVILL, Mr. ROE, Mr. DAUB, Mr. SMITH of Florida, Mr. STOKES, Mr. BROYHILL, Mr. HUGHES, and Mr. FAUNTROY.

H. Con. Res. 60: Mr. LEVIN of Michigan, Mr. AKAKA, Mr. FAZIO, Mrs. BOXER, Mr. LEHMAN of Florida, Mr. VANDERGRIFF, Mr. EDGAR, Mr. HOYER, and Mr. WYLIE.

H. Res. 41: Mr. DE LUGO.

H. Res. 52: Mr. DELLUMS, Mr. ALBOSTA, Mr. LAFALCE, Mr. DWYER of New Jersey, Mr. HOYER, Ms. OAKAR, Mr. SCHEUER, Mr. MRAZEK, Mr. JONES of Tennessee, and Mr. BONKER.

PETITIONS, ETC.

Under clause 1 of rule XXII,

36. The SPEAKER presented a petition of the City Council, Philadelphia, Pa., relative to the community development block grant and urban development action grant programs; which was referred to the Committee on Banking, Finance and Urban Affairs.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1310

By Mrs. ROUKEMA:

(To the Science and Technology Committee Amendment.)

—At each of the following locations, strike out "mathematics, science, and critical foreign languages" and insert in lieu thereof "mathematics and science": page 40, lines 8 and 9, 10, and 11, and 21 and 22; page 40, line 25 to page 41, line 1; page 49, lines 23 and 24; page 51, lines 21 and 22; page 52, lines 15 and 16, and 21 and 22; and page 53, lines 14 through 16.

Page 44, lines 13 and 14, strike out "mathematics, science, or a critical foreign language" and insert in lieu thereof "mathematics or science".

Page 45, lines 2 and 3, strike out "mathematics, science, or a critical foreign language" and insert in lieu thereof "mathematics or science".

Page 51, lines 9 and 10, strike out "MATHEMATICS, SCIENCE, AND CRITICAL FOREIGN LANGUAGE" and insert in lieu thereof "MATHEMATICS AND SCIENCE".

Page 51, lines 16 and 17, strike out "mathematics, science, and critical foreign language" and insert in lieu thereof "mathematics and science".

SENATE—*Tuesday, March 1, 1983*

(Legislative day of Wednesday, February 23, 1983)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by the Honorable PAUL LAXALT, a Senator from the State of Nevada.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

Almighty God of truth, righteousness and justice, as the Senate struggles for compromise, let not truth and righteousness and justice be sacrificed. In the words of one of the leaders of this body when he became President, "It is often easier to do right than it is to know what to do." Help the Senators to know what is right and give them the courage to do it. May they be infused with wisdom from above which transcends the best of human wisdom. Implant in their hearts the will for unity and peace and fearlessness, at whatever personal risk, to pursue that course. We pray this in the name of Him who was Incarnate Truth. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. THURMOND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 1, 1983.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable PAUL LAXALT, a Senator from the State of Nevada, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. LAXALT thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

DAFFODILS

Mr. BAKER. Mr. President, nature, in its own special way, forever demonstrates the striking difference between the real and the unreal. Its breadth, endless, and oftentimes, seemingly aimless, extends to all in a manner so unassuming as to fall victim to periodic inattentiveness.

But every once in awhile, a setting so striking and so inhumanly perfect, forces us to pause, then reflect, and then admit that nothing we could create could be so perfect. This morning, on the first day of March, and on a day soaked in tones of black and white and gray, a vertical vision no longer than several inches high, attracted my undivided attention. Off the parkway on which I travel to the Capitol, rested the first daffodil I have seen this year. It was mesmerizing, and my mind quickly jumped from Alice in Wonderland to Disney images of daffodils as trumpets. I remembered how Lady Bird Johnson had presented thousands of daffodils to our Nation's Capital, and how they have always been thought of as such a harbinger of spring.

The daffodil, whose flower genus is from the Narcissus family, could not be more perfectly well-rooted. It is so beautiful it should be able to reflect upon itself. If not for a busy morning schedule, I probably would have stopped to do a little reflecting myself with my camera.

In photography, many have said that the central questions historically have focused on how much of the camera's miraculous descriptive power is the photographer capable of handling? How much complexity can the photographer make simple, or conversely, how much diversity must the photographer sacrifice for the sake of order?

Whatever. The picture now rests inside my mind. A blot of yellow distinguished from everything around it, alone. It is amazing to witness such a sight at this time of the year, and it is equally amazing to realize what a bright flower can do for one's day.

Mr. President, in special tribute to this siting, I ask unanimous consent that "I Wandered Lonely as a Cloud," a poem by William Wordsworth be printed in the RECORD.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

"I WANDERED LONELY AS A CLOUD"

I wandered lonely as a cloud
That floats on high o'er vales and hills,
When all at once I saw a crowd,
A host, of golden daffodils;
Beside the lake, beneath the trees,
Fluttering and dancing in the breeze.
Continuous as the stars that shine
And twinkle in the milky way,
They stretched in never-ending line
Along the margin of a bay:
Ten thousand saw I at a glance,
Tossing their heads in sprightly dance.
The waves beside them danced; but they
Out-did the sparkling waves in glee:
A poet could not but be gay,
In such a jocund company:
I gazed—and gazed—but little thought
What wealth the show to me had brought:
For oft, when on my couch I lie
In vacant or in pensive mood,
They flash upon that inward eye
Which is the bliss of solitude;
And then my heart with pleasure fills,
And dances with the daffodils.

—WILLIAM WORDSWORTH [1770-1850]

RECESS UNTIL 9:20 A.M.

Mr. BAKER. Mr. President, for a variety of reasons, including difficulties with traffic this morning, a number of Senators directly involved with the early opening proceedings of the Senate have not been able to reach the floor.

I ask unanimous consent that the Senate now stand in recess until the hour of 9:20 a.m.

There being no objection, the Senate, at 9:02 a.m., recessed until 9:20 a.m., whereupon the Senate reassembled when called to order by the Presiding Officer (Mr. GORTON).

RECOGNITION OF SENATOR CHAFEE

The PRESIDING OFFICER. Under the previous order, the Senator from Rhode Island (Mr. CHAFEE) is recognized for not to exceed 15 minutes.

FILIBUSTER ABUSES

Mr. CHAFEE. Mr. President, today at 4 p.m., the Senate shall vote on a cloture motion to halt a filibuster on S. 47, a shipping bill that was reported from the Commerce Committee by a vote of 16 to 0—that committee being composed of Republicans and Democrats, liberals, and conservatives, westerners, easterners, southerners, and northerners.

Although the importance of a bill is in the eye of the beholder, no objective evaluator would classify S. 47 as being of great stature. Whether it passes or does not pass is not going to affect our Republic in a major way.

Nonetheless, this bill is being filibustered by a few Senators, or less, and indeed the motion to proceed to consideration of the bill was filibustered.

In order to proceed with the business of the Senate, the leadership has correctly concluded that it will be necessary to invoke cloture.

From 1927 to 1962, cloture was not once invoked in the Senate. Yet, during those years, legislation of major significance that altered the course of America was enacted. The entire New Deal, World War II, and the Fair Deal all took place during those years without once it being required to stop debate in order to get on with the work of the Senate.

Now, however, some Senators are prepared to use the filibuster against any bill, important or unimportant, that does not suit their fancy.

In fact, filibusters are often announced before the legislation has even been submitted to the Congress, as occurred this weekend when the President announced plans for the deregulation of natural gas and a Senator immediately announced he would filibuster the same.

The defense of those who so fervently and frequently use the filibuster is that to do so is not against the rules of the Senate, and indeed they are correct. Excessive use of the filibuster is not abusing the rules, but it is abusing the Senate as an institution.

This body is required to accomplish its business in as thoughtful and deliberate a manner as possible. No legislation should be passed with undue haste. The filibuster, or extended debate, has a very valuable role in the Senate. It can call the Nation's attention to legislation that significantly departs from the Nation's past course of history or that possibly tramples on the rights of one group or another. To abuse this safety valve is to endanger its continued existence, and that is what has been taking place all too frequently in the last several years.

Mr. President, the time has come to call a halt to this abuse of this institution, for the sake of commonsense and for the good of the Nation. We simply cannot afford the luxury of wasted time on routine bills; there is too much pressing business, too many unsolved problems before us, to allow the practice of a filibuster on every other bill or amendment to continue unchecked.

The right to extended debate is, among the world's major legislative bodies, virtually unknown; within national parliamentary assemblies, so far as I know, it is unique to the U.S. Senate. I happen to believe that the filibuster, with the protection it affords to minorities, is one of the strengths of the Senate.

Another of our strengths is that we have historically operated in this Chamber by consensus—by a shared understanding among the membership of this body about the norms of behavior that are permitted. Some of this behavior is codified. Rule XIX, for example, prevents a Senator from referring offensively to any State of the Union, or from directly or indirectly imputing to another Senator conduct or motives unbecoming a Member of the Senate. But more often, the consensus is determined cooperatively by tradition or custom. One of these customs, adhered to for most of our history, has been that the filibuster is resorted to only upon rare occasion and for major cause.

Individual Senators who continuously and frivolously use parliamentary delaying tactics not for the benefit of a sizable or sectional minority on issues of national importance, stand to win but a pyrrhic victory. By abusing the rights afforded the minority today, they invite the majority of the Senate to enact new rules to institutionalize ways to further reduce the rights of future minorities. That, in my judgment, would be tragic, Mr. President.

So I hope, Mr. President, that in the future the filibuster would be used but sparingly and only involving those issues that indeed are of considerable significance.

But who is to judge what issue is of considerable significance? Obviously, as I say, that lies in the eyes of the beholder. But I think it can be recognized by objective evaluators what is of major significance, what is of national importance, what represents a departure from the past, and on those bills, certainly, careful, thorough consideration is required, extended debate, if necessary, and, indeed, a filibuster.

But the abuse of the filibuster invites retaliatory tactics that I think would be unfortunate.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. CHAFEE). Without objection, it is so ordered.

KLAUS BARBIE—A GRAVE REMINDER OF GENOCIDE

Mr. PROXMIRE. Mr. President, on February 5, 1983, Klaus Barbie, a fugitive Nazi war criminal, was returned to France. This past week, formal charges were brought against him. Barbie is known as the "Butcher of Lyons," a title he acquired when he was head of the Gestapo there from 1942 to 1944.

Klaus Barbie is held responsible for the death of more than 4,000 Jews and resistance fighters and the deportation of about 7,500 others. Many of the Jewish deportees died at Auschwitz and other concentration camps.

Barbie has already twice been condemned to death in abstentia, first in 1952 and again in 1954, but the time for implementing the sentences expired in the early 1970's.

This time he will be present at his trial, in which he is formally charged with crimes against humanity, murders, tortures, false arrests, illegal detention, and arbitrary seizures. In short, Klaus Barbie is charged with taking an active part in genocide.

He is now being held at Montluc prison in Lyons, which served as Gestapo headquarters during the war and through which many of his victims passed. Klaus Barbie is well remembered by those who survived in the city he is charged with terrorizing 40 years ago. He is remembered with fear and anger. The president of the region's Jewish Federation has said:

> Every Jewish family in Lyons has a loved one, a father or a grandfather who was a victim of Barbie. No one among them has forgotten.

Yet the people of France, as well as West Germany, Israel, and other nations, have stressed that Barbie's coming trial—

> should not be seen as vengeance, but as a lesson for younger generations that did not live through the war and as a warning that such tragedies should not be allowed to happen again.

Mr. President, I strongly believe that the United States has an important role to play in teaching that lesson and delivering that warning.

The upcoming trial of Klaus Barbie serves as yet another reminder that the United States must ratify the Genocide Convention. The United States must once and for all condemn this most cruel, most heinous crime—the calculated destruction of an entire national, ethnic, racial, or religious group.

Without ratification of the Genocide Convention, such crimes in the future may go unpunished.

Through ratification, the United States sends a clear message to the world that this Nation understands the lesson that Barbie's trial will tell of the past and will heed its warning for the future.

VERIFICATION OF A NUCLEAR FREEZE: IS IT POSSIBLE?

Mr. PROXMIRE. Mr. President, verification is a key issue in the nuclear freeze debate. Many would hesitate to enter into an arms freeze agreement with the Soviets because they fear we

do not have adequate means of verifying Soviet adherence to the treaty. The Federation of American Scientists has responded to this problem by preparing a model freeze, under which we would attain satisfactory verification of the treaty provisions.

The FAS model freeze has seven major conditions. First, there would be a freeze on the deployment of ICBM's, SLBM's, and IRBM's. Secretary of Defense Harold Brown testified before a Senate committee in 1979 on our capability to monitor these weapons. He said:

> We have high confidence in our ability to monitor the number of fixed ICBM launchers, SLBM launchers, and heavy bombers.

He also declared that freezing the number of IRBM's is more difficult, but still a manageable task. To facilitate enforcement of this provision, the FAS recommends that a ban be placed on modernization of these weapons.

Second, the FAS model freeze would place a numerical limit on dual-capable launch platforms and delivery vehicles. This would serve the purpose of preventing the superpowers from trying to outdo the other in the number of theater and tactical weapons, which would seriously destabilize the already fragile nuclear balance. This could be verified by a freeze on warhead production. Because it is easier to verify a freeze placed on ALCM's and GLCM's than one on SLCM's—sea-launched cruise missiles—the FAS suggests that deployment of SLCM's "could be restricted to those ships and submarines which were commonly identified as having a nuclear role at the time the freeze is negotiated."

Third, the FAS advocates a ban on the testing of new missiles and modifications of existing missiles. Because extensive testing is required for modernization, we could be sure that we would detect Soviet missile testing with our vast array of surveillance systems, which include imaging satellites, intelligence, radar, ground-based listening posts, and high-flying aircraft.

Fourth, the FAS concurs with many policymakers in endorsing a comprehensive test ban. How could this be verified? The Soviet Union, the United Kingdon, and the United States have already agreed that a CTB is feasible, and have gone so far as to approve placing seismic monitors on each other's territory. If this plan was carried out, this data would supplement other information already available in the worldwide surveillance system, and would make a comprehensive test ban verifiable.

Fifth, the FAS model would require a freeze on the production of ballistic missiles. This would be accomplished by shutting down existing facilities for intercontinental, submarine-launched, and intermediate range ballistic missiles, and monitoring ambiguous activity at other facilities. According to the FAS, this provision could be verified with moderate to high confidence.

Sixth, the FAS recommends a ban on nuclear warhead and weapons-grade materials production. This would be verified in much the same way as the ban on ballistic missiles.

The seventh and final provision of the FAS model freeze would buttress all the above guidelines. This is an international installation and inspection of safeguards at all nuclear facilities in both countries as well as the conversion or disposal of existing stockpiles. Onsite inspections, while not essential for adequate verification, would certainly give each side confidence that the other fully intends to honor the treaty.

Mr. President, there is no such thing as looking back and saying "we should have done this to correct the situation" after a nuclear holocaust. This age of nuclear arms requires political foresight, which sometimes seems to be sorely lacking in our country. Let us wake up now and face the fact that nuclear arms threaten our existence daily. And let us do something from preventing the possibility of nuclear holocaust from becoming a reality.

The FAS has drawn up a model freeze on nuclear weapons, which could be verified with a high degree of confidence. Let us examine this model, and see how it might be modified or improved. Let us also recognize that it is in everyone's interest—ours, the Soviet Union's, mankind's—to take steps toward negotiating a nuclear freeze. Survival is at stake.

A SCANDAL IS COMING IN HOW WE FINANCE OUR ELECTION CAMPAIGNS

Mr. DIXON. Mr. President, there is a matter of great and growing national concern to which I would like to call the attention of my colleagues. The problem is our congressional election campaigns and how we finance them.

Members of the press and citizens in our respective States are telling us they do not like what they see in the massive expenditures being spent in our elections. Money is becoming all too prominent an item in our campaigns.

Mark Shields, in a perceptive column February 25 in the Washington Post, points out in clear fashion that our campaign finance laws are structured in a fashion inviting an election scandal.

I do not know, Mr. President, when or where the scandal will surface, but as Mark Shields warns in his commentary, the scandal is sure to come.

Because of my concern over this perceived eventuality, I introducted a bill last session calling for the public financing of Senate elections. Senator DODD and I are cosponsoring a similar bill this session.

We feel the time to act is now, before a scandal occurs. The present climate will allow us to act responsibly and rationally, rather than to enact bad legislation in haste in the wake of a scandal.

Our bill, S. 85, utilizes public matching funds to set campaign expenditure limits in each State, to put a cap on the amount of a candidate's personal fortune spent in an election contest, and to provide a neutral source of funds through small individual contributions of $100 or less.

Moreover, S. 85 is a doable proposal. It is simple, yet effective in solving the problem at hand. It does not unduly curtail the activities of any of the participants currently involved in the election process.

I urge my distinguished colleagues to take some of their valuable time to review this problem. I earnestly request that each of you review S. 85 as a possible solution. Senator DODD and I would welcome you as a cosponsor.

At this point, Mr. President, I ask unanimous consent that the timely commentary by Mark Shields be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Feb. 25, 1983]

THE COMING CAMPAIGN SCANDAL

(By Mark Shields)

An unconditional prediction: a new federal campaign finance law—one that imposes severe limits on all political action committees and provides for some form of public financing of congressional elections—will be enacted within the next 24 months. While a majority in Congress and the president now almost surely oppose any such law, their resistance will be overwhelmed by future public events. A major political money scandal will be uncovered that will guarantee passage of the laws.

All congresses respond to crisis. The criminal excesses of Watergate, particularly in the illegal raising and spending of campaign funds, probably made full disclosure and public funding of presidential campaigns inevitable. We and Congress will learn, sooner rather than later, of another (probably more than one) major political money scandal. Once again, promising careers will be ruined, prison sentences will be handed out and Congress will pass and the president will sign a tough new campaign finance law.

Able and committed politicians in both parties see the problem clearly. Bob Teeter, the Republican pollster whose 1976 strategy brought President Ford from a deficit of 16 million votes to within an eyelash of victory in 11 weeks, is worried by the rivers of campaign money now drowning American politics: "It's just like 1972," he says. "There's too much money around not to have a scandal." Missouri Democratic Sen. Tom Eagleton, who has been winning statewide races since 1960, argues that contemporary political fund-raising is "a national scandal" that "is taking place every day." New York Rep. Barber Conable, the ranking Republican on the House Ways and Means Committee, sees

the ever-growing public perception of scandal in present fund-raising practices as producing more pressure for public financing of elections. Conable, who refuses campaign contributions of more than $50, compares the existing system of candidates' dunning all who represent interests before the House for contributions to his days in private law practice, when judges running for reelection raised their campaign budgets by "putting the arm on all of us lawyers who appeared before their court."

Public financing will not be entirely unwelcome. Most candidates would, if given the alternative, choose root canal work over asking anyone for money. Most of the current resistance to public financing comes from the Republicans, many of whom, after telling us there is no connection between contributions and a congressman's vote, then remind us that "there is no free lunch," that every program has a price tag. Apparently altruism only applies to contributions by political action committees. But it will probably make little difference what anyone argues, because a major scandal will end the debate and move the previous question.

DEFENSE SPENDING DISPARITIES

Mr. DIXON. Mr. President, I take this opportunity to direct the Senate's attention to an editorial that appeared in the Peoria Journal-Star on January 26, 1983. It discusses a problem, very succinctly I believe, which I have sought to address since I came to this body; namely, the geographical disparities in the allocation of national defense spending.

As many of you know, I find this kind of regional bias in the Federal budget, especially in defense spending, particularly serious and I think this article is a good indication that my sentiments are shared by many of my constituents.

I ask the editorial be placed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Peoria Journal-Star, Jan. 26, 1983]

ILLINOIS SHORT-CHANGED

An Army hospital will be located in Peoria, it has now been confirmed. That's the first good news we've heard in a while. Called a Mobile Army Surgical Hospital, it will provide 226 part-time jobs and a payroll amounting to $900,000 a year. It's a start, even though a small one, on defense work for this area. Peoria and Illinois are not getting a fair share of defense dollars. We should also be getting defense manufacturing contracts.

In fact, it has been getting worse and worse. And that's too bad, for this state was once known as the arsenal of America. We have the workers who can do the job and the factory capability to handle large orders. Yet the heavy defense work goes to other politically-favored states.

The latest report on this deficit comes from Sen. Alan J. Dixon, D-Ill., who points to a new report on military spending. It reveals that Illinois is a lap or two behind in the race for federal money to manufacture arms and other defense material.

"Things have gone from bad to worse," Dixon said. He correctly points out that, we in Illinois are paying heavily for the huge defense projects now in the works, but we're getting none of the action. That's not right, when our state has such high unemployment and such vast capabilities for defense production.

The Northeast-Midwest Coalition on where the money for the defense buildup is going spells it out. It concludes that the Illinois share of defense spending increases in the two years ending Oct. 1 will be $99 per capita, less than half the national average of $212. A top industrial state getting half what the average state gets in defense work!

Our state received $2.1 billion in total defense money in 1981. It is estimated that in 1983 we will receive $3.2 billion in defense contracts, a slight improvement but not nearly what a state this high in unemployed workers, and this industrialized, should have.

And can you imagine this? Illinois received $430.5 million less in military prime contracts in 1981 than we were awarded in 1951, a 27.2 percent decrease over 30 years. Even with inflated dollars, we are receiving much less of the work that we did more that a quarter century ago.

And, as Dixon says, it goes from bad to worse. The military construction budget in Illinois this year is predicted to drop $13 billion from the 1981 level, an amount equal to half its share of the 1981 total.

Getting the Army hospital is a step in the right direction, but it is peanuts. We need, and deserve, a lot more.

SOUTH DAKOTA POETRY

Mr. PRESSLER. Mr. President, I would like to take this opportunity to share with my colleagues two poems which were composed by South Dakotans. These poems serve as illustrations of the great talent which exists in my home State.

Citizens of South Dakota are making excellent strides in the arts, and the National Endowment for the Arts has played a part in that progress. Recent communications from my constituents have indicated how important funds from both the National Endowment for the Arts and the National Endowment for the Humanities are to my State. Cuts which are made in these endowments disproportionately hurt our rural citizens.

Congress must work to assure adequate funding for these programs so that our young people have the best possible opportunities to experience the arts and humanities. As a member of the Concerned Senators for the Arts, I take great pride in sharing with you the following poems and ask that they be printed in the RECORD. The first selection, "Harvest," is from the book, "The Middle of the World" by Kathleen Norris of Lemmon, S. Dak. The second, "For a Diamond to Score as Lyrics," was included in "Dark Moon" which was written by Jack Kreitzer of Deadwood, S. Dak.

There being no objection, the poems were ordered to be printed in the RECORD, as follows:

HARVEST

We'll never belong.
The Pheasant steps out of a medieval tapestry
Into South Dakota,
This gravel road
Is a thread the Fates cast down.
In 1897, my great-grandmother was buried
For $12.50.

I have the receipt,
And some dress pieces, the strands of her hair
My grandfather kept hidden
For over eighty years.
He died then,
And I cut the sleeves of his long johns
To make a cover for my rolling pin.

His old truck
Wheezes once, and sputters forward.
The combine
Spits out dust.
What will anyone
Make of us? Two,
Childless,
Figures in a field?

—*Kathleen Norris.*

FOR A DIAMOND TO SCORE AS LYRICS

It gets harder to tell
what it takes to make a lantern:
the halfmoon rises trailing
its unclear black well
forget its craters, but not the smooth seas
no way to detect a pattern
it wouldn't matter, there's no failing,
there's even illumination
when you make your distant skies,
it gets harder to love
the heart forced to freeze,
and it's just as well, whatever it believes
the dark moon is empty saturation
goes swallowed unlost into the white frost
of the spreading bright dry oceans undoved,
the airless peaks, calm hollows, crater eyes,
the sun is not trembling,
the moon blinks but sees.

Handed cups of pink feverdew
they gave their eyeballs to the fire,
talked by someone into humility at last
bound by a rivermother to death's waterfall.

They left never knowing what flew
or what what floundered in the whale's throat
nor what filled her swallowing pregulp
nor whose blue dyed her side
nor the sea in any degree
only that they had unfurled sailedwings
round shivering moonlets once
and now in the feather-stretch for final flight
released their showers of godling-sparks.

They were like being caught
at the moment of the peek,
and not wishing you could have your eye back.

—*Jack Kreitzer.*

VOTE SEQUENCE TODAY

Mr. BAKER. Mr. President, once again, for a variety of reasons including the fact that for some, for some reason this morning, traffic is very, very slow and people are having trouble getting in, it looks as if we might be better served to wait a little while before we proceed with the first order of business which I believe is the Stevens amendment. I know the Senator from Ohio is prepared to proceed.

Indeed, he is anxious to proceed, and he has made this known to me this morning. Once again, I extend to him my appreciation for his cooperation in this respect, but I would like to accommodate absent Senators, absent by no fault of their own.

I ask unanimous consent, Mr. President, that there now be a period for the transaction of routine morning business to extend not past 10 a.m. in which Senators may speak for not more than 3 minutes each. I further ask unanimous consent that the time for the other sequenced votes as they may be prescribed by time be changed and advanced by 15 minutes with the exception of the 4 p.m. vote on cloture.

The PRESIDING OFFICER. Is there objections?

Mr. METZENBAUM. Reserving the right to object, and I do not intend to object, is it the clear understanding that in the event we do not have an adequate amount of time for votes in connection with those amendments that have heretofore been scheduled prior to 4 p.m., there will be votes in connection with each of those amendments if requested by a Member of the Senate?

Mr. BAKER. Mr. President, the Senator's question is well taken, and I am prepared as soon as I can speak with the minority leader to now put a further unanimous-consent request that any votes that are stacked and have not yet been executed at 4 p.m. will be executed and the time for the cloture vote will be advanced from 4 p.m. a sufficient amount of time to accomplish that.

Mr. METZENBAUM addressed the Chair.

Mr. BAKER. I do not now put that request.

Mr. METZENBAUM. I understand.

Mr. BAKER. Because I have not cleared it, but I am prepared to put that request.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. I rise only to make it clear that the Senator from Ohio has not actually been delaying debate or moving forward with this bill. I have not been able to move forward with my own amendment pending the disposition of the Stevens amendment. Indeed, I tried all yesterday to bring the Stevens amendment to a vote. I understand that the author of the amendment and those on the other side of the aisle, perhaps some on this side, were not prepared to vote, but I have actually been attempting to move this matter forward. And to those who are suggesting that there be some delay by reason of the numerous amendments that have been offered, let me point out that the shoe is on the other foot in this particular instance, that the delay has not been caused by this Senator in spite of my anxiety and anxiousness to move forward. I have no objection to the unanimous-consent request.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair.

Mr. President, there is morning business to be transacted, I am aware, and I do not see the Senator on the floor who spoke to me, but I am sure he is within earshot and will soon be here. Therefore, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR MIDDAY RECESS VITIATED

Mr. BAKER. Mr. President, there are two requests I should like to put at this time which I believe will insure an orderly procedure during the day as we move on to the consideration of the shipping bill.

First, I ask unanimous consent that the previous order providing for a recess from 12 noon to 2 p.m. be vitiated.

I further ask unanimous consent that, notwithstanding that the Senate will be in session during those 2 hours, no rollcall vote occur during that period and that any votes which are ordered during that period will occur in their proper sequence within the framework of the order already entered.

Mr. BYRD. Mr. President, reserving the right to object, I think that is a reasonable request under the circumstances. Several amendments had been specified on yesterday to be called up, and I am reluctant to cancel the 2-hour recess, and I know the majority leader is reluctant to do so. But in order to give those Senators who have amendments an opportunity to call them up and have a vote on the amendments, the majority leader's request is fair and reasonable. So I have no objection.

Mr. METZENBAUM. Mr. President, reserving the right to object—and I do not intend to object—it is my understanding that yesterday we had agreed to the same thing, that the order for the 2-hour recess would be vitiated and that amendments could be called up during that period, but there would be no votes during that period.

Mr. BAKER. We were sort of on again and off again with that, and we ended up off rather than on.

Mr. METZENBAUM. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

MODIFICATION OF VOTE SEQUENCE

Mr. BAKER. Mr. President, I have a second request.

Under the frame of the order, it is possible, it is conceivable, although highly unlikely, in my opinion, that there might be rollcall votes ordered which have not yet been executed when we arrive at the hour of 4 p.m., the time for the cloture vote.

First, I wish to put a parliamentary inquiry to the Chair.

The PRESIDING OFFICER. The Senator will state it.

Mr. BAKER. Mr. President, if the hour of 4 p.m. arrives and there are unexecuted but ordered rollcall votes, would those votes be forfeited and we would proceed then to the rollcall on cloture?

The PRESIDING OFFICER. They would not be forfeited but the first vote would be on cloture at 4 p.m.

Mr. BAKER. Yes, and the others then would occur after cloture was invoked if cloture were invoked; am I not correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. I thank the Chair.

Mr. METZENBAUM. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. METZENBAUM. Mr. President, then the question of germaneness would become relevant. Am I not correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BYRD. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. BYRD. Mr. President, as to those amendments that were specified in the agreement, notwithstanding their germaneness or nongermaneness, I ask the Chair, would they still occur after cloture in the event they are not germane?

The PRESIDING OFFICER. If they are not germane the amendments would fall.

Mr. BAKER. Notwithstanding there was a unanimous-consent agreement limiting time specifying the sequence in which they would be voted on and designating those amendments by substance; is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. That would be an unintended fact.

Mr. BYRD. Yes.

Mr. BAKER. Mr. President, let me propound this unanimous-consent request.

I ask unanimous consent that any rollcall votes that are ordered but not yet executed when the hour of 4 p.m. arrives be postponed until after the cloture vote is taken; and I further ask unanimous consent that, if cloture is

invoked notwithstanding the provisions of rule XXII, those amendments on which rollcall votes were ordered but not yet executed would still qualify under the rule.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. BYRD. Mr. President, reserving the right to object, am I to understand that the majority leader is confining his request to those amendments that have been specified?

Mr. BAKER. Mr. President, I wish to do that, and I should have done that.

As to those that are specified, and these would not include the 20 minutes for unspecified amendments, this would be only those which are identified and specified.

Mr. METZENBAUM. Mr. President, reserving the right to object, and I do not intend to object, I have one point. It is my understanding that the majority leader had considered scheduling a vote seriatim on all of those amendments that have been scheduled prior to the cloture vote. Now, there are pluses and minuses doing it both ways, but I am wondering whether the majority leader really wishes to have the votes after cloture or whether the majority leader would be willing to have these votes before cloture and then avoid any question whatsoever after cloture.

Mr. BAKER. Mr. President, the Senator is correct. I had originally proposed that unexecuted votes occur in sequence, and we would postpone by an appropriate amount the time for the 4 p.m. vote on cloture. I thought I had received word that that was not acceptable to the Senator from Ohio.

Mr. METZENBAUM. No. That is perfectly acceptable.

Mr. BAKER. That is the better way?

Mr. METZENBAUM. I think it is a better procedure, to be frank with the majority leader.

Mr. BAKER. I prefer that, Mr. President. That was my opening bid.

Let me withdraw the unanimous-consent request then and put this request.

Mr. President, I ask unanimous consent that when the hour of 4 p.m. arrives if there are rollcall votes which have been ordered but not executed the time for the cloture vote be extended by an appropriate amount to accommodate those unexecuted rollcall votes but that no point of order shall be debatable and the votes will occur without any further intervening debate, motion, or point of order.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Tennessee?

Mr. BYRD. Mr. President, I reserve the right to object.

I am distracted from what the majority leader is really asking by conversations that are going on.

The PRESIDING OFFICER (Mr. PRESSLER). The Senate will be in order.

Persons carrying on conversations will move into the cloakrooms. The Senator speaking cannot hear.

That applies to all staff in the rear. Conversations will go into the cloakrooms.

Mr. BYRD. Mr. President, I wonder if the majority leader will put in a quorum call so we can talk about it?

Mr. BAKER. Yes.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I would like to put a parliamentary inquiry with respect to the application of the order already entered. A Senator has asked me whether or not for whatever reason he or she did not gain recognition in time to call up their specified amendment under the order prior to the hour of 4 p.m., they could still be recognized at that time to call up the amendment even though no debate would be available if the time for the vote on cloture was extended for a sufficient time to accommodate the votes on those unexecuted orders?

Let me put it a different way because I see a look of query in the eyes of the Parliamentarian.

Mr. President, the situation is this: For whatever reason, if a Senator does not get to call up his amendment as specified, and we do enter into an agreement to slip the 4 p.m. vote on cloture until we have executed all the votes that are ordered, can that Senator still be recognized to offer his amendment notwithstanding that no debate would be in order?

The PRESIDING OFFICER. No. All that would be in order would be votes that have already been ordered.

Mr. BAKER. But the order provides for the sequence in which Senators will be recognized, and provides for time limitations and provides that no second degree amendments would be in order, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. So as a practical matter if he is on the list he is going to obtain recognition, is that correct?

The PRESIDING OFFICER. That may not be correct. If time runs out he would not be recognized.

Mr. METZENBAUM. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator from Ohio will state his parliamentary inquiry.

Mr. METZENBAUM. Would it not be possible to provide in the unanimous-consent request that under any and all circumstances any specified amendment can be called up prior to the cloture vote and in connection with the order?

The PRESIDING OFFICER. Yes.

Mr. BAKER. Mr. President, in view of the answer given by the Chair to the Senator from Ohio and his indication to me that that is satisfactory for his purpose, that is certainly agreeable to me. Let me put another unanimous-consent request then, and I withdraw the previous one.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that when the hour of 4 p.m. arrives if votes have been ordered on any of the specified amendments but not yet executed or if any of the specified amendments have not been called up for action by the Senate, that in the latter case the Senator sponsoring the specific may be recognized for the purpose of offering that amendment, and disposing of it without debate, and in the former case, that is to say if a rollcall vote has been ordered on a specified amendment but not yet executed, that that rollcall vote will occur in sequence, and that the time for the cloture vote will be advanced a sufficient time to accommodate those requirements.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. I do not think the Senator quite finished. I think, if the majority leader will yield, and if I may suggest, I think the Senator took care of a problem with regard to the specific amendments with respect to which rollcall votes have been ordered. I think the Senator addressed himself to the question that any Member could call up a specified amendment if it had not yet been called up. But I do not think the Senator provided specifically that the Member could secure a vote in connection with that amendment prior to the cloture vote.

Mr. BAKER. I believe I did. Would the Chair please advise me on that?

The PRESIDING OFFICER. That was provided for.

Mr. METZENBAUM. It is provided for?

The PRESIDING OFFICER. It is provided for.

Mr. METZENBAUM. So that, as I understand it, any amendment that is specified, if the Member who has sponsored it and wishes to call it up and secure a vote, his rights will be protected, and there will be a vote in connection with that amendment prior to cloture, assuming he gets the necessary seconds?

The PRESIDING OFFICER. Will the Senator repeat that?

That is correct.

Mr. METZENBAUM. I thank the Chair.

Mr. BYRD. Mr. President, has the majority leader finished?

Mr. BAKER. I have finished.

Mr. BYRD. I see a problem with that request, my problem being that if a Senator has an amendment which was specified on yesterday, and that amendment is not called up, as I understand the majority leader's request it could still be called up after cloture regardless of whether or not it is germane, but there would be no debate on it.

Mr. BAKER. If I may say, that was not what I meant to say, and I do not believe that is what I did say. I thought all that the request provides is that on specified amendments they could be called up if they had not yet been called up by the sponsor and disposed of and rollcall votes could be executed, if previously ordered and not executed, when the hour of 4 p.m. arrives. But at that time the cloture vote will be extended from 4 p.m. a sufficient time to accommodate the two elements that I just described, and after the cloture vote there is no provision for what happens.

On the cloture vote, if cloture is invoked, for example, the provisions of rule XXII will apply, including limitations on debate, as they are described in that rule, and the germaneness as required by that rule. That is what I meant to say, Mr. President, and I hope that is what I said.

Mr. BYRD. I would like to ask the majority leader this question: Suppose for some unforeseen reason Senators do not have an opportunity to call up their specified amendments prior to cloture?

Mr. BAKER. Prior to 4 p.m.?

Mr. BYRD. Prior to 4 p.m.

Mr. BAKER. They would be recognized for that purpose before the cloture vote could occur under this formulation.

Mr. BYRD. Without debate?

Mr. BAKER. Yes, but without debate.

The PRESIDING OFFICER. Is there objection?

Mr. BYRD. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the Chair. I thank the minority leader and I thank the Senator from Ohio.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, morning business is closed.

SHIPPING ACT OF 1983

The Senate resumed consideration of the bill (S. 47).

AMENDMENT NO. 468 TO AMENDMENT NO. 467

Mr. METZENBAUM. Mr. President, what is the pending business?

The PRESIDING OFFICER. The clerk will report the amendment of the Senate from Alaska.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes amendment No. 468 to S. 47.

Mr. METZENBAUM. Mr. President, has a rollcall vote been ordered in connection with that amendment?

The PRESIDING OFFICER. It has not.

Mr. METZENBAUM. Mr. President, as I see the condition of the floor, I gather that if I called it up at this moment and insisted upon going to a vote my one vote against it might be sufficient. However, I have no intention of doing that. I do believe we should proceed with that vote, and I am prepared to do so.

Prior to doing so, I want to make it clear in view of the fact that there was some representation yesterday as to the position of the Seafarers Union and Mr. Drozak, the head of the Maritime Trades Department, AFL-CIO, I am now representing to the Senate that Mr. Drozak does not have any position with respect to the Stevens amendment.

I see the Senator from Washington on the floor at the moment. It is ready to be voted upon, is that my understanding?

The PRESIDING OFFICER. There will be 10 minutes of debate on the amendment.

Mr. STEVENS. Mr. President, have the yeas and nays been ordered on this amendment in the second degree?

The PRESIDING OFFICER. They have not.

Mr. STEVENS. Mr. President, I will say to the Senator from Ohio that I intend to modify that amendment in just a minute as soon as I can get the draft here.

The PRESIDING OFFICER. It would take unanimous consent.

Mr. STEVENS. I will do that as soon as the draft is here. The matter, I understand, has been discussed with the staff, but I will attempt that in a few minutes.

Mr. METZENBAUM. Mr. President, I wish to advise my friend from Washington that I am not aware of any modification that has been agreed upon or discussed and I am not at all certain that I am prepared to grant or give the unanimous consent. I would at least like to be apprised of what the circumstances are.

Mr. GORTON. Mr. President, it was the Senator from Alaska who made that announcement. I understand that I am a part of this and obviously we will bring this to the Senator in just a very few moments.

Mr. METZENBAUM. All right.

Mr. GORTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GORTON. Mr. President, we are about to vote on the Stevens amendment to the Judiciary Committee amendment. A number of the principals involved in this question, the distinguished Senator from South Carolina, the distinguished Senator from Utah, Senator STEVENS, and myself, have now reached an agreement on a proposal which will modify the Hatch amendment, which will substantially increase competition in ocean transportation of goods.

We, therefore, ask the Members, because we cannot get unanimous consent simply to substitute that amendment for the Stevens amendment, to accept the Stevens amendment at this point, to reject the Hatch amendment when it is voted on, with the commitment from the Senator from Alaska, Senator HATCH, Senator THURMOND, and myself that we will thereafter present an amendment including all of the elements of the compromise which will be a substitute and which will very substantially move in the direction of competition sought both by the Senator from South Carolina and the Senator from Utah.

The PRESIDING OFFICER. All time of the proponents has expired.

Mr. METZENBAUM addressed the Chair.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, just responding briefly to the Senator from Washington, let me point out that we are voting now on the Stevens amendment. If there is some other amendment that is to be offered at a later point, so be it, but the Stevens amendment vitiates the impact of this legislation and it vitiates and totally destroys the position of the Judiciary Committee.

Under those circumstances, I hope that the Stevens amendment will be rejected. If there are further negotiations with respect to modification, we certainly have all day to work that out. But I believe at this point the Stevens amendment should be rejected, and I certainly hope it will be.

The pending order is to vote, is it not, the regular order?

The PRESIDING OFFICER. There is still 2½ minutes remaining for the opponents.

Mr. METZENBAUM. And how much time for the proponents?

The PRESIDING OFFICER. The time of the proponents has expired.

Mr. METZENBAUM. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on the amendment.

Mr. GORTON. Mr. President, have the yeas and nays been ordered?

The PRESIDING OFFICER. They have not.

Mr. METZENBAUM. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Alaska (Mr. STEVENS). The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Mississippi (Mr. COCHRAN), the Senator from Kansas (Mr. DOLE), the Senator from Arizona (Mr. GOLDWATER), the Senator from Florida (Mrs. HAWKINS), and the Senator from Indiana (Mr. QUAYLE) are necessarily absent.

I also announce that the Senator from Alaska (Mr. MURKOWSKI) is absent due to the death of a relative.

On this vote, the Senator from Alaska (Mr. MURKOWSKI) is paired with the Senator from Florida (Mrs. HAWKINS).

If present and voting, the Senator from Alaska would vote yea and the Senator from Florida would vote nay.

Mr. BYRD. I announce that the Senator from California (Mr. CRANSTON) and the Senator from Ohio (Mr. GLENN) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 61, nays 31, as follows:

[Rollcall Vote No. 3 Leg.]

YEAS—61

Abdnor	Heflin	Packwood
Andrews	Heinz	Pressler
Baker	Hollings	Pryor
Bentsen	Huddleston	Randolph
Bumpers	Humphrey	Riegle
Burdick	Inouye	Rudman
Byrd	Jackson	Sarbanes
Chafee	Jepsen	Sasser
Chiles	Johnston	Stennis
Cohen	Kassebaum	Stevens
D'Amato	Kasten	Symms
Danforth	Lautenberg	Tower
DeConcini	Long	Trible
Domenici	Mathias	Tsongas
Eagleton	Matsunaga	Wallop
Exon	Mattingly	Warner
Ford	McClure	Weicker
Garn	Melcher	Wilson
Gorton	Mitchell	Zorinsky
Hart	Moynihan	
Hatfield	Nunn	

NAYS—31

Armstrong	East	Nickles
Baucus	Grassley	Pell
Biden	Hatch	Percy
Bingaman	Hecht	Proxmire
Boren	Helms	Roth
Boschwitz	Kennedy	Simpson
Bradley	Laxalt	Specter
Denton	Leahy	Stafford
Dixon	Levin	Thurmond
Dodd	Lugar	
Durenberger	Metzenbaum	

NOT VOTING—8

Cochran	Glenn	Murkowski
Cranston	Goldwater	Quayle
Dole	Hawkins	

So the amendment (No. 468) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 467

The PRESIDING OFFICER. The question is on agreeing to the first-degree amendment.

The first-degree amendment (amendment No. 467) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the first-degree amendment was agreed to.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 469

(Purpose: To promote the right of independent action)

Mr. STEVENS. Mr. President, will the Chair state now what the pending business is, under the previous time agreement?

The PRESIDING OFFICER. The clerk will report the next amendment.

The assistant legislative clerk read as follows:

The Senator from Utah (Mr. HATCH) proposes an amendment numbered 469.

The amendment is as follows:

On page 65, line 17, through page 66, line 21, strike all of subsection (d), and insert on page 65, line 17: "(7) permit any member to take independent action on any rate, charge, classification, rule, or practice."

On page 66, line 22, strike "(e)" and insert in lieu thereof "(d)".

On page 67, line 4, strike "(f)" and insert in lieu thereof "(e)".

On page 67, line 20, strike "(g)" and insert in lieu thereof "(f)".

The PRESIDING OFFICER. There is no time for debate on this amendment.

The question is on agreeing to the amendment. On this question the yeas and nays have been ordered.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, could I inquire now if we are about ready to vote?

Mr. GORTON. We are close to having a substitute.

Mr. BAKER. We have been close for a long time.

Mr. GORTON. They are looking at it.

Mr. BAKER. Mr. President, what is the business before the Senate.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Utah. The yeas and nays have been ordered.

Mr. BAKER. Mr. President, I suppose hope springs eternal. I am told there is an incipient compromise in the offing.

I have to say, Mr. President, that I call the attention of Senators to the fact that pursuant to the order entered this morning the time for the cloture vote is being extended by the time that we do not get this done. Pretty soon we are going to have to move on. If we are close to an agreement, then I wish to know that, but if we are not, we should go on.

Mr. HATCH. We should know within the next 2 minutes, I would say.

Mr. BAKER. The next 2 minutes.

Mr. President, I suggest the absence of a quorum for 2 minutes.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 469, AS MODIFIED

Mr. HATCH. Mr. President, I ask unanimous consent that I may be permitted to modify the pending Hatch amendment, and I send a modification to the desk.

The PRESIDING OFFICER. The clerk will report the modification.

The legislative clerk read as follows:

The Senator from Utah (Mr. HATCH) proposes a modified version of amendment No. 469.

Mr. HATCH. Mr. President, I ask unanimous consent that further reading of the amendment, as modified, be dispensed with.

The PRESIDING OFFICER. Is there objection to the modification? The Chair hears none, and it is so ordered.

Amendment No. 469, as modified, follows:

On page 65, line 17, through page 66, line 21, strike all of subsection (d), and insert on page 65, line 17:

(d) CONFERENCES UTILIZING LOYALTY CONTRACTS OR SERVING UNITED STATES-ORGANIZATION OF ECONOMIC COOPERATION AND DEVELOPMENT TRADES.—Each conference agreement must provide that, if the conference has in effect a loyalty contract with one or more shippers or if the conference serves a trade between the United States and countries that are members of the Organization of Economic Cooperation and Development, any member of the conference may take in-

dependent action on any rate or service item required to be filed in a tariff under section 9.

Mr. HATCH. Mr. President, I ask unanimous consent that I may explain this modification to my colleagues on the floor.

The PRESIDING OFFICER. Is there objection?

Mr. METZENBAUM. Mr. President, reserving the right to object—and I do not intend to object—I ask unanimous consent that I may have an equal amount of time.

Mr. BAKER. Mr. President, reserving the right to object, I obviously have no objection to this being explained, but I do not want an open-ended request. May I modify this to this extent: I ask unanimous consent that there be 2 minutes on each side to explain the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATCH. Mr. President, this amendment will permit any conference member to take independent action on any rate, charge, classification, rule or practice if the conference participates in trade between the United States and countries which are members of the Organization of Economic Cooperation and Development.

It will also apply to all conferences with loyalty contracts as well. Might I ask the distinguished Senator from Washington if that is correct?

Mr. GORTON. The Senator is correct, as did S. 47 as reported to the floor.

Mr. HATCH. So basically the only conferences that will be excluded from the right of independent action with no notice will be north-south trade agreements where countries are not members of the OECD or when they do not have loyalty contracts; am I correct?

Mr. GORTON. That is certainly the primary exception but, of course, we are setting it the other way. OECD and the loyalty contract conferences will be subject to this right of independent action. So far as I know, the major, if not the only, conferences are north-south conferences which will be outside.

Mr. HATCH. It is my understanding that the right of independent action will not be interfered with as to any conference with loyalty contracts, except loyalty contracts are often not utilized in the north-south trade.

Mr. GORTON. When loyalty contracts are required in north-south trade they would be subject to this right of independent action. There are certain other countries such as India which are not OECD countries which would fall within the——

Mr. HATCH. The independent action features of this amendment.

Mr. GORTON. It would not apply to countries like that. That may very well be defined as north-south trade. In other words, most of our trade is with OECD countries. They will have the right of independent action. Other elements of our trade are loyalty contract rates and they will permit independent action.

Mr. HATCH. I yield to the distinguished Senator from Ohio.

The PRESIDING OFFICER. The Senator from Ohio has 2 minutes.

Mr. METZENBAUM. I want my colleagues in the Senate to understand what this amendment is about. This amendment is a good amendment. It is a step, although a very small step, in the right direction. But with this amendment, with the Stevens amendment, that has already been adopted this bill will still provide a tremendous open area for carriers to join together to set prices in the shipping industry, to increase prices to the American public of $3 billion a year, and it will also provide with the Stevens amendment that the Federal Government will be enforcing the cartel agreement in seeing to it that nobody cuts the rates below that agreement.

This amendment provides some protection with respect to the North Atlantic trade. It does nothing with respect to trade between North and South, between this country and the southern part of the hemisphere, does nothing about Pacific trade, although there is not much of that. So I think the amendment should be adopted. But I do not want the Members of the Senate to be prevailed upon or persuaded as to the fact that this somehow solves the problems of this bill. It does not.

Mr. STEVENS. Mr. President, will the Senator yield for just one second?

Mr. METZENBAUM. Surely.

Mr. STEVENS. The Senator has referred to my amendment. It restores the law which has been on the books for over 20 years; he is aware of that?

Mr. METZENBAUM. I am aware of what the Senator from Alaska says, that he restores the law which has been on the books for 20 years. But the other parts of the bill make that far less effective and have far less impact than it would have without the bill being passed. So on its face it would sound good but realistically speaking it is not that good for the American people, and it sure as the devil is not good for the American farmers. This is an antifarmer bill, and do not anybody ever kid themselves about that, because it will increase the price of products they ship overseas.

The PRESIDING OFFICER. The time of the Senator has expired.

The question is on agreeing to the amendment of the Senator from Utah, as modified. The yeas and nays have been ordered.

Mr. BAKER. I ask unanimous consent to proceed for 30 seconds.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Is there requirement for a rollcall now on this amendment?

Mr. STEVENS. No.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the yeas and nays be vacated.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment, as modified, of the Senator from Utah.

The amendment (No. 469), as modified, was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HATCH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, what is the next question before the Senate?

The PRESIDING OFFICER. The amendment of the Senator from Minnesota.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, do I understand that the Senator from Ohio is willing now to go ahead with one of his amendments?

Mr. METZENBAUM. I am.

Mr. BAKER. I thank the Senator.

Mr. President, I ask unanimous consent that the sequence and order of the amendments be modified so that the Senator from Ohio may go forward with one or more of his amendments at this time, and that on the request of the distinguished Senator from Minnesota (Mr. BOSCHWITZ), he may be restored to his status at the end of any Metzenbaum amendment to offer his amendment contemplated by the original agreement.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 5

(Purpose: To eliminate antitrust immunity for intermodal rates)

On page 62, lines 5 and 6 strike: "through rates and through transportation" and insert in lieu thereof "of ocean transportation".

Mr. METZENBAUM. Mr. President, how much time is allotted to this amendment?

The PRESIDING OFFICER. Twenty minutes for each amendment.

Mr. METZENBAUM. Ten minutes to a side?

The PRESIDING OFFICER. That is correct.

Mr. METZENBAUM. Mr. President, this amendment would delete from the

bill the provision for making it possible for the antitrust laws to become inapplicable to transportation on land.

There is no question about what the basic thrust of this bill is. It is to provide an antitrust exemption to the shipping industry. There may be different points of view on that subject. I for one believe the shipping industry should not have an antitrust exemption. I believe they ought to participate in the free enterprise system and compete as other businesses are expected to compete.

I have previously mentioned that the shipping industry is not hurting. There is no reason for exemption to occur.

But even if you come to the conclusion that there should be an exemption for the shipping industry, there is not anybody on God's green Earth who can tell you why there ought to be an exemption in this bill making it possible for the shipping industry to enter into an agreement with respect to rates on land. In other words, the shipping company carries its products whether from England to New York or from Cuba to the United States or from the Virgin Islands to the United States and then has the right under this legislation to enter into an agreement as to what the rates will be in connection with overland transportation, whether that overland transportation is by truck, by train, by bus, or whatever the manner.

Nobody can believe that we ought to totally exempt the entire transportation industry from the antitrust laws, and yet that is what this bill is making it possible for the shipping industry to do.

Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. METZENBAUM. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. Six minutes remain.

Mr. METZENBAUM. I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Washington.

If neither side yields time, time runs equally against both sides.

Time is being charged against both sides.

Mr. METZENBAUM. Does the Senator from Washington not intend to debate this? If not, I will be happy to yield back the remainder of my time.

Mr. GORTON. The Senator from Washington does intend to debate it. I will begin in just a moment.

The PRESIDING OFFICER. Time is being charged equally against both sides.

Mr. GORTON. Mr. President, the Metzenbaum amendment would put the U.S. regulatory scheme for ocean shipping in tune with the technology of the Phoenician traders of old. By contrast, other developed nations of the world have insured that carriers serving their trades can rapidly adjust to the critically important technological innovations of intermodalism. The United States needs the updated regulatory scheme of S. 47 to encourage intermodalism and to help U.S. exporters keep up with the harsh competitive realities of international trade, where Japanese, Western European, and other non-U.S. manufacturers have the benefit of transportation services which would be denied by the Metzenbaum amendment. Further, the intermodal provisions of S. 47 would in no way change truck and rail deregulation statutes.

The following points make clear that the amendment should be rejected.

First. Shippers, carriers, ports, the administration, and the Federal Maritime Commission all support the authority in S. 47 for conferences to offer intermodal rates to shippers.

Second. The conference intermodal authority provisions of S. 47 would not change any laws regarding the truck or railroad industries. The Commerce Committee authored the truck and rail deregulation laws and it is unthinkable that the Commerce Committee would incorporate in S. 47 any provision that would reverse the truck and rail reforms that the Commerce Committee fought so hard to achieve.

Third. Through intermodal transportation rates offered by ocean carriers are almost always lower than the sum of separate ocean and inland rates.

Fourth. Intermodal services are particularly beneficial to small shippers which are less able than large shippers to negotiate beneficial inland rates with inland carriers, and are beneficial to all shippers and consumers.

Fifth. The provisions for conference intermodal ratemaking in S. 47 would clarify present law and make intermodal services more widely available in the United States. The Commerce Committee's exhaustive study of the shipping industry through 68 days of hearings since 1977 have made clear that in those trades, both United States and foreign, where conferences are able to offer intermodal rates, intermodal services are more widely available, both from conference and independent carriers. Thus, clarification of conference intermodal ratemaking authority in S. 47 will make intermodal service more widely available in the United States, to the benefit of shippers and consumers.

Sixth. The wider availability of intermodal services sought by S. 47 will help U.S. manufacturers reduce transportation costs and compete more effectively in third world markets. Japanese, Western European, and other manufacturers competing with U.S. exporters to sell products to Third World customers have access to and successfully use conference intermodal services which are often denied U.S. exporters due to the muddled and unclear procedures and standards of the 1916 Shipping Act.

Seventh. Intermodal authority for conferences has occasionally been granted by the FMC under the law as it exists today. However, there is some uncertainty that, under present law, the FMC has authority to approve intermodal agreements. The Congress should clarify this issue. Since intermodal authority is in effect in some U.S. trades, the Commerce Committee believes that S. 47 is a clarification, not a grant of new authority. Thus, it is the Metzenbaum amendment, not S. 47, that would completely change existing law on intermodal authority.

Eighth. Under a system where intermodal rates are widely available, shippers will always have the option to separately purchase inland and ocean transportation. Shippers will also have the option to purchase intermodal services from either independent carriers or conference carriers, as is the case today in U.S. trades where conferences have U.S. inland intermodal authority. In addition, as the United States is blessed with multiple coasts, conferences based on different coasts will be competing for the intermodal traffic of inland manufacturers. Thus, the wider availability of intermodal service that the evidence shows would result from the provisions of S. 47 will have the effect of providing new transportation options to shippers.

Ninth. Without intermodal authority for conferences, the benefits of the conference system of ocean common carriage may be lost entirely. More and more cargo is being carried via containers suitable for immediate transfer to truck or rail carriers, and that cargo is referred to as intermodal, even though nearly all of the miles traveled in the course of the movement are over the ocean. To say, for example, that an intergrated intermodal movement from Atlanta to Sydney, Australia, is not primarily an ocean movement, and should not be part of the regulatory scheme governing ocean transportation, is patently absurd. To exclude such movements from the Shipping Act is simply to say that there is no such thing as an ocean transportation scheme, since very few cargo movements do not have an ultimate destination which is inland from the port. This straightforward fact, that intermodal transportation offered by ocean carriers is essentially ocean transportation, and integral to any statutory scheme that purports to address ocean shipping, was acknowledged in the only published Federal appellate court decision addressing the intermodal transportation issue—that

opinion, which affirmed the FMC's authority to approve intermodal authority, was subsequently withdrawn because the facts of that particular case had become moot. Thus, any realistic ocean shipping legislation should logically include intermodal cargo in its scope, so long as that legislation is carefully crafted, as is S. 47, to avoid changes in the truck and rail regulatory schemes.

In summary, Mr. President, the amendment of the Senator from Ohio would put at a disadvantage both American exporters and importers, most particularly small shippers, would raise rates, and would make our entire international trade system far less efficient and more costly than it is today, much more than it would be if S. 47 passes, which would be another step forward.

Mr. METZENBAUM. Mr. President, I do not have much more to say on this matter, except I think that my colleagues ought to be aware of an exchange between the distinguished chairman of the Committee on the Judiciary (Mr. THURMOND) and Mr. Campbell, speaking for the Bureau of Competition of the Federal Trade Commission.

The CHAIRMAN. Mr. Campbell, section 4(a)(3) of this bill permits conferences to set rates for through transportation. Does this mean that they may not only fix their own rates but that of rail and truck carriers as well?

Mr. CAMPBELL. It does, Mr. Chairman. This allows the monopoly power permitted for the ocean carrier to be extended backward to any sort of communication, transportation that connects with the ocean carrier. It strikes me that it does extend the monopoly power.

The CHAIRMAN. Do you think this practice might tend to extend price fixing activities to the trucking industry with respect to other areas in which truckers operate?

Mr. CAMPBELL. I believe that is a serious risk.

I think that speaks for itself. It is one thing to give the shippers an antitrust exemption, with which I totally disagree. It certainly does not make sense to extend that exemption as far as the land transportation is concerned as well.

Mr. President, it should be pointed out that there is nothing in the law, nor would I propose anything for the law, that would prohibit an individual carrier from entering into an agreement to provide overland transportation. The issue is not as to whether or not the individual carrier may be permitted to make such an arrangement. That is unquestionably legal. The question is can the cartel enter into this kind of an agreement with respect to limitation of rates, or regions, or areas in connection with the overland travel? It is certainly a monopolistic practice that is not permitted under the law today.

Certainly, even if you like this bill, no member of this committee who believes in the free enterprise system—and I think that is the issue. If you believe in the free-enterprise system, you have to support this amendment. If you do not, that is your problem.

The PRESIDING OFFICER. Who yields time?

Mr. METZENBAUM. Whenever the opponents of my amendment are prepared to yield back their time, I am prepared to do so and go to a vote.

Mr. GORTON. I believe the Senator from Hawaii wishes to make remarks on this amendment. I yield such time as he desires.

Mr. INOUYE. Mr. President, I urge the Senate to reject this amendment. Despite the claim of my distinguished colleague from Ohio, S. 47 does not extend the limited antitrust exemption given ocean carriers to the trucking industry and the railroad industry. Indeed, those transportation industries are as fully subject to our antitrust laws under S. 47, as they are today. In fact, S. 47 expressly so provides (sec. 8(B)(1)).

So I think we must look elsewhere to see what this amendment really does. Very simply, it would at least cripple and perhaps kill the ocean conference system. The conference system is really what the opponents of S. 47 find objectionable. The Department of Justice and those who see our antitrust laws as ends in themselves have made no secret of their efforts over the years to destroy the conference system. They have recommended outright repeal of the Shipping Act; they have persistently sought to render the protections in that act meaningless by challenging conference agreements before the FMC and courts, and by virtually immobilizing carrier efforts to utilize legally authorized techniques to make liner service efficient and dependable at fair prices.

This amendment is not a frontal assault on the conference system. It does not say "Abolish conferences." Rather, it would weaken them to such a degree that they would not be able to achieve the purpose for which they are intended; inevitably they would either disappear or become meaningless shells. In either event, cutthroat competition, rate wars, and instability in our liner trades would result—the very evils which nearly 70 years of national shipping policy have sought to prevent by authorizing the conference system.

How would that amendment do it? Very simply, the amendment would remove one type of rate—the through intermodal rate—from conference ratemaking jurisdiction.

The through intermodal rate is increasingly in demand by shippers and smaller ports, as an alternative to port-to-port movements, because of the following substantial advantages:

It reduces transit time, thus speeding delivery and saving interest costs on inventory in transit.

It is convenient. It clearly establishes responsibility of a single carrier for loss or damage at whatever point it occurs, as well as facilitating tracing of shipment.

It is simple. There is a single bill of lading and a single payment for the entire movement. This eliminates the need for shippers to become involved in costly and distant transactions that historically attended to the interfacing of traffic between water carriers and inland carriers. The inland cargo interest does not have to arrange for custom house brokers, interface draymen, third parties to execute an onward bill of lading, and so forth.

It is particularly advantageous to small shippers, who can have "less than container load" consignments consolidated with others for intermodal movement and take advantage of the more favorable rate for full containerload shipments.

Importers can save on inventory costs and cash outlays for customs duties and letters of credit by taking advantage of consolidation, rather than having to buy and store full containerload lots.

It is of substantial potential benefit to smaller ports that have the prospect of becoming regional distribution centers for intermodal movements as they become even more popular.

The proponents of this amendment claim that any need to offer an intermodal rate because the shippers want it can be met by allowing individual carriers—but not conferences—to offer that rate.

What they are really saying to shippers is: You may have the benefits of the conference system, or you may have the benefits of intermodal rates, but you cannot have both.

Mr. President, inasmuch as S. 47 does not create any new antitrust exemption for the trucking industry or the railroad industry, why should the shippers not have the benefit of the service and price advantages of the conference system and intermodal rates as well?

The shippers will not be injured; conference intermodal rates are to their advantage.

What will be injured by the Senator's amendment is the conference system.

The purpose of the conference system is to stabilize rates for ocean transportation, by tempering the "dog-eat-dog" prospect of rate wars in the U.S. trades. That was the case in 1916 and continues to be the case today. To deny conferences the authority to provide intermodal service, while allowing independent carriers to do so, could severely damage or even destroy the conference system because member

carriers may well be compelled either to resign from the conference in order to offer independent intermodal service or to quote their own separate intermodal rates to compete effectively with other nonconference carriers, leading almost certainly to the kinds of rate wars that the conference system was designed to avoid. The U.S. merchant marine can only be the loser under such circumstances because foreign-flag independent competitors in general would enjoy a significant cost advantage and, consequently, greater flexibility in pricing of their services.

This is not merely idle speculation: It is substantiated by actual experience. In the recently dismissed litigation over conference intermodal authority under the Shipping Act, 1916 initiated by the Department of Justice (*United States* v. *FMC*, docket No. 79-1299, D.C. Cir.), the attached footnote from the intervenor conferences' brief (pp. 36-7) on rehearing en banc is instructive. I ask unanimous consent that it may be printed at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection it is so ordered.

(See exhibit 1).

Mr. INOUYE. Mr. President, the message is clear: A vote to deny conference intermodal authority is a vote to cripple or kill the conference system, which the Congress for almost 70 years has consistently held to be the keystone of rate stability in U.S. ocean trades and survival of even the most efficient carriers in the U.S. liner fleet, faced as they are with lower cost and heavily subsidized foreign-flag competitors.

EXHIBIT 1

The panel pointed out that, absent a conference's ability to adopt and publish intermodal joint rates, any conference member can selectively "opt out" of the very conference rate to which it is required by statute and by the conference agreement to adhere. (Slip op. at 47.) A conference member could do so by filing an individual joint rate tariff covering any commodity or origin point it chose if it wished to undercut the conference. Although the Department, citing no authority, claims the panel was wrong, the panel's point follows as a matter of law from the FMC's decision in *Disposition of Container Marine Lines Through Intermodal Container Freight Tariffs*, 11 F.M.C. 476 (1968). There the FMC, in an attempt to compel conferences to get on with the business of publishing joint rates, held that any conference lacking intermodal rate jurisdiction approved by the FMC had no legal right to preclude individual member carriers from filing non-conference joint rates.

In the westbound trans-Pacific trade prior to the Commission's grant of intermodal authority to PWC, the "opting out" of the conference rates by conference members described by the panel is precisely what happened on a major scale devastating to both the Pacific Westbound and Far East Conference rate structures. Both containerized carrier members of PWC and FEC and nonconference operators simply filed their own joint rate tariffs with rates well below the combination of all-water and rail export rates. Other members were compelled to follow until every major container operator was both a PWC or FEC member and side-by-side had its own non-conference rates. (*See 16th Annual Report of the Federal Maritime Commission*, fiscal year ended Sept. 30, 1977, at 2-3; *Lykes Bros. Steamship Co. v. Far East Conference*, 19 F.M.C. 589, 593 (1977); *Council of North Atlantic Shipping Association v. American Mail Lines, Ltd, supra*, 17 S.R.R. 1977, *adopted* 18 S.R.R. 774 (1978).)

The Far East Conference—the all-water conference from the East and Gulf ports to Far East ports—was nearly destroyed. Its membership drastically fell and remains small to this day. (*East Asian Trade Study, supra*, at 138.) Some Far East Conference members, including two American flag carriers, ceased their direct East and Gulf Coast all-water services to the Far East in favor of minibridge overland services from Pacific coast ports. (*See Agreement No. 10135* (Order of Conditional Approval, dated March 23, 1979); *Agreement No. 57-96, Pacific Westbound Conference Extension of Authority for Intermodal Services*, 19 F.M.C. 291 (1976); *East Asian Trade Study, supra*, at 135; *North Pacific Trade Study, supra*, at 17-18.)

Mr. GORTON. Mr. President, I yield back the remainder of my time.

Mr. METZENBAUM. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Mississippi (Mr. COCHRAN), the Senator from Kansas (Mr. DOLE), and the Senator from Florida (Mrs. HAWKINS), are necessarily absent.

I also announce that the Senator from Alaska (Mr. MURKOWSKI), is absent due to the death of a relative.

I further announce that, if present and voting, the Senator from Alaska (Mr. MURKOWSKI), would vote "nay".

Mr. BYRD. I announce that the Senator from California (Mr. CRANSTON) and the Senator from Ohio (Mr. GLENN), are necessarily absent.

The PRESIDING OFFICER (Mr. WILSON). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 25, nays 69, as follows:

[Rollcall Vote No. 4 Leg.]

YEAS—25

Armstrong	Durenberger	Matsunaga
Baucus	East	Metzenbaum
Bentsen	Hart	Proxmire
Biden	Hatch	Roth
Bingaman	Humphrey	Specter
Boren	Kennedy	Tsongas
Boschwitz	Lautenberg	Zorinsky
Bumpers	Leahy	
DeConcini	Levin	

NAYS—69

Abdnor	Chiles	Domenici
Andrews	Cohen	Eagleton
Baker	D'Amato	Exon
Bradley	Danforth	Ford
Burdick	Denton	Garn
Byrd, Robert C.	Dixon	Goldwater
Chafee	Dodd	Gorton
Grassley	Lugar	Riegle
Hatfield	Mathias	Rudman
Hecht	Mattingly	Sarbanes
Heflin	McClure	Sasser
Heinz	Melcher	Simpson
Helms	Mitchell	Stafford
Hollings	Moynihan	Stennis
Huddleston	Nickles	Stevens
Inouye	Nunn	Symms
Jackson	Packwood	Thurmond
Jepsen	Pell	Tower
Johnston	Percy	Trible
Kassebaum	Pressler	Wallop
Kasten	Pryor	Warner
Laxalt	Quayle	Weicker
Long	Randolph	Wilson

NOT VOTING—6

Cochran	Dole	Hawkins
Cranston	Glenn	Murkowski

So the amendment (No. 5) was rejected.

Mr. GORTON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. BOSCHWITZ. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. METZENBAUM. Mr. President, will the Chair advise what the regular order is at the moment?

The PRESIDING OFFICER. The Senator from Ohio has six remaining amendments which he may offer one at a time.

Mr. METZENBAUM. Is it not the fact that the Senator from Minnesota has an amendment?

The PRESIDING OFFICER. And the Senator from Minnesota has one.

Does the Senator from Minnesota wish to proceed at this time?

Mr. BOSCHWITZ. If the Senator from Ohio would proceed a little bit longer or proceed to his next amendment I would appreciate it.

Mr. METZENBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I am about to propound a unanimous-consent request in several parts. I will put the entire request before the Chair will rule, no doubt. I hope the Chair will withhold ruling until I have finished all of the several parts of the request.

I have discussed this with the distinguished managers of the bill, the distinguished assistant majority leader, the Senator from Ohio, the Senator from Minnesota, and a number of other Senators, and I have communicated the content of this to the minority leader. The acting minority leader, the Senator from Hawaii, is on the floor. As far as I can tell, it is agreeable all around. I will now put the re-

quest and I hope there will be no objection.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, first, I ask unanimous consent that the previous unanimous-consent agreement with respect to this bill be vitiated.

Second, Mr. President, I ask unanimous consent that if this agreement is entered into, the Senate stand in recess from the moment the agreement is granted by the Senate until the hour of 2 p.m. today.

Next, Mr. President, I ask unanimous consent that at 2 p.m. today the Senate resume consideration of this measure at which time a Metzenbaum amendment dealing with antitrust will be the pending amendment.

Mr. President, I ask unanimous consent that there be a time limitation on that amendment of 40 minutes to be equally divided.

Mr. President, I ask unanimous consent that after the disposition of the Metzenbaum amendment and a vote on or in relation thereto, the Senate proceed to the consideration of the Boschwitz amendment dealing with cargo preference, on which there will be a time limitation of 40 minutes to be equally divided.

Mr. President, I ask unanimous consent that no other amendments be in order.

I ask unanimous consent that after the disposition of the Boschwitz amendment, there be 40 minutes of debate on the bill itself, to be equally divided.

I ask unanimous consent, Mr. President, that at the end of that 40 minutes or yielding back of the time remaining, that there be a vote on final passage, with the provisions of paragraph 4 of rule XII being waived.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the majority leader?

Mr. METZENBAUM. Mr. President, reserving the right to object, and I do not intend to object, I join with the majority leader in the request that he has made. I join with him. I have proposed this procedure myself. It is my feeling that the matter of debate on this measure was important. We have now been at it for about a week. I think all parties concerned have been alerted to the pluses and negatives of this measure. I frankly see no useful purpose in merely dragging the Senate through a long period of debate if the ultimate objective or the ultimate purpose is not going to be changed.

Under those circumstances, I would be prepared to debate the antitrust amendment, which I consider to be the guts of the bill, immediately following the recess, and then at the appropriate time debate the final act with respect to the measure. I see no reason to have debate on postcloture amendments in connection with this measure and, therefore, no need for a cloture petition. I have no objection.

Mr. BAKER. Mr. President, I add to my request, although it may be implicit in the request I have already made, that the petition for cloture and the vote that would occur thereon also be vitiated.

The PRESIDING OFFICER. Is there objection to the request? Without objection, it is so ordered.

Mr. BAKER. Mr. President, let me take just a moment to say for the record and while the Senator from Ohio, the Senator from Alaska, the Senator from Washington, and the Senator from Hawaii are on the floor, how grateful I am for handling this in a responsible and efficient way. I think I have some understanding of how deep convictions run on this subject. I am certainly not an expert on the subject myself, but I know it is a matter of extraordinary importance to many Senators and to their constituent interests in their States and, indeed, to the entire country. It is not a small and it is not a trivial matter. It is a highly controversial issue. It is in the very best traditions of the Senate, after a full ventilation of the issues involved, that Senators participating principally in this debate would agree to a method for the orderly disposition of this issue.

So I express my personal appreciation to the Senator from Ohio, the Senator from Alaska, the Senator from Washington, the Senator from Hawaii, the Senator from Minnesota, and indeed to other Senators who have shown this sense of responsibility and willingness to deal with this important issue in this manner.

RECESS UNTIL 2 P.M.

Mr. BAKER. Mr. President, the agreement has been entered into and I believe it provides that upon the entry of the agreement that the Senate would stand in recess until 2 p.m.

The PRESIDING OFFICER (Mr. QUAYLE). The Senator is correct. The Senate will stand in recess until 2 p.m.

Thereupon, at 12:35 p.m., the Senate recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. HELMS).

Mr. BAKER. Mr. President, what is the business before the Senate?

The PRESIDING OFFICER. The pending business, the Chair informs the majority leader, is S. 47.

Mr. BAKER. And the pending question?

The PRESIDING OFFICER. The Senator from Ohio is to be recognized to offer an amendment.

Mr. BAKER. I thank the Chair.

Mr. President, I am sure the Senator from Ohio is someplace close by.

As I recall, the unanimous-consent agreement entered into provided that beginning now, there will be 40 minutes of debate, to be divided, on the Metzenbaum amendment. Is that correct?

The PRESIDING OFFICER. That is correct.

Mr. BAKER. The Senator is here, and I yield the floor.

The PRESIDING OFFICER. The Senator from Ohio is recognized.

UP AMENDMENT NO. 22

(Purpose: To eliminate the antitrust exemption)

Mr. METZENBAUM. Mr. President, I call up my amendment, which is called the section 8 amendment. I think the amendment is at the desk, is it not?

The PRESIDING OFFICER. Will the Senator send the amendment to the desk?

The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) proposes an unprinted amendment numbered 22:

At the appropriate place in the Committee substitute, strike Section 8 in its entirety.

Mr. METZENBAUM. Mr. President, this amendment really goes to the thrust of the entire bill. This amendment should properly be called not a section 8 amendment; it should be called a free-enterprise amendment, because anybody who believes in the free-enterprise system has to be for this amendment.

This amendment is not complicated. This amendment would eliminate the antitrust exemption that is provided in this legislation. This amendment would no longer make it possible, as the bill makes possible, for a cartel, a group of shipowners, 82 percent 85 percent of whom are foreigners, to join in an agreement to set prices and to agree upon routes.

For the life of me, I cannot understand how we happen to be in this posture. I am told that the Reagan administration wants this bill. I am told that the Republicans want this bill. I have seen today, and in the last few days, some Members who pride themselves on being conservative, some Members who pride themselves on being part of the right wing of the Republican Party, some Members who pride themselves on standing and fighting for the free-enterprise system, supporting amendments that are diametrically opposite to that system. Anybody in his or her right mind knows that the free-enterprise system is based upon free competitive forces.

I hear comments made back and forth about how this administration and these Republicans want to deregulate. What kind of deregulation is it if you deregulate and at the same time permit the people who are in the industry to sit down together—in public,

if you please, or in private—to agree that they will set rates?

How can anybody come into the Senate and say that this is the philosophy of the Republican Party? How can they say that they are people who believe in the system working right and support this bill? Antitrust is not a Democratic or a Republican position; it is a position that has been supported by both sides of the aisle.

This amendment would deny the sweeping, blanket antitrust exemption that is in this bill which would expand the existing unnecessary immunity significantly.

The argument is made: "You can already do it." That is unadulterated baloney. You cannot already do it. You have to go to the Federal Maritime Commission. You have to prove that the agreement to set rates is in the public interest; and the courts already have said that to be in the public interest, it means you have to take into consideration the anticompetitive effect.

Under this legislation, you allow the fixing of through rates; you allow the elimination of service competition.

I do not understand how anybody in the Senate who represents one of the smaller communities that have a seaport can be for this bill and be against this amendment. If you want your community served, you had better not support the GORTON measure and you have to support the METZENBAUM amendment to it. There is no reason for an exemption.

More competition, not more immunity, has been urged. Urged by whom? All those wild-eyed liberals who write editorials for the Wall Street Journal, all those wild-eyed leftwingers who write editorials for the New York Times and the Washington Post, all those opponents of the free-enterprise system known as the House Republican Research Committee, and the unanimous position by the Federal Trade Commission. Every one of them—the Wall Street Journal, the New York Times, the Washington Post, the House Republican Research Committee, the unanimous Federal Trade Commission—believes competitive forces should be permitted to work. But this bill would say: "No, we won't let them work. No, we will not let them work. We will fix prices."

I thought cartels were recognized as the bane of the free-enterprise system years ago. In all other transportation industries, we have chosen between Government regulation and the free-enterprise system, and we have come down on the side of favoring the free-enterprise system. But for some reason unbeknownst to me, we are willing, in S. 47, to combine the worst of both worlds for the ocean shipping industry.

S. 47 takes the Government out of the role of determining the public interest, yet keeps the Government—and I think this is important—as the enforcer of private price-fixing agreements. S. 47 allows the ocean carriers to prevent all forms of competition, with absolute immunity from our antitrust laws.

Mr. President, I do not doubt that there will be votes against this amendment, and I do not doubt that it very well may be defeated. But I say to those who vote against this amendment:

Invite me to your State and let me debate you on this bill and this amendment. Let me go before the voters of your State to talk about the fact that you are providing for the legalization of a cartel and that you are providing that the free-enterprise system will not be permitted to work. I will come to your State, and I will debate you in any forum.

Let me go into the farmer States where prices of delivered products will be forced to rise by reason of this bill.

Let me go into industrial States and prices will be increased by reason of the passage of this bill.

Approving the antitrust exemption for the shipping industry is an absurdity. It is a reflection of the fact that there has been a powerful lobby working, but it has not been working in the interest of the people of this country.

If you stand foursquare on your feet for free competition and free enterprise, then you support my amendment, and if you think there should be a controlled economy without the free competitive forces working, then vote against my amendment.

That is what the amendment is all about. It is simple. Give me your most conservative Member and I say to that most conservative Member I will come to your State and debate you on this bill and on this amendment, and I will guarantee you when we get done that the vote of those who will be listening to that debate will be 90 to 10 with me and not with those who are advocating passage of this bill.

You may have the votes but right is not on your side.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. GORTON. Mr. President, perhaps in beginning the debate against the amendment proposed by my friend from Ohio I would do better not to quote myself but to quote a scholar whose article on this subject has recently come to my attention.

John Hazard is a professor in the department of transportation at Michigan State University. He has published an article in the winter issue of the Transportation Journal on U.S. maritime policy entitled "A Competitive U.S. Maritime Policy," the goal sought by the Senator from Ohio in all sincerity, and by myself, and by the Commerce Committee in proposing this bill.

While much of Mr. Hazard's article deals with the anticompetitive nature of other laws relating to matters maritime not relevant to this bill, I do intend to read into the RECORD his statements relating to maritime transportation in international commerce and his comments on the predecessor to this bill, S. 1593, in the 97th Congress which is, if anything, a little more liberal in its reduction of the scope of antitrust laws than is S. 47 as it appears before the Senate at this moment.

Mr. Hazard says:

A competitive, trade-expanding maritime policy would seem to require greater reliance on competitive market forces, or "deregulation" in the popular vernacular. Theoretically, resorting to unregulated competitive conditions would enable the most efficient operators to emerge and take over more of the trade by offering lower rates and improved service. The result would be an expansion of trade, improved allocation of international resources, and maximum net gains from trade and commerce.

That theoretical logic has become the article of faith of both political parties as they have moved toward deregulation of railroads, trucks, and air transport in domestic markets. The world markets in which the merchant marine operates, however, do not strictly observe competitive rules. On the contrary, attempts at the extra-territorial extension of U.S. antitrust laws into international markets have produced strained relations abroad and serious embarrassment at home. Conferences of lines (shipping cartels) set rates and control services on trade routes outside the national jurisdiction. They are generally exempt from U.S. antitrust laws as long as they do not subscribe to certain outlawed practices like deferred rebates and fighting ships. Also, an increasing number of ship lines within and outside the conferences are owned by the state and subscribe to cargo sharing rather than to competitive rules. Any attempt to reform or deregulate U.S. economic regulation must come to grips with these unique conditions.

Three separate regulatory reform initiatives have emerged in Washington. Each appears to be conscious of the need to make some compromises between the ideology of deregulation and pragmatic, real-shipping-world conditions. The major differences have to do with how far to go in freeing shipping of regulation and what combination of measures will achieve the desired degree of freedom. The differences, as illustrated in Table III, appear minor but are controversial.

And those have to do with S. 1593, a bill which I introduced in the 97th Congress, the House bill which was originally passed by the House of Representatives, and the administration position during the 97th Congress.

The Gorton Bill before the Senate appears to come closest to the ideal balance between competitive theory and real world conditions. It recognizes that the countervailing power of shipper oligopolies (councils) and regulation must be relied upon to keep conference-prescribed ocean rates reasonable and services viable in the absence of competitive conditions. Unlike other bills, which allow conferences to be closed to outsiders, the Gorton Bill holds the confer-

ences open for additional membership. The rationale for closed conferences generally holds that open conferences attract surplus ship tonnage into the U.S. trades that cannot gain entrance to the closed conferences that dominate other trades. This dubious argument however should not deter the United States from holding conferences open. The new goal is, after all, more competition and expanded trade rather than protection of the U.S. merchant marine. The Gorton Bill requires the conferences to file rates with the Federal Maritime Commission (FMC) so that any rate discrimination and prohibited practices can be overseen. The administration's move to abolish tariff filing would accomplish more "deregulation" but would leave the commission blind to conference practices contrary to U.S. trade interests. All three bills require the FMC to exercise a lighter hand in regulation than it has heretofore.

Another difference in the Gorton Bill is that is allows Shippers' Councils to be formed for collective shipper negotiation with the carrier conferences over rate and service matters. This countervailing force works so well in some of the Western European countries that the governments have been able to dispense with most regulation and "simply weigh in" on the side of whoever is consistently getting the worst of the bargain.[41] The House and the administration have evidently foregone the shippers' council approach because of the formidable political difficulties of providing them with antitrust exemption. There is no good reason why the exemption should not be granted for specific shipper council negotiating practices so long as they do not have an adverse impact on domestic markets. The lack of shipper constituency support may undermine this provision in much the same way that it deferred efforts to deregulate domestically. Finally, the Gorton Bill preserves the right of independent action for individual lines that are members of a conference. This means that should carrier requests for rate changes be voted down by other members of the conference, the carrier(s) can still pursue independent courses of action without penalty or expulsion. This, together with keeping the conferences open and subjecting them to modest regulation and two-way bargaining with shippers' councils, enables competition to work as effectively as possible in an arena dominated by conferences and cartels.

Beyond the items discussed the legislative approach is fairly similar. The Gorton Bill provides a new competitive policy declaration and is more explicit about contract and volume rate discounts. It has the most support from maritime experts abroad and in the United States.

Mr. President, I ask unanimous consent to have printed in the RECORD table III, "Maritime Regulatory Reform Measures, Spring, 1982," as appears in the Transportation Journal.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE III.—MARITIME REGULATORY REFORM MEASURES, SPRING, 1982

	Gorton Senate bill (S. 1593)	House bill (H.R. 4374)	Administration
Ocean conferences	Open	Closed	Closed.
Assessment agreements	Allowed	Allowed	Not applicable.
Tariff filing	Required	Required	Not required.
Shippers' councils	Allowed	Not allowed	Not allowed.
Contract (loyalty) rates	Allowed	Allowed	Allowed.
Amount of discount	15 percent	No ceiling	No ceiling.
Volume time rates	Specified	Silent	Silent.
Independent action	Required	Not required	Required.
State-controlled carriers	Regulate	Regulate	Regulate.
Antitrust exemption	Pooling rationalization	Pooling rationalization	Unstated.
Prohibited practices	Fighting ships deferred rebates discrimination	Fighting ships deferred rebates discrimination	Unstated.
Intermodal rates	Authorized	Authorized	Authorized.
Canadian diversion	Omitted	Omitted [1]	Unstated.
Declaration of policy	New	Old	Unstated.

[1] A separate bill H.R. 3637 approved by the House Energy and Commerce Committee required the filing of rates on U.S. shipments moving through Canada.

Sources: Senate bill 1593; House Resolution 4374; The Journal of Commerce, Apr. 1, 1982, PIA&SA and Apr. 5, 1982, p. 3 B.

Mr. GORTON. Now, I wish to point out that the only difference between S. 47, as it is before us now, and S. 1593, which is the subject of this article, is that S. 47 before us now is more competitive in what it allows joint ventures of small shippers to do and in connection with independent action as a result of the adoption of the modified Hatch amendment this morning.

Very bluntly, the amendment before us now is designed to kill the bill, as I suspect the Senator from Ohio would readily admit. It is designed to retain the status quo in ocean merchant shipping, a status quo which is not particularly competitive, not as competitive as it will be if S. 47 is passed. This status quo tells American-flag shipping lines that they are never going to know whether or not they are subject to a lawsuit even after they have had their conference agreements approved by the Federal Maritime Commission. This status quo is a lawyer's paradise but a shipper's, exporter or importer, and ocean carrier's jungle.

We propose to simplify the law; we propose to return to the policy which has been that of the United States since the Shipping Act of 1916 was originally passed. We propose in the real world to create the maximum degree of competition which is possible, given the different views of our trading partners.

I should emphasize that S. 47 as it exists at the present time with an antitrust exemption will lower, not raise, rates in international shipping.

I merely point out that nowhere except in the United States is there an attempt to enforce the domestic antitrust laws in international shipping.

I have asked repeatedly, without a response from the opponents to this antitrust exemption, to point out a situation in comparable trades between countries not involving the United States where the absence of antitrust laws has created shipping tariffs which are higher than those in the U.S. foreign trade with the present mishmash of antitrust laws.

There has been no answer to that question. In fact, antitrust laws in this area do not protect the shipper, they do not protect the exporter, they do not protect the importer. They create great litigation and added expense, and they are detrimental to the commerce of the United States.

It is for that reason that this bill is supported by the administration; it is for that reason that this bill is supported by the carriers almost without exception; it is for that reason that this bill is supported by the ports and ports authorities, small as well as large. It is for that reason that this bill is supported by the great majority of the shippers and the shippers organizations in the United States. They live in a real world. They want a better deal than they have at the present time.

In addition, I would like to point out that the antitrust laws, which are so eloquently defended by the Senator from Ohio, have had such a paradoxical effect that the Svenska case, one of the chief pieces of litigation undermining the antitrust immunity of conferences under the 1916 laws, was brought to negate shipping rates which were too low, not too high.

That was the kind of conference agreement which the court found to be a violation of the antitrust laws in the Svenska case, I point out to the Senator from Ohio. It was a challenge that rates for shippers were too low, and it is certainly not a protection of the consumer interests in the United States to have antitrust laws enforced in that irrational and frivolous fashion.

In my view, antitrust laws of the United States are very, very important in many respects to create a significant degree of competition. They are

not ends in themselves. To the extent that exemptions in a unique situation can improve the plight not only of the American merchant marine but of both importers and exporters, we should welcome such an opportunity, and we can only welcome that opportunity by defeating this amendment.

Mr. METZENBAUM. Mr. President, will the Senator from Washington yield for a question?

The PRESIDING OFFICER (Mr. HEINZ). Who yields time?

Mr. GORTON. May I ask how much time remains, Mr. President?

The PRESIDING OFFICER. The Senator from Washington has 7½ minutes remaining.

Mr. GORTON. If I may, Mr. President, I wish to yield first to the Senator from Hawaii who wishes to use some of our time.

The PRESIDING OFFICER. The Senator from Hawaii is recognized.

Mr. INOUYE. Mr. President, I urge the Senate to reject this amendment because it would undo 67 years of national shipping policy by removing limited antitrust immunity for concerted economic activity in ocean liner shipping.

The authors of the 1916 act were fully aware of the national economic policy embodied in the antitrust laws which were already on the books when the 1916 act was passed. Yet they felt a limited exemption from them was necessary if we were to have stability and efficiency in our liner trades, and liner service was to be available to all shippers on a fair and equitable basis.

Ocean liner shipping is different than other modes of transportation such as trucking, the railroads, and the airlines. And this difference requires that a certain degree of otherwise impermissible concerted economic activity be allowed in international shipping to insure the kind of competition in price and services that is achieved through full application of the antitrust laws to other modes of transportation.

Mr. President, I think we should keep in mind what is at stake. As the largest trading nation in the world, it is absolutely essential that we have the ability to insure that our foreign commerce remains strong and stable under all kinds of world conditions—peace, foreign crisis, and national emergencies. This ability requires a strong U.S. merchant marine. Otherwise the day could come when our foreign commerce will be at the mercy of those who may not agree with our international policies, and our cargo will be left on the docks.

The U.S. merchant marine is our fourth arm of defense. We know how vital it was in World War II, Korea, and Vietnam. The Soviets also know how important a strong merchant fleet is. Every commercial vessel they build is designed to serve their transportation needs in time of war as well.

I therefore urge that the Senate reject this amendment because it can only serve to undermine the stability of our foreign commerce and the strength of our fourth arm of defense.

The PRESIDING OFFICER. Who yields time?

Mr. METZENBAUM. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. Ten minutes and thirty-two seconds.

Mr. METZENBAUM. Mr. President, I yield myself 3½ minutes.

Mr. President, the history of the existing antitrust exemption has shown that the ocean carrier industry has actually used its immunity to drive out independents and to raise prices. This history should counsel us today against allowing carriers not only to continue this pattern of misconduct, but to legalize it, to give them authority to go further than what they are presently doing.

Today you have to go to the Federal Maritime Commission and you have to prove that there is a public interest to be served when you come in with a fixed tariff rate of a cartel, and you must prove that it will not hurt the competitive factors and that it does not violate the antitrust aspects of the matter.

But under this measure, without my amendment, the door will be wide open. Let me suggest and point out to you the absurdity of what the opponents of this amendment are saying. As I understood the Senator from Washington he was saying that antitrust laws hurt the economy of the United States.

He has been one of those around here who has said he believes in antitrust law enforcement; that he believes in the antitrust laws. Yet one of his statements, if I understood it correctly, was that antitrust laws hurt the economy of the United States. It is hard for me to believe that he said that, and yet I heard it whith my own ears.

Mr. GORTON. I do not believe the Senator from Ohio believes he heard that because the Senator from Washington did not say that. The Senator from Washington said that the use of antitrust laws in the Svenska case hurt consumers because the finding was that the tariff was too low instead of too high.

Mr. METZENBAUM. The Senator said before he got to the Svenska case that it was detrimental to U.S. commerce, it hurt consumers to apply that to this industry, and I can only say to the Senator that if it is detrimental to the U.S. shipping industry then I do not know why automobile manufacturers cannot get together and agree upon prices and why lumber companies cannot get together and agree on prices, and why steel companies cannot get together and agree on prices. To me it is a non sequitur. It does not follow that the shipping industry is making money and yet comes in here and wants the authority to violate the antitrust laws of this country. What we are doing is making legal their otherwise illegal acts.

The Senator from Washington also suggests that the need for his bill in view of the Svenska case is to help shippers reduce prices. Now, come on, let us not kid the American people. The reason why the carriers want this bill is so they can raise prices, so that competition will not work in the industry.

We have been informed that this bill will cost the American consumers $3 billion a year, and I want to repeat for every Senator in this body who comes from a farm State, who comes from an industrial State, do not forget it, the price that that wheat will cost will be higher because you passed this bill; the price for those exported autos will be higher because you passed this bill; the price for that exported corn will be higher because you passed this bill.

This bill will permit the carriers to fix prices, and I am not willing to suggest any implication that somehow they want to fix prices at a lower rate. Come on now, whom are you kidding? Do you want to charge people more? If you do not believe in the free enterprise system, if you are not for competition vote against this amendment. But if you believe in free enterprise and competition and lower prices for the public based upon competitive factors then you ought to be voting for this amendment.

I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. GORTON. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. The Senator from Washington has 6 minutes 26 seconds.

Mr. GORTON. First, I have to apologize to the Senator from Ohio and make one correction. I mistakenly referred to the Svenska case in connection with my previous remarks. The actual name of the litigation was Sabre Shipping Corp. against American President Lines. For the edification of the Senator from Ohio, I should point out that in Sabre, the Federal Maritime Commission hearing examiner had found that the rates of the conferences involved had a predatory effect on Sabre Line and not the conference carrier trade and the conference rates were, "therefore, so unreasonably low as to be detrimental to the commerce of the United States" within the meaning of the present Shipping Act.

That was the violation of the antitrust laws, having rates which were unreasonably low. That finding was

not in the interest of the consumers of the services. It was not in the interest of the consumers of the United States in general. It simply points out the fact that the present irrational system of partial Shipping Act jurisdiction and partial antitrust jurisdiction can be used as easily to raise rates and tariffs as it can to lower rates and tariffs.

It is interesting that the Senator from Ohio announces the names and nature of all of the shippers who are detrimentally affected by this bill, according to his statements. Paradoxically the farmers, through the American Farm Bureau, are in favor of the bill. Large shippers, such as those dealing with automobiles, are in favor of the bill.

The Senator from Ohio is attempting to present to the Members of the Senate of the United States the proposition that he knows the interests of people who have supported this bill better than those organizations know their own interests. I submit that that simply is not the case. The balanced analysis which I read from the transportation article just a few moments ago about the nature of this bill is objectively accurate. It is certainly true that if we went from the situation as it exists now to a system of pure competition, if somehow or other the United States of America could accomplish that, there would be a greater drop in rates than there will be under S. 47.

That is not what is before this Senate at the present time. What is before the Senate at the present time is the difference between present law and S. 47. According to the vast majority of people who have carefully studied this, according to the vast majority of the interest groups on all sides which have been involved in the development of this bill, it will increase competition from the present situation. It will, therefore, offer more and better services at better prices than does the present situation.

The idea that we could simply repeal the entire 1916 Shipping Act, that that would create more competition that way, is simply irrelevant. That is not what the Senator from Ohio proposes to do. That is not something which would pass because, among other things, it would simply destroy the American merchant marine. There would be no such merchant marine.

The careful crafting of legislation to help a legitimate domestic industry while at the same time helping the commerce of the United States does not lend itself to broad, general, or wild statements. After 6 years of careful study on the part of members of the Commerce Committee, who are as fierce a set of defenders of antitrust laws under normal circumstances as is the Senator from Ohio, we have come to the conclusion that we can improve the situation for everyone in the United States by the passage of this bill and by an antitrust exemption in the area in which antitrust laws cannot be effectively enforced against anyone except a handful of American carriers. I again simply want to point out that foreign trades, which have never had any antitrust laws, applicable to them, actually have more competition than does the United States with the present irrational system.

Mr. METZENBAUM. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. Five minutes, nineteen seconds.

Mr. METZENBAUM. And the Senator from Washington?

The PRESIDING OFFICER. One minute and fifty-five seconds.

Mr. METZENBAUM. Mr. President, I point out that the National Farmers Union, the American Association of Retired Persons, the National Farmers Organization, the Consumer Federation of America, the Consumers Union, and the Congress Watch all oppose this bill. Those are the groups that speak for consumers in this country.

When the Senator from Washington says that some who are shippers are for the bill, I must point out that those are the big boys. Those are the biggest corporations who will have their own shippers councils, and a matter we have not discussed much at this moment had to do with the fact——

Mr. GORTON. Will the Senator yield?

Mr. METZENBAUM. Not on my time.

Mr. GORTON. I take my own time.

Does the Senator not realize that the shippers councils are no longer in this bill but it includes only joint ventures which are limited to small shippers?

Mr. METZENBAUM. The Senator from Washington is correct about that. But the fact is that it will be possible for the big shippers to provide protection for themselves under this legislation. It will not be possible for the small business person, the small farmer, to do so.

What will happen as a result of this bill, if it passes, and I assume that it will pass, is that you are going to hurt the small business person who is an exporter. We have already provided an exemption for the recycling industry, but there are a lot of industries that do not have somebody coming around and advocating an amendment for them. There is no protection for them.

I cannot really believe that the Senator from Washington is representing to the Senate that this exemption from the antitrust laws will increase competition. Quite the opposite, it will increase anticompetitive forces. It will permit the cartels to work together to set prices.

Last but not least, let me point out for my colleagues in the Senate that the shipping industry does not need this bill. If they needed it, I would be in the forefront of those fighting to pass it.

The GAO has already concluded a study saying that the shipping industry is not in need and the shipping industry is not economically distressed. Although they did not address themselves to this bill, they certainly addressed themselves to the economic conditions of the shipping industry.

It is simple; it is elementary. If you are for free competition, if you are for free enterprise, then you are for my amendment. But if you are for the cartels, if you are for fixed prices, which will have a direct impact on the American consumer, the American farmer, and every American that exports his or her products, then you cannot be for this amendment.

It was the Democrats many years ago that came along with the National Industrial Recovery Act, making it possible to fix prices. It took the Republicans a good many years to come back with their own way of fixing prices. Not much difference. The Democrats did it because there was a depression on. It so happened that the courts ruled it was illegal. But the Republicans are doing it for an industry that is not hurting. There are some arguing that it is going to lower prices. In no way will it lower prices. This measure is antifree enterprise; it is antifree competition.

Go ahead and vote my amendment down, if you want to, but I say to you again I am prepared to come to any State in the Union to debate the merits of this measure, and I predict that I will walk out of that meeting with you and 90 percent of the people in your own State will say that I was on the right side of this issue and that you were on the wrong side. I would like to go to the most conservative States in the Union for the purpose of making that debate and I will pay my own expenses.

The PRESIDING OFFICER. Who yields time?

Mr. GORTON. Mr. President, I yield myself such time as I may need.

I welcome to the Republican Party the distinguished minority manager of this bill, the Senator from Hawaii, and all of his many allies on that side of the aisle. As a matter of fact, if we have that kind of a majority, we will have very little trouble during the rest of this Congress.

I simply wish to point out that the Senator from Ohio says that the only shippers who are for this bill are the large shippers. He is simply incorrect. The large shippers are granted no special exemption by this bill.

As a matter of fact, it is a couple of them who have serious reservations about it, because it so substantially increases the bargaining ability of small

shippers. Small shippers representing fruit and vegetable exporters and many kinds of importers are prominent among the supporters of this bill because they know it will, in fact, give them a better deal than they have at the present time. It is in order to create greater competition that this bill is here.

If the Senator from Ohio succeeds in killing this bill, it will result in the same kind of noncompetitive conditions we have been going through in the last few years. We offer more, not less, in the way of competition.

The PRESIDING OFFICER. Who yields time?

The Senator from Ohio.

Mr. METZENBAUM. Mr. President, if the Senator from Washington is prepared to yield back his time, I am prepared to do so and ask for the yeas and nays on the amendment.

Mr. GORTON. The Senator from Washington is prepared to yield back his time.

Mr. METZENBAUM. I am prepared to yield back my time.

I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time has been yielded back. The question is on agreeing to the amendment of the Senator from Ohio. The yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Mississippi (Mr. COCHRAN) and the Senator from Kansas (Mr. DOLE) are necessarily absent.

I also announce that the Senator from Alaska (Mr. MURKOWSKI) is absent due to the death of a relative.

I further announce that, if present and voting, the Senator from Alaska (Mr. MURKOWSKI) would vote "nay."

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN) and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

The PRESIDING OFFICER (Mr. ABDNOR). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 24, nays 71, as follows:

[Rollcall Vote No. 5 Leg.]

YEAS—24

Baucus	Hatch	Metzenbaum
Biden	Hawkins	Nickles
Bingaman	Helms	Percy
Boren	Humphrey	Proxmire
Bumpers	Kennedy	Roth
Dixon	Leahy	Specter
Dodd	Levin	Thurmond
East	Mathias	Tsongas

NAYS—71

Abdnor	Bradley	Cranston
Andrews	Burdick	D'Amato
Armstrong	Byrd, Robert C.	Danforth
Baker	Chafee	DeConcini
Bentsen	Chiles	Denton
Boschwitz	Cohen	Domenici
Durenberger	Johnston	Quayle
Eagleton	Kassebaum	Randolph
Exon	Kasten	Riegle
Ford	Lautenberg	Rudman
Garn	Laxalt	Sarbanes
Goldwater	Long	Sasser
Gorton	Lugar	Simpson
Grassley	Matsunaga	Stafford
Hart	Mattingly	Stevens
Hatfield	McClure	Symms
Hecht	Melcher	Tower
Heflin	Mitchell	Trible
Heinz	Moynihan	Wallop
Hollings	Nunn	Warner
Huddleston	Packwood	Weicker
Inouye	Pell	Wilson
Jackson	Pressler	Zorinsky
Jepsen	Pryor	

NOT VOTING—5

Cochran	Glenn	Stennis
Dole	Murkowski	

So the amendment (UP No. 22) was rejected.

Mr. GORTON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 23

(Purpose: To exempt certain market development or export activities of the Commodity Credit Corporation from the cargo preference laws)

Mr. BOSCHWITZ. Mr. President, I sent an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Minnesota (Mr. BOSCHWITZ) proposes an unprinted amendment No. 23.

Mr. BOSCHWITZ. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 109, between lines 10 and 11, insert the following new section:

"SEC. 22. CARGO PREFERENCE.

"Section 901(b) of the Merchant Marine Act of 1936, as amended (46 U.S.C. 1251(b)) shall not apply to the market development of export activities of the Commodity Credit Corporation under which commercial credit guarantees are blended with direct interest free credits from the Commodity Credit Corporation."

On page 109, line 11, strike out "22" and insert in lieu thereof "23".

Mr. BOSCHWITZ. Mr. President, I introduce this amendment on behalf of myself, Senators LEAHY, JEPSEN, PRYOR, GRASSLEY, BOREN, DANFORTH, ABDNOR, LUGAR, KASSEBAUM, DURENBERGER, ROTH, QUAYLE, EAST, PRESSLER, NICKLES, and HELMS.

I yield to the distinguished chairman of the Agriculture Committee at this moment.

Mr. HELMS. Mr. President, I thank the able Senator.

Mr. President, the Senator from Minnesota is exactly right in what he is seeking to accomplish with this amendment. Whether he intends to pursue it or not I do not know. But I do want the record to show that in the judgment of the Senator from North Carolina Senator BOSCHWITZ is making no effort to alter the fundamental application of the cargo preference provisions of law to the export of agricultural commodities under Public Law 480, the food-for-peace program.

Instead, he seeks to assure that the application of these provisions do not interfere with the ability of the United States to deal effectively with the predatory trade practices of those nations who are using export subsidies to beggar the American farmer.

Most Senators are aware of the massive export subsidies employed by the European Economic Community and other nations. The Committee on Agriculture, Nutrition, and Forestry conducted 2 days of hearings on this subject last month; and, we shall conduct a markup session tomorrow on more than a dozen bills which seek to restore equity to the trade in agricultural commodities and products.

The application of the cargo preference provisions to the various efforts being made by the administration to expand U.S. agricultural exports in the face of the EEC subsidies would be to undermine their effectiveness, and in many ways negate them completely. And, it would undermine our efforts in the Congress.

That would be very unfortunate, indeed.

I appreciate the Senator's yielding to me.

Mr. BOREN. Mr. President, will the Senator yield?

Mr. BOSCHWITZ. I yield to the Senator from Oklahoma.

Mr. BOREN. Mr. President, I am pleased to join the distinguished Senator from Minnesota in offering this amendment. At a time when we are losing our export markets due to the unfair subsidies of other countries, we simply cannot afford to adopt any policy that would decrease the volume of our exports. Further, any policy that artificially restrains our grain exports will be counterproductive to the economic recovery of agriculture, as well as counterproductive to the economic recovery of this Nation as a whole.

During fiscal year 1982, U.S. farm product exports dropped for the first time in 13 years. Export volume declined by 2 percent from the previous year and the value of these exports fell 11 percent. It now appears that exports will also decline this year. In wheat exports alone, the 1982-83 estimate is only 1.5 billion bushels, nearly 15 percent below the 1981-82 record.

The U.S. flour sale to Egypt was largely an attempt to try to regain some of our lost flour markets. But, the requirement that 50 percent of this sale be transported by U.S.-flag

vessels will raise the cost of this sale by about $30 million. That $30 million could have meant that $30 million more in commodities would have been exported. Cargo preference for wheat normally adds an additional expense of $1.28 per bushel of wheat. This $1.28 per bushel could be used to buy more wheat.

In fiscal year 1982, almost $110 million was spent for cargo preference differentials out of Public Law 480 funds. We could have exported an additional $110 million in commodities with this money.

If our Nation is going to subsidize the maritime industry, it should not be funded out of the funds budgeted for agriculture. In my opinion, if Congress feels so strongly about protecting the maritime industry, then let the Transportation Department pay for it—let us put cargo preference under the Transportation budget, not the Agriculture budget. If we are not going to do this, the least we can do is exclude the blended credit program, export PIK program, and the wheat flour sale to Egypt from the cargo preference requirement.

I urge my colleagues to join us in supporting the amendment offered by Senator BOSCHWITZ.

I thank the Senator from Minnesota for yielding to me.

Mr. BOSCHWITZ. Mr. President, the Senator from Oklahoma has touched exactly on the problems that I am trying to correct by virtue of the amendment that I am offering and the amendment I am offering deals with cargo preference and deals with the applicability of cargo preference to the new means of export that we are entertaining and using particularly in agricultural products.

Mr. President, in 1981 agricultural exports totaled $44 billion and in 1982 they totaled $39 billion, and it is estimated that in this year the agricultural exports will once again decrease to the range of $36 billion or $37 billion, which is not exactly clear. But agricultural exports are not doing well at a time when the farm economy is really in difficult shape.

Of course, the lack of agricultural exports is not an insubstantial part of the farmers' problem.

Mr. President, the cargo preference rules mean, of course, that 50 percent of a shipment which is Government-generated cargo, as they are called, 50 percent of those cargoes have to be shipped on American bottoms and that has been a very deep penalty indeed.

Take, for example, the wheat flour shipment that is now being shipped to Egypt, and my amendment would not include removing cargo preference rules from that shipment, but in March of last year a similar shipment was made to Egypt from Beaumont, Tex., and the difference between the freight rate that was charged on cargo preference was $65.50. In other words, the going market rate was $42.50 per long ton, and the cargo preference rate that applied was $108 a long ton or, as I said, a $65.50 difference. That is 154-percent difference. That is a difference of $1.28 a bushel and, Mr. President, we all understand what the difference of 5 or 10 cents a bushel means with respect to exports. It means that we simply would not make the export if our price was that much higher than our competitors'.

Therefore, the cargo preference rules are a set of rules that are indeed almost prohibitive to the export of American agricultural products.

Of course, we have had the issue here on the floor before in conjunction with Public Law 480. Cargo preference in the case of Public Law 480 costs about $100 million a year. As my distinguished colleague from Missouri pointed out in a debate that took place a year and a half ago, $100 million would feed 8 million people during the course of the year, would be many millions of tons of grain and indeed would make a difference in the lives of millions of people around the Earth.

One hundred million dollars is a penalty that the Public Law 480 program pays. It is $100 million that is part of the agricultural budget and yet really benefits the merchant marine and this has no impact other than the negative impact on agriculture.

Mr. President, the argument is made, of course, that cargo preference preserves our fleet. The argument is appallingly made that the cargo preference preserves our fleet in times of emergencies. During the time of Vietnam we could not find ships to go there.

I point out, as I pointed out in our earlier debate, that most of the ships that we are preserving are ships built in the 1940's. There are very few ships of modern vintage.

However, in the course of talking about this amendment to the Department of Transportation and others, I understand that steps are being taken to update the American merchant marine so that we are not preserving a bunch of old tubs but indeed are preserving something that would be useful in the event of an emergency.

Indeed, one such ship, the *Marine Electric*, recently was a boat that was torn apart by the seas and that sank off Bermuda at the loss of 30 or 40 lives.

That is the second time that a ship of that vintage carrying a cargo preference cargo as that ship was at the time has sunk.

The other one is the *Poet* that just disappeared without any trace whatsoever.

The *Marine Electric* was a ship that was built in 1944. It was one of them that we were preserving.

In any case, Mr. President, I have become convinced over the course of the presentation of this amendment—without much effort we got 15 or 18 cosponsors—I believe that my amendment would have had a very good chance of passing. But it is also clear that the Department of Transportation is interested in discussing the matter further and that it is also clear that we have a chance of perhaps a better forum than this and perhaps a better bill than this to discuss and develop the idea of cargo preference once again.

● Mr. ABDNOR. Mr. President, too often in debating the merits or shortcomings of legislation, law, or policy, we talk in terms of potential, expected or theoretical impacts. Not so concerning the application of cargo preference to the export shipment of agricultural products arranged through Government assistance and promotion.

The recent sale of 1 million metric tons of flour to Eygpt is a timely and excellent example. The application of cargo preference to just this one shipment will cost the U.S. taxpayer $30 million in shipping subsidies. These subsidies will very likely force the Department of Agriculture to scale back its export promotion efforts at a time of widespread distress in U.S. farming; $30 million used as direct credit in the blended-credit program would generate $150 million of export sales. According to Department of Agriculture estimates these sales of $150 million would create over 5,000 desperately needed jobs.

Mr. President I fully appreciate the need for a strong U.S. merchant marine. But if this country seriously intends to remain competitive in the world agricultural market. The Boschwitz amendment must succeed.●

● Mrs. KASSEBAUM. Mr. President, I am concerned that our urgently needed commercial export sales initiatives will be wrecked by any new shipping restrictions which might be placed on the agricultural commodities being offered under the U.S. Department of Agriculture's blended credit program which may be authorized by Congress in the coming months. I support the efforts of my colleague from Minnesota today to exclude these programs from any restrictions such as cargo preference.

The United States is in serious trouble with agricultural exports—and the problem comes largely from unfair export subsidies offered by the European Economic Community and other grain exporting nations. Export initiatives such as the blended credit program are a necessary tool to show these other nations that the United States is serious about retaining our large export volume and our place in world trade. If we have any chance of doing this, it is now. We have signed

blended credit agreements with several countries which need and want our wheat, corn, soybeans, and other commodities. The key reason they are buying from us is price. These commercial sales initiatives must remain competitive.

By offering a package of blended credits to importing nations, we effectively lower the cost of U.S. commodities an average of $4 per ton, and make them more attractive in world markets. If the administration requires that a share of the goods must be shipped on expensive U.S.-flag vessels, it automatically increases the cost of our agricultural commodities an additional $25 per ton. We have then effectively priced ourselves out of the very markets we are trying to win back. There is no reason to offer an ineffective program or commit ourselves to combating unfair export subsidies of our competition if we tie ourselves up with counterproductive restrictions.

The President has made a policy decision to extend the same kind of shipping restrictions, or cargo preference for U.S.-flag vessels to our wheat flour sales agreement with Egypt. It is too late to take issue with that decision but I think we must make it very clear to the Members of this body, as well as the administration, that similar shipping restrictions would totally undermine the blended credit program.

Cargo preference restrictions are a longstanding part of the Public Law 480 shipments. We are not here today to discuss the merits of that situation, or how it might be changed. But I want to make the point that there are major differences between concessional sales under Public Law 480 and export initiatives such as blended credit.

There is no legal precedent for placing cargo preference restrictions on blended credit. Our blended credit dollars will go further and allow more U.S. grain to be exported if cargo restrictions are not put into effect. If we decide additional measures are needed to aid the U.S. maritime industry, it should not be done at the expense of agricultural export programs and the rest of the economy.

If 50 percent of the agricultural commodities offered through blended credit and export-PIK agreements must be shipped on U.S.-flag vessels, it effectively increases the cost of our grain and reduces the volume which could be exported under these agreements. Each billion dollars of grain exports creates 30,000 jobs in this Nation and helps the economic recovery. Not only would these shipping restrictions be counterproductive to reducing our burdensome agricultural surpluses, but they will have a negative impact on the rest of our economy.

I am deeply concerned that an extension of cargo preference requirements to areas beyond concessional food shipments would be bad not only for farmers and domestic grain handlers, but for the entire shipping industry because of the potential loss of sales. No American will benefit from a policy that sets us back in world trade and aids our competition.●

Mr. PRESSLER. Mr. President, I rise in support of this amendment, of which I am a cosponsor, and urge my colleagues to join me in support of this effort to exempt blended credit and export PIK agricultural sales from the cargo preference treatment. Passage of this amendment is essential to American farmers and to increasing agricultural exports.

Farm income has declined for the last 3 years and 1982 was the first time in over a decade that U.S. farm exports declined. With almost one-third of all farm crops produced in the United States exported, and farm exports totaling approximately 40 billion, the success of our agricultural exports has a direct impact on domestic farm prices and the U.S. economy. As a result of the crisis in the farm economy, reductions in agricultural exports and export subsidy activities of foreign nations, the administration has announced the blended credit program and Congress is considering an export PIK to help American farmers compete on the world market. However, if the cargo preference treatment is required on these programs, the increased shipping cost will defeat the purpose of the export promotion programs. With the cargo preference in effect, the export PIK payment or the percentage of the blended credit program will have to be increased to make many of the agricultural export sales that are being considered.

An example of the impact of the cargo preference treatment on the blended credit program is the wheat flour sale to Egypt. It is estimated that, due to the increased shipping cost, the Commodity Credit Corporation would have to make an additional 9 million bushels available to Egypt to meet the terms of the sale. A 25-percent increase in the amount of wheat sold at the same cost translates into a substantial price reduction and additional cost to the American taxpayer.

The American farmer is the most efficient in the world and can compete with anyone on a fair market, but with foreign nations using export subsidies to unfairly compete, and the U.S. requiring 50 percent of the products to be transported on much more costly U.S. ships, it is very hard for the American farmer to remain competitive.

If the farm export programs are to be successful and increase agricultural exports, these programs must be exempt from cargo preference requirements.

Mr. President, I urge my colleagues to join me in support of this amendment.

Mr. BOSCHWITZ. Mr. President, I yield 3 minutes to my colleague from Iowa.

Mr. JEPSEN. Mr. President, today we are debating an issue of great importance to the future of our agricultural economy, and I congratulate and commend Senator BOSCHWITZ for his leadership in spearheading the activity in this area. For the health of our Nation's farm economy and the long-term survivability of our agricultural sector, we need to insure an export policy that does not unnecessarily complicate the movement of our agricultural goods overseas.

On February 22, the administration decided that the recent 1 million metric ton sale of wheat flour to Egypt would travel under cargo preference treatment. Under cargo preference treatment, at least 50 percent of an export commodity must be shipped on U.S.-flag vessels. USDA would be required to pay the difference between the relatively low rates charged by ships of foreign nations and the much higher rates charged by U.S. firms. In this particular instance and as it regards agricultural products, I do not agree with that decision.

This amendment to exempt export PIK sales must be strongly supported, and it is my hope that things will be worked out some other time if not today.

Cargo preference should not dictate U.S. trade policy. It is time to stop the threat of cargo preference for export PIK and blended credit—two programs needed to combat the predatory export subsidy practices of our competitors. And it is grossly unfair to ask American farmers and USDA to pay the costs of subsidizing the U.S. merchant fleet at a time when agriculture is in the midst of troubled economic times.

I would hope, Mr. President, and will the Senator from Minnesota yield for a question——

Mr. BOSCHWITZ. Yes; I yield for a question.

Mr. JEPSEN. Has the Senator received any assurances, indications that we can address this problem effectively and immediately in some other way?

Mr. BOSCHWITZ. The Senator is a member with me of the Committee on Agriculture. As he knows, we are going to address some of those problems rather quickly soon, and we can perhaps take this matter up more efficiently at that time.

Mr. JEPSEN. If that is the direction we should take, I will follow the Senator's leadership. He has given good leadership to date, and I expect also to continue to receive that. I thank the Senator.

Mr. BOSCHWITZ. I thank the Senator from Iowa.

Mr. President, I ask unanimous consent that Senator HAWKINS from Florida be added as a cosponsor as well.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BOSCHWITZ. Mr. President, I reserve the remainder of my time.

Mr. GORTON. Mr. President, I want to offer my gratitude to my close friend, the Senator from Minnesota, who first presented me with an amendment last evening somewhat similar to the one which he has just proposed.

As he knows, the amendment is technically nongermane to this bill as this bill does not deal with the promotional aspects of merchant marine policy, but merely with its regulatory aspects.

The Senator from Minnesota also knows that I have some very real sympathies with him in some of the goals which he is attempting to reach through the presentation of this amendment. During the course of the 97th Congress he and I were on opposite sides of a number of attempts to either repeal the preference elements of Public Law 480 or to at least put a limit on those elements.

He knows that while I feel it appropriate to preserve present cargo preference laws, I have not been active in any attempts to expand or to increase them.

The Senator from Minnesota also knows that I do not wish in any way to subvert or to harm the prospects of the United States in selling agricultural commodities overseas. That kind of sale is going to be every bit as beneficial to my own constituents in the State of Washington as it will be to those of the Senator from Minnesota.

We attempted to come up with something, working frantically while debate was going on on other amendments, which could do this. I am sympathetic, but in the absence of hearings on the subject dealing specifically with new programs, such as PIK, we were unable to reach that kind of accommodation at this point.

I would simply want to thank the Senator from Minnesota for bringing this matter to our attention, for not pressing it to a vote on a bill which is already controversial, and to assure him, as he already knows, that I do have a great deal of sympathy with some elements of what he is trying to do in order to strike an appropriate balance preserving the merchant marine but granting the maximum possible ability to all of our farmers and agriculturalists to sell as much of their commodities overseas as possible.

I can assure him I will try to help him reach that goal in the future.

Mr. BOSCHWITZ. I thank the distinguished Senator from Washington. He states very well the goal we are trying to achieve, which is the broad exportability with respect to agricultural products—indeed with respect to all products—so although the cargo preference provisions apply principally to agricultural products, we are not trying to constrict the application of the cargo preference rules. It is just their expansion that we are concerned with.

Mr. President, unless there are further comments I withdraw my amendment at this time and then yield back the remainder of my time.

The PRESIDING OFFICER. Without objection, the amendment is withdrawn.

Mr. GORTON. Mr. President, what is the question before the Senate?

The PRESIDING OFFICER. Under the previous order, there will now be 40 minutes of debate evenly divided on the question of passage of the bill.

Mr. GORTON. The Senators do not need to yield back any time remaining when an amendment is withdrawn, is that correct?

The PRESIDING OFFICER. That is correct.

Mr. GORTON. Mr. President, we have now reached debate on the final passage of S. 47, the Ocean Shipping Act of 1983. I do not believe I will require a great deal of time on this subject as essentially the entire debate, both on the motion to take up the bill and on the various amendments, has dealt with the bill itself.

Suffice it to say that the purpose of the bill is outlined in the committee report in the following words, which are as applicable to the bill as it appears before us now as they were to that subject when it was reported from the Commerce Committee.

> The Shipping Act of 1983 revises the Shipping Act, 1916, to provide an updated, simplified, more efficient, responsive, and effective regulatory scheme for international liner shipping. The paramount objective of this regulatory scheme is to develop and maintain an efficient and flexible ocean transportation system through commercial means, with minimum Government involvement, in order to better serve the needs of U.S. foreign commerce.
>
> The Committee believes the time is ripe to revise the principal maritime regulatory statute, the Shipping Act, 1916, in order to:
>
> (1) end the uncertainty and delay that surrounds U.S. Government regulation of ocean liner shipping, by providing a predictable legal regime and streamlined regulatory process administered and enforced by a single independent Federal agency (the Federal Maritime Commission (FMC)).
>
> (2) harmonize U.S. shipping practices with those of our major trading partners, especially by reaffirming antitrust immunity for certain carrier and conference activities.
>
> (3) equalize Federal regulatory and judicial treatment of U.S.- and foreign-flag carriers.
>
> (4) provide both large and small shippers with a responsive and flexible, as well as predictable, ocean transportation common carrier services.
>
> (5) allow carriers and shippers to take advantage of the technological advances in ocean liner shipping and intermodal transportation which have developed since 1916.
>
> (6) maintain a system of free trade and access by U.S. carriers to foreign trades.
>
> It has always been the intention of the Committee to balance the needs of carriers and shippers. While the U.S. liner fleet is an essential component of our economic and national defense structure, shippers are the backbone of our economy. Practically speaking a shipper is the consumer of ocean shipping services. They are exporters and importers who range from an association of small orchardists who seek to export a relatively few containers of fruit each year, to automobile and chemical manufacturers, upon whom hundreds of thousands depend for employment. Also closely tied to the shipper concerns are the nation's ports, whose interests are best served by a large and steady flow of commerce.
>
> Thus the Committee has consistently sought to reconcile the naturally conflicting interests of shippers and carriers, and is particularly proud of achieving the appropriate balance the fact that shippers—the consumers of ocean services, employers, manufacturers, agricultural and timber producers—believe this bill will benefit themselves, suggests significant benefits to the nation's economy as a whole.

I simply wish to reemphasize points I made in the debate relative to the last of the amendments of the Senator from Ohio. This bill does not bring perfect competition into the maritime international trades of the United States of America. It is not possible to do so because other nations, which are our trading partners, would seriously resist any such regime.

It does, however, move significantly toward more open competition than has existed in the past and toward a more predictable legal system which allows the carriers and shippers to concentrate on one set of laws applicable to all. It will, I am convinced, result in more efficient ocean transportation and in lower prices than would otherwise be the case for ocean shippers and international commerce.

It is a proposal which was drafted in consultation with all of the interest groups affected by international trade by ocean. It has, I must say, been improved by the amendments of the distinguished Senator from South Carolina on behalf of the Judiciary Committee, and the hard-working and distinguished Senator from Utah (Mr. HATCH).

The net result of those amendments is to add another degree of competition into a bill which was already more competitive than is the current regime.

Therefore, it deserves the support of the vast majority of the Members of this body just as it has the support of the vast majority not only of the suppliers of these services but of the consumers of these services as well.

Mr. STEVENS addressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I want to congratulate the Senator from Washington (Mr. GORTON) and the Senator from Hawaii (Mr. INOUYE) for their work on this bill. It is a bill that streamlines Federal regulation of the U.S. maritime industry. It is nothing new that the United States has exempted ocean common carriers from antitrust liability for many price-negotiating functions of this industry since 1916.

Very little mention has been made here on the floor of a compromise provision that I have offered and the Senate has adopted which will allow customers who ship less than 30 containers a month to consolidate their cargo in order to negotiate better terms with the major shippers. That means that small businesses will have the ability to have some economic clout in this business.

It is going to protect, I think, some of the growing industries on our domestic scene, particularly the fishing industry, which should benefit from that provision.

In any event, the passage of this bill will provide for a more efficient operation of our U.S. shipping industry.

I believe the comments the Senator from Washington made about the additions suggested by the Judiciary Committee are correct. The Judiciary Committee and Senator HATCH have offered amendments which have now been worked out here on the floor to the benefit, I think, of all concerned. The bill is now in condition to go to the House and have a meaningful conference with the House, once the House has passed the bill. The other body did pass the bill twice last year so I would anticipate that we will see this bill back very quickly and, hopefully, we will act early this year on sending the bill to the President.

I hope everyone keeps in mind that it should be a bill that the President can and will sign in order to modernize these provisions of existing law which pertain to U.S. Government regulation of our domestic shipping industry and the portion of the trade involved in international commerce.

Again, Mr. President, I thank the Senator from Washington and the Senator from Hawaii for their assistance.

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. I yield to Senator INOUYE such time as he may wish.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. Mr. President, this is the culmination of 7 years of work by the Senate Committee on Commerce. It has involved many, many days of hearings, thousands of words of testimony, and several committee reports.

At this time, I would like to commend the senior Senator from Alaska and the junior Senator from Washington for their superb management of this measure. This day we will take a small but important step in the revitalization of our maritime industry. I pray that my colleagues will support this with an overwhelming vote because I feel that this measure is deserving of such support.

Mr. President, as all of us are aware, whatever work is done on the floor of the Senate represents many, many hours of work done by the staff. So at this time I would like to pay my respects and extend the gratitude of the committee to Bill Phillips, Peter Friedman, Cassie Phillips, Ward White, Ralph Everett, Liz Tankersley, John Hardy and Curley Dossman. To them goes our gratitude.

I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. HATCH addressed the Chair.

Mr. METZENBAUM. How much time remains to the opponents?

The PRESIDING OFFICER. The opponents have 18 minutes.

Mr. METZENBAUM. The opponents have not yet been heard from.

Mr. GORTON. Only the proponents have spoken thus far.

Mr. METZENBAUM. Mr. President, I am not sure if I am in control of the time, but if I am, I yield 10 minutes to my friend from Utah.

The PRESIDING OFFICER. The Senator from Utah.

Mr. HATCH. Mr. President, I would like to express my opposition to final passage of the bill. The heart of my concern over this bill is the way in which it impedes free enterprise. As a basic economic policy, the Congress of the United States has time and time again rejected the notion of giving control of commerce to private cartels. We have viewed our antitrust laws as a practical expression of our concern for economic democracy, and have actively sought to insure the efficient operation of these laws.

In part, our antitrust laws are designed to prevent individuals or firms from so controlling a part of commerce that they are able to substitute that control for the independent allocation of resources achieved by a competitive marketplace.

The bill before us strikes at these protections of our economic democracy. It permits an industry to cartelize, while granting the industry sweeping antitrust immunities. It is not without reason that our laws have created a presumption against the policy of permitting cartels. Cartels, by their very nature, promote price fixing conspiracy. Fixed prices discourage—and, I might add, disparage—competition, and, without competition, inevitably consumers suffer.

Mr. President, this bill is designed to reduce competition among carriers. It is designed to permit conduct which, in other industries, would subject perpetrators to civil and criminal penalties.

Based on the testimony of witnesses appearing before the Senate Commerce Committee and the Senate Judiciary Committee, and based on studies issued by the General Accounting Office and the House Republican Research Committee, I am not persuaded that circumstances in the shipping industry are so unique that carriers should be exempt from the greatest of our consumer protection laws, our antitrust laws.

Mr. President, just yesterday, I believe, I referred to the testimony of Mr. Allen Ferguson, chairman of the National Institute of Economics of law, who testified that S. 47 can be expected to impose a cost of some billions of dollars per year on American consumers, farmers, workers, and exporters.

Some of that has been remedied by some of the amendments on this day, and I want to congratulate the managers of the bill for their willingness to compromise and to work on some of these matters of concern. But I still feel that the bill fails in its basic protections that I think are necessary for those who constitute consumers, and others, in our society today.

My concern, Mr. President, is over the increased prices of imported goods which will be paid by consumers all over this country, and in my State of Utah as well. My deep concern is over the increased costs farmers of Utah and of every other State will pay to ship their produce. Mr. President, these are increased costs which history, not theory, tells us will result from the operations of monopolistic power. My concern is over the increased costs of carriage which will be charged to the small shippers of Utah and of every other State.

I do not know how anybody can argue that once you allow cartelization of an industry this important that you will not entrench other problems within the industry, including featherbedding, including high costs, including the hiding of certain costs that literally should not be passed on to consumers.

I believe that this bill as written, even as amended, with the protections we have tried to build into it, still falls far short of what we should be doing for the consumers of America, for the shippers and even for the shipping lines of America.

Mr. President, I appreciate the opportunity which I have had to address my concerns over this bill. In earlier days, the Supreme Court rightly noted that our antitrust laws are the Magna Carta of the American free enterprise system. I do not always agree with the antitrust laws; I think people in this body know that. I have had difficulties with the Illinois Brick case, I have had

difficulties with a wide variety of other applications, proposals, or even so-called reforms of the antitrust laws. As a member of the Antitrust Laws and Procedures Commission, I argued, I think strongly, for some changes in the antitrust laws. In this particular case, I think these antitrust laws really are the Magna Carta of the American free enterprise system. To suspend these laws, especially in this way, is a matter of grave import.

Mr. President, I might add it is only with the threat of grave consequences that such an act should be undertaken. I do not believe the advocates of this bill have created a presumption favoring the suspension of our antitrust laws, certainly not to the degree embodied in S. 47.

Mr. President, this bill subsidizes an overly subsidized industry. It is anticompetitive, it is antifree enterprise, it is anticonsumer. For these reasons, I have to oppose S. 47 in its present form.

The PRESIDING OFFICER. Who yields time?

The Senator from Ohio.

Mr. METZENBAUM. Mr President, how much time is left?

The PRESIDING OFFICER. Fourteen minutes and fifty seconds.

Mr. METZENBAUM. Mr. President, I have heretofore addressed myself to the antitrust aspects of this bill, but I should like to talk for a moment about the pooling aspects and the loyalty contracts. Prior to doing so, let me commend the distinguished Senator from Utah for his very perceptive observations about the negatives of this bill and its impact upon our system of government.

The pooling provided for in this bill is simple. I want my colleagues to hear what I am saying. Under this bill, the shipowners may pool their revenues. They may take all their revenues and put them together. Then they may divide them. That means, in essence, the following.

That means that if there is one independent shipowner that wants to provide service from some point in Africa or some point in England to the United States and comes in with a rate that is 20-percent lower than the cartel rate, under pooling, those in the pool could make it possible for one of their members to lowball that competitor. That means that he may go out and say, "Instead of 20 percent, we will reduce the rate 25 percent, or 30 percent," and drive that competitor out of business.

The argument is made that this bill prohibits predatory pricing. True, if you can prove it and if you have the financial ability to stay in the ball game long enough for a series of hearings to go on and for you then to prevail maybe 5 years down the road.

How anybody in the U.S. Senate can agree that it is right for a group of shipowners to pool their revenues to permit them to lowball and drive out free competition, an independent, and then say they are for the free enterprise system is beyond my comprehension. Even the Federal Maritime Commission says that pooling is "the ultimate anticompetitive combination." Even the Federal Maritime Commission says that.

Then there is another part of this bill that should be given heed by my colleagues in the Senate. That permits loyalty contracts. A loyalty contract is simple. The shipper says, "I do solemnly swear," or however they say it, "that I agree that you will have all my business and nobody else will get my business. I will do business with you, the cartel."

"Oh, but," they say, "there is some possibility for free competition in this bill, do not say there is not." It permits all of 5 percent for noncartel competitors.

What kind of craziness is this? Do we not believe in free competition? Where have you been? What are you doing with yourself? How can you possibly be for this bill to permit competition to be eliminated and still say you believe in the free enterprise system? How can you go out and make speeches to your constituents and tell them how great the American business scene is because it permits free competitive forces to work and you want to get Government off the backs of business, and then provide that business itself may be on the backs of other business persons?

I am proud of the fact that there are some Members on that side of the aisle whom we would normally consider to be conservatives, who have indeed seen what this bill is all about. I am proud of the fact that, on the last vote having to do with the antitrust exemption, such distinguished Members as Senator EAST, Senator HATCH, Senator HAWKINS, Senator HELMS, Senator HUMPHREY, Senator NICKLES, Senator ROTH, Senator THURMOND, and others recognize the implications of an exemption from the Antitrust Act.

What about the rest of you? Do you not understand what this bill is doing? Do you not believe that people ought to have the right to operate a ship without being driven out of business by a cartel? Either you are for free enterprise or you are for this bill.

I have seen votes in the past which indicate to me that most people just do not understand.

Mr. President, how much time do I have left?

The PRESIDING OFFICER. Eight minutes and fifteen seconds.

Mr. METZENBAUM. I thank the Chair.

I understand certain measures when they come to the floor of the Senate, like gas deregulation, certain measures which perhaps have to do with strong views with respect to spending measures, abortion measures, various and sundry other kinds of measures, jobs bills—I understand how people can take different points of view. But for the life of me, I cannot understand how my colleagues are today voting to protect cartels and against free enterprise. I can only believe that they do not understand what is in this bill or that they have suddenly changed their minds about our system of government. If you want a system that has locked-in prices, fixed prices, and where no competition can work, you can find a lot of those systems around this world. Some of them are the Socialist republics, the Communist republics, the dictatorships. They all have a kind of locked-in arrangement. But we pride ourselves on the fact that we are free and the competitive forces are permitted to work in a free manner.

No; the absurdity of this bill that is before us this afternoon goes even further. We are authorizing in this bill special antitrust exemption for cartels 82 to 85 percent of whose members are not Americans, are foreign-owned ships. They carry 72 percent of all of the cargo in the U.S. trades.

Do you not read the legislation? Do you not understand what you are doing? If you provide an exemption for the shipping industry, how can you justify the further implementation of our antitrust laws with respect to any other segment of our economy?

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. Mr. President, I find that a very rude statement regarding the foreign shipping interests. I find it interesting that as we try to find a way to bring back to the domestic industry a portion of this very trade the Senator from Ohio mentions, and put American shipping and American seamen back to work, we have a situation in which the foreign competitors of the U.S. merchant marine have no regulation. They do not have antitrust concepts. They do not have people coming in and saying you must live up to the competitive concepts of free enterprise.

We have to find a way to compete with those people, and we have done it since 1916. We are really not starting something new. A person listening to the Senator from Ohio today would think, "My God, do you realize that the U.S. Senate is about to pass a bill that is contrary to private enterprise?"

He completely overlooks the fact that we have been trying to get this bill passed now for 6 years. It passed the House twice in the last session of Congress, once on the Consent Calen-

dar and once on the basis of at least a 10-to-1 margin.

How some people at the very last minute can discover the antitrust law and say, "What is going on here; we are about to exempt a substantial portion of American business from the antitrust law," is beyond me. We have in fact exempted this industry from the antitrust laws in the past, and we are refining that area of exemption now. It is high time we did because the statistics that the Senator from Ohio mentioned demonstrate that more and more of the foreign operators are coming into our market, more and more we are losing our capability to have a domestic shipping industry that can be involved in both domestic and international trade.

Now, Mr. President, the real problem with this bill so far as I am concerned is that we really have not gone far enough. The problem is that we want to create a new climate as we did in the civil aviation area. I wonder how many Members of the Senate remember that when we deregulated civil aviation in this country we kept the regulation of carriers involved in foreign trade. That same concept is involved here. We are trying to find a way to lessen the impact of the regulation of our Government on an industry that must compete with foreign shipping which, by the way, is often owned by foreign governments that impose absolutely no regulation.

It seems to me the real problem the Senator from Ohio has is that he does not really understand what keeps the country going. It is domestic private enterprise that keeps this country going.

When witnesses came before the Commerce Committee to testify, do you know who they were? They were representing the interest of foreign carriers that opposed this bill. And to hear these comments on the floor of the Senate, you would think that somehow or other the people who are opposing this bill are representing U.S. consumers, U.S. shippers. They are not.

I come from a State that has no shipping interest involved. We are served by the carriers involved. We know what happens when a monopoly exists and the foreign carriers drive out of maritime commerce the domestic ship lines that have served us so well. Every time one of them folds up, our rates go up. We want a healthy domestic maritime industry that is capable both in the domestic and in the international scene of maintaining continuity of shipping at the fairest price possible in view of the arbitrary practices of their foreign competitors.

Mr. President, let me close by just saying this: The changes that we have in this bill will not result in higher prices to consumers in this country or hurt U.S. exports. Ocean shipping is still the cheapest method of transporting goods and it will continue to be so. This bill does not change the ratemaking authority of shipping conferences but merely seeks to make the process more efficient and predictable. Congress gave shipping conferences the right to set rates collectively over 65 years ago. If this bill does not pass, that authority is still on the books. The Senator from Ohio has not suggested repealing it. What we are really doing is to make this regulatory system more efficient. During the years 1952 to 1962, when the regulatory system was structured much the same way that it will be if this bill passes, ocean shipping prices were very stable and rose less than the prices of commodities being transported. After the House maritime regulatary reform bill passed during the last Congress, the executive vice president of the National Industrial Traffic League said:

> We are vey pleased with this legislation. It is balanced and it protects the United States producers of goods who are the direct consumers of maritime services. It should help revitalize the maritime industry and help producers protect and develop markets.

It is extremely unfortunate that we hear comments made on the floor that indicate there is going to be an increase to the consumer if this bill passes. Nothing could be further from the truth, Mr. President. As a matter of fact, all the direct consumers of shipping services—the shippers that appeared before Congress, either on the House side or this side, supported this bill. It was the foreign providers of the services that opposed this bill. I think that point ought to be made loud and clear. We are making for greater efficiency in the use of the vessels and their capacity utilization, and we are making for greater price competition. That will lower the costs. And by virtue of the one item I mentioned that will allow small shippers to consolidate, that, too, is going to lower the costs for people who live out at the ends of the shipping system. Go to Fairbanks, Alaska, and ask them whether they want this bill to pass. They understand shipping rates and they understand them full well. They pay for every inch of that transportation, and they ship very little out.

We know what having a regulatory system means to shipping costs. We are trying to reduce the impact of that regulatory regime on the industry so that it can reduce prices and increase efficiency and services to the American public with domestic maritime interests being in the forefront of that objective.

I thank the Chair.

Mr. KASTEN. Mr. President, I rise in support of S. 47, a bill that will accomplish the much-needed reform of the Shipping Act of 1916. Our regulatory laws governing ocean liner shipping are outmoded and burdensome to an industry which is vital to the economic health and to the defense of the United States.

Reform of the regulations governing the U.S. liner industry has been the subject of intensive study and hearings over the past few years. There is a general recognition that reform is necessary. There has been participation and support from a broad spectrum of interested groups including representatives from U.S. and foreign flag lines, large and small shippers, and, most notably, from Federal Maritime Commission Chairman Alan Green.

Currently, the U.S.-flagged vessels operated at a disadvantage because our Government seeks to impose rules that cannot be imposed on foreign-flagged vessels. Partly because of this disadvantage, the business controlled by U.S. companies has decreased dramatically. In the Great Lakes, for example, the maritime business is in dire straits. Alone, this bill will not correct all the Great Lake shipping problems, but regulatory reform can be a start. Such general cargo ports as Milwaukee, Chicago, and Cleveland can especially benefit through enlightened reform to permit shippers to become more efficient and efficiency will help shippers contain rates for the exports and imports of this important industrial region, as it will for the entire Nation.

This legislation which we consider today clarifies the scope of the antitrust immunity granted to ocean common carriers, including that granted to conference intermodal agreements. At the same time, it preserves the common carrier obligations and protections afforded the users of our ocean transportation services by continuing provisions prohibiting unjustly discriminatory behavior and the abuse of the market power due to concerted carrier activity. Moreover, the bill will go a long way toward eliminating much of the dilatory procedures and vague standards governing common carrier agreements.

I would like to comment briefly on the antitrust immunity available under S. 47. Ocean conferences have had antitrust immunity, under certain standards, since 1916, when Congress decided as a matter of policy that adoption of the conference system for the U.S. trades had certain advantages, most of which are present today. The advantages include greater regularity and frequency of service, stability and uniformity of rates, economy in the cost of service, better distribution of sailings, equal treatment of shippers through the elimination of secret arrangement and underhanded methods of discrimination.

The policy behind the 1916 Shipping Act is still valid today. S. 47 preserves the basic antitrust immunity for carri-

ers and conferences, but clarifies its scope, ending the confusion and uncertainty resulting from the dual application of both antitrust and Shipping Act standards to ocean carrier agreements. Moreover, the bill eliminates the time-consuming and costly preimplementation review of commercial agreements by the FMC. In suggesting this major change, FMC Chairman Green sought the end to an era of Government "crystal ball gazing." Instead the FMC will concentrate its efforts and resources on the postapproval surveillance of actual conference and carrier conduct and strict enforcement of the law.

S. 47 also affords protection against ocean carrier abuse of the grant of immunity by providing a specific list of prohibited acts. This list clearly defines the standard of lawful conduct to which carriers and other persons must conform. The Federal Maritime Commission will continue to strenuously examine and oversee the conduct of conferences to insure that they conform with the law.

Finally, the users of ocean transportation services may expect to benefit from passage of S. 47. This legislation is particularly important to the many exporters and importers of the Midwest. Not only is the authority of conferences to continue to offer intermodal transportation services clarified, but the bill also provides greater flexibility for shipper-carrier commercial relations, and specifically authorizes service contracts, independent action and time/volume rates. Authorization for the establishment of shippers' councils is also included.

In summary, S. 47 is the product of intensive and prolonged study and effort to reform our shipping laws and represents a well-balanced approach to regulation of ocean shipping industry. For the reasons I have cited above, I support the passage of S. 47 and urge my colleagues to do so as well.

● Mr. LEVIN. Mr. President, I will vote against full passage of S. 47. The question of whether or not to exempt ocean carriers from the antitrust laws is a complex one upon which there has been considerable debate. But one thing is clear. Even if an exemption is wise—a conclusion about which I have some doubt—putting the Federal Government in the position of enforcing price-fixing agreements goes beyond what is required to strengthen the position of the carriers.

The amendment offered earlier today by Senator THURMOND, if adopted by the Senate, would have at least removed the Federal Maritime Commission from enforcing the agreements ultimately reached by the carriers. While I support the goal of strengthening the U.S. maritime industry, I am concerned that the approach taken in S. 47 establishes overly broad precedent of exempting carriers from the antitrust laws while at the same time requiring the Government to enforce the prices ultimately fixed by the carriers.●

Mr. SPECTER. Mr. President, although I recognize the important role the shipping industry plays in shoring-up American economic interests at home and abroad, and believe that every reasonable effort must be made to insure its continued vitality, I do not believe that this type of generalized exemption from the antitrust laws is the most economical, most efficient, least intrusive means of furthering the legitimate objectives of the industry. I fear that requiring the Federal Maritime Commission to penalize carriers who offer discounts to shippers will only worsen the threat to U.S. exporters, importers, and consumers which this legislation poses.

The drafters of the bill apparently believe that it is not enough to encourage classic price fixing and the formation of cartels, nor enough to expressly eliminate enforcement standards which insured that anticompetitive carrier agreements would not blatently offend the "public interest." Instead, the bill would enlist the U.S. Government as a policeman, to insure that no cartel member undermines the price fix. If price fixing and other restrictive agreements are necessary to the survival of the industry, as the bill's sponsors maintain, then surely the cartel's members can persuade one another to adhere to the fixed price without the assistance of the FMC. If the ocean carriers must go down to the sea in cartels, then let them do so without the complicity of the same government whose functions include enforcement of the antitrust laws. S. 47 will cost American consumers millions of dollars and primarily benefit the foreign carriers who make up 80-85 percent of the cartel membership. It is time that the carriers accept responsibility for enforcing the agreements which seek these dubious ends.

In closing, let me say that the antitrust laws are this country's primary means of preserving the economic and consumer benefits of competition, and the Committee on the Judiciary is charged with the oversight of those laws. This bill, with its sweeping antitrust exemption, warranted more than a 6-day referral to the Judiciary Committee, a referral obtained only through the considerable efforts of the committee chairman, Senator THURMOND. The time available for the consideration of this legislation in the Judiciary Committee was all too brief. Had the committee been afforded greater opportunity for debate on the bill and its amendments, I believe we could all be more confident that it would protect the interests of those who will be affected by its broad sweep.

THE STEVENS/THURMOND/HATCH COMPROMISE AMENDMENT TO S. 47

Mr. DOLE. Mr. President, I commend Senators STEVENS, THURMOND, and HATCH on the compromise amendment package which was put before the Senate and voted this morning. I regret that I was unable to be present for the vote due to a conflicting schedule which required me to be in New York this morning. I wish the record to reflect, however, my support for the compromise that was put together by my colleagues after marathon discussions last night.

The compromise preserves important immunities against antitrust liability for shippers who are forced to enter into shipping agreements in order to protect themselves from subsidized foreign carriers who would otherwise benefit from their protected domestic position and engage in unfair competition against American carriers who, without the conference agreements authorized by this bill, are unable to compete on an equal footing. At the same time, it preserves a right of independent action for those carriers who, with respect to specific route operations, are in a position to compete successfully with the foreign carriers without participation in shipping conferences as authorized by the act. In this way, maximum flexibility is retained in the industry and legitimate competitive influences will continue to be felt.

With this compromise, I am comfortable with the bill and will support it. The compromise contains a reasonable protection against the possibility that the limited antitrust immunities granted for shippers will be abused to the detriment of the open, competitive domestic shipping industry in the United States.

Mr. GORTON. How much time is remaining?

The PRESIDING OFFICER. Three minutes remaining.

Mr. GORTON. Mr. President, for just a moment I wish to address myself to——

Mr. HATCH. Will the Senator yield for just a parliamentary inquiry?

Mr. GORTON. Yes.

Mr. HATCH. Mr. President, how much time does the opposition have?

The PRESIDING OFFICER. Five minutes and 46 seconds.

Mr. GORTON. For just a moment, as manager of the bill, I want to respond to the very thoughtful comments in opposition to the bill presented a few moments ago by the Senator from Utah. If the Senator from Washington believed that this bill would result in increases in costs to American importers and exporters, I know the Senator from Utah agrees that this Senator would oppose the bill. I spent 2 years as chairman of the Subcom-

mittee on Merchant Marine learning about a field in which I had no previous experience. I can assure the Senator that I support this bill, because I think that it increases competition over the level of competition at the present time; that it will benefit shippers, who themselves have testified that it will benefit them, as well as the American flag merchant marine, so eloquently testified to by the Senator from Alaska.

This is not a total deregulatory bill. It is certainly possible to devise a bill which might drive prices down further, but we would do that only at the cost of driving the flag of the United States off of the oceans in international trade. And so we have gone in this bill as far as we possibly could to increase competition and preserve the American merchant marine at the same time.

In reference to the study referred to by the Senator by Professor Ferguson, we in dealing with that study in the Commerce Committee literally found no factual basis for the conclusions of that particular author.

We believe, to the contrary, that we will have freer international trade, that we will have more pricing competition, that we will have both a stronger American merchant marine and a stronger international trade posture in the United States. No one ever can be certain of his conclusions. I know the Senator from Utah is not. But that is the goal for which we are driving in this piece of legislation.

I may also say that the amendments proposed by the Judiciary Committee and by the Senator from Utah clearly increase the competitive balance existing in this bill, and they are changes which I support and intend to support as the rest of Congress deals with this proposition.

I know that the Senator has operated in this debate in entire good faith. I assure him that we seek exactly the same ends.

Mr. President, in agreement with the article by Professor Hazard, which I read earlier, I believe we have the best compromise in the real world to improve the ocean shipping of the United States.

The PRESIDING OFFICER (Mr. SPECTER). All time of the proponents of the bill has expired.

The opponents have 5 minutes and 46 seconds remaining.

Mr. METZENBAUM. Mr. President, I yield 3 minutes to the distinguished Senator from Utah.

Mr. HATCH. Mr. President, I appreciate these remarks by the distinguished Senator from Alaska and the distinguished Senator from Washington. I know they are sincere, that they believe in what they are doing, that they believe that this bill will increase competition. If that were so, we could apply the aspects of this bill to many aspects of business life in this society and find that it would not increase competition. I have no doubt about their sincerity. I admire both of them, and I think that they have done an excellent job in managing this bill.

I believe that the distinguished Senator from Ohio happens to be right in this matter. The bill before us strikes at the protections of our economic democracy because it permits an industry to cartelize while granting the industry sweeping antitrust immunities.

I said yesterday that fixed prices discourage competition, and without competition consumers always suffer. I know of no historical refutation or rebuttal of those statements. I suspect that in this case we are going to find that those statements are true as well.

I might also add that S. 47 fails to provide—except insofar as we have tried to amend it, in my opinion—the necessary and feasible protections against cartel power. I know efforts have been made to try to resolve this problem, but I do not believe that this problem is resolved, in spite of the sincerity and obvious good intentions of those managing this bill—friends of mine, people I admire, who I think are generally right in the areas of antitrust law.

With regard to Professor Ferguson, yesterday I put into the RECORD a number of other distinguished economists who agree with him—Prof. Walter Heller, Sidney Jones, Thomas Gale, Lester Thoreau, James Tobin. They all fell that this bill will amount to a very detrimental application to consumers. I am not persuaded that circumstances in the shipping industry are unique, so that carriers should be exempt from the greatest of our consumer protection laws, the antitrust laws.

I am very concerned that if this bill passes—and I assume it will pass—and if the managers of this bill are wrong, I thing we will be a long time in paying the price for their doing wrong.

Also, in the final analysis, this bill will hurt not only the consumers but also the maritime fleet. Time will tell. I hope the floor manager of the bill is right. I admire him for doing what he believes is right in this bill.

Mr. METZENBAUM. Mr. President, in concluding this debate, there are two issues to consider: whether it is good for the American economy and jobs and whether it will lower costs.

It is hard for me to understand how the shipping industry is fighting for this bill and is somehow fighting to lower their costs. It does not ring true to me.

It is similar to the argument I heard with respect to the Natural Gas Act. I heard it in the argument for decontrol of jet fuel, and airline prices went up unbelievably high within days. I heard it in the antitrust exemption for the soft drink bottlers, and soft drink prices have continued to go up since then.

As to the question of whether it is good for the economy, let me quote the statement by Mr. Frank Drozak, of the maritime trades department of the AFL-CIO, addressing the 1982 convention of the American Merchant Marine, Long Beach, Calif., aboard the Queen Mary. He said:

> While the regulatory bill may help the liner operators, it will also assist the foreign operators as well. This Gorton-Biaggi legislation is basically a housekeeping chore which will not develop the American maritime industry, will not create one new job, and will not stem the unemployment problem of this country. Passage of this bill will increase the unemployment of American seamen, shipyard workers, and American supply businesses, and will siphon more American taxes abroad.

I think that states it in a nutshell. This bill will not help; it will hurt. That is coming from the leading spokesperson for the seamen and the shipping trade workers in this country. It certainly is not going to cut prices. It is a reflection upon the free enterprise system. It is a throwback.

I hope that the Members of the Senate will see fit to reject this measure, even at this late hour.

Mr. President, have the yeas and nays been requested on the bill?

The PRESIDING OFFICER. The yeas and nays have not been requested.

Mr. METZENBAUM. I request the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. METZENBAUM. Mr. President, it is my understanding that the time of the proponents has expired. I gather that I still have a little time remaining.

The PRESIDING OFFICER. All time has expired.

Mr. METZENBAUM. Then, I will not even yield it back. [Laughter.]

The PRESIDING OFFICER. Without objection, the committee substitute, as amended, is agreed to.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Mississippi (Mr. COCHRAN), is necessarily absent.

I also announce that the Senator from Alaska (Mr. MURKOWSKI), is absent due to the death of a relative.

I further announce that, if present and voting, the Senator from Alaska (Mr. MURKOWSKI); would vote "yea".

Mr. CRANSTON. I announce that the Senator from Ohio (Mr. GLENN), is necessarily absent.

The PRESIDING OFFICER. Is there any other Senator in the Chamber who wishes to vote?

The result was announced—yeas 64, nays 33, as follows:

[Rollcall Vote No. 6 Leg.]

YEAS—64

Andrews	Hart	Nunn

NOT VOTING—3

Cochran	Glenn	Murkowski

So the bill (S. 47), as amended, was passed, as follows:

S. 47

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Shipping Act of 1983".

TABLE OF CONTENTS

Sec. 2. Declaration of policy.
Sec. 3. Definitions.
Sec. 4. Agreements within scope of Act.
Sec. 5. Agreements.
Sec. 6. Action on agreements.
Sec. 7. Loyalty contracts.
Sec. 8. Exemption from antitrust laws.
Sec. 9. Tariffs.
Sec. 10. Controlled carriers.
Sec. 11. Ocean freight forwarders.
Sec. 12. Prohibited acts.
Sec. 13. Complaints, investigations, reports, and reparations.
Sec. 14. Subpenas and discovery.
Sec. 15. Penalties.
Sec. 16. Commission orders.
Sec. 17. Reports and certificates.
Sec. 18. Exemptions.
Sec. 19. Regulations.
Sec. 20. Report to Congress.
Sec. 21. Repeals and conforming amendments.
Sec. 22. Effective date.

SEC. 2. DECLARATION OF POLICY.

The objectives of United States regulation of international liner shipping are—

(1) to develop and maintain an efficient ocean transportation system through commercial means, with minimum government involvement, in order to serve the needs of United States foreign commerce;

(2) to foster reliable and responsible service by marine terminal operators, ocean common carriers, and conferences;

(3) to encourage ocean transportation rates and practices for United States exporters and importers that are internationally competitive, and which are not unjustly discriminatory;

(4) to harmonize United States shipping practices with those of its major trading partners;

(5) to permit cooperation among carriers and rationalization of services; and

(6) to facilitate efficient and timely regulation by a single Federal agency of the various aspects of international liner shipping, responsive to the growth of ocean commerce and international developments affecting that commerce.

SEC. 3. DEFINITIONS.

As used in this Act—

(1) "agreement" means an understanding, arrangement, or association, written or oral, and any modification or cancellation thereof; but the term does not include a maritime labor agreement;

(2) "antitrust laws" means the Act of July 2, 1890 (ch. 647, 26 Stat. 209), as amended; the Act of October 15, 1914 (ch. 323, 38 Stat. 730), as amended; the Federal Trade Commission Act (38 Stat. 717), as amended; sections 73 and 74 of the Act of August 27, 1894 (28 Stat. 570), as amended; the Act of June 19, 1936 (ch. 592, 49 Stat. 1526), as amended; the Antitrust Civil Process Act (76 Stat. 548), as amended; and amendments and Acts supplementary thereto;

(3) "assessment agreement" means an agreement, whether part of a collective-bargaining agreement or negotiated separately, only to the extent that it provides for the funding of collectively bargained fringe benefit obligations on other than a uniform man-hour basis, regardless of the cargo handled or type of vessel or equipment utilized;

(4) "bulk cargo" means cargo that is loaded and carried in bulk without mark or count;

(5) "Commission" means the Federal Maritime Commission;

(6) "common carrier" means a person holding itself out to the general public to provide transportation of passengers or property between the United States and a foreign country for compensation that—

(A) assumes responsibility for the transportation from the port or point of receipt to the port or point of destination; and

(B) utilizes, for all or part of that transportation, a vessel operating on the high seas or the Great Lakes between ports in the United States and ports in foreign countries.

(7) "conference" means an association of ocean common carriers permitted, pursuant to an approved or effective agreement, to engage in concerted activity and to utilize a common tariff; but the term does not include a joint service, consortium, pooling, sailing or transshipment arrangement;

(8) "controlled carrier" means an ocean common carrier that is, or whose operating assets are, directly or indirectly, owned or controlled by the government under whose registry the vessels of the carrier operate; ownership or control by a government shall be deemed to exist with respect to any carrier if—

(A) a majority portion of the interest in the carrier is owned or controlled in any manner by that government, by any agency thereof, or by any public or private person controlled by that government; or

(B) that government has the right to appoint or disapprove the appointment of a majority of the directors, the chief operating officer, or the chief executive officer of the carrier;

(9) "deferred rebate" means a return by a common carrier of any portion of the freight money to a shipper as a consideration for that shipper giving all, or any portion, of its shipments to that or any other common carrier, or for any other purpose, the payment of which is deferred beyond the completion of the service for which it is paid, and is made only if, during both the period for which computed and the period of deferment, the shipper has complied with the terms of the rebate agreement or arrangement;

(10) "fighting ship" means a vessel used in a particular trade by an ocean common carrier or group of such carriers for the purpose of excluding, preventing, or reducing competition by driving another ocean common carrier out of that trade;

(11) "forest products in an unfinished or semifinished state" means forest products that require special handling moving in lot sizes that range from being too large for containers up to and including shipload lot sizes, including, but not limited to lumber in bundles, rough timber, ties, poles, piling, laminated beams, bundled siding, bundled plywood, bundled core stock or veneers, bundled particle or fiber boards, bundled hardwood, wood pulp in rolls, wood pulp in unitized bales, paper board in rolls, and paper in rolls;

(12) "inland division" means the amount paid by an ocean common carrier to any inland carrier for the inland portion of through transportation offered to the public by the ocean common carrier;

(13) "inland portion" means the charge to the public by an ocean common carrier with respect to the nonocean portion of through transportation;

(14) "loyalty contract" means a contract with an ocean common carrier or conference, other than a service contract or a contract based on time-volume rates, by which a contract shipper obtains lower rates by committing all or a fixed portion of its cargo to that carrier or conference;

(15) "marine terminal operator" means a person engaged in the United States in the business of furnishing wharfage, dock, warehouse, or other terminal facilities in connection with a common carrier;

(16) "maritime labor agreement" means a collective-bargaining agreement between an employer or group of employers, subject to this Act and a labor organization representing employees in the maritime or stevedoring industry, or an agreement preparatory to such a collective-bargaining agreement among members of a multiemployer bargaining group, or an agreement specifically implementing provisions of such a collective-bargaining agreement or providing for the formation, financing, or administration of a multiemployer bargaining group; but the term does not include an assessment agreement;

(17) "net profit and loss pool" means a pooling or apportionment of net profit or losses, or any similar arrangement that results in the participants sharing all or virtu-

ally all of their costs of operation, but the term does not include a pooling or apportionment of revenues in which each participant continues to bear his own costs even if such a pooling provides for certain adjustments to revenue or expense or results in the sharing of certain costs;

(18) "non-vessel-operating common carrier" means a common carrier that does not operate the vessels by which the ocean transportation service is provided, and is a shipper in its relationship with an ocean common carrier;

(19) "ocean common carrier" means, for purposes of this Act only, a vessel operating common carrier; but the term does not include one engaged in ocean transportation by ferry boat, or ocean tramp or bulk cargo vessels;

(20) "ocean freight forwarder" means a person in the United States who—

(A) dispatches shipments via common carriers and books or otherwise arranges space for such cargo on behalf of shippers, and

(B) processes the documentation or performs related activities incident to such shipments;

(21) "person" includes individuals, corporations, partnerships, and associations existing under or authorized by the laws of the United States or of a foreign country;

(22) "service contract" means a contract between a shipper and an ocean common carrier or conference in which the shipper makes a commitment to provide a certain minimum quantity of cargo over a fixed time period, and the ocean common carrier or conference commits to a certain rate or rate schedule as well as a defined service level—such as, assured space, transit time, port rotation, or similar service features; the contract may also specify provisions in the event of nonperformance on the part of either party;

(23) "shipment" means all of the cargo carried under the terms of a single bill of lading;

(24) "shipper" means an owner or person for whose account the ocean transportation of cargo is provided or the person to whom delivery is to be made;

(25) "shipper's council" means an association of shippers or their agents, other than ocean freight forwarders and non-vessel-operating common carriers;

(26) "tariff" means any schedule of rates, charges, classifications, rules, and practices, including any supplement, amendment or reissue pertaining to services or accommodations subject to this Act;

(27) "through rate" means the single amount charged by a common carrier in connection with through transportation;

(28) "through transportation" means continuous transportation between origin and destination for which a single amount is assessed and which is offered or performed by one or more carriers, at least one of which is a common carrier, between a United States point or port and a foreign point or port; and

(29) "United States" includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Marianas, and all other United States territories and possessions.

SEC. 4. AGREEMENTS WITHIN SCOPE OF ACT.

(a) OCEAN COMMON CARRIERS.—This Act applies to agreements by or among ocean common carriers to—

(1) discuss, fix, and regulate rates, accommodations, and other conditions of service including through rates and through transportation,

(2) pool or apportion earnings, losses or traffic;

(3) allot ports or restrict or otherwise regulate the number and character of sailings between ports;

(4) limit or regulate the volume or character of cargo or passenger traffic to be carried;

(5) engage in exclusive, preferential, or cooperative working arrangements among themselves or with one or more marine terminal operators or non-vessel-operating common carriers

(6) control, regulate, or prevent competition in international ocean transportation and,

(7) consult and confer with shippers and shippers' councils regarding general rate levels, charges, classifications, rules, practices, or services.

(b) MARINE TERMINAL OPERATORS.—This Act applies to agreements among marine terminal operators, and to agreements among one or more marine terminal operators and one or more ocean common carriers to—

(1) discuss, fix, and regulate rates and other conditions of services; and

(2) engage in exclusive, preferential, or cooperative working arrangements.

(c) ACQUISITIONS.—This Act does not apply to an acquisition by any person, directly or indirectly, of any voting security or assets of any other person.

SEC. 5. AGREEMENTS.

(a) FILING REQUIREMENTS.—A true copy of every agreement entered into with respect to an activity described in section 4 shall be filed with the Commission, except agreements related to transportation to be performed within or between foreign countries. In the case of an oral agreement, complete memorandum specifying in detail the substance of the agreement shall be filed. The Commission may by regulation prescribe the general form and manner in which agreements shall be filed.

(b) NOTICE AND REJECTION.—Within 10 working days after an agreement is filed, the Commission shall transmit a notice of its filing to the Federal Register for publication. The Commission shall within 30 days after filing reject any agreement that on its face fails to comply with this section. In rejecting an agreement, the Commission shall state, in writing, the deficiency or deficiencies that caused the Commission to reject the agreement.

(c) CONFERENCE AGREEMENTS.—Each conference agreement must—

(1) state its purpose and the manner in which it will be implemented;

(2) provide reasonable and equal terms and conditions for admission and readmission to conference membership of any ocean common carrier willing to serve the particular trade or route;

(3) permit any member to withdraw from conference membership upon reasonable notice without penalty;

(4) require an independent neutral body to police fully the obligations of the conference and its members;

(5) provide for a consultation process designed to promote—

(A) commercial resolution of disputes; and

(B) cooperation in preventing and eliminating malpractices; and

(6) establish procedures for promptly and fairly considering shippers' requests and complaints.

(d) CONFERENCES UTILIZING LOYALTY CONTRACTS OR SERVING UNITED STATES ORGANIZATION FOR ECONOMIC COOPERATION AND DEVELOPMENT TRADES.—Each conference agreement must provide that, if the conference has in effect a loyalty contract with 1 or more shippers or if the conference serves a trade between the United States and countries that are members of the Organization for Economic Cooperation and Development any members of the conference may take independent action on any rate or service item required to be filed in a tarriff under section 9.

(e) INTERCONFERENCE AGREEMENTS.—Each agreement between carriers not members of the same conference must provide the right of independent action for each carrier. Each agreement between conferences must provide the right of independent action for each conference.

(f) ASSESSMENT AGREEMENTS.—

(1) Assessment agreements shall be filed with the Commission and shall be deemed approved upon filing. The Commission shall thereafter, upon complaint filed within 2 years of the date of filing of the agreement, disapprove, cancel, or modify any such agreement, or charge or assessment pursuant thereto, that it finds, after notice and hearing, to be unjustly discriminatory or unfair as between carriers, shippers, or ports. The Commission shall issue its final decision in each proceeding within 1 year of the date of filing of the complaint. If an assessment or charge is found to be unjustly discriminatory or unfair as between carriers, shippers, or ports, the Commission shall remedy the unjust discrimination or unfairness for the period of time between the filing of the complaint and the final decision by means of assessment adjustments. These adjustments shall be implemented by prospective credits or debits to future assessments or charges, except in the case of a complainant who has ceased activities subject to the assessment or charge, in which case reparation may be awarded. To the extent that any provision of this paragraph conflicts with the language of any other section of this Act, the Shipping Act, 1916, or the Intercoastal Shipping Act, 1933, the provisions of this paragraph shall control.

(2) This Act, the Shipping Act, 1916, and the Intercoastal Shipping Act, 1933, do not apply to maritime labor agreements. This section does not exempt from the provisions of this Act, the Shipping Act, 1916, or the Intercoastal Shipping Act, 1933, any rates, charges, regulations, or practices of a common carrier or marine terminal operator that are required to be set forth in a tariff, whether or not such rates, charges, regulations, or practices arise out of, or are otherwise related to, a maritime labor agreement.

SEC. 6. ACTION ON AGREEMENTS.

(a) EFFECTIVE DATE.—Except with respect to assessment agreements, each agreement filed under section 5(a) shall become effective 45 days after filing, unless rejected under section 5(b) or suspended pursuant to subsection (b) but in no case may an agreement become effective in less than 30 days from its publication in the Federal Register.

(b) SUSPENSION.—At any time prior to the expiration of the 45 day period referred to in subsection (a), the Commission, upon complaint of a person, may suspend the effective date of an agreement pending the outcome of any proceeding pursuant to subsection (c), if the Commission, after preliminary hearing, finds that—

(1) the complainant has shown a reasonable probability that the agreement will operate in violation of section 5 or 12; and

(2) the complainant will be substantially injured in the interim if the agreement is allowed to go into effect before a final decision on the merits.

No suspension period may exceed 180 days.

(c) CANCELLATION OR MODIFICATION.—The Commission may, at any time, upon complaint or upon its own motion, institute and conduct an investigation and hearing to determine if any agreement filed under section 5(a) operates in violation of section 5 or 12, and if so, shall by order, cancel or modify that agreement. Each agreement that is in effect at the time it is the subject of an investigation and hearing shall remain in effect during the investigation and hearing.

(d) HEARING.—Hearings pursuant to this section shall be limited to the submission of affidavits of fact and memorandums of law unless, in the opinion of the Commission, there is a genuine issue of fact that requires an oral evidentiary hearing. Oral argument may be ordered at the discretion of the Commission.

(e) BURDEN OF PROOF.—The burden of proof in any proceeding under this section, or under section 5(f)(1) or under any other section of this Act where an agreement is concerned, is at all times on any party, including the Commission, opposing the agreement.

(f) INFORMATION.—At any time before the expiration of the 45-day period referred to in subsection (a), the Commission, upon its own motion or motion of the complainant, may issue a subpena or discovery order for any additional information that it deems necessary to determine whether the agreement is in violation of this Act.

(g) COMPLIANCE WITH SUBPENA OR DISCOVERY.—In any proceeding under this section, the Commission may disapprove or cancel an agreement for failure of a proponent of the agreement to comply with a subpena or discovery order lawfully issued by the Commission.

(h) FINAL DECISION TIME.—The Commission shall issue a final decision in each hearing under this section within 180 days of ordering the hearing. If, within this time period, the Commission determines that it is unable to issue a final order because of undue delays, the Commission may make a decision in the proceeding adverse to the delaying party on the basis of the delay, or in the case of undue delay caused by a proponent of an agreement, alternatively, toll the 180-day period for the period of delay.

(i) DURATION OF EFFECTIVENESS.—Each agreement, once in effect, shall remain in effect until withdrawn or until canceled or modified by the Commission. The Commission may not limit the effectiveness of an agreement.

SEC. 7. LOYALTY CONTRACTS.

(a) CONTRACT REQUIREMENTS.—Any ocean common carrier or conference engaged in foreign commerce may utilize loyalty contracts, including contracts for through transportation, if—

(1) the contract is available to all shippers on equal terms and conditions and, where the contract covers service under through rates via a United States port or ports, it also offers the shipper an option of port-to-port contract service, and provides that use of either service shall satisfy the shipper's loyalty obligation;

(2) the contract shipper is permitted prompt release from the contract with respect to any shipment or shipments for which the contracting carrier or conference cannot provide space as requested on reasonable notice by the shipper;

(3) the contract provides that whenever a rate for the carriage of goods under the contract becomes effective, insofar as it is under the control of the carrier or conference, the rate—

(A) may not be increased on less than 90 days' notice, except upon agreement of the applicable shippers; and

(B) may be increased on not less than 30 days' notice if the increase is to a level no higher than that from which the particular rate was reduced within 180 days immediately preceding the filing of the increase;

(4) the contract covers only those goods of the contract shipper as to the shipment of which it has the legal right at the time of shipment to select the carrier. It shall be deemed a breach of the contract if, before the time of shipment and with the sole intent to avoid its obligation under the contract, the contract shipper divests itself, or with the same intent permits itself to be divested, of the legal right to select the carrier and the shipment is carried by a carrier that is not a party to the contract. No contract shall require the shipper to refuse to purchase, sell, or transfer any goods on terms that vest the right to select the carrier in any other person;

(5) the contract shipper is not denied the right to utilize competing services that involve loading to or from a vessel at a port or points located beyond a carrier's or conference's geographic scope as defined in the contract;

(6) the damages recoverable for breach by either party are limited to actual damages to be determined after breach in accordance with the principles of contract law. The contract may specify, however, that in the case of a breach by a contract shipper the damages may be an amount not exceeding the freight charges computed at the contract rate on the particular shipment, less the cost of handling;

(7) the shipper, carrier, or conference is permitted on 90 days' notice to terminate the contract rate system in whole or with respect to any commodity without penalty;

(8) the contract provides for a spread or series of spreads between non-contract rates and rates charged contract shippers that shall not exceed an aggregate of 15 per centum;

(9) the contract excludes bulk cargo (except liquid bulk cargoes, other than chemicals, in less than full shipload lots) and forest products in an unfinished or semifinished state; and

(10) the contract shipper is permitted to utilize competing services for 5 per centum or less of the shipper's tonnage that would otherwise be subject to the loyalty obligation.

(b) TREATMENT OF CONTRACT NOT IN CONFORMITY.—Utilization of a loyalty contract that does not conform with each of the requirements of this section is a violation exclusively of this Act.

SEC. 8. EXEMPTION FROM ANTITRUST LAWS.

(a) The antitrust laws do not apply to—

(1) any agreement that has been filed under section 5 and has become effective under section 6, or is exempt under section 18 from any requirement of this Act;

(2) any activity or agreement within the scope of this Act, whether permitted under or prohibited by this Act, undertaken or entered into with a reasonable basis to conclude that (A) it is pursuant to an agreement on file with the Commission and in effect when the activity took place, or (B) it is exempt under section 18 from any filing requirement of this Act;

(3) any loyalty contract or any activity pursuant to a loyalty contract;

(4) any agreement or activity that relates solely, to ocean or through transportation services within or between foreign countries, whether or not via the United States;

(5) any agreement or activity concerning the foreign inland segment of through transportation that is part of transportation provided in a United States import or export trade;

(6) any agreement or activity with a shipper's council organized under the laws of a foreign country and operating exclusively outside the United States, even when that agreement or activity affects cargo transported in a United States import or export trade;

(7) any agreement or activity to provide or furnish wharfage, dock, warehouse, or other terminal facilities exclusively outside the United States;

(8) subject to section 21(e)(2), any agreement, modification, or cancellation approved by the Commission before the effective date of this Act under section 15 of the Shipping Act, 1916, or permitted under section 14(b) thereof, and any properly filed and published tariff rate, charge, classification, rule, or practice implementing that agreement, modification, or cancellation.

(9) joint ventures established by small shippers to—

(A) consult and confer with any ocean common carrier or conferece regarding general rate levels, charges, classification, rules, practices, or services; and

(B) combine cargo with 1 or more small shippers for the purpose of obtaining time-volume rates and services contracts with ocean common carriers. For the purpose of this subsection, a small shipper shall be considered to be any shipper who is in the normal course of its business (including any business conducted by a parent corporation or subsidiary that, in whole or in part, either controls or is controlled by such shipper) ships in international ocean transportation an annual average of no more than 35, 40-foot containers a month.

(b) This Act does not extend antitrust immunity—

(1) to any agreement with or among air carriers, rail carriers, motor carriers, or common carriers by water not subject to this Act with respect to transportation within the United States; or

(2) to any discussion or agreement among common carriers that are subject to this Act discussing the inland divisions (as opposed to the inland portions) of through rates within the United States.

(c)(1) Any determination by any agency or court that results in the denial or removal of the immunity to the antitrust laws set forth in subsection (a) shall not remove or alter the antitrust immunity for the period before the determination.

(2) No person may recover damages under section 4 of the Clayton Act, or obtain injunctive relief under section 16 of the Clayton Act, for conduct that is prohibited by this Act.

SEC. 9. TARIFFS.

(a) IN GENERAL.—

(1) Except with regard to bulk cargo and forest products in an unfinished or semifinished state, and recyclable or recycled metals and metal bearing materials, waste

paper or paper waste, each common carrier and conference shall file with the Commission, and keep open to public inspection, tariffs showing all its rates, charges, classifications, rules, and practices between all points or ports or its own route and on any through transportation route that has been established. However, common carriers shall not be required to state separately or otherwise reveal in tariff filings the inland divisions of a through rate. Tariffs shall—

(A) plainly indicate the places between which cargo will be carried;

(B) list each classification of cargo in use;

(C) set forth the level of freight forwarder compensation, if any, by a carrier or conference;

(D) state separately each terminal or other charge, privilege, or facility under the control of the carrier or conference and any rules or regulations that in any way change, affect, or determine any part or the aggregate of the rates or charges; and

(E) and include sample copies of any loyalty contract, bill of lading, contract of affreightment, or other document evidencing the transportation agreement.

(2) Copies of tariffs shall be made available to any person and a reasonable charge may be assessed for them.

(b) TIME-VOLUME RATES.—Rates quoted in tariffs may vary with the volume of cargo offered over a specified period of time.

(c) SERVICE CONTRACTS.—An ocean common carrier or conference may enter into a service contract with a shipper or shipper joint venture to provide specified services under specified rates and conditions, subject to the requirements of this Act. Each contract entered into under this subsection shall be filed confidentially with the Commission, and at the same time, a concise statement of its essential terms shall be filed with the Commission and made available to the general public in tariff format, and such essential terms shall be available to all shippers similarly situated. The essential terms shall include—

(1) the origin and destination port ranges in the case of port-to-port movements, and the origin and destination geographic areas in the case of through intermodal movements;

(2) the commodity or commodities involved;

(3) the minimum volume;

(4) the line-haul rate;

(5) the duration;

(6) service commitments; and

(7) the liquidated damages for nonperformance, if any.

The exclusive remedy for a breach of a contract entered into under this subsection is an action in an appropriate court, unless the parties otherwise agree. This subsection does not affect service contracts relating to bulk cargo or forest products in an unfinished or semifinished state.

(d) RATES.—No new or initial rate or change in existing rate that results in an increased cost to the shipper may become effective earlier than 30 days after filing with the Commission. The Commission, for good cause, may allow such a new or initial rate or change to become effective in less than thirty days. Any change in an existing rate that results in a decreased cost to the shipper may become effective upon publication and filing with the Commission.

(e) REFUNDS.—The Commission may, upon application of a carrier or shipper, permit a common carrier or conference to refund a portion of freight charges collected from a shipper or to waive the collection of a portion of the charges from a shipper if—

(1) there is an error in a tariff of a clerical or administrative nature or an error due to inadvertence in failing to file a new tariff and the refund will not result in discrimination among shippers, ports, or carriers;

(2) the common carrier or conference has, prior to filing an application for authority to make a refund, filed a new tariff with the Commission that sets forth the rate on which the refund or waiver would be based;

(3) the common carrier or conference agrees that if permission is granted by the Commission, an appropriate notice will be published in the tariff, or such other steps taken as the Commission may require, which gives notice of the rate on which the refund or waiver would be based, and additional refunds or waivers as appropriate shall be made with respect to other shipments in the manner prescribed by the Commission in its order approving the application; and

(4) the application for refund or waiver is filed with the Commission within 180 days from the date of shipment.

(f) FORM.—The Commission may by regulation prescribe the form and manner in which the tariffs required by this section shall be published and filed. The Commission may reject any tariff that is not in conformity with this section and its regulations. Upon rejection by the Commission, the tariff is void and its use is unlawful.

SEC. 10. CONTROLLED CARRIERS.

(a) CONTROLLED CARRIER RATES.—No controlled carrier subject to this section shall maintain rates or charges in its tariffs filed with the Commission that are below a level that is just and reasonable, nor shall any such carrier establish or maintain unjust or unreasonable classifications, rules, or regulations in such tariffs. An unjust or unreasonable classification, rule, or regulation means one which results or is likely to result in the carriage or handling of cargo at rates or charges which are below a level which is just and reasonable. The Commission may, at any time after notice and hearing, disapprove any rates, charges, classifications, rules, or regulations which the controlled carrier has failed to demonstrate to be just and reasonable. In any proceeding under this subsection, the burden of proof shall be on the controlled carrier to demonstrate that its rates, charges, classifications, rules, or regulations are just and reasonable. Rates, charges, classifications, rules, or regulations filed by a controlled carrier that have been rejected, suspended, or disapproved by the Commission are void, and their use is unlawful.

(b) RATE STANDARDS.—For the purpose of this section, in determining whether rates, charges, classifications, rules, or regulations by a controlled carrier are just and reasonable, the Commission may take into account appropriate factors including, but not limited to, whether—

(1) the rates or charges which have been filed or which would result from the pertinent classifications, rules, or regulations are below a level which is fully compensatory to the controlled carrier based upon that carrier's actual costs or upon its constructive costs, which are hereby defined as the costs of another carrier, other than a controlled carrier, operating similar vessels and equipment in the same or a similar trade;

(2) the rates, charges, classifications, rules, or regulations are the same as or similar to those filed or assessed by other carriers in the same trade;

(3) the rates, charges, classifications, rules, or regulations are required to assure movement of particular cargo in the trade; or

(4) the rates, charges, classifications, rules, or regulations are required to maintain acceptable continuity, level, or quality of common carrier service to or from affected ports.

(c) EFFECTIVE DATE OF RATES.—Notwithstanding the provisions of section 9(d), the rates, charges, classifications, rules, or regulations of controlled carriers shall not, without special permission of the Commission, become effective sooner than the 30th day after the date of filing with the Commission. Each controlled carrier shall, upon the request of the Commission, file, within 20 days of request (with respect to its existing or proposed rates, charges, classifications, rules, or regulations), a statement of justification that sufficiently details the controlled carrier's need and purpose for such rates, charges, classifications, rules, or regulations upon which the Commission may reasonably base its determination of the lawfulness thereof.

(d) DISAPPROVAL OF RATES.—Whenever the Commission is of the opinion that the rates, charges, classifications, rules, or regulations filed by a controlled carrier may be unjust and unreasonable, the Commission may issue an order to the controlled carrier to show cause why such rates, charges, classifications, rules, or regulations should not be disapproved. Pending a determination as to their lawfulness in such a proceeding, the Commission may suspend such rates, charges, classifications, rules, or regulations at any time before their effective date. In the case of rates, charges, classifications, rules, or regulations that have already become effective, the Commission may, upon the issuance of an order to show cause, suspend such rates, charges, classifications, rules, or regulations on not less than 60 days' notice to the controlled carrier. No period of suspension under this subsection may be greater than 180 days. Whenever the Commission has suspended any rates, charges, classifications, rules, or regulations under this subsection, the affected carrier may file new rates, charges, classifications, rules, or regulations to take effect immediately during the suspension period in lieu of the suspended rates, charges, classifications, rules, or regulations—except that the Commission may reject such new rates, charges, classifications, rules, or regulations if it is of the opinion that they are unjust and unreasonable.

(e) PRESIDENTIAL REVIEW.—Concurrently with the publication thereof, the Commission shall transmit to the President any order of suspension or final order of disapproval of rates, charges, classifications, rules, or regulations of a controlled carrier subject to this section. Within 10 days after the receipt or the effective date of such Commission order, the President may request the Commission in writing to stay the effect of the Commission's order if he finds that such stay is required for reasons of national defense or foreign policy which reasons shall be specified in the report. Notwithstanding any other provisions of law, the Commission shall immediately grant such request by the issuance of an order in which the President's request shall be described. During any such stay, the President shall, whenever practicable, attempt to resolve the matter in controversy by negotia-

tion with representatives of the applicable foreign governments.

(f) EXCEPTIONS.—The provisions of this section shall not apply to—

(1) any controlled carrier of a state whose vessels are entitled by a treaty of the United States to receive national or most-favored-nation treatment;

(2) any controlled carrier of a state which, on the effective date of this section, has subscribed to the statement of shipping policy contained in note 1 to annex A of the Code of Liberalization of Current Invisible Operations, adopted by the Council of the Organization for Economic Cooperation and Development;

(3) rates, charges, classifications, rules, or regulations of any controlled carrier in any particular trade which are covered by an agreement effective under section 6, other than an agreement in which all of the members are controlled carriers not otherwise excluded from the provisions of this subsection;

(4) rates, charges, classifications, rules, or regulations governing the transportation of cargo by a controlled carrier between the country by whose government it is owned or controlled, as defined herein and the United States; or

(5) a trade served exclusively by controlled carriers.

Common carrier by water in foreign commerce or conference of such carriers shall charge or demand or collect or receive a greater or less or different compensation for the transportation of property or for any service in connection therewith than the rates and charges which are specified in its tariffs on file with the Commission and duly published and in effect at the time; nor shall any such carrier rebate, refund, or remit in any manner or by any device any portion of the rates or charges so specified, nor extend or deny to any person any privilege or facility, except in accordance with such tariffs: *Provided, however,* That the Commission may in its discretion and for good cause shown permit a common carrier by water in foreign commerce or conference of such carriers to refund a portion of freight charges collected from a shipper or waive the collection of a portion of the charges from a shipper where it appears that there is an error in a tariff of a clerical or administrative nature or an error due to inadvertence in failing to file a new tariff and that such refund or waiver will not result in discrimination among shippers: *Provided further,* That the common carrier by water in foreign commerce or conference of such carriers has, prior to applying for authority to make refund, filed a new tariff with the Commission which sets forth the rate on which such refund or waiver would be based: *Provided further,* That the carrier or conference agrees that if permission is granted by the Commission, an appropriate notice will be published in the tariff, or such other steps taken as the Commission may require, which give notice of the rate on which such refund or waiver would be based, and additional refunds or waivers as appropriate shall be made with respect to other shipments in the manner prescribed by the Commission in its order approving the application: *And provided further,* That application for refund or waiver must be filed with the Commission within 180 days from the date of shipment.

SEC. 11. OCEAN FREIGHT FORWARDERS.

(a) LICENSE.—No person may act as an ocean freight forwarder unless that person holds a license issued by the Commission. The Commission shall issue a forwarder's license to any person who—

(1) the Commission determines to be qualified by experience and character to render forwarding services; and

(2) furnishes a bond in a form and amount determined by the Commission to insure financial responsibility that is issued by a surety company found acceptable by the United States Department of the Treasury.

(b) SUSPENSION OR REVOCATION.—The Commission shall, after notice and hearing, suspend or revoke any license if it finds that the ocean freight forwarder is not qualified to render forwarding services or that it willfully failed to comply with any provision of this Act or with any lawful order, rule, or regulation of the Commission. The Commission may also revoke a forwarder's license for failure to maintain a bond in accordance with subsection (a)(2).

(c) EXCEPTION.—A person whose primary business is the sale of merchandise may forward shipments of that merchandise for its own account without a license.

(d) COMPENSATION OF FORWARDERS BY CARRIERS.—

(1) A common carrier may compensate an ocean freight forwarder in connection with any cargo shipment dispatched on behalf of others only when the ocean freight forwarder has certified in writing that it holds a valid license and has performed the following services:

(A) engaged, booked, secured, reserved, or contracted directly with the carrier or its agent for space aboard a vessel or confirmed the availability of that space; and

(B) prepared and processed the ocean bill of lading, dock receipt, or other similar document with respect to the cargo.

(2) No common carrier may pay compensation for services described in paragraph (1) more than once on the same cargo shipment.

(3) No compensation may be paid to an ocean freight forwarder except in accordance with a tariff filed under section 9(a).

(4) No ocean freight forwarder may receive compensation from a common carrier with respect to any shipment in which the forwarder has a direct or indirect beneficial interest nor shall a common carrier knowingly pay compensation on any such shipment.

SEC. 12. PROHIBITED ACTS.

(a) IN GENERAL.—No person may—

(1) operate under an agreement described in section 4 that has not become effective under section 6, or that has been suspended, disapproved, or canceled;

(2) operate under an agreement described in section 4 except in accordance with its terms and any modifications to the agreement made by the Commission; or

(3) knowingly and willfully, directly or indirectly, by means of false billing, false classification, false weighing, false measurement, false report of weight or measures, or by any other unjust or unfair device or means obtain or attempt to obtain ocean transportation for property at less than the rates or charges that would otherwise be applicable;

(b) COMMON CARRIERS.—No common carrier, including a joint venture, either alone or in conjunction with any other person, directly or indirectly, may—

(1) charge, demand, collect, or receive greater, less, or different compensation for the transportation of property or for any service in connection therewith than the rates and charges that are specified in its tariffs;

(2) rebate, refund, or remit in any manner, or by any device, any portion of its rates except in accordance with its tariffs;

(3) extend or deny to any person any privilege, concession, equipment, or facility except in accordance with its tariffs;

(4) allow any person to obtain transportation for property at less than the rates or charges established by the carrier in its tariff by means of false billing, false classification, false weighing, false measurement, or by any other unjust or unfair device or means;

(5) retaliate against any shipper by refusing, or threatening to refuse, cargo space accommodations when available, or resort to other unfair or unjustly discriminatory methods because the shipper has patronized another carrier, or has filed a complaint, or for any other reason;

(6) make any unfair or unjustly discriminatory contract with any shipper or engage in any unfair or unjustly discriminatory practice against any shipper or port, in the matter of—

(A) rates or charges;

(B) cargo classifications;

(C) cargo space accommodations or other facilities, due regard being had for the proper loading of the vessel and the available tonnage;

(D) the loading and landing of freight in proper condition; or

(E) the adjustment and settlement of claims;

(7) employ any fighting ship; or

(8) offer or pay any deferred rebates.

(c) CONCERTED ACTION.—No conference or group of two or more common carriers, other than a joint venture operating by itself, may collectively—

(1) boycott or take any other concerted action resulting in an unreasonable refusal to deal;

(2) utilize a device or means that unreasonably sets conditions or otherwise unreasonably restricts the ability of a shipper to select an ocean common carrier in a competing trade, or an ocean tramp, or a bulk carrier;

(3) unreasonably restrict the employment of intermodalism or other technological innovations by member common carriers;

(4) engage in any predatory practice designed to eliminate the participation, or deny the entry, in a particular trade of an ocean common carrier not a member of the conference, a group of common carriers, an ocean tramp, or a bulk carrier;

(5) negotiate with any nonocean carrier or group of nonocean carriers (for example, truck, rail, or air operators) on any matter relating to rates or services provided to ocean common carriers within the United States by such nonocean carriers: *Provided,* That this prohibition shall not prohibit the setting and publishing of a joint through rate by a conference, joint venture, or an association of ocean common carriers authorized to file tariffs;

(6) deny in the export foreign commerce of the United States compensation to an ocean freight forwarder or limit the amount thereof to less than 1¼ per centum of the freight charges;

(7) allocate shippers among specific carriers that are parties to an agreement or prohibit any carrier that is a party to the agreement from soliciting cargo from any particular shipper, except as otherwise required by the law of the United States or the importing or exporting country, or as agreed to by a shipper in a service contract; or

(8) form or participate in a net profit or loss pool with other common carriers operating in the same trade.

(d) COMMON CARRIERS, OCEAN FREIGHT FORWARDERS, AND MARINE TERMINAL OPERATORS.—No common carrier, ocean freight forwarder, or marine terminal operator may—

(1) fail to establish, observe, and enforce just and reasonable regulations and practices relating to or connected with receiving, handling, storing, or delivering property;

(2) make or give any undue or unreasonable preference or advantage to any particular person, locality, or description of traffic in any respect whatsoever, or subject any particular person, locality, or description of traffic to an unreasonable refusal to deal or any undue or unreasonable prejudice or disadvantage in any respect whatsoever;

(3) knowingly disclose, offer, solicit, or receive any information concerning the nature, kind, quantity, destination, consignee, or routing of any property tendered or delivered to a common carrier, ocean freight forwarder, or marine terminal operator consent of the shipper or consignee if that information—

(A) may be used to the detriment or prejudice of the shipper or consignee:

(B) may improperly disclose its business transactions to a competitor; or

(C) may be used to the detriment or prejudice of any common carrier.

Nothing in this paragraph shall be construed to prevent providing such information in response to any legal process, to the United States, or to any independent neutral body operating within the scope of its authority to fulfill the policing obligations of the parties to an agreement effective under this Act. Nor shall it be prohibited for any ocean common carrier that is a party to a conference agreement approved under this Act, or any receiver, trustee, lessee, agent, or employee of such carrier or person, or any other person authorized by such carrier to receive information, to give information to the conference or any person, firm, corporation, or agency designated by the conference, or to prevent the conference or its designee from soliciting or receiving information for the purpose of determining whether a shipper or consignee has breached an agreement with the conference or its member lines or for the purpose of determining whether a member of the conference has breached the conference agreement, or for the purpose of compiling statistics of cargo movement, but the use of such information for any other purpose prohibited by this Act or any other Act shall be prohibited; and

(4) boycott or take any other concerted action resulting in an unreasonable refusal to deal.

(e) SHIPS DOCUMENTED UNDER UNITED STATES FLAG.—If, after notice and hearing, the Commission finds that the actions of carriers or foreign governments have unduly impaired access of any ship documented under United States flag to ocean trades between foreign ports, the Commission shall suspend the tariffs of such carriers or the national lines of such foreign governments, or both, in trades to and from United States ports, pursuant to the provisions of section 15(b)(1).

SEC. 13. COMPLAINTS, INVESTIGATIONS, REPORTS, AND REPARATIONS.

(a) FILING OF COMPLAINTS.—Any person may file with the Commission a sworn complaint alleging a violation of this Act and may seek reparation for any injury caused to the complainant by that violation.

(b) SATISFACTION OR INVESTIGATION OF COMPLAINTS.—The Commission shall furnish a copy of a complaint filed pursuant to subsection (a) to the person named therein who shall, within a reasonable time specified by the Commission, satisfy the complaint or answer it in writing. If the complaint is not satisfied, the Commission shall investigate it in an appropriate manner and make an appropriate order.

(c) COMMISSION INVESTIGATIONS.—The Commission upon its own motion may, in like manner and with the same powers, investigate any conduct that it believes may be in violation of this Act.

(d) SPECIAL INVESTIGATIONS OF CONDUCT PURSUANT TO POOLING AGREEMENTS.—(1) The Commission, upon complaint of a person, may initiate an investigation of conduct pursuant to an agreement to pool or apportion traffic or revenues, or establish a joint venture, with other common carriers operating in the same trade if it believes that conduct pursuant to the agreement substantially reduces competition in the trade.

(2) The Commission shall cancel or modify, any agreement subject to investigation pursuant to paragraph (1) if it determines that conduct pursuant to the agreement substantially reduces competition in the trade as a whole unless the agreement—

(A) results in gains in efficiency or services that outweigh any substantial reduction in competition; or

(B) is authorized by an express provision of a government-to-government agreement or undertaken pursuant to a government-to-government agreement in effect at the date of enactment of this Act, or an extension thereof;

(C) is in furtherance of foreign policy interests of the United States that outweigh the interests of the United States in preventing the substantial reduction in competition; or

(D) permits United States flag carriers to carry cargo of the importing or exporting foreign state which would otherwise be unavailable to such carrier, or available only on unequal terms by reason of the cargo reservation laws or trading practices (governmental or otherwise) of such state, provided that such agreement is not unjustly discriminatory among United States flag carriers.

(3) The sole remedy under this Act for conduct found to violate paragraph (2) is cancellation or modification of the agreement.

(e) REPORTS.—The Commission shall make a written report of every investigation made under this Act in which a hearing was held stating its conclusions, decisions, findings of fact, and order. A copy of this report shall be furnished to all parties. The Commission shall publish each report for public information and the published report shall be competent evidence in all courts of the United States.

(f) REPARATIONS.—For any complaint filed within 3 years after the cause of action accrued, the Commission shall, upon petition of the complainant and after notice and hearing, direct payment of reparations to the complainant for actual injury (which, for purposes of this subsection, also includes the loss of interest from the date of injury) caused by a violation of this Act. Upon a showing that the injury was caused by activity that is prohibited by section 12(b) (5) or (7) or section 12(c) (1) or (4), or that violates section 12(a) (1) or (2), the Commission may direct the payment of additional amounts; but the total recovery of a complainant may not exceed twice the amount of the actual injury. In the case of injury caused by an activity that is prohibited by section 12(b)(6) (A) or (B), the amount of the injury shall be the difference, plus interest from the date of the injury, between the rate paid by the injured shipper and the most favorable rate paid by another shipper.

(g) INJUNCTION.—In connection with any investigation conducted under this section, the Commission, at its sole discretion, may request the Attorney General to bring suit in a district court of the United States to enjoin conduct in violation of this Act after notice to the defendant, and upon a determination that—

(1) the Attorney General demonstrates substantial likelihood to prevail on the merits,

(2) irreparable injury would otherwise occur,

(3) issuance of the relief requested will not unduly harm the defendant or other persons, and

(4) the public interest would be served,

the court may grant a temporary restraining order or preliminary injunction for a period not to exceed 10 days after the Commission has issued an order disposing of the issues under investigation. Any such suit shall be brought in the district in which the defendant person, partnership, or corporation resides or transacts business.

SEC. 14. SUBPENAS AND DISCOVERY.

(a) IN GENERAL.—In investigations and adjudicatory proceedings under this Act—

(1) depositions, written interrogatories, and discovery procedures may be utilized by any party under rules and regulations issued by the Commission which rules and regulations, to the extent practicable, shall be in conformity with the rules applicable in civil proceedings in the district courts of the United States; and

(2) the Commission may by subpena compel the attendance of witnesses and the production of books, papers, documents, and other evidence.

(b) WITNESS FEES.—Witnesses shall, unless otherwise prohibited by law, be entitled to the same fees and mileage as in the courts of the United States.

SEC. 15. PENALTIES.

(a) ASSESSMENT OF PENALTY.—Whoever violates any provision of this Act, any regulation issued thereunder, or any Commission order is liable to the United States for a civil penalty. The amount of the civil penalty, unless otherwise provided in this Act, may not exceed $5,000 for each violation unless the violation was willfully and knowingly committed, in which case the amount of the civil penalty may not exceed $25,000 for each violation. Each day of a continuing violation shall constitute a separate offense.

(b) TARIFF SUSPENSION.—

(1) For any violation of section 12(b) (1), (2), (3), (4), or (8), or section 12(e), the Commission may suspend any or all tariffs of any common carrier, or that common carrier's right to use any or all tariffs of conferences of which it is a member, for a period not to exceed 12 months.

(2) For failure to supply information ordered to be produced or compelled by subpena under section 14, the Commission may suspend any or all tariffs of any common carrier, or that common carrier's right to use any or all tariffs of conferences of which it is a member.

(3) Any common carrier who accepts or handles cargo for carriage under a tariff that has been suspended or after its right to utilize that tariff has been suspended shall be subject to a civil penalty of not more than $50,000 for each shipment.

(4) If, in defense of its failure to comply with a subpena or discovery order, a common carrier alleges that documents or information located in a foreign country cannot be produced because of the laws of that country, the Commission shall immediately notify the Secretary of State of the failure to comply and of the allegation relating to foreign laws. Upon receiving the notification, the Secretary of State shall promptly consult with the government of the nation within which the documents or information are alleged to be located for the purpose of assisting the Commission in obtaining the documents or information sought.

(5) Before any tariff suspension ordered under this subsection becomes effective, it shall be immediately submitted to the President who may, within 10 days after receiving it, disapprove the order if he finds that disapproval is required for reasons of the national defense or the foreign policy of the United States.

(c) ASSESSMENT PROCEDURE.—The Commission may, after notice and an opportunity for hearing, assess each civil penalty provided for in this Act. In determining the amount of the penalty, the Commission shall take into account the nature, circumstances, extent, and gravity of the violation committed and, with respect to the violator, the degree of culpability, history of prior offenses, ability to pay, and such other matters as justice may require. Until a matter is referred to the Attorney General, the Commission may compromise, modify, or remit, with or without conditions, any civil penalty.

(d) REVIEW OF CIVIL PENALTY.—Any person against whom a civil penalty is assessed under this section may obtain review under chapter 158 of title 28, United States Code.

(e) FAILURE TO PAY ASSESSMENT.—If any person fails to pay a civil penalty that has been assessed after it has become final or after the appropriate court has entered final judgment in favor of the Commission, the Attorney General may seek to recover the amount assessed in any appropriate district court of the United States. In such an action, the court shall enforce the Commission's order unless it finds that the order was not regularly made or duly issued.

(f) LIMITATIONS.—

(1) No fine or other punishment may be imposed for criminal conspiracy to violate any provision of this Act, or to defraud the Commission by concealment of any such violation.

(2) Any enforcement action under this Act and any formal proceeding to assess any penalty under this section shall be commenced within 5 years from the date the violation occurred.

SEC. 16. COMMISSION ORDERS.

(a) IN GENERAL.—Orders of the Commission relating to any violation of this Act or any regulation issued thereunder shall be made, upon sworn complaint or on its own motion only after an opportunity for hearing. Each order of the Commission shall continue in force for the period of time specified in the order or until suspended, modified, or set aside by the Commission or a court of competent jurisdiction.

(b) REVERSAL OR SUSPENSION OF ORDERS.—The Commission may reverse, suspend, or modify any order made by it, and upon application of any party to a proceeding may grant a rehearing of the same or any matter determined therein. No rehearing shall, except by special order of the Commission, operate as a stay of such order.

(c) ENFORCEMENT OF NONREPARATION ORDERS.—In case of violation of any order of the Commission, or for failure to comply with a Commission subpena, the Commission, or any party injured by such violation, or the Attorney General may seek enforcement by any United States district court having jurisdiction over the parties. If, after hearing, the court determines that the order was properly made and duly issued, it shall enforce the order by an appropriate injunction or other process, mandatory or otherwise.

(d) ENFORCEMENT OF REPARATION ORDER.—(1) In case of violation of any order of the Commission for the payment of reparation, the person to whom the award was made may seek enforcement of the order in any United States district court having jurisdiction of the parties.

(2) In any United States district court the findings and order of the Commission shall be prima facie evidence of the facts therein stated, and the petitioner shall not be liable for costs, nor for the costs of any subsequent stage of the proceedings, unless they accrue upon his appeal. A petitioner in a United States district court who prevails shall be allowed a reasonable attorney's fee to be assessed and collected as part of the costs of the suit.

(3) All parties in whose favor the Commission has made an award of reparation by a single order may be joined as plaintiffs, and all other parties in the order may be joined as defendants, in a single suit in any district in which any one plaintiff could maintain a suit against any one defendant. Service of process against any defendant not found in that district may be made in any district in which is located any office of, or point of call on a regular route operated by, that defendant. Judgment may be entered in favor of any plaintiff against the defendant liable to that plaintiff.

(e) STATUTE OF LIMITATIONS.—Any action seeking enforcement of a Commission order shall be filed within 2 years after the date of the violation of the order, or 1 year after the date the violation is known or reasonably should have been known.

(f) ENFORCEMENT OF NONREPARATION ORDERS.—In case of violation of any order of the Commission, or for failure to comply with a Commission subpena, the Attorney General or any party injured by such violation may seek enforcement by any United States district court having jurisdiction over the parties. If, after a hearing, the court determines that the order was properly made and duly issued, it shall enforce the order by an appropriate injunction or other process, mandatory or otherwise.

(g) IMPACT REPORTS.—The Commission shall be exempt from the requirements for the preparation of impact reports pursuant to section 6362(b) of title 42, United States Code.

SEC. 17. REPORTS AND CERTIFICATES.

(a) REPORTS.—The Commission may require any common carrier, marine terminal operator, or ocean freight forwarder, or any officer, receiver, trustee, lessee, agent, or employee thereof, to file with it any periodical or special report or any account, record, rate, or charge, or memorandum of any facts and transactions appertaining to the business of that common carrier, marine terminal operator, or ocean freight forwarder. The report, account, record, rate, charge, or memorandum shall be made under oath whenever the Commission so requires and shall be furnished in the form and within the time prescribed by the Commission. Conference minutes and self-policing reports required to be filed with the Commission shall not be released to third parties or published by the Commission.

(b) CERTIFICATION.—The Commission shall require the chief executive officer of every ocean common carrier and, to the extent it deems feasible, may require any shipper, consignor, consignee, non-vessel-operating common carrier, marine terminal operator, ocean freight forwarder, or broker to file a periodic written certification made under oath with the Commission attesting to—

(1) a policy prohibiting the payment, solicitation, or receipt of any rebate that is unlawful under this Act;

(2) the fact that this policy has been promulgated recently to each owner, officer, employee, and agent thereof;

(3) the details of the efforts made within the company or otherwise to prevent or correct illegal rebating; and

(4) full cooperation with the Commission in its investigation of illegal rebating or refunds in United States foreign trades and in its efforts to end those illegal practices.

Failure to file a certification shall result in a civil penalty of not more than $5,000 for each day the violation continues.

SEC. 18. EXEMPTIONS.

The Commission, upon application or on its own motion, may by order or rule exempt for the future any specified activity or class of agreements subject to this Act from any requirement of this Act, if it finds that the exemption will not substantially impair effective regulation by the Commission and is not likely to result in any significant lessening of competition in any trade serving the United States in which ocean common carriers operate. The Commission may attach conditions to any exemption and may, by order, revoke any exemption. No order or rule of exemption or revocation of exemption may be issued unless opportunity for hearing has been afforded interested persons (who, for purposes of this section, include the departments and agencies of the United States).

SEC. 19. REGULATIONS.

The Commission may promulgate rules and regulations as necessary to carry out the provisions of this Act.

SEC. 20. REPORT TO CONGRESS.

No later than 2 years after the effective day of this Act, the Comptroller General shall submit to the Congress a comprehensive study of, and make recommendations concerning, the regulation of international ocean shipping by common carriers. Such comprehensive study shall specifically address—

(1) various options of deregulation of the international ocean shipping industry, with reference to their ability to promote an efficient, stable, and competitive United States common carrier fleet;

(2) the opportunities for harmonizing United States policy toward international ocean shipping with the policies of our major trading partners;

(3) the system for determining tariffs based on the classification of goods and its role in a deregulated international ocean shipping industry; including the most effec-

tive method for eliminating unnecessary cargo classifications as a basis for establishing tariffs and the feasibility of establishing a single tariff by each conference or common carrier for all cargoes shipped in units of comparable size, weight, and handling characteristics;

(4) the role of the antitrust laws in the international shipping industry and their impact upon our relations with foreign nations;

(5) the impact of the "rules of competition" being considered by our trading partners and their relationship to the trend in the developing world toward structured cartelization;

(6) the impact deregulation may have on the growth of State-owned or State-controlled merchant fleets;

(7) the size of the United States liner fleet, by number and cargo capacity, which each option may produce; and

(8) the future structure and role of the Federal Maritime Commission in a deregulated international ocean shipping industry.

SEC. 21. REPEALS AND CONFORMING AMENDMENTS.

(a) REPEALS.—The laws specified in the following table are repealed:

Shipping Act, 1916:	
Sec. 13	36 Stat. 117
Sec. 14a	46 U.S.C. 813
Sec. 14b	46 U.S.C. 813a
Sec. 18(b)	46 U.S.C. 817(b)
Sec. 18(c)	46 U.S.C. 817(c)
Sec. 26	46 U.S.C. 825
Sec. 44	46 U.S.C. 841b
Merchant Marine Act, 1920:	
Sec. 20	41 Stat. 996
Merchant Marine Act, 1936:	
Sec. 212(e)	46 U.S.C. 1122(e)
Sec. 214	46 U.S.C. 1124
Omnibus Budget Reconciliation Act of 1981:	
Sec. 1608	95 Stat. 752

(b) CONFORMING AMENDMENTS.—The Shipping Act, 1916 (39 Stat. 728), as amended (46 U.S.C. 801 et seq.), is amended as follows:

(1) in section 1 by striking the definition "controlled carrier";

(2) in sections 14, 15, 16, 20, 21(a), 22, and 45 by striking "common carrier by water" wherever it appears in those sections and substituting "common carrier by water in interstate commerce";

(3) in section 14, first paragraph, by striking "or a port of a foreign country";

(4) in section 14, last paragraph, by striking all after the words "for each offense" and substituting a period;

(5) in section 15, fourth paragraph, by striking "(including changes in special rates and charges covered by section 14b of this Act which do not involve a change in the spread between such rates and charges and the rates and charges applicable to noncontract shippers)" and also "with the publication and filing requirements of section 18(b) hereof and";

(6) in section 15, sixth paragraph, by striking ", or permitted under section 14b," and in the seventh paragraph, by striking "or of section 14b";

(7) in section 16, in the paragraph designated "First", by striking all after "disadvantage in any respect" and substituting "whatsoever.";

(8) in section 17 by striking the first paragraph, and in the second paragraph, by striking "such carrier and every";

(9) in section 21(b) by striking "The Commission shall require the chief executive officer of every vessel operating common carrier by water in foreign commerce and to the extent it deems feasible, may require any shipper, consignor, consignee, forwarder, broker, other carrier or other person subject to this Act," and substituting "The Commission may, to the extent it deems feasible, require any shipper, consignor, consignee, forwarder, broker, or other person subject to this Act,";

(10) in section 22 by striking subsection (c);

(11) in section 25, at the end of the first sentence, by adding "under this Act";

(12) in sections 29, 30, and 31, after the words "any order of the board", by adding "under this Act,";

(13) in section 32(a), by striking "and section 44"; and

(14) in section 32(c), after the words "or functions,", by adding "under this Act,".

(c) TECHNICAL AMENDMENTS.—Section 212 of the Merchant Marine Act, 1936 (46 U.S.C. 1122) is amended by—

(1) striking after subsection (d) the following undesignated paragraph:

"The Federal Maritime Commission is authorized and directed—";

and

(2) striking after subsection (e) the following undesignated paragraph:

"The Secretary of Transportation is authorized and directed—".

(d) EFFECTS ON CERTAIN AGREEMENTS AND CONTRACTS.—All agreements, contracts, modifications, and exemptions previously approved or licenses previously issued by the Commission shall continue in force and effect as if approved or issued under the provisions of this Act; and all new agreements, contracts, and modifications to existing, pending, or new contracts or agreements shall be considered under the provisions of this Act.

(e) SAVINGS PROVISIONS.—

(1) Notwithstanding section 9(c), each service contract entered into by a shipper and an ocean common carrier or conference before the date of enactment of this Act, may remain in full force and effect and need not comply with the requirements of that subsection until 15 months after the date of enactment of this Act.

(2) This Act and the amendments made by it shall not affect any suit filed before the date of enactment of this Act.

SEC. 22. EFFECTIVE DATE.

This Act shall become effective 180 days after the date of its enactment, except that section 19 shall become effective upon enactment.

Mr. GORTON. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, there will be no more record votes today.

Mr. President, I wish to take this opportunity to congratulate all of those involved for the expeditious management and handling of this matter in bringing it to a conclusion today. I especially wish to express my appreciation to the distinguished Senator from Washington (Mr. GORTON). This is the first major piece of legislation—not the first piece of legislation—the first major piece of legislation he has handled. He did it with great style and grace and I congratulate him for his participation in this matter.

The Senator from Ohio has once again exhibited his understanding and his responsibility not only to his constituents but to the Senate. He has handled himself in an effective and definitive way. If it had been one bit more effective, we might have been tied up in filibuster for days.

Mr. METZENBAUM. May I say a word about the management of this bill?

Mr. BAKER. Yes; the Senator from Oregon requested equal time.

Mr. METZENBAUM. The Senator from Oregon handled this bill with ability and he has kept his cool. It has been a pleasure to work with him in connection with this matter. I will not change my views with respect to it, but I do commend him in every way on the manner in which he conducted himself as manager of the bill.

SENATE AGENDA

Mr. BYRD. I hope the distinguished majority leader will inform the Senate as to what the business will be for the remainder of the week.

Mr. BAKER. Yes; I intend to do that.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. BAKER. Mr. President, in response to the inquiry of the distinguished minority leader, this is one of those happy circumstances when I can report that we are ahead of schedule. Indeed, on my private notepad on which I keep track of matters at hand, I had suspected that we would still be on the shipping bill, today, tomorrow, and goodness knows how much longer.

Mr. President, I had hoped that tomorrow we might take up the committee budget resolutions duly reported from the Rules Committee. I will not presume to ask the minority leader to approve that at this time since it will require a waiver of the 3-day rule and agreement to take it up notwithstanding the provisions of the 1-day rule. But usually these are noncontroversial and are thrashed out in the committees. I hope that we may be able to waive those rules and proceed to the consideration of those matters tomorrow. It may be that tomorrow and Thursday would let us complete that, or maybe we can do it all tomorrow. But in any event, my first answer to the minority leader is that if we can clear it, I would hope to dispose of the committee resolutions from the Rules Committee on tomorrow.

On Thursday, Mr. President, I would hope that we would be able to vote on the Convention on International Expositions on which I have a unanimous-consent agreement I would like to propound later.

If we get an agreement, Mr. President, on the Montreal protocols,

which appears to be possible, although perhaps not yet cleared, I would propose that the Senate go out then, after we complete our business on Thursday, until Monday next.

I might say, parenthetically, that the agreement we are trying to clear on the Montreal protocols would provide for the Senate to go into executive session on Monday next and take up those matters, have a time for debate equally divided, perhaps 6 hours and maybe as short as 4 hours, and to have the vote on the resolution of ratification on Tuesday. That is, to complete the debate on Monday and then to have 1 hour of debate provided for on Tuesday, with the vote to occur at 11 a.m. on Tuesday.

Mr. President, in addition to that, next week we have other matters that may reach us that can be dealt with. For instance, there is an urgent supplemental appropriations bill that carries with it the jobs bill. If that does reach this body and if the Appropriations Committee is ready to proceed. I would hope we would take that up next week as well.

Mr. President, in addition, in answer to the specific question put by the minority leader, let me report to him what I said in my caucus today.

There are three major items that I feel we must deal with before we go out for the Easter recess on March 25. We have to deal with the social security bill as and when it reaches this body. I am advised by the chairman of the Finance Committee, Senator DOLE, that he hopes to have that on the calendar here on the 15th or 16th of March. I am committed and I remain committed to take that up as soon as we can. But if there is a requirement to observe the provisions of the 3-day rule, that would mean the 18th or 19th of March before we can reach it. That is the first item, though not necessarily will these be in sequence.

The second item is one I have already spoken of, the jobs bill, which will be imbedded in a supplemental appropriations bill when it reaches us from the House of Representatives. I have spoken to the chairman of the Appropriations Committee, Senator HATFIELD, and he has indicated that he could make good speed on that when the House has finally acted. That is the second item we must deal with before the recess.

The third item, Mr. President, is the budget resolution. I have asked the chairman of the Budget Committee to try to expedite the first concurrent budget resolution. I believe he has communicated that desire to his counterpart, Senator CHILES, of Florida, and I am told that they are making good progress on the reporting of a resolution in March. If we receive that in March, I am committed to try to take it up as soon as possible, not only for the purpose of expediting the business of the Senate, but also because it should expedite the business of the Appropriations Committee in trying to deal with the several bills that they must deal with this year, since we have all 13 of them that we will deal with in view of the continuing resolution that extends for the remainder of this year.

There are other matters, Mr. President, that I would like to deal with before we go out for the Easter recess, but I do not have my list in front of me right now.

Some that come to mind are perhaps two agriculture bills, the PIC bill, and the commodities bills; two other urgent supplementals in addition to the one with the jobs bill; two nominations that have or may have reached the Senate that we might be able to do late in March. The Adelman nomination I do not expect to be able to do before the middle of March at the earliest and maybe not until after the recess. Then the Heckler nomination, if we receive it, will be eligible sometime in March. Neither of those would interfere with the Easter recess, but they are matters that I would like to deal with as and when we can.

Mr. President, that is a general overview. The summation of it, in response to the minority leader's question, is that this week I would like to complete the committee resolutions reported by the Rules Committee, on tomorrow and Thursday, if necessary, and a treaty on international exposition on Thursday, which will require a rollcall vote, I am sure.

I am not sure whether we will have rollcall votes tomorrow or not. It depends on how the committee resolutions make their way through this Chamber, if we reach them.

Then we shall try to get a unanimous-consent agreement on the Montreal Protocols for Monday, a vote on Tuesday, in which event, we shall not be in on Friday.

So, Mr. President, it looks as if we will not have a late day today. I would not expect it to be a late day tomorrow or Thursday or Friday; come in on Monday, do the Montreal Protocols debate, come in on Tuesday and see how soon we can get up the urgent supplemental dealing with jobs.

That, Mr. President, is perhaps a longer report than the minority leader wished, but that is at least all I know on that subject.

Mr. BYRD. Mr. President, I am very agreeable to waiving the requirement for the 3-day rule on the budget resolution, but I think we ought to have an agreement that there will be no nongermane amendments offered to any of the resolutions.

Mr. BAKER. I agree. I shall ask my cloakroom to try to clear that unanimous-consent agreement to lay down the budget resolution tomorrow immediately after the close of morning business, with the provision that no nongermane amendment be in order to any of the several sections of that resolution.

Mr. BYRD. I thank the leader.

EXPRESSIONS OF THANKS AND APPRECIATION

Mr. GORTON. Will the majority leader yield?

Mr. BAKER. Yes, I yield.

Mr. GORTON. I wish to thank the majority leader for his kind words. I also thank my friend, the Senator from Ohio, for his kind words.

Mr. President, I can say that the Senator from Ohio and I have been on opposite sides of a number of debates in my short period of time here. That has been one of the real pleasures which I have had as a Member of the Senate, to be able to discuss an issue of significance and importance in a way which deals with the issue with an individual who has very, very strong feelings, who articulates those feelings very well, who has good factual background for everything he says. It was a debate, I hope, in the best traditions of the Senate. I look forward to more of them with the Senator from Ohio in the future.

Mr. METZENBAUM. I thank the Senator.

Mr. GORTON. I should also like to say to the majority leader that in any bill of such a technical nature as this, we are very, very much dependent on our staffs. The Commerce Committee staff, including Mr. Kovach and Mr. White, has done a very, very fine job, as has Mr. Hardy of the minority staff.

I should say at this point that getting to know the Senator from Hawaii (Mr. INOUYE) in the first 2 years of discussion of this bill has been a very significant privilege to me as well.

Mr. Phillips from the majority whip's staff has played a very important role.

I want especially to thank Peter Friedmann of the Commerce Committee, Cassie Phillips of my own personal staff, and my former staff member, Terry Spilsbury, for the untold hours they put in on seeing to it that I covered this well and, with the legislative aides of all of the other Senators, understood the nature of the bill. It is due to them largely that we have been successful and we have done as well as we have.

Mr. BYRD. Mr. President, I congratulate the Senator from Washington on having done a very fine job, demonstrating ingenuity and skill and great knowledge of the subject matter. This may not have been his first bill to manage on the floor—I do not recall. In any event, it was a stellar performance. I think we can all take pride in the way he handled the bill.

In addition, I want to say, to his doing a good job, I like him very much. I do not pass that encomium on very often. I say that about the majority leader and one or two others. I mean that. That is not to say I dislike anyone around here, but I like this new Senator from Washington.

Mr. BAKER. Mr. President, I can verify that the minority leader does not do that very often. I commend the junior Senator from Washington and say that that is a very, very high compliment. I have heard very few of them from the minority leader. The only reservation I have is that it sounded terribly, like recruiting.

Mr. GORTON. The Senator from Washington is very cognizant of the compliments he has received and is going to quit while he is ahead.

Mr. BYRD. Mr. President, I also want to compliment Senator METZENBAUM. The Senate would not be what it is without HOWARD METZENBAUM. I do not always agree with him, but I think the Senate should have a METZENBAUM always, on one side of the aisle or the other. He makes the Senate sit up and take notice, and we are forced to give more attention to legislation. By virtue of people like HOWARD METZENBAUM, the Senate gives more attention to controversial legislation. He has the courage to stand alone if need be. I think the Senate is in his debt also.

Mr. BAKER. Mr. President, I agree with the minority leader. I have often disagreed with the Senator from Ohio, but I constantly admire his courage and dedication to those things in which he believes and his effectiveness in espousing them here on the floor. I agree we always need a METZENBAUM but, at the risk of being ungraciously facetious, may I add to that, but only one at a time.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business to extend not past the hour of 5 p.m., in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

MUTUAL GUARANTEED BUILDDOWN OF NUCLEAR FORCES

Mr. PERCY. Mr. President, last month Senators COHEN and NUNN introduced Senate Resolution 57, which calls on the United States and Soviet Union to agree that while START is negotiated, each side will dismantle two nuclear warheads for every new one they deploy. The Cohen-Nunn proposal for a mutual guaranteed builddown of nuclear forces is one of the most innovative and promising arms control proposals to be presented to the Senate in many years. I will invite the two architects of this resolution to testify before the Foreign Relations Committee when we hold hearings later this spring on the United States-Soviet nuclear relationship.

Although Senate Resolution 57 has largely escaped media attention, it has already garnered an impressive degree of support. As Senator COHEN has noted, the President has expressed "his very sincere and serious interest in pursuing this particular concept." Under Secretary of Defense DeLauer has written a very supportive letter advising Senator COHEN that, "the thesis that newer systems should be able to replace older ones on more than a one to one basis is just what I am trying to bring about." And on February 9, Gen. David Jones, former Chairman of the Joint Chiefs of Staff, praised the resolution in congressional testimony, saying it has "the elements of something much more in long term cuts than the current proposals." Senate Resolution 57 now has 15 cosponsors, including Senators from both sides of the aisle.

There are a number of reasons why the Cohen-Nunn proposal is attracting such wide, bipartisan support. First, as is the case with the nuclear freeze proposal, it benefits from an underlying concept that can be readily grasped and embraced by the general public. But unlike the freeze, which regrettably would sanction each side's keeping every nuclear weapon they already have, the Cohen-Nunn requirement for "giving up two to get one" would immediately start the United States and Soviet Union down the road toward real weapons reductions.

Second, the resolution would permit the United States to proceed with essential strategic and theater nuclear force modernization. These programs are needed to correct military vulnerabilities and provide bargaining leverage in on-going arms control negotiations. If Congress agrees, new nuclear weapons could be deployed, but only if twice as many existing systems are retired. Under the Cohen-Nunn concept, therefore, vital modernization programs would lead to a more survivable and hence stable nuclear balance with the Soviet Union at far lower levels of weaponry. This should alleviate the fear of many freeze advocates that the Reagan administration's proposed strategic modernization program will prompt an unregulated and destabilizing arms buildup.

Third, most of the procedures, definitions, and counting rules already laboriously negotiated with the Soviets in SALT could be readily applied in implementing the mutual guaranteed builddown proposal. The SALT I interim agreement, which each side still observes, provides a comprehensive blueprint for establishing a new "old-for-new" trade-off regime. For example, the United States continues to retire one older Polaris SLBM launcher for each new Trident SLBM launcher it deploys, and the Soviet Union continues to dismantle Yankee-class SLBM launchers to make room for newer Delta and Typhoon SLBM launchers.

Under the Cohen-Nunn approach, the only difference would be one of degree. In place of the current 1-for-1 exchange, Senate Resolution 57 would require a 2-for-1 trade off. The present SALT I rules for phasing deployments with dismantlements could be maintained, though, and the SALT Standing Consultative Commission (SCC) could be empowered to oversee the implementation of the new agreement.

The Cohen-Nunn proposal could also draw on agreements reached in SALT II and thereby simplify and streamline the difficulties inherent in attaining a new agreement with the Soviet Union. For example, SALT II provides established rules for counting and limiting the number of warheads on ballistic missiles currently deployed or under development. The treaty also contains a number of other prohibitions and limitations, such as a ban on encrypting treaty-related telemetry, which would strengthen enforcement of a mutual guaranteed builddown accord. In this respect, the Cohen-Nunn proposal is fully consistent with President Reagan's pledge that the United States will continue to avoid actions that would undercut the SALT I and II agreements as long as the Soviets demonstrate the same restraint.

Lastly, the Cohen-Nunn concept would, if implemented, fully complement START. By establishing a new interim framework for reciprocal and verifiable reductions, Senate Resolution 57 would promote a climate of restraint and trust that would enhance the prospects for success in START. Furthermore, the concept is entirely compatible with the proposal which our START negotiators have tendered in Geneva.

To illustrate this point, I urge my colleagues to look at three related questions. First, what would the U.S. strategic ballistic missile force most likely look like in 1989 if the Soviets were to accept our START proposal? Second, how many ICBM and SLBM warheads would have to be dismantled under the Cohen-Nunn 2-for-1 rule if the United States deployed new strategic systems to meet this projected inventory? Third, what number and types of existing ICBM and SLBM warheads would the United States have to destroy by 1989—independent of Cohen-Nunn—to meet our START proposal, assuming it were accepted?

Mr. President, I ask unanimous consent to have printed in the RECORD three tables which address these questions.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE 1.—HYPOTHETICAL U.S. MISSILE FORCE IN 1989 UNDER U.S. START PROPOSAL

Missiles	Number	Warheads	Number
ICBM'S:			
MX	100	10 per ICBM [1]	1,000
MMIII	422	3 per ICBM	1,266
Subtotal	522		2,266
SLBM'S:			
C–4 on 11 Ohio SSBN's [2]	264	8 per SLBM	2,112
C–4 on 4 Lafayette SSBN's [3]	64	8 per SLBM	512
Subtotal	328		2,624
Total ICBM's + SLBM's [4]	850	Total RV's	4,890

[1] All warhead fractionalization figures reflect SALT II counting rules.
[2] 11 Ohio-class SSBN's correlates to the Trident shipbuilding program through the fiscal year 1984 request.
[3] Assumes Trident C–4 backfit will be completed on all 12 programed ships by end of 1983.
[4] The United States has proposed a ceiling of 850 ICBM's and SLBM's in START and limit of 5,000 ICBM and SLBM warheads, no more than half of which (2,500) can be deployed on ICBM's.

TABLE 2.—ASSOCIATED DISMANTLEMENTS REQUIRED UNDER COHEN/NUNN

	Number
100 MX × 10 RV/ICBM × 2	2,000
216 C–4 × 8 RV/SLBM × 2	[1] 3,456
Total RV's	5,456

[1] 2 Ohio-class SSBN's, with 48 C–4 and 384 SALT-accountable RV's are already deployed. Dismantlements only associated with 9 new Ohio SSBN's.

TABLE 3.—ASSOCIATED DISMANTLEMENTS REQUIRED UNDER U.S. START PROPOSAL [1]

	Number
52 Titan II's x 1 RV/ICBM	52
450 MM II's x 1 RV/ICBM	450
128 MM III's x 3 RV/ICBM	384
112 A–3 x 1 RV/SLBM	[2] 112
304 C–3 x 14 RV/SLBM	4,256
128 C–4 x 8 RV/SLBM	[3] 1,024
Total	6,278

[1] List includes some systems (Titan II ICBM's which the U.S. plans to retire unilaterally and some systems (Polaris SLBM launchers) which the United States will have to dismantle if it continues to respect SALT I.
[2] 7 Polaris-class SSBN's remain in the force. Their SLBM launchers are empty but since they have not been dismantled they still must count under SALT rules.
[3] This figure reflects SALT-accountable RV's on the 8 Lafayette-class Trident-backfit submarines that could not be retained under the force mix portrayed in table 1.

Table 3 shows that the United States would have to dismantle 6,278 missile warheads to deploy the optimal START-compatible ICBM and SLBM force detailed in table 1. Table 2 shows that under Cohen/Nunn tradeoff rules, the United States would give up 5,456 warheads as it made the transition to this same optimal force mix. In other words, the Cohen/Nunn proposal is not only fully consistent with the U.S. START proposal, but it would also carry us 90 percent of the way toward the sharply reduced missile and warhead ceilings we seek in this negotiation. There is one important difference, though. Whereas under START, reductions will not begin until a final accord is reached, the Cohen/Nunn proposal would get us moving in that direction right away. Should our negotiators subsequently come home with a START accord, it could supersede, and perhaps accelerate, reductions which would otherwise occur under the Cohen/Nunn interim framework.

Mr. PERCY. When Senators COHEN and NUNN introduced their resolution last month, they noted that many details remained to be worked out and invited comment from other Senators. In this spirit, and with respect for their leadership in originating this concept, I would like to suggest several refinements and elaborations which I hope the Senators might consider as debate proceeds on their resolution.

First, I would note that Senator COHEN indicated considerable flexibility in stating that "the precise elements of the formula could be crafted to focus narrowly on one type of weapons mix or broadened to encompass a range of nuclear armaments." I would recommend that the Senators consider establishing three categories, or "baskets," with different counting rules for each but within which there would be complete freedom to mix. These baskets are designed to reflect the different nature of the types of weapons systems involved—intercontinental missiles, bombers, and theater nuclear weapons.

Basket One would include ICBM's and SLBM's, as defined in SALT II. Each deployed type would be assumed to carry warhead numbers conforming to SALT II specifications, and the "2-for-1" tradeoff rule would apply to warheads, not the launchers or missiles themselves. For example, deployment of 1 MX, with its 10 SALT-accountable RV's, or one new type Soviet ICBM with an equivalent number of warheads, would require dismantlement of 20 RV's now deployed on SALT-accountable ICBM or SLBM types.

Basket Two should apply to heavy bombers, as defined in SALT II. In this case, the unit of account should be the bomber itself, as was the case in SALT II and corresponds to our approach in START, and not force loadings such as bombs, SRAMS, or ALCM's. However, the SALT II counting rules based on ALCM range and the ALCM fractionalization limits could be kept in place. Within this basket, each side would have to dismantle two existing bombers for each new bomber it deploys. For example, the Soviets would have to retire two Bear or Bison bombers to deploy one of its new Blackjack bombers.

Basket Three would cover other nuclear weapons, for example, short- and intermediate-range nuclear systems, including SLCM's, GLCM's, Backfire bombers, nuclear artillery shells, and other battlefield nuclear devices. Since verification of this category of weapons would be more difficult than would be the case with the other two baskets, it might be wise to implement the Mutual Guaranteed Builddown proposal in stages, rather than wait for a comprehensive agreement. Such an approach would correspond to our strategy in the START and INF negotiations, where some of the more intractable negotiating problems have prudently been reserved for a second or third phase of negotiations.

My second recommendation relates to the relationship between the Cohen/Nunn proposal and START. I would suggest that upon passage of Senate Resolution 57, the President should direct Ambassador Rowny to give priority to reaching agreement with the Soviet Union on an interim dismantlement agreement that would incorporate the basic "2-for-1" tradeoff criteria established in the Cohen-Nunn proposal, plus whatever refinements may be developed as Senate debate on the resolution proceeds. This approach would obviously require a temporary break in the negotiations on our START proposal. But this hiatus would be well worth the price if, as I believe, the two sides could reach quick agreement on an interim agreement that would take us in the direction that we both seek. By focusing first on Baskets One and Two and folding in as much as possible from the SALT accords, I am confident that the delay in negotiating START need not be lengthening.

Once the mutual guaranteed builddown agreeement is in place, it should serve as the sole, definitive basis for determining United States and Soviet arms control obligations while START is negotiated. This new interim agreement should supersede the informal SALT restraint policy which has more or less regulated United States and Soviet strategic developments the past several years. To insure that Soviet incentives for serious bargaining in START are preserved, I would also recommend that U.S. compliance with the interim builddown accord be made contingent on good faith negotiations on their part. This could be accomplished by providing the President with the traditonal authority to withdraw from the agreement should he determine that the national security interests of the United States so require.

Last, I would recommend that the mutual guaranteed builddown proposal be put to the Soviets as a draft text which, once agreement is reached, can be ratified by both states according to their constitutional procedures. Given the comprehensive and technical nature of the proposal, each side's rights and responsibilities should not be open to possible misinterpretation. This subject is too grave to be handled by statements and declarations. Similarly, the interests of the Constitution and U.S. law, especially section 33 of

the Arms Control and Disarmament Act, would be better served if Congress formally approves an arms control agreeement of this scope and significance.

Mr. President, in closing, I would like to again pay tribute to Senators COHEN and NUNN for their leadership in bringing this imaginative proposal before the Senate. From my visits to Illinois, I know that citizens of all walks of life and all political persuasions are mobilizing as never before on the nuclear weapons issue. Speaking with virtually one voice, millions of Americans are demanding that we, in Government, act now to reverse the steady accumulation of new and deadly stockpiles of nuclear weapons on both sides. I believe that Senate approval of Senate Resolution 57 would go a long way in reassuring our constituents that we are indeed responding to their heartfelt concerns.

MONTREAL AVIATION PROTOCOLS

Mr. PERCY. Mr. President, the Senate will soon be asked to consider Montreal Protocols Nos. 3 and 4 and to give its advice and consent to their ratification by the United States. The protocols provide essential reforms of existing international aviation agreements and are in the best interest of Americans flying beyond our shores. Rejection of the protocols serves the interests of only a fraction of the most wealthy American travelers and of a small group of aviation litigation specialists.

The Montreal Protocols, with the Senate conditions recommended by the Foreign Relations Committee, represent a comprehensive package of coverage for all Americans traveling on international flights. This package would have the following results:

Raise the present limit on most recoveries from $75,000 to at least $320,000—and even higher if the Civil Aeronautics Board is able to construct a reasonable supplemental compensation plan with higher levels;

Provide unlimited hospital and medical benefits in the event of injury—without regard to the $320,000 level;

Guarantee recovery for damages without the need to prove fault, specifically including acts of terrorism, war, sabotage, hijacking, and natural disasters;

Assure access to U.S. courts by American citizens;

Assure cash recoveries, in most cases, within 6 months of an accident rather than years later;

Reduce legal expenses to normal hourly rates rather than 20 to 40 percent of the victims' recoveries;

Mandate annual review of the system by the Civil Aeronautics Board and withdrawal by the United States if the system proves inadequate;

Assure automatic increases in liability levels every 5 years and continued efforts by the U.S. Government to negotiate ever higher levels of airline liability;

Preserve international consensus on a uniform system of compensation which would protect Americans worldwide and not leave some citizens to the mercy of foreign courts and very low limits on recoveries.

Most Members of the Senate are unfamiliar with the details of the arguments for and against U.S. ratification of the Montreal Protocols, as well as the complicated history of the negotiations which led up to their conclusion. I would not expect most of my colleagues to become experts on all these issues before we vote. But those who feel persuaded by the arguments of opponents to the protocols would do well, I think, to try to reconcile those arguments with the following three points:

First, most Americans who have been the victims of international aviations accidents during the past two decades have been compensated with $75,000 or less.

Second, during the same time period only once has a U.S. court determined that an airline was guilty of "willful misconduct," which is the only existing test for exceeding the pesent $75,000 limit. There have been settlements at a higher figure, but the determination itself is virtually never made.

Third, if the proposed Montreal Protocol package is rejected by the Senate, we will eventually have to replace it with a similar type of system.

Let me now elaborate on each of these points.

1. COMPENSATION

Despite what opponents of the protocols suggest, during the past two decades the actual recoveries of international accident victims are most often limited to $75,000 or less. During the past 6 years, in fact, recoveries in international aviation accidents have averaged only $65,200. In comparison, the combined system represented by the Montreal Protocols and supplemental compensation plan would provide a potential $320,000 in recovery. At that level, more than 85 percent of the settlements resulting from recent domestic and international accidents would be covered. Furthermore, the payouts would occur much more quickly and with much lower legal fees.

Whatever may be said about the theory of compensation through litigation, the great majority of Americans are not doing particularly well by it. We may read from time to time of multimillion-dollar lawsuits filed as a result of aviation accidents, but very few of those actually result in comparable recoveries, and even some of those large recoveries are in cases of injury rather than death. For such cases, there would be no limit at all on the hospital and medical costs recoverable under the proposed system.

Consider how the present system has worked in the most recent accident for which data is available, the 1979 DC-10 crash in Chicago. In the first 6 months after that crash, less than 5 percent of the 258 cases were settled. Less than 20 percent were settled within 1 year; 3 years after the accident, 40 percent of the cases remain unsettled. Of the cases that have been settled, let us consider how some of the victims' families have fared. Of the higher settlements reached so far, one widow received over $1 million, of which her attorneys received nearly $400,000. One reporter has estimated that this amounted to somewhere between $10,000 and $15,000 per hour. Another widow received $278,000 for herself and $33,000 for each of her three children, but paid to her lawyers $172,000. In a third case, a widow received $129,000 and $12,500 for each of her three children, while the attorney pocketed $83,333. In a fourth case, a widow and two children received $350,000, compared with her lawyers fee of $94,434. Reacting to such facts, a presiding senior Federal judge temporarily halted all damage payments to review their fairness, and described the existing practices as "gouging," "shafting," and "seriously out of line."

But such contingent fee results are not uncommon. Settlements arrived at under these typical arrangements must be discounted by anywhere from 20 to 40 percent to arrive at the actual recoveries of the victims' families. And such costs do not even factor in the costs to the taxpayer of long, drawn-out proceedings which tie up judges, juries, and defendents' counsel for lengthy periods of time.

Therefore, the real question is not whether the system of compensation provided in the Montreal Protocols is ideal, but whether it is better than the existing alternative. At this point, I ask unanimous consent to include in the RECORD a summary of the best available statistics on accident recoveries over the past 5 or 6 years, as provided to the committee by the Department of State.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

COMPARISON OF RECOVERY LEVELS FROM AIRLINE ACCIDENTS

	Number of claims	Total settlement amount	Average settlement
International:			
Injury	58	$12,102,000	$208,700
Death	388	16,971,000	43,700
Total	446	29,073,000	65,200
Domestic:			
Injury	144	5,610,000	39,000

COMPARISON OF RECOVERY LEVELS FROM AIRLINE ACCIDENTS—Continued

	Number of claims	Total settlement amount	Average settlement
Death	347	83,081,000	239,500
Total	491	88,691,000	180,600
Combined international and domestic:			
Injury	202	17,712,000	87,700
Death	735	100,052,000	136,100
Total	937	117,764,000	125,700

Note.—For combined international and domestic recoveries, the percentage falling under $325,000 = 88.3 percent.

Source: The above data is the result of a case-by-case analysis of seven major accidents which involved both international (Warsaw) and domestic cases: Pan Am at Tenerife, March 1977; Southern near Atlanta, April 1977; PSA at San Diego, September 1978; United at Portland, December 1978; Continental at Los Angeles, April 1979; American's DC-10 at Chicago, April 1979; Western at Mexico City, October 1979.

The statistics on each case were provided by the airlines and insurance companies, on a confidential basis, to the Air Transport Association. While this information cannot be made public, officials from the Department of State and the Department of Transportation have carefully scrutinized the individual figures and information upon which the tables were based. Those officials, having thoroughly reviewed this data, believe that this analysis is accurate.

2. SAFETY

Mr. PERCY. Mr. President, I shall now turn to safety.

There is no real basis to the suggestion that the Montreal Protocols, by removing the provision for findings of "willful misconduct," will lower the safety standards of airlines and result in sloppier practices and more frequent accidents. As noted above, we have found only one case in the past 15 years in which a court has actually made a determination of willful misconduct. That accident occured in the South Pacific in 1974. It may be of interest to note that of the 91 people killed in that accident nearly 9 years ago, almost a third of them remain uncompensated today. Of those who have settled, the average settlement is $89,000.

Why is the prospect of recoveries drastically lower than those provided for in the proposed system supposed to be a greater incentive to safety? If money were in fact the only incentive to safety, the cost of replacing the aircraft itself would be a greater incentive since its value is generally greater than the amounts paid in compensation to the victims themselves.

But the lawsuits of victims and their families are simply not the greatest incentive to safety. The National Transportation Safety Board and the Federal Aviation Administration are charged by statute to constantly examine airline operations and to prosecute violations and, in the case of the FAA, to withhold or withdraw certificates for safety violations. The NTSB reconstructs every U.S. airline accident with enormous care and often participates with foreign counterparts in the investigation of foreign airline accidents. Such scrutiny has no relationship to allegations of willful misconduct; it occurs for both domestic and international operations on an ongoing basis, before and after an accident.

Furthermore, it is obvious that airlines lose business after a serious accident even if it cannot be shown that they were wilfully at fault. The competitive pressures to maintain safety are powerful incentives themselves. Removal of the provision for exceptions to liability limits in the case of wilful misconduct would hardly affect the situation.

3. WORLDWIDE COVERAGE

Opponents of the protocols would have us believe that we can simply strip away the Warsaw system on our own and operate without an international agreement of any kind. In effect, they suggest that U.S. denunciation of the Warsaw Convention would lead to a system of unlimited liability, with every American or his surviving family being able to bring a case in a U.S. court even if the accident itself occurred in some other part of the world. Furthermore, they assert that operation without an agreement would pose no serious problems for Americans and no problems for the U.S. Government, the American carriers, or American manufacturers.

I would suggest to my colleagues that, once again, this theory would not survive long in the real world. Americans could not be assured of getting into a U.S. court. They are not always successful under the present system and they would be even less secure in the event that the United States withdrew from the present treaty system entirely. For without a system which provides a uniform set of standards on questions of jurisdiction—which courts decide—choice of law—which standards control—and damages—what recoveries people are entitled to—American citizens would force a maze of legal problems, often in foreign, unfamiliar settings, and often in countries whose limits on liability are much lower than even the $75,000 figure presently applicable on flights to and from the United States. In other words, without a system providing worldwide protection to American travelers, some Americans would be left out in the cold.

As a result, the advantages of maintaining a uniform system would very soon lead the United States back into a system very much like the modified system we are proposing in the protocols, except that the credibility and influence of the United States would be seriously undercut by our failure to approve these protocols, since they were largely the result of a U.S. initiative in the first place.

We will be prepared to go further into the details of the protocols and the reasons for them when the floor debate begins. I would simply conclude, Mr. President, by including a letter which encapsulates the comments made by a number of prominent Americans who support U.S. ratification of the protocols.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

SUPPORTERS OF RATIFICATION
AIR TRANSPORT ASSOCIATION
OF AMERICA,
Washington, D.C., February 14, 1983.

Hon. CHARLES H. PERCY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PERCY: Distinguished leaders state why the Montreal Protocols are worthy of your support:

"The Montreal Protocols are the result of decades of effort by the United States to improve the existing Warsaw treaty system . . . and that agreement represents a major diplomatic success. Failure to ratify the Montreal Protocols would seriously undermine our credibility in the international aviation community."—George Shultz, Secretary of State, August 1982.

"(The Protocols) provide the best possible world-wide protection for travelers and shippers. The past four administrations have been convinced that these instruments are highly desirable amendments to a treaty which clearly serves the best interests of U.S. citizens using international air transportation."—Gerald Ford, former President, June 1982.

"The bipartisan support for the Montreal Protocols, as demonstrated by three different administrations, is easy to understand. The Protocols update a badly outmoded system of airline liability . . . The United States has been a leading force in negotiating the Montreal Protocols . . . I strongly recommend Senate ratification."—Edmund Muskie, former Secretary of State, June 1982.

"The chief beneficiary of the Protocols will be the American consumer. With the Protocols in place, the likelihood is that the air crash passenger or his estate will recover more swiftly and more completely than under the present system—and vastly more so than under the conditions that might obtain if the United States were to disapprove the Protocols and international cooperation in this realm were to begin to unravel."—Warren Christopher, former Deputy Secretary of State, July 1982.

"The United States has long been a leader in the development of uniform rules to govern international air transportation. It is essential that American travelers and shippers be protected by worldwide standardized rules. Failure of the United States to ratify treaties it has long sought can diminish its future effectiveness in promoting uniform rules for international aviation."—Drew Lewis, Secretary of Transportation, March 1982.

"The United States has long been the prominent leader among nations engaged in international civil aviation. It is vital that we reaffirm our leadership in this area, as that role today faces serious challenges from abroad."—James Baker, Chief of Staff, The White House, June 1982.

"The Montreal Protocol No. 3 should be ratified for several compelling reasons . . . a plaintiff will not need to prove fault . . . this will not require the lengthy litigation often needed to prove fault. Under the Supplemental Compensation Plan, which has been approved by the CAB . . . passengers will also have the benefit of a settlement inducement clause . . . to settle all compensation disputes within 6 months. Finally, injured passengers will be able to secure payment for unlimited medical cost . . . without

waiting for the conclusion of what could be a lengthy trial."—Morris Harrell, President, American Bar Association, September 1982.

"One of the many advantages of the Montreal Protocols is that they establish an uncomplicated and cost efficient means of settling claims . . . In most cases, recovery will occur in less than six months of the loss and generally will not require expensive legal fees that often reduce accident awards by a third or more. Recovery limits under the Montreal Protocols are four times the present limits and, because of lower legal costs and speedier settlement, the amount recovered will be worth even more to claimants."—William Coleman, former Secretary of Transportation, July 1982.

"The Department of Justice supports the ratification of these Protocols. Indeed, the failure to ratify these Protocols would be counterproductive in that it would leave in place an outmoded compensation plan without the foreseeable prospect of increased limits."—Robert McConnell, Assistant Attorney General, Department of Justice, September 1982.

"* * * the Protocols have received wide support from the great majority of foreign governments . . . Several nations have already ratified or taken steps to ratify the Protocols. Most others are eager to do so, but are waiting for the lead from the USA . . . The ICC is extremely concerned that non-ratification by the U.S. may let the Warsaw system collapse. This would create an absolute confusion regarding liability in international air transport and be to the detriment of the traveling public . . . the ICC is convinced that the Montreal Protocols . . . is the best that can realistically be achieved at the present time."—Carl-Henrik Winqwist, Secretary General, International Chamber of Commerce, May 1982.

"Over the years, (the Warsaw) system of liability did not prove conducive to a quick settlement of claims and frequently led to costly litigation which is not in the best interests of the victims or of the air carriers. The (Montreal Protocol) system . . . would facilitate the settlement of claims without such costly litigation and many of the present problems would disappear."—Study by the International Civil Aviation Organization (A Specialized Agency of the United Nations).

The nation's airlines join these eminent world leaders in urging advice and consent.

Sincerely yours,

WILLIAM J. BURHOP,
Senior Vice President, Government Affairs.

VIETNAM VETERANS: CONDUCT OF AGENT ORANGE STUDY SHIFTED TO CDC

Mr. CRANSTON. Mr. President, the VA has recently taken an important and positive step toward producing credible scientific information with respect to the long-term health effects of exposure to agent orange.

On January 14, the VA's Chief Medical Director, Dr. Donald Custis, informed me as the ranking minority member of the Veterans' Affairs Committee that the VA had formally transferred to the Centers for Disease Control—CDC—in Atlanta the epidemiological study of Vietnam veterans mandated by Congress in 1979.

Since early 1978 when questions about the possible long-term health effects in humans of exposure to agent orange first came to national attention, Vietnam veterans, their loved ones, and others have been anxious to find answers to those questions.

In December 1979, Congress passed a provision of which I was the Senate author—enacted in Public Law 96-151—mandating an epidemiological study of Vietnam veterans aimed at determining what the health effects of their exposure to agent orange are. The completion of this study is vitally important to the Federal Government's ability to find the answers to many of the questions that must be resolved about the health of the Vietnam veteran population.

Mr. President, it is ironic that finally, after over 3 years have elapsed since the study was mandated, it is being shifted to CDC, an agency within the Department of Health and Human Services. The original version of my legislation mandating this study, as passed by the Senate in June 1979, would have directed the then Secretary of Health, Education, and Welfare to carry out a study of Vietnam veterans and others exposed to dioxin. This approach was adopted in the Senate because of the belief that the credibility of the study—in both the scientific and the veteran communities—would be enhanced. However, at the insistence of those then in leadership positions in the House Veterans' Affairs Committee, the Senate reluctantly agreed to altering the provision to mandate that the VA do the study. I insisted, however, on adding as a safeguard a requirement that the study's protocol be approved by the Office of Technology Assessment.

Although, following the enactment of Public Law 96-151, I initially supported the VA's efforts to conduct the study, I soon became concerned that, despite OTA's role and oversight efforts by the Congress, a study conducted by the VA would lack the necessary credibility. Thus, beginning in June 1980, I have consistently urged that the VA contract out the study to an independent entity—as has now occurred with respect to the CDC—an agency for which I have great respect.

Mr. President, I note that the interagency agreement transferring the study to the CDC states that the study will be completed by 1987. Vietnam veterans and their families and others concerned about their health and well-being are eager for the study to be completed as quickly as possible in a scientifically valid fashion. I urge that all officials in the CDC, HHS, VA, and other executive branch agencies with responsibility for the conduct and support of this study do all that they can to insure this result.

Mr. President, two additional points related to the interagency agreement deserve highlighting.

First, the interagency agreement states that the CDC will submit the study protocol to the OTA for review and comments. I am pleased that the agreement formally recognizes the ongoing duty, prescribed by Public Law 96-151, which OTA has with respect to the study.

Second, because of my conviction that the health effects of the entire Vietnam experience must be studied, a position that has been supported by the major veterans' organizations, I authored a provision—enacted in Public Law 97-72—to provide the VA with authority to expand the epidemiological study for this purpose. Prolonged debate has ensued over how and whether to expand the study. I was reassured to learn that the CDC is planning, according to Dr. Custis' January 13 letter to Dr. Brandt, to conduct two concurrent studies, one focused on the effects of exposure to agent orange and the other, a broader examination of the impact of the Vietnam experience. This is the course I suggested in my October 7, 1982, letter to then-Administrator Nimmo, which was printed in the RECORD of October 20, 1982, (S 13429-32).

Mr. President, I ask that the interagency agreement between the Veterans' Administration and the CDC of the Public Health Service as well as the letter transmitting this agreement to me and a January 13, 1983, letter—elaborating on the agreement—from Dr. Custis to Dr. Edward Brandt, the HHS Assistant Secretary for Health, be printed in the RECORD at this point. In addition, Mr. President, I ask unanimous consent that a February 4, 1983, letter to me from John Gibbons, the Director of the Office of Technology Assessment, outlining his understanding of OTA's role and the timetable of events with respect to the epidemiological study also be printed in the RECORD at this point.

The material follows:

VETERANS' ADMINISTRATION,
DEPARTMENT OF MEDICINE AND SURGERY,
Washington, D.C., January 14, 1983.

Hon. ALAN CRANSTON,
Ranking Minority Member, Committee on Veterans' Affairs, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: For the past few weeks the Veterans Administration and the Centers for Disease Control, Department of Health and Human Services, have been negotiating for the transfer of the Epidemiological Study mandated by Public Law 96-151, as amended in Public Law 97-72.

Those negotiations have been successfully completed. A copy of the agreement is enclosed.

Sincerely,

DONALD L. CUSTIS, M.D.,
Chief Medical Director.

Enclosure.

INTERAGENCY AGREEMENT BETWEEN VETERANS' ADMINISTRATION AND CENTERS FOR DISEASE CONTROL

I. BACKGROUND

Public Law 96-151, Section 307, mandates that the Veterans Administration (VA) design a protocol and conduct an epidemiological study to determine if veterans of the Vietnam conflict suffer long-term adverse health effects from exposure to dioxins produced in the manufacture of phenoxy herbicides including Agent Orange. Public Law 97-72 permitted the expansion of the protocol design and study to include an evaluation of any long-term adverse health effects in humans which may result from other factors involved in service in Vietnam including exposure to other herbicides, chemicals, medications, or environmental hazards or conditions.

Members of Congress recently urged that the VA "contract with the Centers for Disease Control (CDC), Atlanta, Georgia, to conduct all phases of the Agent Orange Study." As a result of subsequent meetings and correspondence between VA and CDC, an agreement in principle has been reached for the transfer of the study from VA to CDC. The details relating to the respective responsibilities of the two agencies are outlined below.

II. PURPOSE

This Interagency Agreement is for the purpose of transferring from the VA to the CDC the resources and authority for the design, implementation, analysis, and scientific interpretation of a valid epidemiological study in accordance with Section 307 of Public Law 96-151, as amended.

III. VA RESPONSIBILITIES

A. For the purpose of assisting CDC in developing its recommended study design, the VA has provided CDC with a preliminary study design developed by the School of Public Health, University of California at Los Angeles, along with extensive reviews from the Science Panel, Agent Orange Working Group; the Office of Technology Assessment; the VA Advisory Committee on the Health Related Effects of Herbicides; and the National Academy of Sciences, National Research Council. Also provided were: certain suggested modifications of the study design (insofar as these have been developed), a statistical consultant's report on the study design, and a draft statement of work for inclusion in a Request for Proposal for the conduct of a pilot phase of the study. Upon request from CDC, the VA will provide other documents in its possession as are necessary for the further design and conduct of the study.

B. The VA will submit to the Office of Management and Budget (OMB) and the appropriate committees of Congress specific requests for fiscal and personnel resources to support the conduct of the study. In so doing, the VA will depend on information and justification provided by CDC as outlined in Sections IV.H. and VI.C. of this agreement.

C. The VA will forward the final report of the findings of the study to the Congress as it is received in finished form from CDC.

D. The VA will submit to OMB the CDC's information collection budget proposal for approval under the Paperwork Reduction Act. Accordingly, any information collection hours associated with the study will be assigned to the VA's information collection budget for use by CDC in the conduct of the epidemiological study.

E. The VA will provide a point of contact to act as liaison with the CDC project officer as noted in Section IV.I. of this agreement. The VA's point of contact is:

Title: Director, Agent Orange Projects Office (10A7).

Address: Room 848, VA Central Office, 810 Vermont Avenue, Washington, D.C. 20420.

Telephone: FTS 389-5411; Commercial (202) 389-5411.

IV. CDC RESPONSIBILITIES

A. The CDC will complete the epidemiological study as expeditiously as possible, but not later than September 30, 1987.

B. All decisions related to the design, conduct, analysis, and scientific interpretation of the results of the study, as well as analysis of the data obtained during the course of the study, shall be the sole responsibility of the CDC. The CDC will submit the study protocol to the office of Technology Assessment for its review and comments. Reports of results of study will be authored by the CDC.

C. To the extent permitted by law, the CDC agrees to maintain the confidentiality of any documents provided by the VA as outlined in Section III.A. of this agreement and designated by the VA as confidential. Also to the extent permitted by law, the CDC agrees that all documents provided by the VA to the CDC pursuant to this agreement, whether designated by the VA as confidential or not, shall be used solely for the purpose of the study and for no other purpose unless mutually agreed upon by VA and CDC.

D. The CDC will prepare the necessary information collection budget proposal for OMB approval under the Paperwork Reduction Act. This proposal will be submitted by the CDC to the VA for formal submission by the VA to OMB.

E. The CDC will furnish reports of information necessary for the VA to comply with the Report to Congress required by Public Law 96-151, Section 307(b)(2), as amended by Public Law 97-72, Section 401(b)(1).

F. Findings resulting from the epidemiological study and an evaluation of those findings will be incorporated into a final report from CDC to VA as expeditiously as possible.

G. The CDC agrees to provide quarterly progress reports to the VA.

H. The CDC will, at the VA's request, assist the VA in providing testimony at any and all congressional hearings, including appropriation hearings, regarding the epidemiological study until such time as the study is complete.

I. The CDC project officer is:

Name: Dr. J. David Erickson.

Title: Epidemiologist, Center for Environmental Health.

Address: Centers for Disease Control, Atlanta, Georgia 30333.

Telephone: FTS 236-4035; Commercial (404) 452-4035.

V. AUTHORITY

A. The CDC has legislative authority under Section 301(a) of the Public Health Service Act to conduct research into the health effects of a broad range of environmental hazards and to cooperate with other appropriate authorities in the conduct of such research.

B. As previously indicated, the VA has authority under Section 307 of Public Law 96-151 to design and conduct an epidemiological study relating to exposure to Agent Orange and to expand the scope of the study as provided in Public Law 97-72.

C. The VA has authority to enter into this agreement under the Economy Act, as amended (31 U.S.C. Section 1535) and 38 U.S.C. Section 213.

VI. RESOURCES

A. The VA will initiate appropriate action to obtain OMB approval of the CDC request for 28 full-time equivalent employment (FTEE) for fiscal year 1983.

B. Upon request from the CDC for advance payment, the VA will pay CDC up to $3,000,000 for goods and services required under this agreement during fiscal year 1983. Subsequent fiscal year funding requests may also be paid in advance as agreed to by the VA from time to time. Any amount paid in advance is subject to adjustment for actual costs incurred, as required in 31 U.S.C., Section 1535 (1982).

C. The CDC will identify and fully justify all fiscal and FTEE requirements for use by the VA in submitting specific funding requests to OMB and Congress for the conduct of the study in fiscal year 1984 and beyond. These requirements will be submitted in a timely and appropriate manner so as to be included and specifically identified in the VA's budget and planning efforts. Only those resources specifically approved by OMB and appropriated by Congress for the conduct of the study will be made available to CDC by the VA for this purpose.

D. CDC agrees to utilize the resources provided by the VA solely for purposes that CDC deems to be related to the epidemiological study. CDC will provide VA with a quarterly statement of the costs incurred in the performance of this agreement. The cost statement shall be made in conformance with standard government budget and accounting requirements.

VII. AMENDMENTS

This agreement or any of its specific provisions may be revised by signature approval of both the parties signatory hereto, or their respective successors.

VIII. EFFECTIVE DATE

This agreement is effective as of October 16, 1982, and shall continue in effect unless modified in writing by mutual agreement.

IX. TERMINATION

A. The period of this agreement is through September 30, 1984, to be renewed annually thereafter for the duration of the study.

B. In the event that the necessary fiscal and personnel resources are not provided to the CDC as specified in Section VI.A., B., and C. of this agreement, the CDC will be under no obligation to undertake or complete this epidemiological study.

C. In the event that OMB fails to approve the necessary information collection budget hours in accordance with the Paperwork Reduction Act of 1980, the CDC will be under no obligation to undertake this epidemiological study.

VETERANS' ADMINISTRATION,
DONALD L. CUSTIS, M.D.
Chief Medical Director.

U.S. PUBLIC HEALTH SERVICE, DEPARTMENT OF HEALTH AND HUMAN SERVICES,
EDWARD N. BRANDT, Jr., M.D.
Assistant Secretary for Health.

VETERANS' ADMINISTRATION,
DEPARTMENT OF
MEDICINE AND SURGERY,
Washington, D.C., January 13, 1983.

EDWARD N. BRANDT, JR., M.D.,
Assistant Secretary for Health, Department of Health and Human Services, Washington, D.C.

DEAR DR. BRANDT: Enclosed is the proposed Interagency Agreement to effect the transfer of the epidemiological study from the VA to the CDC. The present language of the agreement is the culmination of a number of previous efforts and informal contacts between staff members of our respective offices. In the interest of expediting the completion of protocol development and implementation of the study, I am hopeful that you will find the language of the agreement satisfactory and suitable for signing within the next few days.

The VA is prepared at this time to make an advanced payment to CDC of the $3,000,000 identified in the VA's fiscal year 1983 budget for initiation of the study. In addition, we will work with you in obtaining OMB clearance for providing to CDC the requisite 28 FTEE for this fiscal year.

In your letter of December 23, 1982, you propose that resource requirements beyond the $3,000,000 and 28 FTEE be included as a multi-year appropriation in fiscal year 1984. We will be pleased to join you in exploring the feasibility of this suggestion with OMB and the appropriate Congressional committees. On the matter of the periodic mortality follow-up effort, I believe this should be included in the CDC study, and as such be made a part of the budget proposal in support of the full study.

I have reviewed with interest the outline for the conduct of the study as proposed by CDC. The concept of two concurrent studies, one to examine the effects of exposure to Agent Orange and the other the impact of the Vietnam experience has considerable merit and provides the advantages of two complimentary efforts. I do have great concern, however, over the suggestion that the VA conduct the physical examinations and laboratory studies for the 4,000 veterans, in each of the five cohorts, who will not be examined by CDC as part of the study. If two-thirds of the individuals answering the questionnaire are to be examined in VA medical centers, I believe that it would be very difficult to convince the majority of Vietnam veterans that the VA is not actually involved in the conduct of the study. I therefore have taken the position that if it is the recommendation of CDC that all study subjects receive a physical examination and laboratory work-up, CDC should include this as part of the budget proposal and justification for OMB and Congressional action.

I hope that we have reached sufficient consensus on these issues so that we can now finalize the interagency agreement.

Sincerely,

DONALD L. CUSTIS, M.D.,
Chief Medical Director.

OFFICE OF TECHNOLOGY ASSESSMENT,
Washington, D.C., January 28, 1983.

Hon. ALAN CRANSTON,
Ranking Minority Member, Committee on Veterans' Affairs, U.S. Senate, Washington, D.C.

DEAR ALAN: During the last four months, the Veterans Administration (VA) has been cooperating with the Department of Health and Human Services (DHHS) in response to Congressional criticism of its handling of the Agent Orange epidemiologic study. On January 14, 1983, the VA and DHHS completed an interagency agreement that designates the Centers for Disease Control (CDC) as the agency responsible for planning and executing the study.

Office of Technology Assessment (OTA) staff have discussed the study with officials at CDC, and I wish to inform you of our understanding of likely future events. CDC will send copies of an outline, describing their plans for the epidemiology study, to OTA and other review groups. The outline, expected to be between 10 and 20 pages long, will be sent to all members of the OTA Agent Orange Advisory Panel. Panel members' review comments will be obtained by phone, and OTA staff will provide those comments to your committee, to other Congressional committees, and to CDC. Our review will be completed as quickly as possible, certainly within 30 days of receipt of the agreement. Hopefully, other review groups will adhere to a similar schedule.

CDC expects to produce a detailed protocol for its study about 90 days after it receives comments on the outline. OTA will, as mandated by P.L. 96-151, review that protocol within 30 days of receiving it. That review will entail a third meeting of the Advisory Panel. At this time, we estimate the earliest possible date for that meeting to be sometime in June. The exact time, of course, depends on when OTA receives the protocol.

It can escape no one's attention that more than three years have elapsed since the passage of P.L. 96-151. However, I can end this letter on a positive note. I have been impressed by the business-like attitude of CDC, and I think that we can now look forward to rapid progress in the study.

Sincerely,

JOHN H. GIBBONS.

STEPHENS, INC., CELEBRATES 50TH ANNIVERSARY

Mr. PRYOR. Mr. President, I am proud and pleased to commemorate today the 50th anniversary of the founding of one of America's most prominent and respected financial institutions. Stephens, Inc., located in downtown Little Rock, Ark., is privately owned. It is the eighth largest capitalized investment banking firm in the country.

The Stephens story is one in which hard work and ingenuity, a willingness to take risks, a desire to serve people, and an unmatched reputation for honesty have resulted in a financial institution which is well known and highly regarded throughout the world.

Stephens, Inc., was established in the depths of the Great Depression. It was in March 1933, when W. R. (Witt) Stephens took the initiative. Witt Stephens was the second of three sons and one of six children, all of whom were born and raised on a small farm in Prattsville, Ark. In the beginning, Stephens, Inc. was a municipal bond house, but a unique one that quickly gained a reputation for integrity, a willingness to expand into new areas, and good old-fashioned know-how.

Witt Stephens' younger brother, Jackson T. Stephens, joined the firm in 1946 after graduating from the U.S. Naval Academy. In those early days, he traveled the State buying and selling bonds and carrying the Stephens reputation and ability to thousands of Arkansans.

In 1957, Jack Stephens became president of the firm. And today he travels not only the State but also the country and the world—in search of opportunities for the benefit of Stephens, Inc. and its clients.

The financial leadership and expertise of Stephens have enabled it to become a symbol of extraordinary success. With an investment philosophy of partnership with investors and a readiness to take risks, Stephens has quickly grown to be a major national underwriter and dealer in all types of securities. It serves as financial adviser to individual investors as well as State, county, municipal and other public agencies throughout the country. Stephens has become a catalyst for economic development not only in Arkansas but throughout the world.

A few years ago, the Stephens' story spread to the highly productive countries of Asia. In addition, its strength in financial services has extended into manufacturing and services in other domestic industries. These include oil and gas production, data processing, industrial supply, real estate, office equipment leasing, agriculture, and international finance and trade.

I am pleased to recognize this remarkable family and this extraordinary business. And I hope the standards of excellence established by Witt and Jack Stephens will continue to benefit us all for another 50 years and more.

PROPOSAL TO INCREASE MILITARY AID TO EL SALVADOR

Mr. CRANSTON. Mr. President, for the last 40 months, the civil war in El Salvador has been stalemated. The United States has poured over $500 million in economic and military aid into El Salvador since 1979. Congress has enacted certification provisions to hold the Salvadoran Government accountable for its human rights record and to encourage political and economic reforms as a condition of continuing U.S. military aid to that government. With each certification, the Reagan administration has done its best to whitewash the relentless violations of basic human rights in El Salvador. We are not even at the halfway mark in the 1983 fiscal year. But the Reagan administration is already asking for an additional $60 million in military aid to El Salvador and is suggesting that additional military advisers may be sent to El Salvador. And the White House has made clear that if Congress will not approve this additional aid, the administration will at-

tempt to use the State Department's contingency fund.

I strongly oppose an additional $60 million in military aid to the Government of El Salvador. I do not believe it can be justified—especially in this time of high deficits and budget cuts.

The Reagan administration's assertion that Congress limited 1983 aid to El Salvador because we did not pass a foreign aid bill is inaccurate. A unanimous Senate Foreign Relations Committee deliberately limited aid to El Salvador because of the committee's deep concern that the U.S. role in the Salvadoran civil war should be limited and should emphasize economic over military assistance.

I also strongly oppose proposals to increase the number of U.S. military personnel sent to El Salvador. Increased involvement of American soldiers in El Salvador can only increase the danger that American soldiers will become directly involved in combat in El Salvador's civil war.

In its unquestioning search for military solutions to the Salvadoran conflict, this administration threatens the fundamental interest of our Government in achieving, in concert with our democratic allies in the region, a truce and a negotiated settlement of Salvadoran strife. We must press forward with efforts which address the root causes of the conflict in Central America: poverty, injustice, and underdevelopment. It is essential that our Government pursue these efforts lest we lose sight of one of the key lessons of Vietnam: That the support of the American people is vital for the success of our foreign policy.

In addition, I hope that the administration will stop disparaging the tireless and brave clergy in El Salvador. The administration only worsens the situation in that factionalized country when it attacks the leaders of the Salvadoran clergy. The administration also worsens the situation when it unconditionally condemns any attempt at negotiations. There will be no purely military resolution of the Salvadoran conflict.

The administration should not exacerbate the polarization in El Salvador. It should instead be seeking to establish a dialog among the factions and to pursue cease-fire negotiations. Only then will democracy have a chance to survive in El Salvador.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Marks, one of his secretaries.

REPORT ON THE RAILROAD RETIREMENT SYSTEM MESSAGE FROM THE PRESIDENT—PM 21

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Labor and Human Resources:

To the Congress of the United States:

I hereby transmit to the Congress a report on the railroad retirement system pursuant to the provisions of Section 1126(a) of the Omnibus Budget Reconciliation Act of 1981 of August 13, 1981 (45 U.S.C. 231n note).

RONALD REAGAN.

THE WHITE HOUSE, *March 1, 1983.*

MESSAGES FROM THE HOUSE

At 11:19 a.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 1572. An act to repeal section 311 of the Federal Public Transportation Act of 1982.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-364. A communication from the Assistant Secretary of State for Congressional Relations, transmitting a draft of proposed legislation to authorize the Board for International Broadcasting to provide federal funding for radio broadcasting to Cuba; to the Committee on Foreign Relations.

EXTENSION OF TIME TO FILE REPORT

Mr. BAKER. Mr. President, I have a request that bears the initials of the distinguished minority leader and I believe he has cleared this for action by unanimous consent.

Mr. President, on behalf of Mr. JEPSEN, I ask unanimous consent that the Joint Economic Committee be granted an extension of time from March 1, 1983, to March 3, 1983 to file a report of its findings and recommendations with respect to the Economic Report of the President, as required by section 11(b)(3) of the Employment Act of 1946 (15 U.S.C. 1024).

The PRESIDING OFFICER. Without objection, it is so ordered.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S.J. Res. 18. Joint resolution designating September 22, 1983, as "American Business Women's Day".

By Mr. MATHIAS, from the Committee on Rules and Administration, without amendment:

S. Res. 76. An original resolution authorizing expenditures by committees of the Senate (Rept. No. 98-14).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary: Gregory Wright Carman, of New York, to be a judge of the U.S. Court of International Trade;

Shirley Wohl Kram, of New York, to be a U.S. district judge for the southern district of New York; and

James W. Diehm, of the Virgin Islands, to be a U.S. attorney for the district of the Virgin Islands for the term of 4 years.

By Mr. GARN, from the Committee on Banking, Housing, and Urban Affairs.

Edwin J. Gray, of California, to be a Member of the Federal Home Loan Bank Board for the remainder of the term expiring June 30, 1983; and

Edwin J. Gray, of California, to be a Member of the Federal Home Loan Bank Board for the term of 4 years expiring June 30, 1987.

(The above nomination was reported from the Committee on Banking, Housing, and Urban Affairs, with the recommendation that it be confirmed subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. McCLURE:

S. 622. A bill to authorize the Secretary of the Interior to undertake feasibility investigations; to the Committee on Energy and Natural Resources.

By Mr. BAUCUS:

S. 623. A bill to provide for annual budget review of the Bonneville Power Administration by the Pacific Northwest Electric Power and Conservation Planning Council; to the Committee on Energy and Natural Resources.

By Mr. PRESSLER:

S. 624. A bill to establish an Office of Housing for the Elderly within the Department of Housing and Urban Development; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. PELL:

S. 625. A bill to authorize the Secretary of Education to provide financial assistance to States for use in expanding educational programs in juvenile and adult correctional institutions to assist in the rehabilitation of criminal offenders, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. GOLDWATER (for himself and Mr. DECONCINI):

S. 626. A bill to designate the Aravaipa Canyon Wilderness in the State of Arizona; to the Committee on Energy and Natural Resources.

By Mr. PACKWOOD (for himself and Mr. HATFIELD):

S. 627. A bill to authorize the establishment of a national scenic area to assure the protection, development, conservation, and enhancement of the scenic, natural, cultural, and other resource values of the Columbia River Gorge in the States of Oregon and Washington, to establish national policies to assist in the furtherance of its objective, and for other purposes; to the Committee on Energy and Natural Resources.

By Mr. WEICKER:

S. 628. A bill to amend section 18(a) of the Small Business Act; to the Committee on Small Business.

By Mr. CRANSTON (for himself and Mr. RANDOLPH):

S. 629. A bill to amend title 38, United States Code, to increase the per diem rate payable by the Veterans' Administration to States providing domiciliary, nursing home, and hospital care to veterans in State homes; to the Committee on Veterans' Affairs.

By Mr. CRANSTON (for himself and Mr. WILSON):

S. 630. A bill to authorize the Secretary of the Army to construct improvements on Redbank and Fancher Creeks, Calif.; to the Committee on Environment and Public Works.

By Mr. TSONGAS (for himself, Mr. STENNIS, Mr. HART, Mr. PELL, and Mr. RANDOLPH):

S. 631. A bill to establish a national technology education grants program to provide matching Federal assistance to joint initiatives by private industry, educational institutions, and State government to strengthen science, engineering, and technical education, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. BENTSEN:

S. 632. A bill entitled the "Frontier Technologies Assessment Act"; to the Committee on Commerce, Science, and Transportation.

By Mr. GRASSLEY (for himself, Mr. DOLE, and Mr. DENTON):

S. 633. A bill entitled the "Government Accountability Act of 1983"; to the Committee on the Judiciary.

By Mr. HART:

S. 634. A bill to provide for the establishment of revitalization areas in distressed areas, to amend the Internal Revenue Code of 1954 to provide tax incentives for development in revitalization areas, and for other purposes; to the Committee on Finance.

By Mr. STAFFORD:

S. 635. A bill to authorize the U.S. Army Corps of Engineers to provide assistance to local communities, and for other purposes; to the Committee on Environment and Public Works.

By Mr. HART (for himself, Mr. CRANSTON, Mr. SIMPSON, Mr. DECONCINI, Mr. RANDOLPH, Mr. MATSUNAGA, Mr. MITCHELL, Mr. COHEN, Mr. RIEGLE, Mr. HOLLINGS, Mr. SASSER, Mr. EXON, Mr. SARBANES, Mr. SPECTER, Mr. KENNEDY, Mr. LEAHY, Mr. LEVIN, Mr. DENTON, Mr. KASTEN, Mr. MURKOWSKI, Mr. BIDEN, Mr. CHILES, Mr. ANDREWS, Mr. BURDICK, Mr. PERCY, Mr. JOHNSTON and Mr. STAFFORD):

S. 636. A bill to amend title 38, United States Code, to establish certain procedures for the adjudication of claims for benefits under laws administered by the Veterans' Administration; to apply the provisions of section 553 of title 5, United States Code, to rulemaking procedures of the Veterans' Administration; to provide for judicial review of certain final decisions of the Administrator of Veterans' Affairs; to provide for the payment of reasonable fees to attorneys for rendering legal representation to individuals claiming benefits under laws administered by the Veterans' Administration; and for other purposes; to the Committee on Veterans' Affairs.

By Mr. PERCY (by request):

S. 637. A bill to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize security and development assistance programs for fiscal years 1984 and 1985, and for other purposes; to the Committee on Foreign Relations.

S. 638. A bill to authorize supplemental international security assistance for urgent purposes for the fiscal year 1983, and for other purposes; to the Committee on Foreign Relations.

S. 639. A bill to authorize supplemental assistance to aid Lebanon in rebuilding its economy and Armed Forces, and for other purposes; to the Committee on Foreign Relations.

By Mr. DOLE (by request):

S. 640. A bill to amend the Internal Revenue Code of 1954 to provide to the inclusion of certain employer contributions to health plans in an employee's gross income; to the Committee on Finance.

S. 641. A bill to provide for voluntary private alternative coverage for medicare beneficiaries, and for other purposes; to the Committee on Finance.

S. 642. A bill to restructure the medicare hospital insurance program; to the Committee on Finance.

S. 643. A bill to make improvements in the medicare and medicaid programs, and for other purposes; to the Committee on Finance.

By Mr. GARN (for himself, Mr. TOWER and Mr. PROXMIRE) (by request):

S. 644. A bill to amend and extend certain Federal laws relating to housing, community and neighborhood development, and related programs, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

By Mr. DOLE (for himself, Mr. HEFLIN and Mr. THURMOND):

S. 645. A bill to establish an Intercircuit Tribunal and for other purposes; to the Committee on the Judiciary.

By Mr. DOLE:

S. 646. A bill to amend title 18, United States Code, for the purpose of providing authority to the Attorney General to prosecute acts obstructing the flow of commerce, and for other purposes; to the Committee on the Judiciary.

By Mr. DOMENICI (for himself, Mr. PERCY and Mr. RIEGLE):

S.J. Res. 43. A joint resolution to declare Baltic Freedom Day; to the Committee on the Judiciary.

SUBMISSION OF CONCURRENT AND SENATE RESOLUTIONS

The following concurrent resolutions and Senate resolutions were read, and referred (or acted upon), as indicated:

By Mr. MATHIAS from the Committee on Rules and Administration:

S. Res. 76. An original resolution authorizing expenditures by the committees of the Senate; placed on the calendar.

By Mr. GOLDWATER:

S. Con. Res. 12. A concurrent resolution to declare the sense of the Congress regarding treaty termination; to the Committee on Foreign Relations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. McCLURE:

S. 622. A bill to authorize the Secretary of the Interior to undertake feasibility investigations; to the Committee on Energy and Natural Resources.

FEASIBILITY INVESTIGATIONS

Mr. McCLURE. Mr. President, this bill would authorize the Secretary of the Interior to undertake feasibility investigations of 13 potential water and related land resources developments in the Western States. As my colleagues will recall, similar legislation passed the House and Senate during the last Congress, only to die in the Senate during the lameduck session.

The bill is identical to the measure that passed the Senate on October 1, 1982, with two exceptions. First, for the Prairie Bend unit study in Nebraska, the authorization requires the study to include details on the effects the project might have on wildlife, and in particular on the habitat of the sandhill and whooping cranes. Second, two study authorizations in the State of South Dakota have been deleted since they were enacted in other legislation.

Mr. President, the timely authorization and completion of feasibility studies are essential if we are going to be able to address the water problems of the future. It is my hope that this measure will receive the attention of the Committee on Energy and Natural Resources and of the Senate as soon as possible.

I ask unanimous consent that the text of the measure be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 622

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior is hereby authorized to engage in feasibility studies of the following proposals:

(1) Colville Indian Reservation, Chief Joseph Dam project, located in northeastern Washington;

(2) Gibson Dam powerplant, located on the Sun River in Lewis and Clark Counties, Montana;

(3) Imperial Irrigation District canal lining, located in Imperial Irrigation District, Imperial County in southern California;

(4) New Melones conveyance system study, Central Valley Project, Stanislaus River division. located in Tuolumne, Calaveras, Stanislaus, San Joaquin, and Merced Counties, California;

(5) Pilot Butte powerplant, Riverton unit, located in Fremont County, Wyoming;

(6) Prairie Bend unit, located in the Platte River Basin, located in Buffalo and Hall Counties, Nebraska. Such feasibility study shall include a detailed report on any effects the proposed project may have on wildlife habitat, including habitat of the sandhill crane and the endangered whooping crane;

(7) Siletz River Basin project, located in Lincoln and Polk Counties, Oregon;

(8) Spring Canyon pumped-storage project, located in Mohave County, Arizona;

(9) Tongue River Dam, located in Big Horn and Rosebud Counties, Montana;

(10) Water conservation and efficient use program, All-American canal relocation project, located in Imperial County, California;

(11) Upper Klamath offstream storage study, Klamath project, located in Klamath County, Oregon;

(12) Blue Holes Reservoir, located in Fremont County and the Wind River Indian Reservation, Wyoming;

(13) Muddy Creek Basin hydrologic, surge relief, and erosion control study, near Great Falls, Montana.

By Mr. BAUCUS:

S. 623. A bill to provide for annual budget review of the Bonneville Power Administration by the Pacific Northwest Electric Power and Conservation Planning Council; to the Committee on Energy and Natural Resources.

BONNEVILLE POWER ADMINISTRATION REGIONAL ACCOUNTABILITY ACT OF 1983

● Mr. BAUCUS. Mr. President, I am pleased to reintroduce today the Bonneville Power Administration Regional Accountability Act.

The purpose of this legislation is to make the Bonneville Power Administration (BPA) more responsive to the citizens and States that it serves, and to enhance the effectiveness of congressional oversight of Bonneville's budgetary decisions.

As the Federal power marketing agency for the Pacific Northwest, Bonneville's activities have a tremendous influence on the direction and pace of economic development and on the quality of life in the region. In spite of this, Congress has granted Bonneville considerable freedom from the strictures of the authorization and budget processes.

I believe it is because of the great degree of independence allowed to Bonneville in making its budgetary decisions that Bonneville remains unresponsive to the needs, concerns, and priorities of the States that it serves. Moreover, we in Congress have not had the benefit of sufficient independent information to allow us to effectively oversee Bonneville's allocation of the funds it collects from the ratepayers of the region.

I understand that Bonneville has recently become more aware of the concerns of the citizens of the region, and is now making an effort to improve relations with the State of Montana, in particular. It should be recognized, however, that this effort has only been made in response to the overwhelming public outcry over recent BPA activities.

My bill attempts to institutionalize that responsiveness by giving the States an effective avenue for influencing Bonneville's allocation of the moneys it collects from their citizens.

This legislation would require BPA to submit its budget to the Northwest Power Planning Council for review prior to its submission to the Congress. The Council, which was created by Congress through the 1980 Northwest Regional Power Planning and Conservation Act, is composed of members appointed by the Governors of Montana, Idaho, Washington, and Oregon.

After receiving BPA's draft budget, the Council would conduct regional hearings. This would give the citizens of the Pacific Northwest a genuine opportunity to review BPA's proposed expenditures and make constructive suggestions on them.

Following this public review, the Council could develop and submit to Congress an alternative budget, or alternative figures for individual portions of the budget, as the Council finds appropriate for achieving the objectives of the regional act. The Council's proposals would be submitted to Congress with BPA's final budget and BPA's response on points of disagreement.

Thus, Congress would have the benefit of valuable additional perspectives and information on BPA's budget, and BPA would have much greater incentive than it now does to accommodate the views and interests of the States and citizens of the region before making irreversible decisions affecting their future.

Through the regional act, Congress gave the Council the responsibility of assessing the region's energy needs for the next 20 years and devising a plan to meet those needs. The Council has recently released its draft plan. It developed this with the benefit of a great deal of public participation and, as directed by Congress, it has come up with a flexible plan that emphasizes conservation and renewable resources in meeting the region's energy needs.

The Council should be highly commended for the tremendous job it has done in developing this draft plan. This accomplishment may be lost if BPA's faithful implementation of the plan is not insured by granting the Council continuing influence over and review of BPA's budgetary decisions.

In the past, Bonneville has been permitted an unwarranted degree of freedom in its decisionmaking. It has become responsive to outside influences only after its actions have created public uproar. By that time it has been simply too late to effect more than minor adjustments in the course of action laid out by BPA. The people of Montana and the other States of the region deserve better.

I believe that my bill will permit the citizens and States of the Pacific Northwest to have a real opportunity to influence Bonneville decisionmaking early in the process and thereby avert many of the problems we in the region have experienced with Bonneville in the past.

Mr. President, the Montana House of Representatives concurs in this assessment. They recently passed a resolution introduced by Representative Mary Ellen Connelly, urging Congress to adopt the legislation I am introducing today.

Mr. President, I ask unanimous consent at this point that the resolution be made a part of the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

STATE OF MONTANA RESOLUTION

Whereas, the Bonneville Power Administration is a federal power marketing agency with substantial influence in the Pacific Northwest and particularly in the State of Montana; and

Whereas, Congress has heretofore granted the Bonneville Power Administration considerable freedom from the strictness of the authorization and budget processes; and

Whereas, there is a lack of sufficient independent information available about the Bonneville Power Administration's allocation of the funds it collects from the ratepayers of Montana, Idaho, Oregon and Washington; and

Whereas, the Bonneville Power Administration must be more responsible to the citizens and state and local governments in the Pacific Northwest region.

Now, therefore, be it resolved by the Senate and the House of Representatives of the State of Montana, That the Congress of the United States is most earnestly requested to enact the bill introduced by Montana Senator Max Baucus creating the Bonneville Power Administration Regional Accountability Act of 1982, amending 16 U.S.C. Sec. 32, et seq., which provides for annual budget review by the Pacific Northwest Electric Power and Conservation Planning Council, and

Be it further resolved, That the Secretary of State send copies of this resolution to the President of the United States, Governor Ted Schwinden, and to each member of the Congress of the United States.

Mr. BAUCUS. Mr. President, I also request that the text of S. 623 which I am introducing today be printed in the RECORD:

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 623

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That this Act may by cited as the "Bonneville Power Administration Regional Accountability Act of 1983".

SEC. 2. The Act entitled "An Act to authorize the completion, maintenance, and

operation of the Bonneville project for navigation, and for other purposes", approved August 20, 1937 (16 U.S.C. 832 et seq.), is amended by redesignating section 13 as section 14 and inserting immediately after section 12 the following new section:

"SEC. 13. Beginning with the calendar year 1983 and each calendar year thereafter, the Administrator shall submit, no later than July 15 a copy of its annual draft budget for the fiscal year commencing October 1 of the following calendar year for all operations, acquisitions, and activities of the Bonneville Power Administration to the Pacific Northwest Electric Power and Conservation Planning Council for review. Thereafter, the Administrator shall expeditiously inform the Council of budget modifications proposed by the Administrator, the Secretary of Energy, or the Director of the Office of Management and Budget. In the event that the Council submits an alternative budget, or alternative figures for individual portions of such budget, to Congress pursuant to section 4(j) of the Pacific Northwest Electric Power Planning and Conservation Act, the Administrator, if he determines such alternative budget to be unacceptable, in whole or in part, shall submit no later than thirty days after receipt of the Council's proposed modifications, a report to the Council and the Congress, in detail, stating the reasons why such alternative budget proposal of the Council, or part thereof, is unacceptable to the Administrator. The Administrator shall provide to the Council such cooperation and assistance as may be necessary to facilitate Council review of the draft budget and modifications. In preparing budget figures, the Administrator shall conform the budget to the policies, purposes, and requirements of the Pacific Northwest Electric Power Planning and Conservation Act (16 U.S.C. 839 et seq.) and the regional electric power and conservation plan and the fish and wildlife program adopted pursuant thereto.".

SEC. 3. The Pacific Northwest Electric Power Planning and Conservation Act (16 U.S.C. 839 et seq.) is amended by redesignating section 4(j) as section 4(k) and inserting immediately before it the following new subsection:

"(j) Pursuant to the annual budget proposal submitted by the Administrator under section 13 of the Act entitled 'An Act to authorize the completion, maintenance, and operation of the Bonneville project for navigation, and for other purposes', approved August 20, 1937 (16 U.S.C. 832 et seq.), the Council shall—

"(1) review and analyze the initial budget proposal and all subsequent budget modifications proposed by the Administrator, the Secretary of Energy, or the Director of the Office of Management and Budget;

"(2) have the authority to hold hearings on the proposed budget and its modifications;

"(3) submit to Congress an analysis of the budget proposal and modifications submitted by the Administrator to the Council; and

"(4) submit to Congress an alternative budget, or alternative figures for individual portions of such budget, if considered necessary or appropriate by the Council in order to facilitate attainment of the purposes of the Pacific Northwest Electric Power Planning and Conservation Act (16 U.S.C. 839 et seq.).".●

S. 624. A bill to establish an Office of Housing for the Elderly within the Department of Housing and Urban Development; to the Committee on Banking, Housing, and Urban Affairs.

OFFICE OF HOUSING FOR THE ELDERLY

Mr. PRESSLER. Mr. President, today, I am introducing legislation which will create an Office for the Elderly within the Department of Housing and Urban Development. I believe this change will provide an important and needed focus on HUD's programs for the elderly.

Older Americans constitute about 39 percent of all HUD-assisted households, yet since 1977 HUD has operated without an effective office to coordinate its various programs for the elderly.

The section 8 program and the public housing program alone have constructed 23 million housing units—50 percent of which are occupied by older Americans. In addition, 95,000 units have been produced under the section 202 program to be occupied by senior citizens and 2,200 elderly are aided through the congregate housing services program. Under an amendment that I sponsored to last year's HUD appropriation bill, additional funds are now available to expand congregate services in rural areas.

Obviously, HUD has a major role in meeting elderly housing needs. This assistance should not be limited to elderly people participating only in the previously mentioned programs, but should also provide housing information and aid to all of the approximately 16 million households headed by senior Americans. As the post-World War II baby boom generation ages, the need for these kinds of services will increase significantly.

HUD offices with direct responsibility for dealing with the concerns of other segments of the population with smaller constituencies are already established. In my opinion, the special health and other needs of elderly Americans require similar organizational recognition.

President Reagan's Commission on Housing last year recommended that the special housing requirements of the elderly should be addressed by special programs. Unfortunately, in this time of budget restraint the administration has also proposed to slash many housing programs. In my opinion, there is no better time to provide our senior citizens with a consolidated office within HUD to insure that money available for aiding the elderly is spent in the best manner possible. In addition, provisions of my bill which would revive the HUD Advisory Committee on Housing for the Elderly and the requirement of an annual report to Congress on the state of elderly housing will insure that the Federal bureaucracy is responsive to the problems of our older Americans.

I hope my colleagues will join me in supporting this legislation.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 624

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4 of the Department of Housing and Urban Development Act is amended by adding the following new subsection at the end thereof:

"(e)(1) There shall be in the Department an Office of Housing for the Elderly. This Office shall be within the Office of the Secretary and shall have the following responsibilities:

"(A) to coordinate all housing programs for the elderly within the Department, including the coordination of activities at the regional level which concern such housing programs;

"(B) to work to coordinate such housing programs with related programs which are administered by State, local, or other Federal agencies;

"(C) to make recommendations to the Secretary regarding legislation relating to Federal assistance to housing for the elderly;

"(D) to receive, evaluate, and make recommendations to the Secretary with respect to information submitted by organizations representing the elderly who are served by programs carried out by the Department;

"(E) to make recommendations to the Secretary concerning research, demonstrations, and evaluations which are being or should be carried out by the Department with respect to housing for the elderly;

"(F) to organize task forces (which shall consist of individuals who have expertise in the area of housing for the elderly and who work in that area within the Department or outside of it) which are deemed necessary to carry out the responsibilities of the Office;

"(G) to represent the Secretary with respect to elderly housing matters before other governmental agencies and departments, industry groups and associations, the Congress, and the public;

"(H) to convene and work with the Advisory Committee on Housing for the Elderly described in paragraph (4);

"(I) to prepare and distribute such materials which are necessary to carry out the responsibilities of the Office;

"(J) to assist the Secretary in making an annual report to the Congress relating to housing for the elderly, as described in paragraph (3); and

"(K) to carry out other responsibilities relating to housing for the elderly as may be specified by the Secretary.

"(2) The Office of Housing for the Elderly shall be headed by the Special Assistant for Housing for the Elderly who shall be responsible directly to the Secretary. Such Office shall have staff members recommended by the Special Assistant and approved by the Secretary, including staff members at the field offices of the Department in order to assure the coordination of housing programs for the elderly at the field level. The Special Assistant for Housing for the Elderly shall be designated by the Secretary not later than 60 days after the date of enactment of this subsection.".

"(3) The Secretary shall, not later than December 1 of each year, submit to the

Congress an annual report on housing for the elderly which shall include—

"(A) a description of the actions (and associated costs) of the Department during the previous fiscal year with respect to housing for the elderly and a description of the actions (and associated costs) undertaken and to be undertaken with respect to such housing during the current fiscal year; and

"(B) recommendations for any legislative, administrative, and other actions relative to such housing, as deemed appropriate by the Secretary,

"(4) The Secretary shall establish, in accordance with section 7(1) of this Act, an Advisory Committee on Housing for the Elderly. Such Advisory Comittee shall have representatives from organizations serving the housing needs of the elderly and shall discuss and analyze recommendations which can be used in developing departmental policy relating to housing for the elderly.".

By Mr. PELL:

S. 625. A bill to authorize the Secretary of Education to provide financial assistance to States for use in expanding educational programs in juvenile and adult correctional institutions to assist in the rehabilitation of criminal offenders, and for other purposes; to the Committee on Labor and Human Resources.

FEDERAL CORRECTIONAL EDUCATION ASSISTANCE ACT

● Mr. PELL. Mr. President, I am submitting legislation entitled the "Federal Correctional Education Assistance Act." It would authorize the Secretary of Education to make grants to State education agencies for educational programs in correctional institutions.

The need for this legislation is considerable. The prison population of our Nation, today, is at an all-time high of 500,000 people. Over the past 4 years the incarceration rate for adult offenders has increased by more than 50 percent. In addition, another 1,800,000 juveniles and adults are on probation and parole.

The United States currently spends about $6 billion a year to house inmates in State correctional facilities, local jails, and Federal institutions and centers. This amounts to almost $13,000 a year for each inmate. That is a staggering amount, which exceeds the cost of education for a year at either Harvard or Yale. In fact, on the average this Nation spends 2½ times as much money on keeping a person in prison than on sending a young man or woman to college.

As awful as these figures are, one might derive some consolation from them if these inmates were being prepared for a productive, responsible life upon release from prison. Sadly, that simply is not the case.

Of the $6 billion spent to maintain our prison system, more than 80 percent is spent on control and security. Less than 20 percent is spent on rehabilitation and training, and the amount spent on educational programs and services is even smaller. Recent data from the National Institute of Education revealed that only 2 percent of the total cost of incarceration goes to vocational education and related programs. On the average, a State spends only 1.5 percent of its total correctional budget on inmate education and training programs. Further, corrections education programs are generally plagued by inadequate funds, space, equipment, and trained staff.

To make matters even worse, the lack of adequate education programs is further complicated by the nature of the prison population. As noted by the National Advisory Council on Vocational Education in its excellent report, Vocational Education in Correctional Institutions:

> The typical inmate is a 25 year old male, with an uncertain educational background, limited marketable skills, and few positive work experiences. He completed no more than 10 high school grades and functions 2 to 3 grade levels below that. He is likely to be poor, having earned less than $10,000 in the year prior to his arrest.
>
> Although the U.S. prison population is 96 percent male, the plight of the incarcerated woman cannot be overlooked. She is typically under 30, a single mother with two or more children, poor and on welfare. She is likely to have problems with physical and/or mental health, drugs and/or alcohol.

This situation does not improve when a person is released from prison. The unemployment rate among ex-offenders is three times the rate for the general public. Those that do find jobs often work in low-income, semiskilled positions. If they do not commit another crime, many ex-felons end their lives in suicide or dereliction among the skid row population. As Chief Justice Warren Burger put it so eloquently:

> Ninety-five percent of the adults who are presently confined in our nation's prisons will eventually return to freedom. Without any positive change, including learning marketable skills, a depressing number—probably more than half of these inmates—will return to a life of crime after their release.

The situation is, in fact, even more distressing than that described by the Chief Justice. Sixty to seventy-five percent of the 150,000 offenders released from institutions each year will return to crime, and 30 to 50 percent will be recommitted to prison within 1 year. Among juveniles, the rate of recidivism reaches as high as 80 percent.

In response to this deplorable set of circumstances, the Chief Justice proposed in his 1981 report to the American Bar Association the introduction of mandatory educational and vocational programs for all inmates. He urged that every inmate who could not read, write, spell, and do simple arithmetic would be given that training. In addition, the Chief Justice recommended a large expansion of vocational training in the skilled and semiskilled crafts. His recommendations were not only echoed but amplified and expanded upon by the report of the National Advisory Council on Vocational Education to which I have previously referred. That report should be required reading for every public official in this country.

The Chief Justice's recommendations, combined with those of the National Advisory Council on Vocational Education, clearly point to the need for a greater Federal commitment in the corrections education area. To my mind, their observations and findings provide the strongest support possible for the legislative initiative embodied in this bill. In addition, they are buttressed by the results of studies in California, Maryland, New Mexico, Texas, and Washington which correlate a reduction in the recidivism rate to the education and training received by the inmate while in prison.

Mr. President, the Federal correctional education assistance would authorize $25 million a year in grants to State education agencies. The size of a grant would be determined by the ratio of a State's inmate population to the total inmate population in all States, but no State would receive less than $100,000. The States would be permitted great latitude in fashioning programs to meet their own specific needs and conditions. Funds could be used for a variety of educational programs, including:

One, academic programs for basic education, special education, secondary school credit, postsecondary education, fine arts, recreation, and health.

Two, vocational training programs.

Three, library development and library services.

Four, teacher training in correctional education, particularly in social education, reading instruction, and abnormal psychology.

Five, educational release programs for offenders with special attention on vocational work release training programs.

Six, guidance programs, including testing, counseling, psychological evaluation, and placement services.

Seven, supportive services, with special emphasis upon job placement and coordination of educational services with other agencies furnishing services to criminal offenders after their release.

Eight, cooperative programs with private business and industry to provide both job training and employment opportunities for offenders.

Mr. President, this marks the third time since 1979 that I have introduced legislation of this nature. I am very encouraged that this year the serious situation which this bill addresses will be the subject of a hearing to be conducted in conjunction with the reauthorization hearings on the Vocational Education Act. This is a significant development, and I want to take this op-

portunity to commend the Senator from Vermont (Mr. STAFFORD), who is the chairman of the Senate Subcommittee on Education, Arts, and Humanities, for his foresight, concern, and leadership in giving this critical problem the serious consideration it so desperately needs.

I ask unanimous consent that the text of the legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 625

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Correctional Education Assistance Act".

FINDINGS AND DECLARATION OF PURPOSE

SEC. 2. (a) The Congress finds that—

(1) existing educational programs in juvenile and adult correctional institutions are inadequate to meet the needs of accused individuals or convicted offenders;

(2) State and local educational agencies and other public and private nonprofit agencies do not have the financial resources needed to respond to the increasing need of the correctional system for appropriate institutional and noninstitutional educational services for accused individuals and convicted criminal offenders;

(3) education is important to, and makes a significant contribution to, the adjustment of individuals in society; and

(4) there is a growing need for immediate action by the Federal Government to assist State and local educational programs for criminal offenders in correctionl institutions.

(b) It is, therefore, the purpose of this Act to provide financial assistance to the States to carry out educational programs for criminal offenders in correctional institutions.

DEFINITIONS

SEC. 3. As used in this Act—

(1) "criminal offender" means any individual who is charged with or convicted of any criminal offense, including a youth offender or a juvenile offender;

(2) "correctional institution" means any—

(A) prison,

(B) jail,

(C) reformatory,

(D) work farm,

(E) detention center, or

(F) halfway house, community-based rehabilitation center, or any other similar institution designed for the confinement of rehabilitation of criminal offenders;

(3) "Secretary" means the Secretary of Education;

(4) "State" means any State of the United States, the District of Columbia, and the Commonwealth of Puerto Rico; and

(5) "State educational agency" means the State board of education or other agency or officer primarily responsible for the State supervision of public elementary and secondary schools, or, if there is no such officer or agency, an officer or agency designated by the Governor or by State law.

AUTHORIZATION

SEC. 4. (a)(1) There is authorized to be appropriated $25,000,000 for the fiscal year 1984, and for each succeeding fiscal year ending prior to October 1, 1985, to enable the Secretary to make grants to States in accordance with the provisions of this Act.

(2) Funds appropriated for any fiscal year may remain available until expended.

(b) The Secretary is authorized to make grants to State educational agencies and to make grants for programs of national significance in accordance with the provisions of this Act.

ALLOCATION

SEC. 5. (a)(1) In each fiscal year in which the funds appropriated pursuant to section 4(a) exceed $15,000,000 the Secretary shall reserve 3 per centum of the funds appropriated for carrying out section 8.

(2) From the sums appropriated pursuant to section 4(a) in each fiscal year in which paragraph (1) does not apply and from the remainder of the sums appropriated pursuant to section 4(a) for each fiscal year in which paragraph (1) does apply, the Secretary shall allocate to each State $100,000 plus an amount which bears the same ratio to such sums or to such remainder, as the case may be, as population of the State in correctional institutions for the year preceding the year for which the determination is made bears to the population of all States in correctional institutions for such year.

(b) The amount by which any allotment of a State for a fiscal year under subsection (a) exceeds the amount which the Secretary determines will be required for such fiscal year for applications approved under section 7 within such State shall be available for reallotment to other States in proportion to the original allotments to such States under subsection (a) for that year, but with such proportionate amount for any such State being reduced to the extent it exceeds the sum the Secretary estimates such State needs and will be able to use for such year. The total of such reduction shall be similarly reallotted among the States whose proportionate amounts were not so reduced. Any amount reallotted to a State under this subsection during a fiscal year shall be deemed part of its allotment under subsection (a) for such year.

(c) No sums appropriated pursuant to section 4(a) shall be used for purposes inconsistent with the Juvenile Justice and Delinquency Prevention Act of 1974.

USES OF FUNDS

SEC. 6. Grants made under this Act to States may be used, in accordance with applications approved under section 7, for the cost of educational programs for criminal offenders in correctional institutions, including—

(1) academic programs for—

(A) basic education with special emphasis on reading, writing, vocabulary, and arithmetic;

(B) special education program as defined by State law;

(C) bilingual or bicultural programs for members of minority groups;

(D) secondary school credit programs;

(E) postsecondary programs;

(F) fine arts programs;

(G) recreation and health programs; and

(H) curriculum development for the programs described in this paragraph;

(2) standard and innovative vocational training programs;

(3) library development and library service programs;

(4) training for teacher personnel specializing in correctional education, particularly training in social education, reading instruction, and abnormal psychology;

(5) educational release programs for criminal offenders, with special attention given to vocational work release training programs;

(6) guidance programs, including testing, preparation, and maintenance of case records for criminal offenders, counseling, psychological evaluation, and placement services;

(7) supportive services for criminal offenders, with special emphasis upon job placement services and coordination of educational services with other agencies furnishing services to criminal offenders after their release; and

(8) cooperative programs with business concerns designed to provide job training for criminal offenders.

APPLICATION

SEC. 7. (a) A State desiring to receive a grant under this Act shall submit an application to the Secretary containing or accompanied by such information as the Secretary deems reasonably necessary, with such annual revisions as are necessary. Each such application shall—

(1) provide that the programs and projects for which assistance under this Act is sought will be administered by, or under the supervision of, the State educational agency;

(2) set forth a program for carrying out the purposes set forth in section 6 and provide for such methods of administration as are necessary for the proper and efficient operation of the program;

(3) provide assurances that no person with responsibilities in the operation of such program will discriminate with respect to any program participant or any employee in such program because of race, color, creed, national origin, sex, political affiliation or beliefs;

(4) provide assurances that funds received under this Act will be used only to supplement, and to the extent practical increase, the level of funds that would, in absence of such Federal funds, be made available from regular non-Federal sources for the purposes described in section 6, and in no case may such funds be used to supplant funds from non-Federal sources; and

(5) provide for a three-year report to the Office of Education containing a description of the activities assisted under this Act together with a description of evaluation programs designed to test the effectiveness of education programs assisted under this Act.

(b) Each application made under this Act may be approved by the Secretary if the Secretary determines that the application meets the requirements set forth in this Act.

PROGRAMS OF NATIONAL SIGNIFICANCE

SEC. 8. (a) From funds reserved pursuant to section 5(a)(1), the Secretary is authorized to make grants to State and local educational agencies, institutions of higher education, State correctional agencies, and other public and private nonprofit organizations and institutions to meet the costs of programs of national significance which the Secretary determines give promise of improving the education of criminal offenders.

(b) No grant may be made under this section unless an application is made to the Secretary at such time, in such manner, and containing such information as the Secretary deems reasonably necessary.

PAYMENTS AND WITHHOLDING

SEC. 9. (a) The Secretary shall pay to each State which has an application approved under this Act an amount equal to the cost of an application approved under section 7(b) or section 8(b).

(b) Whenever the Secretary, after giving reasonable notice and opportunity for hearing to a State under this Act, finds—

(1) that the program or project for which assistance under this Act was made has been so changed that it no longer complies with the provisions of this Act; or

(2) that in the operation of the program or project there is failure to comply substantially with any such provisions:

the Secretary shall notify such State or grantee, as the case may be, of the findings, and no further payments may be made to such State or grantee, as the case may be, by the Secretary until the Secretary is satisfied that such noncompliance has been, or will promptly be, corrected. The Secretary may authorize the continuance of payments with respect to any projects pursuant to this Act which are being carried out by a State and which are not involved in the noncompliance.●

By Mr. GOLDWATER (for himself and Mr. DECONCINI):

S. 626. A bill to designate the Aravaipa Canyon Wilderness in the State of Arizona; to the Committee on Energy and Natural Resources.

ARAVAIPA CANYON WILDERNESS ACT

● Mr. GOLDWATER. Mr. President, in southern Arizona, just north of the city of Tucson, we have an area which the Papago Indians call A'Aly Waipia, which means "little wells." The place I am referring to is Aravaipa Canyon and the bill which I am introducing today would include Aravaipa Canyon and an additional 2,626 acres of adjoining public lands into the National Wilderness Preservation System. This proposal does have the administration's full support.

The recommended 6,670 acres would become the first public land under Bureau of Land Management jurisdiction to come under the protection of the wilderness system. In 1969 and 1971, the 4,044 acres, 7½-mile long canyon was set aside as the Aravaipa Canyon Primitive Area, creating BLM's first primitive area. Situated at the east and west entrances to the canyon is about 6,000 acres of land owned in fee by the Defenders of Wildlife Trust for the George Whittell Wildlife Preserve at Aravaipa Canyon (Aravaipa Trust). The trust manages an additional 20,000 or more acres, under State and Federal grazing leases, at the entrances to the canyon and on the plateau south of the canyon. Title to the canyon itself is in the Bureau of Land Management.

This bill is the result of many years of cooperative effort between the Bureau of Land Management, the Defenders of Wildlife, and the Aravaipa Trust, and it is a great tribute to conservationism and private sector initiative, as envisioned by President Reagan. Established in August 1974 by the Defenders of Wildlife, the Aravaipa Trust took title to these lands from the Defenders, primarily to preserve the many species of wildlife in and around Aravaipa Canyon. To accomplish this, it is necessary to protect the unique complex of desert and riparian habitats of the main canyon, its side canyons, and the canyon rims and plateaus from uses that might diminish their capacity to sustain wildlife. Since early 1972, when Defenders of Wildlife first bought lands at Aravaipa, Defenders and the Trust have devoted a great deal of time and energy, and over $3,000,000 to purchasing, maintaining, and managing these lands.

Aravaipa Canyon, located in the east end of an arid portion of the Sonoran Desert, has been referred to as the miniature Grand Canyon of Arizona. Its beautiful multicolored cliffs rise as high as 1,000 feet above the canyon bottom. Within the canyon, one can see a cross-section of Earth's history representing nearly 2.6 billion years. And, in fact, the canyon area has been inhabited for perhaps the past 9,500 years. Primary prehistoric remains include Hohokam and Salado sites.

In the bottom of the Aravaipa Canyon, one finds the Aravaipa Creek, a perennial stream which travels for about 15 miles. It not only supports a lush green riparian vegetation, it also provides water for wildlife and for 12 fish species, 2 of which are threatened and endangered. In the canyon, one can find more than 158 species of bird and also bighorn sheep, mule deer, fox, mountain lion, coyotes, bobcats, javelina, and other small animals.

This scenic canyon is not only a haven for naturalists, but it offers many recreational opportunities such as backpacking, hiking, horseback riding, hunting outside canyon bottoms, mountain and rock climbing, bird watching, photography, and sightseeing. Currently, the Bureau of Land Management limits the number of visitors to 50 per day in order to protect the area and entry to the canyon is by permit only. No motor vehicles or dogs are allowed.

Finally, Mr. President, I would like to point out that in no way would the wilderness designation of the Aravaipa Canyon area result in any adverse impacts on the Nation's security, mineral needs, or economic well-being. I am very cognizant of the sensitivity of the issue of mineral content in potential wilderness land. This is a very simple bill which attempts to preserve and protect a magnificent desert sanctuary.

Mr. President, I ask unanimous consent that the text of my bill be printed in the CONGRESSIONAL RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 626

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Arvaipa Canyon Wilderness Act."

SEC. 2. The Congress finds that—

(a) the Aravaipa Canyon, situated in the Galiuro Mountains in the Sonoran desert region of Southern Arizona, is a primitive place of great natural beauty that, due to the rare presence of a perennial stream, supports an extraordinary abundance and diversity of native plant, fish, and wildlife, making it a resource of national significance; and

(b) the Aravaipa Canyon should, together with certain adjoining public lands, be incorporated within the National Wilderness Preservation System in order to provide for the preservation and protection of this relatively undisturbed but fragile complex of desert, riparian and aquatic ecosystems, and the native plant, fish, and wildlife communities dependent on it, as well as to protect and preserve the area's great scenic, geologic and historical values, to a greater degree than would be possible in the absence of wilderness designation.

SEC. 3. In furtherance of the purposes of the Wilderness Act of 1964 (78 Stat. 890, 16 U.S.C. 1131 et seq.) and consistent with the policies and provisions of the Federal Land Policy and Management Act of 1976 (90 Stat. 2743; 43 U.S.C. 1701 et seq.), certain public lands in Graham and Pinal Counties, Arizona, which comprise approximately six thousand six hundred and seventy acres, as generally depicted on a map entitled "Aravaipa Canyon Wilderness—Proposed" and dated May 1980, are hereby designated as the Aravaipa Canyon Wilderness and, therefore, as a component of the National Wilderness Preservation System.

SEC. 4. Subject to valid existing rights, the Aravaipa Canyon Wilderness shall be administered by the Secretary of the Interior in accordance with the provisions of the Wilderness Act governing areas designated by that Act as wilderness. For purposes of this Act, any references in such provisions to the effective date of the Wilderness Act shall be deemed to be a reference to the effective date of this Act and any reference to the Secretary of Agriculture with regard to administration of such areas shall be deemed to be a reference to the Secretary of the Interior, and any reference to wilderness areas designated by the Wilderness Act or designated national forest wilderness areas shall be deemed to be a reference to the Aravaipa Canyon Wilderness. For purposes of this Act, the reference to national forest rules and regulations in the second sentence of section 4(d)(3) of the Wilderness Act shall be deemed to be a reference to rules and regulations applicable to public lands, as defined in section 103(e) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1701, 1702).

SEC. 5. As soon as practicable after this Act takes effect, the Secretary of the Interior shall file a map and a legal description of the Aravaipa Canyon Wilderness with the Committee on Energy and Natural Resources of the United States Senate and with the Committee on Interior and Insular Affairs of the United States House of Representatives, and such map and description shall have the same force and effect as if included in this Act: *Provided,* That correction of clerical and typographical errors in the legal description and map may be made. The map and legal description shall be on file and available for public inspection in the offices of the Bureau of Land Management, Department of the Interior.

SEC. 6. Except as further provided in this section, the Aravaipa Primitive Area designations of January 16, 1969, and April 28,

1971, are hereby revoked. Prior to promulgation of rules and regulations to provide for its administration as a component of the National Wilderness Preservation System, subject to existing withdrawals, the Aravaipa Canyon Wilderness shall be administered under rules and regulations of the Secretary of the Interior applicable to designated primitive areas to the extent consistent with the provisions of this Act.●

By Mr. PACKWOOD (for himself and Mr. HATFIELD):

S. 627. A bill to authorize the establishment of a National Scenic Area to assure the protection, development, conservation, and enhancement of the scenic, natural, cultural, and other resource values of the Columbia River Gorge in the States of Oregon and Washington, to establish national policies to assist in the furtherance of this objective, and for other purposes; to the Committee on Energy and Natural Resources.

COLUMBIA RIVER GORGE ACT OF 1983

Mr. PACKWOOD. Mr. President, I am reintroducing today, along with Senator HATFIELD, the Columbia River Gorge National Scenic Area Act of 1983. With renewed commitment and an increasing sense of urgency, I am hopeful that during the 98th Congress we can move forward on the proposal for orderly management of this magnificent area. Passage of the legislation we are introducing today will establish a Federal, State, and local partnership to insure that the uniqueness of the extraordinary landscape and natural resources is not sacrificed to the pressures of rapidly expanding urban boundaries. This proposal also will provide for economic development which is consistent with the scenic and natural values of the Columbia River Gorge.

Since the first introduction of this proposal on March 31, 1982, the I-205 bridge, connecting Washington and Oregon at Government Island, has been completed. It is anticipated that the effects of this increased accessibility to farmland on the Washington side will result in rapid residential development. The tragic loss of these farmlands would be irreversible. Much of the historic and scenic character of that section of the gorge will be lost to us forever.

Efforts to protect the Columbia River Gorge are not new to the people of the Northwest. They are now entering the final stage of a 46-year-long endeavor to address the special needs of managing this area shared by the States of Oregon and Washington. Since the first introduction of this proposal, the Vancouver, Wash., City Council approved a motion to support congressional legislation declaring the Columbia River Gorge as a national scenic area. The Portland City Council had previously endorsed the concept in December 1981 and recently the Multnomah County Commissioners have voted to support a Federal scenic area.

The States of Oregon and Washington share the Columbia Gorge. It forms part of the border between them and the six gorge counties: Wasco, Hood River, and Multnomah Counties on the Oregon side; Klickitat, Skamania, and Clark Counties on the Washington side.

For about 85 miles, from Gibbons Creek and Maryhill on the Washington side, to the Sandy River on the Oregon side, the Columbia River has carved a natural wonder as magnificent as any found on Earth. Compressed into these few miles of outstanding geologic features is a transition from rain forest to sagebrush—all without a change in elevation.

Moving east from the Portland-Vancouver metropolitan area—in little more than 1 hour by car—the traveler follows the Columbia through massive cliffs with lush vegetation and thundering waterfalls. The motorist passes landmarks like Beacon Rock, the second largest monolith in the world—only the Rock of Gibraltar is larger. The terrain evens out a bit with rolling hills and vast meadows where wildflowers bloom. By the time the traveler arrives at The Dalles, the landscape has become arid and dotted with sagebrush.

In making this short trip, the traveler has passed from an area in which the average rainfall varies from about 64 inches per year to about 16 inches per year.

The wide variety of climatic conditions in the gorge give it an unusually diverse plant and animal population. Botanically, the dense, mixed conifer forests of the western gorge give way to the semiarid grasses and sagebrush of the eastern gorge.

The gorge is home for many rare plant species. The National Park Service reports that there are four species of plants found only in the gorge, and many others are rare enough to be considered endangered.

The wildlife in the gorge is equally varied with more than 25 species of mammals, including the black bear, mountain lion, and elk. There are literally dozens of species of birds, including several recognized by the Oregon Department of Fish and Wildlife as threatened or endangered, such as the northern bald eagle and Arctic peregrine falcon.

The human species, too, is an important feature of the Columbia Gorge, and has been for at least 11,000 years.

The gorge contains extensive archeological sites, such as Memaloose Island with its sacred Indian burial ground, and the Wishram archeological site, which is noted for its petroglyphs.

The campsites of the Lewis and Clark Expedition still can be viewed in the Columbia Gorge. As all of us know, that expedition helped spark the migration which settled the West.

The Columbia Gorge figures prominently in the history of the settlement of the Pacific Northwest, as the gateway of the westward movement. Sections of the Old Oregon Trail still can be seen, along with parts of the 1856 Oregon Portage Road. The development of the railroad is documented in several places in the gorge, such as the north shore portage railroad at Bonneville Dam. The first locomotive built in the Northwest, the Oregon Pony, was used on the water level Oregon Portage road in 1862, and is today displayed in the city of Cascade Locks.

The substantial steamboat traffic which once plied the Columbia River through the gorge is recalled by the huge pilings—part of the steamboat landings—which are still visible at several places along the river. Conscious of this heritage, the Port of Cascade Locks soon will have a 350-passenger sternwheel steamboat operating on the river.

The gorge also features the "scenic highway" built in 1916. In many places, it is carved into the cliffsides. When he saw this highway, President Theodore Roosevelt said:

> You have in the Columbia River Highway the most remarkable road engineering in the United States, which, for scenic grandeur, is not equalled anywhere.

It is a difficult job, Mr. President, to describe the importance of the Columbia Gorge in words. I am not the first Senator from Oregon to try. The first was Senator E. D. Baker more than 120 years ago.

In January 1861, in his first speech in the Senate, Senator Baker said:

> The adventurous traveler, who wanders on the slope of the Pacific and on the verge of civilization, stands awestruck and astonished in the great chasm formed by the torrent of the Columbia, as, rushing between Mount Hood and Mount St. Helens, it breaks through the ridges of the Cascade Mountains to find the sea . . .

Other prominent voices in the history of the Pacific Northwest also have tried to describe the gorge. As they moved through the gorge from east to west, Lewis and Clark noted in their journal of 1806 that:

> Several small streams fall from a much greater height, and in their descent become a perfect mist which collecting on the rocks below again become visible and descend a second time in the same manner before they reach the base of the rocks. The hills have now become mountains. . . .

Another early traveler in the gorge, John Boardman, wrote this in his journal of 1843:

> Oh! the pleasure of lying by on this river for wind, to feast our eyes on the high peaks and cliffs that adorn the banks of this river on either side. Sublime landscapes, views that a Raphael or Correggio would have given thousands and endured any fatigue to have seen. . . .

Maybe the most inspired description of the gorge was written in 1865 by Frances Fuller Victor in "The River of the West":

The rise of the foothills commences, then the very mountains themselves, until when you have arrived at the Cascades, you are in their very heart—you actually stand in a gap where mighty mountains have been parted. Before arriving at this point, you have been almost sated with magnificence, but when you leave the steamer and find yourself standing pigmylike in the midst of the giant cliffs and peaks, nothing is left you but silent awe and delight. The height and grandeur of the mountains above the Cascades is so great and overpowering that it cannot be described—it can only be felt. The Hudson, which so long has been the pride of America, is but the younger brother of the majestic Columbia.

Today, the Columbia Gorge does not look exactly as it did when these earlier descriptions were written. The human impact has been heavy. Hydroelectric dams have been built in the river. Major highways and railroads run along its banks. And more than a handful of towns, industrial plants and ports are located along both the Oregon and Washington sides.

In short, although the gorge continues to be a marvelous natural wonder, it has its own local economy and population to support.

Before deciding to introduce this legislation, I asked myself how long we could expect the character of the gorge to remain unchanged. It sits, quite literally, at the edge of a major metropolitan area of 1.15 million people. As the Portland-Vancouver areas grow, so does the pressure to create suburbs in the gorge. With the completion of the I-205 bridge, there will be increased pressure for suburbanization of these lands.

The danger of uncontrolled development on the gorge has been recognized for many years. It was acknowledged 46 years ago in a study done by the Columbia Gorge Committee of the Pacific Northwest Regional Planning Commission. That 1937 study speaks of:

A crisis in the destiny of the area, in which the perishable natural values of a phenomenal region would, under ordinary circumstances, have no protection comparable in authority or scope to the various forces which endanger them.

A study by the National Park Service has confirmed and emphasized anew those earlier findings. The 1980 study concludes that the Columbia Gorge is "a nationally significant resource that warrants protection."

Since the 1937 gorge study was conducted, there has been talk of developing coordinated management in the gorge to deal with growth pressures. Many have pinned their hopes on a compact between Oregon and Washington. Today, although the pressures noted so many years ago are much greater, we are no closer to a bi-State solution.

Through the years, I have hoped that local governments on both sides of the gorge would be able to do the necessary job on their own and I strongly believe that most are willing to do so. By themselves and without support, however, they do not have the framework needed for developing an overall management plan for the gorge.

The principal problem is that management in the gorge is diffuse. It is scattered among dozens of jurisdictions, each with its own priorities and programs. These include the counties, port commissions, State highway departments, State parks departments, the Army Corps of Engineers, the Bonneville Power Authority, the U.S. Fish and Wildlife Service, and many others. We still lack a mechanism for coordinating these jurisdictions and their various interests so that the uniqueness of the gorge can be protected. Rather than treat the gorge as the single resource it so obviously is, we continue to view it as being as fragmented as the governmental jurisdictions among which it is located.

The closest that the States of Oregon and Washington have come to coordinated action to protect the gorge are the Columbia Gorge Commissions, which each State has maintained since the 1950's. Through the years, these commissions have been sensitive and effective in the management of the gorge. They have often been effective despite the fact that under the law they have only advisory powers. But truly effective management of the Columbia Gorge should not be dependent upon cajoling, hope, and argument. This is the brushfire approach to management.

What is needed is a regional solution to management of the gorge. The States of Washington and Oregon, the local governments, and all the other interest in the gorge must be brought together in the common interest of orderly management. I am convinced that they will develop a coordinated management plan for the gorge if given adequate support and the framework needed to put it together.

The legislation we introduce today will provide just such support and framework. It recognizes the importance of the existing economy of the gorge, but it also seeks to protect the historic, cultural, and scenic values that make the gorge unique.

Protecting the gorge as a natural resource need not conflict with the broadening of the area's economic base. We acknowledge that the gorge is a major transportation corridor. It is an important commercial and industrial area. I do not believe that growth will be less vigorous if it is carefully coordinated and controlled.

I do not propose, nor would I ever support, an effort to eradicate man's presence in the gorge. What is needed is an approach that protects both the natural values and the right of property owners to remain on their land, of mills to cut lumber, and dams to generate electricity.

I want to conclude, Mr. President, with some comments from an editorial from The Dalles Chronicle, which is located in the city of The Dalles at the eastern end of the gorge:

This argument does not have to be one of city versus country, Washington versus Oregon, development versus environment . . . If these elements become the tenor of the discussion, everyone is going to lose; the people who live deep in the gorge who want to manage their own affairs, those of us who live on the edge of the gorge and love the experience of visiting it, and the rest of America.

Mr. President, I request unanimous consent that a summary of the bill, and the text of the bill be printed in the CONGRESSIONAL RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 627

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE AND TABLE OF CONTENTS

SECTION 1. This Act may be cited as the "Columbia River Gorge Act of 1983".

TABLE OF CONTENTS

Sec. 1. Short title and table of contents.
Sec. 2. Findings and purposes.
Sec. 3. Establishment of Area.
Sec. 4. Administration.
Sec. 5. Management plan for Area.
Sec. 6. Interim protection and management.
Sec. 7. Federal activities within the Area.
Sec. 8. Intergovernmental cooperation.
Sec. 9. Enforcement.
Sec. 10. Remedies.
Sec. 11. Judicial review.
Sec. 12. Acquisition.
Sec. 13. Indian treaties.
Sec. 14. Authorization of appropriations.
Sec. 15. Acquisition fund.
Sec. 16. Mitigation of local revenue losses.
Sec. 17. Compliance with Budget Act.

FINDINGS AND PURPOSES

SEC. 2. (a) FINDINGS.—The Congress finds that—

(1) the Columbia River Gorge, located in the State of Oregon and the State of Washington, is a spectacular canyon of compelling and majestic beauty formed by the Columbia River cutting through the Cascade Range and dramatically illustrates natural geologic forces;

(2) the Columbia River Gorge is the historic gateway between the Pacific Ocean and the interior of the North American continent traveled by Native Americans, explorers, traders, and pioneers, and evidencing human habitation for over 11,000 years, and it remains an area of commercial and economic importance to the region, particularly with respect to navigation, transportation, energy production, fisheries, agriculture, and recreation;

(3) the Columbia River Gorge contains magnificent scenic, natural, and recreational values of national significance, including the cascading all-season waterfalls and an extensive system of hiking trails;

(4) scenic viewpoints, highways, and trails are critical recreation facilities heavily used by residents of the Portland-Vancouver metropolitan area and by visitors from around the Pacific Northwest, the Nation, and the world;

(5) the botanical diversity of the Columbia River Gorge ranging from the sagebrush and grasslands of the east to the lush rain forests of the west, including many threatened and endangered species, is unique, due in part to the diverse climate of the area;

(6) human impact on the landscape of the Columbia River Gorge including Federal hydroelectric power development, interstate highway construction, port and navigation facilities, farms, orchards, forest production, cities, and towns, is intense, but, historically, much of the diverse scenic quality of the Gorge has been preserved;

(7) the character of much of the landscape of the Columbia River Gorge has been maintained and enhanced by existing rural communities which should be protected and maintained;

(8) the existing scenic, historic, recreational, archeological, and scientific qualities of the Columbia River Gorge are threatened by rapid population growth in the nearby Portland, Oregon-Vancouver, Washington metropolitan area, by uncontrolled development, and by the existence of more than fifty local, State, and Federal jurisdictions and agencies with authority within the Columbia River Gorge;

(9) the existing local, State, and Federal planning and regulatory authorities lack sufficient resources to provide for growth management, develop recreational facilities to serve tourists and residents of the metropolitan areas in close proximity to the Columbia River Gorge, and protect the unique scenic resources of the Columbia River Gorge; and

(10) in order to resolve differences, existing and potential, between the various affected jurisdictions in the State of Oregon and the State of Washington over protection and enhancement of the existing character of the Columbia River Gorge, and in order to protect the scenic and other values of Federal lands and facilities located within the Columbia River Gorge, the Federal Government must form a partnership with State and local governments in the Columbia River Gorge, and focus final decision making authority in a single arbiter, thereby protecting the gorge's nationally significant scenic, natural, and cultural (including historical, archeological, scientific, recreational, and social) resources.

(b) PURPOSES.—The purposes of this Act are—

(1) to protect, conserve, and enhance the scenic, natural, cultural, and other resource values of existing Federal property located in the Columbia River Gorge, including lands administered by the United States Forest Service, United States Bureau of Land Management, the Army Corps of Engineers, and lands included in the Interstate Highway System;

(2) to protect and enhance all scenic, cultural, and natural resources of the Columbia River Gorge, including sensitive habitats for threatened and endangered species, while providing public use and enjoyment consistent with protecting and preserving these resources;

(3) to protect and preserve the historical and archeological resources of the Columbia River Gorge and, where appropriate, to make these resources more available to the public for educational and scientific purposes;

(4) to protect and perpetuate the economy of the Columbia River Gorge, including but not limited to agriculture, fishing, existing hydroelectric facilities transportation facilities and timber utilization, and the character of human habitation, in harmony with the existing visual landscape, and by promoting economic development within the gorge which is consistent with the existing scenic and natural character of the Columbia River Gorge and which promotes public awareness of the historical, cultural, scenic and natural values of the area and which supports and enhances the economic livelihood of the gorge by encouraging growth to occur in the existing incorporated communities, by recognizing compatible historic economic pursuits, such as farming, grazing, forestry, and orcharding, outside the communities as appropriate to preserve the existing character of the gorge, and by enhancing the potential of the gorge for increased tourism;

(5) to provide for and manage public use and enjoyment of the Columbia River Gorge in a manner consistent with natural resource protection and maintenance of the existing rural landscape, including the establishment, acquisition, maintenance, and operation of public recreation and natural areas and facilities to meet the needs of a growing regional population;

(6) to utilize the land use planning and other powers of local and State governments and existing Federal agencies to further the purposes of this Act and provide Federal assistance in the development and implementation of a single management plan for the Columbia River Gorge; and

(7) to facilitate and effect a partnership among the Federal Government, the State of Oregon, the State of Washington, and local government entities located within the Columbia River Gorge in order to develop and enforce a single management plan for the area which will supplement local and State plans and which will protect and enhance the area's existing character while protecting critical lands and allowing development only when consistent with preservation of existing scenic, natural, and cultural values.

ESTABLISHMENT OF AREA

SEC. 3. (a) ESTABLISHMENT.—In order to carry out the purposes of this Act, the Columbia River Gorge National Scenic Area (hereafter referred to in this Act as the "area") is established as a unit of the national forest system.

(b) MAP AND DESCRIPTION.—(1) The area shall consist of the area within the boundaries generally depicted on the map entitled "Boundary Map, Columbia River Gorge Scenic Area," numbered ———— and dated ————, which shall be on file and available for public inspection in the offices of the Forest Service, Department of Agriculture, and in the offices of the regional commission established pursuant to section 4. As soon as practicable after the date of enactment of this Act, the Secretary of Agriculture (hereinafter referred to in this Act as the "Secretary") shall publish in the Federal Register a map and legal description of the area. Such description shall have the same force and effect as if included in this Act, except that correction of clerical and typographical errors in such map and legal description may be made. The boundary shall be subject to adjustment as provided in section 5(b)(7) hereof.

(2) The areas on such map depicted as "critical" herein referred to as "critical lands" shall be treated as the portions of the area which are of critical importance to the protection and preservation of the values of the area for purposes of applying the provisions of this Act.

(3) The incorporated towns and cities of The Dalles, Hood River, White Salmon, Bingen, Cascade Locks, Stevenson, Washougal, Mosier, and North Bonneville, as their boundaries (including any specific urban growth boundary which has been expressly approved by the applicable State) existed on July 1, 1981, shall not be included within the boundaries of the area. If, after July 1, 1981, the boundaries of any of said cities or towns are changed by such city or town, then the area within such new boundary shall not thereafter be within the boundary of the area, if the boundary change has been approved in the manner to be provided in the management plan as required in section 5(b)(7).

(c) BOUNDARIES OF MOUNT HOOD NATIONAL FOREST.—The boundaries of the Mount Hood National Forest are extended to include all of the lands in the State of Oregon lying within the area as described in accordance with section 3(b) which are not within the national forest boundaries on the date of enactment of this Act.

(d) BOUNDARIES OF GIFFORD PINCHOT NATIONAL FOREST.—The boundaries of the Gifford Pinchot National Forest are extended to include all of the lands in the State of Washington lying within the area as described in accordance with section 3(b) which are not within the national forest boundaries on the date of enactment of this Act.

(e) FOREST SYSTEM REVENUES.—For purposes of any provision of law under which funds are provided to a State or local government on the basis of revenues derived from any unit of the national forest system and notwithstanding subsection (a), the national forest system lands in the State of Oregon which are within the area shall be treated as components of the Mount Hood National Forest and the national forest system lands in the State of Washington which are within the area shall be treated as components of the Gifford Pinchot National Forest.

ADMINISTRATION

SEC. 4. (a) BY THE SECRETARY OF AGRICULTURE.—(1) The area shall be administered by the Secretary of Agriculture, acting through the United States Forest Service, in accordance with this Act and in accordance with the provisions of law generally applicable to units of the national forest system. In the case of any conflict between the provisions of this Act and such generally applicable provisions of law, the provisions of this Act shall govern.

(2) The Secretary, acting through the United States Forest Service, shall establish procedures to give all interested Federal agencies, State and local governments, and the public adequate notice and an opportunity to comment upon and participate in the preparation and implementation of plans and programs for the management of the area.

(b) BY THE REGIONAL COMMISSION.—(1) There is hereby established in the Department of Agriculture the Columbia River Gorge National Scenic Area Regional Commission (hereinafter in this Act referred to as the "Regional Commission"). The members of the Regional Commission shall be appointed within ninety days of the enactment of this Act.

(A) One member who resides in each of the following counties: Multnomah County, Oregon; Hood River County, Oregon; Wasco County, Oregon; Clark County, Washington; Skamania County, Washington; and Klickitat County, Washington, to be appointed by the governing body of each of the respective counties.

(B) Two members who reside in the State of Oregon to be appointed by the Governor of the State of Oregon.

(C) Two members who reside in the State of Washington to be appointed by the Governor of the State of Washington.

(D) Three members who have a demonstrated interest in the values to be protected by this Act to be appointed by the Secretary of the Department of Agriculture.

(E) The chief of the Forest Service, Department of Agriculture or his designee, shall serve as an ex officio nonvoting member.

If any county governing body referred to in subparagraph (A) or either Governor referred to in subparagraph (B) or (C) fails to appoint a member of the Commission under subparagraph (A), (B), or (C) within 90 days after the date of the enactment of this Act or within 90 days after the expiration of a member's term from that county or State, the Secretary of Agriculture may appoint a resident of that county or State to serve as the member from such county or State.

(2) The Regional Commission shall be responsible for the following:

(A) advising and assisting the Chief of the Forest Service in the preparation and development of the management plan and, subject to section 5(e), approving the management plan and any changes in it before adoption by the Secretary;

(B) facilitating communication and coordination among the Federal, State, and local governmental agencies with jurisdiction within the Area and facilitating communication with residents and landowners within the Area and advising the Secretary on the appropriate Federal role in the management and administration of the Area;

(C) reviewing and monitoring the implementation of the management plan by Federal, State, and local governmental agencies having jurisdiction within the Area to assist the Secretary in ensuring consistency and compliance with the plan and in order to recommend to the Secretary potential revisions and methods of enforcing the plan;

(D) reviewing all land acquisition proposals submitted by the Secretary in cases involving the potential use of eminent domain as provided in section 12, and submitting timely recommendations or comments to the Secretary with respect to such acquisition before eminent domain is exercised;

(E) reviewing all Federal development projects and plans within the Area for consistency with the management plan and submitting recommendations on all such projects to the head of the responsible Federal agency;

(F) preparing an annual report for submission to the Secretary of the Department of Agriculture, the United States Congress, and the Governors of the States of Oregon and Washington advising them of the status of the management plan and its implementation; and

(G) making such other recommendations to the Secretary and Federal, State, and local units of government as the Regional Commission may deem necessary to carry out the purposes of this Act.

(3) Members of the Regional Commission shall be appointed for terms of three years, except that the initial terms for the members shall be as follows:

(A) The member who resides in Multnomah County, Oregon, shall serve for a term of one year, the member who resides in Hood River County, Oregon, shall serve for a term of two years, and the member who resides in Wasco County, Oregon, shall serve for a term of three years. The member who resides in Clark County, Washington, shall serve for a term of one year, the member who resides in Skamania County, Washington, shall serve for a term of two years, and the member who resides in Klickitat County, Washington, shall serve for a term of three years.

(B) One of the members nominated by the Governor of Oregon shall serve for two years and the other such member for three years. One of the members nominated by the Governor of Washington shall serve for two years and the other such member for three years.

(C) One of the members nominated by the Secretary shall serve for one year, one of such members shall serve for two years, and the third such member shall serve for three years.

A member may be reappointed only once unless such member was originally appointed to fill a vacancy pursuant to subsection (b)(4) of this section, in which case a member may be reappointed twice.

(4) Any vacancy in the Regional Commission shall be filled in the same manner in which the original appointment was made. Any member appointed to fill a vacancy shall serve for the remainder of the term for which his predecessor was appointed. Any member may serve after the expiration of his term for a period not longer than thirty days.

(5) The presiding officer of the Regional Commission shall be elected annually by the members of the Regional Commission and shall serve for a term of one year. No member may serve as presiding officer for consecutive terms, and no member may serve as presiding officer if his predecessor as presiding officer was appointed to the Regional Commission by the same official or governing body.

(6) The Commission shall meet at least once each quarter and, to the maximum extent practicable, all meetings of the Regional Commission shall take place within the counties having any jurisdiction in the area.

(7) Unless otherwise provided, the Regional Commission shall act or advise by affirmative vote of a majority of its members, but a lesser number may hold hearings.

(8) The Regional Commission may for the purpose of carrying out its functions hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence as the Regional Commission may deem advisable. The Regional Commission may administer oaths or affirmations to witnesses appearing before it.

(9)(A) Members of the Regional Commission who are full time officers or employees of the United States, the State of Oregon, the State of Washington, or any county referred to in subsection (b)(1)(A) shall receive no additional pay on account of their service on the Regional Commission.

(B) Except as provided in subparagraph (A), members of the Regional Commission shall serve without pay. While away from their homes or regular places of business in the performance of service for the Regional Commission, members of the Regional Commission shall be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as persons employed intermittently in the Federal Government service under section 5703 of title 5 of the United States Code.

(10) The Secretary shall provide the Regional Commission with such staff and technical assistance as the Secretary, after consultation with the Regional Commission, considers appropriate to enable the Regional Commission to carry out its duties.

(11) Upon request of the Secretary, any Federal agency may provide information, personnel, property, and services on a reimbursable basis, to the Regional Commission to assist it in carrying out its duties under this Act.

(12) In carrying out the purposes of this Act, the Secretary and the Regional Commission shall involve the public and local, State, and Federal Government agencies to the fullest extent possible in making decisions by consulting with interested and concerned citizens and conducting public hearings at places within counties having jurisdiction in the Area in order to provide such citizens with an opportunity to testify regarding the development, implementation, and enforcement of the Management Plan.

(13) Actions taken and orders issued by the Regional Commission shall be subject to the provisions of subchapter II of chapter 5 and chapter 7 of title 5, United States Code (5 U.S.C. 551 et seq.; 5 U.S.C. 701 et seq.).

MANAGEMENT PLAN FOR AREA

SEC. 5. (a) PREPARATION.—The Chief of the Forest Service shall prepare a management plan for the area with the consultation and advice of the Regional Commission in order to accomplish the purposes of this Act. The management plan shall be prepared by an interdisciplinary planning team selected by the Chief of the Forest Service. In the preparation of the management plan the Regional Commission and the Forest Service shall hold public meetings to inform residents within the area, State and local governments, Federal agencies, and other interested parties of the provisions of this Act, the objectives of the management plan, the actions to be undertaken in the preparation of the management plan, the time when such actions are proposed to be taken, and to provide interested persons and agencies with an opportunity to express their views with respect to matters covered by the management plan. The management plan shall be submitted to the Regional Commission by the Chief of the U.S. Forest Service within two years from the effective date of this Act.

(b) CONTENT.—The management plan shall—

(1) be based upon an inventory of the area's resources including archeological, social, economic, forest, historical, natural, geological, recreational, and scenic values;

(2) protect, maintain, and enhance the scenic, natural, and cultural values of the area. The management plan shall also include provisions for resource protection, interpretation, and visitor use, including development of public use areas and facilities;

(3) designate appropriate uses of all lands within the area in order to achieve the purposes of this Act;

(4) establish procedures for the review of changes in State-approved urban growth boundaries within the area for incorporated communities, and boundaries of cities and towns within the area, for the purpose of determining whether areas within such

changed boundaries may be approved for exclusion from the boundaries of the area;

(5) review lands designated as critical on the map filed pursuant to section 3(b)(2) and all other lands within the area in order to identify, for purposes of the management plan, lands which are critical to the protection, development, and interpretation of the resource values of the area including: (A) those lands whose existence in a natural state is essential to protect the scenic and natural value of the area; (B) those lands whose essential character should remain unchanged in order to retain the harmonious blend of manmade and natural landscape features; (C) those lands whose present, or presently planned, use is adverse to values which this Act seeks to protect and enhance; and (D) those lands necessary to provide recreational and interpretive facilities and access to public lands for visitors to the area;

(6) recommend transfers of jurisdiction for existing publicly owned land if advisable to achieve the purposes of this Act and determine appropriate management agencies for such lands;

(7) provide a mechanism for examining and making minor changes in the exterior boundaries of the area and for revising and amending the management plan as necessary to achieve the purposes of this Act: *Provided, however,* That any changes in the exterior boundaries of the area shall not result in an aggregate increase in the acreage of the area, as initially established, within any county that has jurisdiction in the area;

(8) encourage private individuals and local governments to use or plan the use of land within the area in ways which will be consistent with and facilitate the achievement of the purposes of this Act;

(9) allow all existing land uses of specific tracts of land in the area as of July 1, 1981, which are found to be consistent with the purposes of this Act;

(10) develop procedures to coordinate existing land use plans of local, State, and Federal entities with the management plan to promote the goals and policies of the management plan; and

(11) establish a program for State and local government implementation and enforcement of the management plan to insure the continued, uniform, and consistent protection of the area in accordance with the purposes of this Act.

(c) FEDERAL, STATE, AND LOCAL ADVICE.—The Chief of the Forest Service shall periodically advise the Regional Commission of progress on the Plan and shall seek the advice of the Regional Commission. The Chief of the Forest Service shall consult with the interdisciplinary planning team, the Regional Commission, and residents of the area and other interested citizens in the preparation of the management plan. The Secretary may utilize personnel from State and local governments in the area with expertise in planning and preparing the management plan by employing them pursuant to the Intergovernmental Personnel Act.

(d) STATE AND LOCAL PLANNING.—(1) During the preparation of the management plan, and thereafter, the Secretary shall consult with State and local government authorities within the area and may provide financial and technical assistance to such authorities to carry out any land use management activity within the area or any other activity within the area which the Secretary, in consultation with the Regional Commission, determines will further the purposes of this Act.

(2)(A) In the development of the management plan, the Secretary shall examine all State and local policies, management plans, standards, and requirements applicable to the area and shall, with the consultation and advice of the Regional Commission, to the extent the Secretary deems practicable and consistent with the purposes of this Act, incorporate such policies, management plans, standards, and requirements into the management plan.

(B) In consultation with the appropriate State and local authorities, the Secretary shall seek to identify conflicts or inconsistencies between the policies, management plans, standards, and requirements referred to in subparagraph (A) and the proposed management plan in order to encourage consistent planning efforts. Following adoption of the management plan the Secretary, with the consultation and advice of the Regional Commission, shall continue to identify any such conflicts or inconsistencies which arise due to amendments or proposed amendments to the management plan or due to changes or proposed changes in such State or local policies, plans, standards, and requirements in order to avoid inconsistent planning efforts.

(e) APPROVAL.—(1) Upon completion of the management plan by the interdisciplinary team, it shall be submitted to the Regional Commission for approval. The Regional Commission or its designated representatives shall hold public hearings before it votes on the question of approving the management plan, at least one of which shall be held in each county within which any portion of the area is located.

(2) The Regional Commission shall consider and vote on the question of approving the management plan within one hundred and eighty days of its submission. If a majority of the Regional Commission's members vote to approve the management plan, the management plan shall be adopted by the Secretary. If a majority of the Regional Commission's members vote to disapprove of the management plan, the management plan shall be submitted to the Secretary. The Regional Commission shall specify all of its objections to the management plan prepared by the interdisciplinary team.

(3) The Secretary shall consider the objections of the Regional Commission to the management plan. The Secretary may modify the management plan to respond to the objections of the Regional Commission, provided such modifications are consistent with the purposes of this Act.

(4) The Secretary shall submit the management plan to the Regional Commission, with whatever modifications he may have made, within ninety days of the Regional Commission's vote to disapprove of the management plan.

(5) If the Regional Commission does not approve all or any part of the management plan within ninety days of its resubmission, the Secretary may, without approval by the Regional Commission, adopt the management plan as resubmitted or after eliminating any of the parts of the management plan disapproved by the Regional Commission.

(6) The management plan, and any modification thereof, shall be published in a newspaper of general circulation in the area promptly following its adoption.

(f) REQUESTS FOR AMENDMENT OR VARIANCE.—Petitions for amendments to or variances from the management plan may be submitted to the Secretary by local government authorities or by any other person. In considering such petitions, the Secretary, after notice and at least one public hearing by the Secretary and the Regional Commission, shall, on the basis of the testimony and any written recommendations presented at such hearing and the Regional Commission's recommendation, determine whether or not to modify the management plan. The notice required by this section shall be given at least twenty days prior to the public hearing by publication at least once in a newspaper of general circulation in the area. If a petition is filed, the Secretary shall, if requested by the petitioner, complete his action on such petition within sixty days after the receipt by the Secretary of a complete petition (determined according to standards prescribed by the Secretary).

INTERIM PROTECTION AND MANAGEMENT

SEC. 6. (a) MORATORIUM ON NEW USES IN CRITICAL LANDS.—Pending the adoption of interim guidelines pursuant to subsection (b), no person may construct or modify any new building or facility or reconstruct or substantially modify any existing building or facility in any portion of the area designated as critical on the map filed pursuant to section 3(b)(2). However, reconstruction of transportation facilities shall be exempted from this section under specific emergency conditions including, but not limited to slides, washouts, and accidents.

(b) FOREST SERVICE GUIDELINES.—Not later than six months after the date of the enactment of this Act, the Secretary, with the advice of the Regional Commission and the Chief of the Forest Service, shall adopt and publish interim standards and guidelines governing all land use activities within the area to protect the resources of the area; until the management plan is adopted.

(c) PURPOSE OF INTERIM GUIDELINES.—The purpose of such interim standards and guidelines shall be to protect the area from—

(1) actions which significantly detract from the current visual quality and diversity of the area;

(2) actions which significantly alter the balance of natural and manmade landscape features visible from Washington Highway 14, Interstate Highway 84, Oregon Highway 30, or existing viewpoints managed for public enjoyment;

(3) actions within any portion of the area designated as critical on the map filed pursuant to section 4(c); and

(4) any other actions which damage the resource values this Act is designed to protect.

(d) SPECIFICITY AND REVISION OF GUIDELINES.—Such interim standards and guidelines shall be as detailed and specific as is required to accomplish their objectives and purposes and may be revised or amended to accomplish such objectives and purposes.

FEDERAL ACTIVITIES WITHIN THE AREA

SEC. 7. (a) JURISDICTION.—Lands and waters located within the area which are under the administrative jurisdiction of any department or agency of the United States shall remain under such administrative jurisdiction unless jurisdiction is transferred pursuant to section 5(b)(6).

(b) PROJECTS.—(1) No department, agency, or instrumentality of the United States may undertake or assist any project or grant any license, permit, or other form of approval for any project within the area unless the Secretary, in consultation with the Regional Commission, determines that the project is consistent with the purposes of this Act and

with the management plan or the interim guidelines, or that such project is essential for the protection of public health or safety or necessary for national security or defense.

(2) As used in paragraph (1), the term "assist" includes—

(A) the sale of any flood insurance under the National Flood Insurance Act of 1968 (42 U.S.C. 4001 et seq.);

(B) any assistance provided by a department, agency, or instrumentality of the United States to a State or local government where such State or local government uses such assistance for purposes of a project described in paragraph (1); and

(C) any grant, loan, loan guarantee, or any other form of direct or indirect technical or financial assistance.

(c) EXEMPTIONS.—(1) Except as may otherwise be provided in the interim guidelines or the management plan, subsection (b) shall not apply to—

(A) any building or facility to be used for any military purpose;

(B) any temporary structure to be used only for emergency humanitarian assistance;

(C) any construction, reconstruction, or modification of which commenced before the date of the enactment of this Act; or

(D) any repair or reconstruction of a building or facility the original construction of which commenced before such date of enactment.

(2) Construction, reconstruction, or modification shall be treated as commencing only when there is either—

(A) a continuous program of physical onsite construction, reconstruction, or modification, or

(B) the owner of the building or facility has entered into binding agreements or contractual obligations for such construction, reconstruction, or modification which cannot be canceled or modified without substantial loss to the owner.

(d) PROCESS.—Not less than sixty days prior to undertaking or assisting a project or granting any license, permit, or other form of approval for any project within the area, the department, agency, or instrumentality of the United States proposing to take such action shall notify the Secretary and the Commission of its proposal. The Secretary, in consultation with the Commission, shall, after notice and opportunity for public comment, make a determination respecting the consistency of any activity described in subsection (b) with the purposes of this Act and with the management plan or interim guidelines and standards. When the Secretary determines that any activity is consistent or inconsistent with the purposes of this section or with the plan, it shall notify the agency proposing to undertake, assist, license, or approve the activity.

INTERGOVERNMENTAL COOPERATION

SEC. 8. (a) RETENTION OF STATE AND LOCAL JURISDICTION.—Nothing in this Act shall diminish, enlarge, or modify any right of the State of Oregon or the State of Washington, or any political subdivision thereof, to exercise civil and criminal jurisdiction within the area or of rights to tax persons, corporations, franchises, or property, including mineral or other interests, in or on lands or waters within the area.

(b) HUNTING AND FISHING.—The Secretary shall permit hunting and fishing on lands and waters under his jurisdiction within the boundaries of the area in accordance with applicable laws of the United States and the State of Oregon and the State of Washington. Except in emergencies, any regulations of the Secretary pursuant to this section shall be put into effect only after consultation with the appropriate State fish and wildlife department.

(c) RETENTION OF FEDERAL JURISDICTION.—Nothing in this section shall be construed to limit or prohibit any Federal action ordered by a court of competent jurisdiction or directed by a Federal agency for the protection of public health or safety, or for national defense.

(d) STATE AND LOCAL CONCURRENT POWER TO LEGISLATE.—Nothing in this Act shall be construed to prevent the adoption or implementation by any State or local government of any rule, regulction, or provision of law which is consistent with, or more stringent than, any provision of this Act or of the management plan adopted pursuant to this Act.

ENFORCEMENT

SEC. 9. (a) ENFORCEMENT OF INTERIM STANDARDS.—Prior to the adoption of the management plan, the Secretary shall monitor all land use activities within the area to ensure that said activities do not violate the interim standards and guidelines. The Secretary shall participate in State and local land use proceedings as necessary to advise said government entities whether or not proposed activities are consistent with the interim standards and guidelines. If the Secretary determines that a proposed activity is inconsistent with the interim standards and guidelines, he shall seek relief pursuant to section 10.

(b) ENFORCEMENT OF MANAGEMENT PLAN BY LOCAL GOVERNMENT.—(1) Following the adoption of the management plan, each local government entity within the area which has land use planning authority under State law and which wishes to assume responsibility for enforcement of the management plan within its boundaries shall submit to the Secretary and the Regional Commission a land use plan which demonstrates that such local government entity intends to and is capable of carrying out the provisions of this Act.

(2) Any local government seeking to assume responsibility under this section shall adopt a zoning ordinance which—

(A) protects and preserves critical lands and the resource values of the area consistent with the management plan; and

(B) provides sanctions for violation of the terms of such ordinance including civil and criminal actions, withholding of permits, and issuance of cease-and-desist orders.

(3) No local land use plan shall be approved unless the plan demonstrates that the local government has a planning staff with sufficient administrative and technical personnel and sufficient funding to enable the local government to regulate land use activities in accordance with the purposes of this Act and the management plan.

(4) The Secretary, with the advice of the Regional Commission, shall review and approve or disapprove a local use plan within six full calendar months after the plan is submitted to him. The Secretary is authorized to make annual grants to any local government entity for the purpose of assisting such entity in developing, administering, and enforcing land use plans under this Act.

(c) ENFORCEMENT OF MANAGEMENT PLAN BY SECRETARY.—The management plan shall be enforced by the Secretary utilizing the remedies provided in section 10 if—

(1) the local land use plan is disapproved;

(2) no local plan is submitted to the Secretary; or

(3) an approved local plan fails to be enforced in accordance with this Act.

REMEDIES

SEC. 10. (a) PROHIBITION ON INCONSISTENT USES.—The use or development of any lands within the Area contrary to this Act is unlawful and prohibited.

(b) VIOLATION OF ACT.—Any person who knowingly and willfully violates any regulation or order which is lawfully issued pursuant to this Act shall be fined no more than $10,000 or imprisoned no more than twelve months, or both. Any person charged with a violation of such regulation may be tried and sentenced by any United States magistrate designated for that purpose by the court by which he was appointed, in the same manner and subject to the same conditions and limitations as provided for in section 3401 of title 18 of the United States Code.

(c) CIVIL ACTION TO ENFORCE ACT.—At the request of the Secretary, the Attorney General may institute a civil action in any United States district court for an injunction or other appropriate order to prevent any person from utilizing lands within the Area in violation of the Management Plan, regulations, guidelines, or standards issued by the Secretary under this Act.

(d) NOTIFICATION TO VIOLATOR AND HEARING.—If the Secretary determines under section 9 that any person is in violation of the Management Plan, regulations, guidelines, or standards issued under this Act, he shall promptly notify the person of the violation. Such person may then request a hearing on the record before the Secretary to determine whether a violation has occurred. Following such hearing the Secretary shall set forth his findings and conclusions and any proposed, intermediate, or final order.

JUDICIAL REVIEW

SEC. 11. (a) PETITION OF APPEAL.—Any person adversely affected by any final action or order of the Secretary under this Act may appeal such action or order by filing in any of the courts specified in subsection (b), within sixty days after the date of service of such order or within sixty days after such action is taken, a written petition requesting that the order of the Secretary be modified, terminated, or set aside.

(b) APPELLATE JURISDICTION.—The United States District Court for the District of Columbia, or any United States district court located in the State of Oregon or the State of Washington which has jurisdiction of actions occurring in or affecting the Area shall be appropriate courts for appeal pursuant to subsection (a).

ACQUISITION

SEC. 12. (a) ACQUISITION AUTHORIZATION.—(1) The Secretary is authorized to acquire by donation, purchase with donated or appropriated funds, exchange, bequest, or otherwise any lands, or lesser interests therein, including scenic and conservation easements ("scenic easements"), which he determines are needed to achieve the purposes of this Act.

(2) The Secretary may acquire without the consent of the owner only lands, or interests therein, classified as critical lands under the Management Plan or designated as such on the map filed pursuant to section 3(b)(2). No such lands or interests which, on July 1, 1981, were primarily used for single family residential purposes, farming, or grazing may be acquired without the consent of the owner as long as the existing

character of that use is not substantially changed.

(3) The Secretary, in consultation with the Regional Commission, shall publish, within one hundred and eighty days of the enactment of this Act, guidelines which shall be used by him to determine what constitutes a substantial change in the land use or maintenance for nonfederally owned lands within the Area.

(4) Where the Secretary is authorized above in this section to acquire land or interests therein, without the consent of the owner, he shall—

(A) do so only in cases where, in his judgment, all reasonable efforts to acquire such lands, or interests therein, by negotiation have failed;

(B) acquire only such land, or interests therein, as, in his judgment, is reasonably necessary to accomplish the purposes of this Act; and

(C) no more than 10 per centum of the total acreage of the Area shall be acquired by condemnation.

(5) The Secretary shall notify the Regional Commission of his intent to acquire land or interests therein, without the consent of the owner, and within three months of such notification, the Regional Commission shall submit its recommendations and comments on the intended acquisition to the Secretary for consideration.

(b) CONSIDERATION OF AREA LANDOWNER OFFERS.—The Secretary shall give prompt and careful consideration to any offer made by a person owning land within the Area to sell such land to the United States. The Secretary shall specifically consider any hardship to such person which might result from an undue delay in acquiring his property.

(c) LAND EXCHANGE.—(1) In exercising his authority to acquire property by exchange, the Secretary may accept title to any non-Federal property, or interests therein, located within the Area.

(2) Notwithstanding any other provision of law, the Secretary may convey in exchange for land in the State of Oregon any federally owned property within the State of Oregon, and he may convey in exchange for land in the State of Washington any federally owned property within the State of Washington, which he classifies as suitable for exchange and which is under his administrative jurisdiction. The values of the properties exchanged pursuant to this paragraph shall be approximately equal or, if they are not approximately equal, they shall be equalized by the payment of cash to the grantor or to the Secretary as the circumstances require. In the exercise of his exchange authority, the Secretary may utilize authorities and procedures available to him in connection with exchanges of national forest lands.

(d) ACQUISITION OF STATE LAND.—Any land or interest in land owned by the State of Oregon or the State of Washington or any of their political subdivisions may be acquired only by donation or exchange.

(e) TRANSFER OF FEDERAL PROPERTY TO SECRETARY.—Notwithstanding any other provision of law, any Federal property located within the Area may, with the concurrence of the agency having jurisdiction over such property, be transferred without consideration to the administrative jurisdiction of the Secretary for use by him in carrying out the purposes of this Act. Lands acquired by the Secretary or transferred to his administrative jurisdiction within the area shall become parts of the Area.

(f) DISPOSITION OF ACQUIRED PROPERTY.—Any property acquired under this section shall, in the discretion of the Secretary be—

(1) transferred to the administrative jurisdiction of the National Forest Service for inclusion in the national forest system and administration in accordance with section 4(a); or

(2) sold for fair market value subject to such reservations, terms, and conditions as will assure the use of such property in a manner consistent with the plan. The proceeds of any sale shall be credited to the appropriation account from which funds were made available for the purchase thereof.

INDIAN TREATIES

SEC. 13. Nothing in this Act shall be construed to alter, amend, repeal, interpret, modify, or conflict with any treaty or other right of an Indian tribe.

AUTHORIZATION OF APPROPRIATIONS

SEC. 14. (a) AUTHORIZATION.—There is authorized to be appropriated such sums as may be necessary to carry out this Act.

(b) LAND AND WATER FUND.—Sums appropriated from the Land and Water Conservation Fund shall be available for the acquisition of lands, waters, and interests therein within the area.

ACQUISITION FUND

SEC. 15. (a) ESTABLISHMENT.—There is established an acquisition fund for the acquisition of lands and interests therein within the area. This fund shall be available without fiscal year limitation for expenses necessary for acquiring land and interests therein under section 12 hereof.

(b) INITIAL CAPITAL.—The initial capital of the fund shall consist of appropriations made for that purpose. The Secretary is authorized to make such subsequent transfers to the fund as he deems appropriate in connection with the functions to be carried on through the fund.

(c) APPROPRIATION.—There is hereby authorized to be appropriated a sum not to exceed as initial capital of the acquisition fund.

(d) DONATIONS.—The Secretary may accept contributions or donations of money, services, and property, real, personal, or mixed, for the management, protection, development, acquisition, and conveying of the lands within the Area. Moneys received hereunder shall be credited to the acquisition fund and are hereby authorized to be appropriated and made available until expended, as the Secretary may direct.

MITIGATION OF LOCAL REVENUE LOSSES

SEC. 16. (a) PAYMENTS TO LOCAL GOVERNMENTS.—Whenever the Secretary determines that the acquisition by the Secretary of any interest in real property within the Area has the potential effect of significantly increasing property taxes on properties remaining in private ownership, the Secretary may make payments to any local governmental entity affected by such acquisitions to mitigate the loss of property tax revenue resulting from the Federal acquisition to the extent that such payments would be used to amortize bonded indebtedness previously incurred by the political subdivision involved or to pay for the cost of providing essential public services.

(b) CONDITIONS.—If the Secretary determines that payments should be made to political subdivisions under subsection (a), the amount and duration of such payments shall be determined by the Secretary and paid to counties within the jurisdiction of which the lands within the Area are located. The counties shall distribute the payments on a proportional basis to those units of local government and affected school districts which have incurred losses of real property taxes due to the acquisition of land or interests therein for addition to either such system. In those cases in which another unit of local government other than the county acts as the collecting and distributing agency for real property taxes, the payments shall be made to such unit of local government, which shall distribute such payments as provided in this subsection. The Secretary may prescribe regulations under which payments may be made to units of local government in any case in which the preceding provisions will not carry out the purposes of this subsection.

COMPLIANCE WITH BUDGET ACT

SEC. 17. No authority under this Act to enter into contracts or to make payments shall be effective except to the extent and in such amounts as provided in advance in appropriation Acts. Any provision of this Act which, directly or indirectly, authorizes the enactment of new budget authority shall be effective only for fiscal years beginning after September 30, 1983.

LEGISLATION TO PROTECT THE COLUMBIA RIVER GORGE, THE COLUMBIA RIVER GORGE ACT OF 1983—SUMMARY OF MAJOR PROVISIONS

1. FINDINGS AND PURPOSES OF THE BILL

Findings: The Columbia River Gorge contains magnificent scenic, natural, and recreational values of national significance. It is a unique historical, geographical, biological and cultural area. There is evidence that is has been inhabited by man for over 11,000 years. It contains many threatened and endangered species of plants and animals. Human activity in the Gorge has been intense, but the uniqueness of the Gorge has been largely preserved. However, the Gorge is threatened by rapid population growth and a lack of coordinated management among the more than 50 local, state, and federal jurisdictions and agencies located there. The resources and overall authority for protecting the Gorge are lacking.

Purposes: To establish an effective partnership between federal, state, and local government for developing a single management plan for the Gorge. To protect the scenic, cultural, natural, historical, archeological, and economic resources of the Gorge. To supplement local and state plans in order to protect the Gorge's existing character while protecting critical lands and allowing development only when consistent with preservation of existing scenic, natural, and cultural values.

2. SCENIC AREA

The bill establishes the "Columbia River Gorge National Scenic Area" for the purpose of protecting all the resources of the gorge; scenic, natural, cultural and also economic. The area would extend along the gorge from the Sandy River on the west to the Maryhill Museum on the east. It would include approximately 310,000 acres, or about 480 square miles. Towns in the area will be excluded from it, and provisions made for their future growth.

3. ADMINISTRATION OF THE SCENIC AREA

The area will be administered by the Secretary of Agriculture, through the U.S. Forest Service, with the advice and assistance of the Columbia River Gorge National Scenic Area Regional Commission. The Forest Service and the Regional Commis-

sion will involve the public and local, state, and federal government agencies to the fullest extent possible in making decisions. They will consult with interested and concerned citizens and conduct public hearings within gorge counties.

4. REGIONAL COMMISSION

A 14-member Regional Commission will advise and assist the Secretary of Agriculture and the Forest Service on management decisions scenic area. Membership of the Commission breaks down as follows: one member from each of the six counties along the gorge; two each from Oregon and Washington, appointed by the governors; three appointed by the Secretary of Agriculture. The Chief of the Forest Service or his designee will be a non-voting, ex-officio member.

The Regional Commission will be provided the staff it needs.

The specific responsibilities of the Regional Commission will include:

a. Assisting the Forest Service Chief in the development of the management plan for the scenic area.

b. Facilitating communication and coordination among residents, landowners, and federal, state and local government agencies.

c. Reviewing and monitoring the implementation of the scenic area management plan.

d. Reviewing all land acquisition proposals involving the potential use of eminent domain.

5. MANAGEMENT PLAN

An interdisciplinary planning team selected by the Chief of the Forest Service will develop a management plan for the scenic area. The plan will designate appropriate uses of lands within the area in order to achieve the purposes of the Columbia Gorge Act. It will be based on an inventory of the area's resources, including archeological, social, economic, forest, historical, natural, geological, recreational and scenic values. Whenever possible, state and local land use policies will be incorporated into the management plan, provided they are consistent with the purposes of the Act.

When completed by the Forest Service, the management plan will be submitted to the Regional Commission which will have six months to review it and hold public hearings on it. At the end of the six-month period, the Regional Commission will vote on the plan.

If the Regional Commission approves the plan, it will go into effect.

If the Regional Commission votes against the plan, it will be sent to the Secretary of Agriculture. He will have 90 days to consider the objections of the Regional Commission to the plan. He may modify the plan to meet the objections, but is not required to do so. At the end of the 90-day period, the Secretary will resubmit the plan to the Regional Commission.

The Regional Commission will again consider the plan for 90 days. At the end of this 90-day period, the Secretary of Agriculture can adopt the management plan even without the approval of the Regional Commission.

6. ACQUISITION

The Secretary is authorized to acquire land through donation, purchase, exchange, bequest or less than fee techniques including conservation or scenic easements. He must seek the advice of the Regional Commission on all acquisitions.

As a last resort, the Secretary may condemn land, subject to the following limitations:

a. *Exemption for non-critical Gorge lands.* Only land classified as critical, i.e., essential for maintaining the uniqueness of the Gorge, could be condemned. Critical lands will be identified in a map supplied by the U.S. Forest Service as soon as practicable after enactment of this Act.

b. *Exemption for single-family residences, farming, or grazing.* Critical lands which were used for single-family residence, farming, or grazing before July 1, 1981 cannot be condemned, provided the use of the land is not changed.

c. *Overall cap on condemnation.* No more than 10 percent of the total acreage within the area can be acquired by condemnation.

d. *Condemnation is a last resort.* Condemnation can proceed only when the Secretary of Agriculture determines that all reasonable efforts to acquire the land by negotiation have failed. Other land-protecting options, such as scenic easements or land exchanges, must be tried first and could prove to be very successful.

7. INTERIM MANAGEMENT

Within six months after the enactment of the Act, the Secretary of Agriculture will identify interim critical areas and adopt interim standards and guidelines governing all land use activities with the area with the advice of the Regional Commission. These will be in effect until the management plan for the area is adopted.

Mr. HATFIELD. Mr. President, today I am honored to join with Senator PACKWOOD in cosponsoring legislation aimed at protecting the Columbia River Gorge. This beautiful area contains spectacular vistas, waterfalls, and unique combinations of climate. One can only imagine the awe of Meriwether Lewis and William Clark when they first viewed the Columbia River Gorge during their westward expedition in 1805. The Columbia River Gorge is truly one of America's most splendid natural resources.

During the 97th Congress, I cosponsored with Senator PACKWOOD legislation similar to the bill I am cosponsoring today and, at the same time, introduced a bill that, while similar to the other proposal, strived to provide more local involvement in the protection of the management area established under the bill.

While most Oregonians who reside inside, as well as outside, the Columbia River Gorge agree that the area is both unique and beautiful, there is a wide divergence of opinion as to how best to manage and protect the area for the benefit of future generations. After introduction of the legislation during the 97th Congress, I received many letters from residents in the Columbia Gorge who were very concerned with the heavy involvement of the Federal Government in local land use planning decisions. That concern and divergence of opinion continues, and a great deal of discussion and cooperation with State and local governments, as well as gorge residents on both sides of the Columbia River, will have to take place before this legislation moves forward.

Mr. President, I am anxious to begin those discussions and hope to have field hearings on this legislation before the Energy and Natural Resources Committee very soon. I appreciate and welcome input from everyone who shares an interest and concern over this very important issue and look forward to being closely involved in the development of legislation that serves the interests of both Oregon and Washington residents who reside inside and outside the Columbia River Gorge.

By Mr. WEICKER:

S. 628. A bill to amend section 18(a) of the Small Business Act; to the Committee on Small Business.

FARM DISASTER LENDING

● Mr. WEICKER. Mr. President, today I am introducing legislation which would make permanent the legislative reforms adopted by Congress with the passage of Public Law 96-302. The primary purpose of these reforms— which are due to expire on October 1 1983, was to remove the Small Business Administration (SBA) from substantial involvement in agricultural disaster lending, while at the same time insuring that no agricultural enterprises currently eligible for disaster assistance, would be denied such assistance.

Recognizing that the Farmer's Home Administration (FmHA) has the resources and expertise to handle agricultural disaster lending, Public Law 96-302 mandates that farmers first seek disaster assistance from FmHA, so long as interest rates at FmHA and SBA remain "substantially similar." However, farmers turned down for a FmHA loan, may apply for and be eligible to receive an SBA loan if they meet the tests of the SBA-administered program. The net result of Public Law 96-302 was that the floodgates which opened up SBA to making farm disaster loans were closed; and FmHA once again assumed primary responsibility for assisting farm disaster victims.

To insure that the carefully crafted compromise adopted in Public Law 96-302 was not altered, Congress, in the Omnibus Reconciliation Act of 1981, Public Law 97-35, maintained SBA's disaster interest rates at rates "substantially similar" to the disaster interest rates at FmHA. The Senate Small Business and Agricultural Committees coordinated their conference negotiations closely to insure that no other proposal would be adopted. Congress acted quickly to ratify this action. Had substantially similar interest rates between the two agencies not been maintained, SBA would again have been thrown back into farm dis-

aster lending where it clearly does not belong.

I think it important, Mr. President, to recount for the 98th Congress some of the problems that occurred when SBA was thrust headlong into farm disaster lending and why Congress subsequently decided to take the agency out of this program with the passage of Public Law 96-302.

In July 1977, production crop losses were declared eligible for SBA disaster loans, even though FmHA had been operating an agricultural disaster loan program for years. In fiscal year 1978, the year after the decision was made, SBA disaster loan volume increased from $200 million in 1977 to $2.5 billion. These loans were essentially for production crop losses. FmHA loans also rose from $1.2 billion in fiscal year 1977 to $3.4 billion in 1978.

In an effort to understand the reasons for this enormous and disturbing expenditure increase, and to provide guidance to Congress in designing a disaster policy that would be both responsive to the needs of disaster victims and yet fiscally prudent, GAO was requested to conduct an audit of the fiscal year 1978 operations of the SBA and FmHA programs to determine the causes of the increase; the nature of the beneficiaries; the extent to which loan recipients could have secured credit from nongovernmental sources; and what the loans were used for.

Mr. President, even a brief look at some of the findings of the GAO report would convince any reasonable person that FmHA, and not SBA, should be the provider of agricultural disaster loans.

SBA's inexperience in agricultural matters was obvious; it simply did not have the trained personnel or expertise to handle a farm disaster lending program. In contrast, FmHA has over 3,000 field offices located throughout the United States whose sole purpose is to assist agricultural enterprises.

As noted in the GAO report, there is a fundamental difference between agricultural production crop losses, due, for example, to drought, and physical property losses, such as a factory building being destroyed in a hurricane or flood. In agriculture, crop yields vary from year to year due to normal variations in the weather or for other ordinary reasons. FmHA takes such normal variation into account through its requirement that a minimum loss be incurred before a farmer is eligible for a disaster loan. In contrast, SBA had no such requirement and treated physical property losses and crop production losses almost identically.

In addition, FmHA looks at total farm income in computing loan amounts, because while a farm may have lower-than-normal production in one crop, often, that is offset by higher-than-average income in another crop. SBA did not consider this factor when computing losses—probably because it did not have the expertise to do so.

GAO found that the average size of SBA loans was almost 20 percent greater, and the average length about 13 percent longer, than FmHA loans. GAO concluded that these differences were due in part to less stringent SBA requirements. The effect was to substantially increase the cost of agricultural disaster lending above what it would have been if FmHA alone had administered the program.

The GAO auditors also found that the existence of duplicative programs had created opportunities for abuse or fraud. First, loan applicants were able to apply to both agencies and shop for the largest loan. Second, and far worse, the duplicative programs opened the door to fraud. GAO auditors found numerous cases in which applicants estimated higher losses and more acres planted when they applied for SBA loans than when they applied for FmHA loans. In addition, GAO uncovered examples of borrowers who obtained loans from both SBA and FmHA for the same disaster loss.

Last Congress, I called for and chaired hearings before the Small Business Committee in order to get a better insight into the problems that occurred during SBA's administration of the farm disaster lending program. This was done to fully understand not only the extent and gravity of these problems, but also to determine what collection efforts should be instituted to recoup for the Government money which has been paid out improperly.

The committee's extensive investigation, which was supported by audits and findings of the SBA Inspector General and the committee's hearings, showed that virtually millions of dollars had been improperly paid out by SBA while administering this program. Some farmers used money earmarked for crop replacement or debt repayment for such items as a refurbished home, investments in high-interest certificates of deposit, and other expenses unrelated to farm disaster losses. The IG's audits also showed that some borrowers received illegal duplicate loans and Federal grants for identical losses.

I hasten to point out, Mr. President, that the committee's findings were in no way a criticism of the American farm community. These problems occurred in part because of SBA's inability and lack of expertise to administer this specialized program and also because there were those who flagrantly took advantage of a poorly administered Government program. Rather, the hearings reaffirmed the wisdom of removing SBA from farm disaster lending with the adoption of Public Law 96-302 and demonstrated that this program should never have been at SBA in the first place; that a loosely run program which was intended to assist those who suffered very serious and real losses due to extreme weather conditions was abused; that Federal dollars were mishandled; and that the Government during a time of severe budget restraints, had the opportunity to collect back from these borrowers millions of dollars in misused funds.

I am happy to report that as a result of the Small Business Committee's hearings, the administration did institute a major collection effort. Over $1.3 million has already been collected and agreements have been reached with borrowers to pay back another $4.5 million over the next 3 years.

Mr. President, it was as a result of the disturbing findings I have just cited that Senator NUNN and I and others on the Small Business Committee fought hard for the reforms adopted in Public Law 96-302, which, for all practical purposes, took SBA out of farm disaster lending. However, these reforms, unless Congress acts to insure otherwise, will expire on October 1, 1983.

Mr. President, the adoption of this legislation will also have significant budgetary implications for SBA. CBO estimates that failure to act on this bill will result in a $480 million increase in SBA's disaster program level in fiscal year 1984. During times of severe budget restraints, the Government can ill afford such unwarranted increases.

I believe that the expense of this program and the history of problems and abuse that occurred before SBA was taken out of farm disaster lending assistance shows clearly that SBA should not be thrust back into a program where it did not belong in the first place. The Department of Agriculture has the necessary programs, budget, and expertise to assist the farm community in farm disaster lending; SBA does not. The legislation we are introducing today will simply insure that the past reforms instituted by Congress will be maintained.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 628

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first sentence of section 18(a) of the Small Business Act is amended by striking "prior to October 1, 1983,".●

By Mr. CRANSTON (for himself and Mr. WILSON):

S. 630. A bill to authorize the Secretary of the Army to construct improvements on Redbank and Fancher

Creeks, Calif.; to the Committee on Environment and Public Works.

REDBANK-FANCHER CREEK PROJECT

Mr. CRANSTON. Mr. President, on behalf of Senator WILSON and myself I introduce for appropriate reference a bill to authorize the Secretary of the Army to construct improvements on Redbank and Fancher Creeks in California. This bill is identical to legislation being introduced in the House today by Congressmen PASHAYAN, COELHO, and LEHMAN.

The Redbank and Fancher Creeks, their tributaries and related streams are located on the western slope of the Sierra Nevada Mountains. Because the streams are uncontrolled, flooding has occurred numerous times over the past 30 years. The most serious flood damage occurred in 1969 and resulted in Fresno County being declared a national disaster area. Lesser damages occurred in 1952, 1955, 1965, 1972, and 1978.

In 1956 Congress authorized a project investigation for the Redbank and Fancher Creeks stream system, and in 1977 the district engineer of the corps recommended Federal participation in a project to protect the Fresno-Clovis area. In July 1980 the Board of Engineers for Rivers and Harbors approved the project, having a 1.6 to 1 benefit/cost ratio.

The proposed project is a straightforward flood control project with several small detention reservoirs. The principal features include a 13,000-acre-foot reservoir on Fancher Creek, a 1,500-acre-foot reservoir on Redbank Creek, and an enlarged Big Creek Reservoir.

In addition to flood protection, the Redbank-Fancher Creeks project will produce significant water conservation and ground water management benefits. For all these reasons, the project is supported by Fresno County, the cities of Fresno and Clovis, the Fresno Irrigation District, the Fresno Metropolitan Flood Control District, the Kings River Conservation District, the California Water Commission, and the California Department of Water Resources. I am unaware of any controversy surrounding the project or any environmental objections to it.

Mr. President, I first sponsored legislation to authorize the Redbank-Fancher Creeks project in 1979 in the 96th Congress. At that time, the estimated Federal project cost was $42 million. Today as a result of inflation the estimated project cost has risen to $57,200,000. The project is still needed. I hope that the 98th Congress thus will move forward with early project authorization to avoid further delays and increased costs to the American taxpayers.

I ask unanimous consent that the text of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 630

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Army, acting through the Chief of Engineers, substantially in accordance with the plans and subject to the conditions recommended by the Chief of Engineers, is authorized to construct the project for flood control on Redbank and Fancher Creeks, California: Report of the Board of Engineers for Rivers and Harbors dated July 30, 1980, at an estimated cost of $57,200,000.

By Mr. TSONGAS (for himself, Mr. STENNIS, Mr. HART, Mr. PELL, and Mr. RANDOLPH):

S. 631. A bill to establish a national technology education grants program to provide matching Federal assistance to joint initiatives by private industry, educational institutions, and State government to strengthen science, engineering, and technical education, and for other purposes; to the Committee on Labor and Human Resources.

HIGH TECHNOLOGY MORRILL ACT

● Mr. TSONGAS. Mr. President, our Nation is entering a new era of economic growth driven by rapidly changing technology and sharp international competition. The competitiveness of both our high technology and mature industries depends on U.S. scientific and technological leadership—that is, on increasing rates of technological innovation and productivity. In turn, these goals depend, to an unprecedented degree, on the availability of scientists, engineers, technicians, and managers with the right technological skills. Without these human resources, we cannot remain competitive.

Today I am introducing the High Technology Morrill Act to provide the human resources so we can compete. I am pleased to have, joining me in this initiative, Senators STENNIS, HART, PELL, and RANDOLPH. Modeled after the Morrill Act of 1862, this legislation would mobilize educational resources to maintain our economic strength in the technological era.

Assessment after assessment shows that we are failing to develop the human resources needed for economic growth. Our technological education is inadequate to meet the challenge of our international competitors. We are failing to provide basic science and math skills to our elementary and secondary school students. We are producing too few engineers, in some fields, and too few of our engineering graduates lack first-rate training. We are failing to keep our work force current with technological advances, thus wasting the talents of our most experienced engineers, technicians, and managers.

Our colleges and universities are hobbled by severe faculty shortages and obsolete equipment and curricula. There is a serious shortage of graduate students, threatening the future supply of Ph. D.'s and faculty.

The results are abundantly clear. Math and science achievement scores of precollege students are declining. Enrollments in math and science courses are down, as are curriculum requirements. And, most seriously, we are facing a critical shortage of qualified math and science schoolteachers. As a consequence, fewer students adequately prepared in math and science are available to enter technological fields.

International comparisons cast us in an unfavorable light. Many other industrial countries are beating us in both the quantity and quality of their technical work force. Many of them have dramatically upgraded their technological capacity, including their ability to respond to technological change. If we continue to slight technology education, we cannot remain competitive.

There is precedent to suggest that our educational system, if properly assisted, can rise to a challenge of this magnitude. The Morrill Act of 1862 established the land grant college system that helped revolutionize U.S. agriculture. The GI bill after World War II made undergraduate and graduate training widely available. The National Defense Education Act of 1958—the response to Sputnik—mobilized education to protect national security. The Education Amendments of 1965 responded to demands for greater social justice by expanding educational opportunities.

The educational challenge facing us today requires a new mobilization of educational resources. We must increase the quality of technological education at all levels. This includes raising basic math and science skills of high school students, upgrading science and engineering programs in our colleges and universities, and offering training opportunities for unemployed workers or working professionals with outmoded skills.

Educational institutions cannot handle this job alone. Only through a partnership among industry, schools, and government can we adequately mobilize our educational system for economic growth. Industry must play a major role in providing direction, expertise, and investment. Some companies have recognized this responsibility. They see their investments in education not just as charitable contributions, but as an important element of their competitive strategy. More and more companies are instituting university programs to strengthen technological education.

Similarly, State governments are also recognizing the importance of technology and education in meeting their economic development objectives. Many States have begun programs to invest in technology education in order to attract new firms.

While these efforts are helpful, they are unequal to the task. Industry's contribution for education, while growing, still represents a very small fraction of the need. For each university helped many more receive nothing. While some States have bolstered technological education significantly, many ideas remain on the shelf for lack of funds.

Federal involvement is clearly required. But the Federal Government should build on the initiatives of industry and the States, not compete with them. This is the basic idea behind the High Technology Morrill Act, which I am introducing today.

The bill establishes a competitive grants program to provide matching Federal assistance for joint initiatives of private industry, educational institutions, and State governments to strengthen science, engineering, and technical education. In order for a project to be eligible for the 50-percent matching Federal grant, private industry must contribute 20 percent, and States 30 percent, of the total cost. The bill would allot $500 million a year over 5 years for this purpose.

This bill would not simply throw dollars into education. It is not a quick fix. It would authorize a long-term investment in education and encourage the development of a partnership among industry, education, and Government.

Why do I propose a partnership of this kind? Requiring industry participation would insure that activities supported by this bill reflect the priorities of the private sector as it seeks to maintain American technological leadership. The bill's requirement of State participation—the approval of a governor and a financial contribution of 30 percent—assures that projects are responsive to the State's economic development strategies, employment policies, and educational priorities.

The bill is comprehensive in scope. It would apply to projects for all levels of our educational system, including elementary and secondary schools, community and junior colleges, 4-year colleges and universities, graduate schools, and programs for continuing education and job retraining.

The bill is designed to encourage diversity, experimentation, and innovation in approaches to technology education. It could support a broad range of efforts at the local and regional level. It could, for example, fund research/training centers, modernize lab equipment, initiate new technicians' training programs in community colleges, develop continuing education programs for technical professionals, and establish computer literacy programs in schools. The bill also could reinforce efforts to raise educational productivity by development of new educational methods and equipment, teach the management of technological innovation and improve the access of women, minorities, and the handicapped to technological fields.

Like the first Morrill Act, the High Technology Morrill Act seeks to parlay our Nation's natural resources into educational benefits. The Morrill Act of 1862 devoted 17 million acres of Federal land for founding agricultural colleges across the country. Proceeds from the sale of the land were invested, and interest earned accumulated in a perpetual fund for the support of the land-grant colleges. Similarly, the High Technology Morrill Act would turn over a small percentage—3 percent—of the revenues the Federal Government receives from sale of energy and mineral resources on Federal lands into a technology education trust fund. This fund—totaling $500 million per year for 5 years—would be the source for technology education grants. This is a great deal of money at a time of very large Federal deficits. But we are addressing an issue of very high priority for this Nation. The educational foundation needed to keep this Nation technologically competitive is vital to our military and economic security. These investments our Nation can ill afford to defer.

The High Technology Morrill Act is one of several bills introduced in the 98th Congress to improve technological education. I support some of these measures, as well. The High Technology Morrill Act differs from the other bills in its emphasis on the partnership among industry, academia, and Government and its reliance on the private sector to identify priorities for technological education initiatives. Thus, it embodies an approach that is not reflected in other bills. It also complements other legislation that is focused on elementary and secondary education, and would be a valuable component of a comprehensive package including the best of all bills that have been introduced.

Such an omnibus bill could fuse the interests of Government, industry, and education into a national policy to insure a supply of scientific, engineering, and technical personnel adequate to insure U.S. scientific and technological leadership, to maintain U.S. international competitiveness and domestic employment, and to safeguard national security.

Mr. President, I would like to acknowledge some of the individuals who have been especially helpful in preparing this legislation. For the concept behind the bill, I am particularly indebted to the authors of the book, "Global Stakes: The Future of High Technology in America" the president of Analog Devices, and Dan Dimancescu and James Botkin, two high technology consultants from Cambridge, Mass. I would also like to express my appreciation for their help in preparing the legislation and also to acknowledge the contributions of Howard Foley, president of the Massachusetts High Technology Council; William Thurston, president of GenRad Corp. and chairman of the Massachusetts High Technology Council; John Hoy, president and Melvin Bernstein, vice president of the New England Board of Higher Education; David Knapp, president of the University of Massachusetts; Kenneth Ryder, president of Northeastern University; B. J. Rudman, assistant secretary for administration and finance of the State of Massachusetts and Oliver Ward, president of Germanium Power Devices.

Mr. President, I ask unanimous consent that a factsheet on the bill and the full text of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

HIGH TECHNOLOGY MORRILL ACT: FACTSHEET

PURPOSE

To establish a national grants program providing matching Federal assistance for joint initiatives by private industry, educational institutions and state government to strengthen science, engineering, and technical education.

RATIONALE

An adequate supply of scientific, engineering, and technical personnel is essential to ensure U.S. scientific and technological leadership, to bolster U.S. international competitiveness and domestic employment, and to safeguard national security. Our educational system must respond to the economic challenge by improving the quality of math and science instruction at the pre-college level, strengthening and modernizing programs in science, engineering and technology in our colleges and universities, and developing the capability to provide lifelong education and training to our existing technical work force.

PARTNERSHIP

This Act would authorize a program of competitive grants for technology education projects and programs jointly sponsored by industry, educational institutions, and state governments. In order to be eligible for the 50 percent matching Federal grant, private industry would contribute 20 percent, and states 30 percent, of the total project costs. This formula ensures that Federal funds to strengthen technological education would comport with the economic development policies of the state, educational needs of our schools and colleges, and priorities of the private sector. As a result, Federal funds would be channeled into educational areas that industry identifies as important for maintaining U.S. technological leadership.

ELIGIBLE ACTIVITIES

Grants made under this Act may be used to:

Modernize university lab equipment;

Establish university research/education centers;

Expand technician training programs at community colleges;

Develop lifelong cooperative education programs to maintain technical skills of the current work force;

Initiate programs to retrain workers for jobs requiring more technical skills;

Enhance math, science and engineering teaching as a career;

Establish computer literacy programs in elementary and secondary schools;

Improve educational productivity through the development of new educational methods and equipment;

Develop programs to teach the management of technological innovation;

Improve the access of women, minorities and handicapped to the fields of technology;

Encourage cooperative programs between humanities and sciences; and

Support any other programs that strengthen technological education.

CRITERIA

In making grants under this Act, the following criteria shall be used;

The activity is not likely to proceed without the grant;

The activity embodies innovative approaches not adequately provided by existing public and private programs;

The activity responds to clearly established technical education needs of industry;

The activities will result in sustained efforts or lasting improvements in education programs and facilities.

The Act also encourages applications involving joint programs between institutions of higher education and elementary and secondary schools, participation of small business, and regional efforts.

FUNDING

The Act would make available approximately $500 million of Federal matching grants per year for five years. Three percent of the federal revenues from the sale of energy and mineral resources on Federal lands are placed in a Technology Education Trust Fund, which are then made available for grants by annual appropriation.

ADMINISTRATION

The technology education grants established by this Act are to be administered by the Director of the National Science Foundation. He is authorized to establish an advisory committee representing industry, education, states, professional societies and labor, and to consult with the Secretary of Defense and other agencies to ensure coordination of Federal efforts.

PRECEDENT

The Morrill Act of 1862 devoted 17 million acres of Federal land for founding agricultural colleges across the country. Proceeds from the sale of the land were invested, and interest earned accumulated in a perpetual fund for the support of the land-grant colleges. This act sparked a technological revolution that led to U.S. industrialization and made U.S. agriculture number one in the world.

S. 631

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "High Technology Morrill Act".

FINDINGS

SEC. 2. The Congress finds that—

(1) the relationship between a healthy and vibrant national educational system and a healthy economy is inseparable in an era of technology dependent economic growth;

(2) competitor nations have given priority to the relationship between education and economic growth, especially as it pertains to new high technology industries such as electronics, computers, communications, aerospace, biotechnology, new materials, energy, and other technology-intensive fields;

(3) the future international industrial competitive position of the United States depends on maintaining United States scientific and technological leadership, increasing the rate of innovation, and increasing the productivity of our basic industries, all of which require a well-educated, motivated, and technologically proficient work force;

(4) while the rapid growth of high technology industries and the large increases in defense spending are exerting increasing pressure on the availability and quality of scientific, engineering, and technical personnel, our educational infrastructure is experiencing serious limitations in providing sufficient personnel with high quality training in critical areas, in keeping the proficiency of the current science and engineering work force up to date, and in maintaining high levels of technological literacy nationwide;

(5) although cooperation between industry and the academic community is now increasing, much more effort is necessary and can be achieved with a national policy that provides leadership and support for technology education;

(6) a national partnership among government, industry, and educational institutions, can most effectively carry out a nationwide program to improve the quality of math and science teaching at the elementary and secondary school level, upgrade the quality and capacity of community colleges, universities, and graduate schools to provide scientific, engineering, and technical education in areas of critical skill shortages, and expand the opportunities for lifelong education in all technological fields; and

(7) the Act of July 2, 1862, (commonly known as the First Morrill Act), which set aside publicly owned natural resources to fund investment in education for agriculture and the mechanic arts by establishing the Land Grant College System, provides a useful model for fusing the interests of government, industry, and education into a national policy for economic growth.

STATEMENT OF PURPOSE

SEC. 3. It is the purpose of this Act to establish a national technology education program designed to—

(1) assure an adequate supply of scientific, engineering, and technical personnel to ensure United States scientific and technological leadership, international competitiveness, and national security;

(2) strengthen programs in science, technology, and engineering of both public and private institutions of higher education.

(3) improve the quality of math and science training in elementary and secondary schools;

(4) improve the science and engineering knowledge and technical skills of the current work force, aid workers in keeping up with scientific and technological progress, and accelerate the absorption of workers into areas of critical skill shortages; and

(5) strengthen the partnership between industry, the academic community, and government to ensure that our educational system provides professional and technical skills relevant to national economic and security needs and that industrial resources are used to enhance the quality of education.

DEFINITIONS

SEC. 4. As used in this Act—

(1) The term "Director" means the Director of the National Science Foundation.

(2) The term "educational institution" means any local educational agency, any State educational agency applying on behalf of schools directly operated by the State educational agency, and any institution of higher education (including community colleges).

(3) The term "elementary school" has the same meaning given that term by section 198(a)(7) of the Elementary and Secondary Education Act of 1965.

(4) The term "local educational agency" means any such agency as defined in section 198(a)(10) of the Elementary and Secondary Education Act of 1965.

(5) The term "secondary school" has the same meaning given that term by section 198(a)(7) of the Elementary and Secondary Education Act of 1965.

(6) The term "State educational agency" means any such agency as defined in section 198(a)(17) of the Elementary and Secondary Education Act of 1965.

(7) The term "institution of higher education" means any such institution as defined in section 1201(a) of the Higher Education Act of 1965.

(8) The term "State" means each of the several States and the District of Columbia.

(9) The term "Trust Fund" means the Technology Education Trust Fund" established under section 5.

ESTABLISHMENT OF THE TECHNOLOGY EDUCATION TRUST FUND

SEC. 5. (a)(1) There is established in the Treasury of the United States a Trust Fund to be known as the "Technology Education Trust Fund" consisting of such amounts as are transferred to the Trust Fund under subsection (b). Subject to subsection (d) the Trust Fund shall remain available without fiscal year limitation and the amounts may be used only for payments in accordance with this Act.

(2) The Secretary of the Treasury shall be the trustee of the Trust Fund and shall report to the Congress not later than March 1 of each year on the operation status of the Trust Fund during the preceding fiscal year.

(b) The Secretary of the Treasury shall transfer from the general fund of the Treasury to the Trust Fund—

(1) for fiscal year 1984, 3 per centum,

(2) for fiscal year 1985, 3 per centum,

(3) for fiscal year 1986, 3 per centum,

(4) for fiscal year 1987, 3 per centum, and

(5) for fiscal year 1988, 3 per centum,

of the rents, royalties, and other sums paid to the United States under—

(A) the Outer Continental Shelf Lands Act;

(B) the Act entitled "An Act to promote the mining of coal, phosphate, oil, oil shale, gas and sodium in the public domain", approved February 25, 1920 (commonly known as the Mineral Leasing Act of 1920); and

(C) any other Federal statute authorizing payments for mineral resources development designated by the Secretary of the Treasury for the purpose of this Act;

except that transfers under this subsection shall not exceed $500,000,000 in any one fiscal year. The amounts required to be

transferred under this subsection shall be transferred at least quarterly on the basis of estimates made by the Secretary of the Treasury. Proper adjustment shall be made in any amount subsequently transferred to the extent prior estimates were in excess of, or less than, the amounts required to be transferred.

(c)(1) Amounts in the Trust Fund shall be available for making payments in accordance with this Act as provided in advance by appropriation Acts.

(2) Notwithstanding any other provision of law, unless enacted in specific limitation with the provisions of this subsection, any funds appropriated from the Trust Fund to carry out this Act shall remain available without fiscal year limitation.

(d)(1) No transfers required by subsection (b) of this section may be made by the Secretary of the Treasury to the Trust Fund after September 30, 1988.

(2) The Secretary of the Treasury shall pay into the general fund of the Treasury any amounts remaining in the Trust Fund after September 30, 1990, which were not expended and remain in the Trust Fund.

TECHNOLOGY EDUCATION GRANTS

SEC. 6. (a)(1) The Director is authorized, in accordance with the provisions of this Act, to make grants to educational institutions, private for-profit business concerns, and State agencies making application jointly to pay the Federal share of the cost of technology education programs.

(2) An application may be submitted to the Director jointly by private nonprofit organizations and a State agency or agencies if the nonprofit private organization represents an educational institution and a for-profit business concern, or a group of such institutions and concerns.

(b) No grant may be made under this section unless—

(1) the application is consistent with the economic development and educational policies of the State, as determined by the Chief executive of the State, and is consistent with the priorities of the private sector and needs of educational institutions within the State.

(2) the Director determines that there is a probability that the activities described in the application could not be carried out unless assistance sought under the application is furnished.

APPLICATION

SEC. 7. (a) Each educational institution, private for-profit business concern, and State agency applying jointly or nonprofit private organization and State agency, complying with the provisions of section 6, desiring to participate in the program authorized by this Act shall prepare and submit an application at such time, in such manner, and containing or accompanied by such information as the Director deems reasonably necessary. Each application shall—

(1) provide a description of the activities for which assistance is sought, including an estimate of the costs of the activities and the location in which the activities will be carried out;

(2) provide assurances (A) that the applicant will pay from non-Federal sources the remaining cost of carrying out the application; and (B) that 30 per centum of the total costs of the application will be paid from State and local public sources and 20 per centum of such costs will be paid by the for-profit business concern joining in the application;

(3) provide justification for any operational cost associated with carrying out the activities so described which have been supported under this Act for a period of more than one year.

(4) provide an analysis of the benefits which such activities may be expected to produce, particularly economic, employment, and educational benefits; and

(5) provide such fiscal control and fund accounting procedures as may be necessary—

(A) to insure a proper accounting of Federal funds paid to the applicant under this Act; and

(B) to insure the verification of the costs of the technology education program furnished by the applicant.

(b) Applications made under this section may not be approved by the Director unless he determines that—

(1) the application meets the requirements set forth in subsection (a) of this Act and is consistent with the other provisions of this Act;

(2) the activities for which assistance is sought under the application show promise of applying innovative approaches in the field of technology education which are not addressed by existing public or private educational programs;

(3) the activities described in the application will strengthen educational programs and courses of training necessary for occupations for which there is a clearly established need for personnel in the area which is to be served by the applicant; and

(4) the activities described in the application are likely to result in sustained efforts or lasting improvements in the courses of training offered by the educational institution participating in carrying out the application.

(c) In reviewing and approving applications made under this section the Director shall encourage—

(1) joint programs between institutions of higher education and elementary and secondary schools;

(2) the participation of small business concerns; and

(3) the provision of activities designed to address technology education and economic development on a substate and interstate regional basis.

USES OF FUNDS

SEC. 8. Grants made under this Act may be used—

(1) to develop, modernize, and expand laboratory equipment and related facilities in educational institutions;

(2) to improve the quality of science and mathematics education and to increase computer literacy in elementary and secondary schools through teacher training, improving equipment, and curricula development;

(3) to establish or maintain existing research/education centers designed to train or retrain new scientific, engineering, and technical employees while carrying out applied research or stimulating innovation, technology transfer, and the application of new technologies;

(4) to enhance mathematics, science, and engineering teaching as a career through faculty development activities which may include support for graduate students who enter the teaching profession, faculty exchange programs with industry, teaching retraining programs, or other programs to encourage retention of faculty;

(5) to improve the use of the available scientific, engineering, and technical work force through lifelong learning and cooperative education activities;

(6) to improve educational productivity through the development of new educational methods and equipment such as computer based educational aids, and telecommunication instructional technologies;

(7) to stimulate innovation through research and training in the management of technological innovation;

(8) to improve the access of women, minorities and handicapped to technical, engineering, and scientific fields; and

(9) to stimulate cooperative programs between the humanities and the sciences.

PAYMENTS; DISTRIBUTION OF FUNDS

SEC. 9. (a)(1) From the amounts appropriated for each fiscal year pursuant to section 5, the Director shall pay, in accordance with the provisions of this Act, to each applicant which has an application approved under section 7, an amount equal to the Federal share of the cost of activities described in the application.

(2) (A) The Federal share of the cost of carrying out the application under this Act shall not exceed 50 per centum for any fiscal year.

(B) The non-Federal share shall be in cash or in kind. In determining the amount of the non-Federal share, the Director may attribute fair market value to services, equipment and facilities contributed from non-Federal sources.

(b)(1) Payments under this Act shall be made as soon as practicable after approval of the application.

(2) Payments under this Act may be made in installments, in advance or by way of reimbursement with necessary adjustments in account on overpayments and underpayments.

(c) In carrying out this Act, the Director may enter into contracts with any applicants having an application approved under section 7 containing provisions for multiyear obligations.

WITHHOLDING

SEC. 10. Whenever the Director, after reasonable notice and opportunity for a hearing to any applicant, finds that there has been a failure to comply substantially with the provisions set forth in the application approved under section 7, the Director shall notify the applicant that further payments will not be made under this Act until he is satisfied that there is no longer any failure to comply. Until he is so satisfied, no further payments shall be made under this Act.

ADMINISTRATION

SEC. 11. (a) In order to carry out this Act, the Director is authorized to—

(1) establish, rescind and amend such rules and regulations as may be necessary;

(2) appoint and fix the compensation of such personnel as may be necessary;

(3) procure temporary and intermittent services to the same extent as authorized by section 31 of title 5, United States Code;

(4) establish such advisory committees including representatives of industry, the academic community, State governments, professional societies, and labor organizations; and

(5) accept and use with their consent with or without reimbursement, such services, equipment, and facilities of other Federal agencies as are necessary to carry out such functions efficiently.

(b) Each member of a committee appointed pursuant to paragraph (4) of subsection (a) of this section who is not an officer or employee of the Federal Government shall receive an amount not to exceed the daily

rate prescribed for GS-18 under section 5332 of title 5, United States Code, as determined by the Director, for each day he is engaged in the actual performance of his duties (including traveltime) as a member of a committee. All members shall be reimbursed for travel, subsistence and necessary expenses incurred in the performance of their duties.

(c) Each Federal agency is authorized and directed to furnish such services, equipment, and facilities directly to the Director, upon a written request made by the Director.

(d)(1) In carrying out the provisions of this Act, the Director shall consult with the Secretary of Defense to coordinate technical training programs supported by the Department of Defense and activities assisted under this Act.

(2) Whenever the Secretary of Defense determines that funds available for technical training programs to the Department of Defense are available for and would contribute to carrying out the purposes of this act, the Secretary of Defense is authorized to transfer such funds for use by the Director in carrying out the provisions of this Act.

(e) In carrying out the provisions of this Act, the Director shall consult with the Secretary of Commerce, the Secretary of Labor, the Secretary of Education, and the heads of such other Federal agencies as the Director deems appropriate.

(f) The Director shall prepare and submit to Congress an annual report on the activities assisted by this Act during the preceding fiscal year.

AUDIT

SEC. 12. The Comptroller General of the United States, and any of his duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of any applicant receiving assistance under this Act that are pertinent to the sums received and disbursed under this Act.

Mr. President, I ask unanimous consent that the following articles be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

IN SEARCH OF NATIONAL POLICY

GLOBAL STATES: THE FUTURE OF HIGH TECHNOLOGY IN AMERICA

(By James Botkin, Dan Dimoncescu, and Ray Stata)

There is no easy formula for pulling all the pieces of a national policy together. No magic wand. Establishing a new economic strategy seems doubly difficult in the present domestic budget-cutting, defense-minded atmosphere of Washington. But an opportunity is taking shape. Industry is moving toward a closer relationship with the educational institutions upon whose resources it relies. In turn, academia is proving more responsive to the evolving needs of an industry in rapid transition. Two legs of a stool are thus being put into place. But to provide firmer footing, a long-term sense of direction and a dependable funding mechanism must be added.

The missing third leg is federal support. The high tech industry can initiate new partnerships with education, but only a concerted national effort can sustain them. Precedents in American history can help define a role for federal policymakers. One of them occurred more than a century ago when Abraham Lincoln signed into law the historic Morrill Act, the land-grant college legislation in 1862, which set the stage for a revolution in American agriculture, engineering, and U.S. education. More importantly, it set the nation on a new economic course and established a precedent for the present. What the United States needs now is to marshal the political will to again set a coherent national policy for the coming decades.

A HIGH TECHNOLOGY MORRILL ACT

More than a century ago a man named Justin Morrill, then a congressman from Vermont, sponsored a federal act founding colleges to "teach such branches of learning as are related to agriculture and the mechanic arts." This led to the establishment of the agricultural extension programs and to the birth of modern farming in the United States. If American agriculture plays such an important role in the world economy today—it leads the world in agricultural exports while Japan, for example, imports 50 percent of its food needs and Western Europe imports 25 percent—it is not just because its land is rich and fertile or its farmers hardworking. It is in part because the Morrill Act fused the interests of government, education, and the farming community into a national policy. This educational act endured and remains as a compelling model for the future of American high technology.

As part of the Morrill Act, the federal government donated 17,430,000 acres of land to help subsidize the founding of a system of colleges. These were to make judicious use of the revenues of this land to support their educational programs. A second Morrill Act in 1890 added the germinal concept of federal incentive grants to states. In his highly respected history, "Education in a Free Society," S. Alexander Rippa notes that "the Morrill Act not only laid the foundation for a new type of curriculum at government expense but also provided powerful incentives for greatly expanded state programs of higher education."

To this day, the agricultural land-grant college system remains a cornerstone to the continued efficiency and proficiency of the agricultural economy of the United States. I came into being at a time when industrial methods were just beginning to revolutionize production on the farm. As late as 1860, agriculture remained primitive at best. This would soon change. Between 1855 and 1895 the hourly labor required to produce one bushel of corn declined from four hours and thirty-four minutes to forty-one minutes, while the time required to produce a bushel of wheat declined between 1830 and 1894 from three hours and ten minutes to only ten minutes. The new land-grant colleges would sustain this momentous productivity in American agriculture.

Perhaps the most impressive legacy born of the Morrill Act was the understanding that education—open to all and focused on learning applied to real economic needs—could not be divorced from economic growth and national strategy. Education became a matter of national priority, one to which the federal government would devote its resources. It was a revolutionary milestone in turning the United States away from a legacy of British and German educational philosophies founded upon mastery of the classics. The French chronicler of American thought, Alexis de Tocqueville, foresaw this difference between U.S. and European education. He said: "It is evident that, in democratic communities the interest of individuals, as well as the security of the commonwealth, demands that the education of the greater number should be scientific, commercial, and industrial, rather than literary."

A FOUR-SIDED CHALLENGE

Creating a national economic policy presents at least four challenges. There is a need for sustained financial support, lifelong education, high school incentives, and a global view of technology.

The federal government needs to provide dependable, sustained financial support to the American system of education. The high social value of investment in education is apparent to all. Yet the fraction of this value that individuals are able to capture as their own return is too small to enable the entire support for education to come from individual decisions alone. Some significant share of the funding must come from the aggregate national income or wealth.

A "High Technology Morrill Act" would fuse a new partnership among federal, state, and local interests. The keystone of such a legislative act would be to respond to matching grant initiatives from state governments and from high technology industries. This would not only add to the leverage of federal educational appropriations, but more importantly, it would ensure that federal allocations respond to the lead of industries and states in selecting those technological fields where the educational investment could be maximized. Thus, for the electronics industry in Michigan, the bias might be toward robotics engineers; in California it might support semiconductor electronics research; and in Massachusetts it might focus on computer software engineering or semiconductor manufacturing processes.

Encouraging a larger flow of money from industry to universities would help to assure closer connections and cooperation at a time when the distinctions between theory and practice need to grow smaller. It would encourage universities to teach things of practical value to students. Over the very long term, the participation of industry would allow a dynamic process to occur: the sources of funding would shift if the high tech industry's ability to sustain the matching process matures and is superseded by a new generation of leading edge industries.

If, for illustrative purposes, the estimated annual matching-fund limits were arbitrarily set at $1 billion to maintain technological state-of-the-art education facilities in the nation's 300 or so engineering departments, the matching challenge might be based on a 5-3-2 formula: 5 federal dollars, for 3 state dollars, for 2 industry dollars. On an aggregate basis:

Federal commitment year 1	$500,000,000
State commitment year 1	300,000,000
Industry commitment year 1	200,000,000
Total	1,000,000,000

Unlike the 1862 Morrill Act, which sought to establish new educational institutions throughout the nation, the High Technology Morrill Act would be focused on strengthening and sustaining existing institutions. In addition, the new high technology act would be designed to function from the bottom up. An initiative by a corporate donor would then be matched by state and federal funds in a 5-3-2 formula; the donor might be matched only on the amount that exceeds amounts donated in prior years. This would intentionally bias the process toward high growth, sunrise industries that

can afford incremental donations by virtue of their increased revenues and profits. In this manner, the new industries such as electronics, biogenetics, and other high tech ventures would automatically induce leverage by their own donations.

One cannot overlook another precedent of the Morrill Act. Through amendments to the original act, the vision of education as a lifelong endeavor came into being. The experimental agricultural research stations that were established at selected land-grant institutions undertook not only to push research to new frontiers but to educate the farmer in an ongoing, lifelong manner. It is ironic that more than 100 years later, the concept of continuing adult education or lifelong cooperative learning is considered new ground for educational institutions. The precedent is there and has to this day maintained a massive effort to teach the adult farmer new techniques and new crop potential. Through an extension of the Morrill Act, this experience can be adapted to the needs of American high technology society.

National policy must reverse the dismal conditions now visible in many, some say most, of the nation's 17,000 elementary and high school education systems. This must be done with vision and determination. National policy must take a long-term view of the responsibility to educate its young for a more complex future.

Serious shortcomings of high school education in math and the sciences should receive special consideration in the formulation of a new High Technology Morrill Act. For every funded program on the campus of a university, college, or community college, a fraction of the allocated funds might be assigned to one or more high schools, or to an elementary school program. Equipment grants for high schools, exchange programs between college and high school students, and special training services for high school and elementary school teachers are but a few of the links that might be incorporated into a new Morrill Act. Again, whether or not this is the appropriate mechanism, the point is that national policy should couple the needs of elementary and secondary education with those of higher and continuing education.

Finally, the question of international perspective deserves special consideration. Global markets are bringing new relationships into focus as high technology industries mature. The rapid pace of technological change is causing an ever wider breach between the interests of the United States and those of many of its trading partners, especially in the Third World. We may chose to ignore that our world is increasingly interdependent; or we may seek to find ways to understand and promote international cooperation.

High technology and its educational requirements represent both opportunities and problems for many Third World countries. Proper use of information technologies in ways that respect local culture has a potentially positive role to play in furthering economic and social development, especially in the newly industrializing countries like Brazil or Singapore. On the other hand, the requirements both for financial capital and scientific and managerially trained talent is presently beyond the reach of the poorest of the developing countries like Bangladesh.

It is in the long-run interest of the United States to nurture healthy partnerships with developing countries as well as with other advanced economies. Part of a new Morrill Act could be aimed at bridging the gaps between developed and less-developed countries and to use the information technologies to narrow rather than widen the economic disparities. For example, sponsoring a forum for international leadership and educational exchanges could encourage a two-way transfer of technology and ideas. This would be one way to help maintain fruitful long-term economic and political relations as we enter an era of global markets and a world economy.

THE MISSING PIECE: NATIONAL STRATEGY

A national strategy must begin with an unabashed and strong commitment by the President of the United States. Not only must he articulate a vision of the future but he must craft long-term goals that account for both the knowledge-intensive nature of the economy and the international pressures bearing on it. Such a policy must communicate to the American people the fundamental role education plays in strengthening our economy and culture.

The President must also strengthen his science and technology advisory structure. One way to start this might be to set up a Presidential Commission on Technology and Productivity. This group might consider proposing to establish a standing committee or advisory group in the White House to deal with these issues. By chairing the activities of a science and technology advisory group, the President would not only transfer his authority to it but would also participate actively in setting its agenda. This would announce emphatically to the nation that the President is placing the highest domestic priority on science and technology.

In addition, such an advisory group should, in the words of a National Governors Association, "* * * serve as the deliberative body responsible for defining federal goals and objectives relating to science and technology policy, [to ensure] that those processes, public and private, essential to realizing the benefits of science are [achieved]. The group would define goals and objectives germane to U.S. society, but the analogy is with the deliberate decision by Japan to take "extraordinary measures for the promotion of the electronics industry."

Such a commitment would require that the President make a clear statement of economic goals and their relationship to science and technology. Thus one might expect the President to speak bullishly of the future of robotics technology in America, or of a new era of semiconductor technology, or of an American determination to lead the world in biogenetics, all within the context of maintaining a dominant role for the United States in a global economy.

Another fundamental aspect to national policy rests with Congress. A legislative initiative redefining the Morrill Act of 1862 into a High Technology Morrill Act would restore vitality to the nation's engineering and science departments and laboratories without sacrificing the original intention of the act to educate a well-rounded student with a strong foundation in the humanities. Such a measure would put education back into the central arena of public policy to which it was raised for a few short years following the Sputnik scare during the late 1950s and should bring into being a long-term funding mechanism.

The will is there. In industry. In academia. In an increasing number of state governments. The missing piece in a game of global stakes is a coherent, visionary, and articulate national policy for a knowledge-intensive era. What is needed is a clear commitment to develop the human resources upon which economic growth and development are dependent. A responsive national leadership must look to initiatives emerging from a decentralized, market dependent, free economy. And when federal funding is committed, it must complement the initiatives of industry, academia, and state government. A true national strategy is one in which all the key players work in concert.

These thoughts are only a beginning. Our goal was not to suggest a comprehensive solution to the complex challenge we face in high technology, but rather to contribute to a deeper understanding of the issues involved and to encourage a more active dialogue on this important subject.

The forces for change must be initiated by those who are most knowledgeable and directly concerned. This starts with the high technology industry itself as well as with those universities that have a vested interest in education in science and technology.

But any action must also include state governments which must be concerned about future employment of their citizens and about competing for their share of the knowledge based industries. The present reality is that, in the aggregate, state governments have the greatest control over and potential impact on higher education. They can significantly influence investments in university research. But with very few exceptions, they have so far failed to exercise this power in a way that directly influences targeted economic development objectives. So not only does our federal government need to sharpen its strategic economic development goals, but state governments need to greatly increase their strategic planning skills and to learn how to work more harmoniously with industry and universities in establishing long term development goals.

It is encouraging to see the bottoms-up approach for change that is welling up from the constituencies most directly affected and concerned. But it is difficult to envision how these efforts can be successful without a coherent national policy and leadership to bind these uncoordinated efforts together and to provide a proper allocation of federal funds to strengthen our system of education.

THE LEGISLATION (1862)

The Land-Grant Act of July 2, 1862 (First Morrill Act) signed into law by President Abraham Lincoln stated that the act would provide for:

The endowment, support, and maintenance of at least one college where the leading object shall be, without excluding other scientific and classical studies and including military tactics, to teach such branches of learning as are related to agriculture and the mechanic arts, in such a manner as the legislature of the States may respectively prescribe, in order to promote the liberal and practical education of the industrial classes in the several pursuits and professions in life.

Proceeds from the sale of lands "shall be invested in . . . safe stocks, yielding not less than five per centum upon the par value of said stocks; and the moneys so invested shall constitute a perpetual fund . . . the interest on which shall be inviolably appropriated" for the purposes mentioned above.

(Sec. 4 [as amended April 13, 1926] 44 Stat. L. 247)

SOME UNEXPECTED ASPECTS OF THE LAND-GRANT ACT

One of the earliest recipients of support under the act was the Massachusetts Institute of Technology. In 1863, "the legislature of Massachusetts passed three acts—one accepting the land-grant, one incorporating the agriculture college [the University of Massachusetts at Amherst], and one dividing the land-grant proceeds between the agricultural college and the Institute of Technology in a two-to-one proportion."

Chartered as an educational institution in 1861, MIT waited out the Civil War years before formally opening for classes in 1865. Since then, it has continued to be a recipient of land-grant funds. The 1981 federal land-grant payment to MIT totaled $23,000.

When the land-grant act was passed in 1862 there were five engineering schools in the United States. Twenty years later there were eighty five, half of them engineering departments at land-grant institutions.

"Among the thousands of land-grant -research discoveries have been . . . fundamental work in *transistors* and on the first *television tube* at Purdue University; the invention of the *cyclotron* at the University of California." Edward D. Eddy, Jr.

The largest university system in the United States, the University of California, is a land-grant institution.

One hundred years after the act was passed, one out of four higher education students was enrolled in a land-grant college or university.

Part of the land-grant act called for training in "military tactics." This requirement gave birth to the Reserve Officers Training Corps—better known as ROTC.

[From the Boston Globe, Feb. 1, 1983]

(By Ray Stata)

EDUCATION IS THE KEY TO TECHNOLOGY

(Ray Stata, president of Analog Devices of Norwood, addressed the following remarks to President Reagan during the President's meeting with high tech executives last week.)

Mr. President, in the last 20 years high technology has created 75 percent of the net employment growth in American manufacturing industry. In the next 20 years, high technology is expected to become second only to energy in its size and impact on our economy.

But the realization of this potential and our ability to compete against other nations like Japan is threatened by a lack of people with the right education and training.

The knowledge intensity of high technology is unprecedented. One-third of our workforce needs college degrees, more than half in science and technology. Another third needs associate degrees in electronics, computer programming and the biological sciences.

The simple fact is that our educational system today does not have the capacity to educate and train enough people with the right qualifications to sustain our industry's growth—not only in our universities but also in our high schools and elementary schools where math and science and computer literacy are critically deficient.

While enrollments in engineering schools have ballooned in recent years, there are still not enough graduates to meet the future needs of America for technical people. And the problem now is that many universities are capping further enrollment growth and are turning away interested and qualified students from a technical education—because they don't have the resources to expand their faculties and their laboratories.

This national tragedy not only impairs high tech growth, but also impacts our mature industries and our service industries which are looking to high technology products—like robots, word processors and CAD/CAM equipment—to make their workers more productive and more competitive in world markets. Likewise, our defense buildup could be retarded by lack of qualified people to design, build and operate a new generation of intelligent weapon systems.

In reality, we're fighting a cold war on two fronts—militarily with Russia and economically with Japan—but with the same troops—namely, our technical workforce. Neither battle can we afford to lose.

Despite the recession, our industry is responding to the plight of our universities with more generous support of higher education. These are not charitable contributions, but rather critical investments in resource development.

But given the way our system of higher education is funded, industries' very best effort alone will not be adequate to do the job. For example, in 1980-81 America invested $65 billion in higher education of which 50 percent came from government resources. Even more important to our industry is the funding of university R&D where two-thirds comes from the federal government.

To meet the pressing needs of our technical universities and to provide an opportunity for citizens who want a technical education, we need a partnership between industry, academia and government to refocus the aims of education on economic development, job creation and national defense and to build centers of technical excellence throughout the country.

We don't need another tops-down federal give-away program geared around bureaucratic judgment as to where investments should be made. Instead we need a bottoms-up, grass roots, regionally-oriented program to focus on regional opportunities and problems as identified by those closest to the issues.

Specifically, we are proposing a matching grant program for technical education and research where industry goes first in putting its money on the line. Next, state governments should verify the benefits of industries' investment by its own matching grants. After, industry, academia and state government have agreed we need Uncle Sam to do his part in the participating as well.

But by whatever mechanism, we must better link the aims of education with the goals of economic development and national security, and we must restore excellence to our system of education.

Despite our budget problems in both industry and government, we cannot ignore the investments required to keep our workforce ahead in the international technology race.

If we do a good job here, we are a long ways toward having a viable industrial policy for an era where human capital is more important to success than financial capital and national resources if we do a bad job—nothing else will matter. . . .

[From the Christian Science Monitor, Feb. 11, 1983]

HIGH TECH: THE GOVERNMENT DOES HAVE A ROLE

(By Melvin H. Bernstein)

All Americans know the nation is struggling to recover from severe recession. What is not understood is that the greater danger to the national interest lies in the steady erosion of American economic superiority. Fortunately, there is a growing view in Congress that the health of the American economy is tied directly to a strong national commitment to science, technology, and education.

In recent years, the United States has shifted rapidly from a manufacturing to an information economy. Today, 7 of every 10 Americans are employed in the information and services sector while only one of five works in manufacturing. One of every two working Americans is employed to collect, organize, or disseminate information.

The U.S. economy can no longer be viewed merely as a system. It is a subsystem of the world market. Today 70 percent of U.S. products compete with foreign products. Our nation's share of world trade in manufactured products shrank from 25 percent in 1960 to 18 percent in 1980. Of even greater concern is the fact that the U.S. share of the world market for high technology products has decreased from 30 percent to 20 percent over the past two decades.

Illustrative of the fundamental shifts taking place:

Electronics, now the 10th largest industry in the world, is projected to be the fourth largest by 1990, and second only to energy by the year 2000.

Typical of the electronics industry, Hewlett-Packard reports about three-quarters of its business in 1981 resulted from new products introduced since 1977.

Within five years, General Motors expects 90 percent of its production machinery to be controlled by computers.

The U.S. has dropped from second to seventh among the leading industrial nations in the "skill" level of its workers.

In reaction to these trends, a rash of bills has been introducted in Congress designed to strengthen the nation's ability to produce the engineers and scientists required for the new information technology economy. These bills seek to address the growing shortage of technically skilled workers trained in mathematics, science, and technology-related subjects. One of the most comprehensive bills is that of Sen. Paul Tsongas of Massachusetts, to be introduced this month, labeled the "High Technology Morrill Act."

The Tsongas bill is the most creative of the legislation introduced, calling for public-private joint funding of technology education proposals initiated by a corporation and university, approved by state government, and granted by federal government. The purpose is to promote economic development in the states emphasizing innovative, productive projects which can serve as models to emulate. Taken together, the pending bills represent a worthy effort to remedy the slackening of interest and deterioration in scientific education in American schools over the last decade.

That the federal government is asked to be an instrument for influencing economic growth should come as no surprise to President Reagan. The nation faced a similar dilemma in its infant years. How to foster economic development? Alexander Hamilton in his brilliant "Report on Manufactures" in 1791 resolved the issue in favor of an industrial state in which the federal government would use its power to promote and improve the efforts of industry by fostering discoveries and inventions and rewarding superiority.

Undergirding today's bills is the fact that US research and development, the source of technological innovation, hit its high in 1964 at 2.97 percent of gross national product, and has been dropping since then. On the other hand, R&D relative to GNP has been rising consistently over the past two decades for two of America's chief competitors, Japan and West Germany. Moreover, while the US still has the highest proportion of scientist and engineers in its labor force, that percentage has been decreasing during the last decade while Japan's has doubled during the same period.

The federal government has used the resource of higher education to shape national policy on three pivotal occasions. In 1862, during the height of the Civil War, congressman Justin Morrill of Vermont authored the bill signed by President Abraham Lincoln that became known simply as the Morrill Act. This act created the state system of public land grant universities and colleges to provide educational training in the science of agriculture and the industrial arts. In 1944, the GI Bill was passed, subsidizing the college education of returning servicemen to prepare a trained cadre of manpower to meet the requirements of a peacetime society. In 1958, the Sputnik-induced external threat of the Soviet Union provoked national fear of losing US technological superiority in outer space, resulting in the $1 billion emergency National Defense Education Act.

Secretary of Commerce Malcolm Baldrige testified before Congress in 1981 that the United States is "facing competitive challenges of a magnitude that only a few years ago would have been unimaginable." To meet the new challenges, the huge resources of higher education can be mobilized once again to generate the technically trained manpower and research required to preserve our technological edge. Higher education has not been a priority on the national legislative agenda since 1965. If the US is to adapt effectively to the new information-based economy and world marketplace, it is essential that legislation be enacted using the higher education resource to support the nation's technological and economic development.

(Melvin H. Bernstein is vice-president for research and development of the New England Board of Higher Education and co-author of "Financing Higher Education: The Public Investment.")

PRESIDING ADDRESS FOR THE SESSION ON A "MORRILL" ACT FOR HIGH TECHNOLOGY

(Delivered at the 96th Annual Meeting of the National Association of State Universities and Land-Grant Colleges, David C. Knapp, President, University of Massachusetts, November 8, 1982)

We have come together this morning for a rare event in meetings of this association—a joint session of our divisions, commissions, councils and committees. We are here to address the relationship of our institutions to the new age of advanced technology.

This is, I think, a strategic moment in the history of American Higher Education * * * not simply because we here have abandoned our traditional preoccupation with territoriality, although that is part of it, but because if we take advantage of the moment, we in St. Louis today may well have been present at the creation of the new land-grant university. Perhaps in this session and those that follow, we can begin to shape a strategic response to our common spirit, our common circumstances, and what I hope will be our common future.

Let me devote my time this morning to spelling out the terms and implications of a single proposition—a proposition that is quite probably self-evident, but one which lies at the heart of twin futures—ours as universities and ours as a nation.

The proposition is this:

Never before has the United States shown a stronger objective need for precisely the things that higher education, and especially our land grant schools, can and should provide * * *

Yet, never before has higher education been made to feel as powerless as many of us now feel to respond to such a powerful objective need.

I assume that all of us here understand the nature of this objective need, but let me state it briefly—

The United States is passing through a period of historic change in its economic, social, and political order. As best we can tell, we are moving into a new order—here, in Western Europe, Japan—which is based on knowledge. As best we can tell, moreover, instead it is knowledge which is likely to shape and define the nature of the age—just as land defined the nature of the agricultural age, just as capital defined the nature of the industrial age.

Obviously, as we move into a knowledge-based order, such a change poses new challenges and creates new opportunities for institutions which have traditionally taken knowledge as their base.

More to the point, this change offers particular challenges to, and opportunities for, institutions whose essence it is to explore knowledge in its full range of uses—for institutions whose essence it is to create new knowledge through research, protect and refine knowledge through the canons of academic freedom, apply knowledge in myriad ways through myriad mechanisms, and disseminate the fullness of our knowledge through teaching, be it in the classroom or workplace or community.

Needless to say, I have just summed up the essence of our original purpose as land grant universities.

If we did not already exist, our nation would be quick and eager to invent us. Indeed, there are those who believe that we should be re-invented—re-invented because many believe that the form and substance we have taken on in recent decades is unresponsive to contemporary society.

In part, we as land grant universities have suffered a loss of external influence and internal morale because of national policy. Just when knowledge has emerged as a basic strategic resource, we as a nation seem to have lost the will, or the way, to invest in knowledge. Indeed our nation's government seems positively determined to cut the level of our postwar investment in knowledge.

Yet not all is gloom and doom, for signs of a change and signs of hope are clearly in the air, especially for those engaged by the spirit and fact of the land grant tradition. The question which we who are here today face is whether we and our institutions recognize the signs and are ready to respond to them. Let me be specific.

To a significant degree, the challenges of the knowledge-based economy are shaping the new agenda in the Congress.

To a significant degree, moreover, these same challenges are shaping the growth strategies of more and more of the states. At the moment, the Joint Economic Committee of the Congress is engaged in a major study of how the states are working and planning for growth. The role of land grant schools is likely to figure decisively in its findings.

The Morrill Act has recently been cited as the inspiration for a new proposal to form a three-sided alliance of industry and national government and state governments in order to invest new dollars in the sciences and technology. This proposal, set forth in the book "Global Stakes" as a new high technology Morrill Act, has led to a legislative proposal by Senator PAUL TSONGAS of Massachusetts. At our last count, in fact, 38 such bills had been filed for consideration.

Clearly, something is stirring here, and while this vital new debate is still fresh and fluid and open to refinements, all of us here should think of ways to join in supporting and sharpening the Global Stakes proposal. Its prime strength, I would argue, is the three-sided alliance it envisions: of interaction among the national and state governments; public and independent universities; and the advanced technology industries, large and small. Such interaction, such a partnership in learning and its application was a worthy objective in another age of an agricultural, yet industrializing society. The collaborative mechanism, I would contend, remains valid for the emerging knowledge society, but with new forms and substance.

The immediate target for the Global Stakes proposal is the enhancement of growth in the high technology sector through increased manpower in the sciences and engineering, using both traditional and non-traditional forms of education. Important as manpower needs are, to strengthen a shrinking international economy, our major economic challenge as a nation is to devise ways to move ideas from the research laboratory into marketable applications at a much faster rate than we do so today. The essence of the land grant idea, as it moved from the Morrill Act to Hatch and Smith Lever, lay in the ability of our universities to combine pure research with applications and technology transfer as well as teaching and training. A similar progression, if it were used to bring the sciences and technology into a closer and more productive relationship, would add greatly to the force and value of the Global Stakes proposal.

Let me be clear that I view this proposal as part of a continuum. A case can be made that production agriculture was in the vanguard of the emerging knowledge economy, moving as it has from a labor intensive to a knowledge/machine intensive character. In like fashion, the current proposal while flagging high technology as we now define it, must lay the groundwork for the application of advanced technology to multiple facets of the economy, including basic manufacturing industries.

We clearly need a new national policy on education, research, and development which is broadly conceived for the everchanging age of advanced technology. We need to support such moves. Yet, I would agree with John Hoy of the New England Board of Higher Education, that waiting for a national strategy alone would be "foolhardy in the current political climate." It would also be inconsistent with our very nature.

Our land grant colleges and universities rise or fall with the fortunes and prospects of our home states. We are state institutions before anything else. What is happening nationally is important, for both its symbolism and its concrete support, but our basic character ties us to the economy, the society, and the political culture of our respective

homes. If the nation is going to turn anew to its land grant schools, and if we are going to turn anew to the problems and opportunities of the nation, then these new alliances will largely occur state-by-state.

Consequently, as we look to signs of hope and also consider specific strategies for the future, we must turn to the states for a clearcut sense of that future, of what can be made to happen there, through a collaborative vision and collaborative leadership.

Accordingly, I would like to tell you what has been happening in my own state, Massachusetts.

Our work and our vantage point have been defined in large measure by conditions familiar to all of us in this room: a recent history of severe fiscal strain.

What's happening in the nation's heartland now occurred in our state in the 1974 and 1975 recession. Unemployment then reached 12 percent. The state faced a $600 million deficit. State spending had to be cut back severely. Our university, for example, was cut in one year by 6 percent. Later, our voters passed proposition 2½ which cut state tax revenues by roughly $600 million a year. We have felt its pressures in the last two years and will feel them this year. Yet, through forceful advocacy and strategic alliances, we have been fortunate enough to secure double-digit increases in our university budgets for each of the last two years.

We have reached such a point because we, and others, have faced up to, and unravelled, the grim logic of a depressed state economy, and its long-term causes of decline. We have concluded that in current circumstances knowledge is our basic resource, and that the state's growth strategy must be based on the creation and application of knowledge.

Such analysis is fine, but a depressed economy is a depressed economy. In the space of a few months or even a full year, it simply cannot yield the tax revenue needed to make the investment in education needed for long-term recovery. Ironically, the very forces which offer new hope, and cast universities in a new light, also deny the funds needed to get into a strategic harness.

In Massachusetts, we have emerged from this dilemma in a positive position because our economic growth is largely provided by the high technology industry. In our state and in the nation, microelectronics now serves as the advance guard of the knowledge economy, and its leadership, like that of high technology generally, is sophisticated about that economy's needs and the breadth of education it requires. It is aggressive and highly articulate in its work in policy forums, including the legislature.

Because of its nature, the high technology industry has turned to us for help in a very specific sense—to gain a larger supply of engineers, computer scientists, and technicians. At the same time, Massachusetts industry has recognized that as a university we need help if we are to help them. It has become our natural ally, and with its support, public higher education in Massachusetts has been able to make a successful case for earmarking a significant portion of state revenues, even in a tight period, for investment in colleges and universities. Indeed, there are those who now assert that higher education spending should be thought of as just that—as an investment rather than as an annual expenditure drain on the state treasury.

Not only Massachusetts, but our region, New England, has begun to shape at least the rough outlines for an explicit strategy to foster the rise of the knowledge-based economy. This strategy is rooted in the existing character of New England. As James Howell of the First National Bank of Boston puts it, "New England is the most knowledge-intensive region in the world."

Just a few years ago this quality was regarded as a major weakness. Yet as this region has come to understand the basic shift which is occurring toward a new knowledge-based order, its political and industrial leadership have come to understand that the region's colleges and universities are crucial to the design of growth strategies. We as land grant institutions in the region are clear that we must be engaged in these strategies—at worst, as an intelligent consumer and, at best, as a major sponsor.

The University of Massachusetts is a *New England* land grant institution, and this gives us a slightly different view of our heritage. We see our role just as other land grant schools do. We are aware of our origins as a centerpiece in a 19th century national strategy of public investment in an agricultural order. As the nation shifted from farm to factory, we helped to equip individuals and institutions to make this shift as intelligently, and as effectively, and as humanely as possible. Today, as we move through a similar shift, we believe these emerging conditions must call us back to our historic role in helping to set the shape and terms of change, not simply in terms of the current needs of high technology, but as part of a larger conception of the relation of knowledge to society.

To the New Englander's eye, the purpose of the Morrill Act was to invent an institution that could address the perils and challenges not of agriculture per se (as important as this was) but of the *transition* from agriculture to industry.

I have stressed repeatedly that we are moving through another such transition today. Let me quickly call off some specifics of how we as a university have participated in—indeed have given direction to—that transition.

We have shifted resources into engineering, the computer sciences, and selected scientific fields. We have done so to respond to surging enrollments and documented needs in the job market, and we have achieved a new balance without damage to other sectors of the university.

We have persuaded private donors to give both dollars and equipment to a public institution, a break with long tradition in the nation's citadel of independent higher education. We have been helped by the Massachusetts High Technology Council, which has urged its members and has shown them how to contribute 2 percent of their research and development budgets to research and teaching enterprises in academic settings.

We have helped to design, sponsor, and support a plan for a Massachusetts Microelectronics Research Center. This $40 million center is a collaborative endeavor among industry, government and universities which will engage in research, advanced training, and the fabrication of microelectronic components.

We have also designed and supported a plan to create collaborative educational telecommunications networks in the state. We believe this network to be essential if we are to be less site-bound and age-bound in meeting the training and retraining needs of a knowledge-based work force.

We have entered into a service alliance with the public schools. If education is to speak with a coherent voice in fashioning the new economy, then the least we can expect is for the public institutions at all levels to begin to shape a common and cooperative agenda.

In summary, never before has Massachusetts shown a stronger objective need for the things that our colleges and universities can provide * * * and never before has Massachusetts seemed as willing to equip higher education through collaborative efforts to address such a powerful objective need.

As my university has gone through this period of resolution, I believe it has changed. I would argue that the strongest single change has been a vital progression in our sense of what we are as a university and what we do. At the moment, it is triggered by a rapid shift in our current high technology. But, in the future, we must be prepared for and give leadership to new stages of growth. I believe that we in Massachusetts are now willing to see ourselves in a different sense—as a full partner in negotiating the historic transition into a new order based on the creation, protection, application, and dissemination of knowledge. We understand that, as a land grant university, we must help Americans work in a rapidly changing knowledge-intensive society which may require them to change careers three or four times in a lifetime. We recognize, too, that we cannot continue playing catch up. Simply put, the microelectronics industry in our state outran its supply lines. It suddenly found itself with markets to serve and opportunities to meet, but with too few well-schooled minds and hands to seize these advantages. High tech, as we know it now, may well run its course in a decade or two. The most thoughtful leaders of industry know this only too well, and they are already thinking about the applications of knowledge which will mark the next stage of the age of advanced technology. So, too, must we, if we as land grant universities are to play the vigorous and strategic role in American society which our founders envisioned for us.

[From the Boston Globe, Feb. 28, 1983]

FOR NEW ENGLAND, IT'S NOON—NOT DAWN—IN THE HIGH-TECH INDUSTRY

(By John C. Hoy)

Whether Ronald Reagan will learn to bind education and training to high-tech economic development remains an open question at the midterm of his presidency, but his visit to New England's high-tech center belatedly acknowledged that the linkage must be made.

Clearly in his State of the Union address last month the President was seeking to capture a leadership role in the face of 40 bills now before Congress—sponsored by both parties—each seeking to address the technology education crisis in the absence of administration vision.

For New England, the President's words were welcome. Oliver O. Ward, chairman of Germanium Power Devices and founding member of the Massachusetts High Technology Council, said: "Now the Congress has the green light. New England senators and representatives should be directing the traffic."

Ward was referring to a landmark bill which has been developed there in New England and which would encourage local partnerships nationwide between state government and industry to provide matching grants for higher education.

The proposed legislation is grounded in New England's long tradition of innovation and is based upon an earlier Yankee legislative initiative binding education to economic development—the Morrill Act of 1862. Proposed by Sen. Justin S. Morrill of Vermont, that law refused the interests of government, education and the farming economy into a national policy, and led to the growth of modern agriculture and early industrial education in the United States.

This landmark act endured and remains a compelling benchmark for federal, state and private-sector collaboration as envisioned in a new "High Technology Morrill Act," to be introduced by Sen. Paul E. Tsongas (D-Mass.) tomorrow. It was developed in conjunction with regional business and education leaders.

The proposed legislation would create an institutionalized coalition among business and industry, academia both public and private, organized labor and the economic strategies of state government in behalf of research and development, education and training, regional public service and technology transfer.

The bill also would go far to fill the void created by the absence of Administration policy, which has faltered to the point of negligence by embracing a simplistic economic strategy that failed until midterm to acknowledge the potential of high-technology and the need for hard-fisted investment in human capital, vocational training, research and information transfer.

The bill calls for a total financial outlay of $1 billion annually for a pilot five-year program, although that amount is tentative and could be changed during the political process. Nevertheless, the billion dollar figure is extremely low compared to the trillion-and-a-half dollar commitment the federal government has pledged to defense over the next five years. In addition, the bill notes that a strong high-technology economy would bolster national security.

Federal funds under the measure would come from a "Technology Education Trust Fund," created by royalties from the mining of public lands. The money would be distributed through a new arm of the National Science Foundation specializing in applied science and technology.

Since the original Morrill Act was signed into law by President Lincoln 120 years ago, New England's higher education establishment has developed into the region's highest quality asset and largest "export industry." It has attracted people from outside the region and generated new industries. By bringing together high-tech entrepreneurs in each state with a highly educated labor force and created the region's knowledge-based economy. (MIT started out as a land-grant college. It was the "mechanical" school, while a new Massachusetts Agricultural College, now UMass. was established to complement it.)

Because New England is ahead of the rest of the nation in rebuilding its economy through basic and applied research, it has much to say to the rest of the nation.

While New England has begun to overcome its historic reluctance to forge the kind of economic confederation required to compete successfully in a world technology market, the country as a whole has yet to envision the necessity for such an exceptional level of government, industry and education collaboration.

The New England political leadership in Washington understands the technology issue and is eminently capable of shaping national economic policy by holding up the region as an example of and precedent for recovery. Speaker of the House Tip O'Neil understands the priority.

In fact, New England has already taken the lead in urging fundamental change in national policy through Vermont Sen. Robert T. Stafford (R), who has in his own right extended the historic legacy of his 19th-century predecessor, which the new Morrill Act seeks to recapture. Stafford as chairman of Senate education committee will oversee all Senate high-tech and education-related bills.

At the mid-point of his Administration the President has left an open door for Congress to act boldly. Congress will inevitably take its lead from the economic recovery that dawned in New England as the region entered the high-technology era.

(John C. Hoy is president of the New England Board of Higher Education.)

[From the National Journal, Jan. 15, 1983]

Human Resource Needs for High Technology Industry

(By F. Karl Willenbrock, Cecil H. Green, Professor of Engineering, Southern Methodist University)

INTRODUCTION

The rate of technological advance is strongly people-dependent. Technology undergoes rapid changes when well-educated engineers and scientists, together with well-trained paraprofessionals, are participants in a well-organized effort.

However, the human resources needed to increase or even maintain technological preeminence may no longer be available to the United States if a number of the present trends continue. The weaknesses in the U.S. educational system, the failure of U.S. companies to use their technological workforce effectively, and the lack of public understanding of the technological basis of the U.S. economy can make the United States decreasingly competitive in the global high technology race.

In order to evaluate some of the policy alternatives available, it is worthwhile to review the development of technological capability in the United States after World War II, to analyze the character of the present U.S. technological workforce, to examine the status of the U.S. education system, and to compare the U.S. workforce and educational system with those of other countries with strong high technology capabilities. A consideration of the conditions required for strengthening U.S. technological capability will then lead to a number of possible public and private sector actions.

U.S. TECHNOLOGY ADVANCES AFTER WORLD WAR II

Rapidly advancing technologies have a number of characteristics which strongly affect the technological workforce. Such high technologies are science-based. A prime example is integrated electronic circuitry. The understanding of the physics of solids which was gained in the decades of the 1920s and 1930s laid the basis for the invention of the transistor in 1949. As the physical processes of electrical conduction in semiconductors were unraveled, the era of electronic semiconductors started. And it is electronic semiconductor technology which has made possible the rapid advances in computers, satellites, robotics, and a host of other systems with which information can be processed more rapidly and inexpensively than ever before.

The rapid technological progress made in the United States since World War II depended on a number of factors in addition to the advance in scientific knowledge. Two post-war public policies had a dramatic effect on the nation's ability to exploit new technological possibilities. The first was the GI Bill of Rights which made university education, both undergraduate and graduate programs, available to returning veterans regardless of their economic status. The second was the decision of the military services led by the newly created Office of Naval Research to maintain the fruitful wartime collaboration between the federal government and the nation's leading universities by funding university research on a continuing basis. This policy was subsequently extended beyond the fields of direct concern to the military services by the creation of the National Science Foundation and the National Institutes of Health.

The U.S. universities, as a result of these policies, became active contributors to technological change. They helped create the knowledge base on which new technologies could be built and were the primary source of the human talent needed to do the building. The private industrial community, in turn, used the new knowledge and the new knowledge practitioners to develop and market the new technology-based products and services which have revolutionized the post-war decades.

The skills of the workforce needed by the high technology companies are different from those of traditional manufacturers. The knowledge needed to develop and produce new products and services is decreasingly dependent on empirically derived knowledge and is increasingly dependent on information derived from research. Thus the value of employees with experience-based skills has decreased with respect to those with up-to-date technical knowledge.

From the standpoint of members of the technological workforce, there is a changed set of requirements for a successful industrial career. No longer can an employee complete a traditional university educational program and expect the knowledge gained to be adequate for an entire career. Such employees are faced with two trends. One is that the period of employment is becoming longer as the age of retirement goes from the 60s to 70. The second is that the rate of increase of new knowledge is so rapid that technically oriented employees need to increase their knowledge base systematically to survive the technological changes which occur in a 35 to 45 year career span. Just as the knowledge base of the pre-World War II electronic engineer versed in the design of vacuum tube circuits was made obsolete by the advent of semiconductor electronics, so today's chemical process engineers who do not understand biological phenomena may well be faced with the possibility of technological obsolescence.

In addition to rapidly changing requirements for professional level employees, there are concomitant changes at the paraprofessional level. New kinds of technicians are needed whose skill requirements can be completely different from those of their predecessors.

PRESENT U.S. TECHNOLOGICAL WORKFORCE

The core of the present professional technological workforce in the United States is the pool of approximately 1.5 million engineers and related scientists. Roughly 75 percent of this group is employed in iudustry, about 5 percent in universities, and the re-

mainder in governmental agencies, in not-for-profit institutes, and in self-employment.

There have been a number of attempts to model the supply and demand for such professionals, but none has proved to be quantitatively successful. The major variables on the supply side are known and can be quantified within broad limits; however, there is considerable controversy with respect to demand. Surveys of employers typically lead to predictions of shortages. Surveys of employed engineers indicate a widespread belief that there is an oversupply of engineers since many engineers feel that they are underpaid and underutilized. Thus, it is not unusual for industrial trade associations to support public policies to expand the supply of engineers while professional societies seek to restrain the supply.

The professional workforce has an annual turnover of roughly 100,000 persons a year. On the supply side, about three quarters of the new entrants are newly graduated degree recipients and the remaining quarter are made up of transfers from other fields and immigrants from other countries. On the demand side, roughly one fourth are new positions due to growth, one fourth are replacements for death and retirements, and the remaining one half are transfers of employed engineers into nonengineering activities. The reasons for this large-scale transfer out are not entirely clear.

At the paraprofessional level, there has been a large increase in the number of degrees awarded for the at least two but less than four years of post-secondary school programs. In the engineering-related technologies, there are about 75,000 degrees awarded annually and the total workforce is estimated to be in the order of one million. Since this work force is even less well defined than the professional workforce, these numbers are very approximate.

However, consideration of the adequacy of the human resources available to high technology industry must confront the issue of how effectively companies use the technological capabilities of their present employees. There are no direct measures of this effectiveness, but there are several indirect indications that companies do not obtain substained productivity from their technological workforce. One is the annual out-migration of 50,000 professionals from the technological work force. Clearly some of those who leave are the top achievers who go on to become major program managers, vice-presidents, and CEOs. However, there are others who transfer out laterally whether or not their major talents lie in technical work.

A major cause of dissatisfaction among those professionals who retain technical rather than managerial jobs is their current and prospective salary. In many professions, experience on the job increases the value of the employee to the employer. However, in high-technology companies the situation can be reversed. Freshly educated new graduates may be more up-to-date and more likely to be innovative than more experienced engineers. Thus, engineers may be viewed by the company as depreciating rather than appreciating assets. The salary history data collected by the U.S. Bureau of Labor Statistics and the Engineering Manpower Commission of the American Association of Engineering Societies lend credibility to this explanation. Many engineers reach a salary plateau after a 10 to 15 year period and then suffer severe salary compression.

STATUS OF U.S. TECHNOLOGY-RELATED EDUCATION SYSTEM

There are at present deep concerns in the educational and industrial community about the adequacy and the quality of technology-related education. These concerns include the precollege, college, and graduate school levels.

Precollege Education: Precollege instruction in science and mathematics in the United States is woefully inadequate. The Commission on Precollege Education in Mathematics, Science, and Technology appointed by the National Science Board of the National Science Foundation in July 1982 is currently examining this area. Its first formal report (October 1982) entitled "Today's Problems, Tomorrow's Crisis" summarizes the present situation as: 1) the achievements of secondary school students in mathematics and science has definitely declined over the past several decades, and 2) remedial mathematics programs have increased so sharply at the post secondary school level that 25 percent of the mathematics courses taught at four-year public colleges and 42 percent of the community college mathematics courses are remedial in nature.

A root cause of the decline in achievement is related to the availability of qualified mathematics and science teachers at the secondary school level. Practically all the states report shortages in mathematics and science secondary school teachers and the number of students preparing to teach in these areas has decreased three- to four-fold in the last decade. Typical starting salaries for such teachers are $13,000 per year, so students with mathematical and scientific skills are much more likely to take engineering programs where the typical starting salary is twice as high.

The U.S. situation contrasts strongly with the situation in Japan where specialized study in mathematics, biology, and physics starts in the 6th grade, and Japanese secondary school teachers in mathematics and science are paid salaries comparable to university professors.

Four Year Colleges: At the college level, there are significant differences between the strong student demand at the undergraduate level in engineering and computer science on one hand and the decrease of students' interest in mathematics and most of the sciences (except biology) on the other.

In engineering and computer sciences, the present situation can be summarized as follows:

The undergraduate demand for programs in engineering and computers has been growing for almost 10 years and remains strong. The quality of students is relatively high. There is a sharp increase in the number of women majoring in engineering and related sciences.

Engineering colleges are unable to hire and retain an adequate number of faculty members in engineering and computer science to meet the undergraduate demand. For all faculty ranks there are vacancies of about 10 per cent. For the assistant professor rank, the vacany rate in some fields, such as computers and electronics, are above 25 percent—indicating that universities are finding it increasingly difficult to attract new Ph. D. recipients.

The equipment and facilities in engineering schools have suffered from underinvestment for many years. Laboratory facilities in practically all U.S. schools are inadequate to provide quality engineering education.

The engineering college accreditation system which is based on periodic examination of engineering curricula provides direct evidence that the quality of undergraduate engineering education offered by the nation's 290 engineering schools is deteriorating. The weaknesses most frequently identified by the on-site inspection teams are: 1) too few faculty members for the number of students enrolled, 2) inadequate laboratory equipment and facilities, and 3) inadequate opportunity for faculty members to develop professionally.

Graduate Schools: There has been a decrease in both the numbers and the quality of U.S. full-time graduate students in the 1970s and 1980s. However, there has been a steady increase in the number of full-time foreign nationals. About one-third of the masters and one-half of the doctoral degrees are now awarded to foreign nationals. While some of these foreign nationals remain in the United States and ultimately become American citizens, most return to their native countries.

The faculty recruitment and retention problem is of utmost concern at the graduate level. The lack of up-to-date facilities and equipment in most engineering schools has been a significant factor in discouraging many of the most capable students from seeking careers as faculty members. Most universities do not have the financial resources to match the present industrial salary scales. In some universities, engineering and science faculty salaries are based on university-wide scales which are tied to academic rank and are independent of field. A result is that only noncompetitive salary offers can be made to engineering faculty candidates.

INTERNATIONAL COMPARISONS

Foreign high technology companies are increasingly becoming technological pacesetters. Their technological work forces can differ substantially from those available in the United States.

Despite Japan's smaller population base, more engineers are graduated annually than in the United States, and many Japanese high technology industries have more baccalaureate-level engineers available than in the United States. At the paraprofessional level, Japanese employees will typically have much better scientific and mathematical backgrounds than their U.S. counterparts. They are better prepared to undertake intensive company training programs and thus are able to contribute more to technologically sophisticated production processes. However, at the graduate level, the United States does produce substantially more advanced degree holders in both engineering and the sciences. U.S. research programs are significantly stronger.

In the western European countries, the work forces have different characteristics. The German apprenticeship programs and the French Grande Eccles provide comprehensive professional programs in engineering and their engineering graduates have a strong industrial orientation. Also technologically important areas such as manufacturing processes are frequently emphasized whereas some of these areas have been widely neglected in U.S. universities. At the paraprofessional level, the German apprenticeship programs provide very sound technical training. At the graduate level, many European countries have maintained strong programs in the sciences and engineering for many years. Their research capability is quite comparable to the United States.

In the USSR there is a major emphasis on technical education at both the precollege and university levels. The annual production of engineers and scientists far exceeds that of the United States. However, the differences in the educational systems are so large that quality comparisons are difficult to make.

REQUIREMENTS AND POSSIBLE ACTIONS TO IMPROVE U.S. TECHNOLOGICAL COMPETITIVENESS

Although there is little consensus on whether there is a shortage of engineers in the United States today, there is wide agreement on the need to improve the quality and productivity of the technological work force. If global technological preeminence is taken to be a U.S. national goal, the following conditions should prevail:

(1) The United States must advance the technological state-of-the-art.

(2) The professional work force must not become outdated in rapidly developing technological fields.

(3) Careers in engineering and the related sciences must attract and retain the nation's most intellectually able youth.

(4) The paraprofessional work force must be trained to respond rapidly to the new tasks that the production of high technology products and services require.

(5) The general public must understand the importance of investing adequately in science and technology to maintain an ongoing momentum.

These conditions are only partially met at present. Action is necessary by both the public and private sectors to make the United States more internationally competitive.

First, U.S. scientists and engineers are presently contributing actively to the advance of the state-of-the-art in many technologies. To continue to do so will require increased support for university-based research as well as continued industrial company investment in research. Unless a reasonable number of research-oriented universities are able to maintain strong faculties and state-of-the-art research facilities, the quality and quantity of future contributors and future faculty members will decrease. The present tendency of federal research funding agencies to avoid research in areas of potential technological importance should be modified so that knowledge gaps are not allowed to impede technological progress.

Second, the problem of maintaining the major part of the professional technological work force at the state-of-the-art in rapidly changing technological areas is essentially unsolved. While the current continuing education programs of a number of universities and professional societies are commendable, they do not provide an adequate solution to the technological obsolescence which overtakes many practicing engineers and scientists. A major effort on the part of the industrial and academic communities will be needed to provide the practicing engineer the opportunity to continue to broaden and deepen his knowledge base throughout his career. The recent proposal of a faculty committee at the Massachusetts Institute of Technology's Department of Electrical Engineering and Computer Science to provide educational programs for industrially employed engineers which are matched to their mid-career needs with respect to content, delivery mechanisms, and teaching methods is an important step in this direction. The increasing availability of videotaped graduate courses in engineering and related sciences is also significant. Whether such private sector steps are adequate to solve this problem is not clear. The National Science Foundation, in combination with the universities, could play an active role in facilitating its solution.

Third, United States youth make career choices on an individual basis. Their perceptions of the desirability of undertaking a particular professional career depends in part on their picture of the type of activity involved, of the financial return, of the match of their talents and preferences, and of the social status of that profession. In Germany, France, and Japan, engineering is one of the most preferred professions and so it attracts many of their most intellectually capable youth. In the United Kingdom, the engineering profession has a much less desirable status and, although a Royal Commission studied the question for two years, little progress has been made in changing its attractiveness to their most intellectually capable youth. In the United States the situation is in between. Many of the nation's most prestigious private universities do not offer strong engineering programs. The current strong demand for engineering graduates has resulted in a large increase in students desiring an engineering education and there has been an accompanying increase in the quality of the students seeking admission. It is uncertain whether the quality increase will be retained if the industrial demand decreases.

Fourth, paraprofessionals are a crucial part of the industrial work force. If the individuals available have a good background in mathematics and science, they will be better able to meet the demands involved in dealing with today's technology. In addition to academic background, there is, of course, the attitude of the company and the individual employee towards investing time and effort in gaining the skills needed to perform complex operations. A strong improvement in U.S. precollege mathematics and science education will be needed if the United States is to have a comparable capability.

Fifth, a number of countries are giving the development of an increased technological capability a higher priority than the United States. In addition to the investment that a number of the industrially advanced countries are making in developing their human technological capabilities, many of the less developed countries have also made a strong commitment to the building of an indigenous technological capability. Particularly noteworthy is the People's Republic of China which has focused on science and technology as one of its four priority areas for modernization. Their commitment includes the establishment of a number of key national universities with technological orientation and equipping them with modern facilities and equipment. (The World Bank has recently loaned China $200 million to strengthen their higher educational system.) With a student population approximately equal to the entire population of the United States, the potential human resources available in China are staggering.

In most highly industrialized countries, there are much stronger educational requirements in science and mathematics at the precollege level than in the United States. The United States is continuing to develop a more technologically illiterate population than many other countries. There are dangers inherent in this situation One is the present underinvestment in technology-related education. At the precollege level, it is essential to increase the salary scales of science and mathematics teachers so that the requirements in these areas for high school graduation can be strengthened. At the university level, more funding is needed in public university systems to adequately support engineering education which is more expensive than most other types of education. Otherwise, engineering schools will continue to have faculty vacancies, out-of-date equipment, and an inadequate number of U.S. graduate students.

RECENT GOVERNMENTAL ACTIVITIES

The Reagan Administration has not strengthened the federal role in education even though the Congress has indicated a desire to strengthen engineering and science education. Several bills introduced in the 97th Congress such as the National Engineering and Science Manpower Act of 1982 (HR 5254) involve engineering and scientific manpower but no bills gathered sufficient support to be close to passage.

It is significant that a number of state and local governments have taken actions which show an awareness of the importance of high technology industry. An outstanding example is North Carolina, where Governor James B. Hunt has been an enthusiastic promoter of high technology. The North Carolina School of Science and Mathematics, a residential high school somewhat similar in academic program to the Bronx High School of Science, has recently been started. New microelectronics and biotechnology centers have been organized in the Research Triangle where the combined resources of several universities have served to attract a number of high technology industries. Other states such as California, Arizona, and Florida are also investing in high technology by supporting university efforts to build advanced and expensive technological facilities. These state efforts bear an interesting analogy to some of the less developed countries where similar efforts are being made to use advanced technologies as a springboard to economic development.

In other cases, cities and universities have sought to develop industrial parks to attract high technology industries to their environments. A number of cities have created magnet high schools to foster the scientific and mathematical capabilities of their youth. The accomplishments of the alumni of specialized schools such as the Bronx High School of Science and Stuyvesant High School in New York City have been so spectacular that there is not doubt that the investment of public funds in such endeavors has been most effective in the identification and development of youth with exceptional technical abilities.

CONCLUSION

In addition to such governmental activities, a number of high technology companies acting both in an individual capacity and through trade associations are seeking to strengthen the education system by gifts of equipment, financial support and scholarship funds. Whether such efforts will give the U.S. industrial sector the human resources necessary to compete effectively in high technology in the long term is uncertain. Such attempts are not commensurate with either the magnitude of the effort needed to improve technology-related educational programs in the United States, or of the commitment of present and potential foreign competitors. Various proposals such as a High Technology Morrill Act and a federal National Technology Foundation have sought to address the human resources problem on a national basis.

However, there is little evidence of a nationwide recognition of the urgent nature of the problems to be solved such as characterized the national response to the USSR's launching of Sputnik in 1957. Until there is such a recognition, it is improbable that truly effective action will be taken.●

Mr. PELL. Mr. President, I am very pleased to join my distinguished colleagues, Senators TSONGAS, STENNIS, RANDOLPH, and Hart, in the introduction of the High Technology Morrill Act.

There is a growing consensus among educators, legislators, and the private sector that the crisis we are facing in high technology—a crisis of unpreparedness—requires a wholly new emphasis on math and science instruction in our schools. The frightening projection that by the end of this decade our country will face a skilled labor shortage of some 2½ million workers is a call to arms. It is a battle cry for us to direct all of our resources—the resources of the private sector as well as those of government—to the crisis at hand, so that we may be prepared to meet the demands that the emerging high technology industries will place on our work force, and so that we may maintain our strong position in the world economy.

Japan is well-equipped to accommodate a shift from a world economy based on manufacturing to an economy based on high technology. Quite simply, it does not face the kind of shortages in skilled personnel that we do. Japan's highly skilled work force is attributable largely to the pivotal role that education plays in the Japanese lifestyle, and the emphasis that the Japanese Government places on rigorous education in math and science.

While the Federal Government must take the led in improving math and science proficiency through our schools, it is equally critical that the business sector assumes an active role in solving this crisis. The High Technology Morrill Act encourages private industry to play such a role. It establishes a technology education trust fund, which will award grants to cooperative programs in math and science education. Industry would be required to assume 20 percent of the cost, and State government 30 percent, thus guaranteeing that the private sector plays a major role in developing a skilled work force. More importantly, it encourages industry to bring its wealth of knowledge and expertise to bear in upgrading instruction in math and science, and to work in conjunction with our educational institutions in doing so. Federal funds for the High Technology Morrill Act will be provided through a reserve of 3 percent from the revenue the National Government receives from sale of energy and mineral resources on Federal lands.

This legislation compliments the Education for Economic Security Act that I recently introduced, which calls upon government to meet the demands of a high technology economy by improving math and science instruction in our Nation's schools.

But government at whatever level cannot do it alone. The high technology problems we face are sufficiently critical to merit a new partnership among education, business and industry, and government. The High Technology Morrill Act will promote such a partnership, and will direct our energies most efficiently and effectively by insuring that we are all working in concert. The demands of a sound economy require nothing less than a total commitment of all our resources.

By Mr. BENTSEN:

S. 632. A bill entitled the "Frontier Technologies Assessment Act"; to the Committee on Commerce, Science, and Transportation.

FRONTIER TECHNOLOGIES ASSESSMENT ACT

Mr. BENTSEN. Mr. President, I am introducing legislation today designed to enable our Nation to take the first step toward a unified and effective national technology development policy. In years past, the scatter-gun approach of our Nation toward technology R&D has enabled U.S. products to lead the world in technological sophistication by the sheer volume of our national R&D spending. Other nations like West Germany spent larger shares of their GNP on R&D. And other nations like Japan produced more patents than we did. Yet, the depth of our public and private treasuries offset these factors and made U.S. products the standard for world-class technology.

That technological superiority yielded bountiful economic benefits. Especially in the generation of jobs, it enabled us to nearly accommodate the really explosive 50-percent leap in our work force during the last two decades as the "baby boom" entered job markets with a vengence. It enabled our firms to create or capture new markets overseas and domestically in spectacular fashion, and created jobs for 9 out of every 10 men and women who entered our labor force. Nonagricultural exports jumped over twelvefold to $183 billion in 1980 from a scant $14.9 billion in 1960. Literally thousands of high technology products were on the shelves at Pennys or in hospital operating rooms in 1980 that were not even a gleam in someone's eyes two decades earlier. Our technology prowess enabled us to avoid the difficulties of some European nations coping with slow job creation. Despite very sluggish work force growth, a number of our trading partners in Europe spent a good portion of the 1970's trimming foreign worker rolls and expanding direct and indirect public-sector jobs as U.S. exports limited the growth of new industries there.

U.S. TECHNOLOGY AND EMPLOYMENT

I wish we could look as smugly into the future, however, as we can into the past. The reality is that our Nation faces a fundamental challenge to her traditional ability to generate new jobs by exploiting the fruits of high technology R&D. Let me stress that the challenge is not merely to insure that job growth occurs involving the fabrication of high-technology hardware. The challenge is much broader and deeper because the servicing high-technology hardware generates far more jobs than their direct fabrication. And many of these jobs, like software development for computers for example, are not site specific. They can just as easily be done in Bonn, Tokyo, or Taiwan as in Dallas or Houston.

I have been discussing the broad issues of labor-market development, job skills, and technology for 17 months now in an extensive eight-part series of speeches reaching back to September 29, 1981. The latter two speeches dwelt in part on the prospects for Japanese technology efforts to yield superior products to our own. That risk is a real one. The grim outlook it holds for efforts to reduce unemployment and accommodate continuing labor force growth can scarcely be underestimated. Indeed, our natural growth in population will add some 14 million men and women to our work force by 1990. Add to that nearly 14 million others now unemployed or too discouraged to seek work and the magnitude of our job creation problems can be fully appreciated. To reduce unemployment to the 5 percent or 6-percent range by 1990, over 21 million jobs must be created over the next 7 years. That requires maintaining a consistent real GNP growth rate over the balance of this decade that would approach historical highs. And an integral component of that process involves maintaining our historic ability to create new jobs in high-technology growth sectors.

I am concerned that our historic ability to set world standards for technical sophistication has been eroded. And with that erosion, our ability to meet this decade's job needs is being silently but deeply undermined, as well. The inability of our economic recovery to yield much added employment in many of the traditional industries like steel and autos adds a note of urgency if not crisis to this erosion.

THE TECHNOLOGY CHALLENGE

The United States is not in danger of being outspent for R&D. The danger rests in the seemingly more efficient use with which several of our trading competitors appear to be using their R&D dollars. I use the term "several" for good reason. We are rapidly becoming adrift in a world of nations, each aggressively pursuing indi-

vidual industrial policies, combining both trade and R&D components. Selective trade restrictions and subsidies go hand in hand with explicit national programs to create jobs by carving out new markets abroad. We tend to associate the Japanese Government with such industrial policies. And I will confess that they have played some role in the remarkable economic performance our major Pacific ally has made since World War II. But success breeds imitators. And major Japanese trading firms are confronting notable selective challenges to their dominance in some markets from very competitive, quality Taiwanese and Korean producers. MITI officials in Japan have doubtlessly glanced more than once over their shoulders at the new Hsinchu industrial complex, wondering if it can actually become the clone of California's silicon valley envisaged for it by Taiwan. They can take only grim satisfaction from Taiwan's adoption of their own model of boosting engineering education and directing resources toward high technology at the expense of more traditional industries like textiles and shoes.

The most elaborate and effective challenge to U.S. technology sophistication comes from Japan. This fact is the consequence of consistent Japanese efforts to gain product comparability or better in world markets in order to maintain positive balances of payment and near full employment. Through the 1960's, these efforts featured technology transfers to Japan through licensing arrangements with technology leaders abroad, while limiting foreign direct investment in Japan. The intent was to build up the Japanese technology base by purchasing it abroad or through joint ventures. MITI severely limited direct investment in Japan, successfully forcing firms seeking market access to share proprietary technology with Japanese firms. The result was a rapid buildup of that nation's technology, with virtually all profits retained at home. From 1950 to 1978, for example, Japan imported 32,000 industrial properties through licensing arrangements at a cost of $9 billion, a fraction of the U.S. annual R&D expenditure.

Japan rapidly increased R&D outlays, as well. From 1966 to 1975, it grew 20.1 percent per year, almost four times greater than the 5.6 percent U.S. rate. By 1975, as a result, Japan enjoyed the same proportion of R&D personnel to total employment as did the United States.

The year 1968 was a watershed year when Japan moved decisively from clever imitator to innovator. Japanese patent awards that year exceeded U.S. patents, and the trend has continued. In 1977, for example, Japanese patent awards ran ahead of those in the United States by 50 percent, and were threefold larger than awards in West Germany. Japan's steady devotion to R&D has steadily increased the world-class nature of its work, as well. By 1977, Japanese patent awards in the United States were up 600 percent from a decade earlier. Japan's balance of trade in technology reflected its growing R&D capability. Technology imports to Japan during the 1970's grew only 11 percent over the 1960's, while technology exports soared 140 percent. By 1980, the 650 companies on the first Tokyo stock exchange earned $425 million from technology sales abroad, while paying out only $350 million for such imports.

U.S. TECHNOLOGY HURDLES

These positive forces in Japan were magnified by quite different trends in the United States. During the last decade, American schools and colleges produced too few electrical engineers and other technical personnel. Salaries leaped as a result, and we now confront a genuine crisis with the inadequate number of trained electrical engineers and other technical specialists our society is now producing. While having only one-half our population, Japanese universities graduate one-quarter more electrical engineers than do our colleges and universities because of faculty and equipment shortages here. Undergraduates clamor for nonexistant spots in engineering schools. Yet, the pipeline of new Ph. D.'s capable of meeting this demand for faculty has steadily shrunk, as well, as graduate students and professors are hired into the private sector by salaries 30 percent or more above academic levels.

The short-term orientation of a number of U.S. managers is another sharp distinction between Japanese and U.S. technology development styles. Japanese firms tend to promote from within, exhibit intense employee loyalty to the firm, and feature quite lengthy management time horizons. Many U.S. managers, on the other hand, focus on quarterly performances and seemingly exhibit a bias against long-term investments, especially in risky basic R&D efforts.

A third sharp distinction is the relative instability of R&D capital costs here. At least one analyst has suggested that the gyrating cost of capital in the United States, especially over the last decade, has roughly doubled R&D capital costs here relative to Japan. But the Federal Reserve's gyrating interest rate policies is far from the only obstacle strewn in the path of high-technology R&D by the Government. Our antitrust laws have been interpreted to prohibit joint R&D efforts between market competitors even in areas of basic R&D. The ensuing duplication or—more often than not, absence of—such R&D is scarcely in our national interest. The recent Justice Department decision to permit a number of electronics firms, lead by Control Data, to discuss collaborative R&D is a promising turn of events. But this new trend is tentative at best and our Nation's R&D effort remains subject to the charge of potential duplication and inefficiency compared to Japanese efforts in the private sector.

Only with passage of the 1981 Economic Recovery and Tax Act can Federal tax policy be said to have acknowledged the wisdom of greater R&D. Provisions reducing the capital gains tax, incentives for stock options, the R&D tax credit, and charitable donation treatment of R&D equipment were long overdue and needed steps to redirect private-sector resources toward R&D.

Perhaps the most debilitating impact on high technology of the Federal sector has been our inconsistent macroeconomic performance. This Nation's economy has been on a roller coaster since the fall of 1973. It has featured sweeping movements upward and downward in demand of and market prospects for high-technology goods and services. Inflation, productivity, real growth rates, interest rates—all have swung with breathtaking abruptness between extremes, interspersed with only brief snatches of relative stability. The impact on high-technology R&D and production capabilities has been devastating. In conjunction with soaring capital costs following the two oil shock episodes, that industry has not been able to sustain either the growth in capacity or R&D needed to match Japan's performance. Insufficient domestic capacity contributed notably to Japan's ability to capture some 40 percent of the surging U.S. market for 16k random access memory (RAM) chips. The stability and low-cost investment environment there is directly responsible for Japan capturing a remarkable 70 percent of the U.S. market for the new 64k RAM chips. And, if that event does not set alarms off, the looming potential dominance of Japanese firms in the prospective 256k RAM chip market should surely do so.

JAPANESE TECHNOLOGY POLICY

This Japanese muscle in the high-technology area reflects the fruit of their past decision to maintain heady domestic growth rates by carving out new export markets in growth industries. This industrial policy has not been hidden. Indeed, Japanese officials are quite candid. To quote Mr. Norishige Hasegawa, chairman of the giant Sumitomo Chemical Co. and member of the Prime Minister's Economic Council in 1982:

More specifically, the desirable industrial policy is to expand the research-oriented, new materials, and biotechnology industries, sophisticated assembly industries, such as electronics, knowledge-intensive industries like data processing, and service industries. At the same time, it expects that labor-intensive industries and resource- and energy-

consuming industries will reduce their relative importance in the national economy.

Japan is simply allocating its national resources as comparative advantage in natural and human resources dictate. The challenge is that this process threatens our own society's prospective ability to provide satisfying and well-paying jobs in the future. The competition for new markets for these new high technology products will perhaps benefit all mankind, at least materially if not spiritually. Yet, it is a competition which U.S. firms enter with a major handicap: Federal Government policy is more of a hinderance than help, while Japanese Government policy is a clear and present asset to Japanese high-technology firms.

The playing fields should be equalized. And I do not want to see it done with protectionism. Our Nation should not follow the French example in dealing with Japanese high-technology virtuosity. All Japanese videotape recorders—VTR—can be imported only through the tiny French town of Poitiers, not far from Tours. Poitiers is a pretty provincial town most famous as the site of a devastating French defeat in 1356 during the early stages of the hundred years war. Until last September, it had not been considered one of France's leading international seaports, probably because it is landlocked, located 150 miles from the ocean. The several customs officials there are able to handle only 8 percent of the previous volume of 100,000 VTR's which previously entered France monthly through Le Havre, near Paris.

A far more preferable approach, I believe, is for our Government to enhance the ability of our high-technology industries to innovate and compete anywhere with Japanese firms. One aspect of that decision is to thoroughly examine the approach being utilized by the Japanese to bolster high technology. It is a notable and diverse one.

First, the Japanese justice officials permit widespread and extensive collaboration on R&D projects by erstwhile competitors.

Second, the Japanese Electronic Computer Corp., majority-owned by the Government, finances the leasing of about one-half of all Japanese-built computers. Producers are able to receive cash for their output immediately and avoid the expensive chores of maintaining large inventories and credit operations.

Third, Japanese Government agencies and its wholly owned communications monopoly, Nippon Telegraph & Telephone (NTT), purchase billions of dollars in high technology and electronics hardware annually, all exclusively from Japanese firms.

Fourth, NTT conducts a $350 million electronic basic R&D program jointly with leading Japanese electronics firms.

Fifth, the government-owned Japanese Robot Leasing Corp. provides low-cost loans for the purchase of Japanese robotics hardware. This demand-side incentive system has been instrumental in stabilizing and stimulating Japanese robotics R&D and has seen over 14,000 programable robots introduced there, three times the number being used in the United States. Some 60 unmanned or semi-automatic plants have been established in Japan, as well.

NEW TECHNOLOGY R&D PROGRAM

Hand in glove with these programs is an elaborate and sophisticated Japanese national R&D program, featuring $1 billion in Government subsidies and tight Government, academic, and private-sector cooperation. To quote Mr. Hasegawa, again, this time on this Japanese R&D program:

> In parallel with the technological development of individual business enterprises, we are preparing a joint research system in Japan between government, industry, and academia to meet the challenge of developing technology of the next generation in such high technology fields as life science, energy, and data processing. There is no limit to the growth of science and technology, and each nation has its technological strength in certain fields.

This new technologies Japanese R&D program holds out a far greater challenge to future U.S. technology employment than the current erosion in some electronics markets. And it is worth reviewing in detail.

According to State Department's cables, the joint public-private Japanese billion dollar assault on high technology frontier areas began in 1976 under the direction of MITI.

It focused initially on computer software language development, and research on fourth-generation computers which featured the well-known very large-scale integration (VLSI) electronic circuitry technology Japanese research effort.

SOFTWARE

The software project involved MITI and 17 Japanese companies. It was intended to develop sophisticated computer program modules capable of generating and editing computer programs directly from general human instructions with far less human input, expertise, and expense than is necessary in programing today. The program received over $30 million in Government subsidies through 1981 and had led to the establishment of two Government subsidized software development research institutes with a combined budget through 1986 of another $26 million.

VLSI

The fourth-generation VLSI computer project was, and is, an ambitious effort to top the memory capacity and computing speed of the IBM 370 series computer. It is a 9-year program which began in 1976, involving MITI and eight leading Japanese computer firms, including Toshiba, Mitsubishi, Hitachi, NEC, and Fujitsu. About 1,000 patents have been earned thus far by the Government-private research association established under this program to overtake IBM, and some $234 million in Government funds have been committed to the VLSI effort. The private participants are scheduled to contribute an additional $300 million. As of last spring, no foreign company had gained access to any of this patent data. This VLSI project includes the development of new hardware, terminals, and periphery equipment along with Japanese language and voice input and optics technology, Japanese language printers, and large capacity magnetic disks.

OPTICAL ELECTRONICS

In 1979, the Japanese new frontier high-technology program was expanded to include R&D efforts involving optical measurement and control systems. This 8-year $81 million project involves the development of fiberoptics hardware for data transmission without electric impulses and the development of optical integrated circuit elements for robotics and other large-scale industrial applications. It features a combine of MITI and 14 Japanese firms, including all the larger electronic firms, such as Mitsubishi, Toshiba, and NEC, organized in the familiar research association format. It even includes a jointly funded and run optoelectronics joint research laboratory, located adjacent to the Fujitsu Corp. research facility in Kawasaki. The project is 100 percent Government funded and has successfully cultivated high quality single crystal gallium arsenide substrate for integrated circuits.

FIFTH-GENERATION COMPUTERS

Also in 1979, the Japanese new frontier program was expanded to include a 12-year project for the development of a fifth-generation computer. Features of this joint MITI-private R&D effort include development of hardware and software for an automatic translation system for the major foreign languages and Japanese, a new core computer language, reference libraries for specialized fields such as medical diagnoses, and automation of computer programing to eliminate the need for computer literacy by system users. More than nine firms are combined with MITI in this project in the usual research association format with a budget for its first 5 years through 1984 of $45 million.

This keystone of this fifth-generation computer effort is the creation of electronic artificial intelligence within computers with the ability to understand natural spoken language. It is hoped that such capabilities will in-

clude the ability to analyze such instructions and form appropriate responses. It is hoped, as well, that such human mimicry will include inferential reasoning—a computer providing related and relevant information not specifically requested by the human user.

SUPER COMPUTER

Two other areas of related research were added in 1981 dealing with the development of much higher speed computer hardware and semiconductors. Present computers run at a speed of about 10 million floating point operations per second. The joint MITI-private Japanese high-speed computer project initiated in 1981 is aimed at upping that speed to 1 billion floating point operations per second—a speed 10 times faster than the 1985 goal of similar projects being carried out at NASA's Ames Research Center. This Japanese project involves exploration of a variety of techniques for boosting computer processing speed with over $100 million in Government research funds for this purpose going to the six largest Japanese computer firms. They are working independently with frequent meetings to coordinate activities and compare results under the usual research association format.

NEXT GENERATION INDUSTRIES

The other Japanese new frontier R&D program initiated in 1981 is the most elaborate of them all. It is explicitly called the new generation industries basic R&D program and is a $472 million, 10-year effort by the Japanese Government to fund a broad range of promising new R&D areas. This program is a high-risk, high-gain effort to select and forcefeed a number of very immature technologies in the hope that one or two will blossom into major new fields of endeavor and commercial products for the 1990's. The program is comparable really in the U.S. experience only to the high-risk but ultimately successful effort to harness nuclear energy in the early 1940's.

This Japanese program differs from the earlier noted frontier R&D efforts by focusing on the nurturing of entire new industries rather than extending existing electronics technology to new applications. The new industries program is intended to develop entire new technologies which will form the foundation for flourishing industries in the 1990's and beyond. Twelve explicit new technology fields have been selected for massive Government R&D funding under this program which will be conducted by 48 Japanese firms organized into 5 research associations. All research costs will be 100 percent covered by Government funds, and 10 Government R&D labs will work with the private industry participants. Patents will be held by MITI and will be available for licensing. The 12 super projects are divided into 3 major areas:

NEW MATERIALS

First, high polymers technology involving high efficiency separation membranes.

Second, high polymers technology involving conductive high polymers.

Third, high polymers technology involving crystalline high polymers.

Fourth, fine ceramics technology.

Fifth, next generation metals technology involving high-performance crystal-controlled alloys.

Sixth, next generation metals technology involving composite materials.

BIOTECHNOLOGY

Seventh, biotechnology involving mass cell cultivation.

Eighth, biotechnology involving bioreactors.

Ninth, biotechnology involving recombinant DNA utilization.

ELECTRONIC DEVICES

Tenth, electronic circuit technology involving superlattice devices.

Eleventh, electronic circuit technology involving three-dimensional circuit cells.

Twelfth, electronic circuit technology involving elements with increased environmental resistance able to function, for example, inside auto engines and atomic reactors.

The Japanese hold out far from modest objectives for these projects, which could take as long as 20 years to reach fruition. For example, the MITI advisers to this new project hope that the electronic and biotech research will yield computers with increasingly humanlike capacities, building on the presumed success in developing a fifth-generation computer with limited artificial intelligence. Mr. President, it sounds like 21st century stuff, yet the Japanese are willing to spend money until the 21st century in order to see if this and other exotic technologies can be developed.

EXPLANATION OF LEGISLATION

I am pleased with the depth and extent of the Japanese national commitment to foster new technologies and to challenge all comers in the future. I am not convinced, however, that the best response by this Nation is to launch a parallel high-tech R&D program here. It may or may not be the wisest course. The past record of our Government in dealing with the private sector is not sufficiently encouraging to warrant an unequivocal answer now. Yet, the really explosive employment implications of the Japanese high technology programs cannot be ignored. For that reason, my legislation being introduced today commits this Nation to a first step, to explore in more detail precisely what policies are being pursued in Japan and other major industrial nations to force-feed high technology R&D. It calls for establishment of a Presidential-level task force on frontier technologies. The TFFT is a study group. It is obligated to gather information on these foreign policies, and evaluate their implications for our economy, employment, and, indeed, our society in the years and decades ahead.

The TFFT is obligated, as well, to work closely with the electronics, biotech, aircraft, and other high technology industries in crafting a comprehensive and thorough report and set of recommendations to Congress. These recommendations, due within a year, are to explore options which Congress could consider for accelerating and improving the efficiency of our Nation's high technology R&D effort. It must catalog such R&D efforts, as well, especially those within the Federal Government. There is literally no place, for example, where a comprehensive summary of all Federal R&D projects in even broad detail is maintained currently.

It is my hope, Mr. President, that Congress will act promptly in passing this measure. It is a first step, a modest first effort to bring order and efficiency to our Nation's high technology R&D efforts, and to assess how Government policies can aid in accelerating such efforts and insure a rosy outlook for high technology employment in the future.

I ask unanimous consent for my bill, the Frontier Technologies Assessment Act, to appear at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 632

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Frontier Technologies Assessment Act."

SECTION 1. SHORT TITLE.

This Act may be cited as the "Frontier Technologies Assessment Act."

SEC. 2. ESTABLISHMENT OF A TASK FORCE ON FRONTIER TECHNOLOGIES.

The President shall appoint a Task Force on Frontier Technologies within 60 days of enactment of this Act.

(A) MEMBERSHIP.

(1) The Vice President of the United States shall serve as Chairman of the Task Force;

(2) The President shall appoint twenty-four (24) members in addition to the Vice President, including representatives from the private sector, academia, and government, four (4) Senators to be appointed by the Majority Leader of the United States Senate and four (4) Congressmen to be appointed by the Speaker of the United States House of Representatives.

(B) TERM.—All members of the Task Force shall serve until the Task Force reports to Congress pursuant to Section 3.

SEC. 3. DUTIES OF TASK FORCE.

The task force shall prepare a report to Congress within one (1) year of the date of enactment of this Act.

(A) THE REPORT SHALL:

(1) Summarize all government programs in technologically mature economies de-

signed to encourage, subsidize, accelerate, or otherwise enhance the pace with which technology research and development occurs;

(2) Evaluate the components and success of such government programs, including any role played by tariffs and other barriers to the free exchange across national boundries of goods and services;

(3) Evaluate in conjunction with representatives of the private sector whether such foreign government programs could and should be adopted for use by the Federal Government;

(4) Provide a detailed review, including stage of development and potential market prospects, for the specific technologies which are the focus of these foreign government programs; and

(5) Evaluate and discuss specific frontier technologies which could form the basis for substantial commercial product lines in the 1990's and beyond, and propose options for exploring the eventual commercial viability of such frontier technologies, involving the Federal Government, the private sector, or academic entities.

(B) CATALOG OF FEDERAL R&D PROGRAMS.—The report shall contain a compilation and summary of all Federal research or development projects, and private projects where feasible, which focus on technologies which are the subject of foreign government programs summarized in paragraph (A)1, or evaluated in paragraph (A)5.

SEC. 4. AUTHORIZATION.

There is hereby authorized to be appropriated such funds as are necessary to carry out the duties of the Task Force established by this Act.

By Mr. GRASSLEY (for himself, Mr. DOLE, and Mr. DENTON):

S. 633. A bill entitled the "Government Accountability Act of 1983"; to the Committee on the Judiciary.

GOVERNMENT ACCOUNTABILITY ACT OF 1983

● Mr. GRASSLEY. Mr. President, I am once again introducing legislation together with Senator DOLE and Senator DENTON, to deal equitably with the serious problem of the increasing number of lawsuits filed against Federal employees in their individual or personal capacities.

In the last Congress I introduced nearly identical legislation to the bill that I am offering today. That bill, S. 1775, was referred to the Judiciary Committee which in turn routed the bill to the subcommittee which I chaired, the Subcommittee on Agency Administration. The Judiciary Subcommittee which I presently chair, the Subcommittee on Administrative Procedure and Practice, has assumed the jurisdiction of my former subcommittee in addition to assuming the jurisdiction of the former Regulatory Reform Subcommittee.

We held three hearings on S. 1775 in the 97th Congress in my subcommittee and reported the bill to the full Judiciary Committee shortly before the lameduck session of Congress. While time was not on our side in the 97th Congress, I intend in this Congress to quickly process this bill and send it to the full committee and Senate floor for consideration.

I had the honor of writing a chapter on the Federal Tort Claims Act for the Free Congress Research and Education Foundation's book, which will be available soon, entitled "Criminal Justice Reform." I believe that this chapter is a helpful analysis of the events that have led to the urgent need for the protections mandated by this legislation and ask that it be printed in the RECORD.

There being no objection, the chapter was ordered to be printed in the RECORD, as follows:

CRIMINAL JUSTICE REFORM

A thirty year veteran forest ranger in the Idaho Panhandle National Forest directs Forest Service employees to remove garbage, rusted bus hulls, and scrap metal from a mining site where it has festered for five years. Prior to implementing the cleanup plans, notice of the removal is provided to the former lessee mining company which delivers no response. The ranger is unaware of a pre-existing agreement that transfers the scrap metal to the plaintiff. Two years after the cleanup, there is a knock on the door and the ranger is greeted with a summons and complaint requesting $48,000 in compensatory damages and $100,000 in punitive damages for violation of the plaintiff's constitutional rights. Three years later, a jury finds against the ranger and awards $1,000 in compensatory damages plus $216.50 in court costs. The appeals process begins.[1]

Federal employees are being increasingly sued for decisions made during the course of a workday. From forest ranger to director of the National Cancer Institute, from meat inspector to cabinet officer, our entire federal workforce is potentially subject to personal liability suits for decisions that are made in carrying out federal missions. Since the Supreme Court's 1971 decision in the case of *Bivens* v. *Six Unknown Named Agents of the Federal Bureau of Narcotics*,[2] federal employees have been subject to personal liability, which translates to money damages, for what the Court termed "constitutional torts". The *Bivens* case arose from a compelling factual setting. Narcotics agents ransacked a citizen's apartment, arrested and manacled him in front of his wife and family, and ushered him to a federal courthouse where he was interrogated, booked, and subjected to a visual strip search. This internment was effectuated without probable cause for a search warrant.

Most constitutional torts arise in a much more mundane setting. While immediately following the *Bivens* decision these actions arose in the context of law enforcement, they increasingly have arisen in the realm of regulatory or personnel actions taken by federal employees.[3]

The Department of Justice estimates that there are at present over two thousand lawsuits pending against federal employees in their individual capacities for alleged violations of constitutional rights. That number is conservative as it relates to actual numbers of federal employees involved in pending litigation because multiple defendants are sued in nearly seventy-five percent of all cases[4] and some cases involve as many as thirty to forty-five defendants.[5] The Department further estimates that since 1971 there have been approximately ten thousand lawsuits lodged against federal employees. Of that total, only fifteen have resulted in judgments for plaintiffs.

As Chairman of the Senate Subcommittee on Agency Administration, I have conducted three hearings on legislation which I introduced in response to what I view as a terribly unfair and unproductive situation. While a federal employee embroiled in litigation undergoes untold anguish, it is the taxpayer who is the ultimate loser in this process; and a triple loser to boot. Taxpayer monies are spent defending employees for what often amount to harassment suits. Taxpayer monies are spent paying employees who are too intimidated by threats of litigation or ensuing litigation to effectively and innovatively carry out their designated functions. Taxpayer monies are spent in paying private attorneys fees resultant from the Department of Justice's policy of hiring outside private counsel where its own representation of a federal employee might produce a conflict of interest.

My legislation is fashioned to make the best use of taxpayer funds while at the same time insuring adequate compensation to a plaintiff whose constitutional rights have been violated. So often is the case, that even if a plaintiff wins a suit, the defendant is judgment proof. The government will be substituted as the exclusive defendant in all constitutional actions and generally the exclusive defendant in all tort suits in which the Attorney General certified that the employee was acting within the scope of his employment. Hence the Department of Justice will no longer have to excuse itself from suits and hire private counsel to avoid conflicts of interest. In addition the employee will no longer be deterred from carrying out his federal duties.

Testimony, both from federal employees who have been sued and from Assistant U.S. Attorneys who have defended federal employees, indicates that the numbers of sued employees are but a statistical guage of the anguish, fear, and betrayal that a federal employee experiences when he has been personally sued for actions taken to enforce the laws of the United States. Stress and anxiety are not easily allayed by even the most competent of U.S. Attorneys. As one employee in the throes of litigation put it:

"To say that this left a residual fear in my mind is to put it lightly. I was concerned. I was worried . . . I have mild angina and, by gosh, I found I wasn't having mild angina. I was having chest pains frequently at night. I would wake up with chest pains. I went to see my doctor and he said, 'Oh yes.' He said, 'that's the standard thing. You get a high anxiety level and you get chest pains from angina. I guess I'd better give you sleeping pills.' So for the first time in my life I was taking sleeping pills."[6]

An action that threatens an employee's personal and professional assets potentially affects the quality of his life, not to mention his mental health.

Under Department of Justice procedures, a federal employee is provided with representation in state criminal proceedings and in civil and congressional proceedings in which he is sued or subpoenaed in his individual capacity. Representation is not provided in connection with federal criminal proceedings. Upon receipt of an agency's notification of request for counsel, either the Civil Division, the Civil Rights Division, the Criminal Division, the Lands and Natural Resources Division or the Tax Division de-

---

[1] Footnotes at end of chapter.

termines whether the employee was acting within the scope of his employment and whether providing representation is in the interest of the United States. The employee is informed from the outset of the action that in no event will the government pay any judgment rendered against the employee.[7] Likewise, a settlement prior to the adjudication of a claim is paid by the employee.

Where conflicts of interest are not apparent and private representation is unnecessary, representation is afforded to employee defendants by Assistant United States Attorneys. These attorneys are in the best position to observe the practical effects of the current system of liability. They have a firsthand view of the employee's reaction to his dilemma and are aware of what kind of time and hence what kind of money is spent in defending these suits. Testimony from two former and two present U.S. Attorneys point out that representation of a government employee is fraught with conflict of interest potential from the outset.[8] Afterall, a U.S. Attorney's first loyalty is to the United States; his obligation to the employee's interest must come second. As one United States Attorney put it:

"In many instances the Government may prefer to take the risk of losing a substantial judgment rather than disclosing confidential information that could justify the agents' action. An agent who pictures his life savings being wiped out, if a substantial judgment is awarded him, will be seriously disheartened, if he learns that the Government is refusing to release information which would provide him with a complete defense." [9]

Morale problems are likely to result from a situation in which an employee follows the directive of his employer, in this case the United States, and yet cannot be indemnified by that employer if his conduct is found to exceed constitutional bounds.

The Federal Tort Claims Act was enacted in 1946, largely due to Congressional discomfort with the doctrine of sovereign immunity. That doctrine is predicated on the common law theory that the king can do no wrong and therefore cannot be sued in his own courts.[10] The United States waived its immunity with respect to general liability for negligent tortious conduct on the part of governmental agents. Prior to the enactment of the Act, individuals seeking redress from the federal government for the commission of torts by its employees were forced to address their complaints to Congress, which had the power to enact a private relief bill for the individual. Congress enacted the Federal Tort Claims Act as a means of relieving itself from the burden of considering the merits of a plethora of individual tort claims.

With the advent of the Federal Tort Claims Act, the United States was liable for torts "in the same manner and to the same extent as a private individual under like circumstances."[11] Nevertheless, this general waiver excludes claims "based upon the exercise or performance or the failure to exercise or perform a discretionary function or duty on the part of a federal agency or an employee of the Government, whether or not the discretion involved be abused."[12] While Congress has enacted several specific provisions that substitute the government for individual liability for a number of employee groups, the basic language of the Act gives the plaintiff an election to sue either the defendant employee or the government.

Since 1946, there has been no comprehensive review of the Federal Tort Claims Act. There has, however, been a series of Supreme Court decisions that have sanctioned suits filed at every level of government for alleged constitutional infringements. This line of cases, beginning with the Court's seminal decision in *Bivens v. Six Unknown Named Agents of the Federal Bureau of Narcotics*,[13] underlies the creation of a personal remedy against an individual—commonly known as a *Bivens* action.

In *Bivens*, the Court recognized individual employee liability for violation of a citizen's fourth amendment rights. Against the backdrop of the Attica prison unheaval in New York, the May Day arrests in Washington, and the Collinsville raids in Illinois, Congress legislated a partial response to the *Bivens* decision. Congress amended the Federal Tort Claims Act to allow a suit to be brought against the U.S. for acts of assault, battery, false arrest, malicious prosecution and other similar wrongs committed by federal investigative agents.

While this amendment did much to alleviate the impact of the *Bivens* decision on "investigative or law enforcement officers of the United States government," which was defined to mean "any officer of the United States who is empowered by law to execute searches, to seize evidence or to make arrests for violations of federal law," [14] it did nothing to lessen the impact of subsequent decisions on federal employees. For example, in the 1978 term the Court allowed a fifth amendment suit against a member of Congress [15] and in the 1979 term the Court extended the ambit of *Bivens* to an eighth amendment suit against prison officials.[16] So, while initially constitutional tort actions were lodged against law enforcement agents under the fourth amendment, the Court has expanded its recognition of constitutional torts beyond those for violation of the fourth amendment to violations of the fifth and eighth amendments. Lower courts have applied the *Bivens*-based cause of action to suits involving violations of the first, fifth, sixth, eighth, ninth, thirteenth, and fourteenth amendments.[17] This expansion has changed the character of suits that have been brought from those affecting law enforcement activities to those primarily directed at regulatory and personnel decisions.

A recurring theme throughout all the relevant Supreme Court decisions is that the Court is acting only in lieu of Congressional action. That action appears to be the best short term solution to a longstanding problem of employee liability.

Congress' failure to enact legislation to remedy the deficiencies of the *Bivens* decision has not been for want of trying. Indeed, as early as 1973, legislation was proposed that would make the United States exclusively liable for the constitutional and common law torts of its employees, but it was the enactment of the 1974 amendments to the Act that ultimately emerged as law.

In the 95th Congress, different versions of a bill were approved by Subcommittees of both chambers but were never reported out of the respective full Judiciary committees for floor action. In the 96th Congress, the legislation failed to progress out of either Judiciary Subcommittee.

The current legislative effort portends to be the most successful; a controversial aspect of former bills has been eliminated. In past bills, no consensus could be reached as to what form of administrative discipline should be applied to tortious employees.

Currently, there is a recognition that to attempt to legislate one mandatory disciplinary standard for every agency to follow is impracticable. Instead under the provisions of both the Senate and House bills, if a constitutional tort suit results in a judgment against the United States, or an award, compromise, or settlement paid by the United States, the Attorney General must forward the matter to the head of the department or agency which employed the individual for appropriate administrative or disciplinary action. Shedding the disciplinary proceeding from the bill in favor of utilizing an agency's own internal disciplinary mechanism has been a boost for both the bills' chances of passage; but a number of polemical issues still remain.

Traditionally the major proponent of this legislation has been the law enforcement community. Opposition to the concept has been principally voiced by the American Civil Liberties Union. While these two groups are closer to a compromise than ever before, there is still controversy over a provision allowing the United States to assert any defense available to the employee, which includes a qualified immunity known as the "good faith defense." The Department of Justice labels the defense as a crucial provision of the bill:

"It really goes to the merits of the plaintiff's claim by testing the action of an employee against the standard of reasonableness and good faith. We also think that taxpayers' funds, funds out of the U.S. Treasury, should not be paid out for actions taken in good faith. And when you bear in mind that any payment of a claim carries with it the threat, in effect, of a disciplinary action against the employee later, it would be self-defeating if you were going to make payments where the employee has acted in good faith because it seems clear that there should be no disciplinary proceedings under such circumstances.

"And certainly no employee wants to be found "guilty," if you will, of unconstitutional acts and suffer the resulting stigma. So that, even where the United States and not the employee would be the defendant, our view is that employees would be discouraged from acting in uncertain areas where they might subject the Government to financial liability. We should not deter employees from acting in good conscience and in good faith and from being courageous, particularly in the law enforcement and other essential areas of Government activities." [18]

It is a defense worth preserving particularly in light of a recent Supreme Court decision. Past decisions of the Supreme Court have established the good faith defense as containing a subjective requirement of a good faith belief in the validity of one's actions as well as an objective requirement of reasonableness. "The official himself must be acting sincerely and with a belief that he is doing right," [19] and that belief must be reasonable. Whether reasonable good faith exists is a factual question that places the burden of proof on the government employee.

The Supreme Court's most recent formulation of the good faith defense in *Harlow et. al.* v. *Fitzgerald*,[20] alters the traditional two tiered test in favor of soley an objective qualified defense. The Court considered the scope of immunity available to senior aides and advisers of the President in civil tort actions based upon their official acts in *Harlow*. After considering past immunity decisions and noting the *Bivens* adage that "an action for damages may offer the only realistic avenue for vindication of constitu-

tional guarantees" [21] the Court went on to state:

"It is this recognition that has required the denial of absolute immunity to most public officers. At the same time, however, it cannot be disputed seriously that claims frequently run against the innocent as well as the guilty—at a cost not only to the defendant officials, but to the society as a whole. These social costs include the expenses of litigation, the diversion of official energy from pressing public issues, and the deterrence of able citizens from acceptance of public office. finally, there is the danger that fear of being sued will 'dampen the ardor of all but the most resolute, or the most irresponsible (public officials), in the unflinching discharge of their duties.' "[22]

The Court concluded that the subjective test of the good faith defense "has proved incompatible with our admonition in *Butz* that insubstantial claims should not proceed to trial." [23] The Court found the intensive discovery that accompanies an inquiry into the subjective intent of a defendant to be burdensome to effective government.

The elimination of the subjective element of the good faith defense is a great boon to the insulation of the employee from time consuming discovery. Testimony from the American Civil Liberties Union concluded that individuals would spend as much time in court attempting to validate their good faith belief if the government was substituted as they would spend if they were being personally sued.[24] This decision mandates that the limits of the qualified immunity be defined in objective rather than subjective terms, thus bolstering the aim of allowing the public official to conscientiously perform his mission unburdened by litigation.

If the good faith defense is waived, we are faced with a strict liability situation in every case where even a technical infringement occurs. Every criminal defendant, even if convicted, who wins a motion to suppress evidence may receive automatic liquidated damages of at least $1,000 as provided by the legislation. Without access to the knowledge that the employee was acting with a good faith belief in the propriety of his action, it would be more difficult both for the Department of Justice and the Agency to discern real offenders because of the vast number of cases requiring automatic payment. Retention of the defense is a disincentive to the blank check theory of award and ensures that the plaintiff will receive a day in court to relate his version of the employee's conduct. Furthermore, the employee will, in turn, have an opportunity to defend his conduct in public. Finally, it must be noted that under the common law, the principal or employer sought to be held liable has always been able to raise the defenses of his agent.[25] The United States should be entitled to the same defenses as any employer.

Aside from opposition to incorporation of the good faith defense, a traditional objection to exclusive governmental liability is that it somehow disregards the elements of personal fault. It is felt that "the current law creates a significant incentive for compliance with constitutional rights because individual federal employees have a substantial fear of having to pay judgments and attorneys fees in lawsuits against them". [26] Yet as Chief Justice Burger noted in his *Bivens* dissent with reference to the exclusionary rule's effect on law enforcement officers, there is no empirical evidence to support the claim that the rule actually deters illegal conduct of government employees.[27] The forest ranger mentioned at the outset of this discussion testified at a Senate hearing that the lawsuit had an effect on his ability to make independent decisions:

"The unsettled suit has been an omnious cloud over my personal and financial situation for over 8 years. Even worse than the possible financial damage, is the uneasy feeling I get each time that I make a decision.

"I have forced myself to cope with this situation so that I can carry on my duties and responsibilities as a Federal manager, but it has not been easy. Litigation of the type I have experienced cannot help but affect decisions by me and other Forest Service employees close to the case.

"In the case that I have just described, the plaintiff is still operating on the Red Ives Ranger District. Each year I am faced with several decisions regarding his business operations on the Forest.

"One of the greatest anxieties in my case was the uncertainty at various points of wondering if the Government would continue to pay for the counsel who represented me or whether I might be forced to retain a private attorney." [28]

Some employees are blissfully unaware of their liability for decisions made in the scope of their employment. Those who are aware of potential liability are more than likely not so much deterred from taking illegal action as they are deterred from the legitimate objectives of a career.

Spokesmen for federal employee unions are quick to note that the effect of an adverse judgment on an employee's reputation is very much of a strong deterrent to misconduct.[29] A full range of disciplinary actions are available to underscore an employee's guilt. An employee may be discharged, demoted in grade, debarred from all Federal employment for a period not to exceed five years, suspended, reprimanded, or assessed a civil penalty.[30]

In summary, a grant of personal immunity for federal employees is needed to remedy a system that, perhaps because of an increasingly litigious bent, hinders rather than encourages production from its federal workforce. It is in society's interest, our interest, to see that the day's labor for the honest and conscientious federal employee is unthreatened by vexatious lawsuits. Such lawsuits, in the final analysis affect the quality of our government and the quality of our lives.

Mr. GRASSLEY. Mr. President, I cannot emphasize strongly enough how important this legislation is to an effective governing process. I urge all of my colleagues to support this bill and I ask that it be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 633

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

That subsection (b) of section 1346 of title 28, United States Code, is amended—

(1) by inserting "(1)" after "jurisdiction of"; and

(2) by striking out the period at the end thereof and inserting in lieu thereof ", or (2) civil actions on claims against the United States, for money damages, sounding in tort arising under the Constitution of the United States for injury or loss of property, or personal injury or death, caused by an act or omission of any employee of the Government while acting within the scope of his office or employment, such liability to be determined in accordance with applicable Federal law.".

SEC. 2. Section 2672 of title 28, United States Code, is amended in the first paragraph—

(1) by inserting "(1)" after "United States" the first place it appears;

(2) by striking out the colon after "occurred" and inserting in lieu thereof ", or (2) for claims for money damages sounding in tort arising under the Constitution of the United States for injury or loss of property, or personal injury or death, caused by an act or omission of any employee of the Government while acting within the scope of his office or employement, such liability to be determined in accordance with applicable Federal law:"; and

(3) by inserting "or any award, compromise, or settlement based on a claim arising under the Constitution of the United States" after "25,000".

SEC. 3. Section 2674 of title 28, United States Code, is amended—

(1) by striking out the comma after "claims" in the first paragraph and inserting in lieu thereof "other than those arising under the Constitution of the United States,";

(2) by inserting "(a)(1)" at the beginning of the first paragraph;

(3) by inserting "(2)" at the beginning of the second paragraph; and

(4) by adding at the end thereof the following new subsection:

"(b)(1) The United States shall be liable, respecting the provisions of this title relat-

ing to tort claims arising under the Constitution of the United States, to the extent recognized or provided by applicable Federal law, and shall be entitled to all defenses heretofore available to an employee of the United States and to which the United States would otherwise be entitled. The United States shall not be liable for interest prior to judgement or for punitive damages.

"(2) Damages in any such case shall be the greater of (A) actual damages or (B) liquidated damages of $1,000 or, in the case of a continuing tort, $100 a day for each day of violation up to a maximum of $15,000.".

SEC. 4. Subsection (a) of section 2675 of title 28, United States Code, is amended by striking out the comma after "employment" and inserting in lieu thereof "or upon a claim against the United States for money damages for a tort arising under the Constitution of the United States caused by an act or omission of any employee of the Government while acting within the scope of his office or employment,".

SEC. 5. (a) Subsection (b) of section 2679 of title 28, United States Code, is amended to read as follows:

"(b) The remedy against the United States provided by sections 1346(b) and 2672 of this title for claims for injury or loss of property or personal injury or death resulting from the negligent or wrongful act or omission of any employee of the Government while acting within the scope of his office or employment and for claims arising under the Constitution of the United States for an act or omission of any employee of the Government while acting within the scope of his office or employment, is exclusive of any other civil action or proceeding arising out of or relating to the same subject matter against the employee whose act or omission gave rise to the claim, or against the estate of such employee, and shall also be deemed an equally effective substitute for any recovery against the employee in his individual capacity directly under the Constitution.".

(b) Subsection (d) of such section is amended to read as follows:

"(d)(1) Upon certification by the Attorney General that the defendant employee was acting within the scope of his office or employment at the time of the incident out of which the action arose, any such civil action or proceeding commenced in a United States district court shall be deemed an action against the United States under the provisions of this title and all reference thereto, and the United States shall be substituted as the party defendant. After substitution, the United States shall have available all defenses heretofore available to the employee and all defenses to which it would have been entitled if the action had originally been commenced against the United States under this chapter and section 1346(b) of this title.

"(2) Upon certification by the Attorney General that the defendant employee was acting within the scope of his office or employment at the time of the incident out of which the action arose, any such civil action or proceeding commenced in a State court shall be removed without bond at any time before trial by the Attorney General to the district court of the United States for the district and division embracing the place wherein it is pending. Such action shall be deemed an action brought against the United States under the provisions of this title and all references thereto, and the United States shall be substituted as the party defendant. After substitution, the United States shall have available all defenses heretofore available to the employee and all defenses to which it would have been entitled if the action had originally been commenced against the United States under this chapter and section 1346(b) of this title. The certification of the Attorney General shall conclusively establish scope of office or employment for purposes of removal.

"(3) The certification by the Attorney General under subsection (d) (1) or (2) that the defendant employee was acting within the scope of his office or employment shall be binding and conclusive, except that in the event that the Attorney General has not certified scope of office or employment, the employee may at any time before trial petition the court to find and certify that the employee was acting within the scope of his office or employment. A copy of the petition shall be served upon the United States in accordance with the provisions of rule 4(d)(4), Federal Rules of Civil Procedure. In the event the petition is filed in a civil action or proceeding pending in a State court, the action or proceeding shall be removed without bond by the Attorney General to the district court of the United States for the district and division embracing the place wherein it is pending. Should the district court determine that the employee was not acting within the scope of his office or employment, the action or proceeding shall be remanded to the State court.

"(4) Where a civil action or proceeding under this chapter is precluded because of the availability of a remedy, compensation, or other benefits from the United States as provided by any other law, the action or proceeding shall be dismissed but in that event, the running of any limitation of time for commencing or filing an application or claim in a proceeding for any other such remedy, compensation, or benefits shall be suspended during the pendency of the civil action or administrative proceeding under this chapter.

"(5) Whenever an action brought against a defendant employee in which the United States is substituted as the party defendant under this subsection is dismissed for failure first to present a claim to the appropriate Federal agency pursuant to section 2675(a) of this title, the claim shall be deemed to be timely presented under section 2401(b) of this title, if (A) the claim would have been timely if filed on the date the action against the defendant employee was commenced, and (B) the claim is presented to the appropriate Federal agency within sixty days after dimissal of the action.".

(c) Such section is further amended by adding at the end thereof the following new subsection:

"(f) If a civil action or proceeding under section 1346(b) or 2672 of this title arising under the Constitution of the United States results in a judgment against the United States or an award, compromise, or settlement paid by the United States, the Attorney General shall forward the matter to the head of the department or agency which employed the employee at the time of the act or omission for such further administrative investigation or disciplinary action as may be appropriate.".

SEC. 6. (a) Section 2680 of title 28, United States Code, is amended—

(1) by striking out the section heading and inserting in lieu thereof the following:

"**§ 2680. Exceptions; claims not arising under the Constitution of the United States**";

(2) by inserting ", relating to tort claims other than those arising under the Constitution of the United States," in the first paragraph immediately after "title"; and

(3) by amending subsection (h) to read as follows:

"(h) Any claim arising out of libel, slander, misrepresentation, deceit, or interference with contract rights.".

(b) The item relating to section 2680 in the table of sections at the beginning of chapter 171 of title 28, United States Code, is amended to read as follows:

"2680. Exceptions; claims not arising under the Constitution of the United States."

SEC. 7. (a) Chapter 171 of title 28, United States Code, is amended by adding at the end thereof the following new section:

"**§ 2681. Exceptions; claims arising under the Constitution of the United States**

"The provisions of this chapter and of section 1346(b) of this title which relate to tort claims arising under the Constitution of the United States shall not apply to actions arising from the activities of the Tennessee Valley Authority, the Panama Canal Company, a Federal land bank, a Federal intermediate credit bank, or a bank for cooperatives.".

(b) The table of sections at the beginning of chapter 171 of title 28, United States Code, is amended by adding at the end thereof the following new item:

"2681. Exceptions; claims arising under the Constitution of the United States."

SEC. 8. (a)(1) Subsections (a) through (d) of section 4116 of title 38, United States Code, are repealed.

(2) Subsection (e) of such section is amended—

(A) by striking out "(e)";

(B) by striking out "person to whom the immunity provisions of this section apply (as described in subsection (a) of this section)," and inserting in lieu thereof "employee of the Veterans' Administration"; and

(C) by striking out "Department of Medicine and Surgery" and inserting in lieu thereof "Veterans Administration".

(b)(1) Subsections (a) through (e) of section 224 of the Public Health Service Act (42 U.S.C. 233) are repealed.

(2) Subsection (f) of such section is amended by striking out "(f)".

(c)(1) Subsections (a) through (e) of section 1089 of title 10, United States Code, are repealed.

(2) Subsection (f) of such section is amended by striking out "person described in subsection (a)" and inserting in lieu thereof "employee of the Armed Forces, the Department of Defense, the United States Soldiers' and Airmen's Home, or the Central Intelligence Agency".

(3) Subsection (g) of such section is amended—

(A) by striking out "and" at the end of clause (2);

(B) by redesignating clause (3) as clause (4); and

(C) by inserting after clause (2) the following new clause:

"(3) the Governor of the United States Soldiers' and Airmen's Home, in the case of an employee of the United States Soldiers' and Airmen's Home; and".

(4) Subsections (f) and (g) of such section are redesignated as subsections (a) and (b), respectively.

(d)(1) Subsections (a) through (e) of section 307 of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2458a) are repealed.

(2) Subsection (f) of such section is amended—

(A) by striking out "(f)"; and

(B) by striking out "person described in subsection (a)" and inserting in lieu thereof "employee of the National Aeronautics and Space Administration".

(e)(1) Subsections (a) through (e) of section 1091 of the Foreign Service Act of 1946 (22 U.S.C. 817) are repealed.

(2) Subsection (f) of such section is amended by striking out "person to whom the immunity provisions of subsection (a) of this section apply," and inserting in lieu thereof "employee of the Department of State (including the Agency for International Development)".

(3) Subsections (f) and (g) of such section are redesignated as subsections (a) and (b), respectively.

SEC. 9. Section 2520 of title 18, United States Code, is amended by adding at the end thereof the following new sentence: "This section shall not apply to any civil cause of action against an officer or employee of the United States while acting within the scope of his office or employment.".

SEC. 10. Section 1810 of title 50, United States Code, is amended by adding at the end thereof the following new sentence:

"This section shall not apply to any civil cause of action against an officer or employee of the United States while acting within the scope of his office or employment."

SEC. 11. (a) Except as provided in subsection (b), the amendments made by this Act shall apply to all claims, civil actions and proceedings pending on, or filed on or after, the date of enactment of this Act.

(b)(1) With respect to any civil action or proceeding pending on the date of enactment against a Federal employee in his individual capacity, the plaintiff may, upon timely demand, (A) retain his right to a trial by jury if the demand for trial by jury is made prior to or on the date of enactment, or (B) elect a trial by jury if the time for election of a trial by jury pursuant to applicable law has not expired as of the date of enactment, except that in any case in which a trial by jury is elected under this paragraph, the provisions of section 2674(b) of this title, as added by section 3 of this Act, which relate to liquidated damages, shall not apply.

(2) With respect to any civil action or proceeding pending against a Federal employee in his individual capacity on appeal, or pending against a Federal employee in his individual capacity in a State court in which the time for removal pursuant to section 2679(d) of this title has expired, the amendments made by this Act shall not apply, except that the United States shall be substituted for the defendant employee upon certification by the Attorney General that the defendant employee was acting within the scope of his office or employment at the time of the incident out of which the action or proceeding arose.

(3) The provisions of section 2675(a) of this title shall not apply to a civil action or proceeding against a Federal employee in his individual capacity pending on the date of enactment of this Act, if the provisions of section 2675(a) were inapplicable to the action or proceeding when filed.●

By Mr. HART:

S. 634. A bill to provide for the establishment of revitalization areas in distressed areas, to amend the Internal Revenue Code of 1954 to provide tax incentives for development in revitalization areas, and for other purposes; to the Committee on Finance.

COMMUNITY ASSISTANCE AND REVITALIZATION ACT OF 1983

Mr. HART. Mr. President, today, I am introducing the Community Assistance Revitalization Act of 1983 (CARA). This legislation would amend the Internal Revenue Code of 1954 to encourage the development of businesses in our Nation's distressed communities.

At the outset, it must be clear that CARA is no substitute for a comprehensive urban policy, and I oppose any attempts by the administration to make enterprise zone legislation such a substitute. CARA should be viewed as just one part of a concerted community revitalization effort and is designed to complement the Federal participation in the economic revitalization of our cities.

A COMMUNITY-BASED ENTERPRISE ZONE

In his state of the Union address last year, President Reagan again expressed the administration's intent to propose enterprise zone legislation this year. Enterprise zone legislation could not be for a better purpose—encouraging businesses to locate or expand in distressed communities, and thus provide jobs for disadvantaged residents and a stronger, local economic base—and I look forward to vigorous debate on this legislation. I strongly believe, however, there is a much better approach to enterprise zone legislation than the administration has taken.

Congressman PARREN MITCHELL and I have been working on an innovative alternative to the administration's proposal, and the bill I am introducing today represents our combined efforts. Congressman MITCHELL and I believe the priorities of the administration's approach need to be substantially altered if enterprise zone legislation is to meet its original, stated purpose of community revitalization.

The administration's approach relies on tax incentives to businesses to induce them to invest in depressed areas. Our proposal begins with the concept of tax incentives but goes beyond the administration to insure that the community and the business benefit directly and immediately from the CARA program.

We believe that any enterprise zone legislation that emerges from Congress should be designed so that the primary beneficiaries are the community residents themselves—people, the real victims of distressed communities. Our bill would substitute for the administration's trickle-down approach a percolate-up approach. Only if enterprise zone legislation stresses the human side of the equation—giving community residents not dead-end, cheap labor jobs, but instead a real share of the benefits—can the effectiveness and success of our community revitalization efforts be assured.

THE NEED FOR AN URBAN POLICY

Our cities are a national treasure. They deserve a steadfast Federal commitment. Cutbacks in Federal aid by this administration have had and continue to have a devasting effect on cities and communities throughout the country. I will continue to oppose these cuts and work hard to promote a strong and effective Federal approach to urban assistance, housing and income security. There are several specific steps the Congress should take this year. First, we should preserve the urban development action grants (UDAG) and community development block grants (CDBG) programs which have planted seeds for community revitalization. Second, the Congress should reauthorize the general revenue sharing program. Third, we need a long-term commitment to rebuilding the Nation's industrial infrastructure. Fourth, there is a real need for effective retraining of displaced workers and the long-term unemployed. Finally, we have to recognize that no city is an island safe from the vicissitudes of the national economy. The President has got to abandon his past programs and adopt an overall economic policy that will put us on the path to short-term revitalization and long-term growth.

THE COMMUNITY ASSISTANCE REVITALIZATION ACT OF 1983

CARA contains a number of components. On the business side, to achieve job creation CARA targets tax incentives to minority and small businesses—the greatest source of jobs. To increase the availability of the front-end capital necessary as startup costs for small businesses, CARA offers expensing, which is an immediate deduction of up to $10,000 for investors in community revitalization. CARA also promotes establishment of entrepreneurship development centers (EDC's) to provide the technical, managerial, and financial services to small businesses in need of them.

As stated before, in order to best serve the long-term interests of distressed communities, Congressman MITCHELL and I believe community residents must have a major economic share in community businesses. CARA embodies this belief. To increase productivity and competition, and to help businesses pool resources, survive and remain independent, ownership of businesses must be available to zone residents. Our bill provides numerous incentives for establishing employee stock ownership programs (ESOP's). Community residents are also provid-

ed the opportunity to influence real estate development in their community through the General Stock Ownership Corporation (GSOC) already authorized at the State level. Promoting resident equity in this way assures the community's active guidance of their redevelopment and the community's share of its resulting economic benefits.

CARA should not be seen as cure for all the ills that plague distressed communities. It can be an integral part of a comprehensive revitalization program which our distressed communities sorely need. As an innovative alternative to the administration's enterprise zone legislation CARA seeks to draw on the mutual interests of community residents, local businesses, and government. It employs traditional conservative economic strategies to achieve the traditional liberal goals of greater economic democracy and equal opportunity.

The search for new solutions for our distressed communities must go on. CARA is part of this search; it should be seen as another example of the Federal Government's commitment to investing in our common future.

I ask unanimous consent that the following items—summary, text, and section-by-section analysis—appear in the RECORD at the conclusion of my statement.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 634

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; ETC.

(a) SHORT TITLE.—This Act may be cited as the "Community Assistance and Revitalization Act of 1983".

(b) TABLE OF CONTENTS.—

Sec. 1. Short title; etc.

TITLE I—DESIGNATION OF REVITALIZATION AREAS

Sec. 101. Revitalization area defined; general rules.
Sec. 102. Preliminary approval of designation.
Sec. 103. Final approval of designation.
Sec. 104. Definitions and special rules.
Sec. 105. Coordination with other Federal programs.
Sec. 106. Job training preferences.

TITLE II—TAX INCENTIVES

Subtitle A—Definition of Revitalization Area Business

Sec. 201. Definition of revitalization area business.

Subtitle B—Incentives for Employee Ownership

Sec. 211. Employee ownership credit.
Sec. 212. Nonrecognition of gain on certain sales of stock of revitalization area business to employee plans.

Subtitle C—Incentives for Investments in Revitalization Areas

Sec. 221. Rollover of gain on the sale of property where reinvestment in certain revitalization area business property.
Sec. 222. Investment credit for certain low-income rental housing.
Sec. 223. Investment credit for establishment of entrepreneurial development center.

Subtitle D—Incentives for Revitalization Area Businesses

Sec. 231. Credit for employment of qualified employees.
Sec. 232. Deduction for certain income attributable to businesses operating in revitalization areas.
Sec. 233. Expense deduction for revitalization area business stock and debentures.
Sec. 234. Direct loans under section 7(a) of the Small Business Act to revitalization area businesses.

Subtitle E—Expansion of Targeted Jobs Credit

Sec. 241. Amendments to targeted jobs credit.

Subtitle F—Effective Date

Sec. 251. Effective date.

TITLE III—GENERAL STOCK OWNERSHIP PROVISIONS

Sec. 301. Establishment of revitalization area GSOC.
Sec. 302. Definition of revitalization area GSOC
Sec. 303. Contributions to GSOC treated as charitable contributions.
Sec. 304. Nonrecognition of the gain from sale or exchange of property to a revitalization area GSOC.

TITLE IV—ENERGY PROVISIONS

Sec. 401. Increase in the limit on contributions attributable to principal payments.
Sec. 402. Deductibility of certain dividend distributions from employee stock ownership plans and qualification for partial exclusion from income.
Sec. 403. Certain contributions to ESOP treated as charitable contributions.
Sec. 404. Effective date.

TITLE V—EMPLOYEE STOCK OWNERSHIP PROVISIONS

Sec. 501. Residential energy credit.
Sec. 502. Increase in energy investment tax credit for revitalization area businesses.

(c) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

(d) FINDINGS.—The Congress finds and declares that—

(1) an important way to create jobs in distressed areas is by stimulating business activity there and creating a favorable lending and investment climate; and

(2) economic development in a distressed area is most effective, beneficial, and fair when it is community based, undertaken with the participation of residents and with the aim of increasing their economic share and stake in the community.

(e) PURPOSES.—The purposes of this Act are—

(1) to provide incentives for investors, lenders, and business owners to make more capital available to business enterprise, especially small firms and businesses with broad capital ownership, which locate in distressed areas;

(2) to provide infrastructural support and decrease various burdens, including tax liabilities, for small businesses, especially those with broad capital ownership which locate in distressed areas; and

(3) to provide mechanisms for increasing the economic stake of revitalization area residents in their own community and its development, and for passing along business tax advantages to employees and residents through incentives for job-training, employee ownership, and resident-owned development corporations.

TITLE I—DESIGNATION OF REVITALIZATION AREAS

SEC. 101. REVITALIZATION AREA DEFINED; GENERAL RULES.

(a) REVITALIZATION AREA DEFINED.—For purposes of this Act, the term "revitalization area" means any area in the United States or its possessions if—

(1) such area is nominated as such by the State government (for the State in which such area is located) for purposes of this section, and

(2) the Secretary, after consultation with the Secretaries of Commerce, Labor, and the Treasury and the Administrator of the Small Business Administration, gives final approval of such nomination and designates such area as a revitalization area.

(b) PERIOD FOR WHICH DESIGNATION IS IN EFFECT.—

(1) IN GENERAL.—Any designation of an area as a revitalization area shall remain in effect during the 20-year period beginning on the date of the designation unless the Secretary revokes such designation under paragraph (2).

(2) REVOCATION OF DESIGNATION.—The Secretary, after consultation with the officials described in subsection (a), may revoke any designation of an area only if the Secretary—

(A) determines that the participating local government is not substantially complying with the revitalization area development plan submitted with respect to such area under section 102(c), and

(B) provides, before revocation, reasonable notice and an opportunity for a hearing to such government.

(c) PERIOD DURING WHICH DESIGNATIONS MAY BE MADE.—

(1) IN GENERAL.—The Secretary may designate areas as revitalization areas during the period beginning on January 1, 1984, and ending on December 31, 1993.

(2) LIMITATION ON NUMBER OF AREAS DESIGNATED BEFORE 1989.—For calendar years 1984 through 1988, the Secretary shall designate the following number of revitalization areas:

(A) 1984: 30.
(B) 1985: 30.
(C) 1986: 35.
(D) 1987: 45.
(E) 1988: 65.

(d) NOMINATION BY LOCAL GOVERNMENT.—The nomination of an area as a revitalization area by a local government shall satisfy the requirement of subsection (a)(1) if the State government has failed to nominate such area under this section within 60 days after the date on which the local government requested the State to so nominate such area.

(e) REPORT.—Not later than the close of the 4th calendar year after the year during which an area is designated a revitalization area, and at the close of each 4th calendar year thereafter, the Secretary shall prepare

and submit to the Congress a report on the effects of such designation in attracting business, providing jobs, and improving the welfare of residents.

SEC. 102. PRELIMINARY APPROVAL OF DESIGNATION.

(a) IN GENERAL.—The Secretary may give preliminary approval of an area as a revitalization area only if—

(1) the requirements of paragraphs (1), (2), and (3) of subsection (b) are met with respect to such area,

(2) the participating local government—

(A) prepares a revitalization area development plan,

(B) has established a revitalization area management authority, and

(C) has consulted residents, businesses, and quasi-public and private organizations (such as community development corporations and resident-owned development corporations) located in such area with respect to such designation, plan, and management authority, and

(3) the government nominating such area under section 101 submits to the Secretary such plan and such other information as the Secretary may by regulations prescribe.

(b) AREA REQUIREMENTS.—

(1) IN GENERAL.—An area meets the requirements of this paragraph only if—

(A) the area is within the jurisdiction of the participating local government,

(B) the boundary of the area is continuous and includes, if feasible, proximately located vacant or underutilized lands or buildings which are conveniently accessible to residents of the area,

(C) the area—

(i) has a population which, as determined under the most recent census, is at least—

(I) 4,000 if any portion of such area is located within a standard metropolitan statistical area (within the meaning of section 103A(1)(4)(B) of the Internal Revenue Code of 1954) with a population of 50,000 or greater, or

(II) 2,500 in any other case, or

(ii) is an Indian reservation (as determined by the Secretary of the Interior), and

(D) the area comprises at least 1 square mile.

(2) PERVASIVE POVERTY, ETC.—An area meets the requirements of this paragraph if the Secretary determines the area is one of pervasive poverty, unemployment, and general distress.

(3) UNEMPLOYMENT, POVERTY, ETC. REQUIREMENTS.—An area meets the requirements of this paragraph if—

(A) the average rate of unemployment in such area for the most recent 18-month period for which data are available was at least 1 1/2 times the average national rate of unemployment for such 18-month period;

(B) such area was a low-income poverty area (as determined by the Bureau of the Census during its most recent census);

(C) at least 60 percent of the residents living in the area have incomes below 80 percent of the median income of the residents of the participating local government (determined in the same manner as under section 119(b) of the Housing and Community Development Act of 1974); or

(D) with respect to such area—

(i) the population in the aggregate of all census tracts in the area decreased by 10 percent or more between 1970 and 1980, and

(ii) the participating local government establishes to the satisfaction of the Secretary that—

(I) chronic abandonment or demolition of commercial or residential structures exists in the area, or

(II) substantial tax arrearages of commercial or residential structures exist in the area.

(4) DETERMINATIONS MADE BY SECRETARY.—Determinations under this title shall be made by the Secretary on the basis of—

(A) data produced by any Federal agency, and

(B) data submitted by or on behalf of the government designating the area (or persons designated by the government) if the Secretary determines that such data is reasonably accurate.

(c) REVITALIZATION AREA DEVELOPMENT PLAN.—

(1) IN GENERAL.—For purposes of this Act, the term "revitalization area development plan" means a plan developed by the participating local government which—

(A) provides an assessment of the economic and social conditions of such area;

(B) specifies development objectives for such area and assigns a priority to each development objective;

(C) provides for the establishment of a revitalization area management authority which—

(i) will implement and coordinate this Act with other local programs, and

(ii) will provide for the meaningful representation of community residents, minority groups, and other community entities in the decisions of such authority;

(D) specifies the powers to be vested in such authority, particularly with respect to any revitalization area GSOC established under section 301 of this Act;

(E) provides advisory guidelines for—

(i) making investment and development decisions with respect to such area, and

(ii) monitoring and evaluating the effectiveness of such plan and of such investment and development decisions; and

(F) meets any other requirements provided in this subsection.

(2) NEIGHBORHOOD EQUITY.—

(A) IN GENERAL.—A revitalization area development plan shall—

(i) evaluate equity possessed, or available to be possessed, by residents of the revitalization area, and

(ii) specify the equity such residents will receive from development of such area.

(B) EQUITY.—Such equity may include (but shall not be limited to)—

(i) shares of stock of a revitalization area GSOC or an interest in a business, partnership, employee stock ownership plan, cooperative, or joint venture established under the revitalization area development plan;

(ii) home ownership for residents of such area through homesteading, cooperatives, creative financing mechanisms, or any similar means; and

(iii) public ownership of property in such area.

(3) EMPLOYMENT OPPORTUNITIES; JOB TRAINING.—A revitalization area development plan shall—

(A) evaluate employment opportunities in the area designated under section 101,

(B) evaluate employment status, job skills, and job, entrepreneurial, and managerial training needs of residents in such area,

(C) evaluate the employment needs, and job and managerial training needs, of businesses in such area,

(D) evaluate the existing job, entrepreneurial, and managerial training resources available to residents and businesses located in such area, particularly from educational institutions and community organizations,

(E) specify any commitments to be made by State and local governments, educational institutions, community organizations, and any other persons and organizations to assist in meeting the employment, and job, entrepreneurial and managerial training needs of residents and businesses located and expected to locate in such area.

(4) INVESTMENT IN SMALL, MINORITY, AND OWNERSHIP-EXPANDING BUSINESSES.—A revitalization area plan shall—

(A) evaluate resource requirements, employment requirements, and management assistance and other needs of small, minority, and ownership-expanding businesses located in the area,

(B) evaluate the financial, managerial, and technical resources available to such businesses,

(C) identify potential business opportunities and additional sources of financial and other resources for such businesses, and

(D) specify any commitments to be made by State and local governments and by any other persons and organizations to assist in meeting the needs of such businesses located and expected to locate in such area.

(5) ENERGY EFFICIENCY.—The revitalization area development plan shall—

(A) evaluate the status of efforts to improve energy efficiency (including efforts made with respect to rental residential units) in the area designated under section 101; and

(B) specify any commitments to be made (including amending zoning requirements) by State and local governments and by any other persons and organizations to encourage—

(i) energy efficiency within such area, and

(ii) investment by residents and businesses located or expected to locate in such area in energy property (within the meaning of section 48(l) of the Internal Revenue Code of 1954), renewable energy source property, insulation, and other energy conserving components (within the meaning of section 44C of such Code).

(6) OTHER COMMITMENTS.—A revitalization area development plan shall specify any commitments to be made—

(A) of additional financial, management, labor, community, and other resources to the development of the designated area,

(B) to limit residential displacement which might result from the development of such area and, in consultation with representatives of affected communities, to mitigate any problems of displacement which are unavoidable,

(C) from the participating local government that—

(i) for each qualified calendar year, at least 10 percent of the proceeds from the issuance by such government during such calendar year of obligations which—

(I) are industrial development bonds (within the meaning of section 103(b)(2) of the Internal Revenue Code of 1954), and

(II) are described in section 103(b)(6)(A) of such Code,

shall be used directly or indirectly by revitalization area businesses,

(ii) in determining the revitalization area businesses which receive proceeds from the obligations described in clause (i), such government shall give preference to revitalization area businesses which are small, minority, or ownership-expanding businesses in the year in which such determination is made, and

(iii) if a revitalization area GSOC is established with respect to such area under sec-

tion 301(a) of this Act, any donation of property (other than public utility property within the meaning of section 167(l)(3) of the Internal Revenue Code of 1954) located within such area by such government will be made to—

(I) such revitalization area GSOC, or

(II) any educational organization described in section 501(c)(3) of the Internal Revenue Code of 1954 which is exempt from taxation under subtitle A of such Code;

(D) to encourage and assist minority entrepreneurship and youth entrepreneurship within such area;

(E) to maintain and increase the availability of low-income and moderate-income housing within such area,

(F) to simplify or streamline government regulation of employers and employees within such area where such regulation is not directly related to health and safety;

(G) for investments in such area (other than investments required to be specified under paragraphs (2), (3), (4), and (5)) to improve public services;

(H) from the participating local government to reduce fees, taxes, or other expenses for businesses located in such area and to provide improved police, fire, or public safety measures;

(I) from the State and participating local government to use its powers of eminent domain for any area GSOC established under section 301 of this Act, except if the use of such powers would deprive area residents of adequate housing; and

(J) from the State and participating local government to use, to the maximum extent practicable, revitalization area businesses to provide public services within such area.

SEC. 103. FINAL APPROVAL OF DESIGNATION.

(a) IN GENERAL.—The Secretary may give final approval to the designation of an area under section 101 only if—

(1) the Secretary has given preliminary approval of such designation under section 102, and

(2) the Secretary finds that the participating local government has taken adequate measures to assure fulfillment of the commitments made in the revitalization area development plan.

(b) PRIORITY OF DESIGNATION.—In deciding which designations of areas should be given final approval as revitalization areas, the Secretary shall give preference to areas—

(1) with the highest levels of general distress, and

(2) with respect to which the participating local government demonstrates the most comprehensive and determined commitment to pursue the revitalization area development plan submitted with respect to such area as part of a more comprehensive plan for community revitalization of which the provisions of this Act form a component.

The strength of such commitment and plan will be judged, in part, by the breadth of its support among community groups, residents, investors, private organizations, and area businesses.

(c) ADDITIONAL CONSIDERATIONS.—The Secretary shall consider—

(1) the economic ability of the area or of the participating local government to make the commitments referred to in the revitalization area development plan in the selection process, and

(2) the extent to which the application for a designation corresponds to any State plan for revitalization of distressed areas.

SEC. 104. DEFINITIONS AND SPECIAL RULES.

(a) DEFINITIONS.—For purposes of this title—

(1) SECRETARY.—The term "Secretary" means the Secretary of Housing and Urban Development or his delegate.

(2) PARTICIPATING LOCAL GOVERNMENT.—The term "participating local government" means, with respect to any area nominated as a revitalization area, the local government having jurisdiction over such area.

(3) OWNERSHIP-EXPANDING BUSINESSES.—

(A) IN GENERAL.—The term "ownership-expanding business" means a business which meets the requirements of subparagraph (B) or which the Secretary determines (under regulations prescribed by the Secretary) to be structured or operated in such a manner that there is a reasonable likelihood that such business will meet such requirements within 5 years.

(B) REQUIREMENTS.—A business meets the requirements of this subparagraph if such business is a revitalization area business—

(i) which—

(I) is organized and operated as a producer cooperative, or

(II) establishes an employee stock ownership plan (within the meaning of section 4975(e)(7) of the Internal Revenue Code of 1954) or a tax credit employee stock ownership plan (within the meaning of section 409A of such Code),

(ii) whose nonmanagerial employees (within the meaning of section 1041(c)(2) of such Code) own at least 35 percent of—

(I) in the case of a business which is a corporation, the total combined voting power of all classes of stock of such corporation entitled to vote, or the total value of all shares of all classes of stock of such corporation, or

(II) in the case of a business which is not a corporation, the value of such business,

(iii) which distributes at least 10 percent of the profits earned by such business in each taxable year to the employees of such business in the form of bonuses which are equal in amount and payable to each employee of such business as a regular supplement to salary which is made at least quarterly, and

(iv) which, upon the request of the elected representatives of the employees of such business, pays all the expenses incurred with respect to an audit of the records of such business conducted by an auditor who is selected by such representatives for the purpose of determining the amount of profits earned by such business.

(4) PRODUCER COOPERATIVE.—The term "producer cooperative" means an organization—

(A) chartered and operated on a cooperative basis for the purpose of furnishing goods or services which are primarily consumed by persons other than the members of such organization, and

(B) of which all the employees of such organization are members.

(5) QUALIFIED CALENDAR YEAR.—The term "qualified calendar year" means any calendar year—

(A) which begins after the calendar year in which the area is designated a revitalization area under this section, and

(B) during any part of which the area remains a revitalization area.

(6) REVITALIZATION AREA BUSINESS.—The term "revitalization area business" has the meaning given such term in section 7701(a)(40) of the Internal Revenue Code of 1954.

(7) REVITALIZATION AREA GSOC.—The term "revitalization area GSOC" has the meaning given such term in section 1391(e) of the Internal Revenue Code of 1954.

(8) STATE.—The term 'State' includes the possessions of the United States.

(b) SPECIAL RULES.—

(1) GOVERNMENTS.—If more than one government seeks the designation of an area as a revitalization area, any reference to, or requirement of, this section shall apply to all such governments.

(2) SCHEDULE FOR APPLICATION APPROVAL, ETC.—Not later than 180 days after the date of the enactment of this Act the Secretary shall prescribe regulations providing—

(A) deadlines for filing applications for—

(i) preliminary approval of a designation, and

(ii) final approval of a designation, and

(B) the form and manner in which such applications are required to be submitted.

SEC. 105. COORDINATION WITH OTHER FEDERAL PROGRAMS.

The Secretary of Housing and Urban Development shall—

(1) promote the coordination of all Federal housing, community and economic development, banking, financial assistance, and employment training programs which are carried on within a revitalization area,

(2) expedite, to the greatest extent possible, the consideration of applications for programs described in paragraph (1) through the consolidation of forms or otherwise, and

(3) provide, whenever possible, for the consolidation of periodic reports required under programs described in paragraph (1) into one summary report submitted at such intervals as may be designated by the Secretary.

SEC. 106. JOB TRAINING PREFERENCES.

(a) Notwithstanding any other provision of law, the head of each Federal department, agency, or program which distributes Federal funds or awards Federal contracts to any programs, organizations, or local governments for the purpose of furthering job training shall give the following preferences in distributing such funds and in awarding such contracts:

(1) A preference shall be given to any program, organization, or local government located in, or primarily serving, a revitalization area over all other programs, organizations, or local governments.

(2) A preference shall be given to those programs or organizations which are part of a job-training plan of the revitalization area submitted pursuant to section 102(c)(3) over all other programs or organizations located in, or primarily serving, such revitalization area.

(3) A preference shall be given to community-based organizations or entrepreneurship development centers (within the meaning of section 48(r)(2) of the Internal Revenue Code of 1954) located in, or primarily serving, a revitalization area over all other organizations so located or so serving (but only if such preference does not undermine any portion of the job-training plan of such revitalization area submitted pursuant to section 102(c)(3)).

(b) The head of each Federal department, agency, or program which distributes Federal funds or awards Federal contracts for the purpose of furthering job training shall take such actions as are necessary to assure that any program, organization, or local government which is a recipient of such Federal funds or contracts will give special consideration to the preferences described in subsection (a) in making any further distribution of such funds or in awarding any subcontract under such contract.

(c) For purposes of this section, the term "community-based organization" means an organization exempt from taxation under subchapter F of chapter 1 of the Internal Revenue Code of 1954 which has demonstrated effectiveness in the delivery of employment and training services, such as the Opportunities Industrialization Centers, the National Urban League, National Alliance of Businesses, SER-Jobs for Progress, or any similar employer-related organizations.

TITLE II—TAX INCENTIVES

Subtitle A—Definition of Revitalization Area Business

SEC. 201. DEFINITION OF REVITALIZATION AREA BUSINESS.

Subsection (a) of section 7701 (relating to definitions) is amended by adding at the end thereof the following new paragraph:

"(40) REVITALIZATION AREA BUSINESS.—

"(A) IN GENERAL.—The term 'revitalization area business' means any person—

"(i) which is actively engaged in the conduct of a trade or business during the taxable year,

"(ii) with respect to which at least 50 percent of such person's gross receipts for such taxable year are attributable to the active conduct of a trade or business which produces goods, or provides services, within a revitalization area, and

"(iii) with respect to which at least 30 percent of any employees hired by such person after the later of the date on which—

"(I) such person begins the active conduct of a trade or business within a revitalization area, or

"(II) any area in which such person is actively engaged in the conduct of a trade or business is designated as a revitalization area,

are qualified employees.

"(B) REVITALIZATION AREA.—For purposes of this paragraph, the term 'revitalization area' means any area with respect to which a designation as a revitalization area is in effect under section 101 of the Community Assistance and Revitalization Act of 1983.

"(C) EXISTING BUSINESS.—Any person which—

"(i) was actively engaged in the conduct of a trade or business in an area immediately before such area is designated as a revitalization area, and

"(ii) otherwise meets the requirements of this paragraph,

shall not be treated as a revitalization area business unless the average number of employees (determined on a full-time basis) during the taxable year is at least 10 percent greater than the average number of such employees during the taxable year preceding the designation of such area as a revitalization area.

"(D) RELOCATION.—If the commencement or increase of trade or business activity by a person in a revitalization area is related to a cessation or curtailment of business activity by such person (within the period beginning 1 year before the date on which such commencement or increase occurs and ending 2 years after such date) in a distressed area, such person shall not be treated as a revitalization area business unless—

"(i) such person maintains its new level of such activity in the revitalization area during the 3-year period after such commencement or increase, and

"(ii) such person is owned and controlled by substantially the same persons (determined without regard to any change in ownership or control resulting from any employee ownership plan) during such 3-year period.

"(E) DISTRESSED AREA.—For purposes of this paragraph, the term 'distressed area' means an area which, as determined by the Secretary in consultation with the Secretary of Housing and Urban Affairs is an area of pervasive poverty, unemployment, and general distress.".

Subtitle B—Incentives for Employee Ownership

SEC. 211. EMPLOYEE OWNERSHIP CREDIT.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable) is amended by inserting after section 44G the following new section:

"SEC. 44I. EMPLOYEE OWNERSHIP OF REVITALIZATION AREA BUSINESS.

"(a) IN GENERAL.—

"(1) CREDIT ALLOWED.—In the case of a qualified corporation which elects the application of this section for the taxable year, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the amount determined under paragraph (2) for the taxable year.

"(2) AMOUNT OF CREDIT.—

"(A) IN GENERAL.—The amount of the credit allowed under paragraph (1) for the taxable year shall be an amount equal to the product of—

"(i) the taxable income of the qualified corporation for such taxable year, multiplied by,

"(ii) the applicable percentage for such taxable year.

"(B) APPLICABLE PERCENTAGE.—For purposes of subparagraph (A)(ii), the applicable percentage is the percentage equal to the product of—

"(i) 2 percent, multiplied by,

"(ii) the number of multiples of 10 percent in the employee ownership percentage for such taxable year.

"(C) EMPLOYEE OWNERSHIP PERCENTAGE.—For purposes of subparagraph (B)(ii), the employee ownership percentage for the taxable year is the percentage determined by dividing—

"(i) the total number of shares of voting stock of the qualified corporation owned by, or on behalf of, qualified employees of the qualified corporation on the last day of such taxable year, by

"(ii) the total number of outstanding shares of voting stock of such qualified corporation on the last day of such taxable year.

"(b) LIMITATIONS.—

"(1) IN GENERAL.—The amount of the credit allowed under subsection (a) for any taxable year shall not exceed $50,000.

"(2) CONTROLLED GROUPS.—In the case of a controlled group of corporations, the $50,000 amount specified in paragraph (1) shall be reduced for each component member of such group by apportioning $50,000 among the component members of such group in such manner as the Secretary shall by regulations prescribe. For purposes of the preceding sentence, the term 'controlled group of corporations' has the meaning given such term by section 1563(a) (determined without regard to subsections (a)(4) and (e)(3)(C) of such section).

"(3) APPLICATION WITH OTHER CREDITS.—The credit allowed under subsection (a) shall not exceed the tax imposed by this chapter for the taxable year, reduced by the sum of the credits allowable under a section of this subpart having a lower number or letter designation than this section, other than credits allowable by sections 31, 39, and 43. For purposes of the preceding sentence, the term 'tax imposed by this chapter' shall not include any tax treated as not imposed by this chapter under the last sentence of section 53(a).

"(c) ELECTION.—No election may be made by a corporation under subsection (a) if such corporation elects the application of section 44G (relating to employee stock ownership credit) for the taxable year.

"(d) DEFINITIONS.—For purposes of this section—

"(1) QUALIFIED CORPORATION.—The term 'qualified corporation' means a corporation—

"(A) which is a revitalization area business (within the meaning of section 7701(a)(40)), and

"(B) stock of which is owned by or on behalf of at least 70 percent of the employees of such corporation.

"(2) QUALIFIED EMPLOYEE.—The term 'qualified employee' has the same meaning given such term in section 44J(d)(2).".

(b) CONFORMING AMENDMENTS.—

(1) Section 6096(b) (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44G" and inserting in lieu thereof "44G, and 44H".

(2) The table of sections for subpart A of part IV of subchapter A of chapter 1 is amended by inserting after the item relating to section 44G the following new item:

"Sec. 44I. Employee ownership of revitalization area business."

SEC. 212. NONRECOGNITION OF GAIN ON CERTAIN SALES OF STOCK OF REVITALIZATION AREA BUSINESS TO EMPLOYEE PLANS.

(a) IN GENERAL.—Part III of subchapter O of chapter 1 (relating to common nontaxable exchanges) is amended by adding at the end thereof the following new section:

"SEC. 1041. SALE OF STOCK OF CERTAIN REVITALIZATION AREA BUSINESSES TO EMPLOYEES PLANS.

"(a) IN GENERAL.—No gain shall be recognized from the sale or exchange of any share of stock in a revitalization area business by the taxpayer during the taxable year to, or with—

"(1) an employee stock ownership plan (within the meaning of section 4975(e)(7)), or a tax credit employee stock ownership plan, which invests primarily in stock issued by such revitalization area business, but only if the requirements of subsection (b) are met for such taxable year, or

"(2) such revitalization area business, but only if such revitalization area business is a producer cooperative.

"(b) REQUIREMENTS.—The requirements of this subsection are met for the taxable year with respect to a taxpayer selling or exchanging shares of stock of a revitalization area business during such taxable year if—

"(1) at least 51 percent of the total number of shares of stock of such revitalization area business sold or exchanged by the taxpayer to, or with, a plan described in subsection (a)(1) during such taxable year were allocated to the accounts of nonmanagerial employees;

"(2) such plan allocates at least 51 percent of the total number of shares of stock of such revitalization area business held by such plan among at least 51 percent of the nonmanagerial employees;

"(3) in the case of a sale or exchange of shares of stock to a tax credit employee stock ownership plan, all such shares which are allocated to the accounts of employees vest in such employees within 5 years after the date of such sale; and

"(4) the taxpayer maintains such records and provides such information to the Secretary as the Secretary may require under regulations in order to determine compliance with the requirements of this section.

"(c) DEFINITIONS.—For purposes of this section—

"(1) REVITALIZATION AREA BUSINESS.—The term 'revitalization area business' has the meaning given such term in section 7701(a)(40).

"(2) NONMANAGERIAL EMPLOYEES.—The term 'nonmanagerial employee' means any employee who is not—

"(A) an officer of the corporation, or

"(B) an employee described in section 415(c)(6)(B)(iii).

"(3) PRODUCER COOPERATIVE.—The term 'producer cooperative' means an organization—

"(A) chartered and operated on a cooperative basis for the purpose of furnishing goods or services which are primarily consumed by persons other than the members of such organization, and

"(B) of which all the employees of such organization are members.".

(b) CONFORMING AMENDMENT.—The table of sections for part III of subchapter O of chapter 1 is amended by adding at the end thereof the following new item:

"Sec. 1041. Sale of stock of certain revitalization area businesses to employee plans.".

Subtitle C—Incentives for Investments in Revitalization Areas

SEC. 221. ROLLOVER OF GAIN ON THE SALE OF PROPERTY WHERE REINVESTMENT IN CERTAIN REVITALIZATION AREA BUSINESS PROPERTY.

(a) IN GENERAL.—Part III of subchapter O of chapter 1 (relating to common nontaxable exchanges) is amended by adding at the end thereof the following new section:

"SEC. 1042. ROLLOVER OF GAIN ON THE SALE OF PROPERTY WHERE REINVESTMENT IN CERTAIN REVITALIZATION AREA BUSINESS PROPERTY.

"(a) IN GENERAL.—Gain shall be recognized on the sale or exchange of property of the taxpayer only to the extent that the amount of gain realized from such sale or exchange exceeds the cost of qualified property acquired by the taxpayer within the qualified period.

"(b) QUALIFIED PROPERTY.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified property' means—

"(A) any tangible personal property or real property which is acquired by the taxpayer after the designation of an area as a revitalization area and which is used predominantly by the taxpayer in such revitalization area in the active conduct of a trade or business,

"(B) any real property located in a revitalization area which was acquired by the taxpayer after the designation of an area as a revitalization area and which was used predominantly by the taxpayer in the active conduct of a trade or business, and

"(C) any share of stock of a corporation or interest in a partnership or other entity if, for the most recent taxable year of such entity ending before the date of acquisition of such interest, such entity is a small revitalization area business.

"(2) SMALL REVITALIZATION AREA BUSINESS.—The term 'small revitalization area business' means a revitalization area business (as defined in section 7701(a)(40)) the average annual gross receipts of which for the 3-taxable year period ending with the taxable year do not exceed $4,000,000. For purposes of the preceding sentence, the rules of section 474(c)(1) shall apply.

"(3) QUALIFIED EMPLOYEES.—

"(A) IN GENERAL.—The term 'qualified employee' means an individual—

"(i) who is described in subparagraph (B), and

"(ii) who performs at least 50 percent of his services during any period for which any computation is being made under this section within a revitalization area.

The Secretary, in consultation with the Secretary of Labor, shall prescribe such regulations as are necessary to further identify individuals described in this paragraph.

"(B) SPECIAL REQUIREMENTS.—An individual described in this subparagraph is an individual who, immediately prior to becoming employed by the revitalization area business—

"(i) had been unemployed for at least 10 weeks and was economically disadvantaged,

"(ii) had a family income which did not exceed the lower living standard income level (exclusive of unemployment compensation and all Federal, State, and local income-tested or needs-tested public payments),

"(iii) was (or whose family was) receiving aid to families with dependent children provided under a State plan approved under part A of title IV of the Social Security Act,

"(iv) was (or whose family was) receiving supplemental security income benefits under title XVI of the Social Security Act, or

"(v) was—

"(I) in the case of individuals other than handicapped individuals (within the meaning of section 72(m)), between 14 years of age and 22 years of age, and

"(II) economically disadvantaged (or was a member of a family which was economically disadvantaged) and required additional education, training, or intensive counseling and related assistance in order to secure and hold meaningful employment, participate successfully in regular school work, qualify for suitable training programs, or satisfy Armed Forces requirements.

"(C) ECONOMICALLY DISADVANTAGED.—The term 'economically disadvantaged' means a person who—

"(i) receives (or is a member of a family which receives) cash welfare payments under a Federal, State, or local welfare program,

"(ii) is a member of a family which had a family income during the 6-month period prior to employment with the revitalization area business which would have qualified such family for such cash welfare payments,

"(iii) has (or is a member of a family which has) received a total family income for the 6-month period prior to employment with the revitalization area business (exclusive of unemployment compensation and welfare payments) which, in relation to family size, was not in excess of the higher of—

"(I) the poverty level determined in accordance with criteria established by the Director of the Office of Management and Budget, or

"(II) 60 percent of the lower living standard income level,

"(iv) is a foster child on behalf of whom State or local government payments are made, or

"(v) in cases permitted by regulations of the Secretary, is a handicapped individual living at home or is an individual who is institutionalized or receiving services in, or is a client of, a sheltered workshop, prison, hospital, or similar institution, or in community care.

"(D) FAMILY.—The term 'family' means—

"(i) an individual, and

"(ii) all dependents (within the meaning of section 152) claimed by such individual on such individual's income tax return for the taxable year prior to the taxable year in which such individual became employed by the revitalization area business.

If an individual is claimed as a dependent on the income tax return of another individual, such individual shall be treated as a member of such other individual's family.

"(E) LOWER LIVING STANDARD INCOME LEVEL.—The term 'lower living standard income level' means that income level (adjusted for regional, metropolitan, urban, and rural differences and family size) determined annually by the Secretary of Labor based upon the most recent lower living family budget issued by the Secretary of Labor.

"(F) UNEMPLOYED PERSON.—The term 'unemployed person' means—

"(1) persons who are without jobs and who want and are available for work; or

"(ii) persons who are—

"(I) institutionalized in, or who have been released from, a prison, hospital, or similar institution, or are clients of a sheltered workshop; or

"(II) adults who receive, or whose families receive, supplemental security income or money payments pursuant to a State plan approved under title I, IV, X, or XVI of the Social Security Act; or

"(iii) persons working in jobs providing insufficient income to support their families without welfare assistance.

The determination of whether persons are without jobs shall be made in accordance with the criteria used by the Bureau of Labor Statistics of the Department of Labor in defining persons as unemployed, but such criteria shall not be applied differently on account of a person's previous employment.

"(4) SPECIAL RULES FOR LOW INCOME RENTAL PROPERTY.—

"(A) IN GENERAL.—In the case of property described in subparagraph (B)—

"(i) such property shall be treated as qualified property, and

"(ii) ownership of such property shall be treated as the active conduct of a trade or business within a revitalization area.

"(B) PROPERTY TO WHICH PARAGRAPH APPLIES.—Property is described in this subparagraph if such property—

"(i) is section 1250 property described in clauses (i), (ii), (iii), or (iv) of section 1250(a)(1)(B), or similar property designated by the Secretary of Housing and Urban Development,

"(ii) is located in a revitalization area, and

"(iii) was—

"(I) constructed after the area's designation as a revitalization area, or

"(II) rehabilitated after such designation and the cost of such rehabilitation was at least $10,000 per unit with respect to each project (or $3,000 per unit if such project was financed from a State or local agency and such agency certifies that no person is in default with respect to such financing at the time of the rehabilitation).

"(5) PROPERTY REMAINS QUALIFIED AFTER REVITALIZATION AREA DESIGNATION CEASES TO APPLY.—

"(A) IN GENERAL.—The treatment of property as qualified property under paragraph (1) shall not terminate when the designa-

tion of the revitalization area in which the property is located or used ceases to apply.

"(B) EXCEPTIONS.—Subparagraph (A) shall not apply after the first sale or exchange of property occurring after the designation ceases to apply to the revitalization area.

"(6) REVITALIZATION AREA.—The term 'revitalization area' means an area with respect to which a designation as a revitalization area is in effect under section 101 of the Community Assistance and Revitalization Act of 1983.

"(c) QUALIFIED PERIOD.—For purposes of this section, the term 'qualified period' means the period which begins 3 months prior to the date on which the sale or exchange of property occurs and which ends 21 months after the date of such sale or exchange.

"(d) BASIS OF ACQUIRED QAULIFIED PROPERTY.—If the acquisition of qualified property by a taxpayer results in nonrecognition of any gain on the sales or exchange of other property of such taxpayer under subsection (a), the basis of such taxpayer in the acquired qualified property shall be the cost of such qualified property decreased by the amount of gain which was not so recognized. If such acquired qualified property consists of more than one item of property, the basis determined under the preceding sentence shall be allocated among such items in proportion to their respective costs.

"(e) STATUTE OF LIMITATIONS.—If the taxpayer during a taxable year sells or exchanges property at a gain, then—

"(1) the statutory period for the assessment of any deficiency attributable to any part of such gain shall not expire before the expiration of 3 years from the date the Secretary is notified by the taxpayer (in such manner as the Secretary may by regulations prescribe) of—

"(A) the taxpayer's cost of acquiring the qualified property which the taxpayer claims results in nonrecognition of any part of such gain,

"(B) The taxpayer's intention not to acquire any qualified property within the qualified period, or

"(C) a failure to make such purchase within the qualified period; and

"(2) such deficiency may be assessed before the expiration of such 3-year period notwithstanding the provisions of any other law or rule of law which would otherwise prevent such assessment."

"(b) CONFORMING AMENDMENTS.—

(1) Subsection (C) of section 381 (relating to carryovers in certain corporate acquisitions) is amended by inserting after paragraph (19) the following new paragraph:

"(20) REVITALIZATION AREA BUSINESS PROPERTY.—The acquiring corporation shall be treated as the distributor or transferor corporation after the date of distribution or transfer for purposes of applying section 1042."

(2) Subsection (a) of section 1016 (relating to adjustments to basis) is amended by striking out "and" at the end of paragraph (24), by striking out the period at the end of paragraph (25) and inserting in lieu thereof "; and", and by adding at the end thereof the following new paragraph:

"(26) to the extend provided in section 1042(d) in the case of the property the acquisition of which resulted in nonrecognition of gain on other property under section 1042(a)."

(3) Section 1223 (relating to holding period of property) is amended by redesignating paragraph (12) as paragraph (13) and inserting after paragraph (11) the following new paragraph:

"(12) In determining the period for which the taxpayer has held property, the acquisition of which resulted under section 1042 in nonrecognition of any part of the gain on the sale or exchange of any other property, there shall be included the period during which such other property was held by such taxpayer prior to such sale or exchange."

(4) Paragraph (4) of section 1245(b) (relating to gain from disposition of certain depreciable assets) is amended by striking out "or 1033" and inserting in lieu thereof ", 1033, or 1042".

(5) Paragraph (4) of section 1250(d) (relating to gain from disposition of certain depreciable realty) is amended—

(A) by striking out "or 1033" in subparagraphs (A) and (E) and inserting in lieu thereof ", 1033, or 1042", and

(B) by inserting "or 1042(a)" after "section 1033(a)(2)" in subparagraph (C)(ii).

(6) Paragraph (2) of section 6212(c) (relating to notice of deficiency) is amended by inserting after subparagraph (C) the following new subparagraph:

"(D) Deficiency attributable to gain on sale of property, see section 1042(e)."

(7) Section 6504 is amended by adding at the end thereof the following new paragraph:

"(13) Gain on the sale or exchange of property, see section 1042(e)."

(C) CLERICAL AMENDMENT.—The table of sections for part III of subchapter c of chapter 1 is amended by inserting after the item relating to section 1041 the following new item:

"Sec. 1042. Rollover of gain on the sale of property where reinvestment in certain revitalization area business property."

SEC. 222. INVESTMENT CREDIT FOR CERTAIN LOW INCOME RENTAL HOUSING.

(a) DEFINITION OF SECTION 38 PROPERTY.—Paragraph (1) of section 48(a) (defining section 38 property) is amended by striking out the period at the end of subparagraph (G) and inserting in lieu thereof ", or" and by adding immediately after subparagraph (G) the following new subparagraph:

"(H) property described in section 1042(b)(4)(B)."

(b) LODGING EXCEPTION.—Paragraph (3) of section 48(a) (relating to property used for lodging) is amended—

(1) by striking out "and" at the end of subparagraph (C),

(2) by striking out the period at the end of subparagraph (D) and inserting in lieu thereof ", and", and

(3) by adding at the end thereof the following new subparagraph:

"(E) property described in section 1042(b)(4)(B)."

(C) EFFECTIVE DATE.—The amendments made by this section shall apply to periods after December 31, 1983, under rules similar to the rules contained in section 48(m) of the Internal Revenue Code of 1954.

SEC. 223. INVESTMENT CREDIT FOR ESTABLISHMENT OF ENTREPRENEURIAL DEVELOPMENT CENTER.

(a) AMOUNT OF CREDIT.—Paragraph (2) of section 46(a) (relating to the amount of the investment credit) is amended—

(1) by striking out "and" at the end of clause (iii) of subparagraph (A),

(2) by striking out the period at the end of clause (iv) of subparagraph (a) and inserting in lieu thereof ", and",

(3) by adding at the end of subparagraph (A) the following new clause:

"(v) in the case of an entrepreneurial development center, the entrepreneurial development percentage.", and

(4) by adding at the end thereof the following new subparagraph:

"(G) ENTREPRENEURIAL DEVELOPMENT PERCENTAGE.—For purposes of this paragraph, the entrepreneurial development percentage is 10 percent."

(b) LIMITATIONS.—

(1) IN GENERAL.—Subsection (a) of section 46 is amended by adding at the end the following new paragraph:

"(8) LIMITATION ON CREDIT FOR ENTREPRENEURIAL DEVELOPMENT CENTERS.—The aggregate amount allowable to any taxpayer of so much of the credit allowable under section 38 which is attributable to the application of the entrepreneurial development percentage shall not exceed $750,000."

(2) ALLOCATION OF LIMITATION AMOUNT.—Paragraphs (5) and (6) of section 46(a) are amended to read as follows:

"(5) MARRIED INDIVIDUALS.—In the case of a husband or wife who files a separate return—

"(A) paragraph (3) shall be applied by substituting '$12,500' for '$25,000' each place it appears, and

"(B) paragraph (3) shall be applied by substituting '$375,000' for '$750,000'.

This paragraph shall not apply if the spouse of the taxpayer has no qualified investment for, and no unused credit carryback or carryover to, the taxable year of such spouse which ends with or within the taxpayer's taxable year.

"(6) CONTROLLED GROUPS.—In the case of a controlled group (within the meaning of section 1563(a))—

"(A) the $25,000 amount specified under paragraph (3), and

"(B) the $750,000 amount specified under paragraph (8),

shall each be reduced for each component member of such group by apportioning each such amount (separately) among the component members of such group in such manner as the Secretary shall by regulations prescribe."

(c) DEFINITION OF ENTREPRENEURIAL DEVELOPMENT CENTER.—Section 48 (relating to definitions and special rules) is amended—

(1) by redesignating subsection (r) as subsection (s), and

(2) by inserting after subsection (q) the following new subsection:

"(r) Entrepreneurial Development Center.—

"(1) IN GENERAL.—For purposes of this section, the term 'entrepreneurial development center' means a facility which—

"(A) is located within an area with respect to which a designation as a revitalization area is in effect under section 101 of the Community Assistance and Revitalization Act of 1983;

"(B) is placed in service within 24 months after the date on which such revitalization area was so established;

"(C) is privately owned and operated for profit;

"(D) provides advice to revitalization area businesses (within the meaning of section 7701(a)(40)) regarding management techniques, financing, taxation, marketing, job training, and other matters of concern to such businesses;

"(E) maintains a professional staff which can meet the requirements of subparagraph (D);

"(F) employs at least one employee or consultant who possesses demonstrated expertise in handling the legal, managerial, and

financial needs of businesses having diffuse ownership such as cooperatives, employee owned companies, corporations which employee stock ownership plans (within the meaning of section 4975(e)(7)) or tax credit employee stock ownership plans, and resident owned companies;

"(G) provides physical resources which meet the needs of businesses in the revitalization area and which may include, but are not limited to, machinery, computer services, laboratories, and office space;

"(H) consults with the local government which sought designation of such revitalization area as to the needs of the businesses located in such revitalization area; and

"(I) charges a fee described in paragraph (2) to businesses using the services provided by such center.

"(2) FEES.—An entrepreneurial development center may determine the amount of any fee charged for the services such center provides, but such fee—

"(A) shall not exceed the fees charged for similar services offered in the metropolitan area in which such center is located, and

"(B) shall bear a reasonable relationship to the operating costs incurred by such center in providing such services."

(d) SPECIAL RULE PREVENTING RECAPTURE MERELY BECAUSE OF TERMINATION OF REVITALIZATION AREA STATES.—Section 47 is amended by adding at the end thereof the following new subsection:

"(e) NO RECAPTURE WHERE TERMINATION OF REVITALIZATION AREA DESIGNATION.—Except to the extent otherwise provided by regulations, credit shall not be recaptured under this section merely because an area ceases to be designated as a revitalization area."

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to periods after December 31, 1983, under rules similar to the rules contained in section 48(m) of the Internal Revenue Code of 1954.

Subtitle D—Incentives for Revitalization Area Businesses

SEC. 231. CREDIT FOR EMPLOYMENT OF QUALIFIED EMPLOYEES.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable) is amended by inserting after section 44I the following new section:

"SEC. 44J. CREDIT FOR EMPLOYMENT OF CERTAIN REVITALIZATION AREA EMPLOYEES.

"(a) IN GENERAL.—In the case of a revitalization area business which elects the application of this section, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to the aggregate qualified compensation paid to all revitalization area employees of such business during the taxable year.

"(b) QUALIFIED COMPENSATION.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified compensation' means, with respect to any revitalization area employee, an amount equal to the applicable percentage of the aggregate compensation paid by the revitalization area business to such employee during the taxable year of such business.

"(2) APPLICABLE PERCENTAGE.—The applicable percentage shall be determined with respect to any revitalization area employee for the taxable year of the revitalization area business in accordance with the following table:

"If at the end of such taxable year such employee has been employed by the business for:	The applicable percentage is:
Less than 1 year	40
At least 1 year but less than 2 years	30
At least 2 year but less than 3 years	20
At least 3 year but less than 4 years	10
4 years or more	0.

"(c) APPLICATION WITH OTHER CREDITS.—The credit allowed by subsection (a) shall not exceed the tax imposed by this chapter for the taxable year, reduced by the sum of the credits allowable under a section of this subpart having a lower number or letter designation than this section, other than credits allowable by sections 31, 39, and 43.

"(d) OTHER DEFINITIONS.—For purposes of this section—

"(1) REVITALIZATION AREA EMPLOYEE.—The term 'revitalization area employee' means a qualified employee (within the meaning of section 1042(b)(3)) who is hired by the revitalization area business after the later of—

"(A) the date on which such revitalization area business begins the active conduct of a trade or business within a revitalization area, or

"(B) the date on which any area in which such revitalization area business is actively engaged in the conduct of a trade or business is designated a revitalization area (under section 101 of the Community Assistance and Revitalization Act of 1983).

Such term shall not include any employee with respect to whose wages credit has been allowed under section 44B to the employer for the taxable year or any prior taxable year.

"(2) REVITALIZATION AREA BUSINESS.—The term 'revitalization area business' has the meaning given such term in section 7701(a)(40).

"(3) REVITALIZATION AREA.—The term 'revitalization area' means an area with respect to which a designation as a revitalization area is in effect under section 101 of the Community Assistance and Revitalization Act of 1983.

"(e) ELECTION.—No election may be made under subsection (a) for the taxable year if the taxpayer is allowed a deduction under section 196 for such taxable year."

(b) CONFORMING AMENDMENTS.—

(1) The table of contents for subpart A of part IV of subchapter A of chapter 1 is amended by inserting after the item relating to section 44I the following new item:

"Sec. 44J. Credit for employment of certain revitalization area employees."

(2) Section 6096(b) (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44I" and inserting in lieu thereof "44I, and 44J".

SEC. 232. DEDUCTION FOR CERTAIN INCOME ATTRIBUTABLE TO BUSINESSES OPERATING IN REVITALIZATION AREAS.

(a) IN GENERAL.—Part VI of subchapter B of Chapter 1 (relating to itemized deductions for individuals and corporations) is amended by adding at the end thereof the following new section:

"SEC. 196. DEDUCTION FOR CERTAIN INCOME ATTRIBUTABLE TO REVITALIZATION AREAS.

"(a) GENERAL RULE.—There shall be allowed as a deduction for the taxable year an amount equal to the applicable percentage of the sum of—

"(1) any amount received by such taxpayer during such taxable year from the active conduct of a trade or business which is a revitalization area business, plus

"(2) any amount received by such taxpayer during such taxable year as interest on any mortgage, loan, or other financing (other than refinancing) provided by such taxpayer to such revitalization area business for direct use by such business in the production of goods, or the provision of services, within a revitalization area.

"(b) APPLICABLE PERCENTAGE.—For purposes of this section—

"(1) IN GENERAL.—The applicable percentage shall be determined with respect to the revitalization area business from which the taxpayer received amounts described in subsection (a) in accordance with the following table:

"If such business's qualified employee percentage for the calendar year ending with or within the taxpayer's taxable year is:	The applicable percentage is:
Less than 30	0
At least 30 but less than 40	20
At least 40 but less than 50	30
At least 50 but less than 60	40
60 or more	50.

"(2) QUALIFIED EMPLOYEE PERCENTAGE.—The term 'qualified employee percentage' means, with respect to a revitalization area business, the percentage of all employees of such business for the calendar year who are qualified employees (within the meaning of section 44J(d)(2)).

"(c) DEFINITIONS AND SPECIAL RULE.—For purposes of this section—

"(1) EMPLOYEES.—An individual shall be treated as an employee of a revitalization area business for a calendar year only if such individual has been employed by such business at all times during the 90-day period ending at the close of such calendar year.

"(2) REVITALIZATION AREA.—The term 'revitalization area' means an area with respect to which a designation as a revitalization area is in effect under section 101 of the Community Assistance and Revitalization Act of 1983.

"(3) REVITALIZATION AREA BUSINESS.—The term 'revitalization area business' has the meaning given such term by section 7701(a)(40).

"(d) APPLICATION OF SECTION.—The provisions of this section shall only apply to—

"(1) amounts described in subsection (a)(1) which are received after the date on which the area is designated a revitalization area under section 101 of the Community Assistance and Revitalization Act of 1983 and before such designation terminates, and

"(2) amounts described in subsection (a)(2) which are received during the period described in paragraph (1) and which are attributable to financing provided during such period.

"(e) CROSS REFERENCE.—

"For coordination with credit for certain amounts to which this section applies, see section 44I(e).".

(b) CONFORMING AMENDMENT.—The table of sections for part VI of subchapter B of Chapter 1 is amended by adding at the end thereof the following new item:

"Sec. 196. Deduction for certain income attributable to revitalization areas.".

SEC. 233. EXPENSE DEDUCTION FOR REVITALIZATION AREA BUSINESS STOCK AND DEBENTURES.

(a) IN GENERAL.—Part IV of subchapter P of chapter 1 (relating to special rules for determining capital gain and loss) is amended

by adding at the end thereof the following new section:

"SEC. 1257. EXPENSE DEDUCTION FOR REVITALIZATION AREA BUSINESS STOCK AND DEBENTURES.

"(a) IN GENERAL.—For purposes of this subtitle, amounts actually paid during the taxable year by a natural person or partnership of such persons, in respect to the purchase of small revitalization area business stock or debentures shall be deductible for the purpose of determining taxable income for that year.

"(b) MAXIMUM AMOUNT FOR ANY TAXABLE YEAR.—The maximum amount allowable as a deduction under subsection (a) to the taxpayer for the taxable year shall not exceed $10,000 ($20,000 in the case of a joint return under section 6013).

"(c) RULES FOR PURCHASES.—For purposes of this section, purchases under subsection (a) shall be deemed to have been made on the last day of a taxable year if the payment is on account of such taxable year and is made not later than the time prescribed by law for the filing of the return for such taxable year (including extensions thereof).

"(d) SMALL REVITALIZATION AREA BUSINESS STOCK AND DEPENTURES.—For purposes of this section—

"(1) REVITALIZATION AREA BUSINESS STOCK.—The term 'revitalization area business stock' means common stock issued by a qualified revitalization area business issuer.

"(2) REVITALIZATION AREA BUSINESS DEBENTURE.—The term 'revitalization area business debenture' means a written debt instrument issued by a qualified revitalization area business issuer which—

"(A) is a general obligation of such issuer,

"(B) bears interest at a rate not less than the rate prescribed by the Secretary under section 483(c)(1)(B),

"(C) has a fixed maturity.

"(3) QUALIFIED REVITALIZATION AREA BUSINESS ISSUER.—

"(A) IN GENERAL.—The term 'qualified revitalization area business issuer' means a revitalization area business (as defined in section 7701(a)(40))—

"(i) the average annual gross receipts of which for the 3-taxable year period ending with the taxable year do not exceed $4,000,000,

"(ii) which has no securities outstanding which are subject to regulation by the Securities and Exchange Commission at the time of issuance of the enterprise stock or debentures,

"(iii) which during the period of its 5 most recent taxable years ending before the date on which enterprise stock or debentures were issued, derived more than 50 percent of its aggregate gross receipts from sources other than royalties, rents, dividends, interest annuities and sales and exchanges of stocks or securities.

For purposes of clause (i), the rules of section 474(c)(1) shall apply.

"(B) CONTROLLED GROUPS.—For purposes of determining under subparagraph (A) the outstanding stock or debentures of—

"(i) a member of the same controlled group of corporations (within the meaning of section 1563(a) except that 'more than 50 percent' shall be substituted for 'at least 80 percent' and place it appears in section 1563(a)(1)), and

"(ii) a member of a group of trades or business which are under common control, as determined under regulations prescribed by the Secretary which are based on principles similar to the principles which apply under clause (i),

the outstanding enterprise stock or debentures of all members of such group shall be taken into account.

"(C) SECURITY SUBJECT TO REGULATION BY THE SECURITIES AND EXCHANGE COMMISSION.—For purposes of subparagraph (A)(ii), a security subject to regulation by the Securities and Exchange Commission is a security—

"(i) registered on a national securities exchange under section 12(b) of the Securities Exchange Act of 1934,

"(ii) registered or required to be registered under section 12(g) of such Act (or which would be required to be so registered except for the exemptions in subparagraphs (B) through (H) of such section); or

"(iii) issued by a company subject to the reporting requirements of section 15(g) of such Act.

"(e) SPECIAL PROVISIONS.—

"(1) LIMITATIONS ON AMOUNT OF DEDUCTION.—If—

"(A) revitalization area business stock or debentures were issued in exchange for property,

"(B) the basis of such stock or debenture in the hands of the taxpayer is determined by reference to the basis in his hands of such property, and

"(C) the adjusted basis (for determining the deduction) of such property immediately before the exchange exceeded its fair market value at such time,

then in computing the amount of the deduction to which the taxpayer is entitled for the purposes of this section, the basis of such stock or debenture shall be reduced by an amount equal to the excess described in subparagraph (C).

"(2) MINIMUM HOLDING PERIOD.—For purposes of this section, proceeds from the sale of revitalization area business stock or debentures shall be treated as ordinary income to the extent of the deduction allowed under this section if such sale occurs before the close of the 3-year period beginning on the date of purchase.

"(3) DEDUCTION FOR ORIGINAL PURCHASER.—Taxpayers acquiring revitalization area business stock or debentures other than from a qualified revitalization area business issuer or its selling agent shall not be entitled to a deduction under this section.

"(4) BASIS REDUCTION.—The basis of any stock or debenture with respect to the purchase of which a deduction was allowed under this section shall be reduced by the amount of the deduction so allowed."

"(b) CLERICAL AMENDMENT.—The table of sections for such part IV is amended by adding at the end thereof the following new item:

"Sec. 1257. Expense deduction for revitalization area business stock and debentures."

SEC. 234. DIRECT LOANS UNDER SECTION 7(a) OF THE SMALL BUSINESS ACT TO REVITALIZATION AREA BUSINESSES.

Section 7(a) of the Small Business Act (15 U.S.C. Sec 636) is amended by adding the following new paragraph:

"(16) Notwithstanding any other provision of law, at least $50 million of the funds authorized by this Act to be appropriated for new direct loan obligations pursuant to this subsection shall be obligated with small business concerns located in revitalization areas as defined by Sec. 101 of the Community Assistance Revitalization Act of 1983."

Subtitle E—Expansion of Targeted Jobs Credit

SEC. 241. AMENDMENTS TO TARGETED JOBS CREDIT.

(a) INCREASE IN AMOUNT OF WAGES TAKEN INTO ACCOUNT.—Paragraph (4) of section 51(b) of the Internal Revenue Code of 1954 (relating to only first $6,000 of wages per year taken into account) is amended by striking out "$6,000" each place it appears and inserting in lieu thereof "$10,000".

(b) REPEAL OF TERMINATION.—Paragraph (3) of section 51(c) of such Code (relating to termination) is hereby repealed.

(c) EFFECTIVE DATES.—

(1) SUBSECTION (a).—The amendment made by subsection (a) shall apply to wages paid after the date of the enactment of this Act in taxable years ending after such date.

(2) SUBSECTION (b).—The repeal made by subsection (b) shall take effect on the date of the enactment of this Act.

Subtitle F—Effective Date

SEC. 251. EFFECTIVE DATE.

Except as otherwise provided, the amendments made by this title shall apply with respect to taxable years ending after December 31, 1983.

TITLE III—GENERAL STOCK OWNERSHIP PROVISIONS

SEC. 301. ESTABLISHMENT OF REVITALIZATION AREA GSOC.

(a) REVITALIZATION AREA GSOC PLANNING BOARD.—

(1) ESTABLISHMENT OF BOARD.—

(A) IN GENERAL.—Within 180 days after a revitalization area is designated under section 101 of this Act, the local government having jurisdiction over such revitalization area shall hold an election to select at least 5 individuals from among eligible candidates to serve as the revitalization area GSOC planning board.

(B) NUMBER OF MEMBERS; CLASSES.—The local government which sought designation or the revitalization area shall determine the number of seats which will comprise the revitalization area GSOC planning board. The number of seats on the board determined under the preceding sentence shall not be less than 5. Such local government shall divide the number of seats on such board into classes and assign a length of term to each seat. The classes established under the preceding sentence shall provide a mechanism which insures that, if such board becomes a revitalization area GSOC board of directors under subsection (c)(1), at least one-third of all seats on the board of directors of such revitalization area GSOC shall be open for election every 2 years.

(C) BALLOTS.—The names of all individuals who—

(i) are eligible candidates (determined without regard to subparagraph (D)(iii)), and

(ii) secure a number of signatures specified by the local government having jurisdiction over the revitalization area,

shall appear on the ballot. Such ballot shall indicate the length of the term of office assigned to the seat for which each eligible candidate is seeking election.

(D) ELIGIBLE CANDIDATES.—For purposes of this section, the term "eligible candidate" means an individual who—

(i) is a resident of the revitalization area,

(ii) is at least 18 years of age, and

(iii) in the case of an individual who is serving a term of office as an elected official in local, State, or Federal government, wins more votes in the election provided under

subparagraph (A) than any other individual who is so serving such a term of office.

(2) PURPOSE.—Within 1 year after the date on which the revitalization area is designated under section 101, the revitalization area GSOC planning board shall, by a majority vote of the members of the board, determine whether establishment of a revitalization area GSOC would be in the best interests of the revitalization area. If such board determines that establishment of a revitalization area GSOC would not be in the best interests of such revitalization area, the board shall cease to exist 15 days after the date on which such determination is made. If such board determines that a revitalization area GSOC would be in the best interests of such revitalization area, the board shall formulate a plan for the creation of a revitalization area GSOC which will meet the needs of such revitalization area and shall submit such plan to the Governor of the State in which such revitalization area is located.

(b) CHARTERING OF REVITALIZATION AREA GSOC.—The legislature or the Governor of the State in which a revitalization area is located may charter a revitalization area GSOC but only if—

(1) a revitalization area GSOC planning board established under subsection (a)(1) has submitted a plan for the creation of a revitalization area GSOC for the revitalization area under subsection (a)(2);

(2) such charter is issued within 90 days after such plan is submitted to the Governor under subsection (a)(2); and

(3) such legislature or Governor finds that—

(A) the requirements of this section have been met, and

(B) the proposed revitalization area GSOC meets the requirements of section 1391(e) of the Internal Revenue Code of 1954.

(c) BOARD OF DIRECTORS.—

(1) INITIAL BOARD.—The revitalization area GSOC planning board shall serve as the initial board of directors of the revitalization area GSOC chartered under subsection (b).

(2) TERMS OF OFFICE.—

(A) INITIAL BOARD.—The term of office for each member of the initial board of directors of the revitalization area GSOC is the term of office assigned under subsection (a)(1)(B) to the seat on the revitalization area GSOC planning board for which such member was elected.

(B) SUCCEEDING BOARDS.—Except as provided in subparagraph (A), the term of office for members of the board of directors shall be a period determined by the local government having jurisdiction over the revitalization area which—

(i) is equal in length for each member of the board of directors, and

(ii) provides for the expiration of the terms of office for at least one-third of the members of such board every two years.

(3) ELECTIONS; VACANCIES.—Upon expiration of the term of office of a member of the board of directors or the occurrence of a vacancy on such board, an election conducted under procedures similar to the procedures provided under subsection (a) shall be held in order to fill such vacancy, or choose a successor, from among eligible candidates.

(4) DUTIES.—Except as provided in this Act or in subchapter U of chapter 1 of the Internal Revenue Code of 1954, the board of directors shall have the sole right to manage the property and affairs of the revitalization area GSOC.

(d) BUSINESS PLAN.—Within 90 days after the revitalization area GSOC is chartered under subsection (b), the board of directors of the revitalization area GSOC shall propose a business plan for the revitalization area GSOC which specifies—

(1) the objectives of the revitalization area GSOC,

(2) the type of investments which may be made by the revitalization area GSOC; and

(3) the manner in which the revitalization area GSOC proposes to develop the revitalization area.

Such plan shall be submitted to the shareholders of the revitalization area GSOC and, if approved by a majority of the shareholders, shall become a part of the bylaws of the revitalization area GSOC which may be amended only with the approval of a majority of the shareholders. The revitalization area GSOC shall not make any investment, or take any action in developing such revitalization area until such a plan is approved by a majority of the shareholders.

SEC. 302. DEFINITION OF REVITALIZATION AREA GSOC.

(a) IN GENERAL.—Section 1391 is amended by redesignating subsection (e) as subsection (f) and by inserting after subsection (d) the following new subsection:

"(e) REVITALIZATION AREA GSOC.—For purposes of this subchapter—

"(1) IN GENERAL.—The term 'revitalization area GSOC' means a GSOC which—

"(A) is chartered by the State legislature or the Governor of the State under the provisions of section 301 of the Community Assistance and Revitalization Act of 1983 to serve the needs of a certain revitalization area located within such State;

"(B) is authorized by its charter to acquire and develop real estate within such revitalization area; and

"(C) has a charter providing—

"(i) that shares of stock of such GSOC shall only be issued directly to eligible revitalization area residents on an equal basis;

"(ii) that each share of stock of such GSOC shall have full voting rights;

"(iii) that, except as provided in paragraph (6), no share of stock shall be transferable other than by will or by the laws of descent and distribution;

"(iv) that at least 40 percent of all employees employed by such GSOC at any time will be qualified employees (within the meaning of section 1042(b)(3));

"(v) that such GSOC shall qualify as a revitalization area GSOC under this subchapter; and

"(vi) that the board of directors of such GSOC shall authorize the issuance of such number of shares of stock of such GSOC as is necessary to assure that each eligible revitalization area resident and each individual who becomes an eligible revitalization area resident shall be issued stock on an equal basis.

"(2) ELIGIBLE REVITALIZATION AREA RESIDENT.—The term 'eligible revitalization area resident' means any individual who—

"(A) is at least 18 years of age, and

"(B) has been a resident of the revitalization area with respect to which the revitalization area GSOC was established at all times during the 1-year period ending on the date on which the share of stock of such GSOC is issued to such individual.

"(3) EQUAL BASIS.—For purposes of this subsection, shares of stock are issued or allocated on an equal basis if—

"(A) the number of shares of stock issued to each nonexempt resident is equal to the number of shares of stock issued to each other nonexempt resident, and

"(B) the number of shares of stock issued to an exempt resident—

"(i) is at least equal to the number of shares of stock issued to each nonexempt resident, and

"(ii) does not exceed the sum of—

"(I) the number of shares of stock issued to each nonexempt resident, plus

"(II) 25 percent of the number described in subclause (I).

"(4) NONEXEMPT RESIDENT.—The term 'nonexempt resident' means an eligible revitalization area resident other than an exempt resident.

"(5) EXEMPT RESIDENT.—The term 'exempt resident' means an eligible revitalization area resident who, under rules prescribed by the board of directors of the revitalization area GSOC, is eligible to receive a number of shares of such stock which a nonexempt resident is eligible to receive. Such term may include, but is not limited to—

"(A) employees of such revitalization area GSOC,

"(B) individuals who have performed voluntary services for such revitalization area GSOC, and

"(C) individuals who are disabled.

"(6) TRANSFERABILITY.—Any shareholder of stock of a revitalization area GSOC may sell his nonforfeitable rights in any such share to such revitalization area GSOC at any time after the expiration of the 5-year period which begins when such share of stock is issued by the revitalization area GSOC. If a revitalization area GSOC purchases any share of its stocks so offered for sale, such purchase shall be at the fair market value of such share."

(b) DEFINITION OF GSOC.—

(1) IN GENERAL.—Subsection (a) of section 1391 (relating to general stock ownership corporations) is amended to read as follows:

"(a) GENERAL STOCK OWNERSHIP CORPORATION.—For purposes of this subchapter, the term 'general stock ownership corporation' (hereinafter in this subchapter referred to as a 'GSOC') means a domestic corporation which—

"(1) is not a member of an affiliated group (as defined in section 1504);

"(2) is chartered and organized after December 31, 1978, and before January 1, 1995;

"(3) is chartered—

"(A) by an act of a State legislature,

"(B) as a result of a statewide referendum, or

"(C) in the case of a revitalization area GSOC, by the Governor of a State under section 301(b) of the Community Assistance and Revitalization Act of 1983;

"(4) has a charter providing—

"(A) for the issuance of only 1 class of stock,

"(B) for the issuance of shares only to eligible individuals (as defined in subsection (c));

"(C) for the issuance of at least one share of stock—

"(i) in the case of a corporation other than a revitalization area GSOC, to each eligible individual, or

"(ii) in the case of revitalization area GSOC to each eligible revitalization area resident.

unless such individual or resident elects within 1 year after the date of issuance of such share not to receive such share;

"(D) that no share of stock be transferable—

"(i) by a shareholder other than by will or the laws of descent and distribution until after the expiration of 5 years from the date

such stock is issued by the GSOC unless the shareholder ceases to be a resident of—

"(I) the chartering State, or

"(II) in the case of a share of stock in a revitalization area GSOC, the revitalization area;

"(ii) to any person other than—

"(I) a resident individual of the chartering State,

"(II) the estate of a deceased shareholder, or

"(III) in the case of a share of stock in a revitalization area GSOC, such revitalization area GSOC; or

"(iii) in the case of a share of stock in a corporation other than a revitalization area GSOC, to any individual who, after the transfer, would own more than 10 shares of the GSOC; and

"(E) that such corporation shall qualify as a GSOC under the Internal Revenue Code; and

"(5) is empowered to invest in properties.

For purposes of this subsection, section 1504(a) shall be applied by substituting '20 percent' for '80 percent' wherever it appears."

(2) ACQUISITION OF REAL ESTATE CORPORATION BY GSOC.—Section 1391 is amended by redesignating subsection (f) as subsection (g) and by inserting after subsection (e) the following new subsection:

"(f) ACQUISITION OF REAL ESTATE CORPORATION.—

"(1) IN GENERAL.—For purposes of subsection (a)(1), a corporation shall not be considered a member of an affiliated group solely because such corporation owns stock in a real estate corporation unless such corporation owns at least 80 percent of the voting power of all classes of stock of such real estate corporation and at least 80 percent of each class of the nonvoting stock of such real estate corporation.

"(2) DEFINITIONS.—For purposes of this subsection—

"(A) The term 'real estate corporation' means a corporation which derives at least 95 percent of its gross income, for any taxable year in which a GSOC owns more than 20 percent of the voting power of all classes of stock of such corporation, from—

"(i) rents or real property,

"(ii) gain from the sale or other disposition of real property (including interests in mortgages or real property), and

"(iii) amounts described in section 856(c)(2)(G).

"(B) STOCK.—The term 'stock' has the meaning given such term in section 1504(a)."

(c) MINIMUM DISTRIBUTIONS.—Subsection (a) of section 1396 (relating to minimum distributions) is amended to read as follows:

"(a) IN GENERAL.—An electing GSOC shall distribute—

"(1) in the case of a GSOC other than a revitalization area GSOC; at least 90 percent of its taxable income for any taxable year, or

"(2) in the case of a revitalization area GSOC, at least 10 percent of its taxable income for any taxable year.

by Janauary 31 following the close of such taxable year. Any distribution made on or before January 31 shall be treated as made as of the close of the preceding taxable year."

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after December 31, 1983.

SEC. 303. CONTRIBUTIONS TO GSOC TREATED AS CHARITABLE CONTRIBUTIONS.

(a) IN GENERAL.—Subsection (c) of section 170 (defining charitable contribution) is amended by inserting after paragraph (5) the following new paragraph:

"(6) A general stock ownership corporation (within the meaning of section 1391)."

(b) PERCENTAGE LIMITATIONS.—Subparagraph (A) of section 170(b)(1) (relating to percentage limitations for individuals) is amended—

(1) by striking out "or" at the end of clause (vii),

(2) by inserting "or" at the end of clause (viii), and

(3) by inserting after clause (viii) the following new clause:

"(ix) a general stock ownership corporation (within the meaning of section 1391),".

(c) CONFORMING AMENDMENTS.—

(1) Subsection (a) of section 2055 (relating to transfers for public, religious, and charitable uses) is amended—

(A) by striking out "or" at the end of paragraph (3),

(B) by striking out the period at the end of paragraph (4) and inserting in lieu thereof "; or", and

(C) by inserting after paragraph (4) the following new paragraph:

"(5) to or for the use of a general stock ownership corporation (within the meaning of section 1391)."

(2) Subsection (a) of section 2522 (relating to charitable and similar gifts) is amended—

(A) by striking out the period at the end of paragraph (4) and inserting in lieu thereof "; or", and

(B) by adding at the end thereof the following new paragraph:

"(5) a general stock ownership corporation (within the meaning of section 1391)."

(d) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years ending after December 31, 1983.

SEC. 304. NONRECOGNITION OF HALF THE GAIN FROM SALE OR EXCHANGE OF PROPERTY TO A REVITALIZATION AREA GSOC.

(a) IN GENERAL.—Part III of subchapter 0 of chapter 1 (relating to common taxable exchanges) is amended by adding at the end thereof the following new section:

"SEC. 1043. SALE OR EXCHANGE OF PROPERTY TO A ZONE GSOC.

"Only 50 percent of the gain realized from the sale or exchange of any property to, or with, a revitalization area GSOC (within the meaning of section 1391(e)) shall be recognized."

(b) CONFORMING AMENDMENT.—The table of sections for part III of subchapter 0 of chapter 1 is amended by adding at the end thereof the following new item:

"Sec. 1043. Sale or exchange of property to a revitalization area GSOC."

TITLE IV—EMPLOYEE STOCK OWNERSHIP PROVISIONS

SEC. 401. INCREASE IN THE LIMIT ON CONTRIBUTIONS ATTRIBUTABLE TO PRINCIPAL PAYMENTS.

(a) IN GENERAL.—Subparagraph (A) of section 404(a)(10) (relating to principal payments) is amended by striking out "25 percent" and inserting in lieu thereof "50 percent".

(b) CONFORMING AMENDMENT.—Paragraph (6) of section 415(c) (relating to special limitations for employee stock ownership plan) is amended by adding at the end thereof the following new subparagraph:

"(D) In the case of employer contributions described in section 404(a)(10)(A), paragraph (1) shall be applied by substituting '50 percent' for '25 percent' in subparagraph (B)."

SEC. 402. DEDUCTIBILITY OF CERTAIN DIVIDEND DISTRIBUTIONS FROM EMPLOYEE STOCK OWNERSHIP PLANS AND QUALIFICATION FOR PARTIAL EXCLUSION FROM INCOME.

Section 404 (relating to deductions for employer contributions to an employees' trust) is amended by adding at the end thereof the following new subsection:

"(k) DIVIDENDS PAID DEDUCTIONS.—There shall be allowed as a deduction to an employer (without regard to the limitations imposed by this section) the amount of any dividend paid in cash by such employer during the taxable year with respect to any shares of stock of the employer if such share of stock—

"(1) is held on the record date for such dividend by a tax credit employee stock ownership plan or an employee stock ownership plan (as defined in section 4975(e)(7)), and in accordance with the plan provisions, the dividend received by the plan with respect to such share of stock—

"(A) is distributed in cash, not later than 60 days after the close of the plan year in which such dividend is received, to participants in the plan, or

"(B) is applied by the plan to the repayment of a loan (described in section 4975(d)(3)) incurred for the purpose of acquiring stock of the employer, or

"(2) is held on the record date for such dividend by a former employee (or beneficiary) who received such stock in a distribution from a tax credit employee stock ownership plan or an employee stock ownership plan (as defined in section 4975(e)(7))."

SEC. 403. CERTAIN CONTRIBUTIONS TO ESOP TREATED AS CHARITABLE CONTRIBUTIONS.

(a) IN GENERAL.—Subsection (c) of section 170 (defining charitable contributions), as amended by section 303 of this Act, is amended by inserting after paragraph (6) the following new paragraph:

"(7) A tax credit employee stock ownership plan or an employee stock ownership plan (as defined in section 4975(e)(7)) but only if—

"(A) such contribution or gift consists exclusively of employer securities (within the meaning of section 409A(1));

"(B) such contribution or gift is allocated, pursuant to the terms of such plan, to the employees participating under the plan in a manner consistent with section 401(a)(4);

"(C) no part of such contribution or gift is allocated under the plan for the benefit of the taxpayer or decedent, or any person related to the taxpayer or decedent under the provisions of section 267(b), or any other person who owns more than 25 percent in value of any class of outstanding employer securities (as defined in section 409A(1)) or qualifying employer securities (as defined in section 4975(e)(8)) under the provisions of section 318(a);

"(D) such contribution or gift is made only pursuant to the provisions of such tax credit employee stock ownership plan or such employee stock ownership plan;

"(E) such plan treats such employer securities as being attributable to employer contributions; and

"(F) no deduction under section 404 and no credit under section 44G is allowed with respect to such contribution or gift."

(b) PERCENTAGE LIMITATIONS.—Subparagraph (A) of section 170(b)(1) (relating to percentage limitations for individuals), as

amended by section 303 of this Act, is amended—

(1) by striking out "or" at the end of clause (viii),

(2) by inserting "or" at the end of clause (ix), and

(3) by inserting after clause (ix) the following new clause:

"(x) a tax credit employee stock ownership plan or an employee stock ownership plan (as defined in section 4975(e)(7)),".

(c) CONFORMING AMENDEMNTS.—

(1) Subsection (a) of section 2055 (relating to transfers for public, religious, and charitable uses), as amended by section 303 of this Act, is amended—

(A) by striking out "or" at the end of paragraph (4),

(B) by striking out the period at the end of paragraph (5) and inserting in lieu thereof "; or", and

(C) by inserting after paragraph (5) the following new paragraph:

"(6) to a tax credit employee stock ownership plan or an employee stock ownership plan (as defined in section 4975(e)(7)) but only if the requirements of section 170(c)(7) are met."

(2) Subsection (a) of section 2522 (relating to charitable and similar gifts), as amended by section 303 of this Act, is amended—

(A) by striking out "or" at the end of paragraph (4),

(B) by striking out the period at the end of paragraph (5) and inserting in lieu thereof "; or "; and

(C) by adding at the end thereof the following new paragraph:

"(6) a tax credit employee stock ownership plan or an employee stock ownership plan (as defined in section 4975(e)(7)) but only if the requirements of section 170(c)(7) are met."

(3) Section 415 (relating to limitations on benefits and contributions under qualified plans) is amended by adding at the end thereof the following new subsection:

"(1) CHARITABLE CONTRIBUTIONS.—The limitations provided under this section shall not apply with respect to any contribution or gift described in section 170(c)(7) if the requirements of section 170(c)(7) are met."

SEC. 404. EFFECTIVE DATE.

The amendments made by this title shall apply to taxable years ending after December 31, 1983.

TITLE V—ENERGY PROVISIONS

SEC. 501. RESIDENTIAL ENERGY CREDIT.

(a) INCREASE IN AMOUNT OF CREDIT FOR ENERGY CONVERSATION EXPENDITURES.—Paragraph (1) of section 44C(b) (relating to qualified energy conservation expenditures) is amended by striking out "15 percent" and inserting in lieu thereof "40 percent".

(b) EXTENSION OF CREDIT FOR DWELLINGS IN REVITALIZATION AREAS.—Section 44C of such Code (relating to residential energy credit) is amended—

(1) by striking out subsection (f),

(2) by inserting "located within a revitalization area" after "any dwelling unit" in paragraphs (1) and (2) of subsection (b),

(3) by striking out "the United States" in paragraphs (1)(A) and (2)(A)(i) of subsection (c) and inserting in lieu thereof "a revitalization area",

(4) by striking out "1987" in the text and caption of subparagraph (B) of subsection (b)(6) and inserting in lieu thereof "2004", and

(5) by adding at the end of subsection (c) the following new paragraph:

"(11) REVITALIZATION AREA.—The term 'revitalization area' means an area with respect to which a designation as a revitalization area is in effect under section 101 of the Community Assistance and Revitalization Act of 1983 at any time during the taxable year."

(c) EFFECTIVE DATES.—

(1) INCREASE IN AMOUNT OF CREDIT.—The amendment made by subsection (a) shall apply to taxable years ending after December 31, 1983.

(2) EXTENSION OF CREDIT.—The amendments made by subsection (b) shall apply with respect to expenditures made after December 31, 1985, in taxable years ending after such date.

SEC. 502. INCREASE IN ENERGY INVESTMENT TAX CREDIT FOR REVITALIZATION AREA BUSINESSES.

(a) IN GENERAL.—Subparagraph (C) of section 46(a)(2) (relating to the energy percentage) is amended—

(1) by striking out "The energy" in clause (i) and inserting in lieu thereof "Except as provided in clause (v), the energy",

(2) by inserting "or (v)" after "and (iv))" in clause (ii), and

(3) by adding at the end thereof the following new clause:

"(v) REVITALIZATION AREA BUSINESS ENERGY PROPERTY.—In the case of a taxpayer which is a revitalization area business for the taxable year (as defined in section 7701(a)(40)), the energy percentage to be applied with respect to any energy property is 30 percent for the period beginning January 1, 1984, and ending December 31, 2002."

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to periods after December 31, 1983, under rules similar to the rules contained in section 48(m) of the Internal Revenue Code of 1954.

COMMUNITY ASSISTANCE AND REVITALIZATION ACT

SUMMARY

In our nation's distressed communities, decay in physical structures is matched only by the despair in residents' lives. The Community Assistance and Revitalization Act (CARA) will seek to halt and reverse these trends by using carefully-targeted Federal tax incentives in selected "revitalization areas" to promote:

Expansion of existing businesses and formation of new businesses, particularly small and minority businesses;

Greater private investment in community revitalization and business growth;

More jobs for poor and hard-to-employ persons;

A greater equity stake and more influence over the course of development for community residents; and

Increased employee ownership of area businesses.

The sponsors of CARA recognize that Federal tax incentives, no matter how carefully targeted, cannot alone solve the many problems of distressed communities. Rather tax incentives are one means to an end: a better quality of life for residents of disadvantaged areas. CARA, therefore, is a supplement, not a replacement, for current and future efforts to provide job training, increase low- and moderate-income housing, reduce crime, rebuild decaying infrastructures, and ensure quality education.

Equally important, the sponsors view CARA's revitalization areas as experiments whose success depends primarily on whether poor and disadvantaged persons obtain useful job skills, secure lasting jobs, and influence the course of their communities' development. In this, CARA differs significantly from so-called "enterprise zone" proposals which emphasize benefits to business. CARA makes area residents and employees of area businesses its primary beneficiaries, rather than trusting in "trickle down" benefits. For example, CARA offers tax incentives to businesses that:

Share ownership with their employees through mechanisms such as Employee Stock Ownership Plans; and

Maintain a workforce made up of at least 30 percent disadvantaged persons.

CARA also encourages residents to take a greater role in revitalizing their neighborhoods. It:

Enables area residents to form General Stock Ownership Corporations (currently recognized in tax law) to invest in and influence community development, capture the benefits of real estate appreciation for residents, and minimize residential displacement; and

Targets its economic benefits to communities willing to use them as part of a comprehensive revitalization effort.

Finally, CARA directs resources to provide lasting benefits to communities. It:

Promotes the establishment of Entrepreneurial Development Centers (EDCs) to provide managerial assistance and technical resources, such as laboratories and computers, to small businesses in the area;

Directs Federal job-training funds to community-based programs of proven effectiveness; and

Offers tax benefits to investors in area property and businesses, including an immediate deduction of up to $10,000 for an investment in an area business and non-recognition of capital gains when the proceeds are immediately reinvested in the revitalization area.

ELIGIBILITY CRITERIA

A community wishing to qualify as a revitalization area must be at least one mile square and either meet minimum population requirements (4,000 in urban areas and 2,500 elsewhere) or fall within an Indian reservation. It must also suffer pervasive poverty, high unemployment, and general distress, evidenced by:

An average rate of unemployment at least 50 percent higher than the national average during the preceding 18 months;

Designation as a low-income poverty area by the Bureau of the Census;

At least 60 percent of community residents having incomes less than 80 percent of the median income in the surrounding area; or

Population loss of at least 10 percent between 1970 and 1980, coupled with chronic abandonment of buildings and substantial property tax arrearages.

The creation of a revitalization area begins at the local level. An interested local government first consults with community residents, businesses, and organizations. It then prepares a revitalization area development plan and establishes a revitalization area management authority to implement the plan and coordinate CARA with other programs. At this point, the state government applies on the local government's behalf for the Secretary of Housing and Urban Development's formal approval of the revitalization area designation. The local government may apply to the Secretary directly if, 60 days after a request, the State fails to apply.

The revitalization area development plan is the critical part of the application. It must specify the commitments the state

government, local government, and other groups will make to:

Increase equity for residents as a result of community development;

Provide job, managerial, and entrepreneurial training to residents, and encourage minority and youth entrepreneurship;

Make financial, managerial, and technical assistance available to small, minority, and employee-owned businesses;

Increase energy efficiency and use of renewable energy sources;

Limit residential displacement, mitigate its effects and maintain and increase low- and moderate-income housing;

Use industrial development bonds (IDBs) to aid small, minority, and employee-owned businesses;

Streamline government regulations not affecting health and safety; and

Provide public services, including police and fire protection using as much as possible, on area businesses.

Explanation: These commitments will demonstrate a community's serious interest in the success of its revitalization program. Because the applications address a wide range of community issues, the Secretary of HUD will be able to evaluate carefully community qualifications and the merits of the plans. At the same time, communities will not find these requirements unduly burdensome nor be disqualified if unable to make commitments, in their applications, in every area listed under subsection 102(c).

APPROVAL OF REVITALIZATION AREA DESIGNATION

The Secretary of HUD will establish a two-step process for approving designations of revitalization areas. First, he will give preliminary approval to a group of applications, based primarily on the quality and comprehensiveness of the revitalization area development plans.

Second, from this group, the Secretary will give final approval to those applicants that have the highest levels of general distress and have demonstrated the most comprehensive and determined commitments to pursue their plans. The Secretary must recognize, however, that many deserving communities may not necessarily have the financial resources to enter into a wide range of commitments. He must make special allowances for those applicants.

The Secretary may approve designations of an unlimited number of revitalization area from 1984 through 1993. He must approve 30 designations in 1984, 30 in 1985, 35 in 1986, 45 in 1987, and 65 in 1988. Each designation approval will last 20 years.

Explanation: These limitations will keep the revitalization area program experimental and manageable without unduly restricting the Secretary's discretion to expand the program if it proves successful. They will also increase competition among communities so that those with more comprehensive revitalization plans and stronger commitments to giving residents a stake in community development will be favored.

The two-step application process will reduce the burden on, and costs, communities seeking approval of revitalization area designations. A community will know—if it receives preliminary approval—whether it has a reasonable chance for final approval before it has spent resources to enter into the wide range of commitments on which the Secretary will judge its application.

THE GENERAL STOCK OWNERSHIP CORPORATION (GSOC)

GSOSs are resident-owned corporations that receive preferential tax treatment under current law. CARA will amend the Internal Revenue Code to permit the creation of GSOCs for revitalization areas. An area GSOC will have the following features:

The area GSOC board of directors will prepare a business plan for GSOC investment in area real estate development and commercial enterprise.

Adults over 18 who have lived in the areas for at least one year will be eligible for equal, free shares in GSOC ownership. These shares will carry full voting privileges, will be non-transferable, and will entitle the owner to become a candidate for membership on the GSOC board.

The GSOC board of directors will be elected democratically by area resident shareholders. At least one-third of all seats on the board will be open for election every two years.

The GSOC will pay no Federal corporate income tax so long as it distributes at least 10 percent of its profits in dividends to resident shareholders during the corporation's taxable year.

A person who sells or exchanges property with an area GSOC will have to recognize only 50 percent of the gain.

Contributions to an area GSOC will qualify as charitable contributions deductible from income taxes.

Explanation: These provisions will allow residents of a distressed area to form their own real estate development company. Through this company, they can influence the residential and commercial revitalization of their community. In particular, the area GSOC could be used to (1) limit the adverse consequences of residential displacement, (2) take advantage of real estate appreciation accompanying development, and (3) influence the types of businesses that will locate in the community. The earnings from these activities, combined with joint ventures with other businesses, should provide profits for the area GSOC and ultimately dividends for resident shareholders.

EMPLOYEE OWNERSHIP

CARA encourages employers to share ownership of their businesses with employees. It:

Eliminates the capital gains tax on the sale of stock or other equity in a business in which 51 percent of the non-managerial employees share ownership. To qualify, a business must establish an employee stock ownership plan (or a tax credit employee stock ownership plan) in which non-managerial employees own at least 35 percent of the stock or value of the business. Each year business must distribute at least 10 percent of its profits to its employees.

Provides a two percent tax credit (up to $50,000 a year) for each 10 percent of stock or equity owned by at least 70 percent of the qualified employees in a qualified business.

Permits an employer to deduct 50 percent of his contribution to an employee-owned trust if it was used to repay the principal of a loan incurred to purchase the employer's stock.

Treats contributions, bequests, or similar transfers of an employer's stock to an employee stock ownership plan as charitable contributions, deductible from income.

Permits an employer to deduct cash payments of dividends to employees through an employee stock ownership plan (or a tax credit employee stock ownership plan).

Explanation: When employees share ownership in their companies, they have a stake in their jobs. As a result, they experience greater satisfaction in their work and are frequently more productive. Encouraging employee-owned businesses is a way to keep jobs and economic benefits flowing to revitalization area.

EMPLOYMENT OPPORTUNITIES

Several CARA provisions support job training effort and promote increased employment opportunities.

First, CARA would target Federal assistance to proven, community-based job training programs. Second, it continues the Targeted Jobs Tax Credit and third, it would provide area employers with a substantial tax credit for employing disadvantaged or hard-to-employ individuals (40 percent of wages paid to such individuals in the first year; 30 percent in the second; 20 percent in the third; and 10 percent in the fourth). Alternatively, an employer may deduct up to 50 percent of his profits from his income depending on the percentage of disadvantaged or hard-to-employ individuals in his workforce.

Explanation: CARA recognizes that, over time, providing meaningful employment for disadvantaged individuals becomes less a problem of new hires and more a problem of retention in the workforce. Consequently, CARA gives growing businesses a tax credit for hiring disadvantaged individuals, and established businesses a credit for continuing to employ the disadvantaged.

DEVELOPMENT OF REVITALIZATION AREA BUSINESSES

As one of its primary objectives, CARA seeks to encourage the location and growth of businesses in revitalization areas. It is particularly concerned with development of small businesses, which create most of the new jobs in the United States. Unfortunately small businesses fail at a great rate because they lack capital and management and technical experience. CARA offers several Federal tax incentives to address both the special problems of small businesses and the general problems of revitalization area businesses.

The Entrepreneurial Development Center (EDC). A person may take a 10 percent tax credit (up to $750,000) for an investment in an entrepreneurial development center that provides area businesses with marketing, financing, job training and other managerial assistance as well as technical resources such as computer and laboratory services. EDCs are for-profit enterprises, which must do at least 50 percent of their business in the revitalization area and assess fees reasonably related to their operating costs.

Explanation: EDC services are essential to small, indigenous, and employee- or resident-owned businesses. Not only will EDCs increase productivity in revitalization areas, they also will reduce the failure rate of small businesses. It would be counterproductive to help small businesses create new jobs for the unemployed if those businesses subsequently fail and the jobs disappear.

Business Capital. Adequate capital at reasonable rates is essential for the establishment and growth of businesses in revitalization areas. CARA will help revitalization area businesses attract private financing by:

Deferring recognition of capital gains from the sale of stocks, debentures, or property to the extent the proceeds are reinvested in area businesses or properties within 24 months.

Permitting purchasers of stocks or debentures of area businesses to take an immediate deduction for the amount of their investment up to $10,000.

CARA further provides for some governmental assistance:

Directing at least $50 million in direct loans under section 7(a) of the Small Business Act to be used by revitalization area businesses.

Energy Tax Credits. CARA allows area businesses to take a 30 percent investment tax credit for installing energy conservation and renewal energy equipment.

HOUSING

Community revitalization often leads to increased housing costs, forcing area residents to leave the community. To protect residents from displacement and rising housing costs, CARA:

Encourages the local government to make commitments to minimize displacement and mitigate its consequences.

Provides a 10 percent investment tax credit for persons investing in Federally-supported low income housing.

Provides a 40 percent tax credit for installing energy conservation and renewable energy equipment in area residences, thus reducing energy costs.

BUSINESS RELOCATION

A revitalization area business which has relocated from another distressed area must maintain its level of business activity and employment for at least three years. If not, the IRS may recapture any tax benefits the business has enjoyed as a result of its relocation.

Explanation: It would be a tragedy if programs designed to help distressed areas actually increased economic distress elsewhere. It makes little sense for the Federal government to forego tax revenue simply to alter the location of current jobs. It makes even less sense to force the poor and unemployed to move to obtain benefits of a community revitalization program intended to improve their quality of life. This provision ensures that businesses expand into revitalization areas, creating more total jobs for poor and hard-to-employ persons.

COMMUNITY ASSISTANCE AND REVITALIZATION ACT OF 1983—SECTION-BY-SECTION ANALYSIS

TITLE I—DESIGNATION OF REVITALIZATION AREAS

This title establishes the process by which a state or local government may nominate an area as a "revitalization area" and seek approval by the Federal government. Approval entitles the revitalization area to several targeted Federal tax incentives provided for in this bill to promote revitalization of distressed areas and enhance the quality of life of their residents.

Section 101. Subsection (a) defines a "revitalization area" as any area so nominated by a state government and designated by the Secretary of Housing and Urban Development (HUD), after consultation with the secretaries of Commerce, Labor, and the Treasury and the Administrator of the Small Business Administration.

Subsection (b) provides that the designation of an area as a "revitalization area" shall remain in effect for 20 years unless revoked. The Secretary of HUD may revoke the designation if he determines that the local government is not substantially complying with the revitalization area development plan submitted as part of the application for designation.

Before revocation, the Secretary must provide the local government with reasonable notice and an opportunity for a hearing.

Under subsection (c), the Secretary may designate revitalization areas from January 1, 1984, until December 31, 1993. He must designate 30 revitalization areas in 1984, 30 in 1985, 35 in 1986, 45 in 1987, and 65 in 1988.

Subsection (d) permits the local government to nominate an area for designation as a revitalization area if, within 60 days after it requests the State, the State fails to nominate the area.

Subsection (e) requires the Secretary to report to Congress every four years after an area's designation on the effects of the designation in attracting business, providing jobs, and improving the welfare of its residents.

Section 102. Subsection (a) authorizes the Secretary to give preliminary approval of an area as a revitalization area if it meets the requirements of subsection (b) and if the local government has (1) prepared a revitalization area development plan; (2) established a revitalization area management authority; and (3) consulted with area residents, businesses, and quasi-public and private organizations on the possible designation, the plan, and the mangement authority.

In addition the state (or in its failure the local government) must submit the revitalization area development plan to the Secretary along with other information the Secretary may require.

Subsection (b) sets forth several sets of requirements for an area to quality as a revitalization area.

The area must meet all the elements in the first set of requirements. Consequently, it must:

(1) fall within the jurisdiction of the designating government;

(2) have a continuous boundary which includes, if feasible, proximately located vacant or underutilized lands or buildings conveniently accessible to residents;

(3) have a population of at least 4000, if any portion of the area falls within a standard metropolitan statistical area with a population of 50,000 or greater, or 2500 in any other case, or fall within an Indian reservation; and

(4) comprise at least one square mile.

As a second requirement, the area must also suffer from pervasive poverty, unemployment, and general distress, as determined by the Secretary.

Finally, the area must meet one element of the third set of requirements. It must either have an average rate of unemployment of 1½ times the average national rate of unemployment for the most recent 18 month period; qualify as a low-income poverty area; have at least 60 percent of its residents with incomes below 80 percent of the median income of the residents of the designating state or local government; or both experience a decrease of 10 percent in aggregate population of all census tracts in the area between 1970 and 1980 and suffer chronic abandonment or demolition of, or substantial tax arrearages for, its commercial or residential structures.

The Secretary must base his determinations under this title on data from the Federal government and data submitted by the deignating government, if he determines the data is reasonably accurate.

Subsection (c) sets out the requirements for the revitalization area development plan developed by the local government.

In general, the plan must provide an assessment of the economic and social conditions of the revitalization area, specify the development objectives for the area and assign priorities; provide for the creation of a revitalization area management authority to implement the plan and coordinate the activities under this Act with other local programs; specify the powers of this authority, particularly with respect to any General Stock Ownership Corporation (GSOC) established for the area; and establish guidelines for making investment and development decisions for the area and for monitoring and evaluating the effectiveness of the plan.

In addition, the plan must address several specific areas of concern. First, it must evaluate the equity possessed by, or available to, area residents and specify the equity they will receive as a result of the area's development.

This equity may include shares of stock in an area GSOC or an interest in a business, partnership, employee stock ownership plan, cooperative or joint venture; home ownership through homesteading, cooperatives, creative financing mechanisms or similar means; or public ownership of area property.

Second, it must evaluate employment opportunities in the area, the employment status, job skills, and training needs of residents, the employment and job and managerial training needs of area businesses, and the existing jobs, entrepreneurial and managerial training resources available to area residents and business.

In addition, it must specify the commitments state and local governments and others will make to assist in meeting the employment, and job, entrepreneurial and managerial training needs of area residents and businesses.

Third, the plan must evaluate the resource and employment requirements, and the management assistance and other needs, of small, minority, and ownership-expanding businesses in the area; evaluate the financial, managerial and technical resources available to these types of businesses; identify for them potential business opportunities and additional sources of financial and other resources; and specify any commitments state and local governments and others will make to meet the needs of these types of businesses.

Fourth, it must evaluate the status of efforts to improve energy efficiency in the area and specify any commitments state and local governments and others will make to encourage energy efficiency and investment by area residents and businesses in energy property, renewable energy source property, insulation, and other energy conserving components, as defined in the Internal Revenue Code.

Fifth, the plan must specify any commitments of other resources to the development of the area and to limit resulting residential displacement and mitigate its effects. Moreover, it must specify any commitment from the local government that at least 10 percent of the proceeds from its industrial development bonds will be used directly or indirectly by area businesses. In determining which area businesses will receive the proceeds, the government must give preference to small, minority-owned, and ownership-expanding businesses.

The plan must also specify any government commitment to donate property within the area to an area GSOC or a tax-exempt educational organization.

Finally, the plan must specify any commitment to encourage and assist minority and youth enterpreneurship; maintain and increase the availability of low- and moderate-income housing; simplify or streamline

government regulation, not directly related to health and safety of area employers and employees; improve public services; provide police, fire or other public safety measures; reduce fees, taxes, or other expenses for area businesses; encourage use of eminent domain powers for any area GSOC, except if it would deprive area residents of adequate housing; and encourage the use of private businesses within the area to provide public services.

Section 103. Subsection (a) authorizes the Secretary to give final approval to the designation of a revitalization area if he (1) has given preliminary approval and (2) finds the local government has taken adequate measures to assure fulfillment of the commitments made in the revitalization area development plan.

Subsection (b) directs the Secretary to give preference to areas with the highest levels of general distress and where the local government demonstrates the most comprehensive and determined commitment to pursue the revitalization area development plan. In addition, the Secretary must consider the local government's economic ability to make the commitments in the development plan and the extent to which the application for designation corresponds to any State plan for revitalizing distressed areas.

Section 104. Subsection (a) defines "ownership-expanding business" as a revitalization area business organized and operated as a producer cooperative or which establishes an employee stock ownership plan or tax credit employee stock ownership plan. In addition, nonmanagerial employees must own at least 35 percent of (1) the total voting power of all voting stock, or the total value of all stock, if a corporation or (2) the value of the business, if not a corporation.

Moreover, the business must distribute at least 10 percent of its profits each year to its employees equally and, if requested, pay the cost of an audit of its records.

Subsection (b) directs the Secretary, 180 days after enactment, to prescribe regulations providing (1) deadlines to apply for preliminary and final approval of a designation and (2) the form and manner for submitting the applications.

Subsection (g) provides definitions for this section.

Section 105. This section directs the Secretary of HUD to promote the coordination of all Federal housing, community and economic development, banking, financial assistance, and employment programs within the revitalization area; expedite, to the greatest extent possible, the consideration of applications for these programs; and provide, whenever possible, for the consolidation of periodic reports required under these programs into one summary report submitted at intervals.

Section 106. Subsection (a) requires the head of each Federal department, agency or program that distributes Federal funds or awards Federal contracts for job training to give preference to (1) any program, organization or local government located in, or primarily serving, a revitalization area over all other programs, organizations or local governments; (2) those programs or organizations specified as part of the job-training commitments under the area development plan over all other programs or organizations serving the area; (3) community-based organizations or entrepreneurship development centers located in, or primarily serving, the area over all other organizations serving the area.

Subsection (b) directs the same Federal officials to take such actions as necessary to assure that a recipient of Federal job-training funds or contracts will give special consideration to the preferences in subsection (a) in distributing these funds or awarding any subcontracts under these contracts.

Subsection (c) defines a "community-based organization."

TITLE II—TAX INCENTIVES

Section 201. This section defines "revitalization area business" as any business that (1) receives 50 percent of its gross receipts each year from the conduct of a trade or business that produces goods or provides services within a revitalization area and (2) at least 30 percent of the employees hired after designation of the area (or after commencing business in the area) are qualified employees.

A business active in an area before designation as a revitalization area does not qualify as a revitalization area business for any taxable year unless, on the average, the number of its employees for such taxable year is at least 10 percent greater than the number of its employees during the taxable year preceding designation of the area.

If a business relocates from another distressed area into a revitalization area, it must maintain its new level of activity in the revitalization area, and remain owned or controlled by the same persons, for at least three years to obtain the tax benefits it would otherwise receive under CARA.

Section 211. This section adds a new section 44H to the Internal Revenue Code to allow an electing, qualified corporation to take a credit against taxes based on the percentage of its stock held by or for qualified employees. For every ten percent of outstanding shares of stock owned by, or on behalf of, its qualified employees, a qualified corporation may take a tax credit equalling 2 percent of its taxable income.

The tax credit may not exceed $50,000 for any taxable year.

In the case of a controlled group of corporations, the $50,000 ceiling shall be reduced for each member of the group by apportioning it among the component members as the Secretary of the Treasury shall by regulation prescribe.

The tax credit under this subsection may not exceed the tax imposed by this chapter of the Internal Revenue Code for the taxable year, reduced by the sum of the credits allowable under a section of this subpart with a lower number or letter designation than this section, other than those allowed by sections 31, 39, and 43.

This section prohibits a corporation from electing to take this tax credit if it elects to take the tax credit under section 44G.

A qualified corporation is defined as a revitalization area business in which at least 70 percent of its employees own shares of its stock.

Section 212. This section adds a new section 1041 to the Internal Revenue Code. Subsection (a) of the new section 1041 provides that a taxpayer shall not recognize gain from the sale or exchange of any share of stock in an area business with (1) an employee stock ownership plan or a tax credit employee stock ownership plan investing primarily in stock issued by the area business, if it meets the requirements of subsection (b); or (2) the area business if it is a producer cooperative.

Subsection (b) of new section 1041 requires that, during the taxable year:

(1) at least 51 percent of the total number of shares of stock of the area business sold or exchanged by the taxpayer to, or with, the plan under subsection (a) must be allocated to the accounts of nonmanagerial employees;

(2) the plan must allocate at least 51 percent of the total number of shares of stock of the business held by the plan among at least 51 percent of the nonmanagerial employees;

(3) in the case of a tax credit employee stock ownership plan, all shares sold or exchanged which are allocated to the accounts of employees must vest within 5 years after the date of the sale; and

(4) the taxpayer maintains such records and provides such information as the Secretary of the Treasury may require by regulation.

Subsection (c) of the new section 1041 provides definitions for the section.

Section 221. This section adds a new section 1042 to the Internal Revenue Code to allow a taxpayer to defer the recognition of any capital gain reinvested in qualified properties.

Subsection (b) defines:

(1) "qualified property" as any tangible personal or real property acquired for business use by the taxpayer in an existing revitalization area or any stock or interest acquired in a small revitalization area business.

(2) "a small revitalization area business" as any revitalization business with average annual gross receipts less than $4 million.

Under paragraph (3) of section 1042(b), a person is a "qualified employee" if he or she performs at least 50 percent of his or her services in a revitalization area and either has been unemployed for 10 weeks, has a poverty level income, receives public assistance, or is eligible for the Targeted Jobs Tax Credit.

Paragraph (4) of section 1042(b) includes low income rental housing as "qualified property" if it is located in the area and it was built, or each of its units has received at least $10,000 in rehabilitation, after the area's designation as a revitalization area.

Paragraph (5) of section 1042(b) extends the deferral of capital gains for all revitalization area transactions to the first exchange occurring after the revitalization area designation ends.

Subsection (c) requires the taxpayer to reinvest his or her capital gain in a revitalization area business or property within a 24 month period of the date of the sale in which he earns his capital gain. This period will include the 3 months prior to, and the 21 months immediately following, the sale.

Subsection (d) requires a taxpayer using section 1042 to defer recognition of capital gain to decrease, by the amount of the deferral, the basis in any qualified property he or she purchases.

Section 222. This section adds a new subparagraph (H) to subsection 48(a) of the Internal Revenue Code to allow a taxpayer to take as a tax credit the investment for property described under paragraph 1042(b)(4) of the Code if he or she spends $10,000 or more to rehabilitate a unit of low income housing 30 or more years old and located in a revitalization area.

The taxpayer can take a 25 percent tax credit for the rehabilitation of certain 30 year old structures and a 30 percent tax credit for the rehabilitation of certain 40 year old structures.

Section 223. This section amends section 46 of the Internal Revenue Code to allow investors in an Entrepreneurial Development Centers to take an additional 10 percent in-

vestment tax credit (up to a total of $750,000 per taxpayer). This credit will be available for the investors for no more than 7 years after the Center is placed in service.

Subsection (c) adds a new subsection (9) to section 48 of the Internal Revenue Code to define an Entrepreneurial Development Center as a for-profit facility, established in a revitalization area within 18 months after designation that provides financial and managerial assistance and physical resources (i.e., machinery, computer services, etc.) to revitalization area businesses.

It also requires that fees charged for the Center's services bear a reasonable relationship to its operating costs.

Section 231. This section adds a new section 44J to the Internal Revenue Code to allow a taxpayer to take a tax credit based on a percentage (the applicable percentage) of the compensation paid to all new qualified employees. The credit depends upon the length of employment of each qualified employee.

The applicable percentages are as follows:

If a qualified employee worked in the area business for:	*Percent*
Less than 1 year	40
At least 1 year but less than 2 years	30
At least 2 years but less than 3 years	20
At least 3 years but less than 4 years	10
4 years or more	0

A taxpayer who elects this credit cannot also take the deduction under section 232 of the Community Assistance Revitalization Act (new section 196 of the Internal Revenue Code).

Section 232. This section adds a new section 196 to the Internal Revenue Code. Subsections (a) and (b) allows a taxpayer to deduct a percentage of income (applicable percentage) from any revitalized business or from any loan or financing made to such a business based on the percentage of new qualified employees hired by that business during the calendar year ending with or within the taxable year of the taxpayer.

The applicable percentages are as follows:

If the business' percentage of new qualified employees for the calendar year is:	*Percent*
Less than 30	0
At least 30 but less than 40	20
At least 40 but less than 50	30
At least 50 but less than 60	40
60 or more	50

Subsection (c) defines a "new employee" as one hired by a revitalization area business during the calendar year and employed throughout the 90 days prior to the close of the calendar year.

A taxpayer that elects this deduction cannot also take the tax credit under section 231 of the Community Assistance Revitalization Act (new section 44J of the Internal Revenue Code).

Section 233. This section adds a new section 1257 to the Internal Revenue Code to allow a taxpayer to take an immediate deduction not equal to the lesser of $10,000 (or $20,000 for a joint return), or the cost of a stock or debenture purchased from a qualified small business.

Subsection (e) requires the taxpayer to reduce the basis of the stock or debenture by the amount of the deduction and establishes a minimum holding period of three years.

Section 241. This section amends subsection 51(b) of the Internal Revenue Code to increase from $3,000 to $5,000 the maximum tax credit an employer can take for wages paid to each first-year employee.

Subsection (b) eliminates the termination date for section 51 of the Code, making it a permanent provision.

TITLE III—GENERAL STOCK OWNERSHIP PROVISIONS

Section 301. This section sets out the procedures for establishing, in a revitalization area, a General Stock Ownership Corporation (GSOC), an entity already recognized in section 1391 of the Internal Revenue Code.

Subsection (a) provides that within 180 days after the Secretary of HUD gives final approval to an area designation, the local government having jurisdiction over the area shall hold an election to select at least five individuals from among eligible candidates to serve as the area (GSOC) planning board.

The local government must divide the number of seats on the board into classes and assign a length of term to each seat. The class division shall insure that, if the board becomes the board of directors for an area GSOC, at least one-third of all seats on the board shall be open for election every two years.

The ballot for this election must include the names of all eligible candidates who secure a specified number of signatures. It must also indicate the length of the term of office assigned to the seat for which each eligible candidates is seeking election.

To qualify as an eligible candidate, an individual must be a resident of the revitalization area and must be at least 18 years old.

Within one year after the designation of a revitalization area is approved, the board, by a majority vote, must determine whether establishment of an area GSOC would be in the best interests of the area.

If it decides negatively, the board shall cease to exist within 15 days after that determination. If it decides affirmatively, the board must formulate a plan for creating an area GSOC that will meet the needs of the area and submit the plan to the Governor.

Subsection (b) authorizes the legislature or Governor of a State to charter an area GSOC but only if the area GSOC planning board has submitted a plan for creating an area GSOC; the charter issues within 90 days after the plan is submitted to the Governor; and the legislature or Governor finds that the requirements of this section have been met and the proposed area GSOC meets the requirements of the Internal Revenue Code.

Subsection (c) provides that the area GSOC planning board shall serve as the initial board of directors of the area GSOC. Each member shall have the term of office assigned to the seat on the area GSOC planning board for which the member was elected.

The local government shall determine a term of office for subsequent board members which is equal in length for each member and provides for the expiration every two years of the terms of at least one-third of the members.

If the term of a board member expires, or a vacancy occurs, the local government must hold an election similar to that held under subsection (a) to choose a successor or fill the vacancy.

The board of directors has the sole right to manage the property and affairs of the area GSOC.

Subsection (d) directs the board, within 90 days after the state charters the area GSOC, to propose a business plan for the area which specifies the objectives of the area GSOC, the type of investments the area GSOC may make, and the manner in which the area GSOC proposes to develop the area.

If approved by a majority of the shareholders, the plan must become a part of the bylaws of the area GSOC, amendable only with the approval of a majority of the shareholders. The area GSOC may not make any investment, or take any action, until the shareholders approve the business plan.

Section 302. This section establishes the area GSOC as a recognized taxable entity by amending existing section 1391 of the Internal Revenue Code, which already recognizes the GSOC as a taxable domestic corporation if, among other things, its shares of stock are held by all residents of a state.

Subsection (a) adds a new subsection (e) to section 1391 to define an area GSOC as a GSOC chartered by the State under the provisions of section 301 of the CARA, authorized by its charter to acquire and develop real estate in the area, and having a charter that provides:

(1) the shares of its stock shall be issued directly to eligible area residents on an equal basis;

(2) each share shall have full voting rights;

(3) except as provided in this subsection, no share shall be transferable other than by will or by the laws of descent and distribution;

(4) at least 40 percent of all employees of the area GSOC at any time must be qualified employees, as defined in section 1042 (b) of the Internal Revenue Code;

(5) the GSOC must qualify as an area GSOC under this subchapter; and

(6) the board of directors of the GSOC must authorize the issuance of as many shares of GSOC stock as necessary to assure that each present and future eligible area resident receives stock on an equal basis.

This subsection also defines an eligible area resident as any person who is at least 18 years old and has been an area resident at all times for one year prior to issuance of the share of stock of the area GSOC.

In addition, this subsection requires that all area residents receive at least an equal number of shares of the area GSOC stock.

An exception is allowed for certain "exempt residents" who may receive, under rules prescribed by the board of directors, up to 25 percent more shares of stock. These individuals may include employees of the area GSOC, persons who have performed voluntary services for the area GSOC, and disabled individuals.

Finally, any shareholder may sell his nonforfeitable rights in any share of area GSOC stock to the area GSOC but not sooner than five years after the stock is issued. The area GSOC must purchase the stock at its fair market value.

Subsection (b) amends the general definition of GSOCs to reflect the provision of area GSOCs under the CARA. In addition, it extends the date by which a state may charter a GSOC from January 1, 1984, to January 1, 1985.

Further, it prohibits the transfer of shares of stock in the area GSOC, other than by will or the laws of descent or distribution, until five years after the stock is issued unless the shareholder ceases to be a resident of the area.

A shareholder may not transfer his stock to any person other than the area GSOC.

This subsection also adds a new subsection (f) to section 1391 providing that a GSOC shall not be considered a member of an affiliated group solely because it owns stock in a real estate corporation if it owns less than 80 percent of the voting power of all class of stock, and less than 80 percent of each class of nonvoting stock, of that corporation.

A real estate corporation is defined as a corporation deriving at least 95 percent of its gross income, for any taxable year in which a GSOC owns more than 20 percent of the voting power of all classes of stock in the corporation, from (1) rents or property, (2) gain from the sale or other disposition of real property, and (3) amounts described in section 856(c)(2)(G) of the Internal Revenue Code.

The area of GSOC must distribute at least 10 percent of its taxable income for any taxable year.

The amendments in this section take effect for taxable years ending after December 31, 1983.

Section 303. This section amends subsection 170(c) to provide that contributions to an area GSOC qualify as charitable constributions.

Section 304. This section adds a new section 1043 to the Internal Revenue Code to provide that a taxpayer must recognize only 50 percent of the gain realized from the sale or exchange of any property to, or with, an area GSOC.

TITLE IV—EMPLOYEE STOCK OWNERSHIP PROVISIONS

Section 401. This section amends section 404(a)(10) of the Code to increase from 25 to 50 percent the amount that may be deducted from income tax for contributions paid into an employee stock ownership plan which are applied to the repayment of the principal of a loan used to acquire the employer's stock.

Section 402. This section adds a new subsection (j) to section 404 of the Code to allow an employer to deduct the amount of any cash dividend he pays on any share of his stock under either of two conditions. First, the stock must be held on the record date by a tax credit employee stock ownership plan or an employee stock ownership plan and, under the terms of the plan:

(i) the plan participants receive the dividend in cash within 60 days after the year in which the plan receives the dividend, or

(ii) the plan applies the dividend to repay a loan used to acquire the employer's stock.

Second, the stock is held by a former employee who received it in a distribution from a tax credit employee stock ownership plan or an employee stock ownership plan.

Section 403. This section further amends subsection 170(c) of the Code by adding a new paragraph (7) to permit a taxpayer to deduct a contribution to a tax credit employee stock ownership plan or an employee stock ownership plan as a charitable contribution. The section attaches six conditions for the deduction to qualify:

First, it must consist exclusively of employer securities.

Second, it must be allocated, under the terms of the plan, to participating employees consistent with the nondiscrimination requirements of section 401(a)(4) of the Code.

Third, no part of the contribution may be allocated under the plan for the benefit of (1) the taxpayer or decedent, or any related person, under subsection 267(b), or (2) any other person owning more than 25 percent in value of any class of outstanding employer securities or qualifying employer securities, under subsection 318(a).

Fourth, the contribution must be made only under the provisions of the plan.

Fifth, the plan must attribute the employer securities to employer contributions.

And sixth, the taxpayer cannot otherwise take a deduction under section 404 or a tax credit under section 44G for the contribution.

Section 404. This section provides that the amendments to the Code in Title V of the CARA shall take effect for the taxable years ending after December 31, 1983.

TITLE V—ENERGY PROVISIONS

Section 501. This section amends section 44C of the Internal Revenue Code to increase the qualified energy conservation expenditure, for purposes of calculating the residential energy credit, from 15 percent to 40 percent of the energy conservation expenditures on a dwelling unit made by the taxpayer during taxable years ending after 1983.

It also extends the residential energy credit for dwelling units in revitalization areas indefinitely beyond its current expiration date of December 31, 1985.

Finally, it permits the carryover of unused credits until the taxable year beginning after December 31, 2004.

Section 502. This section amends section 46(a) of the Internal Revenue Code to provide that, between January 1, 1984, and December 31, 2002, a revitalization area business may apply an energy percentage of 30 percent for its energy property.

By Mr. STAFFORD:

S. 635. A bill to authorize the U.S. Army Corps of Engineers to provide assistance to local communities, and for other purposes; to the Committee on Environment and Public Works.

WATER RESOURCES

● Mr. STAFFORD. Mr. President, I am pleased to introduce legislation intended to resolve several small, but important, water resources issues.

This bill would accomplish four goals:

Section 2 establishes an ongoing program for the control of river ice. In many of our Northern States, the buildup of river ice during the winter can produce severe flooding problems. Under current law, the U.S. Army Corps of Engineers may respond if the danger of flooding is imminent, but it has no authority to work, on a sustained basis, to prevent the problem. This section would authorize the corps to attack, on a systematic basis, the problems of river ice accumulation.

From conversations that I have had with public officials in Vermont and in other cold-weather States, I can assure my colleagues that this proposal carriers broad significance and wide support.

Specifically, section 2 of the bill authorizes a $5 million-a-year program of research and technical assistance, as well as the purchase of equipment to be loaned to local communities, over the next 3 years.

Section 3 permits the Corps of Engineers to assist local communities in the rebuilding of power dams at former industrial sites. This initiative, like the preceding one, has passed the Senate during previous Congresses, but never has become law. That occurred because of the unrelated problems we have faced in the past in winning acceptance for an omnibus water resources act. I hope such problems can be relieved this year.

This section authorized the corps to assist small communities in developing former industrial and similar sites for new power production. I am convinced that such an approach will prove a wise use of existing resources.

Section 4 would establish an ongoing Federal program to assist communities in the control of streambank erosion. This section permits technical assistance to individuals and communities to retard such erosion. The section also authorizes a system of loans for erosion control to individuals and public bodies.

Section 5 clarifies the role of the Corps of Engineers concerning major repairs that may be necessary to Waterbury Dam in Vermont. This section assures that any such major repairs at the dam will be undertaken by the Army Corps of Engineers.

Some disagreement has occurred between the State and the corps over whether the costs for these repairs—concrete work on the spillway and the possible construction of a shield to prevent leaks through the dam—is a Federal or non-Federal responsibility. It is my judgment, supported by that of the State of Vermont, that such work represents major rehabilitation, possibly stemming from design faults in the dam. Because of that fact, these repairs are rightly a Federal expense.

This work, I must note, carries an estimated maximum cost of $3,000,000, probably far less. In addition, operating and maintenance responsibility and authority for Waterbury Dam will continue, under this bill, to rest with non-Federal interests.

Mr. President, I ask unanimous consent that a copy of the bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 635

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Small Communities Water Resources Assistance Act of 1983."

RIVER ICE CONTROL

SEC. 2. (a) The Secretary of the Army acting through the Chief of Engineers (hereinafter referred to as the "Secretary"), shall undertake a program of research for the control of river ice, and to assist communities in breaking up such ice, which otherwise is likely to cause or aggravate flood damage or severe streambank erosion.

(b) The Secretary is further authorized to provide technical assistance to local units of

government to implement local plans to control or break up river ice. As part of such authority, the Secretary shall acquire necessary ice-control or ice-breaking equipment that shall be loaned to local units of government.

(c) For the purposes of this section, the sum of $5,000,000 is authorized to be appropriated to the Secretary in each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986, such sums to remain available until expended.

(d) No later than March 1, 1986, the Secretary shall report to the Congress on activities under this section.

IMPROVEMENTS AT FORMER INDUSTRIAL SITES

SEC. 3. (a) The Secretary shall, upon the request of local public officials, survey the potential and methods for rehabilitating former industrial sites, millraces, and similar types of facilities already constructed for use as hydroelectric facilities. The Secretary shall, upon request, provide technical assistance to local public agencies, including electric cooperatives, in designing projects to rehabilitate sites that have been surveyed, or are qualified for survey, under this section.

(b) There is authorized to be appropriated to the Secretary, to implement this section, the sum of $5,000,000 for each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986, such sums to remain available until expended.

STREAMBANK EROSION CONTROL

SEC. 4. (a)(1) The Congress finds that streambank erosion destroys property, both public and private, creates and aggravates flooding, increases sedimentation in the Nation's rivers, adds to the needs for disaster assistance in many areas, and creates significant financial and environmental losses to the Nation.

(2) The Congress, therefore, declares that it is in the national interest to assist communities and individuals in lessening and, when possible, preventing the erosion of streambanks and riverbanks, particularly when such erosion threatens, or can be expected to threaten, public and private facilites and structures.

(b)(1) The Secretary shall provide technical assistance in methods to retard streambank and riverbank erosion to any person or agency requesting such assistance, if the applicant is experiencing, or can be expected to experience, erosion threatening dwellings or loss of property. The Secretary may also provide assistance to an applicant who would be likely to be affected by flooding downstream from property threatened by erosion: Provided, That the owner of such property agrees to allow the applicant to perform such erosion retarding work.

(2) For the purposes of this subsection, the sum of $2,000,000 is authorized to be appropriated to the Secretary in each of the fiscal years ending September 30, 1984, September 30, 1985, and September 30, 1986, such sums to remain available until expended.

(c)(1) The Secretary is authorized to provide loans, to be repaid within 10 years, of up to $10,000 to any public or private group or agency or individual for the purpose of stabilizing streambanks or riverbanks when erosion of such streambanks or riverbanks threatens, or can be expected to threaten, any facility or structure, or produce or seriously aggravate the danger of flooding. Plans for any work to be undertaken with a loan under this subsection shall be submitted to the Secretary. Approval by the Secretary of such plans shall be a commitment of the Secretary to such loan. Notwithstanding the first sentence of this subsection, any loan to a public agency may be for a period of 20 years and for a sum up to $25,000. Loans granted under this section shall be free of interest. Repayment shall be required in equal installments.

(2) For the purposes of this subsection, the sum of $50,000,000 is authorized to be appropriated to the Secretary for the fiscal year ending September 30, 1984, and thereafter, and shall remain available until expended.

WATERBURY DAM, VERMONT

SEC. 5. The Waterbury, Vermont, project in the Winooski River Basin, authorized for modification in section 10 of the 1944 Flood Control Act, approved as Public Law 78-534 on December 22, 1944, is hereby further modified to provide that any major rehabilitation of such project shall be undertaken by the Secretary. Nothing in this section shall be construed as altering the conditions established in the Federal Power Commission License Numbered 2090, issued on September 16, 1954.●

By Mr. HART (for himself, Mr. CRANSTON, Mr. SIMPSON, Mr. DECONCINI, Mr. RANDOLPH, Mr. MATSUNAGA, Mr. MITCHELL, Mr. COHEN, Mr. RIEGLE, Mr. HOLLINGS, Mr. SASSER, Mr. EXON, Mr. SARBANES, Mr. SPECTER, Mr. KENNEDY, Mr. LEAHY, Mr. LEVIN, Mr. DENTON, Mr. KASTEN, Mr. MURKOWSKI, Mr. BIDEN, Mr. CHILES, Mr. ANDREWS, Mr. BURDICK, Mr. PERCY, Mr. JOHNSTON, and Mr. STAFFORD):

S. 636. A bill to amend title 38, United States Code, to establish certain procedures for the adjudication of claims for benefits under laws administered by the Veterans' Administration; to apply the provisions of section 553 of title 5, United States Code, to rulemaking procedures of the Veterans' Administration; to provide for judicial review, of certain final decisions of the Administrator of Veterans' Affairs; to provide for the payment of reasonable fees to attorneys for rendering legal representation to individuals claiming benefits under laws administered by the Veterans' Administration; and for other purposes; to the Committee on Veterans' Affairs.

JUDICIAL REVIEW BILL

● Mr. HART. Mr. President, today Senator CRANSTON and Senator SIMPSON, the chairman of the Senate Veterans Affairs Committee join me in introducing S. 636, the Veterans' Administration Administrative Procedure and Judicial Review Act of 1983. The purpose of S. 636 is to provide veterans and other claimants before the Veterans' Administration (VA) the right to judicial review of final decisions of the Administrator of Veterans' Affairs denying claims for benefits, to codify certain VA benefit claim procedures, to require that the VA comply with public notice and comment provisions of the Administrative Procedure Act in its rulemaking, and to permit veterans to pay reasonable attorneys fees.

Mr. President, the Veterans' Administration—the second largest client agency in the Federal Government—is one of the few agencies whose benefit decisions are not subject to the scrutiny of the Federal courts. Too often in the past, this exclusion, together with an outdated $10 limitation on attorneys fees, has resulted in an abridgement of fundamental constitutional rights of the veteran in hearings before the VA.

Mr. President, a veteran seeking VA benefits must file a claim with the VA regional office's rating board to determine eligibility for disability, pension, or other benefits. If the local rating board renders an unfavorable decision, the veteran can appeal to the Board of Veterans Appeals (BVA) in Washington, D.C, which is also part of the VA. Under existing law, the decision of the BVA on, "any question of law or fact under any law administered by the Veterans' Administration providing benefits for veterans and their dependents or survivors, shall be final and conclusive, and no other official or any court of the United States shall have power or jurisdiction to review any such decision" (38 U.S.C. 211(a)). Unlike claimants before other Federal agencies, a veteran who feels that the BVA has misinterpreted the law or decided a case without taking all relevant facts into account has no recourse outside the Veterans' Administration.

For more than two decades, the Social Security Administration—which also adjudicates disability claims—has been subject to judicial review of its final benefit decisions (42 U.S.C. 405(g)).

Mr. President, to insulate any agency from the scrutiny of the courts runs counter to some of our most cherished constitutional principles. In human terms, this denial of the due process rights of veterans has too often resulted in hardship and disillusionment for those who have defended our country and are most deserving of the guarantees of our constitutional form of government.

Mr. President, I first introduced legislation to open the Veterans' Administration to outside court review in May 1976. Since that time my colleagues in the Senate have joined me in successfully passing, on two occasions in the 96th and 97th Congresses, legislation similar to that which we are introducing today. Both Senator CRANSTON and Senator SIMPSON have supported this legislation through their leadership as chairmen of the Senate Veterans' Affairs Committee. I am grateful for their help and guidance in helping to bring this legislation to the floor for its successful con-

sideration in the last Congress as S. 349.

Mr. President, the central issue in the debate on this bill is whether we are going to afford the American veteran the same constitutional rights we grant other citizens in this country. Judicial review is important in granting the veteran adequate protection of his or her rights as a citizen, and it will provide improved oversight of VA procedures and activities by an independent outside body. American veterans have been denied for too long their fundamental right to simple justice in the adjudication of Veterans' Administration claims. Under current VA procedures, veterans have no right to appeal outside the agency, are effectively denied access to an attorney, and cannot question in Federal court the validity of the VA rules and regulations promulgated by the agency. S. 636, will correct these deficiencies and finally restore the full constitutional rights of the American veteran.●

Mr. CRANSTON. Mr. President, I am pleased to join with my good friends, the Senator from Colorado (Mr. HART) and the chairman of the Veterans' Affairs Committee (Mr. SIMPSON), in introducing S. 636, the proposed Veterans' Administration Adjudication Procedure and Judicial Review Act. I am delighted to note that we are joined by 24 original cosponsors, including the Senator from Arizona (Mr. DECONCINI), a member of the Veterans' Affairs Committee who was an original cosponsor of the predecessor to this measure in the last Congress, and seven other members of the Veterans' Affairs Committee. Four of the cosponsors, Senators SIMPSON, DECONCINI, SPECTER, and DENTON, are members of both the Judiciary and Veterans' Affairs Committees and three others are members of the Judiciary Committee—the ranking minority member of that committee, (Mr. BIDEN), and Senators KENNEDY and LEAHY. The broad, bipartisan support demonstrated by this array of cosponsors is a strong indication of the merits of this legislation.

Mr. President, legislation to provide for judicial review of decisions of the Veterans' Administration on claims for benefits has been through an extended period of development in the Senate—beginning in the 94th Congress when the Senator from Colorado (Mr. HART) first introduced such legislation. During this period, the Committee on Veterans' Affairs has held eight hearings on judicial review legislation, and the Judiciary Committee has held one such hearing. Judicial review legislation has been before both the Veterans' Affairs Committee and the Judiciary Committee, with the Veterans' Affairs Committee twice voting to report such legislation, and the Judiciary Committee twice, after referral of the reported bill for a period of time, taking no action to amend the reported measures before being discharged from further consideration. The measures reported by the Veterans' Affairs Committees—S. 330 in the 96th Congress and S. 349 in the last Congress—were passed by the Senate without dissent. Unfortunately, the House Veterans' Affairs Committee, to which the measures were referred in the other body, took no action during either Congress. Nevertheless, I continue to hope that, should the Senate again pass judicial review legislation, the Committee on Veterans' Affairs in the other body might take some action on the issue which could then serve as a basis for the development of a consensual approach on this important issue.

Mr. President, the measure we are introducing today is identical to S. 349 as reported by the Veterans' Affairs Committee on June 3, 1982, and passed by the Senate on September 14, 1982, in all respects except one—the absence of title V from S. 349 which dealt with the status of members of the Board of Veterans' Appeals under the Civil Service Reform Act, an issue that has been resolved administratively. The basic purpose of this measure is to insure that veterans and other claimants before the VA receive all benefits to which they are entitled under law by providing them with the opportunity for judicial review of final decisions of the Administrator of Veterans' Affairs denying claims for benefits, by codifying certain internal procedures of the VA relating to the adjudication of benefit claims, by requiring that VA rulemaking processes comply with provisions of the Administrative Procedure Act relating to notice and comment, and by allowing claimant to pay attorneys reasonable fees for representation before the VA after a decision by the Board of Veterans' Appeals and for representation in judicial proceedings. My September 14, 1982, floor statement upon Senate passage of S. 349 discusses the bill's provisions in detail—S11421 of the daily edition.

Mr. President, there are a number of strong reasons supporting the enactment of judicial review legislation, and I would like to highlight some of them briefly at this time.

One of the important reasons judicial review is needed is to help insure fairness to individual claimants before the VA. In saying this, I do not mean to indicate a belief that the Board of Veterans' Appeals—the final adjudicative body within the VA—in any way intends to deny such fairness or that, despite the Board's best efforts, there is a routine denial of fairness. To the contrary, I believe that the members of the Board are fairminded, conscientious individuals who make a concerted effort to carry out their responsibilities in an evenhanded fashion and that, by and large, most claimants before the VA are treated fairly. However, I do know that the present system, which results in final, unappealable decisions by the Board, together with the statutory limit of $10 on the amount a claimant before the VA can pay an attorney for representation, leaves many disappointed claimants believing that they have been denied a full and fair opportunity to pursue their claims and that, as veterans, they are denied important rights that citizens have in dealing with virtually all other Federal agencies.

In addition to this perception of a denial of justice, Mr. President, is the very real chance that actual injustices do occur under the current system, a problem that opportunity for judicial review would substantially ameliorate. Although I know that the VA claims adjudication system is set up to be supportive of the veteran—as it should be—the VA is a very large and complex Federal agency, and unfair results are bound to occur. I have long been concerned that the tremendous volume of claims handled by the Board of Veterans' Appeals provides a significant opportunity for some injustices to occur. On the basis of current trends, the number of claims handled by the Board will continue to increase, thereby increasing the possibility of unintended unfair results.

Mr. President, another principal reason for judicial review legislation is the need to establish a basis for the review of questionable agency actions restricting, withholding, or withdrawing VA benefits—actions that can be expected to increase in frequency as there is greater pressure within the executive branch to realize cost savings in current programs. There have been numerous examples of such actions in the recent past—such as efforts by the VA to collect for the cost of health care provided to veterans who happen to be VA employees; attempts by the agency, at the direction of the Office of Management and Budget, to restrict beneficiary travel reimbursement for eligible veterans; allegations that some VA stations are applying very stringent standards in cases in which Vietnam veterans are seeking to be granted service connection for post-traumatic stress disorder; and the VA's drawing overly restrictive regulations to implement the targeted GI bill delimiting-date extension enacted in Public Law 97-72 as well as the radiation-exposure health-care eligibility enacted in that same Public Law.

In each of these cases and in other similar cases, the lack of access to court review has serious implications. Although the Committees on Veterans' Affairs in both Houses do their utmost to oversee the activities of the VA, the limited resources of the com-

mittee do not allow for thorough review of and congressional action to resolve satisfactorily all of the issues arising in such a large and complex agency. In addition, I do not believe that aggrieved veterans should have to be dependent for relief on congressional committee processes which, for all their virtues, cannot be fairly said to be designed to achieve or to be capable of achieving systematically the even-handed dispensation of justice. Also, although the results of committee oversight are often salutary in terms of bringing about—either through legislation or administrative action under pressure, as was the case in the latter two examples I just cited—reversals of agency action, there is usually a long delay in having the correction made; whereas injunctive relief for irreparable injury can be a very speedy remedy.

If the veterans affected by various VA actions had access to court to challenge those actions, the individuals most directly affected by these actions would be guaranteed the opportunity to be heard by an entity outside of the VA and obtain urgent and timely relief in certain cases. In a similar way, the VA's handling of claims based on exposure to agent orange or to radiation from the detonation of a nuclear weapon would benefit from outside review by allowing those who believe they have been harmed to have their claims tested in an independent forum.

Mr. President, in making this point, I do not want to be understood as suggesting that the VA is wrong on all or any of these issues. Rather, I am suggesting that outside review by the independent branch of Government established in our constitutional framework with the special responsibility of determining whether governmental action is legal and whether it is fundamentally fair would benefit all parties involved. The VA would have its processes subjected to appropriate scrutiny and, to the extent the agency's actions were upheld, would be vindicated. Likewise, to the extent the agency's actions were held unlawful or fundamentally unfair, steps could be taken to improve the process so as to insure that the agency is fulfilling its mission to serve veterans in the best possible fashion. I am concerned that agency action that does not have the benefit of outside scrutiny may fail to address fully the legitimate needs of those the agency exists to serve, and I believe that providing for judicial review would basically correct this shortcoming.

Mr. President, another important reason in support of judicial review is related to the status of the Board of Veterans' Appeals. Fundamental principles of due process, as guaranteed by the Constitution, require an independent review of administrative action affecting individuals' liberty or property interests. Although there are earlier court decisions suggesting that veterans' benefits are gratuities and not worthy of general due process protections, such a viewpoint is no longer valid, either philosophically—veterans benefits are earned by service in the military—or legally in light of a number of decisions rendered by the Supreme Court in the last decade holding that various statutory governmental benefits are legal entitlements and, thus, protected property interests of the beneficiary.

Mr. President, I do not believe that review by the Board provides the required independent action required by due process. Although the Board is not directly under the control of the Administrator of Veterans' Affairs, it is far too bound up with the agency, in many informal ways, to be truly independent and, more importantly, its independence is restricted by law. Under section 4004(c) of title 38, the Board is "bound in its decisions by the regulations of the Veterans' Administration, instructions of the Administrator, and the precedent opinions of the chief law officer." Although I have high regard for the integrity of both the Administrator and the General Counsel, this does not alter the fact that allowing them—and future incumbents in those offices—to restrict the decisionmaking authority of the Board significantly restricts that body's independence.

A final purpose of judicial review legislation is to help clarify the state of the law on the scope of the current law provision that bars judicial review, section 211(a) of title 38. At present, there are some important differences between the various U.S. Courts of Appeals regarding the sweep of this prohibition, and I am concerned that the VA contributes to this confusion by raising the 211(a) bar in cases in which it is not appropriate. Thus, the circuit where a veteran seeks to bring an action may well determine the outcome of the case a result that should be avoided

Some courts have held, correctly I believe, that the 211(a) bar applies only to claims for benefits by individual veterans, while other courts have let the bar preclude suits involving other than individual benefit decisions. The most appropriate way to clarify the situation, in my view, is to enact legislation such as we are introducing today that provides specified, limited access to court for veterans and others with claims before the VA.

Mr. President, when S. 349 was before the Senate in the last Congress, the Congressional Budget Office estimated that its first-year cost would be $4.2 million and the cost of the first 5 years would be $51.9 million. Although that estimate has not yet been updated, I see no reason for any change except to the extent necessary to reflect the effects of inflation. This would be, I believe, a very modest cost to pay to insure that veterans, their survivors, and other claimants before the VA are given a full and fair opportunity to have their claims for statutory benefits reviewed and evaluated.

Mr. President, I look forward to working with Chairman SIMPSON, Senator HART, the other cosponsors of this measure, and all my colleagues on this important legislation in the months ahead.

● Mr. SARBANES. Mr. President, I am pleased today to join with my colleagues in the Senate in introducing this important legislation to insure that our Nation's veterans are able to receive the full benefits to which they are entitled. Under present law, all decisions by the Veterans' Administration on benefit claims are final and not subject to court review. Present law also provides that an attorney representing a claimant for VA benefits may not be paid more than $10 for that representation, a provision that greatly limits representation. This bill would insure that veterans and other claimants before the VA have comparable rights in exercising claims as do claimants for other Federal benefits. It provides for the judicial review of claims for benefits that are denied by the Veterans' Administration and allows claimants to pay reasonable attorneys' fees for representation before the VA. These and other provisions contained in the bill will correct the present deficiencies in the VA's procedures while preserving those other aspects of the VA claims process that have served veterans well.

Legislation on this important matter has been introduced in the Senate since the 94th Congress; and an identical bill, S. 349, was approved by voice vote in the Senate during the 97th Congress after extensive consideration by the Committee on Veterans' Affairs, public hearings and comment by the administration, and discussion on the Senate floor. This legislation will restore to our veterans their full rights in seeking their justly earned compensation and facilitate the carrying out of our Nation's responsibility to those who have served with honor in our armed services. It is my hope that this legislation will receive prompt consideration by both the Committee on Veterans Affairs and the full Senate, and that it may swiftly be enacted into law during the 98th Congress.●

Mr. SIMPSON. Mr. President, I am pleased to join with my distinguished colleagues, the Senator from Colorado (Mr. HART) and the ranking minority member of the Senate Veterans' Affairs Committee (Mr. CRANSTON) as an original cosponsor of the Veterans' Administration Adjudication Procedure and Judicial Review Act. The bill we

are introducing today is substantially identical to S. 349, which was unanimously reported out of the Senate Veterans' Affairs Committee on April 28, 1982, and passed the Senate by a voice vote on September 14, 1982.

This legislation is designed to improve the adjudicate rights of individuals pursuing claims for Veterans' Administration benefits in order to make them more nearly comparable to the rights of claimants for other Federal benefits. We owe it to the veterans of this country, to their survivors and their dependents, to attempt to insure that the process of pursuing a claim for benefits based on service in the defense of this country is not more perilous or difficult than the process of claiming other entitlement benefits for which honorable service in the Armed Forces is not a prerequisite.

The improvements made by this bill would take the following forms: Most importantly, the bill would lift the present near-total prevention of judical review of VA claims, in order to permit—for the first time—persons whose claims for benefits are denied at the agency level to appeal that denial in the Federal courts. It would codify certain adjudication procedures which are presently in use in the VA and which are generally favorable to claimants. It would authorize the VA to test two alternative methods of improving the appeals process within the VA. It would subject the VA to the formal rulemaking requirements of the Administrative Procedure Act. And it would lift the present $10 limitation on the amount of fees that may be paid by a claimant for an attorney representation in connection with a claim for VA benefits, in order to permit the payment of reasonable fees, not only at the Federal court level, but also in the final stage of the agency adjudication.

Mr. President, the need for this legislation is clear. Under present law as set forth in section 211(a) of title 38 of the United States Code, all VA benefits decisions are final and not subject to judicial review. Although, as discussed more fully in the Veterans' Affairs Committee report, Federal courts have held that section 211(a) does not preclude judicial review of constitutional questions, certain procedural matters, and challenges to the Administrator's authority to issue particular regulations, the vast majority of VA benefits determinations remain unappealable to any court. Present law also provides, as set forth in section 3404(c)(2), that no attorney representing a claimant for VA benefits may be paid more than $10 for that representation—a provision which effectively precludes all but "pro bono" representation. Both of these limitations are at odds with the adjudicative rights afforded, primarily by virtue of the Administrative Procedure Act, to claimants for other Federal benefits.

In most other respects, however, the VA claims adjudication process has grown to serve VA claimants quite well. It contains a number of unique and valuable features which are worth preserving: Most notably, the use of informal rules for the admission of evidence, the practice of giving the claimant the benefit of the doubt on disputed factual matters, reliance on free representation before the VA by skilled representatives of the national veterans' organizations, and the impressive and well-established expertise of the Board of Veterans' Appeals in deciding the specific military and medical-related factual issues that arise in the context of claims for VA benefits.

Our task, then, in formulating this legislation was to preserve these positive aspects of the present system, and to enhance them through the addition of other important adjudicative rights and safeguards. Our purpose was to insure that veterans and other claimants before the VA receive all benefits to which they are entitled. We trust that the expansion of these important and almost universal rights of judicial review and meaningful attorney representation will appreciably further that goal.

Mr. President, the VA claims adjudication system is a living anachronism. Both the preclusion of judicial review and the limitation on attorney's fees are at least half a century out of touch and are based on obsolete assumptions and considerations. The preclusion of judicial review, first enacted in 1933, reflected the view that veterans' benefits are "mere gratuities" and that veterans have no right to such benefits so compelling as to warrant the protection of judicial review. Clearly, this position is no longer tenable, since the 1970 Supreme Court case of Goldberg against Kelly.

The reasoning behind the $10 attorneys' fee limitation is similarly obsolete. The $10 level was set in 1924, and was grounded in a desire to protect unfortunate pensioners from unethical lawyers fabricating claims and harassing veterans. It is clear that such a view of today's organized bar, particularly in light of the widespread network of State and local bar associations that now generally monitor attorney behavior, is not defensible.

Mr. President, this system, based upon such outmoded assumptions, is no longer appropriate for the veterans of this country. We must bring it up to date. I urge all of my colleagues to join me, the Senator from Colorado, the Senator from California, and the bill's 24 cosponsors, in supporting this important legislation.

By Mr. PERCY (by request):

S. 637. A bill to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize security and development assistance programs for fiscal years 1984 and 1985, and for other purposes; to the Committee on Foreign Relations.

S. 638. A bill to authorize supplemental international security assistance for urgent purposes for the fiscal year 1983, and for other purposes; to the Committee on Foreign Relations.

S. 639. A bill to authorize supplemental assistance to aid Lebanon in rebuilding its economy and armed forces, and for other purposes; to the Committee on Foreign Relations.

FOREIGN ASSISTANCE AUTHORIZATIONS

● Mr. PERCY. Mr. President, by request, I introduce for appropriate reference three bills concerning foreign assistance authorizations.

These bills have been requested by the Department of State and I am introducing them in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose these bills, as well as any suggested amendments to them, when the matters are considered by the Committee on Foreign Relations.

I ask unanimous consent that the bills be printed in the RECORD at this point, together with section-by-section analyses of the bills and the letter from the Secretary of State to the President of the Senate dated February 19, 1983.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF STATE,
Washington, D.C., February 19, 1983.

Hon. GEORGE BUSH,
President of the Senate.

DEAR MR. PRESIDENT: I herewith transmit, on behalf of the President, three bills: a bill to authorize supplemental assistance to aid Lebanon in rebuilding its economy and armed forces, and for other purposes; a bill to authorize supplemental international security assistance for urgent purposes for the fiscal year 1983, and for other purposes; and a bill to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize security and development assistance programs for the fiscal years 1984 and 1985, and for other purposes.

These bills will authorize programs that are essential elements in the Administration's overall foreign and defense policy. Through security assistance, the United States helps allies and friendly governments defend themselves against external threats and deal with the economic, social, and political weaknesses that lead to instability. The economic and development assistance programs express the traditional humanitarian concerns of the American people by playing an essential role in combatting hunger, disease, and poverty, while at the same time assisting developing countries to achieve equitable economic growth. These programs seek to reach these objectives by, among other things, emphasizing the development of essential institutions and productive, self-sustaining private sectors in these countries.

The Administration's security and development assistance programs supplement and complement other programs and enhance the effectiveness of our defense establishment and our diplomacy. In a time of budget scarcity, these programs have been rigorously scrutinized and carefully planned to make the most efficient use of resources.

Additional assistance to Lebanon is important to our efforts to help the Government restore economic and political stability and effective control of its territory.

The Lebanon Emergency Assistance Act of 1983 would authorize appropriations for additional economic and military assistance to Lebanon in fiscal year 1983. The United States has made a major commitment to assist Lebanon to rebuild its shattered economy and its armed forces. This bill would authorize an additional $150,000,000 in appropriations for economic support funds to aid in the revival of the Lebanese economy, critical to the stability of that nation and the Middle East. The delicate negotiations for withdrawal of foreign forces from Lebanese territory depend on Lebanon's ability to preserve the integrity of its borders and maintain internal order. To achieve these ends, we have begun to assist the Lebanese Armed Forces to rebuild and modernize. The $1,000,000 authorized in this bill for international military education and training, and $100,000,000 in additional authority to guarantee loans for defense articles and defense services will supplement Lebanese funds and prior-year guarantees, and will be used to reequip and train the final two of seven brigades that comprise the Lebanese Army at this time. This will permit the LAF to extend the central government's authority in areas now occupied by foreign forces and to maintain Lebanon's independence and public order. This assistance is not only vital to Lebanon, but is an essential component of our effort to bring security and peace to the nations of the Middle East.

The proposed Special Security Cooperation Act of 1983 would authorize additional security assistance appropriations for fiscal year 1983. An effective foreign assistance program requires adequate funding levels, the flexibility to allocate funds to meet priority needs, and the ability to respond to unforeseen contingencies. When we forecast future needs far in advance, as we must, we cannot assume that circumstances will be exactly as projected. Reduced funding levels, coupled with extensive and detailed legislative earmarking for country programs, prevents the Administration from executing the security assistance program in a manner consistent with our most important interests.

The fiscal year 1983 appropriations made by the continuing resolution, Public Law 97-377, were seriously inadequate for important security assistance programs. With these funding levels, the United States will be unable to respond to the economic and military difficulties of important friends and allies, to the detriment of important U.S. interests. The effects of the funding shortfall will be to decrease political and economic stability in the countries affected, reduce their ability to defend themselves and cooperate with us in achieving common objectives. We will find it more difficult and costly to fulfill our security objectives. The bill increases by $142,000,000 the authorization for appropriations for the military assistance program to allow for a supplemental appropriation of $167,000,000 and increases by $82,000,000 the authorization for appropriations for economic support funds to allow for a supplemental appropriation of $144,500,000. The bill would also authorize $425,000,000 in off-budget loan guaranties under the foreign military sales program. The total is small when compared to our total national security expenditures, but the value of these funds, in terms of the political, economic and military return to the United States, is very large. In addition we are seeking $4,500,000 for our 1983 voluntary contribution to the International Atomic Energy Agency.

The proposed International Security and Development Cooperation Act of 1983 includes proposed amendments to the Foreign Assistance Act of 1961 (FAA), the Arms Export Control Act (AECA), and the Internal Revenue Code of 1954 (IRC). This bill would authorize additional appropriations for development and security assistance for fiscal years 1984 and 1985 and make certain changes in the authorities governing those programs.

The bill is composed of seven titles. Title I consists of authorizations for military sales and related programs under the FAA and the AECA. Title II authorizess a new antiterroism law enforcement assistance program. Title III provides authorization for the economic support fund. Title IV contains authorizations for the development assistance programs. Title V contains miscellaneous amendments to the FAA, including authorizations for the international narcotics program and operating expenses for the Agency for International Development. Title VI contains amendments to the IRC and the International Security and Development Cooperation Act of 1980. Title VII authorizes appropriations for fiscal year 1985, in accordance with the requirements of the Congressional Budget Act of 1974, and includes the effective dates for the various provisions of this bill.

The bill contains authorizations for fiscal year 1984 security assistance programs and other amendments, including:

$1,000,000,000 for the foreign military sales credit program;

Establishment of a limit of $4,436,000,000 for fiscal year 1984 on the total amount of loans for which guarantees may be issued;

Forgiveness of loan repayment for Israel and Egypt, and grant of more favorable terms to Korea for repayment of loans;

Creation of a new section in the FAA to authorize exchanges of professional military education on a one-for-one (barter) basis with foreign countries;

$46,200,000 under the FAA for international peacekeeping operations and permission to draw down commodities and services of up to $25,000,000 in value, if required in an emergency;

Removal of the People's Republic of China from the category of countries to which assistance is prohibited;

Conversion of legislative earmarks from fixed to proportionate requirements during periods when funds are appropriated by a continuing resolution;

Amendment of paragraph 21(e)(1)(A) of the AECA to define administrative charges in terms of additional costs which would not otherwise be incurred by the United States;

Amendment of the provisions of the AECA to reduce the number of pricing systems, from three to one, for sales of military training.

With respect to the authorizations requested in this Bill for security assistance programs for Greece and Turkey, I hereby certify, in accordance with section 620C(d) of the FAA, that the furnishing of such assistance to Greece and Turkey will be consistent with the principles set forth in section 620C(b) of the FAA. The explanation of the reasons for this certification in each case is contained in the congressional presentation materials for the fiscal year 1984 security assistance programs.

The bill includes authority for fiscal year 1984 to establish an anti-terrorism assistance program. The need for this new program becomes progressively more urgent. International terrorism is a frightful weapon that strikes at the foundations of societies and governments. The $5,000,000 authorized for this purpose will provide extremely useful assistance to friends and allies.

The development assistance portion of the bill contains various provisions that increase the effectiveness of the AID program and emphasize the President's commitment to foster the growth of productive, self-sustaining private sectors in developing countries' economies. It also authorizes funding for fiscal year 1984 for development assistance functional accounts, the Sahel account, American Schools and Hospitals Abroad, International Organizations and Programs, International Disaster Assistance, the Trade and Development Program, Operating Expenses, and the African Development Foundation. It increases the total amount of housing guarantees authorized to be outstanding and extends for one year both that program and the guaranty program authorized by section 222A of the FAA, the Agricultural and Productive Credit and Self-Help Community Development Programs.

For financing certain types of private enterprise projects, the bill proposes the establishment of a revolving fund derived from amounts appropriated under Part I authorities, fee income, and repayments of loans from the fund. Establishment of the fund would permit the leveraging of small amounts of appropriated funds for projects designed to engage the private sector in the development process. The authority to reuse loan proceeds and fee income emphasizes that the operations and management of the fund are intended to be conducted on a business-like basis.

The bill also proposes that AID may prescribe interest rates for the housing investment guaranty program; makes minor technical changes in section 611 of the FAA on plans and cost estimates; provides more flexibility in the administrative use of funds; eliminates certain requirements for reports; and repeals several obsolete provisions. It also amends the IRC to exempt AID from withholding requirements on all scholarships to participant trainees. Current provisions exempt only per diem payments from withholding requirements. Withholding income taxes for each participant trainee would result in high administrative costs for these programs.

The programs authorized by these three bills have been carefully designed to meet priority national interests of the United States within the reduced resources available in this time of budget scarcity. The programs are not intended as substitutes for a strong United States defense establishment or for maximum effort by recipient nations to make the best, most productive use of their own resources. The foreign assistance programs contained in these bills are cost-effective, efficient means to complement our military posture and promote the economic, political, and social stability of friends and allies. I urge prompt enactment of the bills.

The Office of Management and Budget advises that enactment of this legislation would be in accord with the program of the President.

Sincerely yours,

GEORGE P. SHULTZ.

S. 637

SHORT TITLE

SECTION 1. This Act may be cited as the "International Security and Development Cooperation Act of 1983".

TITLE I—MILITARY SALES AND RELATED PROGRAMS

FOREIGN MILITARY SALES AUTHORIZATION AND AGGREGATE CEILINGS

SEC. 101. (a) Section 31(a) of the Arms Export Control Act is amended by striking out "$800,000,000 for the fiscal year 1982 and $800,000,000 for the fiscal year 1983" and inserting in lieu thereof "$1,000,000,000 for the fiscal year 1984".

(b) Section 31(b)(1) of such Act is amended by striking out "$800,000,000 for the fiscal year 1982 and $800,000,000 for the fiscal year 1983" and inserting in lieu thereof "$1,000,000,000 for the fiscal year 1984".

(c) Section 31(b)(2) of such Act is amended by striking out "$3,269,525,000 for the fiscal year 1982 and $3,269,525,000 for the fiscal year 1983" and inserting in lieu thereof $4,436,000,000 for the fiscal year 1984".

(d) Section 31(b)(3) of such Act is amended—

(1) by striking out "not less than $1,400,000,000 for the fiscal year 1982 and not less than $1,400,000,000 for the fiscal year 1983" and inserting in lieu thereof "not less than $1,700,000,000 for the fiscal year 1984"; and

(2) by striking out "each".

(e) Section 31(b)(5) of such Act is amended—

(1) by striking out "for the fiscal year 1982 and for the fiscal year 1983" and inserting in lieu thereof "for the fiscal year 1984"; and

(2) by inserting "Korea," immediately after "Greece,".

(f) Paragraphs (6) and (7) of section 31(b) of such Act are repealed, and section 31(b) is amended by the addition of a new paragraph (6) as follows:

"(6) Of the total amounts of credits (or participations in credits) extended under section 23 of this Act for the fiscal year 1984, Egypt shall be released from its contractual liability to repay the United States Government with respect to such credits and participations in credits in an amount up to $450,000,000.".

(g) Section 31(c) of such Act is amended—

(1) by striking out "for the fiscal year 1982 and for the fiscal year 1983" and inserting in lieu thereof "for the fiscal year 1984"; and

(2) by striking out "each" in the last sentence.

ADMINISTRATIVE SURCHARGE

SEC. 102. Paragraph (1)(A) of section 21(e) of the Arms Export Control Act is amended by inserting immediately after "costs" the phrase "(which would not otherwise be incurred by the United States Government)".

CHARGES FOR ADMINISTRATIVE SERVICES

SEC. 103. Section 43(b) of the Arms Export Control Act is amended by inserting "and extraordinary" immediately after "recovery of administrative".

CHARGES FOR TRAINING

SEC. 104. (a) Section 21(a)(3) of the Arms Export Control Act is amended by striking out "sold to a purchaser who is concurrently receiving assistance under chapter 5 of part II of the Foreign Assistance Act of 1961,".

(b) Section 21(g) is repealed.

INCREASE IN CRIMINAL PENALTIES FOR CERTAIN VIOLATIONS OF THE ARMS EXPORT CONTROL ACT

SEC. 105. (a) Section 38(c) of the Arms Export Control Act is amended by striking out "not more than $100,000 or imprisoned not more than two years, or both" and inserting in lieu thereof "for each violation not more than $1,000,000 or imprisoned not more than ten years, or both".

(b) Section 38(e) of such Act is amended by adding at the end thereof the following: "Notwithstanding Section 11(c) of the Export Administration Act of 1979, as amended, the civil penalty for each violation involving controls imposed on the export of defense articles and defense services under this section may not exceed $500,000.".

(c) The amendments made by this section apply with respect to violations occurring after the effective date of this section.

CATALOG DATA AND SERVICES

SEC. 106. Section 21(h) of the Arms Export Control Act is amended—

(a) by inserting "(1)" immediately after "(h)";

(b) by striking out "(1) in connection with" and inserting in lieu thereof "(A) in connection with";

(c) by striking out "(2) in connection with" and inserting in lieu thereof "(B) in connection with"; and

(d) by adding at the end thereof the following:

"(2) In carrying ot the objectives of this section, the President is authorized to provide (without charge) cataloging data and cataloging services to the North Atlantic Treaty Organization or to any member government thereof, if such Organization or member government provides such data and services in accordance with an agreement on a reciprocal basis, without charge, to the United States Government.".

REPORTING REQUIREMENT

SEC. 107. Section 25 of the Arms Export Control Act is amended by striking out subsection (a)(4) and inserting in lieu thereof the following:

"(4) an estimate no later than April 1 of each year of the sale and delivery of weapons and weapons-related defense equipment by all major arms suppliers to all major recipient countries in the developing world during the preceding calendar year;".

MILITARY ASSISTANCE

SEC. 108. Section 504(a)(1) of the Foreign Assistance Act of 1961 is amended by striking out "not to exceed $238,500,000 for the fiscal year 1982 and not to exceed $238,500,000 for the fiscal year 1983" and inserting in lieu thereof "not to exceed $697,000,000 for the fiscal year 1984".

WAIVER OF NET PROCEEDS FOR SALE OF MAP ITEMS

SEC. 109. Section 505(f) of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following:

"The President may waive the requirement that such net proceeds be paid to the United States Government if he determines that to do so is in the national interest of the United States.".

STOCKPILING OF DEFENSE ARTICLES FOR FOREIGN COUNTRIES

SEC. 110. Section 514(b)(2) of the Foreign Assistance Act of 1961 is amended by striking out "$130,000,000 for the fiscal year 1982 and $125,000,000 for the fiscal year 1983" and inserting in lieu thereof "$125,000,000 for the fiscal year 1984".

SECURITY ASSISTANCE ORGANIZATIONS

SEC. 111. Section 515(c)(1) of the Foreign Assistance Act of 1961 is amended by striking out "fiscal year 1982 and the fiscal year 1983" and inserting in lieu thereof "fiscal year 1984, Pakistan, Tunisia, Yemen, Liberia, Sudan, Zaire, El Salvador, Honduras, Venezuela".

INTERNATIONAL MILITARY EDUCATION AND TRAINING

SEC. 112. Section 542 of the Foreign Assistance Act of 1961 is amended by striking out "$42,000,000 for the fiscal year 1982 and $42,000,000 for the fiscal year 1983" and inserting in lieu thereof "$56,532,000 for the fiscal year 1984".

EXCHANGE TRAINING

SEC. 113. Chapter 5 of Part II of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new section:

"SEC. 544. EXCHANGE TRAINING.—In carrying out this chapter, the President is authorized to provide for attendance of foreign military personnel at professional military education institutions in the United States (other than Service academies) without charge, and without charge to funds available to carry out this chapter (notwithstanding section 632(d) of this Act), if such attendance is pursuant to an agreement providing for the exchange of students on a one-for-one, reciprocal basis each fiscal year between those United States professional military education institutions and comparable institutions of eligible foreign countries and international organizations.".

AUTHORIZATION FOR PEACEKEEPING OPERATIONS

SEC. 114. Section 552(a) of the Foreign Assistance Act of 1961 is amended by striking out "$19,000,000 for the fiscal year 1982 and $19,000,000 for the fiscal year 1983" and inserting in lieu thereof "$46,200,000 for the fiscal year 1984".

PEACEKEEPING OPERATIONS EMERGENCIES

SEC. 115. (a) Section 552 of the Foreign Assistance Act of 1961 is amended—

(1) by inserting in subsection (c) the number "(1)" immediately after "the President may";

(2) by inserting in subsection (c) immediately before the period at the end of the subsection "; and (2) in the event the President also determines that such unforeseen emergency requires the immediate provision of assistance under this chapter, direct the drawdown of commodities and services from the inventory and resources of any agency of the United States Government of an aggregate value not to exceed $25,000,000 in any fiscal year"; and

(3) by inserting at the end thereof the following subsection:

"(d) There are authorized to be appropriated to the President such sums as may be necessary to reimburse the applicable appropriation, fund, or account for commodities and services provided under subsection (c)(2) of this section.".

(b) Section 652 of such Act is amended by inserting ", 522(c)(2)," immediately after "under section 506(a)".

TITLE II—ANTI-TERRORISM ASSISTANCE PROGRAM

SEC. 201. (a) Part II of the Foreign Assistance Act of 1961 is amended by adding the following new chapter at the end thereof:

"CHAPTER 8—ANTI-TERRORISM ASSISTANCE

"SEC. 571. GENERAL AUTHORITY—(a) Subject to the provisions of subsection (e), the President is authorized to furnish, on such terms and conditions as the President may determine, assistance to foreign countries in order to enhance the ability of their law enforcement personnel to deter terrorists and terrorist groups from engaging in international terrorist acts such as bombing, kidnaping, assassination, hostage taking, and hijacking. Such assistance may include training services and the provision of equipment and other commodities related to bomb detection and disposal, management of hostage situations, physical security, and other matters relating to the detection, deterrence, and prevention of acts of terrorism, the resolution of terrorist incidents, and the apprehension of those involved in such acts.

"(b) Notwithstanding section 660 of this Act, services and commodities may be granted for the purposes of this chapter to eligible foreign countries, subject to reimbursement of the value thereof (as defined in section 644(m)) pursuant to section 632 of this Act from funds available to carry out this chapter.

"(c) Whenever the President determines it to be consistent with and in furtherance of the purposes of this chapter, and on such terms and conditions consistent with this Act as he may determine, any agency of the United States Government is authorized to furnish services and commodities, without charge to funds available to carry out this chapter, to an eligible foreign country, subject to payment in advance of the value thereof (as defined in section 644(m)) in United States dollars by the foreign country. Credits and the proceeds of guaranteed loans made available to such countries pursuant to the Arms Export Control Act shall not be used for such payments. Collections under this chapter shall be credited to the currently applicable appropriation, account, or fund of the agency providing such services and commodities and shall be available for the purposes for which such appropriation, account, or fund is authorized to be used.

"(d) The Assistant Secretary of State for Human Rights and Humanitarian Affairs shall be consulted in the development and implementation of the anti-terrorism assistance program under this chapter, including determinations of the foreign countries that will be furnished assistance under this chapter and determinations of the nature of assistance to be furnished to each such country.

"(e)(1) Training services provided pursuant to subsection (a) shall not be conducted outside the United States.

"(2) Personnel of the United States Government authorized to advise eligible foreign countries on anti-terrorism matters shall carry out their responsibilities, to the maximum extent possible, within the United States. Such personnel may provide advice outside the United States on anti-terrorism matters to eligible foreign countries for periods not to exceed thirty consecutive calendar days.

"(3) Employees of the Department of State shall not engage in the training of law enforcement personnel or provision of services as described in subsection (a), except that employees of the Office of Security of the Department of State may provide training and services to law enforcement personnel for the physical protection of internationally protected persons and related facilities.

"(4) Equipment and commodities included on the United States munitions list established pursuant to the Arms Export Control Act shall not be made available under subsection (a).

"(5) Assistance under subsection (a) shall not include provision of services, equipment, personnel, or facilities involved in the collection of intelligence as defined in Executive Order 12333 of December 4, 1981, other than limited training in the organization of intelligence for anti-terrorism purposes.

"(6) the authority of subsection (a) of this section shall expire three years after the date of enactment of this section, except that funds obligated prior to that date may be expended after that date in accordance with this chapter.

"(7) Not less than thirty days before the President exercises his authority under subsection (a) initially to provide assistance to foreign countries to enhance their anti-terrorism law enforcement capabilities, the President shall transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign relations of the Senate a written notification which specifies—

"(1) the country to which such assistance is to be provided;

"(2) the type and value of the assistance to be provided;

"(3) the terms and duration of assistance; and

"(4) an explanation of how the proposed assistance will further the objectives of this section to assist eligible foreign countries in deterring terrorism.

The chairman of either the Committee on Foreign Affairs of the House of Representatives or the Committee on Foreign Relations of the Senate may request, as deemed necessary, a current report on the State of observance of and respect for internationally recognized human rights in the country to which assistance is to be provided. In the event that a report is requested, no assistance under subsection (a) shall be provided to the country specified prior to transmittal of the report to the requesting committee.

"(8) Not later than one year after the date of enactment of this section and each year thereafter as part of the annual congressional presentation material, the President shall transmit to the Congress a report identifying the countries receiving assistance under subsection (a), including the type, place, and duration of training being provided, number of personnel being trained, and type of equipment being transferred. The report shall also describe the ways in which the provision of such assistance has furthered the objectives of enhancing the ability of foreign law enforcement authorities to deter acts of terrorism.

"SEC. 572. APPROPRIATIONS.—(a) There is authorized to be appropriated to the President to carry out this chapter $5,000,000 for the fiscal year 1984.

"(b) For the fiscal year 1983, the President may transfer, to carry out this chapter, up to $2,500,000 of the amounts made available for any provision authorized by P.L. 97-113."

"SEC. 573. PURPOSES.—(a) Activities conducted under this chapter shall be designed—

"(1) to enhance the anti-terrorism skills of friendly countries by providing training and equipment to deter and counter terrorism;

"(2) to strengthen the bilateral ties of the United States with friendly governments by offering concrete assistance in this area of great mutual concern; and

"(3) to increase respect for human rights by sharing with foreign civil authorities modern, humane, and effective anti-terrorism techniques.

"(b) This chapter does not apply to information exchange activities conducted by agencies of the United States Government under other authority for such purposes.

"SEC. 574. ADMINISTRATIVE AUTHORITIES.—(a) Except where expressly provided to the contrary, any reference in any law to part I of this Act shall be deemed to include reference to this chapter and any reference in any law to part II of this Act shall be deemed to exclude reference to this chapter.".

(b) Section 502B(d)(2)(A) of the Foreign Assistance Act of 1961 is amended by inserting the phrase "or chapter 8 (anti-terrorism assistance)" immediately after the phrase "chapter 6 (peacekeeping operations)".

(c) Section 644(m)(5) of the Foreign Assistance Act of 1961 is amended by inserting the phrase "or services provided under chapter 8 of part II of this Act" immediately after the phrase "military education and training".

TITLE III—ECONOMIC SUPPORT FUND

AUTHORIZATION OF APPROPRIATIONS

SEC. 301. (a) Section 531(b)(1) of the Foreign Assistance Act of 1961 is amended by striking out "$2,623,500,000 for the fiscal year 1982 and $2,723,500,000 for the fiscal year 1983" and inserting in lieu thereof "$2,949,000,000 for the fiscal year 1984".

(b) Section 535 of such Act is amended—

(1) by striking out "1982" and inserting in lieu thereof "1984"; and

(2) by striking out "and up to $75,000,000 for the fiscal year 1983".

TITLE IV—DEVELOPMENT ASSISTANCE

AGRICULTURE, RURAL DEVELOPMENT, AND NUTRITION

SEC. 401. Section 103(a)(2) of the Foreign Assistance Act of 1961 is amended by striking out "$700,000,000 for the fiscal year 1982 and $700,000,000 for the fiscal year 1983" and inserting in lieu thereof "$725,213,000 for the fiscal year 1984".

POPULATION AND HEALTH

SEC. 402. Section 104(g) of the Foreign Assistance Act of 1961 is amended—

(1) by striking out the first sentence and inserting in lieu thereof the following: "There are authorized to be appropriated to the President, in addition to funds otherwise available for such purposes—

"(1) $212,231,000 for the fiscal year 1984 to carry out subsection (b) of this section; and

"(2) $100,656,000 for the fiscal year 1984 to carry out subsection (c) of this section."; and

(2) by striking out the second sentence.

EDUCATION AND HUMAN RESOURCES DEVELOPMENT

SEC. 403. Section 105(a) of the Foreign Assistance Act of 1961 is amended—

(1) in the second sentence, by striking out "$103,600,000 for the fiscal year 1982 and $103,600,000 for the fiscal year 1983" and inserting in lieu thereof "$121,477,000 for the fiscal year 1984"; and

(2) by striking out the third sentence.

ENERGY, PRIVATE VOLUNTARY ORGANIZATIONS, AND SELECTED DEVELOPMENT ACTIVITIES

SEC. 404. Section 106(e)(1) of the Foreign Assistance Act of 1961 is amended by strik-

ing out "$147,200,000 for the fiscal year 1982 and $147,200,000 for the fiscal year 1983" and inserting in lieu thereof "$182,423,000 for the fiscal year 1984".

PRIVATE SECTOR REVOLVING FUND

SEC. 405. (a) Chapter 1 of part I of the Foreign Assistance Act of 1961 is amended by adding the following new section 108:

"SEC. 108. PRIVATE SECTOR REVOLVING FUND.—(a) The Congress finds that the development of private enterprise is a vital factor in the stable growth of developing countries and in the development and stability of a free, open, and equitable international economic system. It is therefore in the best interests of the United States to assist the development of the private sector in developing countries and to engage the United States private sector in that process. In order to promote such private sector development, the President is authorized to establish a revolving fund account in the United States Treasury. All funds deposited in such account shall, notwithstanding section 1210 of the General Appropriations Act, 1951 (61 Stat. 765) or any other appropriations act, be free from fiscal year limitations.

"(b) Of the funds made available under this chapter in fiscal year 1984, up to $20,000,000 may be deposited in this account. Such funds used in accordance with the policies and authorities of this section shall be in addition to other funds available for private sector activities under other authorities in this Act. Any reflows and income arising from activities carried out pursuant to this section, including loan repayments and fee income (as provided in subsection (e) of this section), shall be deposited into the revolving fund and remain available to carry out the purposes of this section. All funds in such account may be invested in obligations of the United States.

"(c) The agency primarily responsible for administering this part is authorized to use the funds maintained in this revolving fund account to furnish assistance in furtherance of the policy of subsection (a) notwithstanding any other provision of law and on such terms and conditions as it may determine.

"(d) At the end of any fiscal year, the agency primarily responsible for administering this part may determine that amounts in the revolving fund are sufficient to permit the remittance to the United States Treasury of an amount equal to a portion or the total amount of appropriated funds deposited in the revolving fund. Any such remittance shall be deemed to be a decrease in the appropriated funds in the revolving fund. After remittance has been made of an amount equal to the total amount of appropriated funds, the revolving fund shall consist and be deemed to consist entirely of nonappropriated funds.

"(e) A fee may be charged, where appropriate, in carrying out activities with funds from the revolving fund authorized in this section. The amount of any such fee shall be determined by the agency primarily responsible for administering this part.

"(f) In the event the revolving fund is terminated, all unobligated money in the fund at the time of such termination shall be transferred to and become part of the miscellaneous receipts account of the Treasury.".

SAHEL DEVELOPMENT PROGRAM

SEC. 406. The third sentence of section 121(c) of the Foreign Assistance Act of 1961 is amended by striking out "$86,558,000 for the fiscal year 1982 and $86,558,000 for the fiscal year 1983" and inserting in lieu thereof "$103,000,000 for the fiscal year 1984".

HOUSING GUARANTY PROGRAM

SEC. 407. (a) Section 221 of the Foreign Assistance Act of 1961 is amended—

(1) in the first sentence, by striking out "requirements are" and inserting in lieu thereof ", including essential urban development services, is"; and

(2) in the rest of the section, by striking out "housing" wherever it occurs and inserting in lieu thereof "shelter".

(b) Section 222(a) of such Act is amended—

(1) in the first sentence by striking out "as defined in section 238(c)" and inserting in lieu thereof "as defined by regulation adopted by the agency primarily responsible for administering this part";

(2) in the second sentence, by striking out "$1,718,000,000" and inserting in lieu thereof "$1,868,000,000";

(3) by adding the following new sentence immediately after the second sentence: "Commitments to guarantee loans are authorized for any fiscal year only to such extent or in such amounts as are provided in appropriation acts."; and

(4) in the third sentence, by striking out "1984" and inserting in lieu thereof "1985".

(c) Section 223(f) of such Act is amended to read as follows:

"(f) In the case of any loan investment guaranteed under section 222, the agency primarily responsible for administering this part shall prescribe the maximum rate or rates of interest shall be reasonable in comparison to the rates on comparable securities in the United States capital market.".

AGRICULTURAL AND PRODUCTIVE CREDIT AND SELF-HELP COMMUNITY DEVELOPMENT PROGRAMS

SEC. 408. (a) Section 222A(c) of the Foreign Assistance Act of 1961 is amended by adding the following new sentence at the end thereof: "Commitments to guarantee loans are authorized for any fiscal year only to such extent or in such amounts as are provided in appropriation acts.".

(b) Section 222A(h) of such Act is amended by striking out "1983" and inserting "1984" in lieu thereof.

TITLE V—MISCELLANEOUS PROVISIONS

AMERICAN SCHOOLS AND HOSPITALS ABROAD

SEC. 501. Section 214(c) of the Foreign Assistance Act of 1961 is amended by striking out "$20,000,000 for the fiscal year 1982 and $20,000,000 for the fiscal year 1983" and inserting in lieu thereof "$7,500,000 for the fiscal year 1984".

INTERNATIONAL ORGANIZATIONS AND PROGRAMS

SEC. 502. Section 302(a)(1) is amended—

(1) in the first sentence, by striking out "$218,600,000 for the fiscal year 1982 and $218,600,000 for the fiscal year 1983" and inserting in lieu thereof "$189,950,000 for the fiscal year 1984"; and

(2) by striking out the second sentence.

INTERNATIONAL NARCOTICS CONTROL

SEC. 503. Section 482(a) of the Foreign Assistance Act of 1961 is amended by striking out "$37,700,000 for the fiscal year 1982 and $37,700,000 for the fiscal year 1983" and inserting in lieu thereof "$53,030,000 for the fiscal year 1984".

INTERNATIONAL DISASTER ASSISTANCE

SEC. 504. (a) Section 492(a) of the Foreign Assistance Act of 1961 is amended by striking out "$27,000,000 for the fiscal year 1982 and $27,000,000 for the fiscal year 1983" and inserting in lieu thereof "$25,000,000 for the fiscal year 1984".

COMPLETION OF PLANS AND COST ESTIMATES

SEC. 505. (a) Section 611(a) of the Foreign Assistance Act of 1961 is amended by striking out "$100,000" and inserting in lieu thereof "$500,000".

(b) Section 611(b) of such Act is amended by striking out the phrase "made insofar as practicable in accordance with the procedures set forth in the Principles and Standards for Planning Water and Related Land Resources, dated October 25, 1973, with respect to such computations" and inserting in lieu thereof "made insofar as practicable in accordance with the principles, standards, and procedures established pursuant to the Water Resources Planning Act (42 U.S.C. section 1962, *et seq.*) or acts amendatory or supplementary thereto".

PROHIBITIONS AGAINST ASSISTANCE TO THE PEOPLE'S REPUBLIC OF CHINA

SEC. 506. Section 620(f) of the Foreign Assistance Act of 1961 is amended—

(1) by striking out the period at the end of the first sentence of the subsection and adding at the end of that sentence "listed in this subsection.";

(2) by striking out in the third sentence of that subsection the phrase ", but is not limited to,"; and

(3) by striking from the list of countries set forth in that subsection the words "People's Republic of China." and "Tibet.".

PERIODIC REPORTS

SEC. 507. (a) Section 620(s) of the Foreign Assistance Act of 1961 is amended by repealing subsection (2).

(b) Section 634(a) of such Act is amended by repealing subsections (2)(B), (6), and (7).

(c) Section 306(b) is repealed.

NOTIFICATION OF PROGRAM CHANGES

SEC. 508. (a) Section 634A of the Foreign Assistance Act of 1961 is amended—

(1) by inserting "(a)" immediately before "None";

(2) by inserting "or the Arms Export Control Act" immediately after "disaster relief and rehabilitation)" and immediately after "this Act" the second place it appears;

(3) by inserting "by more than ten percent" immediately after the phrase "or in excess of the amount justified"; and

(4) by adding at the end of the section the following new subsection:

"(b) The notification requirement of this section does not apply to the reprogramming of less than $50,000 for use under chapter 8 of part I or chapter 5 of part II for a country for which a program under that chapter for that fiscal year was justified to the Congress.".

(b) Section 653 of the Foreign Assistance Act of 1961 is amended—

(1) by inserting in subsection (a) "or the Arms Export Control Act" immediately after "sections 451 or 637)";

(2) by striking out subsection (b); and

(3) by redesignating subsection (c) as subsection (b).

(c) Section 36(a)(5) of the Arms Export Control Act is amended by striking out ", credits to be extended under Section 23, and guaranty agreements to be made under section 24".

(d) Section 36(a)(6) of the Arms Export Control Act is amended by striking out "and credits expected to be extended".

PROVISIONS ON USES OF FUNDS

SEC. 509. (a) Section 636(a)(14) of the Foreign Assistance Act of 1961 is amended by

striking out "the Foreign Service Act of 1946, as amended" and inserting in lieu thereof "the Foreign Service Act of 1980".

(b) Section 636(c) of such Act is amended by striking out "not to exceed $3,000,000 of the".

(c) Section 636(d) of such Act is amended by striking out "$2,500,000" and inserting in lieu thereof "$5,000,000".

(d) Section 636 of such Act is amended further by adding the following new subsection (j) at the end thereof:

"(j)(1) Notwithstanding any other provision of law, no earmark shall be required to be applied to any funds appropriated, or authority made available, to carry out the purposes of this Act or the Arms Export Control Act by any law making continuing appropriations, in excess of the amount which is the lesser of:

"(A) the amount of the earmark, or

"(B) the amount representing that proportion of the total funds appropriated to, or authority made available for, an appropriation account, which the amount of the earmark represented of the total amount authorized, appropriated, or made available for the same appropriation account in the law which established such earmark.

"(2) For the purposes of this subsection, an earmark is a statutory requirement that a minimum or definite amount of the total funds appropriated to, or authority made available for, an appropriation account be obligated, or used, only for a specific country or purpose.".

TRADE AND DEVELOPMENT PROGRAM

SEC. 510. Section 661(b) of the Foreign Assistance Act of 1961 is amended by striking out "$6,907,000 for the fiscal year 1982 and $6,907,000 for the fiscal year 1983" and inserting in lieu thereof "$22,000,000 for the fiscal year 1984".

OPERATING EXPENSES

SEC. 511. Section 667(a) of the Foreign Assistance Act of 1961 is amended by striking out "$335,600,000 for the fiscal year 1982 and $335,600,000 for the fiscal year 1983" and inserting in lieu thereof "$378,512,000 for the fiscal year 1984".

REPEAL OF PROVISIONS

SEC. 512. The following provisions of the Foreign Assistance Act of 1961 are hereby repealed: sections 106(b)(1)(B), 110(b), 113(c), 222A(f), 302 (b)(1) and (b)(2), 302(i), 495, 495D, 495E, 495G, 496, 497, 532, 533, 534, 536, 537, 538, 539, and 540.

TITLE VI—AMENDMENTS TO OTHER ACTS

PARTICIPANT TRAINEE GRANTS

SEC. 601. Section 1441(c)(6) of the Internal Revenue Code of 1954 is amended by inserting "scholarship or fellowship grants, including" immediately after "amounts of".

AFRICAN DEVELOPMENT FOUNDATION

SEC. 602. Section 510 of the International Security and Development Cooperation Act of 1980 is hereby repealed and the following new section inserted in lieu thereof:

"SEC. 510. There are authorized to be appropriated to the President to carry out this title, in addition to funds otherwise available for such purposes, $3,000,000 for the fiscal year 1984, which are authorized to remain available until expended.".

TITLE VII—AUTHORIZATIONS FOR THE FISCAL YEAR 1985 AND EFFECTIVE DATE

AUTHORIZATIONS FOR THE FISCAL YEAR 1985

SEC. 701. There are authorized to be appropriated for the fiscal year 1985 such sums as may be necessary to carry out programs and activities for which appropriations for the fiscal year 1984 are authorized by this Act.

EFFECTIVE DATE

SEC. 702. (a) Title II of this Act shall take effect upon enactment.

(b) Sections 104 and 105 of this Act shall take effect upon enactment or October 1, 1983, whichever date is later.

(c) All other sections of this Act shall take effect on October 1, 1983.

SECTION-BY-SECTION ANALYSIS OF THE PROPOSED INTERNATIONAL SECURITY AND DEVELOPMENT COOPERATION ACT OF 1983

I. INTRODUCTION

The proposed International Security and Development Cooperation Act of 1983 ("the Bill") amends the Foreign Assistance Act of 1961 ("FAA") and the Arms Export Control Act ("AECA") in order to authorize appropriations to carry out international security and development assistance programs for the fiscal year 1984, and to make certain changes in the substantive authorities governing those programs. The Bill also contains authorizations for the fiscal year 1985 in accordance with the requirements of the Congressional Budget Act of 1974.

The Bill is composed of seven titles. Title I consists of authorizations for military sales and related programs under the AECA and the FAA. Title II authorizes a new anti-terrorism law enforcement assistance program. Title III provides authorization for the economic support fund. Title IV contains authorizations for the FAA development assistance provisions. Title V contains miscellaneous amendments to the FAA and AECA, including authorizations for the international narcotics program and operating expenses for the Agency for International Development. Title VI contains amendments to the Internal Revenue Code of 1954 and the International Security and Development Cooperation Act of 1980. Title VII provides for authorizations for fiscal year 1985 in accordance with the requirements of the Congressional Budget Act of 1974 and for the effective dates for the various provisions of the Bill.

II. PROVISIONS OF THE BILL

Section 1. Short title

This section provides that the Bill may be cited as the "International Security and Development Cooperation Act of 1983".

TITLE I—MILITARY SALES AND RELATED PROGRAMS

Section 101. Foreign military sales credits authorization and aggregate ceilings

This section amends section 31(a) of the AECA to authorize $1,000,000,000 in appropriations for fiscal year 1984 to carry out the foreign military sales (FMS) credit program. Section 31(b)(1) of the AECA is amended to establish at $1,000,000,000 for fiscal year 1984 the limit on the aggregate amount of FMS credits which may be extended under section 23 of the AECA. Section 31(b)(2) of the AECA is amended to establish at $4,436,000,000 for fiscal year 1984 the limit on the total principal amount of loans for which guaranties may be issued under section 24(a) of the AECA. Section 31(b)(3) of the AECA is amended to provide that during fiscal year 1984 no less than $1,700,000,000 in FMS credits and guaranteed loans shall be available for Israel. Section 31(b)(5) is amended to add Korea to the list of countries which would be authorized for fiscal year 1984 to repay loans guaranteed under sections 24(a) of the AECA in not mroe than twenty years, following a grace period of ten years on repayment of principal. Paragraphs (6) and (7) of section 31(b) are repealed and replaced with a provision allowing the President to release Egypt from its contractual liability to repay loans extended under section 23 in an amount up to $450,000,000. Finally, section 31(c) of the AECA is amended to authorize for fiscal year 1984 continuation of favorable repayment terms for Israel in connection with credits extended under section 23 and loans guaranteed under section 24.

Section 102. Administrative surcharge

Paragraph 1(A) of section 21(e) of the AECA is amended to further explain that the "costs" which must be recovered by the United States Government are those costs which would not otherwise be incurred by the United States. This change is comparable to the revision of training prices effected by section 115 of P.L. 96-533. Enactment of this amendment is not expected to result in a reduction of the current administrative surcharge percentage, but will avoid the necessity of an immediate increase in the percentage levied on all foreign military sales.

Section 103. Charges for administrative service

Section 43(b) of the AECA is amended to provide that the United States is to recover "extraordinary" as well as administrative expenses for services calculated under section 21(e)(1)(A) of the AECA. The amendment will permit the use of administrative funds to augment military assistance (MAP) funds available for security assistance representational activities.

Section 104. Charges for training sold under the AECA

This provision will eliminate the current multi-tier price structure on sales of training. Thereafter there would be only two comparable pricing systems, one for IMET and one for FMS. For example, under the current system the cost of FMS training for foreign students in the same course at the Army Command and General Staff College could range from $4,598 to $31,499. The new proposal would authorize all purchasers to be charged the "additional cost" that would be incurred to provide this training; in the above example, the $4,598 rate. Enactment of the provision would reduce discrimination among countries and U.S. administrative costs.

Section 105. Increase in criminal penalties for certain violations of AECA

Recent changes in the Export Administration Act imposed potentially greater penalties for persons violating commercial export laws and regulations than for those violating section 38 of the AECA. This provision would increase the maximum criminal penalty for certain violations of the AECA from $100,000 or two years imprisonment or both, to $1 million or 10 years imprisonment or both. The ceiling for civil penalties for violations would be raised from $100,000 to $500,000. This amendment would apply to violations which occur after the effective date of this section.

Section 106. Catalog data and services

The AECA permits in-kind reciprocal exchange of some services with NATO countries, but sill requires that the U.S. charge for catalog data. In fiscal year 1982 such charges amounted to $850,000. Other countries are beginning to charge DOD in return, with DOD paying over $100,000 in fiscal year 1982. In future years, as efforts

intensify to increase NATO standardization, there will be increasing requests for catalog-ing and codification serices, which DOD performs pursuant to chapter 145 of title 10 United States Code. This amendment would avoid a series of sales cases for relatively minor transactions with those NATO countries that provide similar services free of charge to the United States.

Section 107. Reporting requirement

This section would revise the reporting requirement of section 25(a)(4) to apply only to sales and deliveries to recipient countries in the developing world. The section as amended would exclude from the required report estimates of sales and deliveries among NATO countries, Japan, Australia and New Zealand and among Warsaw Pact countries. This change would conform the statutory language to the intentions of the Congress. The amendment would also establish an April 1 deadline for this information rather than the current February 1 deadline for this report. This change would allow inclusion of full calendar year data on sales and deliveries in the information presented to Congress.

Section 108. Military assistance program

The President's budget for fiscal year 1984 requests an appropriation of $747,000,000 to carry out the military assistance program. This section amends section 504 to authorize $697,000,000 for fiscal year 1984 in appropriations to carry out this program. Section 506(c) already provides authorization to appropriate that part of the budget request ($50,000,000) which is proposed to be used for reimbursement to the Department of Defense for defense articles, defense services and military education and training previously drawn down pursuant to section 506(a).

Section 109. Waiver of net proceeds for sales of map items

This section amends section 505(f) of the FAA to allow the President to waive the requirement that a country pay to the U.S. the net proceeds from the sale of defense articles previously furnished to it on a grant basis under the military assistance program. Most of this equipment was programmed under MAP prior to 1975. Countries which possess aging, obsolete MAP defense articles currently have an incentive to retain this equipment, rather than to sell it and use the proceeds for newer equipment, even though retaining it requires increasing maintenance costs. This provision would allow the President to remove this disincentive to a country's modernizing its defense inventory when it is in the U.S. national interest to do so. All legal and policy controls applicable to third country transfers would continue to apply to any sales of this equipment.

Section 110. Stockpiling of defense articles for foreign countries

This section amends section 514(b)(2) of the FAA to establish a ceiling of $125,000,000 on the aggregate value of additions made in fiscal year 1984 to overseas stockpiles of defense articles (other than in NATO countries) which are designated as war reserve stocks for allied or other foreign forces. The United States retains title to any stocks so designated. Transfer of these stocks to a foreign country may take place only under the authority of the FAA or of the AECA, and within the limitations and funds available under those Acts.

Section 111. Security assistance organizations

Section 515 provides specific annual authorization to station permanently more than six military personnel in certain countries to manage security assistance programs. This section would add for fiscal year 1984 nine new countries to the twelve countries which are currently authorized in the statute to have more than six uniformed personnel assigned to them for managing security assistance programs.

Section 112. Grant training

Section 542 of the FAA is amended to authorize $56,532,000 for fiscal year 1984 in appropriations for the International Military Education and Training (IMET) program.

Section 113. Exchange training

The bill would provide for the establishment of a new section 544 in the FAA concerning exchange (barter) training. The President will be authorized to provide to foreign military personnel professional military education training only at U.S. war colleges and U.S. command and staff colleges in the United States. The training of each foreign student under this authority will be conditioned on the requirement that, commencing in the same U.S. fiscal year, a U.S. military student be trained in a foreign college which the U.S. military department involved determines to be comparable to its military colleges. Such exchanges would be negotiated with foreign countries and international organizations after enactment.

Section 114. Peacekeeping operations authorization

Section 552(a) of the FAA is amended to authorize $46,200,000 for fiscal year 1984 in appropriations to carry out peacekeeping operations and other programs. These programs would include the United States budgetary contribution to the Multinational Force and Observers (MFO) for the Sinai.

Section 115. Peacekeeping operations emergencies

Section 552(c) of the FAA is amended to provide that the President may draw down commodities and services of an aggregate value not to exceed $25,000,000 for each fiscal year from any United States Government agency for peacekeeping purposes, if he determines that an unforeseen emergency requires immediate assistance under the peacekeeping provisions of the FAA. A new subsection (d) authorizes appropriations to reimburse the applicable account for commodities and services provided pursuant to this section. Section 652 of the FAA is amended to require that the President notify the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate in writing should he intend to exercise this authority, stating the justification for, and the extent of, the exercise of such authority.

TITLE II—ANTITERRORISM ASSISTANCE

Section 201. Antiterrorism assistance

This section would add a new Chapter 8 to Part II of the FAA to authorize an anti-terrorism assistance program. Under section 571(a), the President is authorized to furnish, on such terms and conditions as he may determine, anti-terrorism assistance to foreign countries in order to enhance their ability to deter and prevent terrorism. Section 571(b) provides that, notwithstanding the prohibition in section 660 of the FAA on funding certain police and law enforcement assistance in foreign countries, services and commodities may be granted to eligibile countries subject to reimbursement and allocation limitations contained in section 644(m) and 632 of the FAA. Section 571(c) provides that, as an alternative to grants under subsection (b), the President may make available services and commodities to a foregin country to carry out the purposes of this chapter subject to payment in advance by the recipient country. Section 571(d) provides that the Assistant Secretary of State for Human Rights and Humanitarian Affairs shall be consulted in the development and implementation of the anti-terrorism program.

Section 571(e) provides that all training is to be conducted in the United States, but that U.S. employees involved in the program may provide advice outside the United States to program participants for short periods not to exceed 30 consecutive calendar days. Section 571(e)(3) prohibits Department of State employees, except certain Office of Security personnel, from providing training and services to program participants. Section 571(e)(4) prohibits the transfer of equipment and commodities included on the munitions list under subsection (a). Section 571 (e) (5) prohibits the provision of services, equipment, personnel, or facilities involved in intelligence collection as defined in Executive Order 1233 of December 4, 1981, but permits limited training in the organization of intelligence for anti-terrorism purposes. Section 571(e) (6) provides for a three-year sunset on the program. Section 571(e)(7) requires a thirty-day advance notification of those countries that will initially be participating in the program to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations of the Senate prior to the obligation of funds made available under this authority. Section 571(e)(8) provides that an annual report shall be provided to Congress.

Section 572 would authorize to be appropriated to the President to carry out this new chapter $5,000,000 for the fiscal year 1984. This section would also permit the President to use up to $2,500,000 of funds available for other provisions authorized by P.L. 97-113 to carry out this chapter during fiscal year 1983. Section 573 defines the purposes for which the anti-terrorism activities are to be designed—namely, to enhance the anti-terrorism skills of friendly countries by offering assistance in the anti-terrorism field. It also indicates that this chapter is not intended to limit or prohibit information exchange activities by U.S. government agencies under other authority. Section 574 provides that this anti-terrorism program will be conducted under non-military authorities of the FAA, as is the case of the Economic Support Fund and Peacekeeping Operations, for example. Finally sections 502B(d)(2)(A) and 644(m)(5) of the FAA are amended to ensure that relevant definitions of "security assistance" and "value" in the FAA are altered appropriately.

TITLE III—ECONOMIC SUPPORT FUND

Section 301. Authorization of appropriations

Section 531(b) of the FAA is amended to authorize an appropriation for the Economic Support Fund of $2,949,000,000 for fiscal year 1984. The emergency assistance authority of section 535 is continued for fiscal year 1984.

TITLE IV—DEVELOPMENT ASSISTANCE

Section 401. Agriculture, rural development, and nutrition

Section 401 amends section 103(a)(2) of the Act, which authorizes funds for agriculture, rural development, and nutrition, to authorize $725,213,000 for the fiscal year 1984.

Section 402. Population and health

Section 402 amends section 104(g) of the Act, which authorizes funds for population and health. Section 104(g) is amended to authorize $212,231,000 for the population program for the fiscal year 1984 and to authorize $100,656,000 for the health program for the fiscal year 1984.

Section 403. Education and human resources development

Section 403 amends section 105(a) of the Act, which authorizes funds for education and human resources development. Section 105(a) is amended to authorize $121,477,000 for these programs for the fiscal year 1984 and to delete the second sentence, which earmarked funds for fiscal years 1982 and 1983 and is obsolete.

Section 404. Energy, private voluntary organizations, and selected development activities

Section 404 amends section 106(e)(1) of the Act, which authorizes funds for energy, private voluntary organizations, and selected development activities, and for science and technology activities, the authorize $182,423,000 for the fiscal year 1984.

Section 405. Private sector revolving fund

Section 405(a) adds a new section 108 to part I, chapter 1 of the Act establishing a revolving fund for private sector activities. Section 108(a) states the importance of encouraging the growth of private enterprise in developing countries and authorizes the establishment of a revolving fund account to be used for such purposes, which shall be free from fiscal year limitations. Section 108(b) provides that up to $20,000,000 in fiscal year 1984 of funds appropriated to other accounts in chapter 1 of part I may be deposited in this account. This fund may be used only for private sector activities; however, other funds provided under section 106 or other sections of the Act will remain available for private sector activities as well. Income and reflows arising from the fund, including the repayment of loans made from the fund and fees charged for transactions, will be deposited in the fund for further use.

The purpose of the revolving fund is to create a source of funds which can be made available for a variety of innovative private sector activities. The authority to re-use loan repayments and return of capital would permit the roll-over of investments and thus afford a substantial leveraging effect. Statements regarding the financial condition of the fund will take into consideration the cost of funds to the United States Government.

Section 108(c) provides that the use of funds in the revolving fund account shall not be subject to the restrictions of other provisions of law, including the restrictions on use which may otherwise attach by virtue of the account to which the funds deposited in the revolving fund were originally appropriated.

Section 108(d) provides that when there are sufficient funds available in the revolving fund, repayments may be made to the United States Treasury until the total amount of appropriated funds has been repaid, at which time the fund shall be deemed to consist entirely of nonappropriated funds. Section 108(e) provides that AID may charge a fee when carrying out activities with funds from the revolving fund. Section 108(f) provides that in the event the revolving fund is terminated, unobligated balances in the fund will be deposited in the miscellaneous receipts account of the Treasury.

Section 406. Sahel development program

Section 406 amends section 212(c) of the Act, which authorizes the Sahel Development Program. Section 121(c) is amended to authorize $103,000,000 for that program for the fiscal year 1984.

Section 407. Housing guaranty program

Section 407(a) amends section 221 of the Act to reflect the fact that housing guaranties are available for urban development activities in addition to the construction of housing in the narrow sense of the term. The amendments do not expand existing authority. Their purpose is to bring section 221 into harmony with the authority provided under section 222. Section 221 was not amended at the time section 222 was amended in 1978 to broaden its terms.

Section 407(b) amends section 222(a) of the Act, which authorizes the housing guaranty program, by providing that eligible investors under the program shall be defined by regulation promulgated by the Agency for International Development rather than by the current definition under section 238(c) of the Act, which is part of the OPIC legislation and more appropriate to its program. AID would expect to define eligible investors for the housing guaranty program so as to maximize the role of U.S. capital market lenders while improving the negotiability of underlying notes.

Section 407(b) further amends section 222(a) to increase the total amount of housing guaranties authorized to be outstanding from $1,718,000,000 to $1,868,000,000 and to provide that guarantee commitments are authorized for any fiscal year only to the extent provided in appropriation acts.

Section 407(b) also amends section 222(a) to extend the authority for the housing guaranty program from September 30, 1984 to September 30, 1985. Because the loans for which guaranties are to be issued sometimes close after the end of the fiscal year, therefore delaying the issuance of the guaranties, the housing guaranty program needs authority that extends beyond the fiscal year in which the guaranty was authorized. This amendment provides the authority to issue guaranties after the close of fiscal year 1984 and conforms with past legislative practice in extending the program.

Section 407(c) amends section 223(f) of the Act, which prescribes the maximum rate of interest allowable for housing guaranties. The current provision ties the maximum rate to the rate of interest applicable to housing mortgages insured by the Department of Housing and Urban Development. It was originally enacted at a time when the same lenders were active in both the domestic HUD program and in AID's housing guaranty program. Section 223(f) is amended to permit the Agency for International Development, in consultation with the Department of Treasury, to prescribe a maximum rate of interest that is reasonable in comparison to rates on comparable securities in the U.S. capital market to reflect the broader range of investors now active in the program.

Section 408. Agricultural and productive credit and self-help community development programs

Section 408(a) amends section 222A(c) of the Act to provide that commitments to guarantee loans under section 222A are authorized only to the extent provided in appropriation acts.

Section 408(b) amends section 222A(h) to extend the authority for the program from September 30, 1983 to September 30, 1984.

TITLE V—MISCELLANEOUS PROVISIONS

Section 501. American schools and hospitals abroad

This section amends section 214(c) of the Act, which authorizes funds for American Schools and Hospitals Abroad. It authorizes $7,500,000 for that purpose for the fiscal year 1984.

Section 502. International organizations and programs

Section 502 amends section 302(a)(1) of the Act, which authorizes funds for International Organizations and Programs. Section 302(a)(1) is amended to authorize $189,950,000 for these programs for the fiscal year 1984. Section 302(a)(1) is also amended to strike the second sentence, which earmarked funds for fiscal years 1982 and 1983 and is obsolete.

Section 503. International narcotics control

This section amends section 482(a) of the FAA to authorize appropriations for International Narcotics Control of $53,030,000 for fiscal year 1984.

Section 504. International disaster assistance

Section 504 amends section 492(a) of the Act to authorize $25,000,000 in appropriations for International Disaster Assistance for the fiscal year 1984.

Section 505. Completion of plans and cost estimates

Section 505(a) amends section 611(a) of the Act, which requires that adequate plans and cost estimates be completed prior to the obligation of funds in excess of $100,000. That provision is amended to apply to a minimum amount of $500,000 rather than $100,000, to take account of the inflation that has occurred since the provision was enacted in 1958.

Section 505(b) amends section 611(b) of the Act, which requires that cost/benefit analyses be conducted for water projects in accordance with the Principles and Standards for Planning Water and Related Land Resources, dated October 25, 1973. Section 611(b) is amended to reference the principles, standards and procedures established pursuant to the Water Resources Planning Act (42 U.S.C. 1962, et seq.) and will make applicable the recently approved Economic and Environmental Principles and Guidelines for Water and Related Land Resources Implementation Studies.

Section 506. Prohibition against assistance to the People's Republic of China

Section 620(f) of the FAA is amended to remove the People's Republic of China and Tibet (which is administered as part of China) from the category of countries to which assistance is prohibited. As a result of this amendment, the People's Republic of China would not be considered a "communist-bloc" country for the purpose of section 620(h).

Section 507. Periodic reports

Section 507(a) amends section 620(s) of the Act by repealing subsection (2). Section

620(s)(2) requires the President to report to Congress on his actions in taking into account the impact of military expenditures on the budget of recipients of foreign assistance. Most of the information contained in this report is reported separately by the Department of State pursuant to section 25 of the Arms Export Control Act. The purpose of this amendment is to reduce administrative costs by eliminating this duplication of reports.

Section 507(b) amends section 634(a) by repealing subsections (2)(B) (6), and (7). The purpose of this amendment is also to reduce administrative costs by eliminating duplicative reporting requirements. Section 634(a)(2)(B) requires a report of the dollar value by category and country of all foreign assistance. The information contained in this report is already reported to Congress in the "all-spigots" tables for each country included in the Congressional Presentation. Section 634(a)(6) requires a report of the dollar volume of foreign assistance for all OECD and OPEC countries. Section 634(a)(7) requires a report of the percentage of both the GNP and the budget of each type of assistance for every OECD and OPEC country, and the per capita contributions of these countries. The data required by these reports is difficult to derive, since other donors do not disaggregate and report official development assistance in categories comparable to those used in categorizing U.S. assistance. The data that does exist is already available to the Congress in the annual report of the DAC Chairman, as well as in other OECD and World Bank publications.

Section 507(c) repeals section 306(b) of the Act. Section 2 of P.L. 81-806 currently requires annual reporting of all contributions, including voluntary payments, to international organizations. That annual report includes information required by section 306(b), making the latter reporting requirement redundant and unnecessary.

Section 508. Notification of program changes

This section makes funds appropriated to carry out the provisions of the Arms Export Control Act subject to the reprogramming requirements of section 634A and the reporting requirements of section 653(a) of the FAA. This section also deletes certain reporting requirements for FMS financing which would be redundant in light of this amendment to sections 634A and 653(a). In addition, this section deletes the requirement that a section 653(b) report be filed in certain cases before assistance is provided. These changes streamline and make standard various overlapping report and reprogramming requirements, but do not materially change the type of information provided to the Congress.

This section also amends section 634A of the Act by eliminating the requirement under that provision to notify Congress 15 days in advance of obligating funds in cases where the obligation will exceed the prior amount justified for the year by 10 percent or less. This change will permit needed flexibility to reallocate funds at the end of the fiscal year while not allowing significant changes without prior congressional notification.

Section 634A of the FAA is further amended to establish a threshold of $50,000 on reprogramming notices to the Congress for International Narcotics Control and IMET programs. Had such a threshold been in effect during fiscal year 1981, sixteen of thirty IMET reprogramming notices would not have been required under section 634A. Eliminating small programming changes for reprogramming requirements would permit prompt execution of small but politically sensitive training programs and would provide a fast reaction capability against illicit narcotics efforts. Reprogramming notices to the Congress would still be required for countries for which a program had not previously been justified to the Congress for that fiscal year, even if the amount to be provided to such country would fall below the $50,000 threshold.

Section 509. Provisions on uses of funds

Section 509(a) amends section 636(a)(14) of the Act to make a technical change. The "Foreign Service Act of 1980" is substituted for the "Foreign Service Act of 1946", which it replaced.

Section 509(b) amends section 646(c) of the Act by eliminating the $3,000,000 ceiling on the use of funds to construct or acquire essential living quarters, office space, schools, and hospitals for use of U.S. Government personnel posted outside the United States conducting activities authorized by the Act. As a result of greatly increased leasing costs overseas, it is now often more economical over the long run for the U.S. Government to purchase or construct living quarters than to lease them. Additionally, for security reasons and otherwise, in several countries no suitable quarters are available for leasing. The $3,000,000 limitation on use of funds for purchase or construction of overseas facilities no longer allows the U.S. Government sufficient flexibility to provide these facilities in an economical manner.

Section 509(c) amends section 636(d) of the Act by raising the ceiling on use of funds for supporting schools for dependents outside the United States from $2.5 million to $5.0 million. The $2.5 million limitation has been in effect since 1969. Inflation has greatly reduced the purchasing power of that amount since that time, while the number of schools being supported has increased from 43 to 57. The funds are no longer sufficient to provide adequate support to overseas schools. As a result, the quality of these schools is deteriorating.

Section 509(d) amends section 636 of the FAA by adding a new subsection (j) to allow statutory earmarks to be converted from fixed to proportionate requirements during periods when funds are appropriated by a continuing resolution. During periods when funding is made available by a continuing resolution, foreign assistance programs may operate at funding levels significantly below authorized levels. In these circumstances serious problems may be encountered in assisting countries which do not have funds earmarked for their benefit. This section would allow the Executive Branch to allocate to earmarked countries an amount in the same proportion to available continuing resolution funds as the original earmark was to the total level authorized or appropriated in the Act which established the earmark.

Section 510. Trade and development program

This section amends section 661(b) of the Act, which authorizes funds for the Trade and Development Program. Section 661(b) is amended to provide authority for this program for the fiscal year 1984 in the amount of $22,000,000.

Section 511. Operating expenses

This section amends section 667(a) of the Act, which authorizes funds for operating expenses of the Agency for International Development. Section 667(a) of the Act is amended to provide authority for the fiscal year 1984 in the amount of $378,512,000.

Section 512. Repeal of provisions

This section repeals provisions of the Act which are obsolete. It also repeals section 110(b), which prohibits disbursement of grant assistance for a project over a period exceeding thirty-six months. At the time this prohibition was enacted, it provided a useful control for the Congress over large capital assistance projects. The Agency no longer participates much in that type of project, and the Congress now has a better review mechanism through the congressional notification process. Section 110(b), therefore, is no longer necessary.

TITLE VI—AMENDMENTS TO OTHER ACTS

Section 601. Participant trainee grants

This section amends section 1441(c)(6) of the Internal Revenue Code to exempt from withholding amounts received as scholarships by non-resident aliens engaged in training programs in the United States under the Act. Section 1441(c)(6) currently exempts only per diem. Withholding for each participant trainee would result in high administrative costs to the implementing contractors and PVOs that would ultimately be passed on to AID. It would also reduce the amount of funds actually available for the training programs themselves. This provision is intended to correct these problems.

Section 602. African Development Foundation

This section amends Title V of the International Security and Development Cooperation Act of 1980 to authorize the appropriation of $3,000,000 for the African Development Foundation for the fiscal year 1984.

TITLE VII—AUTHORIZATIONS FOR FISCAL YEAR 1985 AND EFFECTIVE DATE

Section 701. Authorizations for the fiscal year 1985

This section, in accordance with the requirements of section 607 of the Congressional Budget Act of 1974, authorizes appropriations for fiscal year 1985 for all programs and activities for which appropriations for the fiscal year 1984 are authorized by this Act.

Section 702. Effective date

This section provides that the effective date for title II shall be upon enactment. Sections 104 and 105 would be effective upon the later of enactment or October 1, 1983, to avoid the possibility that the change in penalties under the AECA would be retroactive and to allow adequate time to implement the change in pricing for training. All other sections would be effective on October 1, 1983.

S. 638

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Special Security Cooperation Act of 1983".

MILITARY SALES AND RELATED PROGRAMS

SEC. 101. (a) In addition to amounts otherwise made available for the fiscal year 1983 for loan guaranties under section 24(a) of the Arms Export Control Act, $425,000,000 of loan principal are authorized to be so guaranteed during such fiscal year.

(b) In addition to amounts otherwise made available for the fiscal year 1983 to

carry out the provisions of section 503 of the Foreign Assistance Act of 1961, there is authorized to be appropriated $142,000,000 to carry out such provisions for such fiscal year.

ECONOMIC SUPPORT FUND

SEC. 102. In addition to amounts otherwise authorized to be appropriated for the fiscal year 1983 to carry out the provisions of chapter 4 of part II of the Foreign Assistance Act of 1961, there is authorized to be appropriated $82,000,000 to carry out such provisions for such fiscal year.

INTERNATIONAL ORGANIZATIONS AND PROGRAMS

SEC. 103. In addition to amounts otherwise made available for the fiscal year 1983 to carry out the provisions of chapter 3 of part I of the Foreign Assistance Act of 1961, there is authorized to be appropriated for the fiscal year 1983 $4,500,000 to carry out such provisions, for payment to the International Atomic Energy Agency.

SECTION-BY-SECTION ANALYSIS OF THE PROPOSED SPECIAL SECURITY COOPERATION ACT OF 1983

I. INTRODUCTION

The proposed Special Security Cooperation Act of 1983 contains freestanding provisions in order to authorize supplemental international security assistance to meet urgent needs for fiscal year 1983.

II. PROVISIONS OF THE BILL

Section 101. Military sales and related programs

This section authorizes an increase of $425,000,000 in the limit established in P.L. 97-377 on the total principal amount of loans for which guaranties may be issued during fiscal year 1983 under section 24(a) of the AECA.

In addition, this section authorizes an increase in appropriations of $142,000,000 above the amount made available in P.L. 97-377 for fiscal year 1983 to carry out the military assistance program. Although the President's budget for fiscal year 1984 requested a supplemental appropriation of $167,000,000 to carry out the military assistance program for fiscal year 1983, section 506(c) already provides authorization to appropriate that part of the budget request ($25,000,000) which is proposed to be used for reimbursement to the Department of Defense for defense articles, defense services and military education and training previously drawn down pursuant to section 506(a).

Section 102. Economic support fund

The President's budget for fiscal year 1984 requested a supplemental appropriation of $144,500,000 for the Economic Support Fund for fiscal year 1983. This section increases by $82,000,000 the authorization of appropriations for fiscal year 1983 for this Fund, made by P.L. 97-113. The amounts appropriated in P.L. 97-377 for this Fund for fiscal year 1983 were $62,500,000 less than the amount authorized by P.L. 97-113.

Section 103. International organizations and programs

This section authorizes an increase in appropriations of $4,500,000 above the amount made available in P.L. 97-377 for fiscal year 1983 to carry out Chapter 3 of part I of the Foreign Assistance Act of 1961, as amended. These funds will be used for payments to the International Atomic Energy Agency.

S. 639

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SEC. 1. This Act may be cited as the "Lebanon Emergency Assistance Act of 1983".

ECONOMIC SUPPORT FUND

SEC. 2. (a) It is hereby determined that the national interests of the United States would be served by the authorization and appropriation of additional funds for economic assistance for Lebanon in order to promote the economic and political stability of that country and to support the international effort to strengthen a sovereign and independent Lebanon.

(b) Accordingly, in addition to amounts otherwise authorized to be appropriated for fiscal year 1983 to carry out the provisions of chapter 4 of part II of the Foreign Assistance Act of 1961, there is authorized to be appropriated $150,000,000 to carry out such provisions.

(c) The amounts appropriated pursuant to this section are authorized to remain available until expended.

MILITARY SALES AND RELATED PROGRAMS

SEC. 3. (a) In order to support the rebuilding of the armed forces of Lebanon, the Congress finds that the national security interests of the United States would be served by the authorization and appropriation of additional funds to provide training for the Lebanese armed forces and to finance procurements by Lebanon of defense articles and defense services for its security requirements.

(b) In addition to amounts otherwise made available for the fiscal year 1983 to carry out the provisions of chapter 5 of part II of the Foreign Assistance Act of 1961, there are authorized to be appropriated for the fiscal year 1983 $1,000,000 to carry out such provisions.

(c) In addition to amounts otherwise made available for the fiscal year 1983 for loan guarantees under section 24(a) of the Arms Export Control Act, $100,000,000 of loan principal are authorized to be so guaranteed during such fiscal year.

SECTION-BY-SECTION ANALYSIS OF THE PROPOSED LEBANON EMERGENCY ASSISTANCE ACT OF 1983

I. INTRODUCTION

The proposed Lebanon Emergency Assistance Act of 1983 ("the Bill") contains freestanding provisions in order to authorize supplemental international security assistance for the fiscal year 1983 for Lebanon. The amounts which would be authorized in the Bill represent the total amounts which are proposed to be allocated to Lebanon in fiscal year 1983 from amounts made available pursuant to this Bill and Public Law 97-377 for the Economic Support Fund, the International Military Education and Training program, and the Foreign Military Sales Credit program.

II. PROVISIONS OF THE BILL

Section 1. Short title

This section provides that the Bill may be cited as the "Lebanon Emergency Assistance Act of 1983".

Section 2. Economic support fund

This section consists of three subsections, as follows:

(a) This subsection states the determination of Congress that the national interests of the United States would be served by the authorization and appropriation of additional funds for economic assistance to promote the economic and political stability of Lebanon and to support the international effort to strengthen its sovereignty and independence.

(b) This subsection authorizes the appropriation of $150,000,000 for economic support pursuant to chapter 4 of Part II of the Foreign Assistance Act, in addition to amounts otherwise authorized for that chapter by Public Law 97-133.

(c) This subsection provides that the amounts appropriated pursuant to this section are authorized to remain available until expended.

Section 3. Military sales and related programs

This section consists of three subsections as follows:

(a) This subsection is a finding by the United States Congress, in support of the rebuilding of the armed forces of Lebanon, that the authorization and appropriation of supplemental funds for military sales and related programs would serve the national security interests of the United States. These additional funds would be used to provide training for the Lebanese armed forces and to finance procurements by Lebanon of defense articles and defense services for its security requirements.

(b) This subsection authorizes the appropriation of an additional $1,000,000 for the fiscal year 1983 for the International Military Education and Training (IMET) program. This authorization is in addition to the amounts made available for the IMET program by Public Law 97-377.

(c) This subsection authorizes an increase of $100,000,000 is the limit established in Public Law 97-377 on the total principal amount of loans for which guaranties may be issued during fiscal year 1983 under section 24(a) of the Arms Export Control Act.●

By Mr. DOLE (by request):

S. 640. A bill to amend the Internal Revenue Code of 1954 to provide for the inclusion of certain employer contributions to health plans in an employee's gross income; to the Committee on Finance.

S. 641. A bill to provide for voluntary private alternative coverage for medicare beneficiaries, and for other purposes; to the Committee on Finance.

S. 642. A bill to restructure the medicare hospital insurance program; to the Committee on Finance.

S. 643. A bill to make improvements in the medicare and medicaid programs, and for other purposes; to the Committee on Finance.

HEALTH INCENTIVES REFORM LEGISLATION

● Mr. DOLE. Mr. President, I am introducing today, at the request of the administration, the major components of the health incentives reform program. There are five components of the package, one of which—the proposed Medicare Prospective Payment Rates Act—was introduced on February 23, 1983.

The following four bills are those that are being introduced today: First, limitation on exclusion for employer health plan payments; second, the Medicare Voucher Act of 1983; third,

the Medicare Catastrophic Hospital Cost Protection Act; and, fourth, the Health Care Financing Amendments of 1983.

NEED FOR ACTION

As many of my colleagues are aware, health care costs continue to escalate at an alarming rate, far exceeding the increase in prices overall.

This year the Federal Government will spend approximately $57 billion on the medicare program. At the same time, we expect to spend $19 billion on services for the poor under the medicaid program.

Rising health care costs are a problem that affects all of us. As the President pointed out in the letter of transmittal accompanying the health incentives reform program, increasing costs affect the elderly who are covered by medicare and face the threat of increasing out of pocket costs. The poor continue to see medicaid coverage reduced as States and the Federal Government are forced by rising costs to make cutbacks. Workers with employment-based health insurance have received lower cash wages because of the unchecked cost increases for health benefits.

The President's package of health care program reform measures is designed to address each of these areas. The Senator from Kansas is particularly pleased to note the inclusion of the provision limiting the exclusion for employer health plan payments.

Under the proposal contained in the administration's fiscal year 1984 budget, employer contributions to accident or health plans for an employee would be included in the employee's income to the extent they exceed, first, $175 per month—$2,100 per year—if the plan covers the employee and his family, or second, $70 per month—$840 per year—if the plan covers only the employee. The provision would apply for taxable years beginning after December 31, 1983. The $175 and $70 amounts would be indexed to adjust for inflation.

Amounts included in the employee's income under the proposals would also be subject to social security taxes.

There would be a transition rule to exempt premiums paid under collective-bargaining agreements signed before January 31, 1983.

The total exclusion from employees' income for employer paid medical coverage is the second largest, statutory fringe benefit in the Tax Code. The largest is the exclusion from income of pension contributions and earnings.

The revenue loss estimate for this total exclusion from income is estimated to be $18.6 billion in fiscal year 1983 and $21.3 billion in fiscal year 1984.

The administration's proposal would reduce this revenue loss by $2.3 billion in fiscal year 1984 and $4.4 billion in fiscal year 1985. Therefore, even after a cap on the exclusion, the tax benefit for receiving part of your compensation in the form of health care would be very substantial.

Many experts believe that our present tax treatment of employer provided health benefits has been a contributing factor in the trend toward excessive coverage and escalating medical costs.

We will have to examine whether a dollar cap on the exclusion from an employee's income will change consumer behavior in a desirable way. For example, will a cap encourage copayments and more efficient health care, or will some workers, such as low-income individuals receive insufficient coverage?

Even if we decide to limit employer paid tax free medical insurance, there are still a number of questions to be resolved with respect to a so-called tax cap. These include the level at which the cap is set. For instance, should there be a national cap or one which varies in different areas of the country, thereby recognizing differing costs of care; how often should the limit be updated; and how do we prevent adverse selection—the case where all the healthy choose low option insurance and the sick, high option. Another obvious question is how to deal with self-insured plans which are increasing in number.

It is not likely that we on the Federal level would attempt to establish a minimum benefits package in conjunction with a tax cap. That is clearly the jurisdiction of the State insurance commissioners and in the hands of labor and business.

CONCLUSION

Medicare is a program which has grown at an alarming rate since its creation 17 years ago. The trust fund is rapidly approaching a period of time in which it will no longer have sufficient funds to finance program expenditures. Something must be done to prevent this potential insolvency. The President's proposals are an attempt to address this problem and others. The Senator from Kansas urges his colleagues to give these bills their serious consideration.

Mr. President, I request that a summary of each bill be included in the record following my comments.

There being no objection, the summaries were ordered to be printed in the RECORD, as follows:

S. 640—LIMITATION ON EXCLUSION FOR EMPLOYER HEALTH PLAN PAYMENTS

GENERAL EXPLANATION

Current law

All employer contributions to health insurance plans for employees are excluded from the employees' income and wages for purposes of income and employment taxes. This tax treatment generally applies to all insurance coverage, regardless of cost, and to all medical benefits, no matter how extensive. The same rule generally applies to amounts paid by an employer to or on behalf of an employee under a self-insured medical plan.

Reasons for change

Excluding employer contributions to health plans from gross income creates an inequity between individuals covered by employer health plans and those who are not so covered. The latter group must pay for their health care with after tax dollars, while the health care of the former group is provided with before tax dollars. For example, an employee with $23,000 of total compensation consisting of $20,000 of cash wages and $3,000 of health insurance coverage will pay $804 less in Federal income and Social Security taxes than one with $23,000 of cash wages.

The preferential treatment of employer paid health benefits encourages employees to receive large amounts of their compensation in that form. This has led to a significant decline in the amount of compensation subject to tax and indirectly has led to higher tax rates on cash wages.

From a health policy viewpoint, many employees have such generous insurance plans that they bear very little, if any, of the cost of doctors' visits or hospital services. They therefore tend to overuse doctor and hospital services and medical tests. The very rapid increase in health care costs in recent years can be attributed at least in part to this tax-induced incentive to demand additional health care with little or no regard to its actual costs.

Proposal

Employer contributions to a health plan would be includible in gross income to the extent that they exceed $70 per month ($840 per year) for an individual employee, or $175 per month ($2,100 per year) for family coverage.

The proposal will generally be effective January 1, 1984. However, in order to allow renegotiation of existing contracts, the proposal will not be effective with respect to employer contributions to employer health plans, the amounts of which are fixed by a legally binding contract entered into on or before January 31, 1983, until the earlier of January 31, 1986, or the first date after January 31, 1983 on which such amounts cease to be fixed by the contract.

Effects of proposal

The amount of employer contributions is determined, in the case of an insured plan, on the basis of the premiums charged for such insurance. The insurance premiums paid by the employer on behalf of employees will be divided by the number of covered employees. If the employer maintains different plans covering different groups of employees, each plan will be treated separately in determining employer costs per employee.

In the case of noninsured plans, the amount of the employer contributions will be based on the costs of providing coverage under the plan. Costs of providing coverage may be determined based on reasonable estimates of such costs.

To the extent that employer contributions exceed the $70 individual/$175 family monthly ceilings, the excess would be includible in the income of the covered employee. Even if employer health plan payments exceed the $70 individual/$175 family monthly amounts, only the excess will be in-

cluded in the employee's gross income. For example, if the employer paid $185 per month for family health coverage for an employee, $10 per month would be included in the employee's gross income. Thus, $10 would be subject to income tax and FICA and FUTA taxes (if applicable). Most current employees will pay no additional tax because those employees have insurance coverage costing less than the applicable ceiling amount.

Revenue estimate

Fiscal years:	*Billions*
1984	$2.1
1985	4.2
1986	6.0
1987	8.0
1988	10.7

LIMITATION ON EXCLUSION FOR EMPLOYER HEALTH PLAN PAYMENTS

TECHNICAL EXPLANATION

Summary of the proposal

Employer contributions to a health plan would be includible in gross income to the extent that they exceed $70 per month ($840 per year) for an individual employee, or $175 per month ($2100 per year) for family coverage.

Detailed description

Under the proposal, the amount of any excess employer contributions to a health plan with respect to coverage of an employee during the payroll period will be included in the employee's gross income. Employer contributions for a payroll period are excess employer contributions to the extent they exceed the monthly dollar limit for such employee, prorated to reflect the length of the payroll period. For 1984, the monthly dollar limit is $70 for an employee with individual coverage under the plan and $175 for an employee with family coverage under the plan. For years after 1984, the monthly dollar limit will be adjusted to reflect changes in the Consumer Price Index. An employee will be treated as having individual coverage unless the employee has a spouse or a dependent who is covered under the plan.

The employer contribution to a health plan with respect to an employee will be the cost of coverage of the employee under the plan reduced by the amount of the employee's contributions for such coverage. The annual cost of coverage with respect to an employee will be the aggregate annual cost of providing coverage for all employees with the same type of coverage (individual or family) under the plan as that of the employee, divided by the number of such employees. The cost of coverage with respect to an employee for a payroll period will be the annual cost of coverage prorated to reflect the length of the payroll period. Any cost of providing coverage under a plan which is allocable to workmen's compensation or to a purpose other than providing medical care is not taken into account in determining the cost of coverage under the plan.

The annual cost of providing coverage under an insured plan (or any insured part of a plan) will be determined based on the net premium charged by the insurer for such coverage. The annual cost of providing coverage under a noninsured plan (or any noninsured part of a plan) will be based on the costs incurred with respect to the plan, including administrative costs. In lieu of using actual administrative costs, an employer may treat 7 percent of the plan's incurred liability for benefit payments as the administrative costs with respect to the plan. A plan will be a noninsured plan to the extent the risk under the plan is not shifted from the employer to an unrelated third party.

The cost of coverage under the plan must be determined in advance of the payroll period and must be redetermined not less often than once every 12 months. The cost of coverage must be redetermined whenever there are significant changes in the coverage provided under the plan or in the composition of the group of covered employees. The cost of coverage is determined separately for each separate plan of the employer. Coverage of a group of employees is a separate plan if such coverage differs from the coverage of another group of employees. Where the actual cost of coverage cannot be determined in advance, reasonable estimates of the expected cost of coverage are to be used. Where the cost of coverage fluctuates each year depending on the experience of the employer under the plan, an average annual cost of coverage will be used.

If an estimate is determined not to be a reasonable estimate, the employer will be liable for the income taxes (at the maximum rate applicable to individuals) and the employment taxes (both the employer's and the employee's share) that would have been imposed on the additional amount that would have been included in the income of employees as excess employer contributions if the actual cost of coverage had been used to determine the amount of excess employer contributions.

In the case of multiemployer plans to which an employer makes contributions, the multiemployer plan is to be treated as the employer for purposes of determining the cost of coverage and the liability for errors in estimates of the cost of coverage. Each employee's excess employer contributions will be determined based on this cost of coverage. However, for purposes of the employer's obligations to withhold from wages and to pay employment taxes, the amount of excess employer contributions will be considered to be a portion of each contribution made by the employer to the plan. The portion of each contribution to be treated as an excess employer contribution will be based on the ratio of the plan's excess employer contributions per employee per month to the total monthly employer contribution per employee.

Effective date

In general, the proposal would apply to employer contributions made with respect to payroll periods beginning after December 31, 1983. However, the proposal will not apply to employer contributions to employer health plans, the amounts of which are fixed by a legally binding contract entered into on or before January 31, 1983, until the earlier of January 31, 1986, or the first date after January 31, 1983 on which such amounts cease to be fixed by the contract.

S. 641—SUMMARY OF PROPOSED MEDICARE VOUCHER ACT OF 1983

Section 1 would assign the draft bill the short title "Medicare Voucher Act of 1983".

Section 2 would permit the Secretary to contract with health benefits organizations (HBOs) (a broad range of health insurers and health services providers, including health maintenance organizations (HMOs) and competitive medical plans (CMPs)) to provide private alternative coverage for Medicare beneficiaries (other than individuals suffering from end-stage renal disease, or who are working and are 65 years of age or older but under 70) who chose to participate in such a private plan. Section 2 would also enact additional amendments to current provisions of law concerned with Medicare contracts with such organizations to—

Establish a single, coordinated open enrollment period during August and September of each year (but only for that number of new enrollees, in order of applications filed, previously specified by an HBO), and to enable the Secretary, to the extent feasible, to provide for individuals who move from the area served by one HBO to an area served by another (similar to the system used by the health benefits program for Federal employees);

Preclude new enrollments for individuals receiving only Supplementary Medical Insurance (SMI) benefits;

Preclude new cost-based contracts;

Permit HBOs to offer separate benefit packages for employer-based groups;

Permit HBOs to offer one or more benefit packages as long as each package covered at least those services for which Medicare pays and covered inpatient hospital services for every day of hospitalization, which benefit levels, coinsurance, and deductibles to be set by the HBO;

Eliminate current requirements as to premium levels and benefits, and require only that the average cost-sharing for the portion of benefits for which Medicare pays not exceed the average cost-sharing (including amounts above the Medicare reasonable charge) under Medicare;

Permit HBOs to provide annual rebates of up to $500 (instead of charging premiums), not consider those rebates as income for purposes of Medicaid, Aid to Families with Dependent Children, Supplemental Security Income, Food Stamps, Low-Income Home Energy Assistance, or low-income housing programs, and treat those rebates as Social Security benefits for purposes of the Federal income tax laws; and

Preempt provisions of State or local law requiring benefits more extensive that those under section 2.

Section 3 would enact conforming amendments that would—

Repeal the requirement for the Secretary to conduct a study of additional benefits that are required under existing law (but not under the provisions of section 2); and

Require payments to HBOs under section 2 to take into account services furnished by physician assistants or nurse practitioners if Medicare would pay for those services when furnished by a physicians.

Section 4 would make the provisions of section 2 applicable to services furnished after 1984. Section 4 would also—

Retain the transitional provisions enacted in 1982 when Congress amended the provisions of law providing for payments to HMOs;

Permit any enrollee of an HMO or CMP at the end of 1984 not already covered by those earlier transition provisions to continue his enrollment under the provisions of law then current if either the HMO or CMP had a cost-based contract with the Secretary or if the enrollee was enrolled for Medicare SMI (but not Hospital Insurance (HI) benefits), unless the Secretary found that the new provisions should apply to all members of an HMO or CMP because of administrative costs or other administrative burdens; and

Apply the provisions of section 2 to enrollees who also receive benefits under Medicaid only after the Secretary finds that it is administratively feasible.

S. 642—SUMMARY OF PROPOSED MEDICARE CATASTROPHIC HOSPITAL COST PROTECTION ACT

Section 1 would assign the draft bill the short title "Medicare Catastrophic Hospital Cost Protection Act".

Section 2 would restructure benefits under the Medicare Hospital Insurance program. Under current law, Medicare covers only the first 90 days of a hospitalization during any spell of illness, plus a lifetime reserve of 60 additional days. An inpatient hospital deductible is imposed for each spell of illness. No coinsurance is currently imposed for the first 60 days of a spell of illness; coinsurance equal to one-fourth of the inpatient hospital deductible is imposed for each additional day of hospitalization through the 90th day; and coinsurance equal to one-half of the inpatient hospital deductible is imposed for any remaining days covered by Medicare.

Section 2 would remove the limit on the number of days of hospitalization covered by Medicare during a spell of illness. In addition, no more than two inpatient hospital deductibles could be imposed during any calendar year, even if there were three or more spells of illness in the year. Coinsurance equal to 8 percent of the inpatient hospital deductible would be imposed for the second through fifteenth day of each spell of illness (and for the first day if no inpatient hospital deductible were imposed for that spell of illness), and coinsurance equal to 5 percent of the inpatient hospital deductible would be imposed for each subsequent day; in any calendar year, however, the total number of days for which coinsurance was imposed, plus the number of times the inpatient hospital deductible was imposed, could not exceed 60.

Finally, section 2 would decrease from 12.5 to 5 percent of the inpatient hospital deductible the coinsurance imposed on the 21st through 100th day of care in a skilled nursing facility during any spell of illness.

S. 643—SUMMARY OF PROPOSED HEALTH CARE FINANCING AMENDMENTS OF 1983

Short title and reference in act.—Section 1 would assign the draft bill the short title "Health Care Financing Amendments of 1983".

TITLE I—MEDICARE

Subtitle A—Changes in Eligibility, Benefits, and Cost Sharing

Use of medicare physicians' services economic index to increase annually the supplementary medical insurance deductible.—Section 101 would increase the Supplementary Medical Insurance (SMI) deductible (currently set at $75) each year, beginning with 1984, by the percentage increase in the economic index used to determine the allowable increase in prevailing charges for physicians' services. This section would allow the SMI deductible to keep pace with changes in physician fees in the future.

First full month of medicare eligibility.—Section 102 would provide for eligibility for Medicare benefits to begin in the first full month in which all the eligibility requirements have been met.

Changes in supplementary medical insurance premium.—Section 103 would postpone from July 1983 until January 1984 (along with the Administration's proposed postponement of cost-of-living adjustments in Social Security benefits) the increase in the SMI premium. In January of 1984 the premium would rise to 25 percent of the estimated per capita costs of the SMI program for the aged for 1984. For each succeeding year the percentage of the estimated program costs covered by the premium would increase by increments of 2.5 percent until 35 percent of the estimated costs were covered by the premium for 1988. No beneficiary, however, for whom SMI premiums were deducted from his Social Security check reduced below its amount before the most recent Social Security cost of living adjustment because of the SMI premium increase. These changes would provide a more reasonable balance between Federal and beneficiary shares of total program costs, which were originally intended to be evenly shared.

Cost sharing for durable medical equipment furnished as a home health benefit.—Section 104 would provide for a Medicare beneficiary to share the costs of durable medical equipment furnished as a home health benefit. Under current law, Medicare pays 80 percent of the reasonable charges for durable medical equipment furnished as a separate benefit, but pays 100 percent of the reasonable cost if the equipment is furnished as a home health benefit. Section 104 would reduce the Medicare payment for durable medical equipment furnished as a home health benefit to the lesser of the reasonable cost and the customary charges (less 20 percent of the reasonable charges, which a home health agency would be permitted to collect from the beneficiary), but in no event more than 80 percent of the reasonable cost. This amount is the same amount that a provider of services is paid for medical and other health services under Medicare. The Secretary could also, as is the case with other provisions requiring payment of the lesser of costs or charges, take only costs (and not charges) into account if he found that this would not result in any increase in Medicare payments. Section 104 would also permit the Secretary to require the purchase, rather than the rental, of durable medical equipment under appropriate circumstances, whether or not furnished as home health benefits, and would provide for the uniform use of the term "durable medical equipment" instead of the use of three different terms currently employed in various Medicare provisions.

Elimination of deductible for diagnostic tests performed in a laboratory which has entered into a negotiated rate agreement with the Secretary.—Section 105 would eliminate the application of the SMI annual deductible to diagnostic tests performed in a laboratory which has entered into a negotiated rate agreement with the Secretary. The section would provide an incentive for laboratories to enter into such agreements and thereby reduce costs associated with individual billing of Medicare beneficiaries.

Thirty day coverage period for services furnished by a home health agency whose agreement has been terminated.—Section 106 would change from the end of the calendar year to thirty days after termination of an agreement the date for ending Medicare coverage for services furnished to a beneficiary under a previously established plan by a home health agency whose Medicare agreement has been terminated. This section would bring provisions for home health agencies into conformity with provisions for hospitals and skilled nursing facilities.

Subtitle B—Changes in Reimbursement

Smaller increase for hospital target amounts.—Section 111 would take into account, in determining the target amounts for fiscal year 1984 for operating costs of inpatient hospital services, only the increase in the hospital market basket index, rather than that increase plus one percent.

Fiscal year 1984 freeze on payments for physicians' services.—Section 112 would freeze the prevailing and customary charge levels for physicians' services for the 12 month period beginning with July 1983 at the levels applicable to the preceding 12 month period. the Secretary could not compensate for the one year freeze on prevailing charge levels through larger increases after the freeze ended.

Exclusive agreements and negotiated rates for certain medical and other health services.—Section 113 would permit the Secretary to enter into exclusive agreements and negotiate rates for laboratory services, durable medical equipment, and certain other items and services furnished under the SMI program, but only if the Secretary determined that such an agreement would not deny access for beneficiaries to the items and services covered by such an agreement. The amounts payable under such an agreement could not exceed in the aggregate the amounts otherwise payable under the SMI program. the Secretary could waive the usual deductible and coinsurance (if the resulting payments would not exceed in the aggregate the amounts otherwise payable under the SMI program). The supplier of the items and services could not charge a beneficiary amounts other than the deductible and coinsurance (if any). This section would permit the Secretary to obtain significant savings through bulk purchases for items and services currently chosen in most cases by physicians and other health providers rather than by beneficiaries.

Subtitle C—Administrative Changes

Increased secretarial flexibility in entering into agreements for medicare claims processing.—Section 121 would increase the Secretary's discretion in entering into agreements for Medicare claims processing by (1) eliminating the right of providers of services to nominate intermediaries, (2) permitting the Secretary to enter into various kinds of agreements with intermediaries and carriers, not solely those based on cost, and (3) broadening the Secretary's authority to experiment with different kinds of contracts by including contracts other than fixed price or performance incentive contracts and by permitting waiver of competitive bidding requirements. The section would also require new intermediaries, as well as carriers, to be health insurance organizations, and would clarify the Secretary's authority under existing law to deal directly with any provider of services or to assign any provider of services to an intermediary.

Furnishing of items and services to hospital inpatients only by or under arrangements with hospitals.—Section 122 would require all items and services covered by Medicare that are furnished to hospital inpatients to be furnished by (or through) the hospital, except for physicians' services. Certain items and services (such as laboratory services) may currently be furnished to hospital inpatients by (or through) a hospital (in which case payment is made on a cost basis), or may be furnished directly by an outside supplier (in which case payment is made on a charge basis and the Medicare beneficiary is subject to deductible and coinsurance requirements). Section 132 would correct this anomaly and help reduce beneficiary out-of-pocket expenses.

Assignment of inpatient hospital benefit period, deductible, and coinsurance in the order of filing of payment requests.—Section 123 would change the order in which hospitals are responsible for collecting from a Medicare beneficiary the inpatient hospital deductible, coinsurance, and charges for services furnished after the Medicare coverage period has expired for a particular spell of illness, in cases in which the beneficiary is an inpatient of two or more hospitals during the same spell of illness. The responsibility for collecting these amounts is currently assigned in the chronological order in which services are furnished. Section 133 would instead assign the responsibility in the order in which the hospitals submitted requests for Medicare payments, so that a hospital that provided services after another hospital, but submitted its request first, would be responsible for collecting the inpatient hosptial deductible and would be credited with the first 60 days of Medicare coverage (for which no coinsurance is required). This change would simplify the administration of the Medicare program by eliminating the need to make later adjustments in amounts payable to specific hospitals.

Repeal of special tuberculosis treatment requirements.—Section 124 would repeal provisions of law setting special requirements for coverage of tuberculosis treatment designed to insure that Medicare does not pay for custodial care. Due to advances in the active treatment of this disease, special safeguards against paying for custodial care for tuberculosis patients are no longer needed.

Elimination of utilization review requirements.—Section 125 woud eliminate requirements that hospitals and skilled nursing facilities have a system in place to review the need for services furnished Medicare recipients.

Elimination of requirement for a railroad retirement board carrier contract.—Section 126 would eliminate the requirement for a separate Railroad Retirement Board carrier contract. Under the section, SMI claims of railroad retirees would be processed by the same organizations that process other SMI claims. The section would reduce administrative costs and improve service to beneficiaries.

Medicare recovery against certain third parties.—Section 127 would clarify and enhance the ability of the Medicare program to obtain reimbursement for Medicare payments made if the Medicare beneficiary is covered by workmen's compensation, automobile or liability insurance, no-fault insurance, or an employment based group health plan (if the beneficiary is between 65 and 70 years of age or suffers from end-stage renal disease). Section 137 would make explicit the right of the United States to recover directly from the third party payer if the beneficiary did not do so himself, and to pay the beneficiary pending recovery from workmen's compensation, automobile or liability insurance, or no-fault insurance if the third party payer was not expected to pay promptly. In addition, the section would permit the United States to recover directly from the third party payer whether or not the beneficiary or anyone else brought suit (but only to the extent that the third party payer has not already made payment), would permit the United States to intervene or join in any action brought by the beneficiary or anyone else to obtain payment from the third party payer, and would subrogate the United States to any right of the individual or anyone else to payment from the third party payer. These provisions would improve the ability of the Medicare program to obtain reimbursement to which it is entitled under current law.

Providers of services liable for services not reasonable and necessary and for custodial care services.—Section 128 would eliminate the right of providers of services to receive Medicare payments for services that would not have been covered by Medicare because they were not reasonable and necessary or because they were custodial care services, except for the fact that the provider of services did not know, and could not reasonably have been expected to know, that the services were not covered. The section would also prevent a provider of services from billing a Medicare beneficiary for such services if the beneficiary were not at fault.

Indirect payment of supplementary medical insurance benefits.—Section 129 would permit payments under the SMI program to be made to a health insurer that pays full reimbursement to physicians or other persons furnishing services. Current law does not, in general, permit payments to be made to anyone other than a beneficiary or an entity providing services, so as to avoid the growth of organizations that process Medicare billings for excessive fees on behalf of physicians or others who furnish services. Payments to legitimate health insurers who pay the full bill and simply collect the reimbursable portion from Medicare can be made efficiently and do not give rise to the kinds of practices intended to be prohibited.

Elimination of Health Insurance Benefits Advisory Council.—Section 130 would repeal the authority for the Health Insurance Benefits Advisory Council. This council has been moribund for years. The Secretary is able to obtain needed advice from outside experts as necessary.

Hospital accreditation surveys of the American Osteopathic Association not to be disclosed.—Section 131 would protect from disclosure hospital accreditation surveys provided to the Secretary by the American Osteopathic Association. This provision would afford such information the same protection afforded information provided by the Joint Commission on Accreditation of Hospitals (JCAH).

Elimination of required capital expenditures plan for providers of services.—Section 132 would eliminate the requirement that hospitals, skilled nursing facilities, comprehensive outpatient rehabilitation facilities, and home health agencies include as part of a required overall plan and budget a capital expenditures plan. This requirement has unnecessarily increased the administrative burden and the costs of providers of services.

Elimination of requirement for accreditation of psychiatric hospitals by Joint Commission on Accreditation of Hospitals.—Section 133 would eliminate the requirement that psychiatric hospitals be accredited by JCAH to participate in Medicare, and that a "distinct part" of such a hospital meet equivalent requirements to participate in Medicare. Other kinds of hospitals may, but are not required to, obtain JCAH accreditation in order to obtain Medicare certification.

Elimination of requirement that final cost reports of health maintenance organizations and competitive medical plans be independently certified.—Section 134 would eliminate the requirement that final cost reports of health maintenance organizations (HMOs) and competitive medical plans (CMPs) be independently certified. This requirement is an unnecessary administrative burden that is not imposed on other entities participating in Medicare.

Access to records of subcontractors.—Section 135 would amend the provision, added by Public Law 96-499, that Medicare may not reimburse for any services furnished under an agreement between a Medicare provider and a subcontractor, the value of which is $10,000 or more over a twelve-month period, unless that agreement is pursuant to a contract containing a clause making specified provisions for access to the subcontractor's records by the Secretary and the Comptroller General. In order to alleviate the substantial paperwork burden this requirement creates for small subcontractors, who frequently provide services pursuant to informal agreements, this amendment would increase to $50,000 the minimum value subject to this requirement.

Repeal of requirement for end-stage renal disease networks.—Section 136 would repeal the requirement for ESRD networks (coordinating bodies representing ESRD facilities in a geographic area) and would make the national ESRD medical information system discretionary with the Secretary. These networks have not proved to be effective.

Flexible sanctions for non-compliance with requirements for end-stage renal disease facilities.—Section 137 would permit the Secretary to apply intermediate sanctions to ESRD facilities which are out of compliance with certain program requirements, when non-compliance does not jeopardize patient health or safety or justify decertification of the facility. Permissible sanctions would include denial of reimbursement for new admissions to the facility, and graduated reduction in reimbursement.

Denial of payment for items and services ordered by a physician barred from participation.—Section 138 would prohibit payment for items or services (other than emergency services) furnished at the direction or on the prescription of a physician barred from participation in Medicare based on the Secretary's determination that the physician had abused the programs, or barred from participation in Medicare or Medicaid based on a conviction for a Medicare- or Medicaid-related crime.

Authority to deny participation to a sanctioned provider.—Section 139 would authorize the Secretary to refuse to enter into a provider agreement with an entity if any person who has a direct or indirect ownership or control interest of 5 percent or more in the entity, or who is an officer, director, agent, or managing employee, has been sanctioned, either by denial of payment or by civil monetary penalty, for fraud or abuse related to his participation in Medicare or Medicaid.

Termination of agreements with institutions and entities where owners or certain other individuals have been convicted of certain offenses.—Section 140 would authorize the Secretary to terminate (as well as to refuse to enter into or to renew, as provided under current law) an agreement with a provider where an individual with ownership or control of the provider has been convicted of an offense related to his participation in Medicare or Medicaid.

Use of accrediting organizations for certain entities furnishing services.—The Secretary has the authority under current law to rely on accrediting organizations in determining whether hospitals, skilled nursing facilities, home health agencies, ambulatory

surgical centers, and hospice programs meet Medicare requirements. Section 141 would extend the Secretary's authority by permitting him to rely on such organizations in determining whether rural health clinics, laboratories, clinics, rehabilitation agencies, and public health agencies meet Medicare requirements (and would enact a clarifying amendment concerning his authority with respect to ambulatory surgical centers).

Elimination of unneeded reporting requirements.—Section 142 would eliminate the requirements that the Secretary of Health and Human Services—

Report annually on the program for peer review of the utilization and quality of health care services;

Include in the continuing study of Medicare a validation of the accreditation process of JCAH;

Periodically submit legislative recommendations to further the use of home dialysis and transplantation by individuals suffering from ESRD; and

Report annually on the Medicare ESRD program (including fifteen specifically listed items).

These requirements are costly and administratively burdensome. The Secretary has the authority to report on various matters as needed.

TITLE II—MEDICAID

Subtitle A—Changes in Payments to States

100 percent Federal payment for processing of combined medicaid and medicare claims.—Section 201 would provide an incentive to States to use Medicare contractors to process Medicaid claims of individuals also entitled to Medicare benefits, by increasing to 100 percent the Federal share of the administrative costs of processing these claims for services reimbursable under both Medicare and Medicaid, and by simplifying the mechanism for reimbursing Medicare contractors for the Medicaid share of payments to providers.

Extension of reduction in Federal share of State medical assistance expenditures.—Section 202 would make permanent the Medicaid provisions that limit total Federal matching payments to States. Federal payments to States would be reduced by 3 percent for fiscal year 1985 and succeeding fiscal years.

This section would also make amendments designed to simplify administration of this provision. The adjustment to the Federal matching rate for purposes of the determination would be made for expenditures in the base year, rather than expenditures in the current year. Also, claims for payment filed or processed more than two years after the expenditure would be disregarded for purposes of calculating the target amount.

Denial of Federal financial participation in payments for items and services ordered by a physician barred from participation.—Section 203 would bar Federal financial participation in payments for items or services (other than emergency services) furnished at the direction or on the prescription of a physician barred from participation in Medicare based on the Secretary's determination that the physician had abused the program or barred from participation in Medicare or Medicaid based on a conviction for a Medicare- or Medicaid-related crime.

Sanction for provider's failure to furnish information.—Section 204 would permit the Secretary to deny payment to States of the Federal matching share of expenditures for medical services furnished by providers who failed to supply information requested by the Secretary concerning any claims by the provider for payment under the State plan.

Subtitle B—Changes in Eligibility, Benefits, and Cost Sharing

Amendments concerning third-party payments for medical expenses.—Section 211 would require, rather than permit, States to require assignments of rights to third party payments for medical costs as a condition of eligibility for benefits under the State plan.

This section would also amend the provision concerning recovery of third party payments for medical expenses. Present law permits the State agency and the Federal government to retain from such recoveries only the amount equal to medical assistance payments on behalf of the individual concerned. Under the proposed amendment, the State agency would be entitled to recover its administrative costs related to the recovery from any amount remaining after reimbursing the recipient's out-of-pocket costs. Repayments to an individual for his out-of-pocket expenses would not be considered as income or resources for purposes of determining eligibility for medical assistance, for cash assistance under the Aid to Families with Dependent Children (AFDC) program or to the aged, blind, and disabled, or for food stamps under the Food Stamp Act of 1977.

Mandatory and optional copayments.—Section 212 would require (subject to any mandatory or optional exclusions of individuals or services from copayments under the State plan, as described below) copayment by the categorically needy of $1 per day for inpatient hospital services and $1 per visit for outpatient hospital services, rural health clinic services, physician services, and clinic services; it would require copayments by the medically needy of $2 per day and $1.50 per visit for those same services. These mandatory copayment amounts could be adjusted periodically by the Secretary.

States would be prohibited from charging any copayments on services furnished to long term care inpatients, or services furnished by HMOs to categorically needy enrolled members, and permitted to exempt services to medically needy members.

States would be permitted to exempt services to pregnant women, and emergency services, from all copayment requirements; the exemption could also apply to the new mandatory copayments on inpatient and outpatient services, but there would be no Federal matching of an amount equal to the copayment the State could have charged.

States would be permitted to exempt children from all copayment requirements other than the new mandatory copayments on inpatient and outpatient services.

States could charge, for non-emergency outpatient services furnished in a hospital emergency room, up to twice the nominal amount which may be charged for other services reimbursed at the same rate as hospital emergency room services.

This section would also repeal limitations on copayments under research and demonstration waivers.

Subtitle C—Administrative Changes

Repeal of exclusion of for-profit organizations from research and demonstration grants.—Section 221 would amend authorities for grants for research and demonstration projects for purposes related to the Social Security Act to permit grants to be made to for-profit organizations.

Amendments to requirements for medical review and independent professional review.—Section 222 would make technical revisions to the State plan requirements for medical review (MR) and independent professional review (IPR) of nursing homes, which would clarify that there is no longer any substantive statutory distinction between MR of skilled nursing facilities (SNFs) and IPR of intermediate care facilities (ICFs).

Repeal of special tuberculosis treatment requirements.—Section 223 would repeal provisions of law setting special requirements for coverage of tuberculosis treatment designed to insure that Medicaid does not pay for custodial care. Due to advances in the active treatment of this disease, special safeguards against paying for custodial care for tuberculosis patients are no longer needed.

Elimination of utilization review and utilization control requirements.—Section 224 would eliminate requirements that the State plan provide that hospitals and skilled nursing facilities must have in effect plans to review utilization of services to ensure that institutional stays do not exceed medical necessity. This section would also eliminate the requirement that the State have in operation a program with respect to hospitals, mental hospitals, skilled nursing facilities, and intermediate care facilities of control over utilization of these services, and the penalties mandated for failure to comply with any portion of this requirement.

Requirement that States obtain taxpayer identification numbers as a condition of receiving medical assistance.—Section 225 would require States to obtain taxpayer identification numbers from Medicaid applicants and recipients, in order to deter fraud, reduce errors in eligibility determination, and facilitate efficient administration.

Verification that medical services have been furnished as claimed.—Section 226 would repeal the present requirement that Medicaid management information systems provide for written notice to be given to individuals (or to a sample of individuals) of the medical services furnished under the State plan to those individuals, and would instead require the State plan to provide an adequate method for verifying whether services for which payment is claimed under the State plan were actually furnished to covered individuals.

Authority to waive requirements with respect to the territories.—Section 227 would allow the Secretary to waive or modify any Medicaid requirement for any participating territory, except requirements concerning Federal matching rates, ceilings on total Federal payments, and services for which medical assistance may be provided. This amendment would give to all territories the same flexibility given to American Samoa when it was made eligible to participate in the Medicaid program in the Tax Equity and Fiscal Responsibility Act of 1982, Public Law 97-248.

Termination of agreements with institutions and entities where owners or certain other individuals have been convicted of certain offenses.—Section 228 would authorize the State agency to terminate (as well as to refuse to enter into or to renew, as provided under current law) an agreement with a provider where an individual with ownership or control of the provider has been convicted of an offense related to his participation in Medicare or Medicaid.

Elimination of requirement for accreditation of psychiatric hospitals by Joint Commission on Accreditation of Hospitals.—Section 229 would eliminate the requirement

that psychiatric hospitals be accredited by JCAH to participate in Medicaid, and would substitute a requirement that these facilities meet appropriate standards established under Medicare.

Modification of type of hearing required before Secretary may cancel approval of a skilled nursing facility or intermediate care facility.—Section 23 would repeal the requirement that a skilled nursing facility or intermediate care facility which is dissatisfied with a determination by the Secretary that it no longer meets the conditions of participation in Medicaid be afforded an opportunity for a hearing to the same extent provided in section 205(b) of the Social Security Act. This requirement would be replaced by a provision entitling the provider to an opportunity for an informal hearing before an official designated by the Secretary at which the entity would be entitled to be represented by counsel.

Flexibility in setting payment rates for hospitals furnishing long-term care services.—Section 231 would eliminate the complicated special requirements for setting of payment rates for hospitals furnishing skilled nursing or intermediate care facility services under Medicaid, and would instead provide that these rates must meet the same general criteria as rates for other long term care services and hospital services.

Amendments to authority for home and community-based care waivers.—Section 232 would amend the authority to grant to States waivers permitting home and community-based long term care services to be provided under the State plan, in order to improve the Secretary's ability to control costs under these waivers. States would be required to report quarterly to the Secretary (as well as annually, as under present law) on the cost-effectiveness of their waiver programs. The Secretary would have the option to grant initial waivers, and renewals of waivers, for periods of one, two, or three years, rather than being required to grant waivers and renewals for three-year periods.

Authority of the Secretary to issue and enforce subpoenas.—Section 233 would authorize the Secretary to issue and enforce subpoenas with respect to hearings, investigations, or other proceedings or matters under the Medicaid program, to the same extent that he has that authority under the Medicare program under present law.

Interest payments on disputed claims.—Section 234 would redefine the disputed claims on which States are required to pay interest on the Federal matching payments if they are ultimately disallowed. The proposed amendment would make this requirement apply to amounts claimed by the State on or after October 1, 1980, rather than to expenditures for services furnished on or after that date. This amendment is needed because Federal matching payments are based on the date the State expenditure was made, irrespective of the date the service was rendered.

TITLE III—OTHER HEALTH CARE FINANCING PROVISIONS

Repeal of authority for payments to promote closing and conversion of underutilized hospital facilities.—Section 301 would repeal the authority of the Secretary to make payments under Medicare to promote closing and conversion of underutilized hospital facilities (and to reimburse States under Medicaid for such payments).

Presidential appointment of, and executive level IV pay rate for, the Administrator of the Health Care Financing Administration.—Section 302 would provide that appointment to the position of Administrator of the Health Care Financing Administration be by the President by and with the advice and consent of the Senate, and would place that position in Level IV of the Executive Schedule. The position of Administrator of the Health Care Financing Administration is currently in the Senior Executive Service and appointment is by the Secretary.

Increased State flexibility under the health facility capital expenditures review program.—Section 303 would increase the States' flexibility under the health facility capital expenditures review program by (1) explicitly permitting each State to determine the scope of its review program, (2) giving each State broader discretion as to the choice of the designated planning agency and the composition of its governing body or advisory board, (3) eliminating the requirement for a State appeals procedure, (4) permitting the State's designated planning agency to determine how far in advance notice of proposed capital expenditures must be given, and (5) eliminating the authority of the Secretary to overrule on substantive grounds a decision at the State level. The section would also eliminate the national advisory council for the program.

Repeal of requirement for Federal funding of State programs that review health facility capital expenditures.—Section 304 would repeal a requirement that the Secretary pay for State programs that review health facility capital expenditures.

Amendment to requirements concerning reporting of financial interest.—Section 305 would amend the definition of ownership or control interest in a provider, fiscal intermediary, or other entity participating in the Medicare or Medicaid program to provide that such an interest includes an interest in a mortgage or other obligation secured by the entity which is equal to 5 percent of the assets of the entity. This amendment would eliminate reporting requirements with respect to interests in obligations which amount to $25,000 or more, but which equal less than 5 percent of the assets of the entity.

Exclusion of certain entities owned or controlled by individuals convicted of medicare- or medicaid-related crimes.—Section 306 would eliminate a gap in the Secretary's authority under present law to control fraud and abuse in the Medicare and Medicaid programs, by giving the Secretary authority to exclude from participation in those programs any entity in which a significant ownership or control interest is held by a person convicted of a program-related criminal offense.

Elimination of the peer review program.—Section 307 would eliminate the program for peer review of the utilization and quality of health care services.●

By Mr. GARN (for himself, Mr. TOWER and Mr. PROXMIRE) (by request):

S. 644. A bill to amend and extend certain Federal laws relating to housing, community, and neighborhood development, and related programs, and for other purposes; to the Committee on Banking, Housing, and Urban Affairs.

HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1983

● Mr. GARN. Mr. President, I am today introducing the Housing and Community Development Act of 1983, and I ask unanimous consent that the bill, and a section-by-section analysis be printed in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 644

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Housing and Community Development Act of 1983".

TABLE OF CONTENTS

TITLE I—COMMUNITY AND NEIGHBORHOOD DEVELOPMENT
Sec. 101. Authorization—Title I of the Housing and Community Development Act of 1974.
Sec. 102. Rental Rehabilitation.
Sec. 103. Urban Homesteading.
Sec. 104. State Small Cities Program.
Sec. 105. Eligible CDBG Activities.
Sec. 106. Miscellaneous Amendments.
Sec. 107. Repealers.
TITLE II—ASSISTED HOUSING
Sec. 201. Authorization and Use of Assisted Housing.
Sec. 202. Indian Housing Program.
Sec. 203. Payments for Operation of Public Housing Projects.
Sec. 204. Section 8 Housing Payment Certificate Program.
Sec. 205. Amendments Affecting Tenant Rents or Contributions.
Sec. 206. Revised Definition of Disability.
Sec. 207. Public Housing Agency Receivership Amendment to U.S. Housing Act of 1937.
Sec. 208. Demolition and Disposition of Public Housing.
Sec. 209. Repeal of Requirement for Significant Community Representation on Governing Boards of Section 202 Projects.
Sec. 210. Operating Assistance for Troubled Multifamily Housing Projects.
Sec. 211. Tenant Participation in Multifamily Housing Projects.
Sec. 212. Preventing Fraud and Abuse in HUD-Assisted Housing.
TITLE III—PROGRAM AMENDMENTS AND EXTENSIONS
Sec. 301. Extension of Federal Housing Administration Mortgage Insurance Programs.
Sec. 302. Authorization for Appropriations to Cover Losses to the General Insurance Fund.
Sec. 303. Research Authorizations.
Sec. 304. Cancellation of Debt Owed the Treasury and Liquidation of New Communities Program.
Sec. 305. Cancellation of Debt of Special Assistance and Emergency Mortgage Purchase Assistance Funds of the Government National Mortgage Association.
Sec. 306. Elimination of Requirement that FHA Interest Rates be Set by Law.
Sec. 307. Repeal of Section 367(b)(2)(A) of the Multifamily Mortgage Foreclosure Act of 1981.
Sec. 308. Treatment of FHA Single Family Premiums.
Sec. 309. Authority to Use the Multifamily Foreclosure Act of 1981 for Mortgages Insured Under the Coinsurance Program.
Sec. 310. Repeal of Requirment to Publish Prototype Housing Costs for

One- to Four-Family Dwelling Units.
Sec. 311. Increased Loan Limits for Manufactured Homes and Lots Under Title I of the National Housing Act.
Sec. 312. Authority for Refinancing Manufactured Homes Under Title I of the National Housing Act.
Sec. 313. Change in Maximum Loan-To-Value Ratio for Modestly Priced Single Family Homes.
Sec. 314. Non-Occupant single Family Mortgagors.
Sec. 315. Increase in Mortgage Insurance Premiums.
Sec. 316. Shell Home Construction.
Sec. 317. Payment of Claims Without HUD Acquisition of Title.
Sec. 318. Discretionary Authority to Regulate Rents or Charges.
Sec. 319. Mortgage Insurance for Manufactured Home Parks for the Elderly.
Sec. 320. Removal of Refinancing Limitation on Certain Multifamily Projects.
Sec. 321. Assignment of Section 221(g)(4) Mortgages to GNMA.
Sec. 322. Repeal of Section 221 Buy-Back Provision.
Sec. 323. Eliminate Existing Restraints on FHA Insurance for Condominium Units.
Sec. 324. Graduated Payment Mortgages for Multifamily and Single Family Housing.
Sec. 325. Adjustable Rate Mortgages for Single Family Housing.
Sec. 326. Shared Appreciation Mortgages for Single Family Housing.
Sec. 327. Shared Appreciation Mortgages for Multifamily Housing.
Sec. 328. Demonstration Authority to Insure Home Equity Conversion Mortgages for Elderly Homeowners.
Sec. 329. Structural Defects in VA-Approved, FHA-Insured New Homes.
Sec. 330. Time of Payment of Mortgage Insurance Premiums.
Sec. 331. Single Family Mortgage Insurance on Indian Reservations and Hawaiian Home Lands.
Sec. 332. Repeal of Authority to Make Grants or Contracts for Housing Counseling Assistance.
Sec. 333. Prohibition on Use of FHA Co-Insurance in Connection With Tax-Exempt Obligations.

TITLE I—COMMUNITY AND NEIGHBORHOOD DEVELOPMENT

AUTHORIZATIONS—TITLE I OF THE HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1974

SEC. 101. (a) The second sentence of section 103 of the Housing and Community Development Act of 1974 is amended to read as follows: "There are authorized to be appropriated for these purposes not to exceed $3,846,000,000 for the fiscal year 1984 and not to exceed $4,090,000,000 for each of the fiscal years 1985 and 1986.".

(b) The first sentence of section 107(a) of such Act is amended to read as follows: "Of the total amount approved in appropriation Acts under section 103 for each of the fiscal years 1984, 1985 and 1986, not more than $100,500,000 for each such year may be set aside in a special discretionary fund for grants under subsection (b), of which $75,000,000 for each such year shall be available for grants to Indian tribes under subsection (b)(3).".

(c) The second sentence of section 119(a) of such Act is amended to read as follows: "Of the total amount approved in appropriation Acts under section 103 for each of the fiscal years 1984, 1985 and 1986, not more than $196,000,000 shall be available for the fiscal year 1984 and not more than $440,000,000 shall be available for each of the fiscal years 1985 and 1986 for grants under this section.".

RENTAL REHABILITATION

SEC. 102. (a) Title I of the Housing and Community Development Act of 1974 is amended by adding the following new section at the end thereof:

"RENTAL REHABILITATION

"SEC. 122. (a) The Secretary is authorized to—

"(1) make rental rehabilitation grants to States and units of general local government to help support the rehabilitation of privately owned real property to be used for residential rental purposes; and

"(2) make available contract authority, as provided by section 8(b)(3)(B) of the United States Housing Act of 1937 ('housing payment certificates'), to minimize the displacement of very low-income tenants residing in structures rehabilitated with assistance under this section, to assist very low-income tenants residing in these structures who are displaced by such rehabilitation activities, and to assist other very low-income tenants in obtaining decent, safe, and sanitary housing. Of the total amount approved in appropriation Acts under section 103 for each of the fiscal years 1984, 1985, and 1986, not more than $150,000,000 shall be available for each such year for rental rehabilitation grants under this section. Notwithstanding the third sentence of section 103, amounts appropriated for grants under this section shall remain available through the end of the fiscal year after the fiscal year in which they were originally made available.

"(b)(1) Of the amount available in any fiscal year for grants under subsection (a)(1), the Secretary shall allocate amounts for cities which have a population of fifty thousand or more, urban counties, and States, taking into account such factors as low-income renter population, rental housing market conditions, overcrowding of rental housing, the condition of the rental housing stock, and such other objectively measurable conditions as the Secretary deems appropriate to further the purposes of this section.

"(2) Before an allocation determined under paragraph (1) for any fiscal year is made available for use, the Secretary may adjust the allocation as follows:

"(A) The Secretary is authorized to establish minimum allocation amounts for cities and urban counties, representing program levels below which, in the Secretary's determination, conduct of a rental rehabilitation program would not be feasible. The amount of any allocation which is below this minimum shall be added to the allocation for the State in which the city or county is located.

"(B) Beginning with fiscal years after fiscal year 1984, the Secretary is authorized to adjust the allocation for a city, urban county, or State administering a rental rehabilitation program as provided in subsection (e)(1), by up to 15 per centum above or below the amount of such allocation, based on an annual review of each such entity's performance in carrying out activities under this section. The Secretary shall establish performance criteria for purposes of this subparagraph, which shall include performance in achieving the result that at least 80 per centum of the initial rents, on a free-market basis, for units rehabilitated with assistance under this section are within the applicable payment standard for the area, as determined under section 8(d)(1) of the United States Housing Act of 1937. Subparagraph (A) shall not apply to an allocation which falls below the minimum amount described therein by reason of an adjustment under this subparagraph.

"(3)(A) The Secretary shall allocate the contract authority made available for housing payment certificates referred to in subsection (a)(2) in connection with rental rehabilitation programs under this section for use in each city referred to in paragraph (1) of this subsection, urban county, and State in the same proportion as each such entity's allocation of rental rehabilitation grants under paragraphs (1) and (2) of this subsection bears to the total amount of such grants available for allocation to all such entities for that fiscal year.

"(B) The annual contributions contract covering the contract authority referred to in the preceding subparagraph shall contain such terms and conditions as the Secretary deems appropriate to carry out the purposes of this section, including provisions to assure that the appropriate public housing agency makes such authority available to eligible tenants residing in structures to be rehabilitated with assistance under this section.

"(4) The Secretary shall, at least on an annual basis, make such reviews and audits as may be necessary or appropriate to determine—

"(A) where the grantee is a unit of general local government or a State carrying out its own rental rehabilitation program as provided in subsection (e)(1)(A), whether (i) the grantee has carried out its activities in a timely manner and in accordance with the requirements of this section and of section 107(d), and has a continuing capacity to carry out those activities in a timely manner, and (ii) the housing payment certificates made available under this section have been administered in accordance with the requirements of the Secretary pursuant to United States Housing Act of 1937 and of this section; and

"(B) where the grantee is a State distributing resources made available under this section to units of general local government as provided in subsection (e)(1)(B), whether the State (i) has distributed such resources in a timely manner and in accordance with the requirements of this section and of section 107(d) and (ii) has made such reviews and audits of the units of general local government as may be necessary or appropriate to determine whether they have satisfied the performance criteria described in subparagraph (A)(i) of this paragraph.

The Secretary may adjust, reduce, or withdraw resources made available to States and units of general local government receiving assistance under this section, or take other action as appropriate in accordance with the findings of these reviews and audits, except that resources already expended on eligible activities shall not be recaptured or deducted from future resources made available to the grantee. Any amounts which become available as a result of actions under this paragraph or section 111 shall be reallocated in the year in which they become available to such grantee or grantees as the Secretary may determine.

"(5) The Secretary is authorized to establish maximum levels of rental rehabilitation

grant amounts which a grantee may receive under this subsection in any fiscal year. These maxima may be expressed as percentage increments above the allocations determined under paragraphs (1) and (2) of this subsection.

"(6) Any rental rehabilitation grant amounts which are not obligated at the end of any fiscal year shall be added to the amount available for allocation for such grants for the succeeding fiscal year.

"(c) Any city or urban county receiving an allocation under subsection (b) and any State administering a rental rehabilitation program as provided in subsection (e)(1) shall prepare an annual statement containing a description of its rental rehabilitation program. Except in the case of a State distributing resources as provided in subsection (e)(1)(B), the statement shall consist of the activities each entity proposes to undertake for the fiscal year, including its projected progress in carrying out those activities. The statement of a State distributing resources as provided in subsection (e)(1)(B) shall consist of its proposed method of distributing the resources. No later than December 31 of the year in which the program is to be undertaken, the statement shall be made available to the public, and a copy shall be furnished to the Secretary.

"(d) Rental rehabilitation programs assisted under this section shall meet the following requirements:

"(1) rental rehabilitation grants shall only be used to rehabilitate properties which are (A) located in low- and moderate-income areas, as defined and designated by the grantee, and (B) to be used for residential rental purposes;

"(2) dwelling units in structures rehabilitated with assistance under this section shall meet the housing quality standards established by the Secretary for units assisted under section 8 of the United States Housing Act of 1937;

"(3) rental rehabilitation assistance provided under this section for any property shall not exceed 50 per centum of the total rehabilitation costs associated with the rehabilitation of that property, as determined by the Secretary;

"(4) States and units of general local government receiving assistance under this section shall not impose rental requirements on structures rehabilitated with assistance under this section (including requirements relating to the rents which may be charged after rehabilitation) which differ from those applicable to structures undergoing comparable rehabilitation without assistance under this section;

"(5) an owner of a structure rehabilitated with assistance under this section shall not refuse to rent a dwelling unit in the structure to a family solely because the family is receiving rental assistance under section 8 of the United States Housing Act of 1937;

"(6) rehabilitation financing for a structure assisted under this section shall, to the maximum extent practicable, require that the borrower or one or more related individuals shall be personally liable for repayment of all such financing in the event of default; and

"(7) States and units of general local government receiving rental rehabilitation assistance under this section shall not deduct therefrom any amounts to cover administrative expenses incurred by them in carrying out their responsibilities under this section.

"(e)(1) Except as provided in paragraph (2), the State shall administer resources made available under subsection (b) for any fiscal year. These resources shall only be used to carry out activities under this section in areas of the State outside a city or urban county which received an allocation for that fiscal year under subsection (b). The State may use all or part of these resources (A) to carry out its own rental rehabilitation program or (B) to distribute them to units of general local government.

"(2) States may elect not to administer resources made available for fiscal year 1984. This election shall be made in such manner and before such time as the Secretary may prescribe. The Secretary shall administer the resources available to any State exercising such an election in accordance with regulations and procedures prescribed by the Secretary, which regulations shall, to the maximum extent practicable, be comparable to those for cities and urban counties receiving resources under subsection (b).

"(f) The Secretary may by regulation establish such standards governing relocation payments and other related assistance as the Secretary determines to be appropriate.

"(g) The Secretary shall establish procedures which support national historic preservation objectives and which assure that, if any rehabilitation proposed to be assisted under this section would affect property that is included or is eligible for inclusion on the National Register of Historic Places, such activity shall not be undertaken unless (A) it will reasonably meet the standards for rehabilitation issued by the Secretary of the Interior and the appropriate State Historic Preservation Officer is afforded the opportunity to comment on the specific rehabilitation plan, or (B) the Advisory Council on Historic Preservation is afforded an opportunity to comment on cases for which the recipient of assistance, in consultation with the State Historic Preservation Officer, determines that the proposed rehabilitation activity cannot reasonably meet such standards or would adversely affect historic property as defined therein.

"(h) For purposes of this section, the term 'grantee' means (1) any city or urban county receiving resources under subsection (b); (2) any State administering a rental rehabilitation program as provided in subsection (e)(1); and (3) any unit of general local government which receives assistance from the Secretary as provided in subsection (e)(2).".

(b) The first sentence of each of sections 106 (a) and (d)(1) of such Act is amended by striking out "and section 119" and inserting in lieu thereof ", section 119, and section 122".

(c) Section 107(d) of such Act is amended by—

(1) striking out "unless the applicant" in paragraph (1) and inserting in lieu thereof the following: "and no assistance may be made available under section 122 unless the grantee"; and

(2) inserting "grantee or" before "applicant" in paragraph (3).

URBAN HOMESTEADING

SEC. 103. (a) The first sentence of section 810(h) of the Housing and Community Development Act of 1974 is amended by striking out "and not to exceed $13,467,000 for the fiscal year 1983" and inserting in lieu thereof the following: "not to exceed $13,467,000 for the fiscal year 1983, not to exceed $12,000,000 for the fiscal year 1984, and such sums as may be necessary for the fiscal year 1985".

(b) Section 810 of such Act is amended by—

(1) striking out "without payment" in the first sentence of subsection (a) and inserting immediately before "any real property" in such sentence the following: "for such consideration (if any) as may be mutually agreed upon,";

(2) striking out "without payment" in clause (D) in the second sentence of subsection (a) and inserting in lieu thereof the following: ", offset by any consideration to be received";

(3) striking out "without any substantial consideration" in subsection (b)(1) and inserting in lieu thereof the following: "for such consideration, if any, as may be agreed upon by the entity and the individual or family";

(4) striking out "and" the first time it appears in subsection (b)(2) and inserting in lieu thereof a comma;

(5) inserting immediately before the semicolon at the end of subsection (b)(2) the following: ", and ability to pay any consideration required in connection with conveyance of the property";

(6) striking out "and" at the end of subsection (b)(3)(C) and inserting "and" after the semicolon at the end of subsection (b)(3)(D);

(7) adding the following new subparagraph at the end of subsection (b)(3):

"(E) pay the agreed-upon consideration for the property;";

(8) striking out "without consideration" in subsection (b)(5); and

(9) adding the following new material at the end of subsection (b):

"Any unit of general local government, State, or agency designated by either, which receives consideration in connection with the conveyance of a property to an individual or family under this section in an amount exceeding any consideration paid to the Secretary in connection with the transfer of the property to any such entity, shall remit to the Secretary, in such manner and at such time or times as the Secretary may prescribe, 50 per centum of the amount of such excess, less such deductions and allowances as the Secretary may prescribe. Any amount retained by an entity pursuant to the preceding sentence shall be used by the entity in furtherance of its urban homesteading activities.".

(c) Section 810 of such Act is amended by—

(1) adding "or (i)" immediately after "subsection (b)" in subsection (c); and

(2) adding the following new subsection at the end thereof:

"(i) Notwithstanding any other provision of law, including any other provision of this section, the Secretary is authorized to undertake a program to demonstrate the feasibility and desirability of using a variety of homesteading and related techniques to facilitate the reuse for homeownership purposes of properties which are owned by the Secretary and contain five or more dwelling units. The Secretary shall convey properties which the Secretary determines are suitable for the demonstration to a unit of general local government or a State, or an agency or instrumentality of a unit of general local government or a State, for such consideration (if any) as may be agreed between the Secretary and the transferee, and upon such terms and conditions as the Secretary deems appropriate, including provisions to assure that the subsequent transfer of the property to private ownership will result in a reuse which is primarily residential, with dwelling units in the project owned by individuals under a cooperative or condominium form of ownership. In carrying out this

demonstration, the Secretary shall, to the maximum extent feasible, minimize the displacement of residents of properties to be used in the program. To reimburse the housing loan funds for properties transferred under this subsection, the Secretary is authorized, to the extent provided in appropriation Acts, to use amounts appropriated under subsection (h).".

STATE SMALL CITIES PROGRAM

SEC. 104. (a) Section 104(a)(1) of the Housing and Community Development Act of 1974 is amended by—

(1) striking out in the first sentence", under section 106(d) by any State, or under section 106(d)(2)(B) by any unit of general local government" and inserting in lieu thereof the following: "or under section 106(d) by any State"; and

(2) striking out in the second sentence "and in the case of units of general local government receiving grants pursuant to section 106(d)(2)(B)".

(b) Section 104(b) of such Act is amended by—

(1) redesignating clause (4) as clause (5);

(2) striking out "and" at the end of clause (3); and

(3) inserting immediately after clause (3) the following:

"(4) in the case of grants to States made under section 106(d), the grantee, with respect to units of general local government in nonentitlement areas—

"(i) engages or will engage in planning for community development activities;

"(ii) provides or will provide technical assistance to units of general local government in connection with community development programs; and

"(iii) has consulted with local elected officials from among units of general local government located in nonentitlement areas of that State in determining the method of distribution of funds; and".

(c) Clause (1) of the second sentence of section 104(d) of such Act is amended by striking out "section 106(d)(2)(B)" and inserting in lieu thereof the following: "grants made to units of general local government by the Secretary under section 106(d) (as such provision existed immediately before the effective date of the Housing and Community Development Act of 1983)".

(d) Sections 106(d) (2) and (3) of such Act are amended to read as follows:

"(2) Amounts allocated under paragraph (1) shall be available for distribution by the State to units of general local government which are located in nonentitlement areas of the State to carry out activities in accordance with the provisions of this title. The State shall pay from its own resources all administrative expenses incurred by the State in carrying out its responsibilities under this title, except that from the amounts received for distribution in nonentitlement areas, the State may deduct an amount not to exceed 50 percentum of the costs incurred by the State in carrying out such responsibilities. Amounts so deducted shall not exceed 2 percentum of the amount so received. The State shall distribute amounts allocated to it consistent with the statement submitted under section 104(a) and shall be responsible for the administration of funds so distributed.

"(3)(A) Any amounts allocated for use in a State under paragraph (1) which are not received by the State for any fiscal year because of failure to meet the requirements of section 104 (a) or (b), or which become available as a result of actions against the State under section 104(d) or 111, shall be added to amounts available for allocation to all States under paragraph (1) for the succeeding fiscal year.

"(B) Any amounts allocated for use in a State under paragraph (1) which become available as a result of actions under section 104(d) or 111 against units of general local government in nonentitlement areas of the State or as a result of the closeout of a grant made by the Secretary under this section in nonentitlement areas of the State (i) shall be added to amounts allocated to the State under paragraph (1) for the fiscal year in which the amounts become so available or (ii) if the State does not receive a grant in such year, shall be added to amounts available for allocation to all States under paragraph (1) for the succeeding fiscal year.

"(C) Any amounts appropriated for fiscal year 1983 or prior fiscal years which were available for distribution under this subsection by the Secretary immediately before the effective date of the Housing and Community Development Act of 1983 shall be distributed by the Secretary in accordance with the provisions of this subsection as they existed immediately before such effective date, except that amounts which are not obligated by January 1, 1984, shall be reallocated as provided by subparagraph (B).".

ELIGIBLE CDBG ACTIVITIES

SEC. 105. Section 105(a) of the Housing and Community Development Act of 1974 is amended by—

(1) amending paragraph (2) to read as follows:

"(2) the acquisition, construction, reconstruction, or installation (including design features and improvements with respect to such construction, reconstruction, or installation which promote energy efficiency) of public works, facilities (except for buildings for the general conduct of government), and site or other improvements;";

(2) inserting after "public facilities" in paragraph (14) "(except for buildings for the general conduct of government)";

(3) striking out "and" at the end of paragraph (16);

(4) striking out the period at the end of paragraph (17) and inserting in lieu thereof "; and"; and

(5) adding the following new paragraph at the end thereof:

"(18) provision of assistance to facilitate the new construction of housing.".

MISCELLANEOUS AMENDMENTS

SEC. 106. (a) Section 102 of the Housing and Community Development Act of 1974 is amended by striking out "Department of Commerce" each place it appears in paragraphs (3), (4) and (9) of subsection (a) and in subsection (b) and inserting in lieu thereof "Office of Management and Budget".

(b)(1) Section 102(a) of such Act is amended by striking out paragraph (17) and inserting the following in lieu thereof:

"(17) The term 'Indian tribe' means any Indian tribe, band, nation or Alaskan Native Village recognized by the Secretary of the Interior as eligible for services because of its status as such an entity: *Provided,* That part or all of the land of such an entity is held in restricted or trust status by the United States.".

(2) Section 119(n) is amended to read as follows:

"(n) For the purposes of this section, the term 'city' includes Guam, the Virgin Islands, and Indian tribes.".

(c) Section 104(a)(1) of such Act is amended by adding to the end thereof the following:

"In all cases, beginning in fiscal year 1984, the statement required by this subsection shall include a description of the use of funds made available under section 106 in fiscal year 1982 and thereafter (or, beginning in fiscal year 1985, such use since preparation of the last statement prepared pursuant to this subsection) together with an assessment of the relationship of such use to the community development objectives identified in the statement prepared pursuant to this subsection for such previous fiscal years.".

(d) Section 106(b) of such Act is amended by adding the following new paragraph at the end thereof:

"(6) Where data are available, the amount determined under paragraph (1) of this subsection for a metropolitan city which has been formed by the consolidation of one or more metropolitan cities with an urban county shall be equal to the sum of the amounts which would have been determined under paragraph (1) for the metropolitan city or cities and the balance of the consolidated government, if the consolidation had not occurred. This paragraph applies only to consolidations which:

"(A) included all metropolitan cities which received grants under this section for the fiscal year preceding the consolidation and which were located within the urban county;

"(B) included the entire urban county which received a grant under this section for the fiscal year preceding the consolidation; and

"(C) took place on or after October 1, 1983.

The population growth rate of all metropolitan cities referred to in section 102(a)(12) of this Act shall be based on the population of (i) metropolitan cities other than consolidated governments the grant for which is determined under this paragraph and (ii) cities which were metropolitan cities before their incorporation into consolidated governments. For purposes of calculating the entitlement share for the balance of the consolidated government under this paragraph, the entire balance shall be considered to have been an urban county.".

(e) Section 106(c) of such Act is amended to read as follows:

"(e) Any amounts allocated to a metropolitan city or an urban county pursuant to the preceding provisions of this section which are not received by the city or county for a fiscal year because of failure to meet the requirements of section 104 (a), (b), or (c), or which become available as a result of actions under section 104(d) or 111, shall be added to amounts available for allocation under section 106(b) in the succeeding fiscal year.".

(f) Section 106(f) of such Act is amended to read as follows:

"(f) If the total amount available for distribution in any fiscal year to metropolitan cities and urban counties under this section is insufficient to provide the amounts to which metropolitan cities and urban counties would be entitled under subsection (b) and funds are not otherwise appropriated to meet the deficiency, the Secretary shall meet the deficiency through a pro rata reduction of all amounts determined under subsection (b). If the total amount available for distribution in any fiscal year to metropolitan cities and urban counties under this

section exceeds the amounts to which metropolitan cities and urban counties would be entitled under subsection (b), the Secretary shall distribute the excess through a pro rata increase of all amounts determined under subsection (b).".

(g) Section 107(b)(4) of such Act is amended to read as follows:

"(4) to States, units of general local government, Indian tribes, or areawide planning organizations for the purpose of providing technical assistance in planning, developing and administering assistance under this title; to groups designated by such governmental units to assist them in carrying out assistance under this title; to qualified groups for the purpose of assisting more than one such governmental unit to carry out assistance under this title; and to States and units of general local government for implementing special projects otherwise authorized under this title. The Secretary may also provide technical assistance, directly or through contracts, to such governmental units and groups.".

(h) Section 116(b) of such Act is amended by—

(1) striking out "(in that fiscal year)"; and

(2) striking out "in that year" and inserting in lieu thereof "for that year".

(i) Section 119(i) of such Act is amended by striking out "which are not central cities of a metropolitan statistical area".

REPEALERS

SEC. 107. (a)(1) Section 104(g) of the Housing and Community Development Act of 1974 is hereby repealed.

(2) Any revolving loan fund established pursuant to section 104(g) of such Act before the effective date of this subsection shall continue to be governed by the provisions of section 104(g) as they existed immediately before such effective date.

(b)(1) Section 108 of such Act is hereby repealed.

(2) Any guarantee under section 108 of such Act made pursuant to a commitment to guarantee made before the effective date of this subsection shall continue to be governed by the provisions of section 108 as they existed immediately before such effective date.

(c)(1) Section 312 of the Housing Act of 1964 is hereby repealed, except that the first and second sentences of subsection (d) of such section shall remain in effect until September 30, 1984, or until such earlier time as the assets and liabilities of the revolving fund under such section are transferred to the revolving fund for liquidating programs established pursuant to title II of the Independent Offices Appropriation Act, 1955. All moneys in the revolving fund for liquidating programs shall be available for necessary expenses of servicing and liquidating loans made pursuant to section 312, including reimbursement or payment for services and facilities of the Government National Mortgage Association and of any public or private entity for the servicing or liquidation of such loans.

(2) Any loan which, before the effective date of this subsection, was obligated under and governed by section 312 of the Housing Act of 1964 shall continue to be governed by the provisions of section 312 as they existed immediately before such effective date.

(d)(1) Section 414 of the Housing and Urban Development Act of 1969 is hereby repealed.

(2) Notwithstanding paragraph (1) of this subsection, the Secretary of Housing and Urban Development and the Secretary of Agriculture may dispose of Federal surplus real property pursuant to the terms of section 414 of such Act if, prior to the effective date of this Act, either Secretary had requested the Administrator of General Services to transfer such property for such disposition: *Provided*, That, if either Secretary has not so disposed of any such property within one hundred and twenty days of the effective date of this Act, such property shall be transferred back to the Administrator.

(3) Notwithstanding paragraph (1) of this subsection, subsection (b) of section 414 of such Act shall continue to apply, where applicable, to all property transferred by either Secretary pursuant to section 414 of such Act, including properties transferred pursuant to paragraph (2) of this subsection.

(e)(1) Section 106(g) of the Housing Act of 1949 is hereby repealed.

(2) Section 703(d) of the Housing and Urban Development Act of 1965 is hereby repealed.

(3) Sections 704 and 705 and the second sentence of section 706 of the Housing Act of 1961 are hereby repealed.

TITLE II—ASSISTED HOUSING

AUTHORIZATION AND USE OF ASSISTED HOUSING

SEC. 201. (a) Section 5(c) of the United States Housing Act of 1937 is amended by—

(1) striking out "and" in the first sentence of paragraph (1) and inserting after "1981" the following: ", and by $472,253,443 on October 1, 1983";

(2) striking out the last sentence of paragraph (1);

(3) amending paragraph (2) to read as follows:

"(2) Of the additional authority approved in appropriation Acts and made available on October 1, 1983, the Secretary shall enter into contracts aggregating at least $70,000,000 for assistance to projects under section 14."; and

(4) striking out paragraph (3) and redesignating paragraphs (4), (5) and (6) as paragraphs (3), (4) and (5), respectively

(b) Section 9(c) of such Act is amended by striking out "and" and by inserting after "1981" the following: ", not to exceed $1,350,000,000 on or after October 1, 1982, not to exceed $1,636,500,000 on or after October 1, 1983, and such sums as may be necessary on or after October 1, 1984".

(c) Section 213(d) of the Housing and Community Development Act of 1974 is hereby repealed.

INDIAN HOUSING PROGRAM

SEC. 202. (a)(1) The Secretary of Housing and Urban Development (hereinafter referred to as "the Secretary") is authorized to make grants to Indian tribes (A) to assist in the development of newly constructed housing for the benefit of members of the tribes and (B) to make rental units in such housing affordable by very-low income members of the tribes, as provided for existing housing units under section 8(d) of the United States Housing Act of 1937.

(2) Dwelling units assisted under paragraph (1) may be (A) owned by the tribe or an Indian housing authority and leased to families or (B) owned by the tribe or the authority and the family as co-mortgagors.

(3) To receive a grant, an Indian tribe shall submit an application in accordance with rules and regulations of the Secretary. The application shall describe the program proposed by the tribe for developing and operating newly constructed housing and related infrastructure, and for providing the rental assistance referred to in paragraph (1). The Secretary shall make grants based on criteria determined by the Secretary, such as the relative need of the members of the tribe, the capacity of the tribe to carry out the proposed program, the quality of the proposed program, and the past performance of the tribe in providing housing.

(4) The maximum amount of a grant under paragraph (1) with respect to development costs (other than for related water and sewer facilities) for any unit shall be the lesser of (A) 70 per centum of such development costs (as determined by the Secretary to be reasonable for the area) or (B) such development costs, minus $15,000. The grant may be used to fund 100 per centum of the costs of water and sewer facilities related to providing newly constructed units assisted under this subsection.

(5) As a condition of receiving a grant under this subsection, the Secretary may require an Indian tribe (A) to demonstrate that an operational mechanism exists for evicting families who fail to make timely rent payments and for substituting other eligible families, and (B) to pledge income from tribal resources or tribal assets or to pledge Federal grants to be used to reimburse the Secretary for any mortgage insurance claims paid in connection with units assisted under this subsection.

(6) As used in this subsection, the term "Indian tribe" means any Indian tribe, band, nation or Alaskan Native Village recognized by the Secretary of the Interior as eligible for services because of its status as such an entity: *Provided* That part or all of the land of such an entity is held in restricted or trust status by the United States.

(7) There are authorized to be appropriated for grants under paragraph (1) ($76,000,000 for the fiscal year 1984 and such sums as may be necessary for the fiscal year 1985, to remain available through the end of fiscal years 1985 and 1986, respectively.

(b) Section 203 of the National Housing Act is amended by adding the following new subsection at the end thereof:

"(q) The Secretary is authorized to insure under this section any mortgage which involves the development of dwelling units assisted under section 202(a) of the Housing and Community Development Act of 1983 and which meets the requirements of this section, except that—

"(1) the Secretary may insure and make commitments to insure under this subsection advances made during construction where the Secretary determines the proposed construction is otherwise acceptable and determines no feasible financing alternative is available; and

"(2) where an Indian tribe or Indian housing authority is the mortgagor or co-mortgagor, the percentage limitation on the amount of the principal obligation based on the appraised value of a one- to four-family residence contained in section 203(b)(2) shall apply in lieu of the limitation in section 203(b)(8).".

PAYMENTS FOR OPERATING AND REPLACEMENT COSTS OF PUBLIC HOUSING PROJECTS

SEC. 203. (a) Section 9(a)(1) of the United States Housing Act of 1937 is amended to read as follows:

"(a)(1) In addition to the contributions authorized to be made available for the purposes specified in section 5 to this Act, the Secretary may make annual contributions to public housing agencies for the operation of public housing projects for the purposes of assuring the lower income character of

such projects and achieving and maintaining adequate operating services and reserve funds, including a reasonable replacement allowance, as follows:

"(A) For public housing agencies whose fiscal years start on or after January 1, 1984, the contributions payable annually under this section shall be determined on the basis of a formula prescribed by the Secretary reasonably calculated to assure that the total income, as defined by the Secretary, available to the public housing agency will be comparable to the sum of the existing housing fair market rents or the payment standards for the public housing agency's units, with such adjustments as the Secretary, in the Secretary's discretion, may prescribe, taking into account the characteristics of the families served, costs associated with types of housing projects assisted under this section that are not found to a comparable relative degree in the private market, annual contributions pursuant to section 5 of this Act that may be greater than the debt service typically paid by owners of private rental housing charging rents comparable to such fair market rentals or payment standards, and such other factors as the Secretary may determine are appropriate. Fair market rents or payment standards shall be those for existing rental units of similar sizes and types in the market area, as determined under sections 8(c) and (d) of this Act.

"(B) For public housing agencies for which operation of the formula described in subparagraph (A) would result in an amount of annual contributions under this section greater than the sum of (i) funds determined under the method of calculating annual contributions under this section before enactment of the Housing and Community Development Act of 1983 and (ii) a reasonable replacement allowance determined by the Secretary, the Secretary may determine contributions on the basis of a formula that provides the same funds determined under the prior method of calculation plus the replacement allowance determined by the Secretary, with annual adjustments to the contributions, as appropriate, to reflect changes in the fair market rents or payment standards determined under sections 8(c) and (d) of this Act.

"(C) The formulae described in subparagraphs (A) and (B) shall be contained in a regulation promulgated by the Secretary. The regulation shall prescribe and appropriate method of transition from the method of calculating annual contributions under this section before enactment of the Housing and Community Development Act of 1983 which will assure, with reasonable approximation as determined by the Secretary, that the total funds available to a public housing agency for the operation of projects and the replacement allowance shall, in the first year the formula described in subparagraph (A) is used, not be less than 95 per centum of the sum of the funds determined under the prior method of calculation, plus the replacement allowance and rent payable by tenants; and that the funds available for each year thereafter may be reduced in a similarly gradual manner until the levels payable under subparagraph (A) are reached.

"(D) If the Secretary so determines, annual contributions under this section may be made under a different formula or method of calculation from the formulae described in subparagraphs (A) and (B) for housing assisted under section 23 of the U.S. Housing Act of 1937, as it existed before the Housing and Community Development Act of 1974, for homeownership opportunity programs assisted under this Act, for the Indian housing program assisted under this Act, and for housing assisted in the Virgin Islands, Puerto Rico, Guam, and Alaska.

"(E) In addition to other amounts authorized under this section, the Secretary is authorized to reimburse public housing agencies for costs of audits required by the Secretary.

"(F) The Secretary shall embody the provisions for annual contributions payable under this section in a contract providing for their payment subject to the availability of funds. All amounts authorized to be appropriated pursuant to subsection (c) may only be paid pursuant to contracts which provide that no disposition of the public housing project, with respect to which the contract is entered into, shall occur during and for ten years after the period when the contributions were made pursuant to such contract unless approved by the Secretary.".

(b) Section 9(d) of such Act is hereby repealed.

(c) Section 14 of such Act is amended by inserting at the end thereof the following new subsection:

"(k) The Secretary shall not enter into any contract to make assistance available under this section after September 30, 1987, using authority approved in appropriation Acts for fiscal years beginning on or after October 1, 1987.".

SECTION 8 HOUSING PAYMENT CERTIFICATE PROGRAM

SEC. 204. (a) Section 8(b) of the United States Housing Act of 1937 is amended by adding the following new paragraph at the end thereof:

"(3) Assistance contracts entered into under this section shall provide for either (A) assistance payments under subsection (c) of this section based upon the maximum monthly rent which the owner is entitled to receive for each dwelling unit with respect to which the payments are to be made, or (B) assistance payments under subsection (d) of this section based upon a payment standard which is used to determine the maximum monthly assistance which may be paid for any family.".

(b) Section 8(c) of such Act is amended by—

(1) striking out the designation "(c)(1)" and the first sentence of paragraph (1) and inserting in lieu thereof the following:

"(c) In the case of assistance contracts using a maximum monthly rent:

"(1) The contract shall establish the maximum monthly rent (including utilities and all maintenance and management charges) which the owner is entitled to receive for each dwelling unit with respect to which such assistance payments are to be made.";

(2) striking out the penultimate sentence in paragraph (1) and inserting in lieu thereof, the following: "Fair market rentals for an area shall be published in the Federal Register.";

(3) striking out the second sentence in paragraph (3);

(4) striking out "under this section" in paragraph (8) and inserting in lieu thereof "for newly constructed or substantially rehabilitated units"; and

(5) adding the following new paragraph at the end thereof:

"(9) Each contract for an existing structure entered into under this subsection shall be for a term of not less than one month nor more than one hundred and eighty months.

"(10) Each such contract entered into by a public housing agency with an owner of existing housing units shall provide (with respect to any unit) that—

"(A) the selection of tenants for such units shall be the function of the owner, subject to the provisions of the annual contributions contract between the Secretary and the agency, except that the tenant selection criteria shall give preference to families which, at the time they are seeking assistance, occupy substandard housing, are involuntarily displaced, or are paying more than 50 per centum of income for rent;

"(B) the lease between the tenant and the owner shall be for at least one year or the term of such contract, whichever is shorter, and shall contain other terms and conditions specified by the Secretary;

"(C) the owner shall not terminate the tenancy except for serious or repeated violation of the terms and conditions of the lease, for violation of applicable Federal, State, or local law, or for other good cause;

"(D) maintenance and replacement (including redecoration) shall be in accordance with the standard practice for the building concerned as established by the owner and agreed to by the agency; and

"(E) the agency and the owner shall carry out such other appropriate terms and conditions as may be mutually agreed to by them.

"(11) Notwithstanding any other provision of law, with the approval of the Secretary the public housing agency administering an assistance contract with respect to existing housing units may exercise all management and maintenance responsibilities with respect to those units pursuant to a contract between such agency and the owner of such units.".

(c) Section 8(d) of such Act is amended to read as follows:

"(d) In the case of assistance contracts using a payment standard:

"(1) The Secretary shall establish payment standards periodically but not less than annually for dwelling units of various sizes and types in the market area. The payment standard shall be used to determine the maximum monthly assistance which may be paid for any family, as provided in paragraph (2) of this subsection. Payment standards shall be established at levels designed to assist families in securing decent, safe and sanitary housing while providing assistance to the greatest possible number of families. Payment standards for an area shall be published in the Federal Register.

"(2) The monthly assistance payment for any family shall be the amount by which the payment standard for the area exceeds 30 per centum of the family's monthly adjusted income, except that such monthly assistance payment shall not exceed the amount by which the rent for the dwelling unit (including the amount allowed for utilities in the case of a unit with separate utility metering) exceeds 10 per centum of the family's monthly income. In addition, if the family is receiving payments for welfare assistance from a public agency and a part of such payments, adjusted in accordance with the family's actual housing costs, is specifically designated by such agency to meet the family's housing costs, the monthly assistance payment shall not exceed the amount by which the lower of such rent or the payment standard exceeds the portion of such payment which is so designated.

"(3) Assistance payments may be made only for (A) a family determined to be a very low-income family at the time it initially receives assistance under this subsection,

or (B) a family previously receiving assistance under this Act or (C) a lower income family previously participating in programs under section 101 of the Housing and Urban Development Act of 1965, the National Housing Act, section 202 of the Housing Act of 1959, section 312 of the Housing Act of 1964, or any other provision of law, where appropriate, as determined by the Secretary. In selecting families to be assisted, preference shall be given to those which, at the time they are seeking assistance, occupy substandard housing, are involuntarily displaced, or are paying more than 50 per centum of income for rent.

"(4) The Secretary is authorized, without regard to the preferences contained in the preceding paragraph, (A) to use all or any of the authority to enter into contracts provided under section 5(c) to make assistance payments under this subsection for (i) families previously assisted under this Act, (ii) families eligible for assistance under paragraph (3)(C) of this subsection, or (iii) families residing in structures to be rehabilitated with assistance under section 122 of the Housing and Community Development Act of 1974, and (B) to use all or any of the authority to enter into contracts provided under section 202(a) of the Housing and Community Development Act of 1983 to make assistance payments under this subsection for families residing in units assisted under section 202(a) of such Act.

"(5) If a family vacates a dwelling unit before the expiration of a lease term, no assistance payment may be made with respect to the unit after the month during which the unit was vacated.

"(6) Contracts to make assistance payments for a dwelling unit shall be for a term of not less than one month nor more than sixty months.

"(7) The Secretary shall require with respect to any unit that (A) the public housing agency inspect the unit before any assistance payment may be made to determine that it meets housing quality standards established by the Secretary, and (B) the public housing agency make annual or more frequent inspections during the contract term. No assistance payment may be made for a dwelling unit which fails to meet such quality standards, unless any such failure is promptly corrected and the correction verified by the public housing agency.

"(8) Where the amount of the maximum annual commitment pursuant to an annual contributions contract exceeds the annual amount required for assistance payments pursuant to such contract, the Secretary may reserve the amount of such excess for assistance payments in following years.

"(9) The Secretary may provide assistance under this subsection for dwelling units which are assisted under section 202(a) of the Housing and Community Development Act of 1983 and which meet the requirements of this subsection, except that—

"(A) with the approval of the Secretary, an Indian tribe or Indian housing authority may administer assistance contracts with respect to such assisted dwelling units it owns; and

"(B) contracts to make assistance payments for such assisted dwelling units shall be for a term of not less than one month or more than 180 months.".

(d) Section 8(j) of such Act is amended by—

(1) inserting "or subsection (d)" after "under this subsection" in the first sentence of paragraph (1); and

(2) redesignating paragraph (8) as paragraph (9) and inserting a new paragraph (8), to read as follows:

"(8) With respect to assistance contracts under subsection (d) on behalf of a family which utilizes a manufactured home as its principal place of residence, paragraphs (2) through (7) of this subsection shall not be applicable, and the Secretary shall have the discretion to modify the amount of the payment standard as appropriate for assistance under this subsection. With respect to a family renting real property on which is located a manufactured home which is owned by the family, the term 'rent' in subsection (d)(2) shall include the monthly payment made by such family to amortize the cost of purchasing the manufactured home, and the monthly assistance payment under subsection (d)(2) may in no case exceed the maximum monthly rent permitted with respect to the real property which is rented by such family for the purpose of locating its manufactured home.".

(e)(1) Section 6(c)(4)(A) of the United States Housing Act of 1937 is amended by—

(A) striking out "or" after "substandard housing" and inserting a comma in lieu thereof; and

(B) inserting ", or are paying more than 50 per centum of income for rent," after "displaced".

(2) Section 8(e)(2) of such Act is amended by—

(A) striking out "or" after "substandard housing" and inserting a comma in lieu thereof; and

(B) inserting ", or are paying more than 50 per centum of income for rent," after "displaced".

(3) Section 101(e)(1)(B) of the Housing and Urban Development Act of 1965 is amended by—

(A) striking out "or" after "substandard housing" and inserting a comma in lieu thereof; and

(B) inserting ", or was paying more than 50 per centum of income for rent," after "displaced".

AMENDMENTS AFFECTING TENANT RENTS OR CONTRIBUTIONS

SEC. 205. (a) Section 3(a) of the United States Housing Act of 1937 is amended by—

(1) adding the following immediately after the first sentence:

"Reviews of family income shall be made at least annually."; and

(2) inserting after "A family" in the final sentence the following:

"(other than a family assisted under section 8(d) or under a public housing homeownership opportunity program)".

(b) Section 3(b) of the United States Housing Act of 1937 is amended by striking out the period at the end of paragraph (2) and inserting in lieu thereof the following:

", except that the Secretary may establish income ceilings higher or lower than 50 per centum of the median for the area on the basis of the Secretary's findings that such variations are necessary because of unusually high or low family incomes.".

(c) Section 322(i)(1) of the Omnibus Budget Reconciliation Act of 1981 is amended to read as follows:

"(i)(1)(A) The provisions of this subparagraph (A) apply to determinations of the rent to be paid by a tenant whose occupancy in housing assisted under the United States Housing Act of 1937, section 236 of the National Housing Act or section 101 of the Housing and Urban Development Act of 1965 begins or after the effective date of regulations implementing subsections (a) through (h) of this section or, with respect to section 205(a) of the Housing and Community Development Act of 1983, begins on or before the effective date of regulations implementing that section. The Secretary shall provide that the rent required to be paid by a tenant shall not increase, as a result of any one or a combination of the provisions of subsections (a) through (h) of this section, the provisions of section 205(a) of the Housing and Community Development Act of 1983, and any other provision of Federal law redefining which governmental benefits are required to or may be considered as income, by more than 20 per centum during any 12 month period, unless the increase above 20 per centum is attributed solely to increases in income which are not caused by such provisions.

"(B) The 20 per centum limitation in subparagraph (A) shall also cover increases in rent or contribution, as defined by the Secretary, of a tenant assisted under section 8(d) of the United States Housing Act of 1937, as amended by the Housing and Community Development Act of 1983 (i) where such tenant previously received section 8 existing assistance with respect to occupancy of a unit selected by the family, and where the assistance under section 8(d) is for occupancy of the same unit; and (ii) with respect only to increases as a result of the provisions of subsections (a) through (h) of this section, where such tenant occupied housing assisted under the United States Housing Act of 1937, section 236 of the National Housing Act or section 101 of the Housing and Urban Development Act of 1965, beginning on or before the effective date of regulations implementing subsections (a) through (h) of this section.

"(C) Tenants of assisted housing not meeting the occupancy requirements of subparagraphs (A) or (B) shall be subject to immediate rent payment or contribution determinations, as defined by the Secretary, in accordance with applicable law. However, the Secretary shall provide that the rent or contribution payable by any such tenant who is occupying assisted housing on the effective date of any provision of Federal law redefining which governmental benefits are required to or may be considered as income shall not increase, as a result of any such provision of Federal law, by more than 20 per centum during any 12 month period, unless the increase above 20 per centum is attributable to causes unrelated to such redefinitions.

"(D) Notwithstanding the provisions of subsections (a) through (h) of this section, section 8(d) of the United States Housing Act of 1937, as amended by the Housing and Community Development Act of 1983, and section 205(a) of such Act, the Secretary may provide for delayed applicability, or for staged implementation, of the procedures for determining rents or contributions, as defined by the Secretary, required by such provisions if the Secretary determines that immediate application of such procedures would be impracticable, would violate the terms of existing leases, or would result in extraordinary hardship for any class of tenants.

"(E) The limitations on increases in rent or contribution contained in subparagraphs (A), (B) and (C) shall remain in effect and may not be changed or superseded except by another provision of law which amends this subsection.

"(F) If the tenant is receiving payments for welfare assistance from a public agency

and a part of such payments, adjusted in accordance with the tenant's actual housing costs, is specifically designated by such agency to meet the tenant's housing costs and if the tenant's rent or contribution, as defined by the Secretary, is based on the part of such payments which is so designated, the 20 per centum limitation on increases in the rent or contribution in subparagraphs (A) and (B) shall not apply with respect to the portion of such payments which is so designated to the extent the Secretary determines the tenant will not bear the burden of the increases.

"(G) Notwithstanding any other provision of this section or the provisions of section 205(a) of the Housing and Community Development Act of 1983, application of the procedures for determining rent or contribution, as defined by the Secretary, contained in the aforementioned provisions shall not result in a reduction in the amount of such rent or contribution below the amount paid by any tenant occupying housing assisted under the United States Housing Act of 1937, section 236 of the National Housing Act or section 101 of the Housing and Development Act of 1965 immediately preceding the effective date of regulations implementing this section or section 205(a) of the Housing and Community Development Act of 1983.".

(d) Section 322(i) of the Omnibus Budget Reconciliation Act of 1981 is further amended by striking out paragraph (2) and by redesignating paragraph (3) as paragraph (2).

REVISED DEFINITION OF DISABILITY

SEC. 206. (a) Clause (A) of the first sentence of section 3(b)(3) of the United States Housing Act of 1937 is amended by striking out "section 102 of the Developmental Disabilities Services and Facilities Construction Amendments of 1970" and inserting in lieu thereof "section 102 of the Developmental Disabilities Assistance and Bill of Rights Act".

(b) The third sentence of section 202(d)(4) of the Housing Act of 1959 is amended by striking out "section 102(a)(5) of the Developmental Disabilities Services and Facilities Construction Amendments of 1970" and inserting in lieu thereof "section 102 of the Developmental Disabilities Assistance and Bill of Rights Act".

PUBLIC HOUSING AGENCY RECEIVERSHIP AMENDMENT TO THE UNITED STATES HOUSING ACT OF 1937

SEC. 207. Section 6 of the United States Housing Act of 1937 is amended by adding the following new subsection at the end thereof:

"(h) Notwithstanding any other provision of this Act or of any contract for annual contributions, upon the occurrence of events or conditions which, in the opinion of the Secretary, constitute a substantial default in respect to the covenants or conditions to which the public housing agency is subject, the Secretary may petition for the appointment of a receiver of the public housing agency to any district court of the United States or to any court of the State or District of Columbia in which the real property of the public housing agency is situated which is authorized under the laws of such jurisdiction to appoint a receiver for the purposes and having the powers prescribed herein. Upon a determination by the court that such a substantial default has occurred, and without regard to the availability of alternative remedies, the court shall appoint a receiver to conduct the affairs of the public housing agency in a manner consistent with this Act and in accordance with such further terms and conditions as the court shall provide. The court shall have power to grant appropriate temporary or preliminary relief pending final disposition of the petition by the Secretary. The appointment of a receiver shall be terminated upon the petition of the Secretary or when the court determines that all defaults have been cured and that the projects of the public housing agency will thereafter be operated by the public housing agency in accordance with the covenants and conditions to which the public housing agency is subject.".

DEMOLITION AND DISPOSITION OF PUBLIC HOUSING

SEC. 208. The United States Housing Act of 1937 is amended by adding the following new section at the end thereof:

"DEMOLITION AND DISPOSITION OF PUBLIC HOUSING

"SEC. 17. (a) In addition to any other authority contained in this Act, the Secretary may approve, in accordance with the provisions of this section, an application by a public housing agency for permission, with or without financial assistance under this Act, to demolish or dispose of public housing projects or portions of public housing projects.

"(b) Approval of an application under this section may not be given and assistance may not be made available under this Act unless the Secretary has determined that—

"(1) in the case of an application proposing demolition of a public housing project or a portion of a public housing project, the project or portion of the project is obsolete as to physical condition, location or other factors, making it unusable for housing purposes, and no program of modifications is feasible to return the project or portion of the project to useful life; or

"(2) in the case of an application proposing demolition of a portion of a project, the demolition will help to assure the useful life of the remaining portion of the project; or

"(3) in the case of an application proposing dispostion of real property of a public housing agency by sale or other transfer—

"(A) the property's retention is not in the best interests of the tenants or the public housing agency, due to factors adversely affecting the health and safety of the tenants or the economic feasibility of the project, or such other factors which the Secretary determines are consistent with the best interests of the tenants and public housing agency and which are not inconsistent with other provisions of this Act; and

"(B) the net proceeds of the disposition will be used to retire outstanding indebtedness in accordance with the provisions of the annual contributions contract and, to the extent that proceeds remain, in accordance with a plan approved by the Secretary.

"(c) Approval of an application under this section may not be given and assistance may not be made available under this Act unless the application from the public housing agency—

"(1) has been developed in consultation with tenants, if any, who will be affected by the demolition or disposition and with appropriate local government officials; and

"(2) provides that tenants to be displaced as a result of the demolition or disposition will be given an opportunity by the public housing agency to relocate to other decent, safe, sanitary and affordable housing, including housing assisted under section 8 of this Act.

"(d) Notwithstanding any other provision of law, the Secretary is authorized to make available financial assistance for applications approved under this section using available annual contributions authorized under section 5(c), including annual contributions made available for use under section 6(f) or section 14(b) of this Act.

"(e) The provisions of this section shall not limit the authority of the Secretary, independent of this section, to approve a disposition of property determined by the Secretary to be excess to the needs of a project or a disposition incidental to, or which does not interfere with, continued operation of a project.".

REPEAL OF REQUIREMENT FOR SIGNIFICANT COMMUNITY REPRESENTATION ON GOVERNING BOARDS OF SECTION 202 PROJECTS

SEC. 209. Section 202(d)(2)(B) of the Housing Act of 1959 is amended by striking out "(i)" and all that follows through "(ii) which is".

OPERATING ASSISTANCE FOR TROUBLED MULTIFAMILY HOUSING PROJECTS

SEC. 210. (a) Section 201 of the Housing and Community Development Amendments of 1978 is amended by—

(1) striking out paragraph (1)(A) of subsection (c) and inserting in lieu thereof the following:

"(1)(A)(i) is covered by a mortgage insured or formerly insured under the National Housing Act and is assisted under section 236 of the National Housing Act or under section 101 of the Housing and Urban Development Act of 1965 or (ii) is assisted under the proviso of section 221(d)(5) of the National Housing Act; or"; and

(2) striking out ", together with the mortgagee in the case of a project not insured under the National Housing Act," in subsection (d)(3).

(b) Section 236(f)(3) of the National Housing Act is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1985".

TENANT PARTICIPATION IN MULTIFAMILY HOUSING PROJECTS

SEC. 211. The second sentence of section 202(a) of the Housing and Community Development Amendments of 1978 is amended to read as follows:

"For the purpose of this section, the term 'mulitfamily housing project' means a project which—

"(1)(A) is covered by a mortgage insured or formerly insured under the National Housing Act and is assisted under section 236 of the National Housing Act or under section 101 of the Housing and Urban Development Act of 1965 or (B) is assisted under the proviso of section 221(d)(5) of the National Housing Act;

"(2) met the criteria specified in paragraph (1) before the acquisition of such project by the Secretary and has been sold by the Secretary, subject to a mortgage insured or held by the Secretary and subject to an agreement (in effect during the period of assistance under section 201 of this Act) which provides that the low- and moderate-income character of the project will be maintained; or

"(3) met the criteria specified in paragraph (1) and is owned by the Secretary.".

PREVENTING FRAUD AND ABUSE IN HUD-ASSISTED HOUSING

SEC. 212. (a) Section 303 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(f)(1) The State agency charged with the administration of the State law—

"(A) shall disclose, upon request and on a reimbursable basis, to officers and employees of the Department of Housing and Urban Development and to officers or employees of any public housing agency any of the following information contained in the records of such State agency—

"(i) wage information, not including return information as defined in 26 U.S.C. 6103(b)(2),

"(ii) whether an individual is receiving, has received, or has made application for, unemployment compensation, and the amount of any such compensation being received (or to be received) by such individual,

"(iii) the current (or most recent) home address of such individual, and

"(iv) whether an individual has refused an offer of employment and, if so, a description of the employment so offered and the terms, conditions, and rate of pay therefor, and

"(B) shall establish such safeguards as are necessary (as determined by the Secretary of Labor in regulations) to insure that information disclosed under subparagraph (A) is used only for purposes of determining an individual's eligibility for benefits, or the amount of benefits, under the programs of the Department of Housing and Urban Development.

"(2) Whenever the Secretary of Labor, after reasonable notice and opportunity for hearing to the State agency charged with the administration of the State law, finds that there is a failure to comply substantially with the requirements of paragraph (1), the Secretary of Labor shall notify such State agency that further payments will not be made to the State until he is satisfied that there is no longer any such failure. Until the Secretary of Labor is so satisfied, he shall make no further certification to the Secretary of the Treasury with respect to such State.".

(b) Notwithstanding any other provision of law, the entity responsible for determining eligibility or level of benefits under the United States Housing Act of 1937, section 101 of the Housing and Urban Development Act of 1965, or section 221(d)(3) pursuant to the provision in section 221(d)(5) of 236 of the National Housing Act, including public housing agencies and owners of projects assisted under such programs, shall deny applicants for or participants in such programs eligibility in, or benefits of, the particular program if it determines that an applicant or participant has knowingly (1) submitted incorrect or misleading statements, or concealed or withheld relevant facts in connection with such application or participation, or (2) committed any action which constitutes a violation of these Acts or regulations issued thereunder. Unintentional error or omission on the part of applicants or participants in such programs shall not be a basis for denying eligibility unless, on the basis of accurate and complete information, the applicants or participants would be currently ineligible.

(c) As used in this section—

(1) the term "applicant" shall have such meaning as the Secretary by regulation shall prescribe; and

(2) the term "public housing agency" means any agency described in section 3(b)(6) of the United States Housing Act of 1937.

(d) Section 214(b) of the Housing and Community Development Act of 1980 is amended by striking out all that follows "1937" through "National Housing Act," and inserting in lieu thereof the following: "; section 221(d)(3) pursuant to the proviso in section 221(d)(5), section 235, or section 236 of the National Housing Act;".

TITLE III—PROGRAM AMENDMENTS AND EXTENSIONS

EXTENSION OF FEDERAL HOUSING ADMINISTRATION MORTGAGE INSURANCE PROGRAMS

SEC. 301. (a) Section 2(a) of the National Housing Act is amended by striking out "May 21, 1983" in the first sentence and inserting in lieu thereof "October 1, 1985".

(b) Section 217 of such Act is amended by—

(1) striking out "May 20, 1983" and inserting in lieu thereof "September 30, 1985";

(2) inserting "section 222, section 232," after "section 221,";

(3) inserting "section 242," after "section 236,"; and

(4) inserting "made on or" before "before".

(c) The fifth sentence of section 221(f) of such Act is amended by—

(1) striking out "May 20, 1983" and inserting in lieu thereof "September 30, 1985"; and

(2) inserting "made on or" before "before".

(d) Section 222 of such Act is amended by adding a new subsection at the end thereof as follows:

"(h) No mortgage may be insured under this section after May 20, 1983, except pursuant to a commitment to insure made before that date.".

(e) Section 232 of such Act is amended by adding a new subsection at the end thereof as follows:

"(j) No mortgage may be insured under this section after May 20, 1983, except pursuant to a commitment to insure made before that date.".

(f) Section 235(m) of such Act is amended by striking out "May 20, 1983, except pursuant to a commitment to insure before that date" and inserting in lieu thereof "September 30, 1983".

(g) Section 242 of such Act is amended by adding a new subsection at the end thereof as follows:

"(i) No mortgage may be insured under this section after May 20, 1983, except pursuant to a commitment to insure made before that date.".

(h) The first sentence of section 244(d) of such Act is amended by—

(1) striking out "May 20, 1983" and inserting in lieu thereof "September 30, 1985"; and

(2) inserting "on or" before "before".

(i) The second sentence of section 1002(a) of such Act is amended by—

(1) striking out "May 20, 1983" and inserting in lieu thereof "September 30, 1985"; and

(2) inserting "on or" before "before".

AUTHORIZATION FOR APPROPRIATIONS TO COVER LOSSES TO THE GENERAL INSURANCE FUND

SEC. 302. Section 519(f) of the National Housing Act is amended by—

(1) inserting "such sums as may be necessary" immediately after "appropriated"; and

(2) striking out all that follows "Fund" and inserting in lieu thereof a period.

RESEARCH AUTHORIZATIONS

SEC. 303. The second sentence of section 501 of the Housing and Urban Development Act of 1970 is amended by striking out "and" each time it appears, and inserting immediately after "1982" the following: ", not to exceed $18,000,000 for the fiscal year 1983, not to exceed $18,000,000 for the fiscal year 1984, and such sums as may be necessary for the fiscal year 1985".

CANCELLATION OF DEBT OWED THE TREASURY AND LIQUIDATION OF NEW COMMUNITIES PROGRAM

SEC. 304. (a) In order to provide for the management and orderly liquidation of the assets, and discharge the liabilities, acquired or incurred in connection with the New Communities Program authorized pursuant to title IV of the Housing and Urban Development Act of 1968 and title VII of the Housing and Urban Development Act of 1970 (referred to in this section as "title IV" and "title VII", respectively), the assets and liabilities of the revolving fund authorized under section 717 of title VII are authorized to be transferred to the revolving fund (liquidating programs) established pursuant to title II of the Independent Offices Appropriations Act, 1955. The liquidation of the New Communities Program shall be carried out pursuant to the provisions of law applicable to the revolving fund (liquidating programs) upon enactment of this section and the approval in an appropriation Act of such transfer.

(b) In carrying out the purposes of subsection (a), all monies in the revolving fund (liquidating programs) shall be available for necessary administrative and other expenses of servicing and liquidating obligations guaranteed pursuant to section 403 and section 713 of title IV and title VII, respectively, including costs of services (including legal services) performed on a contract or fee basis, and to discharge any other liability acquired or incurred in connection with the New Communities Program. Notwithstanding any other provision of law relating to the acquisition, handling, improvement, or disposal of real and other property by the United States, the Secretary of Housing and Urban Development shall also have power, for the protection of the interests of the revolving fund (liquidating programs), to pay out of any monies in such fund all expenses or charges in connection with the acquisition, handling, improvement, or disposal of any property, real or personal, acquired by the Secretary either prior or subsequent to the enactment of this section as a result of recoveries under security, subrogation, or other rights in connection with the New Communities Program.

(c) After making the transfer authorized in subsection (a) the Secretary of Housing and Urban Development may issue obligations to the Secretary of the Treasury in an amount sufficient to enable the Secretary of Housing and Urban Development to satisfy any guarantee made pursuant to section 403 or 713 of title IV or title VII, respectively, and otherwise carry out the functions authorized by this section. The obligations issued under this subsection shall have such maturities and bear such rate or rates of interest as shall be determined by the Secretary of the Treasury. The Secretary of the Treasury is authorized and directed to purchase any obligations so issued, and for that purpose the Secretary of Treasury is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, and the purposes for which securities may be issued under that Act are extended to include purchases of the obligations hereunder.

(d) Upon enactment of this section and the approval in an appropriation Act of the

transfer authorized in subsection (a), each obligation issued by the Secretary of Housing and Urban Development to the Secretary of the Treasury pursuant to section 407(a) or 717(b) of title IV or title VII, respectively, together with any promise to repay the principal and unpaid interest which has accrued on each obligation, and any other term or condition specified by each such obligation, is cancelled.

(e) Title IV, except for sections 408, 411, 413, 414, and 416, and Part B of title VII, except for sections 724, 725, 726, and section 727 (b) through (e), are hereby repealed. Section 717 of title VII shall remain in effect until the enactment of this section and the approval in an appropriation act of the transfer authorized in subsection (a). Any actions taken, prior to repeal, under the authority of any of the sections which are repealed by this section shall continue to be valid. Nothing in this subsection (e) shall impair the validity of any guarantees which have been made pursuant to title IV or title VII and any such guarantees shall continue to be governed by the provisions of title IV or title VII, as applicable, as they existed immediately before the effective date of this section.

CANCELLATION OF DEBT OF SPECIAL ASSISTANCE AND EMERGENCY MORTGAGE PURCHASE ASSISTANCE FUNDS OF THE GOVERNMENT NATIONAL MORTGAGE ASSOCIATION

SEC. 305. (a) The Secretary of the Treasury shall, on the effective date of this section and on the first day of each fiscal year thereafter, cancel each obligation issued to such Secretary by the Government National Mortgage Association pursuant to the Association's authority under sections 305 and 313 of the Federal National Mortgage Association Charter Act, without regard to the specified maturation date, any option to redeem or promise to repay, or any other term or condition, and the Association shall thereafter be under no duty to such Secretary to remit any principal or interest payment on account of any such cancelled obligation.

(b) In order to provide for the management and orderly liquidation of assets, and discharge the liabilities acquired or incurred in connection with sections 305 and 313 of the Federal National Mortgage Association Charter Act, the Association shall transfer the assets and liabilities acquired or incurred in connection with such sections to a management and liquidation functions fund established pursuant to section 306 of that Act.

(c)(1) Sections 305 and 313 of the Federal National Mortgage Association Charter Act and section 3(b) of the Emergency Home Purchase Assistance Act of 1974 are hereby repealed.

(2) Any purchase or commitment to purchase any mortgage pursuant to section 305 or 313 of the Federal National Mortgage Association Charter Act made before the effective date of this section, and the servicing and disposition of any such mortgage, shall continue to be governed by the provisions of such sections as they existed immediately before such effective date.

ELIMINATION OF REQUIREMENT THAT FHA INTEREST RATES BE SET BY LAW

SEC. 306. (a) Sections 3 and 4 of Public Law 90-301 are hereby repealed.

(b) The National Housing Act is amended in the following respects:

(1) Section 2(b)(5) is amended to read as follows:

"(5) No insurance shall be granted under this section to any such financial institution with respect to any obligation representing any such loan, advance of credit, or purchase by it unless the obligation has such maturity, bears such insurance premium charges, and contains such other terms, conditions, and restrictions as the Secretary shall prescribe, in order to make credit available for the purpose of this title. Any such obligation with respect to which insurance is granted under this section shall bear interest at such rate as may be agreed upon by the borrower and the financial institution.".

(2) Section 203(b)(5) is amended to read as follows:

"(5) Bear interest at such rate as may be agreed upon by the mortgagor and the mortgagee.".

(3) Section 203(k)(3)(B) is amended to read as follows:

"(B) bear interest at such rate as may be agreed upon by the mortgagor and the mortgagee;".

(4) The first sentence of the first undesignated paragraph of section 207(c)(3) is amended to read as follows: "The mortgage shall provide for complete amortization by periodic payments within such term as the Secretary shall prescribe, and shall bear interest at such rate as may be agreed upon by the mortgagor and the mortgagee.".

(5) The first sentence of section 213(d) is amended to read as follows: "Any mortgage insured under this section shall provide for complete amortization by periodic payments within such term as the Secretary may prescribe but not to exceed forty years from the beginning of amortization of the mortgage, and shall bear interest at such rate as may be agreed upon by the mortgagor and the mortgagee.".

(6) The second sentence of section 220(d)(4) is amended to read as follows: "The mortgage shall bear interest at such rate as may be agreed upon by the mortgagor and the mortgagee and contain such terms and provisions with respect to the application of the mortgagor's periodic payment to amortization of the principal of the mortgage, insurance, repairs, alterations, payment of taxes, default reserves, delinquency charges, foreclosure proceedings, anticipation of maturity, additional and secondary liens, and other matters as the Secretary may in the Secretary's discretion prescribe.".

(7) Section 220(h)(2)(iii) is amended to read as follows:

"(iii) bear interest at such rate as may be agreed upon by the mortgagor and the mortgagee;".

(8) Section 221(d)(5) is amended by striking out "(exclusive" and all that follows through "mortgage market" and inserting in lieu thereof the following: "at such rate as may be agreed upon by the mortgagor and the mortgagee".

(9) Section 231(c)(6) is amended to read as follows:

"(6) bear interest at such rate as may be agreed upon by the mortgagor and the mortgagee; and".

(10) The first sentence of section 234(f) is amended to read as follows: "Any blanket mortgage insured under subsection (d) shall provide for complete amortization by periodic payments within such terms as the Secretary may prescribe but not to exceed forty years from the beginning of amortization of the mortgage, and shall bear interest at such rate as may be agreed upon by the mortgagor and the mortgagee.".

(11) Section 235(i)(3) is amended by—

(A) striking out "and" at the end of subparagraph (D);

(B) striking out the period at the end of subparagraph (E) and inserting in lieu thereof "; and" and

(C) adding the following new subparagraph at the end thereof:

"(F) bear interest at a rate not to exceed such per centum per annum on the amount of the principal obligation outstanding at any time as the Secretary finds necessary to meet the mortgage market, taking into consideration the yields on mortgages in the primary and secondary markets.".

(12) Section 240(c)(4) is amended to read as follows:

"(4) bear interest at such rate as may be agreed upon by the mortgagor and the mortgagee;".

(13) Section 241(b)(3) is amended to read as follows:

"(3) bear interest at such rate as may be agreed upon by the mortgagor and the mortgagee;".

(14) Section 1002(d)(2) is amended to read as follows:

"(2) bear interest at such rate as may be agreed upon by the mortgagor and the mortgagee: *Provided*, That the Secretary may agree to a reasonable extension of the term of a mortgage, the maturity of which is limited by this paragraph to not more than ten years, if the Secretary determines that unusual or unforeseen circumstances make such extension necessary to avoid undue hardship to the mortgagor;".

REPEAL OF SECTION 367(b)(2)(A) OF THE MULTIFAMILY MORTGAGE FORECLOSURE ACT OF 1981

SEC. 307. Section 367(b) of the Multifamily Mortgage Foreclosure Act of 1981 is amended by—

(1) striking out "Except as provided in paragraph (2)(A), the" in paragraph (1) and inserting in lieu thereof "The"; and

(2) striking out "(A)" and all that follows through "(B)" in paragraph (2).

TREATMENT OF FHA SINGLE FAMILY PREMIUMS

SEC. 308. (a) Section 203 of the National Housing Act is amended by adding the following new subsection immediately after subsection (c):

"(d) Notwithstanding any provision of this title governing maximum mortgage amounts for insuring a mortgage secured by a one- to four-family dwelling, the maximum amount of the mortgage determined under any such provision may be increased by the amount of the mortgage insurance premium paid at the time the mortgage is insured.".

(b)(1) The first sentence of section 203(b)(2) of such Act is amended by striking out the following: ": *Provided*, That the foregoing maximum mortgage amounts may be increased by the amount of the mortgage insurance premium paid at the time the mortgage is insured".

(2) Section 213(b)(2) of such Act is amended by striking out the following: ": *Provided further*, That the foregoing maximum mortgage amounts may be increased by the amount of the mortgage insurance premium paid at the time the mortgage is insured".

(3) Section 221(d)(2)(A) of such Act is amended by striking out the following: ": *Provided further*, That the foregoing maximum mortgage amounts may be increased by the amount of the mortgage insurance premium paid at the time the mortgage is insured".

(4) Clause (A) of the third sentence of section 234(c) of such Act is amended by striking out the following: ": *Provided*, That the foregoing maximum mortgage amounts may be increased by the amount of the mortgage

insurance premium paid at the time the mortgage is insured".

(5) Section 235(i) of such Act is amended by—

(A) striking out in paragraph (3)(B) the following: ": *Provided*, That the foregoing maximum mortgage amounts may be increased by the amount of the mortgage insurance premium paid at the time the mortgage is insured";

(B) striking out in paragraph (3)(C) the following: ": *Provided*, That the foregoing maximum mortgage amounts may be increased by the amount of the mortgage insurance premium paid at the time the mortgage is insured"; and

(C) striking out in paragraph (3)(D) the following: ": *Provided*, That the foregoing maximum mortgage amounts may be increased by the amount of the mortgage insurance premium paid at the time the mortgage is insured".

(c)(1) The amendments made by subsection (a) of this section and by sections 201(a)(2), (d)(2), (d)(3) and (f)(4) of the Omnibus Budget Reconciliation Act of 1982 may be implemented only if the Secretary determines that the program of advance payment of insurance premiums, with specific regard to the effect of the provisions authorized by the amendments made by such sections, is actuarially sound.

(2) Section 201(g) of the Omnibus Budget Reconciliation Act of 1982 is hereby repealed.

AUTHORITY TO USE THE MULTIFAMILY MORTGAGE FORECLOSURE ACT OF 1981 FOR MORTGAGES INSURED UNDER THE COINSURANCE PROGRAM

SEC. 309. (a) Section 362 of the Multifamily Mortgage Foreclosure Act of 1981 is amended by—

(1) amending subsection (a)(1) to read as follows:

"(1) disparate State laws governing the foreclosure of mortgages which cover multiunit residential and nonresidential properties and which are held by the Secretary of Housing and Urban Development pursuant to title II of the National Housing Act or section 312 of the Housing Act of 1964 or are insured under the Coinsurance Program contained in section 244 of the National Housing Act burden these programs, and cause detriment to the residents of the affected project and the community generally;";

(2) striking out "Federal" in subsection (a)(2);

(3) amending subsection (a)(3) to read as follows:

"(3) these conditions seriously impair the ability of the Secretary to protect the Federal financial interest in the affected properties, discourage mortgagee participation in the Coinsurance Program, and frustrate attainment of the objectives of the underlying Federal program authorities, as well as the national housing goal of a 'decent home and a suitable living environment for every American family';";

(4) striking out "by the Secretary" in subsection (a)(5);

(5) striking out "the Secretary with" in subsection (a)(6); and

(6) inserting in subsection (b) after "1964" the following: "or held by mortgagees participating in the Coinsurance Program".

(b) Section 363 of such Act is amended by—

(1) amending paragraph (2) to read as follows:

"(2) 'multifamily mortgage' means a mortgage covering any property, except a property on which there is located a one-to-four family residence, which is (A) held by the Secretary pursuant to title II of the National Housing Act or section 312 of the Housing Act of 1964 or (B) insured pursuant to section 244 of the National Housing Act;"; and

(2) redesignating paragraphs (4) through (10) as paragraphs (5) through (11), respectively, and inserting the following new paragraph after paragraph (3):

"(4) 'mortgagee' means the holder of a multifamily mortgage insured pursuant to section 244 of the National Housing Act;".

(c) Section 364 of such Act is amended to read as follows:

"SEC. 364. Multifamily mortgages held by the Secretary or by mortgagees encumbering real estate located in any State may be foreclosed by the Secretary or the mortgagee, as appropriate, in accordance with this part, or pursuant to other foreclosure procedures available, at the option of the holder of the mortgage.".

(d) The second sentence of section 365 of such Act is amended by striking out "Where" and all that follows through "a foreclosure commissioner" and inserting in lieu thereof the following:

"Where the Secretary or a mortgagee is the holder of a multifamily mortgage, the Secretary or, as appropriate and as provided in regulations of the Secretary, the mortgagee may designate a foreclosure commissioner".

(e) Section 366 of such Act is amended by inserting after "Secretary" each place it appears the following: "or the mortgagee, as appropriate,".

(f) Section 367(a) of such Act is amended by inserting after "Secretary" in each of paragraphs (1) and (8) the following: "or the mortgagee, as appropriate".

(g) Section 368 of such Act is amended by—

(1) inserting after "Secretary" the first time it appears in the first sentence of subsection (a) the following: "or the mortgagee"; and

(2) inserting after "Secretary" each other place it appears the following: "or the mortgagee, as appropriate,".

(h) Section 369A of such Act is amended by inserting after "Secretary" each place it appears in subsections (a) and (b) the following: "or the mortgagee, as appropriate,".

(i) Section 369B of such Act is amended by—

(1) inserting the following immediately before the period at the end of the first sentence of subsection (b): "or the mortgagee, as appropriate"; and

(2) inserting after "Secretary" each place it appears in the fourth and fifth sentences of subsection (b) and the first sentence of subsection (c) the following: "or the mortgagee, as appropriate,".

(j) Section 369E(b) of such Act is amended by inserting after "Secretary" the following: "or the mortgagee, as appropriate,".

(k) Section 369F(a)(1) of such Act is amended by inserting after "Secretary" the following: "or the mortgagee, as appropriate".

REPEAL OF REQUIREMENT TO PUBLISH PROTOTYPE HOUSING COSTS FOR ONE- TO FOUR-FAMILY DWELLING UNITS

SEC. 310. The Housing and Community Development Act of 1977 is amended by striking out section 904.

INCREASED LOAN LIMITS FOR MANUFACTURED HOMES AND LOTS UNDER TITLE I OF THE NATIONAL HOUSING ACT

SEC. 311. (a) Section 2(b)(1) of the National Housing Act is amended by—

(1) striking out "$22,500" and all that follows through "modules)" in subparagraph (C) and inserting in lieu thereof "$40,500";

(2) striking out "$35,000" and all that follows through "modules)" in subparagraph (D) and inserting in lieu thereof "$54,000"; and

(3) striking out "such an amount as may be necessary, but not exceeding $12,500," in subparagraph (E) and inserting in lieu thereof "$13,500".

(b) Section 2(b)(2) of such Act is amended by striking out the second sentence and inserting in lieu thereof the following:

"In other areas, the maximum dollar amounts specified in subsections (b)(1)(D) and (b)(1)(E) may be increased on an area-by-area basis to the extent the Secretary deems necessary, but not to exceed the percentage by which the maximum mortgage amount of a one-family residence in the area is increased by the Secretary under section 203(b)(2) of this Act.".

AUTHORITY FOR REFINANCING MANUFACTURED HOMES UNDER TITLE I OF THE NATIONAL HOUSING ACT

SEC. 312. Section 2(b)(6) of the National Housing Act is amended by adding at the end thereof the following new subparagraph:

"(C) The owner-occupant of a manufactured home or a home and lot which was purchased without assistance under this section but otherwise meeting the requirements of this section may refinance such home or home and lot under this section, provided that the home was constructed in accordance with standards established under section 604 of the National Manufactured Housing Construction and Safety Standards Act of 1974.".

CHANGE IN MAXIMUM LOAN-TO-VALUE RATIO FOR MODESTLY PRICED SINGLE FAMILY HOMES

SEC. 313. The first sentence of section 203(b)(2) of the National Housing Act is amended by—

(1) striking out in clause (i) and (ii) "$25,000" each place it appears and inserting in lieu thereof "$50,000"; and

(2) striking out in clause (ii) "95" and inserting in lieu therefore "90".

NONOCCUPANT SINGLE FAMILY MORTGAGORS

SEC. 314. Section 203(b)(8) of the National Housing Act is amended by striking out all that follows "an amount equal to" through "subsection:" and inserting in lieu thereof the following: "the lesser of (A) the otherwise applicable maximum dollar amount prescribed under paragraph (2) of this subsection, or (B) 85 per centum of the appraised value of the property, as of the date the mortgage is accepted for insurance:".

INCREASE IN MORTGAGE INSURANCE PREMIUMS

SEC. 315. Section 203(c) of the National Housing Act is amended by striking out the first sentence and inserting in lieu thereof the following: "The Secretary is authorized to fix premium charges for the insurance of mortgages under or pursuant to the separate sections and subsections of this title: *Provided*, That in the case of any mortgage such charge shall be not less than an amount equivalent to one-fourth of 1 per centum per annum nor more than an amount equivalent to 3 per centum per annum of the amount of the principal obligation of the mortgage outstanding at any time, without taking into account delinquent payments or prepayments: *Provided further*, That any reduced premium charge so fixed and computed may, in the discretion of the Secretary, also be made applica-

ble in such manner as the Secretary shall prescribe to each insured mortgage outstanding under the section or subsections involved at the time the reduced premium charge is fixed.".

SHELL HOME CONSTRUCTION

SEC. 316. (a) Section 203(k)(1) of the National Housing Act is amended by—

(1) striking out "The Secretary may, in order to assist in" in the first sentence and inserting in lieu thereof the following: "In order to assist in (A)";

(2) striking out all that follows "purposes," in the first sentence and inserting in lieu thereof the following: "or (B) the purchase, construction and completion of one-family shell homes, the Secretary is authorized to insure and make commitments to insure rehabilitation loans and shell home mortgage loans made by financial institutions, including advances made during rehabilitation or shell home purchase, construction and completion."; and

(3) adding at the end thereof the following: "Shell home mortgage loans may be insured under this subsection only on a coinsurance basis pursuant to section 244 of this Act, and the number of such loans which may be so insured may not exceed 30,000.".

(b) Section 203(k)(2) of such Act is amended by—

(1) striking out "and" at the end of subparagraph (A)(iii);

(2) striking out the period at the end of subparagraph (B) and inserting in lieu thereof "; and"; and

(3) adding the following new subparagraph at the end thereof:

"(C) the term 'shell home mortgage' means a mortgage loan made for the purpose of financing the costs (including the provision of any necessary materials, appliances and specialized labor) of the purchase and development of a site; the purchase and construction on the site of a one-family shell home, as defined by the Secretary; and the completion of the shell home, which shall be owner-occupied.".

(c) Section 203(k)(3) of such Act is amended by—

(1) striking out "a rehabilitation loan shall" and inserting in lieu thereof "a loan shall";

(2) inserting after "(A)" the following: "(i) in the case of a rehabilitation loan,"; and

(3) inserting the following immediately after subparagraph (A):

"(ii) in the case of a shell home mortgage loan, involve a principal obligation (including such initial service charges, appraisal, inspection, and other fees as the Secretary shall approve) not exceeding the amount specified in subsection (b)(2), except that the Secretary shall establish as the appraised value of the property an amount not to exceed the sum of the appraised value of the site, the estimated costs of site development, and the estimated costs of purchase, construction and completion of the one-family shell home;".

(d) Section 203(k)(4) of such Act is amended by striking out "rehabilitation loan" and inserting in lieu thereof "loan or mortgage".

(e) Section 203(k) of such Act is amended by adding at the end thereof the following:

"(6) For the purpose of making one-family shell homes insured under this subsection more affordable to borrowers, the Secretary shall, to the maximum extent feasible, encourage borrowers to contribute the value of their labor as equity in the property.".

PAYMENT OF CLAIMS WITHOUT HUD ACQUISITION OF TITLE

SEC. 317. (a) Section 204(a) of the National Housing Act is amended by—

(1) striking out "Upon such conveyance and assignment" in the second sentence and inserting in lieu thereof the following: "The Secretary is also authorized, in accordance with such regulations as the Secretary may prescribe, to make the benefit of the insurance as hereinafter provided available to the mortgagee, notwithstanding any provision of this section requiring conveyance of title to the property to the Secretary, (1) upon sale of the insured property at foreclosure, where such sale is for at least the fair market value of the property (with appropriate adjustments), as determined by the Secretary, and (2) upon the assignment to the Secretary of all claims referred to in clause (2) of the preceding sentence. The payment of benefits under the preceding sentence may be made for any mortgage insured pursuant to the commitment to insure issued on or after the effective date of the Housing and Community Development Act of 1983 and, with the approval of the mortgage, for any mortgage insured pursuant to a commitment issued before that date. Upon the conveyance and assignment referred to in the first sentence of this section or the sale and assignment referred to in the second sentence of this subsection,"; and

(2) striking out "and any amount" and all that follows through the colon immediately preceding the first proviso of the final sentence and inserting in lieu thereof the following: "any amount received as rent or other income from the property, less reasonable expenses incurred in handling the property, after either of such dates, and, in the case of insurance benefits paid in accordance with the second sentence of this section, any amount received upon the foreclosure sale of the property:".

(b) Section 204(j) of such Act is amended by inserting after "under section 203" the following: "(other than a mortgagee receiving insurance benefits under the second sentence of subsection (a))".

DISCRETIONARY AUTHORITY TO REGULATE RENTS OR CHARGES

SEC. 318. (a) Section 207(b)(2) of the National Housing act is amended by—

(1) striking out "any other mortgagor approved by the Secretary" and all that follows through "reasonable return on the investment." and inserting in lieu thereof the following: "any other mortgagor approved by the Secretary. The Secretary may, in the Secretary's discretion, require any such mortgagor to be regulated or restricted as to rents or sales, charges, capital structure, rate of return, and methods of operation so as to provide reasonable rentals to tenants and a reasonable return on the investment. Any such regulations or restrictions shall continue for such period or periods as the Secretary, in the Secretary's discretion, may require, including until the termination of all obligations of the Secretary under the insurance and during such further period of time as the Secretary shall be the owner, holder, or reinsurer of the mortgage.";

(2) striking out "render effective the regulations or restrictions" and inserting in lieu thereof "render effective any such regulations or restrictions"; and

(3) striking out "and directed" in the second sentence of the first undesignated paragraph.

(b) Section 234(d)(2) of such Act is amended by—

(1) striking out "shall be regulated or restricted by the Secretary" and inserting in lieu thereof "may, in the Secretary's discretion, be regulated or restricted"; and

(2) striking out "the regulation and restriction" and inserting in lieu thereof "any such regulation or restriction".

MORTGAGE INSURANCE FOR MANUFACTURED HOME PARKS FOR THE ELDERLY

SEC. 319. The first sentence of the second undesignated paragraph of section 207(b) of the National Housing Act is amended by striking out "no mortgage shall be insured hereunder" and inserting in lieu thereof the following: "the Secretary shall not insure any mortgage under this section (except a mortgage with respect to a manufactured home park designed exclusively for occupancy by elderly persons)".

REMOVAL OF REFINANCING LIMITATIONS ON CERTAIN MULTIFAMILY PROJECTS

SEC. 320. (a) Section 220(d)(3)(B)(ii) of the National Housing Act is amended by striking out "*Provided further,*", the first time it appears, and all that follows through "property or project:".

(b) Section 221(d)(3)(iii) of such Act is amended by—

(1) striking out "*Provided,* That" and all that follows through "property or project:"; and

(2) striking out "*further*" the first time it appears.

(c) Section 221(d)(4)(iv) of such Act is amended by—

(1) striking out "*Provided,* That" and all that follows through "property or project:"; and

(2) striking out "*further*" the first time it appears.

ASSIGNMENT OF SECTION 221(g)(4) MORTGAGES TO GNMA

SEC. 321. Section 221(g)(4) of the National Housing Act is amended by inserting "(A)" after the paragraph designation "(4)" and by adding the following new subparagraph at the end thereof:

"(B) In processing a claim for insurance benefits under this paragraph, the Secretary is authorized to direct the mortgagee to assign, transfer and deliver the original credit instrument and the mortgage securing it directly to the Government National Mortgage Association in lieu of assigning, transferring and delivering the credit instrument and the mortgage to the Secretary. Upon the assignment, transfer and delivery of the credit instrument and the mortgage to the Association, the mortgage insurance contract shall terminate and the mortgagee shall receive insurance benefits as provided in subparagraph (A). The Association is authorized to accept such loan documents in its own name and to hold, service and sell such loans as agent for the Secretary. The mortgagor's obligation to pay a service charge in lieu of a mortgage insurance premium shall continue as long as the mortgage is held by the Association or by the Secretary. The Secretary shall have the same authority with respect to mortgages assigned to the Secretary or the Association under this subparagraph as provided by section 223(c).".

REPEAL OF SECTION 221 BUY-BACK PROVISION

SEC. 322. The first sentence of section 221(g)(4)(A) of the National Housing Act, as redesignated by section 321 of this Act, is amended by inserting immediately after "this section" the following: "pursuant to a commitment to insure entered into before

the effective date of the Housing and Community Development Act of 1983".

ELIMINATE EXISTING RESTRAINTS ON FHA INSURANCE FOR CONDOMINIUM UNITS

SEC. 323. The first sentence of section 234(c) of the National Housing Act is amended by—

(1) striking out "(1)" after "if"; and

(2) striking out ", (2)" and all that follows up to the period at the end thereof.

GRADUATED PAYMENT MORTGAGES FOR MULTIFAMILY AND SINGLE FAMILY HOUSING

SEC. 324. Section 245 of the National Housing Act is amended by—

(1) striking out subsections (a) and (b) and inserting in lieu thereof the following:

"(a) The Secretary may insure under any provision of this title mortgages and loans with provisions of varying rates of amortization corresponding to anticipated variations in family or, as appropriate, project income, to the extent the Secretary determines such mortgages or loans (1) have promise for expanding housing opportunities or meet special needs, (2) can be developed to include any safeguards for mortgagors, tenants or purchasers that may be necessary to offset special risks of such mortgages, and (3) have a potential for acceptance in the private market. A mortgage or loan may not be insured pursuant to this section after September 30, 1985, except pursuant to a commitment entered into on or before that date.

"(b) Notwithstanding any other provision of this title, the principal obligation of a mortgage or loan insured pursuant to this section involving property upon which there is located a dwelling designed principally for occupancy by one to four families—

"(1) shall not initially exceed the percentage of the initial appraised value of the property specified in section 203(b) of this title as of the date the mortgage or loan is accepted for insurance; and

"(2) thereafter (incuding all interest to be deferred and added to principal) (A) shall not at any time be scheduled to exceed 97 per centum, or, if the mortgagor is a veteran, such higher percentage as is provided under section 203(b)(2) for veterans, of the projected value of the property, and (B) shall not exceed 113 per centum of the initial appraised value of the property.

"(c) Notwithstanding any other provision of this title, the principal obligation of a mortgage or loan insured pursuant to this section involving property upon which there are located five or more dwelling units—

"(1) shall not initially exceed the percentage of value or replacement cost required by the provision under which the property is insured; and

"(2) thereafter (including all interest to be deferred and added to principal) shall not at any time be scheduled to exceed 100 per centum of the projected value of the property.

"(d) For purposes of this section, the Secretary shall calculate the projected value of the property by increasing the initial value of the property, as determined by the Secretary, at a rate not in excess of 2½ per centum per annum."; and

(2) redesignating subsection (c) as subsection (e).

ADJUSTABLE RATE MORTGAGES FOR SINGLE FAMILY HOUSING

SEC. 325. Title II of the National Housing Act is amended by adding at the end thereof the following new section:

"ADJUSTABLE RATE SINGLE FAMILY MORTGAGES

"SEC. 247. (a) The Secretary may insure under any provision of this title a mortgage involving property upon which there is located a dwelling designed principally for occupancy by one to four families, where the mortgage provides for periodic adjustments by the mortgagee in the effective rate of interest charged. These interest rate adjustments may be accomplished through adjustments in the monthly payment amount, the outstanding principal balance, or the mortgage term, or a combination of these factors, except that in no case may any extension of a mortgage term result in a total term in excess of 40 years. Adjustments in the effective rate of interest shall correspond to a specified national interest rate index approved in regulations by the Secretary, information on which is readily accessible from published sources. Adjustments in the effective rate of interest shall (1) be made on an annual basis; (2) be limited, with respect to any single interest rate increase, to no more than 1 per centum on the outstanding loan balance; and (3) be limited to a maximum increase of 5 percentage points above the initial contract interest rate over the term of the mortgage. A mortgage may not be insured pursuant to this section after September 30, 1985, except pursuant to a commitment entered into on or before that date.

"(b) The Secretary shall issue regulations requiring that the mortgagee make available to the mortgagor, at the time of loan application, a written explanation of the features of the adjustable rate mortgage, including, but not limited to, a hypothetical payment schedule which displays the maximum potential increases in monthly payments to the mortgagor over the first five years of the mortgage term.

"(c) The number of mortgages and loans insured pursuant to this section in any fiscal year may not exceed 125,000 mortgages.".

SHARED APPRECIATION MORTGAGES FOR SINGLE FAMILY HOUSING

SEC. 326. Title II of the National Housing Act is amended by adding at the end thereof the following new section:

"SHARED APPRECIATION MORTGAGES FOR SINGLE FAMILY HOUSING

"SEC. 248. (a) Notwithstanding any provision of this title which is inconsistent with this section, the Secretary may insure, under any provision of this title providing for insurance of mortgages on properties upon which there is located a dwelling designed principally for occupancy by one- to four-families or providing for insurance of mortgages on the stock allocated to dwelling units in residential cooperative housing corporations, a mortgage secured by a first lien on such property or such stock, which (1) provides for the mortgagee to share in a predetermined percentage of the net appreciated value of the property or stock; (2) provides for amortization over a period of not to exceed thirty years, but the actual term of the mortgage (excluding any refinancing) may be not less than ten nor more than thirty years, and contains such provisions relating to refinancing of the principal balance and any contingent deferred interest as the Secretary may prescribe; and (3) meets such other conditions, including limitations on the rate of interest which may be charged, as the Secretary may require by regulation. A mortgage may not be insured pursuant to this section after September 30, 1985, except pursuant to a commitment entered into on or before that date.

"(b) The mortgagee's share of a property's or stock's net appreciated value shall be payable upon sale or transfer (as defined by the Secretary) of the property or stock or payment in full of the mortgage, whichever occurs first. For purposes of this section, the term 'net appreciated value' means the amount by which the sales price of the property or stock (less the mortgagor's selling costs) exceeds the value of the property or stock at the time the commitment to insure is issued (with adjustments for capital improvements stipulated in the loan contract). If there has been no sale or transfer at the time the mortgagee's share of net appreciated value becomes payable, the sales price for purposes of this section shall be determined by means of an appraisal conducted in accordance with procedures approved by the Secretary and provided for in the mortgage.

"(c) In the event of a default, the mortgagee shall be entitled to receive the benefits of insurance in accordance with section 204(a) of this title, but such insurance benefits shall not include the mortgagee's share of net appreciated value. The term 'original principal obligation of the mortgagee' as used in section 204 shall not include the mortgagee's share of net appreciated value.

"(d) The Secretary shall prescribe adequate consumer protections and disclosure requirements with respect to mortgages insured under this section, and may prescribe such other terms and conditions as may be appropriate to carry out the provisions of this section.

"(e) Mortgages insured pursuant to this section which contain provisions for sharing appreciation or which otherwise require or permit increases in the outstanding loan balance which are authorized under this section or under applicable regulations shall not be subject to any State constitution, statute, court decree, common law, rule or public policy limiting or prohibiting increases in the outstanding loan balance after execution of the mortgage.

"(f) The number of mortgages insured pursuant to this section in any fiscal year may not exceed 50,000.".

SHARED APPRECIATION MORTGAGES FOR MULTIFAMILY HOUSING

SEC. 327. (a) Title II of the National Housing Act is amended by adding at the end thereof the following new section:

"SHARED APPRECIATION MORTGAGES FOR MULTIFAMILY HOUSING

"SEC. 249. (a) Notwithstanding any provision of this title which is inconsistent with this section, the Secretary may insure, under any provision of this title providing for insurance of mortgages on properties including five or more family units, a mortgage secured by a first lien on the property which (1) provides for the mortgagee to share in a predetermined percentage of the property's net appreciated value and (2) meets such other conditions, including limitations on the rate of interest which may be charged, as the Secretary may require by regulation. A mortgage may not be insured pursuant to this section after September 30, 1985, except pursuant to a commitment entered into on or before that date.

"(b) The mortgagee's share of a property's net appreciated value shall be payable upon maturity or upon payment in full of the loan or sale or transfer (as defined by the Secretary) of the property, whichever occurs first. The term of the mortgage shall not be less than 15 years, and shall be repayable in equal monthly installments of principal and fixed interest during the mortgage term in an amount which would be sufficient to retire a debt with the same

principal and fixed interest rate over a period not exceeding thirty years. In the case of a mortgage which will not be completely amortized during the mortgage term, the principal obligation of the mortgage may not exceed 85 per centum of the estimated value of the property or project. For purposes of this section, the term 'net appreciated value' means the amount by which the sales price of the property (less the mortgagor's selling costs) exceeds the value (or replacement cost, as appropriate) of the property at the time the commitment to insure is issued (with adjustments for capital improvements stipulated in the loan contract). If there has been no sale or transfer at the time the mortgagee's share of net appreciated value becomes payable, the sales price for purposes of this section shall be determined by means of an appraisal conducted in accordance with procedures approved by the Secretary and provided for in the mortgage.

"(c) In the event of a default, the mortgagee shall be entitled to receive the benefits of insurance in accordance with section 207(g) of this title, but such insurance benefits shall not include the mortgagee's share of net appreciated value. The term 'original principal face amount of the mortgage' as used in section 207(g) shall not include the mortgagee's share of net appreciated value.

"(d) The Secretary shall establish by regulation the maximum percentage of net appreciated value which may be payable to a mortgagee as the mortgagee's share. The Secretary shall also establish disclosure requirements applicable to mortgagees making mortgage loans pursuant to this section, to assure that mortgagors are informed of the characteristics of such mortgages.

"(e) Mortgages insured pursuant to this section which contain provisions for sharing appreciation or which otherwise require or permit increases in the outstanding loan balance which are authorized under this section or under applicable regulations shall not be subject to any State constitution, statute, court decree, common law, rule or public policy limiting or prohibiting increases in the outstanding loan balance after execution of the mortgage.".

(b) The first sentence of the first undesignated paragraph of section 207(c)(3) of such Act is amended by inserting immediately after "periodic payments" the following: "(unless otherwise approved by the Secretary)".

(c) Section 220(d)(4) of such Act is amended by inserting after "periodic payments" the following: "(unless otherwise approved by the Secretary)".

(d) Section 221(d)(6) of such Act is amended by inserting after "periodic payments" the following: "(unless otherwise approved by the Secretary)".

(e) Section 231(c)(5) of such Act is amended by inserting after "periodic payments" the following: "(unless otherwise approved by the Secretary)".

DEMONSTRATION AUTHORITY TO INSURE HOME EQUITY CONVERSION MORTGAGES FOR ELDERLY HOMEOWNERS

SEC. 228. Title II of the National Housing Act is amended by adding at the end thereof the following new section:

"DEMONSTRATION AUTHORITY TO INSURE HOME EQUITY CONVERSION MORTGAGES FOR ELDERLY HOMEOWNERS

"SEC. 250. (a) The purpose of this section is to authorize a demonstration mortgage insurance program designed to—

"(1) meet the special needs of elderly homeowners by reducing the effect of economic hardship caused by the rising costs of meeting health, housing and subsistence needs at a time of reduced income, through the insurance of home equity conversion mortgages to permit the conversion of a portion of accumulated home equity into liquid assets;

"(2) encourage and increase the involvement of mortgagees and secondary market participants (lenders and investors) in the making and servicing of home equity conversion mortgages for elderly homeowners; and

"(3) permit the evaluation of data to determine—

"(A) the extent of the need and demand among elderly homeowners for insured and uninsured home equity conversion mortgages;

"(B) the types of home equity conversion mortgages which best serve the needs and interests of elderly homeowners, the Federal government and lenders; and

"(C) the appropriate scope and nature of participation by the Secretary in connection with home equity conversion mortgages for elderly homeowners.

"(b) For purposes of this section—

"(1) The terms 'elderly homeowner' and 'homeowner' mean any homeowner (or homeowners) at least 65 years old or such higher age as the Secretary may prescribe.

"(2) The term 'home equity conversion mortgage' means a loan, secured by a first lien on the property, which provides for periodic and/or lump sum payments to the homeowners based upon accumulated equity and which may provide for a fixed or variable term or for future sharing, between the lender and the homeowner, of the equity or appreciation in the value of the property. Such mortgages shall provide that—

"(A) the loan becomes due on the earlier of a specified date after disbursement of the full principal amount or when a specified event occurs, such as sale of the property or death of the homeowner;

"(B) periodic payments, if provided for in the mortgage instrument, are made directly by the lender or are made through purchase of an annuity from an insurance company authorized to engage in such business and supervised by the State in which it is incorporated; and are made monthly or upon such terms as agreed to by the parties;

"(C) lump sum payments, if provided for in the mortgage instrument, are used by the homeowner to purchase a deferred annuity or to pay for major housing or other needs as determined by the homeowner;

"(D) prepayment in whole or in part may be made without penalty at any time during the term of the loan; and

"(E) the interest rate may be fixed or adjusted periodically as may be agreed upon by the mortgagor and the mortgagee.

"(c) The Secretary is authorized, upon application by the mortgagee, to insure as hereinafter provided any home equity conversion mortgage which is eligible for insurance as hereinafter provided, and, upon such terms and conditions as the Secretary may prescribe, to make commitments for the insurance of such mortgages prior to the date of their execution or disbursement thereon to the extent that the Secretary determines such mortgages—

"(1) have promise for improving the financial situation or otherwise meeting the special needs of elderly homeowners;

"(2) can be developed to include any safeguards for mortgagors that may be necessary to offset the special risks of such mortgages; and

"(3) have a potential for acceptance in the private market.

"(d) To be eligible for insurance under this section, a mortgage shall—

"(1) have been made to, and be held by, a mortgagee approved by the Secretary as responsible and able to service the mortgage properly;

"(2) have been executed by a mortgagor who qualifies as an elderly homeowner and meets requirements prescribed by the Secretary;

"(3) be secured by a property which is designed principally as a one-family residence and which is occupied by the mortgagor;

"(4) involve a principal obligation (including such initial service charges, appraisal, inspections, and other fees as the Secretary shall approve, and all interest to be deferred and added to the principal) which does not exceed the lesser of the maximum area dollar limitation for a one-family residence set forth in section 203(b)(2) of this Act and 90 per centum of the appraised value of the property as of the date the mortgage is accepted for insurance;

"(5) permit an interest rate to be fixed or adjusted periodically as may be agreed upon by the mortgagor and the mortgagee;

"(6) contain provisions for full satisfaction of the obligation satisfactory to the Secretary; and

"(7) contain such terms and provisions with respect to insurance, repairs, alterations, payment of taxes, default reserve, delinquency charges, foreclosure proceedings, anticipation of maturity, additional and secondary liens, and other matters as the Secretary may prescribe.

"(e) The mortgage shall be eligible to receive the benefits of insurance as provided in section 204(a) of this Act with respect to mortgages insured under this section (except that in the case of a mortgage providing for shared appreciation, the insurance benefits shall not include the mortgagee's share of net appreciated value and the term 'original principal obligation of the mortgage' as used in section 204 shall not include the mortgagee's share of net appreciated value), and the provisions of subsections (b), (c), (d), (e), (f), (g), (h), (j), and (k) of section 204 of this Act shall be applicable to such mortgages insured under this section, except that all references therein to the Mutual Mortgage Insurance Fund or the Fund shall be construed to refer to the General Insurance Fund and all references therein to section 203 shall be construed to this section.

"(f) The Secretary shall require that the mortgagee make available to the homeowners, at the time of loan application, a written explanation of the features of the home equity conversion mortgage. The explanation may include, but is not limited to, its effect on tax and estate planning and homeowner eligibility for governmental benefits and other assistance.

"(g) No mortgage may be insured under this section after September 30, 1986 except pursuant to a commitment to insure issued on or before that date. The total number of mortgages insured under this section may not exceed 1,000.

"(h) The Secretary is authorized to (1) enter into such contracts and agreements with Federal, State and local units of government, public and private entities and others as the Secretary determines to be necessary or desirable to carry out the purposes of this section, and (2) make such in-

vestigations and studies of data and publish and distribute such reports, as the Secretary determines to be appropriate.

"(i) Mortgages insured and authorized under this section and applicable regulations which contain or set forth provisions pertaining to (1) sharing appreciation, (2) increases in the outstanding balance after execution of the mortgage (including but not limited to adding deferred interest to principal), (3) disbursement of mortgage proceeds over an extended term, or (4) setting of a due date in relation to the earliest of a specified event shall not be subject to any State constitution, statute, court decree, common law, rule or public policy (1) limiting or prohibiting (A) sharing appreciation, (B) increases in the outstanding balance after execution of the mortgage, or (C) disbursement of mortgage proceeds over an extended time, or (2) requiring that the term of the mortgage be fixed.

"(j) Notwithstanding any other provisions of law, and in order to further the purposes of the demonstration program authorized by this section, the Secretary is authorized to take any action necessary to provide the mortgagor with funds to which he or she is entitled under the insured mortgage or ancillary contracts but has not received because of the default of the party responsible for payment, and to obtain repayment of such disbursements so provided from any source. Such actions may include, but are not limited to: (1) disbursing such funds to the mortgagor from the General Insurance Fund; (2) accepting an assignment of the insured mortgage notwithstanding that the mortgagor is not in default under its terms, and calculating the amount and making the payment of the insurance claim on such assigned mortgage; (3) requiring a junior mortgage from the mortgagor at any time in order to secure repayments of any funds advanced or to be advanced to the mortgagor; (4) requiring a subrogation to the Secretary of the rights of any parties to the transaction against any defaulting parties; (5) imposing premium charges; and (6) preempting any State or local law which may prohibit or limit any of the actions enumerated in items (1) through (5) of this subsection."

STRUCTURAL DEFECTS IN VA-APPROVED, FHA-INSURED NEW HOMES

SEC. 329. Section 518(a) of the National Housing Act is amended by striking out "approved for mortgage insurance prior to the beginning of construction which he finds" and inserting in lieu thereof the following:

"which, before the beginning of construction, was approved for mortgage insurance under this Act or for guaranty, insurance, or a direct loan under chapter 37 of title 38, United States Code, and which the Secretary finds".

TIME OF PAYMENT OF MORTGAGE INSURANCE PREMIUMS

SEC. 330. Section 530 of the National Housing Act is amended by—

(1) striking out "promptly upon their receipt from the borrower" and inserting in lieu thereof the following:

"(A) in the case of loans or mortgages respecting one- to four-family residences, promptly upon their receipt from the borrower and (B) in any other case, promptly when due to the Secretary";

(2) inserting "or due date, as appropriate," immediately after "such receipt"; and

(3) inserting "or after the due date, as appropriate," immediately before "and ending".

SINGLE FAMILY MORTGAGE INSURANCE ON INDIAN RESERVATIONS AND HAWAIIAN HOME LANDS

SEC. 331. Title V of the National Housing Act is amended by adding the following new section at the end thereof:

"SINGLE FAMILY MORTGAGE INSURANCE ON INDIAN RESERVATIONS AND HAWAIIAN HOME LANDS

"SEC. 533. (a) The Secretary, subject to such special conditions as the Secretary may prescribe, is authorized to insure under any provision of title II of this Act which authorizes such insurance, a mortgage covering a property upon which there is located a one- to four-family residence, without regard to limitations in this Act relating to marketability of title or any other statutory restriction which the Secretary determines is contrary to promoting the availability of such insurance on Indian reservations or Hawaiian home lands if—

"(1) the mortgage (A) is executed by an Indian tribe and the property is located on an Indian reservation; or (B) is executed by a member of an Indian tribe who will use the property as a principal residence and by an Indian tribe as comortgagors, and the property is located on an Indian reservation; or (C) is executed in connection with a property assisted under section 202(a) of the Housing and Community Development Act of 1983; or

"(2) The mortgage is executed by a native Hawaiian on property located within Hawaiian home lands where such property will be used as the mortgagor's principal residence and the Department of Hawaiian Home Lands of the State of Hawaii is a comortgagor or guarantees to reimburse the Secretary for any mortgage insurance claim paid in connection with a property on Hawaiian home lands or offers other security acceptable to the Secretary.

Notwithstanding any other provision of this Act, the insurance of a mortgage using the authority contained in this section shall be the obligation of the General Insurance Fund created pursuant to section 519 of this Act. The mortgagee shall be eligible to receive the benefits of insurance as provided in section 204 of this Act with respect to mortgages insured pursuant to this section, except that all references therein to the Mutual Mortgage Insurance Fund or the Fund shall be construed to refer to the General Insurance Fund and all references therein to section 203 shall be construed to refer to the section under which the mortgage is insured.

"(b) Notwithstanding any other provision of this Act, with respect to mortgages covering a property upon which there is located a one- to four-family residence—

"(1) the Secretary may insure and make commitments to insure under title II of this Act pursuant to this section advances made during construction where the Secretary determines the proposed construction is otherwise acceptable and determines no feasible financing alternative is available; and

"(2) the Secretary may require an Indian tribe, as a condition of insurance made under title II of this Act pursuant to this section, to pledge income from tribal resources or tribal assets or pledge Federal grants to be used to reimburse the Secretary for any mortgage insurance claims paid in connection with residences insured pursuant to this section; and

"(3) the applicable percentage limitation on the amount of the principal obligation of a mortgage based on the appraised value or replacement cost, as appropriate, of a one- to four-family owner-occupied residence contained in title II of this Act shall apply in the case of all mortgages insured pursuant to this section without regard to whether the residences are owner-occupied.

"(c) As used in this section—

"(1) The term 'Indian tribe' means any Indian tribe, band, nation or Alaskan Native Village recognized by the Secretary of the Interior as eligible for services because of its status as such an entity, or in the case of a mortgage insured under section 203(q), an Indian tribe as defined in section 202(a) of the Housing and Community Development Act of 1983; and

"(2) The term 'Indian reservation' means (A) that area of land, as defined by the Secretary of the Interior, over which an Indian tribe is recognized by the United States as having governmental jurisdiction, (B) land held in trust for the benefit of any Indian tribe or individual or held by any Indian tribe or individual subject to a restriction by the United States against alienation, or (C) land acquired by Alaska natives under the Alaska Native Claims Settlement Act or any other land acquired by Alaska natives pursuant to statute by virtue of their unique status as Alaska natives;

"(3) The term 'native Hawaiian' means any descendant of not less than one-half part of the blood of the races inhabiting the Hawaiian Islands previous to 1778; and

"(4) The term 'Hawaiian home lands' means all lands given the status of Hawaiian home lands under the provisions of section 207 of the Hawaiian Homes Commission Act, 1920.".

REPEAL OF AUTHORITY TO MAKE GRANTS OR CONTRACTS FOR HOUSING COUNSELING ASSISTANCE

SEC. 332. (a) Section 106(a)(1) of the Housing and Urban Development Act of 1968 is amended by striking out ", or contract with public or private organizations to provide,".

(b) Section 106(a)(2) of such Act is amended to read as follows:

"(2) The Secretary is authorized to provide information, advice and technical assistance to private and public organizations with special competence and knowledge in counseling low- and moderate-income families to assist such organizations in providing the counseling and advice described in clause (iii) of paragraph (1) of this subsection.".

(c) Sections 101(e) and 106(a)(3) of such Act are hereby repealed.

(d) Section 230(d) of the National Housing Act is hereby repealed.

PROHIBITION ON USE OF FHA COINSURANCE IN CONNECTION WITH TAX-EXEMPT OBLIGATIONS

SEC. 333. Section 244 of the National Housing Act is amended by adding the following new subsection at the end thereof:

"(h) With respect to any obligation which is issued by or on behalf of any State, political subdivision, or governmental entity, the proceeds of which are used to finance mortgages insured pursuant to this section, the interest paid on any such obligation and received by the purchaser thereof (or the purchaser's successors in interest) shall be included in gross income for purposes of chapter 1 of the Internal Revenue Code of 1954, as amended. The preceding sentence shall apply only with respect to obligations the proceeds of which are used to finance mortgages insured pursuant to this section pursuant to commitments issued on or after the effective date of section 333 of the Housing and Community Development Act of 1983."

[Section-by-Section Explanation and Justification]

TITLE I—COMMUNITY AND NEIGHBORHOOD DEVELOPMENT

AUTHORIZATIONS—TITLE I OF THE HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1974

Section 101 of the bill would provide funding authorizations for fiscal years 1984, 1985 and 1986 for the three existing grant programs contained in title I of the Housing and Community Development Act of 1974—the Community Development Block Grant (CDBG) Program, the Secretary's Discretionary Fund and the Urban Development Action Grant (UDAG) Program—as well as for the Rental Rehabilitation Program proposed in section 102 of the bill.

Subsection (a) would amend section 103 of the Act to provide an overall title I authorization of $3.846 billion for fiscal year 1984 and $4.09 billion for each of fiscal years 1985 and 1986.

Subsection (b) would amend section 107 to make up to $100.5 million available for the Secretary's Discretionary Fund from amounts authorized under section 103 for each of fiscal years 1984-1986, of which $75,000,000 for each year would be available for grants to Indian tribes. The fiscal year 1983 funding level is $56.5 million. Of the 1983 amount, approximately $31 million is being made available for Indian tribes. This would be increased by $44 million for each of fiscal years 1984-1986 to provide a total of $75 million from the Secretary's Fund for the CDBG portion of the Department's Indian Housing Initiative proposed in this bill.

Subsection (c) would amend section 119 of the Act to make available from amounts authorized under section 103 up to $196 million for fiscal year 1984 and up to $440 million for each of fiscal years 1985 and 1986 for action grants. For the UDAG Program, the President has proposed deferring $244 million in unobligated fiscal year 1981 and 1982 funds to fiscal year 1984. When these funds are added to the $196 million requested for fiscal year 1984, the total is $440 million. Thus, the program level would be the same for fiscal year 1984 as the past and as planned for fiscal years 1985 and 1986.

The Rental Rehabilitation funding authorization of up to $150 million out of the amount authorized under section 103 for each of fiscal years 1984-1986 is contained in section 102 of the bill.

RENTAL REHABILITATION

Section 102 would amend title I of the Housing and Community Development Act of 1974 to create a new Rental Rehabilitation Program. This new initiative will help preserve the Nation's rental housing stock in low- and moderate-income neighborhoods and assist very low-income tenants. The need for rental rehabilitation is clear: of 27 million renter-occupied units in the Nation, 1.8 million are seriously deficient and another 2.6 million have significant inadequacies. Furthermore, continuing deterioration and abandonment of rental units is accelerating the decline of many urban neighborhoods.

In order to provide low-income housing assistance at a fraction of previous costs, the Department proposes to rely primarily on the Section 8 Housing Payment Certificate Program to bridge the "affordability gap" for very low-income renters in the private market. To ensure that the housing payment certificate approach works smoothly, a supporting program to rehabilitate rental units is necessary. The Rental Rehabilitation Program will answer the concern expressed by some that certificate assistance will be inadequate because affordable units will not be available to certificate holders. By providing States and local governments with the ability to produce modestly rehabilitated units where needed, the new initiative will minimize the occurrence of localized rental unit shortages which may otherwise occur within some markets and neighborhoods.

The proposed Rental Rehabilitation Program addresses the need to upgrade residential rental properties through allocations to larger cities, urban counties, and States of both cash grants (Rental Rehabilitation Grants) and contract authority for rental assistance payments for tenants (Section 8 Housing Payment Certificates). The new initiative would replace HUD's current Section 312 Rehabilitation Loan and Section 8 Moderate Rehabilitation Programs.

(1) Rental Rehabilitation Grants, allocated on a needs basis, would be used by local and State governments to help reduce owners' costs of rehabilitating residential rental properties in low- and moderate-income neighborhoods. This reduced-cost financing would make rehabilitation feasible in those areas where the after-rehabilitation, free-market rent for units will be affordable to persons receiving rental assistance through Section 8 Housing Payment Certificates.

(2) The Section 8 Housing Payment Certificate Program would offer very low-income tenants the opportunity to lease rehabilitated units and other standard housing stock at rental payments which they can afford. Contract authority for certificates for use in connection with Rental Rehabilitation Programs would be allocated for local and State governments in the same proportion as their rental rehabilitation grants.

Rental rehabilitation grants are to be used in low- and moderate-income neighborhoods, selected according to locally established criteria. Grants to local and State governments will have no restrictions regarding the number of units in buildings to be rehabilitated; unlike most previous HUD programs, no distinction is made between single family and multifamily properties. All rehabilitated structures and units must meet the housing quality standards to be prescribed by the Secretary for the Section 8 Housing Payment Certificate Program. Local and State governments are given broad discretion in providing rental rehabilitation funds to individual property owners. For example, the funds may be given as outright grants (reducing the rehabilitation funds which property owners need to obtain from private sources), deferred payment loans (to be repaid on sale of the building), or low-interest loans repayable to the public agency.

In order to encourage a high level of participation by private lenders in project financing and underwriting, assistance provided under the new program may not exceed 50 percent of the cost of rehabilitating each individual property. If additional public funds are needed to meet local and State program objectives, Community Development Block Grants or other public moneys may be used to further assist individual projects.

Key features of the new program are the separation of the rehabilitation and rental subsidies, and a reliance on private market forces to encourage owner participation and availability of rehabilitated units for very low-income families. Unlike HUD's current Section 8 Moderate Rehabilitation Program, the Rental Rehabilitation Program would not require property owners receiving assistance to agree to rent limitations and guaranteed low-income occupancy imposed by government in connection with the program. Instead, a program performance standard would encourage participating governments to select neighborhoods and properties in which eighty percent of initial after-rehabilitation market rents (i.e., rents without special program rent limits) will fall below the applicable payment standard for housing payment certificates, and thus be affordable to very low-income tenants holding certificates.

Consistent with the general rules of the Section 8 Housing Payment Certificate Program, tenants receiving certificates under the rental rehabilitation initiative may live in units of their choice. Thus, they may elect to remain in units rehabilitated under the program or to move to any dwelling of their choice. This means that long-term, low-income occupancy in rehabilitated structures is not guaranteed through the new program. However, the performance standard on after-rehabilitation rents mentioned above would push rental rehabilitation activity into areas where such rents are most likely to continue to be affordable by very low-income renters with housing certificates and low- and moderate-income families and individuals without certificates.

The program separation between rehabilitation and rental subsidies will have fundamental implications for financial underwriting and management of individual structures. Since certificate holders in rehabilitated properties may move out of their units at any time, subject to any lease requirements, owners cannot depend on a HUD-guaranteed rental income stream. Instead, property financial underwriting, including repayment of rehabilitation debt, has to make sense if buildings have no certificate holders renting units. Real market rents—rents which unsubsidized tenants are actually willing to pay for rehabilitated units in the areas where structures rehabilitated under the program are located—would serve as the basis for the underwriting of rehabilitation projects supported by this program.

It is anticipated that local and State governments, interested in stretching the impact of their rental rehabilitation funds, will generally limit the amount of assistance to each individual project to the minimum amount needed to make the project work.

Since this program does not provide for guaranteed tenants and/or subsidies attached to individual units, property owners must work to keep current tenants satisfied and, when vacancies occur, to attract new renters. Thus, owners will be under market place pressure to maintain building services and conditions once rehabilitation is completed.

In short, the proposed Rental Rehabilitation Program brings the free market place back into HUD's assisted housing programs. As a result of this fundamental shift in approach, the Federal government will be able to assist a significantly larger number of property owners and very low-income tenants than current programs could for the same amount of money.

Specific provisions of the proposal are as follows. Subsection (a) provides basic authorization to the Secretary to make rental rehabilitation grants to States and units of general local government. Grants would be made available to help support the rehabilitation of privately owned real property to

be used for residential rental purposes. Of the amount authorized to be appropriated under section 103 of title I of the 1974 Act for fiscal years 1984, 1985, and 1986, not more than $150,000,000 would be available in each such year for rental rehabilitation grants. Funds appropriated for rental rehabilitation grants would be available for obligation for a two year period.

Subsection (a) would also authorize HUD to make available contract authority under the proposed Section 8 Housing Payment Certificate Program for use in connection with rental rehabilitation programs. The special allocations of these certificates are expected to be used primarily to enable very low-income tenants of structures to be upgraded under the program to remain in their units after rehabilitation. These certificates may also be used to assist very low income tenants displaced as a result of rehabilitation activities in obtaining decent, safe, and sanitary housing elsewhere. In addition, these certificates could be given to very low-income families on the PHA's Section 8 waiting list, with referral to vacant units rehabilitated with program funds. However, the family's choice would not be limited to units rehabilitated under this program.

Subsection (b) establishes provisions for the allocation and reallocation of resources provided under the new section. Paragraph (1) makes cities with populations of 50,000 or more, urban counties (as defined under title I of the Housing and Community Development Act of 1974), and States eligible for rental rehabilitation grants. The Secretary would allocate amounts, taking into account such factors as low-income renter population, rental housing market conditions, overcrowding of rental housing, the condition of the rental housing stock, and other appropriate objectively measurable conditions. These factors are intended to assure that program funds are targeted to areas of greatest need. The actual allocation system will be developed on the basis of 1980 Census data, where appropriate.

Paragraph (2) gives the Secretary authority to make several key adjustments in the allocation amounts established under paragraph (1). First, the Secretary may establish minimum allocation amounts for grants to cities and urban counties representing program levels below which conduct of a local program would not be feasible. HUD is currently planning a minimum allocation amount of $100,000 which would generate a program volume of at least $200,000 (due to the 50% leveraging requirement). Funding "allocations" of less than the minimum amounts would be added to the allocation for the States where the relevant cities and counties are located, and these localities would be eligible for assistance from the States in undertaking rental rehabilitation activities.

Second, the Secretary is authorized to make annual performance adjustments, not to exceed 15 percent, in amounts added or deducted, to city, urban county, and State allocations, based on an annual review of each grantee's progress in meeting program performance requirements. If a city or urban county qualifies for a direct allocation of funds at or above the minimum program amount, it would receive a grant even if this performance adjustment reduces the grant below the minimum level. The Secretary would establish program performance criteria, including the primary criterion that at least 80 percent of the initial after-rehabilitation rents for assisted properties, on a free-market basis, are within the applicable payment standard for housing payment certificates. Other criteria would include emphasis on serving the housing needs of those households not well served by other housing programs. In meeting this criterion, a community would be expected to assess the extent to which its housing needs are addressed by other programs. For example, the needs of large families or handicapped households in a particular community may be poorly served because of the limitations of the available rental stock, both public and private.

Paragraph (3) provides for allocation of contract authority for housing payment certificates for grantees on a basis proportional to the allocation of rental rehabilitation grant funds. It also authorizes the Secretary to include a provision in the annual contributions contracts for these certificates to ensure that use of the rental rehabilitation grants and housing payment certificates is effectively coordinated.

Paragraph (4) authorizes the Secretary to make annual program reviews and audits of local and State efforts to ensure that grant recipients are carrying out their activities in a timely manner and consistent with program guidelines, and that they have a continuing capacity to carry out the program in a timely manner. This paragraph also authorizes the Secretary to adjust, reduce, or withdraw resources made available under the program, with the limitation that resources already expended on eligible activities may not be recaptured or deducted from future resources to be made available. Resources which become available as a result of these funding adjustments (and actions under section 111 of the 1974 Act) are to be reallocated to other States and localities during the year in which they become available. These review and grant adjustment features are comparable to those in the Community Development Block Grant Program.

Paragraph (5) authorizes the Secretary to establish the maximum levels of rental rehabilitation grants which individual governments may receive in a single year under the program. Although States and localities with effective programs may receive funds above their initial allocations, their receipt of funding reallocations will have an upper limit. This provision will minimize the incentive for local governments to overstaff or spend funds too quickly in a "grantsmanship" effort to get more funds.

Paragraph (6) provides that any rental rehabilitation grant amounts not obligated by States and localities to specific projects at the end of a fiscal year will be added to funds available for the general allocation in the next year under subsection (b).

The Rental Rehabilitation Program would not require participating governments to submit an application before receiving annual funds. Subsection (c) does, however, require program participants to prepare an annual statement containing a description of their rental rehabilitation programs by December 31 of each year in which activities are being carried out. Copies of the statement would be made available to the public and submitted to HUD.

Subsection (d) contains a series of key program requirements. Paragraph (1) provides that rental rehabilitation grants can only be used to rehabilitate structures which are located in low- and moderate-income areas defined and designated by the grant recipient and which are to be used for residential rental purposes. Paragraph (2) establishes the requirement that all assisted rehabilitation meet the housing quality standards established by the Secretary for the Housing Payment Certificate Program under section 8(d) of the United States Housing Act of 1937. Paragraph (3) establishes the requirement that program funds only cover 50 percent of project rehabilitation costs, as defined by the Secretary. Paragraph (4) prohibits participating governments from imposing special rental limitations on property owners assisted with rental rehabilitation funds. The rental of units in properties rehabilitated under the program would be subject to the same State and local requirements as any comparable rehabilitation undertaken without Federal assistance. This feature is crucial to the cost-efficient, market-based characteristic of the Rental Rehabilitation Program.

Paragraph (5) prohibits owners of structures assisted with program funds from refusing to rent to tenants solely because they are receiving Section 8 rental assistance. Paragraph (6) requires participating jurisdictions, in designing and operating their programs, to require individuals with an interest in the property to be rehabilitated to be personally liable for payment of debts incurred. This provision is designed to encourage an increased sense of owner responsibility for individual assisted projects during and after rehabilitation. It will also tend to encourage program participation by owners with a greater interest in long-term rental income rather than the syndication of tax benefits.

Paragraph (7) prohibits States and localities from using program funds for the costs of administering their rental rehabilitation efforts. Localities and States are expected to use Community Development Block Grant or other public funds to support the administrative costs of operating their rental rehabilitation programs.

Subsection (e) contains provisions relating to State rental rehabilitation programs. Paragraph (1) limits State use of rental rehabilitation resources to jurisdictions and unincorporated areas which do not receive direct allocations under subsection (b). States may either establish their own programs, working directly with property owners in the eligible areas, and/or distribute the resources to individual jurisdictions. In order to give States time to gear up for the program, States would be able to opt not to administer a rental rehabilitation program in fiscal year 1984. HUD will administer the State's allocations during 1984 in any State exercising this option. After fiscal year 1984, States will be expected to assume responsibility for administering their programs.

Subsection (f) gives the Secretary authority to establish by regulation standards for the new program governing relocation payments and other related assistance.

Subsection (g) provides that program participants will be responsible for supporting national historic preservation objectives in their rental rehabilitation efforts, working with State Historic Preservation Officers on any projects where national historic preservation standards cannot be met.

Section 102(b) contains a technical, conforming amendment. Section 102(c) would require program grantees to certify in advance of funding that their programs will be conducted and administered in conformity with applicable civil rights requirements.

URBAN HOMESTEADING

Section 103(a) would authorize $12 million for the Urban Homesteading Program for

fiscal year 1984, and such sums as may be necessary for the program for fiscal year 1985.

Of the $12 million requested, $9 million is expected to be used for the existing Urban Homesteading Program. This represents a program level sufficient to meet anticipated program demand for fiscal year 1984. The remaining $3 million would be used to carry out the Multifamily Homesteading Demonstration Program proposed in subsection (c). If demand under the Multifamily Urban Homesteading Demonstration Program fails to reach the anticipated $3 million level, remaining funds could be used for single family urban homesteading activities.

Subsection (b) contains a series of amendments to permit HUD and the governmental entities carrying out urban homesteading programs to charge consideration in connection with the transfer of homestead properties to the entities and to the ultimate owner-occupants. Existing law requires HUD to transfer properties to local entities without payment, and requires conveyance of the property to the homesteader to be "without substantial consideration."

These amendments recognize the fact that free transfer is not always necessary to successful homesteading. Thus, HUD would be given discretionary authority to set a transfer price for individual homesteading properties at a level conducive to attracting homesteaders, while at the same time stretching scarce Federal resources over more homesteading properties. States and localities would be free to charge whatever consideration they deem appropriate for these properties, subject to the requirement that half of their "gain" would have to be refunded to HUD.

Subsection (c) would authorize HUD to demonstrate the feasibility and desirability of using a variety of homesteading and related techniques to encourage the reuse of HUD-owned multifamily properties for primarily residential use, in which the dwelling units would be under a cooperative or condominium form of ownership. The Secretary would transfer suitable properties to the State or local government, which would be responsible for managing the disposition and rehabilitation of the property at the local level. The transfer would include such terms and conditions as would be agreed between the Secretary and the responsible agency, including the right of the Secretary to assure that such use in fact occurs. The program would concentrate on the transfer of properties with approximately 30 units.

The program would be designed to spur local interest in dealing with deteriorated multifamily housing stock in creative and innovative ways. Among other things, HUD would encourage new approaches to multifamily homesteading, such as "condosteading." "Condosteading" would permit homesteaders to build equity, and could be used to encourage people of middle income to invest and live in deteriorated buildings and neighborhoods. HUD would also encourage creative financing techniques for rehabilitation, which would result in the maximum leverage of public funds.

The Budget assumes participation by up to 15 localities and the transfer of at least 15 properties, with an average acquisition price of $200,000 (30 unit properties at $6,500 per unit average). Since the Department intends to vary the level of subsidy for property acquisition by requiring a down payment or equity commitment by the homestead entity, the total number of transfer could increase by as much as 50 percent.

Finally, the proposal would authorize the use of homesteading funds for technical assistance in connection with the demonstration program consistent with current authority under the single family Urban Homesteading Program.

STATE SMALL CITIES PROGRAM

Section 104 would make a number of changes in the CDBG Small Cities Program. Subsection (d) would amend section 106(d) of the Housing and Community Development Act of 1974 to mandate State administration of the Small Cities Program beginning in fiscal year 1984. Present law allows States to assume administration of the Program on an optional basis for each fiscal year.

Only two to five States are expected not to administer the Small Cities Program in fiscal year 1983. In fiscal year 1984, the number electing not to administer will probably be the same or smaller. This small number does not justify the considerable expense of maintaining a separate Federal structure of rules, requirements and oversight. Consistent with the Administration's Federalism policies, this proposal would give the sole authority for running the Program to the States. In order to provide an orderly transition to State administration, subsection (d) would permit HUD to continue administering amounts allocated for States from pre-fiscal year 1984 appropriations in States that elected HUD administration of their programs for fiscal year 1983. Amounts which were not obligated by January 1, 1984, however, would be added to the State's amount for fiscal year 1984, or where the State is not participating, to the amount for all States in the next year. These proposals are consistent with the approach proposed by the Department in the 1981 revision of the CDBG Program.

Subsection (d) would also make two changes in the system under which block grant funds are reallocated in the Small Cities Program. Under present law, there is no need for reallocation of State amounts where the State does not elect to participate or otherwise fails to meet the requirements for State administration, since HUD will administer the funds. Existing law does provide, however, that any amounts which become available as a result of HUD administrative sanctions against units of general local government within a State are added to the State's allocation for the fiscal year in which the sanctions are imposed. In the event of sanctions against a State, the funds are added to the State's allocation for the succeeding fiscal year.

The changes subsection (d) would make are: (1) any amounts which a State does not receive because it fails to meet the prerequisites for a grant (statement, citizen participation and certification requirements) and (2) any amounts which become available as a result of administrative actions against a State, would be reallocated in the following year on a national basis to all States according to the statutory formula. As in present law, amounts available for reallocation due to administrative actions against "units of general local government" would be added to the appropriate State's amount in the year the amounts become available. However, if the State is not participating, the amounts would be reallocated to all States in the next year.

The first change is a necessary consequence of making State assumption of Small Cities Program mandatory. Since under mandatory State administration, HUD would no longer be in a position to administer the funds for that State, authority is needed to let HUD reallocate such amounts to those States that are participating and can use them.

The second change relates to the current requirement that amounts available due to sanctions against a State be returned to the sanctioned State in the next year. This undercuts HUD's ability to carry out its statutory review and audit responsibilities, and can foster an attitude which encourages fraud, waste and abuse in a State's grant administration. In no case can HUD impose a reduction or termination of the grant to assure compliance with Federal law. HUD can only delay use of the grant until the next year. The proposed change would redress this situation by reallocating sanctioned amounts by formula among all the States in the succeeding year.

No change is proposed in the requirement that amounts available because of sanctions against units of general local government be added to the State amount, since amounts allocated to a State should generally remain there so long as the State is administering its program properly. However, where the State is not participating, HUD could not administer the program and the funds would be reallocated in the next fiscal year to all States.

Finally, subsection (d) would provide that amounts becoming available from grant "closeouts" under the HUD-administered Small Cities Program be added to the State's allocation. Amounts become available in a "closeout" when the project for which the grant was made has been completed and funds remain. No reference is currently made in the block grant statute as to how the reallocation of these funds is to be handled. The Transition Provisions (Section 307 of the Housing and Community Development Amendments of 1982) preserved the availability of all pre-FY 1982 (including closeout) funds until they lapse, and provided for their reallocation under the appropriate authorizing provision. These provisions did not reach FY 1982 and subsequent amounts, however, and the reallocation provisions applicable to them are silent on the question of closeout amounts. This proposal would provide that amounts which become available due to project closeouts be added to the State's allocation.

Subsections (a) and (c) contain technical changes to conform to mandated State administration of the Small Cities Program. Subsection (b) would continue the "buy-in" requirements for State participation in the Program (except for the requirement that States provide funds for community development activities equal to 10 percent of the grant), but would relocate them with the certification requirements of section 104(b) of the Act. Currently States are required to provide, out of their own resources, funds for community development activities in an amount equal to 10 percent of the State allocation. Experience has shown that States consistently meet and often exceed the 10 percent "match" or "buy-in" requirement. Due to the mandatory shift to State administration and consistent with the policy of removing unnecessary paperwork requirements, the 10 percent match requirement would be deleted. Subsection (b) would also eliminate the requirement that the Governor sign the necessary annual certifications. Consistent with current requirements for other title I certifications, this amendment would permit any authorized official of the State to sign the necessary documents.

ELIGIBLE CDBG ACTIVITIES

Section 105 would amend section 105(a) of the Housing and Community Development Act of 1974 to make two changes in the activities eligible for Community Development Block Grant funding. Paragraphs (1) and (2) would make clear that all public facilities, with the exception of buildings for the general conduct of government, are eligible for block grant funding. Title I currently has two provisions dealing with public facility eligibility. Section 105(a)(2) originally purported to be an exclusive listing and contains restrictions on items that are eligible. For example, fire protection facilities are only eligible if they are located in or serve designated community development areas. However, section 105(a)(14), as amended by section 309(f)(5) of the Omnibus Budget Reconciliation Act of 1981, made "public facilities" eligible without restriction.

This proposal would eliminate the restrictions in section 105(a)(2), thus clarifying public facility eligibility. It would also make clear that facilities for the general conduct of government are not CDBG eligible. This exclusion is consistent with general Federal policy excluding general governmental expenses from eligibility for Federal grant assistance, as stated in OMB Circular A-87.

Paragraphs (3)-(5) would make the new construction of housing eligible for funding under the CDBG Program.

At present, new construction is eligible for block grant funding only in limited situations. Grantees can perform certain support functions for developers of new housing, such as providing land at reduced cost. CDBG funds may also be used to construct last resort replacement housing pursuant to the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, for those displaced as a result of the acquisition of real property for CDBG-assisted activities. In general, however, new construction may only be financed through subgrants to neighborhood-based nonprofit organizations, local development corporations, or small business investment companies, in connection with community economic development, energy conservation and neighborhood revitalization projects.

This amendment would give cities across the country an alternative funding option for the new construction of housing. CDBG grantees would be able to use program funds to provide various forms of assistance to facilitate the new construction of housing. For example, funds could be used to finance "buy-downs" of the mortgage interest rates, to make such innovative planning concepts as mixed-use developments financially feasible, and to make capital grants.

This amendment would result in CDBG recipients having a full range of options in using CDBG funds to meet the need for housing in their communities, whether it involves rehabilitation of the existing stock or new construction. The decision to finance or otherwise assist newly constructed housing would be left solely to the discretion of the CDBG recipient. However, as with other CDBG-eligible activities, CDBG grantees would be limited to assisting activities that will benefit low- and moderate-income persons, aid in the prevention or elimination of slums and blight, or meet other community development needs having a particular urgency.

MISCELLANEOUS AMENDMENTS

Section 106 would make several miscellaneous amendments to title I of the Housing and Community Development Act of 1974.

Change Reference to "Office of Management and Budget."

Subsection (a) would amend section 102 of the Act to substitute OMB for the Department of Commerce as the entity which designates Metropolitan Statistical Areas and makes other determinations for purposes of the Community Development Block Grant Program.

This is a technical correction. The responsibility for establishing MSA's and their central cities is now with OMB, as is the responsibility for establishing the criteria for the Secretary to use in determining the extent of poverty. This transfer of functions from the Department of Commerce to OMB was made pursuant to Executive Order 12318, issued on August 21, 1981.

Revised definition of Indian tribe eligibility

Subsection (b) would amend section 102(a)(17) of the Housing and Community Development Act of 1974 to revise the definition of Indian tribe for purposes of the Community Development Block Grant (CDBG) Indian program.

The proposal is needed to clarify that the Department will only make block grant funds available to Indian tribes, bands, nations or Alaska native villages recognized by the Secretary of the Interior as eligible for services because of their status as Indian tribes or Alaska native villages provided that all or part of the land of such tribe or village is held in restricted or trust status by the United States. The same definition is used in the Indian housing grant program contained in section 202 of the proposal.

At present, section 102(a)(17) defines "Indian tribe" in part as any "Indian tribe . . . which is considered an eligible recipient under the Indian Self-Determination and Education Assistance Act. . . ." The determination of eligibility by reference to the Indian Self-Determination and Education Assistance Act (IS-DEA) has created some confusion in the administration of the CDBG Indian program. Confusion has resulted because IS-DEA does not limit eligibility for Federal funding to those Indian organizations recognized by the Secretary of the Interior as having governmental powers, while the CDBG program is directed to entities with such government powers.

The definition of Indian tribes is consistent with the definition currently employed by the Department of Interior and reflects the Administration's efforts to establish a more uniform and equitable policy for Indians. It emphasizes the historical government-to-government relationship between the Federal government and Federally-recognized Indian tribes. Use of the Federal recognition criteria also assures that the process and standards established under laws passed by Congress are applied in a consistent manner to determine eligibility.

Subsection (b)(2) would repeal section 119(n)(2) of the Housing and Community Development Act of 1974 to make one consistent definition of Indian tribe apply to both the CDBG and Urban Development Action Grant (UDAG) Programs.

Statement regarding use of funds in prior year

Subsection (c) would amend section 104(a)(1) of the Act to require grantees in the Community Development Block Grant Program to include in their proposed and final statements information on the use of funds made available in previous years and the relationship of such uses of funds to the community development objectives identified by the grantee. The requirement is limited to funds made available subsequent to the program amendments enacted by the Omnibus Budget Reconciliation Act of 1981.

A cardinal principle of a block grant is the accountability of recipients to their citizens for their performance in meeting program objectives. Section 104(a)(2)(B) currently requires that grantees publish a proposed statement of community development objectives and projected use of funds in such manner as to afford affected citizens an opportunity to comment, among other things, on the grantee's community development performance. However, the statute currently does not prescribe that the content of the statement include a report on previous activities. The amendment is intended to fill this gap and conforms this aspect of the program to the requirements generally applicable to other block grant legislation pursuant to Title XVII of the Omnibus Budget Reconciliation Act of 1981.

Entitlement funding of metropolitan cities and urban counties which form consolidated governments

Subsection (d) would amend section 106(b) of the Act to provide that, in computing the entitlement amount for metropolitan cities and urban counties which have formed consolidated governments, the allocation shall be equal to the sum of the amounts the metropolitan cities and the balance of the consolidated government (treated as an "urban county" for this purpose) would have received if they had not consolidated. The computations would only be undertaken where data are available from the Census Bureau. Further, the amendment would only apply to consolidations which take place on or after October 1, 1983 and only to consolidations which incorporate all metropolitan cities which received an entitlement grant in the year before the consolidation and the entire urban county which received a grant in such year.

The current Community Development Block Grant (CDBG) fund allocation system can serve as a disincentive for local governments (cities and counties) to form consolidated governmental units. As an example, the population growth in the outlying part of the county would probably offset the growth lag in the core city, resulting in little or no growth lag for the consolidated government as a whole. Since population growth lag greatly affects the CDBG formula outcome, this would likely mean the loss of the benefit the metropolitan city would otherwise receive through its lag. Therefore, the grant that a consolidated government would receive would be less than the sum each individual entity now receives. This result discourages consolidations.

The Department believes that the CDBG program fund allocation system should not discourage local decisions to form consolidated governments. The proposed amendment would assure that consolidation would not reduce the total available for the consolidating governments, and, therefore, not be a disincentive.

Reallocation of entitlement funds

Subsection (e) would amend section 106(c) of the Act to provide that funds originally allocated for metropolitan cities and urban counties which are or become available for reallocation would be redistributed on a national basis in the following annual funding cycle to all entitlement cities and counties in accordance with the regular formula allocation process.

Current law requires block grant entitlement funds which become available for real-

location to be reallocated in the next year to other metropolitan cities and urban counties in the same metropolitan statistical area (MSA). To receive amounts, grantees have to certify that they would be adversely affected by the loss of the funds from the MSA. No grantee may receive more than 25 percent of its regular formula grant, and a grantee may not receive funds lost as a result of a sanction against it. Funds for which no grantee in the MSA qualifies are added to the funds available for distribution to entitlement grantees for the next year, and distributed in accordance with the national formula.

The current reallocation provisions raise a number of policy and programmatic concerns. Since the initial allocation to grantees is based on a formula which does not take the location of a grantee into account, it is anomalous for the reallocation formula to require use within the same MSA before reallocating the funds nationwide. Indeed, it makes more sense to reallocate to all other entitlement grantees without first reallocating to other grantees within the same MSA.

In addition, since virtually every grantee can "use" additional funds, the required certification of adverse effect in the MSA has become a pro forma paper exercise. Where more than one grantee in an MSA has lost funds through program enforcement, a percentage of funds lost by one grantee can end up being reallocated to another which has also been penalized, thus making up the funds that grantee lost. The money penalty for inadequate performance becomes difficult to discern in this circumstance. Similarly, even with the 25 percent cap, the amount of funds reallocated to a given grantee can be significant. This bonus amount, however, is not at all linked to the grantee's positive performance (or even to the statutory demographic criteria), but rather to the poor performance of its neighbor.

The present scheme also presents accounting and management problems for HUD. Because of the complexity of the calculations involved, substantial computer time and administrative effort are expanded in the calculation and distribution of these funds.

Amending section 106(c) to provide for national distribution for all reallocated funds, as is now authorized for the left-over funds, would substantially ameliorate these management problems and enhance the fairness of the distribution. This proposal is consistent with that originally proposed by the Department in the Housing and Community Development Amendments of 1981.

The proposal would also delete existing section 106(c)(2), which provides for allocation in accordance with the block grant statute, as it existed before the 1981 Amendments, of grant monies first made available in fiscal year 1981. This provison is now obsolete.

Authority for pro rata increase of entitlement amounts where necessary to assure distribution of all available funds

Subsection (f) would amend section 106(f) of the Act to allow for a pro rata increase of all metropolitan city and urban county entitlement amounts if the formula allocation system fails to distribute all amounts available. This technical proposal is similar to the present pro rata reduction feature, which is applied in the event funds are insufficient to meet formula allocations. Technical changes are also made to this latter provision to clarify its coverage.

The amount of an entitlement grant is determined by a dual formula which consists of population, extent of poverty and overcrowded housing on the one hand, and the extent of poverty, age of housing and growth lag on the other. For each element (except growth lag), the value for each entitlement grantee is divided by the value for all metropolitan statistical areas (MSA's). Since MSA's encompass areas in addition to metropolitan cities and urban counties, the value derived from the sum of the ratios for each formula, considered separately, is always less than 1. It is therefore possible that the sum of all entitlement shares can amount to less than the amount of funds available for allocation to entitlement cities and counties. This possibility can be expected to increase as a result of recent criteria revisions which will incorporate additional nonentitlement areas within MSA's.

This technical change in section 106(f) is proposed in anticipation of such an event, and provides a mechanism to assure allocation of all funds if the need should occur.

Clarification of authority to award cooperative agreements for technical assistance

Subsection (g) would amend section 107(b)(4) of the Act to clarify HUD's authority to award grants, cooperative agreements or contracts to a variety of qualified groups to provide technical assistant to CDBG and UDAG grantees.

A recent opinion of the General Accounting Office (GAO) has clouded HUD's legal authority to award cooperative agreements to many of these organizations. The GAO opinion results from the application of the Federal Grant and Cooperative Agreement Act of 1977 to HUD's technical assistance program. Specifically, GAO found that the statement in the last sentence in section 107(b)(4), that the HUD Secretary can provide technical assistance ". . . directly or through contracts . . ." with certain intermediary groups, takes arrangements between HUD and those groups outside the coverage of section 6 of the Federal Grant and Cooperative Agreement Act of 1977, which prescribes when the use of cooperative agreements is permissible. GAO concluded that the arrangements do not qualify as cooperative agreements because GAO viewed such arrangements only as a substitute for the provision of technical assistance "directly" by HUD staff and, therefore, are primarily for the direct benefit of the Federal Government and only incidentially for the benefit of the grantees.

The Department does not believe that the intent of section 107(b)(4) should be read so narrowly. In order to remove any question, this proposed amendment would clarify HUD's authority to provide technical assistance to such intermediaries in the most expeditious and cost-effective manner, and would facilitate HUD's authority to assist qualified groups to provide technical assistance on a broader basis without designation by the units of general local government being assisted by the group.

Block grant statement submission date

Subsection (h) contains a technical change to section 116(b) of the Act to make clear that the deadline established by the Secretary for submission of statements required by section 104(a) shall be for, but not necessarily in, the fiscal year for which funds are made available. As a general matter, the overwhelming majority of statements are submitted within the same fiscal year for which funds are appropriated. But in a few cases it may be desirable to provide flexibility in establishing the deadline for States and entitlement communities. Such flexibility could be most pertinent in instances where funds are appropriated very late in the fiscal year, newly eligible cities or urban counties are participating in the entitlement mode for the first time, or States are gearing up for initial administration of the Small Cities Program.

Change in designation of small cities of metropolitan areas under 50,000 for UDAG funding purposes

Subsection (i) would amend section 119(i) of the Act to require that central cities in metropolitan statistical areas (MSA's) with populations under 50,000 apply for Urban Development Action Grants from the 25 percent set-aside now reserved for small cities.

At present, small central cities located in MSA's must compete for UDAG funding with cities with populations in excess of 50,000. These smaller cities appear to have had difficulty competing for grants, since they have received only 4 percent of the UDAG funds since the inception of the program. While demand from cities in MSA's has exceeded available resources, applications from small cities historically have fallen short of fully using the 25 percent set-aside.

This proposal would ensure a more effective and efficient use of funds appropriated for the UDAG Program. It would significantly reduce the shortfall of applications for funding out of the small cities set-aside by shifting small central cities to the small cities application pool. In addition, the proposal would make the competition for UDAG funding more equitable by placing cities of similar size and capacity in the same category for funding purposes.

REPEALERS

Section 107 would repeal several HUD community development and related authorities.

Lump sum drawdown authority

Subsection (a) would repeal section 104(g) of the Housing and Community Development Act of 1974. Section 104(g) allows grantees to draw down in a lump sum up to the entire amount designated in their block grant programs for rehabilitiation activities before the funds are in fact needed to finance those activities. The funds are deposited in a revolving loan fund with local banking institutions pending disbursement.

The lump sum provision for rehabilitation is unique in the block grant program and contrary to U.S. Treasury policy which is applicable to all Federal grant programs. That policy attempts to keep to a minimum the lapse of time between the transfer of funds from the U.S. Treasury, to the grantee, and disbursement by the grantee to meet program costs. It is the only provision allowing for drawdown of funds before commitment. While use of the deposited funds must begin within 45 days, the statute prescribes no time limit in which all of the deposited funds must be used. (Under HUD regulations the fund can be used over a period of two years before remaining amounts must be returned to the recipient's letter of credit although a recipient may request an extension beyond the two year period.) Actual drawdown amounts under this provision for 1976 through 1981 are estimated to total between $300 and $400 million. The current advance drawdown system forces the Federal government to borrow funds unnecessarily at high rates of interest

long before their actual need and commitment to eligible projects.

The most frequently cited rationale for having lump sum drawdowns is that they are necessary to achieve private participation, or "leveraging." It was initially thought that allowing communities to draw down large amounts and place the funds in local banking institutions would encourage those institutions to offer more loans at lower interest to finance eligible activities. However, there are about 200 programs throughout the country involving significant private lending institution participation without lump sum agreements. Since the benefit of private participation can be achieved without resort to lump sum agreements, eliminating this feature would potentially save the Federal government millions of dollars in interest.

Revolving loan funds established before the effective date of repeal would continue in effect until expiration, and would continue to be governed by the provisions of section 104(g) as they existed before repeal.

Loan guarantees

Subsection (b) would repeal section 108 of the Housing and Community Development Act of 1974. This section provides for guarantees of notes and other obligations issued by units of general local government or by public agencies designated by such units for financing the acquisition of real property or the rehabilitation of real property owned by the unit of general local government. Termination of this program is consistent with the Administration's policy of eliminating the growing pressure on private credit markets. Any guarantee made by the Secretary under section 108 pursuant to a commitment to guarantee made before the repeal would continue to be governed by the provisions of section 108 as they existed before repeal. Pending loan guarantee applications would not be approved.

Section 312

Subsection (c) would repeal the Rehabilitation Loan Program contained in section 312 of the Housing Act of 1964. This program authorizes direct loans to property owners and tenants to finance the rehabilitation of residential and business properties.

These functions are eligible for funding under a number of existing eligible activities in the Community Development Block Grant Program. For example, section 105(a)(4) includes as an eligible activity the rehabilitation of buildings and improvements, including the financing of public or private acquisition of privately-owned properties for rehabilitation and the rehabilitation of those properties. Section 105(a)(14) provides that block grants may be used, among other things, to finance the rehabilitation of commercial or industrial buildings or structures and other commercial or industrial real property improvements. Finally, section 105(a)(15) allows block grants to be used for a wide range of rehabilitation activities undertaken by neighborhood nonprofit groups, local development corporations and minority-enterprise small investment companies. In addition, special funding for rental rehabilitation is proposed in the Department's Rental Rehabilitation initiative. In light of these existing and proposed authorities, continuation of the Section 312 Program is no longer desirable.

The proposal would, however, retain provisions of section 312 concerning the creation and uses of the program's revolving fund. These provisions would be retained to ensure that funds for servicing and liquidating section 312 loan contracts would be available until September 30, 1984 or until the assets and liabilities of the fund are transferred to the revolving fund for liquidating programs, whichever is earlier. Language to accomplish the transfer of the fund will be included in the Department's proposed fiscal year 1984 Budget. The provision also would make clear that the monies in the revolving fund for liquidating programs may be used for necessary expenses (including the use of private contractors) for servicing (including protection of security) and liquidating section 312 loans.

Surplus land

Subsection (d) would repeal the Surplus Land Program continued in section 414 of the House and Urban Development Act of 1969. Section 414 permits the General Services Administration to transfer surplus Federal real property to HUD and the Department of Agriculture for sale or lease at fair value for use for predominantly low- and moderate-income housing.

Since its inception, this program has been infrequently used. Fourteen properties have been transferred since 1970. Nine additional properties are in the pipeline. This limited activity over such a long period does not justify the costs involved—staff, travel, etc.—in maintaining the program. Moreover, the program is administratively inefficient, since it interjects HUD and FmHA between GSA and the ultimate purchaser/lessee of the property involved.

In addition to repealing section 414, this proposal would permit HUD and FmHA to dispose of surplus property within 120 days after the effective date of this Act if either Secretary had requested GSA to transfer the land prior to the effective date of this Act. This is necessary to assure that adequate time is afforded the Secretaries to complete processing of projects in the pipeline at the time of enactment of the 1984 legislation.

Section 414 presently provides that land conveyed to a private entity will revert to the United States if it is used for other purposes within 30 years (20 years with Federal approval) after its transfer for use as low- and moderate-income housing. The repealer specifically provides that this provision will continue to be in force and effect for all properties transferred pursuant to section 414 to which it applies.

Miscellaneous

Subsection (e) would repeal provisions of the Urban Renewal, Open Space Land and Neighborhood Facilities Programs in order to reduce Federal involvement in decisions which are more appropriately made at the local level.

Paragraph (1) of subsection (e) would repeal section 106(g) of the Housing Act of 1949. This provision requires localities to obtain a transient housing study before an Urban Renewal Plan can provide for the construction of hotels or other transient housing in the Urban Renewal area. The study is to assure that there is a need for this type of housing in the area. This requirement would be deleted, since the decision concerning whether to permit transient housing is one that should be made by local authorities who are most familiar with local zoning and marketing conditions.

Paragraphs (2) and (3) of subsection (e) would eliminate provisions in the Open Space Land and Neighborhood Facilities Programs which prohibit, without Federal approval, the conversion of land or property obtained with assistance under the programs for uses other than those intended at the time the grant was made. These changes would remove cumbersome restrictions and give the locality discretion in determining the appropriate use of its land or property, and would thereby promote the effort to decentralize the decisionmaking process and speed its return to local control. The locality in which the land and/or property is situated is best able to determine what is the most appropriate use of its resources and whether or not a conversion to another use is consistent with its needs and objectives.

Specific provisions to be repealed include:

Section 703(d) of the Housing and Urban Development Act of 1965. This authority prohibits a conversion in the use of neighborhood facilities during a 20-year period following the grant, unless HUD approves the conversion based on the finding that the conversion is in accordance with the then-applicable program of health, recreational, social, or similar community services in the area, and is consistent with comprehensive planning for the development of the community in which the facility is located.

Section 704 of the Housing Act of 1961. This provision prohibits a conversion of open space land to uses not originally approved by HUD unless HUD approves the conversion under regulations requiring findings that (1) there is other comparable land available for substitution; (2) the conversion is needed for orderly growth and development; and (3) the conversion is in accord with the comprehensive plan for the urban area.

Section 705 of the Housing Act of 1961, which requires prior approval by the Secretary of the Interior before open space land involving historic or architectural purposes can be converted for other uses.

The second sentence of section 706 of the Housing Act of 1961, which gives the HUD Secretary general authority to deny approval of the conversion of land for which a grant was made to acquire interests to guide future urban development.

TITLE II—ASSISTED HOUSING

DESCRIPTION OF PROGRAM

The Department's FY 1984 Budget for lower income housing assistance programs consists of the following major elements:

$1.4 billion of budget authority for public housing modernization under the Comprehensive Improvement Assistance Program contained in section 14 of the United States Housing Act of 1937;

10,000 units of section 8 new and substantial rehabilitation for use with the section 202 Housing for the Elderly or Handicapped Program;

120,340 units under the new Housing Payment Certificate Program of this bill, broken down as follows:

(1) 26,000 certificates for the conversion, at the expiration of ACC's during FY 1984, of units now under the current Existing Housing ("Finder's Keeper's") Program. In addition to the 120,340 unit total, 94,000 will be converted as families leave the Finder's Keeper's Program and are to be funded out of contract and budget authority already provided under contract with Public Housing Agencies under the Section 8 Program;

(2) 50,000 incremental certificates to provide additional assisted housing;

(3) 30,000 certificates estimated to be used with the Rental Rehabilitation Program proposed in section 102 of this bill;

(4) 8,340 certificates estimated to be used with the sale of HUD-owned properties and

other properties in default (property disposition);

(5) 5,000 certificates to be available to the tenants of those public housing units to be sold or demolished during the fiscal year; and,

(6) 1,000 certificates for those section 8 new construction and substantial rehabilitation contracts (executed in the early years of the program) that owners choose not to renew at the end of their five-year contract term;

$76 million of budget authority for the Department's proposed Indian Housing Grant Program. $75 million will also be provided for Indian tribes under the CDBG Program;

$436 million of budget authority for amendments to public housing and section 8 units approved in prior years;

the conversion of 5,000 units of section 23 leased housing to the present Section 8 Existing Housing Program;

the conversion of 64,101 rent supplement and RAP (Rental Assistance Payment Program under section 236 of the National Housing Act) units to project-based section 8 existing housing with 15-year terms; and

$75 million of budget authority to assist lower income families in HUD-insured projects and to prevent mortgage defaults.

AUTHORIZATION AND USE OF ASSISTED HOUSING

Section 201 of the bill would provide increased funding authorizations on and after October 1, 1983 for both public housing and section 8 housing, and would repeal section 213(d) of the Housing and Community Development Act of 1974 and certain restrictions on the use of fiscal years 1981 and 1982 authority.

Authorizations

Subsection (a)(1) would amend section 5(c)(1) of the United States Housing Act of 1937 to provide $472,253,443 in additional contract authority on and after October 1, 1983. This amount includes the portion of the contract authority released in the fiscal year 1983 Further Continuing Appropriations Act (P.L. 97-377) ($63,597,741) in excess of contract authority available under section 5(c). No additional budget authority would be provided since amounts previously authorized are sufficient to cover the amount released in the fiscal year 1983 Further Continuing Appropriations Act and meet fiscal year 1984 needs. Subsection (a)(3) would amend section 5(c)(2) of the Act to require the Secretary, of the additional authority approved in appropriation Acts and made available on October 1, 1983, to enter into contracts aggregating at least $70,000,000 for assistance to public housing projects under section 14 for public housing modernization.

Subsection (b) would amend section 9(c) of the Act to provide $1,636,500,000 for public housing operating subsidies for fiscal year 1984. This amount is needed to meet operating subsidy requirements under the proposed fair market rent-based subsidy formula which will become operational in fiscal year 1984. In addition, a $1,350,000,000 authorization is proposed to cover the amount appropriated for fiscal year 1983.

The amount of loan and borrowing authority currently available under section 202 of the Housing Act of 1959 are sufficient to fund the direct loan Housing for the Elderly and Handicapped Program for fiscal year 1984. Therefore, no additional authorization is proposed.

Section 201 would also repeal section 213(d) of the Housing and Community Development Act of 1974 and present provisions of sections 5(c) (2) and (3) and the last sentence of section 5(c)(1) of the United States Housing Act of 1937.

Section 213(d) requires HUD to allocate housing assistance on the basis of the relative needs of different areas and communities so far as practicable, establishes the range of allocations for nonmetropolitan areas at not less than 20 nor more than 25 percent of the total amount of such assistance, limits the reallocation of funds outside States in which they were initially allocated, and specifies the possible uses for the 15 percent reserve retained by the Secretary.

The pattern of funding for housing programs subject to section 213(d) in recent years has been increasingly for purposes for which a fair share formula approach is not practicable. In recognition of this fact, Congressional Appropriations Acts suspended section 213(d) requirements for fiscal years 1982 and 1983. Given this recent experience and the Department's proposed housing assistance program for fiscal year 1984 and beyond, it makes little sense to retain section 213(d). The flexibility needed to administer these programs should not depend on a year-by-year suspension of section 213(d) under the Appropriations Act.

Section 213(d) already exempts the Comprehensive Improvement Assistance Program for public housing modernization from its coverage, and it is inconsistent with most of the proposed uses of the new section 8 Housing Payment Certificate Program under this bill. Conversions of units from other housing assistance programs to the new program and provision of assistance in connection with the Department's property disposition program bear no necessary relationship to an area's relative housing need; thus, these activities should be exempt from section 213(d) allocation requirements. The proposed allocation of 30,000 units in fiscal year 1984 under the Housing Payment Certificate Program for use in the Rental Rehabilitation Program would be governed by a separate allocation process, as described in section 102 of this bill. To the extent an allocation system is needed for 10,000 section 202 units and the 50,000 additional Housing Payment Certificates which are proposed, an equitable procedure could be established administratively.

The present provisions of sections 5(c) (2) and (3) of the 1937 Act impose, among other things, percentage limits on the amount of fiscal years 1981 and 1982 contract authority which can be used for newly constructed and substantially rehabilitated units and for existing units. These provisions, if retained, would apply to funds from those years recaptured in fiscal year 1984 which are proposed to be used to carry out the 1984 program. Since the housing type percentages and other requirements of these provisions were intended to establish funding restrictions on the Department's program in certain prior fiscal years, these provisions are obsolete.

Repeal of these section 5(c) provisions is consistent with congressional action taken in appropriating assisted housing funds for both fiscal years 1982 and 1983. For both years, language was included stating that none of the merged amounts available for obligation was subject to the provisions of sections 5(c) (2) and (3).

INDIAN HOUSING AND COMMUNITY DEVELOPMENT BLOCK GRANT PROGRAMS

The Department is proposing two approaches for providing Indian housing assistance beginning in fiscal year 1984:

1. The Indian Housing Program would involve a combination of grants for newly constructed housing and related infrastructure, FHA mortgage insurance, and, for very low income Indian families, the Housing Payment Certificate Program for rental assistance tied to the new units. Ownership of dwelling units under the program would have three forms, which could be used at the option of the tribe:

The housing could be owned by the tribe (or Indian Housing Authority (IHA)) with a lease purchase agreement with the family;

The housing could be owned by the tribe (or IHA) and the Indian family as co-mortgagors;

A tribe (or IHA) could own and then lease units to households who are eligible for rental assistance.

The total budget authority for this program would be $76 million. It is anticipated that approximately $38 million would be used for housing grants (including related infrastructure) and approximately $38 million for rental assistance. These funds would be available for obligation for a two-year period and then lapse.

2. The Indian Community Development Block Grant Program would be funded from the Secretary's Discretionary Fund under the current Community Development Block Grant Program. Currently, approximately $31 million is being made available administratively for Indian tribes from this fund. This would be increased by $44 million, to $75 million earmarked for Indian tribes. The tribes would have the flexibility to use grants for any eligible CDBG activity, including new construction (as proposed for all CDBG recipients elsewhere in this bill) and related infrastructure.

The Department is proposing these approaches in order to address the unmet Indian housing need in a more adequate and flexible manner. Under this proposal, Indian tribes would compete for funding from both programs and could receive funding from both the Indian Housing Program and the Indian Community Development Block Grant Program. Money received through the Indian Community Development Block Grant Program could be used for all eligible activities, including, but not limited to, new construction. Tribes which were not funded under the Indian Housing Program, but which receive Community Development Block Grant funds, would be encouraged to use their Community Development Block Grant funds for housing activities. This would assure expanded housing development for Indians.

Under both programs, the Indian tribe would apply for the grant, in accordance with procedures established by HUD, and would administer the program, directly or through Indian Housing Authorities (IHA's). Tribes would have wide discretion on how to design proposed programs tailored to their needs within the specific program limits described below. In providing greater autonomy and flexibility, these programs would be an improvement over current assisted housing programs for Indians.

Allocation of funds under both programs would be on a needs formula to each HUD field office with responsibility for the Indian program, similar to the approach now used for the CDBG Indian Program. The field office would then select proposals from eligible tribes based on criteria such as need, capacity, quality of the proposal and past performance.

Basic health, safety and durability standards (such as those established by national

model codes or codes adopted by the tribe for local use) would apply to housing developed under the Housing program. HUD would consider waivers, where appropriate, to respond to remote locations and special cultural and geographic conditions.

The same definition of Indian tribe used for the Community Development Block Grant Program would be used for the Indian Housing Program. See section 106 of the bill for the amendment of the definition for the CDBG Program.

Tribes would be required to report annually to HUD and maintain accounts in accordance with current CDBG requirements for Indians, which include biennial audits.

The Indian Housing Program

The Indian Housing Program involves grants for newly constructed housing and related infrastructure (e.g., water and sewer facilities), FHA insurance under section 203(b) of the National Housing Act, and assistance under the proposed Housing Payment Certificate Program for very low income Indian families. Approximately 1,500 units of newly constructed housing are expected to be constructed and operated using the $76 million of budget authority referred to above.

1. The Indian Housing Grant.—Section 202(a) would authorize grants (estimated at $3.8 million) for the development of new units for the benefit of members of Indian tribes. Tribes would develop their own program taking into account reasonable development costs for the area as well as family income levels. The following limits would apply: (1) grant funds could be used to pay 100 percent of all water and sewer facilities costs and up to 70 percent of other development costs for each unit and (2) in no case could the grants be used to reduce the remainder of the housing development costs below $15,000. The Indian tribe, and the home purchaser, where applicable, would have responsibility for financing the remainder. FHA-insured mortgage loans, family or tribal resources, or other funds could be used.

2. Availability of FHA Insurance on Indian Reservations.—The FHA Mortgage Insurance Program under section 203 of the National Housing Act would be available to insure mortgages covering the portion of the development cost (at least $15,000) not covered by the Housing Grant. Section 331 of the bill would add a new section to the National Housing Act providing that the Secretary may insure mortgages on reservations without regard to limitations relating to marketability of title or other restrictions the Secretary finds are contrary to promoting the availability of FHA insurance. This amendment would make FHA insurance more available to Indian reservations without jeopardizing the trust status of Indian land. It is described in greater detail in section 331 of this legislative program and is a separate provision, which can be used in conjunction with or independently from the Indian Housing Program.

Three additional provisions are proposed for units which receive assistance under the Indian Housing Program and also receive FHA-insured financing:

1. *Construction advances.*—Section 202(b) would add a new section 203(q) to the National Housing Act which would authorize the Secretary to insure construction advances in connection with this program. Such authority under the single family programs is now limited to section 203(k) rehabilitation loans. This authority would facilitate construction of housing on reservations where construction financing is a problem. The Secretary would exercise this authority only when the proposed construction is otherwise acceptable and there is no financing alternative available.

2. *Favorable loan-to-value ratio.*—Because the tribe (or IHA) will own and then lease units (or establish lease-purchase agreements) in some cases, an amendment is appropriate to provide favorable loan-to-value ratios in these cases. The proposed new section 203(q) would permit the tribe or IHA to qualify for the higher loan-to-value ratio which applies in the case of owner-occupants, instead of the limit applicable to non-occupant investor-owners. It should be noted that section 314 of the bill proposes a technical change to the limit now applicable to non-occupant, investor mortgagors.

3. *Reduction of FHA risk.*—To minimize defaults and to reimburse the Secretary for claims against the FHA insurance fund, tribes would be required to:

(a) demonstrate that they have a mechanism for evicting rental families if they do not pay their rent and for substituting other eligible families; and

(b) pledge income from tribal resources (such as tribal businesses and leasing tribal lands), or tribal assets (such as tribal bank accounts), or pledge Federal grants (such as CDBG), to reimburse the FHA insurance fund for any claims paid.

Also, it should be noted that the Department intends to establish actuarially-sound premiums under the program.

3. *Rental assistance under the Housing Payment Certificate Program.*—The third major feature of the program is use of assistance under the proposed Section 8 Housing Payment Certificate Program for eligible families who reside in units developed under the program but are unable to afford debt service and other housing costs even after the capital grant is applied.

The tribe would have the discretion to establish administratively a separate holdback of certificates available for families who enter the program as co-mortgagors or prospective homebuyers and later, due to circumstances beyond their control, become eligible for rental assistance.

Special provisions of the Housing Payment Certificate Program would authorize assistance contracts of 15 years, instead of 5 years. This would coincide with a 15-year FHA mortgage. In addition, an Indian tribe or IHA would be authorized to administer units under the program which it also owns. This is necessary since it is not usually possible to find another public housing agency to administer the units where the tribe or IHA is the owner. Generally in the proposed Housing Payment Certificate Program, PHA's (including IHA's) would not be permitted to administer assistance contracts for units which they own.

To qualify, families (and individuals) would be required to be very low-income families, those with incomes below 50 percent of the median. Section 205(b) would amend the U.S. Housing Act of 1937 to authorize the Secretary to adjust income ceilings for very low-income families higher or lower than 50 percent of area median income where necessary because of unusually high or low family incomes. This amendment is especially important for Indian reservations where there is a very high proportion of families with low incomes. Using the 50 percent of median income formula without adjustment could result in many Indians who are indisputably in need of assistance being above the income limit.

The Indian community development block grant program

Two basic changes from the current program are proposed. First, for all CDBG grantees, including Indian tribes, new housing construction would be made an eligible activity under the program, as proposed in section 105 of the bill. Second, funding available for Indians would be increased by $44 million (from approximately $31 million) to a total of $75 million.

The Indian Community Development Block Grant Program would provide Indian tribes with an additional option for the new construction of housing, in addition to the Indian Housing Program described above, with the same flexibility otherwise applicable to the CDBG Program. Tribes would be able to use community development block grant funds to provide various forms of assistance to facilitate the new construction of needed housing. For example, funds could be used to finance "buy-downs" of the mortgage interest rates, to provide water and sewer facilities, or to make capital grants.

Tribes would continue to be able to use these grants to fund all of the activities currently eligible under CDBG such as rehabilitation, economic development, water and sewer systems and various public improvement efforts. In short, tribes would have a full range of options in using community development needs. The decision to finance or otherwise assist newly-constructed housing would be left solely to the discretion of the participating tribes.

PAYMENTS FOR OPERATING AND REPLACEMENT COSTS OF PUBLIC HOUSING PROJECTS

Section 203(a) would amend section 9 of the United States Housing Act of 1937 to incorporate a formula for funding the operating costs and replacement needs of public housing projects on the basis of the cost of providing standard quality rental housing in the private market.

As currently in effect and as proposed to be amended, section 9 authorizes the payment of operating subsidies for the operation of lower income housing projects for the purposes of assuring the lower income character of such projects and achieving and maintaining adequate operating services and reserve funds. As currently in effect, section 9 provides that for the purpose of making such payments, the Secretary shall establish standards for costs of operation and reasonable projections of income, taking into account the character and location of the project and characteristics of the families served, or the costs of providing comparable services as determined in accordance with criteria or a formula representing the operation of a prototype, well-managed project.

Since 1975, the Department has funded operating subsidies in accordance with a Performance Funding System (PFS) based almost entirely on historical spending levels subject to no external standards. In general, the more public housing agencies spent for operations, the higher amount of future subsidy the formula produced. The Performance Funding System formula did not fulfill the statutory expectations regarding standards based on costs for providing comparable services.

The Omnibus Budget Reconciliation Act of 1981 directed the Secretary to review the operating subsidy formula, including "alternative methods for distributing operating subsidies which provide incentives for efficient management, full rent collection, and improved maintenance of projects." Pursu-

ant to this directive, the Secretary delivered a report to Congress in May 1982 regarding Alternative Operating Subsidy Systems for the Public Housing Program. This proposal is an outgrowth of that review and report.

Under the proposal, the amount paid to each public housing agency would be based upon the fair market rents for the market area determined for the Section 8 Existing Housing Program (or, upon adoption of the Section 8 Housing Payment Certificate Program contained in section 204 of this bill, the payment standards determined for purposes of that program). The use of such an external standard would more nearly conform to the expectation of the current statute by assuming that the level of Federal support for the efforts by locally constituted agencies to provide and maintain decent, safe, and sanitary housing for lower income families is subject to some effective constraint which, while recognizing inflation of costs of housing maintenance in local markets is not undermined by inefficient management practices of the supported agencies themselves. At the same time, more specific incorporation of the formula itself in the statute will increase the predictability of the flow of adequate subsidies from year to year.

The funding formula, which would provide for a single payment to include both operating funds and a replacement allowance, would be calculated as follows:

Each public housing agency would receive an amount comparable to the sum of the existing housing fair market rents in the area (or, upon enactment, payment standards) for its units, based on bedroom sizes, less other income sources to the agency including projected tenant rental income and debt service reimbursements pursuant to annual contributions contracts under section 5 of the 1937 Act. The statute would authorize appropriate adjustments in the formula to take account of factors such as the characteristics of families served, costs associated with types of housing not comparably represented in the private market (e.g., high-rise family projects), and the extent to which actual debt service reimbursement levels may exceed typical debt service requirements in the private market due to historic factors such as land costs or more recent construction periods. The formula would provide for annual adjustment of the subsidy level based on revision of the fair market rents (or payment standards) in the area.

For public housing agencies for which the fair market rent-based formula would yield a higher subsidy level than the Performance Funding System calculation for 1984 (after adding to such calculation an amount for replacement allowance), the proposal provides an alternative subsidy level equal to the PFS amount plus a replacement allowance. In subsequent years, the 1984 funding level will be increased by an amount corresponding to the increase in fair market rents in the area. The Department anticipates that, for purposes of this determination, it will calculate the replacement allowance amount as equal to 20 percent of historical non-utilities operating expenses.

The proposal also provides that in the first year of funding under the fair market rent formula, funds available for operation and a replacement allowance may not be less than 95 percent of the total funds that would have been available to the agency under the Performance Funding System, after addition of amounts for replacement allowance as described above and rent payable by tenants. Similar phased reductions would occur in subsequent years until the fair market rent formula level is reached.

The amendment requires that the subsidy formula prescribed by the Secretary be adopted through rulemaking proceedings.

The proposal grants discretion to the Secretary to fund certain public housing projects outside the new formula-based system. These exceptions include section 23 leased housing, public housing homeownership opportunity programs, Indian housing, and projects in the Virgin Islands, Puerto Rico, Guam, and Alaska.

The proposal would also clarify, consistent with the original Congressional intent, that amounts authorized under section 9 of the 1937 Act will only be paid where the public housing agency has executed an annual contributions contract or contract amendment which provides that no disposition of the public housing projects under such contract may occur during and for ten years after the period when assistance is paid under section 9.

Section 203(b) repeals section 9(d) of the United States Housing Act of 1937. Section 9(d), added by the Housing and Community Development Amendments of 1979, requires the Secretary to allocate excess operating subsidy funds to public housing projects which incur excessive costs beyond their control, which could not reasonably be anticipated when the initial subsidy allocation was made. Since the Performance Funding System is a cost-based system, requiring cost projections to determine subsidy levels, it was considered appropriate to use appropriations in excess of the funding formula for unanticipated costs.

Under the proposed operating subsidy system, which is based on existing housing fair market rents (or, upon enactment, payment standards) for various locations and unit sizes, anticipated PHA costs are no longer a factor in determining the amount of operating subsidy received by a PHA. The year-to-year increase in funding levels for PHA's will be based on increases in private market rents. Therefore, there is no need to adjust subsidy levels for "unanticipated costs."

SUNSET ON THE COMPREHENSIVE IMPROVEMENT ASSISTANCE PROGRAM

Section 203(c) would prohibit the Secretary from entering into additional contracts for assistance under the Comprehensive Improvement Assistance Program (CIAP) after September 30, 1987, using authority approved in appropriation Acts for fiscal year 1988 and later fiscal years. After that date, the Department intends to execute contracts only for amounts previously reserved for a PHA.

This provision will define a four-year transition period of modernization activity to permit PHA's to rehabilitate their units, in preparation for successful operation within the new funding system in which capital costs are no longer separately funded under a categorical grant program.

In section 203(a) the Department has proposed a new operating subsidy system for public housing which, among other features, includes a replacement allowance adequate for future capital improvement needs, after the inventory has been brought up to an adequate level of housing quality and energy efficiency. In the funding formula, all PHA's will receive either an explicit replacement allowance in addition to the operating subsidy they would have received under the current funding system (the Performance Funding System) or a Fair Market Rent-based operating subsidy which, by providing the level of operating funds equivalent to rents received by owners of private rental dwellings in the community, implicitly provides a replacement allowance. PHA's will begin receiving the replacement allowance in FY 1984 and will be able to invest it for future capital costs or to use it for current maintenance or capital needs. Section 203 (a) and (c) together will permit PHA's to shift from a categorical grant approach, in which it was necessary to focus on obtaining resources on a project-by-project basis, to managing a pool of known resources to rehabilitate and render cost-effective their total inventory.

Because the replacement allowance is designed to meet only future capital expenses of units that enter the new funding system, it is necessary to provide CIAP funds for the FY 1984-1987 transition period to permit PHA's to bring the units to an adequate level of housing quality and energy efficiency.

Because the replacement allowance is built into the operating subsidy system, it is appropriate to establish a "sunset" on the CIAP program. The "sunset" will establish a fixed period within which transition modernization must be planned and funds appropriated.

SECTION 8 HOUSING PAYMENT CERTIFICATE PROGRAM

Section 204 would amend section 8 of the United States Housing Act of 1937 to create a new component under the Section 8 Existing Housing Assistance Payments Program intended to serve as the cornerstone of HUD's future assistance to needy households.

These amendments draw upon HUD's experience with the Experimental Housing Allowance Program (EHAP), and would improve upon the present Section 8 Existing "Finder's Keeper's" Program in several important respects. Instead of providing maximum rent ceilings based upon published Fair Market Rents (FMR's), a "payment standard" would be used, based on the rental cost in a particular area of modestly priced standard housing of various sizes and types. This standard would be used, in combination with appropriate data about family income and composition, to determine the Federal subsidy amount to be provided.

A family would be permitted to rent above the payment standard amount, but would not receive additional subsidy when it did so. At the same time, a family also would be permitted to rent below the payment standard amount (provided that the selected unit met prescribed housing quality standards) without reduction of the subsidy amount (subject to a minimum rent). The program thus contains a "shopper's incentive" which serves both to contain the inflationary impact on rents that is experienced in the current program and, more importantly, to permit assisted families the similar range of choice between housing and other needs that they would exercise if utilizing only their own money.

Payment standard

The absence of a maximum rent provision would have several beneficial effects:

Increased opportunities for families to improve their housing and neighborhoods. Although housing markets are complex, in general the price of rental housing can be viewed as a continuum reflecting quality and location. The present role of FMR's severely limits the opportunities families have to improve their housing and neighborhoods. Without a rent ceiling, families

would be able to choose units in neighborhoods with less concentration of low-income residents, furthering the legislative goal of promoting economically mixed housing and the Departmental goal of increased opportunity for all people to live where they choose.

In the EHAP, which also did not have a rent ceiling feature, over half of the participating families chose units above the equivalent of FMR and paid the additional cost themselves. Families who are willing to forego other consumer items in order to live in better units or in better neighborhoods should be permitted to do so.

Greater equity among eligible families. Many very low-income families are now living in housing which costs more than the FMR for Section 8 Existing housing. The rent ceiling feature excludes these families from participating in the present Section 8 Program, ironically, because of the high value they place on housing. (The section 8 research program has found that a few families do downgrade their housing in order to get within the FMR.)

Easing pressures on FMR's. In the EHAP, rents of units followed the rents in the market at large. In the Section 8 Existing Housing Program, however, there is a heavy concentration of rents near the FMR. There are several reasons for the concentration, but a major cause is the search for units in the narrow band of housing just under the FMR. Another reason is the perception that if a unit is in the program it can be rented at FMR, even if it was previously rented below it. In a survey of Section 8 landlords, many stated that they raised their rents to meet the FMR. Without a "shopper's incentive"—a provision that families can keep the savings if they rent below the FMR—there is no reason for the family to object to the landlord's decision to set the rent right at the FMR. All of these factors have the effect of pushing rents in the program up to FMR.

Because rents are pushed up to FMR, or even above FMR's to the maximum exception rent, and because the effect of the ceiling is to exclude units above this limit from the program, the present system creates constant pressures for raising FMR's, or for authorizations to use exception rents.

Comparisons of rent changes for EHAP and Section 8 Existing Housing Program recipient families that do not move demonstrate the difference a ceiling makes. These families in Section 8 experienced an increase of 8 percent in rent. In EHAP, without the ceiling, similar families' rents increased on average less than 2 percent.

Subsidy formula

Under the new program, the typical monthly assistance payment available for a family would be the amount by which the area's payment standard exceeds 30 percent of the family's monthly adjusted income. This amount would vary only in the case of two "minimum rent" provisions. First, in no case may the assistance payment be more than the amount by which the actual rent for the dwelling unit (including amounts allowed for separately metered utilities) exceeds 10 percent of the family's income. Second, the assistance payment may not exceed the amount by which the lower of the actual rent for the dwelling unit or the payment standard exceeds the shelter component of a family's welfare grant, in those States where the shelter component is adjusted in accordance with actual housing costs.

For an example of the typical payment calculation, assume a payment standard of $300 and a family with an adjusted monthly income of $400. Deducting $120 (30 percent of adjusted income) from the payment standard would provide the family with a maximum subsidy of $180 a month ($300–$120=$180). This $180 would be the actual subsidy payment, unless one of the "minimum rent" provisions produced a lower figure.

The following section of the bill pertaining to tenant rents and contributions establishes the method by which this subsidy formula and other factors will be implemented.

PHA administration

The program would be administered by the public housing agencies which currently administer the Section 8 Existing Housing Program. These agencies include local housing authorities which also own public housing units, as well as State and regional agencies, Indian housing authorities, and a number of other local public entities.

Tenant eligibility

Under the new program, initial eligibility would be limited to households with incomes at or below 50 percent of area median family income. This requirement is in keeping with the targeting of assistance to families with the most urgent need for housing assistance. However, an important exception is provided for families previously assisted under the U.S. Housing Act of 1937 as well as families with incomes between 50 and 80 percent of area median who enter this program from a program under section 101 of the Housing and Urban Development Act of 1965, the National Housing Act, section 202 of the Housing Act of 1959, section 312 of the Housing Act of 1964, or any other provision of law, where appropriate, as determined by the Secretary. Such families would include, among others, those displaced from public housing projects subject to demolition and from subsidized insured projects acquired by the Secretary and subsequently sold, as well as households converted from the Section 8 Existing Finder's Keeper's Program to the Housing Payment Certificate Porgram. Without certificate assistance, these households would be forced to move or pay higher rents because of actions taken by the Department or by owners of rental housing under the terms of Federal contracts, so it is appropriate that eligibility for assistance be extended to them. However, for some such families, alternative assistance may be provided; for example, a tenant of a public housing project subject to demolition may move to another public housing project.

Families would continue to receive certificate assistance until such time as income increased to the point where the subsidy was zero (i.e., until 30 percent of their income or a minimum rent was as great as the payment standard), or until the end of the annual contributions contract term, whichever came first.

Dwelling units

Families qualifiying for assistance under the program will be able to select housing from among the existing private rental stock. In some circumstances, the family's initial receipt of a certificate may be based upon current occupancy of a particular housing unit. For example, in the Rental Rehabilitation Program, eligible families residing in units being upgraded or rehabilitated with Federal assistance will receive certificates. In such circumstances, the family may continue to occupy the same unit, receiving the benefit of the certificate and its subsidy. However, such a family would not be required to continue to occupy that unit as a condition to the receipt of its certificate. The certificate could be used in connection with that unit, or for any other standard unit the family chooses.

The unit selected by the family would be subject to an initial inspection to assure that it met housing quality standards established by the Secretary, before any subsidy assistance could be provided under the program. Subsequent inspections would be made at least annually to assure that the unit continues to meet such standards; otherwise the subsidy would be discontinued unless the family moved or the necessary repairs were made.

Conversions

Assistance under the current Section 8 Existing Housing Finder's Keeper's Program would be converted to the Housing Payment Certificate Program in the following ways. First, conversion of assistance would take place when assisted tenants leave the current program and new families enter. Second, tenants that remain in the program would be converted to housing payment certificates upon the expiration of the applicable annual contributions contract (ACC). It is anticipated that all new ACCs providing Section 8 Existing Housing subsidies beginning in Fiscal Year 1984 will be under the Housing Payment Certificate Program, except for Existing Housing subsidies in connection with section 23 and "project-based" Rent Supplement and Section 236 Rental Assistance Payment (RAP) conversions and with the Indian Housing Program under the bill.

Specific Amendments

Section 8(c) is proposed to be amended to retain most of the features of the current Section 8 Program authority intact, but aspects of that authority formerly contained in section 8(d) have been merged into subsection (c) as well. Thus, subsection (c) would describe program elements which pertain to assistance contracts based upon a maximum monthly rent, while subsection (d), completely revised, would describe the Housing Payment Certificate Program.

Proposed section 8(c)(8) (which has the same designation under current law) has been amended to clarify that the requirements of that paragraph apply only to newly constructed or substantially rehabilitated section 8 units. This was in fact the original intent of the provision, as made clear by the Conference Report on the Housing and Community Development Amendments of 1981.

Proposed sections 8(c)(9) and (10) set forth the program requirements applicable to Section 8 Existing assistance contracts which were formerly contained in section 8(d) of the United States Housing Act of 1937, with the following two changes: (1) in proposed section 8(c)(10)(A), the phrase "used by the owner" has been deleted in reference to tenant selection criteria since under the Section 8 Existing Housing Finder's Keeper's Program, the public housing agency applies the preferences in determining which tenants will be accepted into the program, and (2) in recognition of the importance of tenant rent burden as a factor in determining the most urgent need for housing assistance, proposed section 8(c)(10)(A) would also require that tenants who are paying more than 50 percent of their income for rent be given preference for selection for such assistance. Although

such families do not occupy substandard or overcrowded housing, their need for assistance is also great because they have sacrificed other goods and services to pay an extremely high proportion of their income to obtain decent housing.

Proposed section 8(c)(11) sets forth current authority for PHA's, with the approval of the Secretary, to administer assistance contracts for units they also manage on behalf of owners.

Proposed new subsection (d)(1) requires the Secretary to establish payment standards (based on dwelling size and type) for different market areas, and states that these standards shall be used to determine the maximum monthly assistance which may be paid for any family. The payment standards will be established periodically, but not less than annually. Payment standard levels will be designed so as to assist families in securing decent, safe and sanitary housing, while providing assistance to the greatest possible number of families.

Payment standards (and fair market rents in section 8(c) as proposed to be revised) are required to be published in the Federal Register. However, the proposal would not make the determination of these amounts a "rulemaking." While the Department may well find it necessary to consult with the public concerning the appropriate level of FMR's and payment standards, these are essentially fact-based determinations which should be adjustable, as appropriate, to meet economic exigencies, rather than being subject to the delays occasioned by publication for comment.

Proposed revised section 9(d)(2) sets out the basic formula for determining the assistance to be made available for a family renting a unit under the Housing Payment Certificate Program. The formula provides that the monthly assistance payment shall be the amount by which the local payment standard exceeds 30 percent of the family's monthly adjusted income. However, this formula is subject to two "minimum rent" provisions which assure that a significant contribution toward the cost of the dwelling is made by the assisted family. First, the assistance payment amount may not exceed the amount by which the actual rental cost (rent to the owner plus allowances for utilities paid directly by the tenant, if any) exceeds 10 percent of family income.

Second, if the family is receiving welfare assistance, and a part of its assistance is designated for the family's housing costs and adjusted according to the actual rent ("welfare rent"), the monthly assistance under this program may not exceed the amount by which the lower of the actual rent for the dwelling unit or the payment standard exceeds the family's welfare rent. This provision encourages such welfare tenants to choose units within the payment standard (since no assistance will be given toward rental costs above that level) and limits certificate assistance to the actual rental costs paid by the tenant above and beyond the welfare rent. This special treatment will affect only welfare tenants in the nine "as-paid" States which designate a portion of welfare assistance for housing and adjust the amount according to actual rental costs, and is necessary to achieve the objectives of the two programs.

Adjustments in the amount of tenant assistance payments will be made on an annual basis according to changes in the family's income and other circumstances. The PHA's also will have discretion to adjust the assistance payments according to changes in the payment standard. Because no additional funds will be provided to make adjustments increasing the amount of assistance payments, PHA's may choose to restrict the total number of households served over the life of the program in order to retain available amounts sufficient to cover such adjustments. However, it is expected that PHA's will be able to cover such adjustments by delaying for a time the reissuance of certificates which become available through normal tenant turnover.

Proposed revised section 8(d)(3) provides that only families determined to be very low-income (i.e., at or below 50 percent of area median) may qualify for assistance under the Housing Payment Certificate Program, unless the family previously received assistance under the United States Housing Act of 1937 or is a lower-income family that previously participated in programs under section 101 of the Housing and Urban Development Act of 1965, the National Housing Act, section 202 of the Housing Act of 1959, section 312 of the Housing Act of 1964, or any other provision of law, where appropriate, as determined by the Secretary. Preference is required to be given to families which, at the time they are seeking assistance, occupy substandard housing, are involuntarily displaced, or are paying more than 50 percent of income for rent. The first two of these preference criteria are already included for housing assisted under the United States Housing Act of 1937. The 50 percent of income for rent preference criterion is proposed for addition as a new statutory preference, in recognition of the fact that rent burden is a factor to be considered in determining those most in need of housing assistance.

However, proposed subsection (d)(4) would authorize the Secretary to override these three normally applicable preference criteria for special purposes. Thus, the Secretary under the Housing Payment Certificate Program could use certificates for (1) families who previously were assisted under the Public Housing or present Section 8 Programs under the United States Housing Act of 1937; (2) families who previously participated in programs under section 101 of the Housing and Urban Development Act of 1965, the National Housing Act, section 202 of the Housing Act of 1959, section 312 of the Housing Act of 1964, or any other provision of law, where appropriate, as determined by the Secretary; (3) families residing in units to be rehabilitated under the proposed Rental Rehabilitation Program; and (4) families whose certificates are funded under the Indian Housing Program under section 202 of the bill.

Subsection (d)(5) provides for "vacancy payments" in the program. Payments for vacant units would be limited to the remainder of the month during which the tenant leaves the unit.

Under subsection (d)(6), Housing Assistance Payments Contracts under the Housing Payment Certificate Program would be limited to a term of five years or less.

Under subsection (d)(7), PHA's would be required to inspect a unit selected for occupancy by a family holding a certificate, to determine that the unit met housing quality standards set by HUD before any assistance payment could be made. Thereafter, the contract would require annual or more frequent housing quality standard inspections by the PHA during the contract term. If a dwelling unit failed inspection, no assistance payment could be made unless the failure was promptly corrected and the PHA verified the correction.

Under subsection (d)(8), where the amount of the maximum annual commitment under an ACC exceeds the annual amount required for assistance payments, the Secretary would have the authority to reserve the excess amount for assistance payments in following years.

Proposed subsection (d)(9) would authorize the Secretary to provide certificates in connection with dwelling units assisted under the Indian Housing Program under section 202 of the bill, with two variations. With the approval of the Secretary, an Indian tribe or housing authority could administer assistance contracts for units it owns. Instead of a five year maximum contract term, a fifteen year contract could be used. These two variations are necessary to facilitate use of the program in connection with the Indian Housing Program described in section 202.

Section 204(d) revises section 8(j) of the United States Housing Act of 1937 which authorizes special terms and conditions for section 8 assistance to families renting manufactured home spaces or manufactured homes and spaces to accommodate a certificate program for such units.

Section 204(e) requires that tenants be given preference for assistance under the Public Housing Program, the Section 8 New Construction and Substantial Rehabilitation Programs, and the Rent Supplement Program if, at the time they are applying for assistance, they are paying more than 50 percent of income in rent. Pursuant to the Housing and Community Development Amendments of 1979, applicants for units in these programs must receive preference for such assistance if they occupy substandard housing or are involuntarily displaced. Section 204(e) is consistent with the purpose of the 1979 preference critieria which is to give special consideration to those who have the most urgent housing needs. This provision will also make these preference criteria for the Public Housing Program, the Section 8 New Construction and Substantial Rehabilitation Programs, and the Rent Supplement Program consistent with the criteria to be used in the Section 8 Existing Program and the Housing Payment Certificate Program, as described above.

AMENDMENTS AFFECTING TENANT RENTS OR CONTRIBUTIONS

Section 205 proposes certain changes affecting tenant rents or contributions and the gradual implementation provisions of the Omnibus Budget Reconciliation Act of 1981, including changes occasioned by the proposed Housing Payment Certificate Program amendments contained in this bill.

Annual review of family income

Subsection (a)(1) would move the requirement for annual review of family income to section 3(a) of the 1937 Act, to make the same annual recertification requirement applicable to all units assisted under the Act, including the new Section 8 Housing Payment Certificate Program.

Exemptions from the section 3(a) rent formula

Subsection (a)(2) would revise section 3(a) of the 1937 Act to provide exemptions from the rent payment formula set forth in that section for families participating in the Section 8 Housing Payment Certificate Program or in the public housing homeownership programs.

In the case of the Housing Payment Certificate Program, a similar, but not identical, formula for determining assistance

levels is set out separately in a proposed revised section 8(d)(2) of the 1937 Act. Certificate holders under the program will pay "rent" at levels higher or lower than those provided for in section 3(a), depending upon the price of housing selected by those families and the amount of subsidy produced by application of the payment standard formula.

For the public housing homeownership programs, the revisions to section 3(a) give the Secretary the discretion to permit families participating in public housing homeownership programs to pay a greater portion of their income for rent than is currently allowed under that section.

The Department's two main public housing homeownership programs are the Mutual Help Homeownership Opportunities Program and the Homeownership Opportunities Program for Low-Income Families (Turnkey III). The former program, limited to Indian Housing Authorities, is already exempt from the limitations imposed by section 3(a) pursuant to the provisions of section 203 of the Housing and Community Development Act of 1974. The Turnkey III Program is operated by public housing agencies (PHAs) and Indian Housing Authorities. There are also a few PHA demonstrations involving lease-purchase or other homeownership arrangements.

The primary objective of these homeownership programs—to provide eligible lower-income families with an opportunity to buy a home—is facilitated through a variety of means. Initially, participation is limited to those families which evidence a genuine potential for assuming the full obligations of homeownership. Upon admission to the Turnkey III program, the prospective homebuyer must execute an agreement with the PHA. The agreement gives the homebuyer an option to buy the home and sets forth conditions which must be met as a prerequisite to homeownership status. Currently, when the required monthly payments under the agreement would exceed the amount permitted by section 3(a), the prospective homebuyer is subject to removal from the homeownership program and loss of homebuyer status, thus reverting to PHA regular renter status.

The exemption would permit homebuyers whose required payments would exceed the section 3(a) limit to choose whether to pay the full amount and remain in the homeownership program. Those who prefer not to make the larger payment would be able to leave the homeownership program and transfer to PHA regular renter status.

Exemption from section 3(a) would serve to preserve homeownership opportunities for those lower-income families who would prefer to make monthly payments which exceed the section 3(a) rent cap in order to protect their equity and to continue to receive the benefits of potential homeownership. Moreover, it would be consistent with the Housing Payment Certificate Program contained in this bill, under which certificate holders could choose to pay more than the section 3(a) amount for rent.

Variations in tenant income ceilings

Subsection (b) would amend section 3(b) of the 1937 Act to permit the Secretary to establish income ceilings higher or lower than 50 percent of median on the basis of the Secretary's findings that such variations are necessary because of unusually high or low family incomes. The Secretary already has this adjustment authority for establishing income ceilings higher or lower than 80 percent of median, and comparable authority at 50 percent of median is appropriate, especially in light of the shift in emphasis toward assistance for very low-income families in all programs and the fact that the Housing Payment Certificate Program proposed in section 204 would restrict assistance for new housholds to those with very low incomes.

Implementation of tenant rent increases

Section 322(i) of the Omnibus Budget Reconciliation Act of 1981 gives the Secretary discretion to provide for the gradual phase-in of the rent increases (from 25 to 30 percent of adjusted income) for tenants receiving assistance when that Act became effective. Rent increases resulting from this phase-in, other changes in the 1981 Act and changes in Federal laws dealing with what benefits must or may be counted as income for housing assistance purposes are limited by section 322(i) to 10 percent a year.

Subsection (c) of this section would amend section 322(i) in several ways. In section 322(i)(1)(A), it would do the following: First, it would raise the limit on rent increases from 10 percent a year to 20 percent in order to permit a more rapid phase-in of the changes enacted in the 1981 legislation. Second, it clearly specifies the tenants protected by this section as those occupying housing assisted under the United States Housing Act of 1937, section 236 of the National Housing Act and the Rent Supplement Program on or before the effective date of regulations implementing the 1981 amendments. Third, the proposed 20 percent cap on rent increases for these tenants would be extended to include changes made with respect to homeownership opportunities programs, as described above, for tenants in occupancy on or before the effective date of regulations implementing those amendments.

Proposed section 322(i)(1)(B) would make the 20 per centum limitation in subparagraph (A) also cover increases in rent or contribution, as defined by the Secretary, for tenants converted to the new Housing Payment Certificate Program from the Section 8 Existing Finders Keeper's Program (where the tenant selects the unit) so long as assistance under the new program is for occupancy of the same unit, and would assure continued protection from such increases that result from the phase-in of 1981 amendments for all previously assisted families that convert to the Housing Payment Certificate Program from other programs under the United States Housing Act of 1937, section 236 of the National Housing Act, or section 101 of the Housing and Urban Development Act of 1965.

This provision is needed to protect families from any large percentage increases in rent or contribution that might occur from the combined effects of the 1981 Act amendments, the change to the different rent formula and the conversion from the fair market rent (FMR) system to the payment standard system. Changing to the payment standard system could affect previously assisted tenants even though fair market rents and the planned payment standards are expected to be the same amounts. This is true because tenants already under the fair market rent system have been eligible for exception rents and annual contract rent adjustments which are not subject to FMR limits. Units occupied by such tenants may have current rents much higher than the payment standard.

The revised sections 322(i)(1)(A) and (B) would protect tenants against burdensome increases in the amount of their rent or contribution, while assuring that statutory rent formulas are implemented on a timely and equitable basis. In particular, the proposed 20 percent cap would facilitate the correction of certain disparate rent levels among public housing tenants caused, in large part, by pre-1981 rent ceilings established by public housing agencies under the public housing program. A 1979 survey of public housing households determined that families with annual incomes above 50 percent of area median income were paying, on average, less than 18 percent of net adjusted income to rent—in contrast to 22.6 percent of adjusted income paid, on average, by all other public housing families. This inequity can only be corrected during the five-year phase-in period if the rent cap is increased from 10 to 20 percent. Otherwise, at the end of five years, many higher income public housing tenants would still be paying less than 30 percent of net income as rent. The 20 percent cap would make this virtually impossible.

The uniform application of this 20 percent cap to HUD-assisted programs would simplify HUD and PHA administration of the programs, would ease implementation of the new program, and would eliminate possible hardships on tenants who convert from the Section 8 Existing Finder's Keeper's Program. Uniform application of the cap would also assure equitable treatment for all families currently receiving assistance, regardless of whether they remain in their present program or transfer to the new program.

Proposed section 322(i)(1)(C) would provide that all tenants who were not occupying assisted housing on or before the effective date of regulations implementing the rent increases caused by the 1981 Omnibus Budget Reconciliation Act or the homeownership opportunities program amendment under the bill, or who were not transferring to the Housing Payment Certificate Program from the Section 8 Finder's Keeper's Program, would be subject to immediate rent or contribution determinations in accordance with applicable law, with no "phase-in." However, any tenant who was occupying assisted housing at the time of a future change in Federal law redefining which governmental benefits must or may be considered as income would have the effect of such a change in law limited by a 20 percent cap.

Proposed section 322(i)(1)(D) would authorize the Secretary to provide for delayed applicability or staged implementation of the procedures for determining a family's rent or contribution under the 1981 and 1983 amendments to the extent the Secretary determines that immediate application of such procedures would be impracticable, would violate the terms of existing leases, or would result in extraordinary hardship for any class of tenants.

Proposed section 322(i)(1)(E) would update the current provision that the gradual implementation provisions of section 322(i) shall remain in effect and may not be changed or superseded except by another provision of law specifically amending that subsection.

Proposed section 322(i)(1)(F) would provide that the 20 percent cap on rent increases would not apply to families whose rent payments are based on the welfare rent amount in those cases where the Secretary determines that the tenant will not bear the burden of the increase. Since welfare rents represent a designated portion of the welfare grant that is adjusted in accordance with the recipient's actual housing costs, an

increase in the welfare rent amount does not always represent an additional cost to the tenant because the welfare grant may be increased to cover the entire rent increase. If the cap on increases were applied to welfare rent in these instances, the Department would be arbitrarily prevented from collecting the amount that the welfare agency would pay if the tenant were in unassisted housing.

Paragraph (G) would transfer the requirement now contained in the last sentence of section 322(i)(1) of the Omnibus Budget Reconciliation Act of 1981 to paragraph (G) and extend the applicability of the requirement to provide that the procedures for determining tenant rents or contributions, as defined by the Secretary, contained in section 322 as well as section 205(a) of the Housing and Community Development Act of 1983, shall not result in a reduction in the amount of such rent or contribution below the amount paid by a tenant occupying housing assisted under the United States Housing Act of 1937, section 236 of the National Housing Act or section 101 of the Housing and Urban Development Act of 1965 before the effective date of regulations implementing the 1981 and 1983 amendments.

REVISED DEFINITION OF DISABILITY

Section 206 would amend the definition of "disability" contained in section 3(b)(3) of the U.S. Housing Act of 1937 and the definition of "developmentally disabled individual" contained in section 202(d)(4) of the Housing Act of 1959 to conform to the definition of "developmental disability" statutorily applicable to HHS programs under the Developmental Disabilities Assistance and Bill of Rights Act (P.L. 95-602). The current definitions applicable to developmental disability contained in the two sections which would be amended refer to a statute which no longer exists. Section 3(b)(3) of the U.S. Housing Act of 1937 and section 202(d)(4) of the Housing Act of 1959 provide that individuals who are disabled, as defined by section 102 of the Developmental Disabilities Services and Facilities Construction Amendments of 1970 (P.L. 91-517), are considered "families" who may be eligible for housing assistance under those programs. Section 102 of the 1970 Act amended definitions contained in Title IV of the Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963 (P.L. 88-164). Title IV of the 1963 Act, as amended in 1970, was repealed in 1975 (P.L. 94-103). Therefore, the definition in section 102 of the 1970 Act, upon which sections 3(b)(3) and 202(d)(4) rely, may no longer be legally valid.

Adopting this definition would not significantly change the current coverage of these programs. The new definition is somewhat more expansive in that it includes some additional disabilities for which coverage was previously unclear, and the age of onset shifts from before age 18 to before age 22. Neither of these changes, however, significantly increases the eligibility pool since most of these individuals would also be eligible as "handicapped" persons under the two statutes.

There are at least three benefits to be derived from the proposed change. First, the proposed change would help clarify the legal validity of the definition of "developmental disability." Second, updating the definition to the one currently used by HHS promotes consistency between HUD and HHS when housing and disability benefits are coordinated at the State and local level. Third, changing from the superseded definition to the one now applicable to HHS assures that the Department can use the currently accepted statutory definition of developmental disability.

PUBLIC HOUSING AGENCY RECEIVERSHIP AMENDMENT TO U.S. HOUSING ACT OF 1937

Section 207 would amend the United States Housing Act of 1937 to authorize the Secretary to apply to a Federal or State court for appointment of a receiver of a public housing agency if, in the opinion of the Secretary, the agency is in substantial default of the covenants and conditions to which it is subject. If the court determines that such a substantial default has occurred, a receiver is to be appointed without regard to collateral questions sometimes considered under common law standards such as availability of alternative remedies. The amendment also permits the Secretary to seek appropriate temporary or preliminary relief pending the court's determination on the appointment of a receiver. Injunctive relief, such as freezing the assets of the agency or mandating remedial actions, may be appropriate where it appears that project assets are being misused or that health and safety violations are present. The receivership would terminate upon petition by the Secretary or when the court otherwise determines that all defaults have been cured and that the public housing projects of the agency will thereafter be operated by it in a manner consistent with the Act.

Under current law, the Secretary is authorized, upon the occurrence of a substantial default, to require either conveyance of title or delivery of possession of a project to the Secretary. This remedy, because it operates only at the project level, is inadequate to address deficiencies that may exist at the administrative or policy level within the public housing agency. The amendment recognizes, however, that public housing agencies are created under State law and their governing bodies appointed by State or local officials. Accordingly, direct usurpation by the Department of the internal administration of a State-created entity would be inappropriate. Receivership provides for an independent, court-supervised management of the affairs of the agency, obtainable only upon the Department's demonstration before an independent tribunal of the substantiality of the default requiring such intervention.

DEMOLITION AND DISPOSITION OF PUBLIC HOUSING

Section 208 would amend the United States Housing Act of 1937 by adding a new section 17 to provide independent authority to approve and fund applications from public housing agencies (PHA's) for the demolition or disposition of public housing projects or portions of public housing projects. This is a reintroduction of a similar amendment affecting demolition that was proposed last year, modified to cover disposition applications (as well as those for demolition) and to reflect the concerns of Congress that affected tenants and local governments be consulted before approval of an application.

The 1937 Act currently contains two provisions dealing with the demolition or disposition of public housing projects—the section 14 Comprehensive Improvement Assistance Program (CIAP) and section 6(f). Section 14(f) of CIAP authorizes the Secretary to approve and fund applications for public housing demolition. It does not, however, set forth criteria for approving a demolition and imposes such extensive and rigorous requirements that it becomes difficult, if not impossible, to attain legitimate and necessary objectives in the case of demolition. For example, section 14(d) requires the applicant to submit an application containing detailed assessments of the physical conditions, the normal schedules of replacement of equipment systems and structural elements, and the improvements needed to upgrade the management and operation of each project for which assistance or approval is requested. Additionally, the applicant must submit a comprehensive plan designed to address the problems and needs of all projects identified in the assessment on both a short- and long-term basis. While such requirements are appropriate for modernization activities under CIAP, in general the nature of demolition activity is such that this type of assessment is not suitable. Demolition applications are more analagous to emergency or special needs applications, and, like those activities, should not be subject to the requirements of section 14(d). Moreover, the strict unit-by-unit replacement rule under section 14(f) for demolition may force PHA's to continue the operation of obsolete projects or parts of projects when it is neither desirable nor feasible to replace such projects.

Section 6(f) authorizes the modification or closeout of public housing projects. It does not, however, offer specific guidance on approving a disposition or a demolition of part of a project, or on the steps (including tenant protections) which a PHA must undertake to secure approval of its application.

Proposed section 17 would give PHA's greater flexibility with respect to decisions about their housing stock, and would establish criteria for approval of PHA requests to undertake such disposition or demolition actions, including assuring tenant and local involvement in the decision to demolish or dispose, without imposing inappropriate CIAP requirements. Further, by authorizing demolition or disposition when funds cannot reasonably be expected to be available to rehabilitate the project, it eliminates the current anomaly of forcing PHA's to operate what is clearly undesirable housing for the residents.

Specifically, proposed sections 17(b) (1) and (2) would require that (1) for applications proposing demolition or partial demolition, a determination be made that the project or portion of the project is obsolete as to physical condition, location or other factors, making it unusable for housing purposes and that no program of modification is feasible to return the project or portion of the project to useful life, or (2) for applications proposing partial demolition of a project, a determination be made that the demolition will help assure the useful life of the remainder of the project. These provisions would give the Secretary greater flexibility in approving applications for partial demolition.

Proposed section 17(b)(3) would require the Secretary, for applications proposing disposition of real property, to determine that retention of the property is not in the best interests of the tenants or public housing agency and that the net proceeds of the disposition will be used to retire outstanding indebtedness in accordance with provisions of the annual contributions contract and, if proceeds remain, that they will be used in accordance with a plan approved by the Secretary.

Proposed section 17(c) would impose additional conditions for approval and funding of an application. Consultation by the PHA with tenants to be affected by the action and with local government officials would be required. Displaced families would be provided an opportunity by the PHA to relocate to other decent, safe, sanitary and affordable housing, including Section 8 housing. These criteria for approval would assure that each application would be assessed on its particular merits, with appropriate evaluation of the relative interests of all affected parties.

Proposed section 17(d) would authorize the Secretary to make available financial assistance for applications approved under this authority, using available annual contributions authorized under section 5(c) of the 1937 Act, including annual contributions made available for use under section 6(f) and under section 14(b) of the Act.

Proposed section 17(e) would provide that disposition of property determined by the Secretary to be excess to the needs of the project, or to be incidental to continued operation of the project, would not be subject to the requirements of this section. Such disposition is governed by other Departmental procedures which establish appropriate guidance for making such determinations, and which provide the necessary flexibility for dealing with purely administrative transfers, such as granting rights-of-way or easements, or for approving routine sales such as disposition of excess undeveloped land purchased in connection with a development since completed.

REPEAL OF REQUIREMENT FOR SIGNIFICANT COMMUNITY REPRESENTATION ON GOVERNING BOARDS OF SECTION 202 PROJECTS

Section 209 would amend section 202(d)(2)(B) of the Housing Act of 1959 to delete the requirement (added in 1978) that non-profit entities receiving loans for developing housing for the elderly and handicapped must include, on their governing boards, members selected in a manner to assure significant representation of the views of the community in which the project is located.

A significant number of national organizations which are active sponsors of section 202 housing have objected strenuously to this requirement. The sponsors have pointed out that, as national organizations, it is impossible for them to have representatives on their governing boards from all communities in which they may wish to operate. Similar concerns have been expressed by State-wide housing corporations, as well as county and community groups, which find it difficult to have representatives from all areas in which they intend to operate. The existing requirement of section 202 curtails participation by many organizations which have been organized specifically to share resources and to develop a more comprehensive and coordinated approach to providing housing for the elderly or handicapped. Moreover, with the exception of one or two isolated cases, there is no evidence of the need for this provision.

OPERATING ASSISTANCE FOR TROUBLED MULTIFAMILY HOUSING PROJECTS

Section 210(a) would amend section 201 of the Housing and Community Development Amendments of 1978 to delete the Secretary's discretionary authority to provide operating subsidies under section 201 to troubled multifamily housing projects which, though HUD-assisted, are not covered by a mortgage which is insured or was formerly insured under the National Housing Act. Under existing section 201(c)(1)(A), projects which are assisted under the section 236 program of the National Housing Act or the Rent Supplement Program of the Housing and Urban Development Act of 1965 are eligible for assistance, even if not covered by a mortgage insured under the National Housing Act.

This proposal would restore the coverage of the "troubled projects" program to that originally proposed by the Department in 1978. It would permit scarce resources to be directed toward insured projects to prevent mortgage assignments and foreclosures and to mitigate otherwise potentially excessive losses resulting from insurance claims, as well as to avoid substantial rent increases and physical deterioration in HUD-assisted projects for which the Department has a direct responsibility. Responsibility for further assistance to projects which are not insured by HUD should be borne by State and local government.

Subsection (b) would amend section 236(f)(3) of the National Housing Act to extend through September 30, 1985 the period during which amounts in the section 236 rental housing assistance fund may be approved in appropriation Acts for use in the Troubled Projects Program. Existing law subjects the making of payments from the fund to approval in an appropriation Act, and prohibits any amount from being so approved for any fiscal year beginning after September 30, 1982.

This proposed amendment is necessary to permit amounts in the rental housing assistance fund to be used for the Troubled Projects Program during fiscal years 1984 and 1985. The Department intends to request approval, in the HUD appropriation Act for fiscal year 1984, to use the $30 million expected to be received in the rental housing assistance fund during that year.

TENANT PARTICIPATION IN MULTIFAMILY HOUSING PROJECTS

Section 211 would amend section 202 of the Housing and Community Development Amendments of 1978 to change its coverage. Section 202 requires the Secretary to assure, among other things, that tenants of "multifamily housing projects" have a chance to participate in certain project management decisions, and are permitted to organize tenant associations to represent tenant interests. Section 202 defines its coverage by a cross reference to section 201(c) of the 1978 Amendments, thus subjecting projects eligible for troubled projects operating subsidies to section 202's requirements. Consistent with the amendment in section 210, this section would exclude State-aided, uninsured projects from section 202's coverage.

Extension of section 202's requirements to State-aided, projects appears to have been unintentional. The Senate provision from which section 202 was drawn applied only to HUD-insured and HUD-owned projects. The conference report indicates that the Senate provision was adopted, with an amendment to "conform" its coverage to that of the troubled projects program. Research has indicated no conscious intent to apply section 202's provisions to State-aided projects. Because these projects are supervised by State agencies rather than by HUD, the Department believes that any special requirements regarding relationships between owners and tenants should be determined by the supervising State agencies.

Section 211 would also extend section 202's coverage to projects otherwise covered, but which are HUD-owned. Section 202 currently applies to projects whose mortgages are held by the mortgagee or HUD, or which were acquired by HUD and subsequently resold subject to certain conditions, but not to projects in HUD's inventory. This amendment would remedy this anomaly by extending section 202's statutory applicability to include otherwise covered, HUD-owned projects.

PREVENTING FRAUD AND ABUSE IN HUD-ASSISTED HOUSING

Section 212 contains a number of provisions to help prevent fraud and abuse in HUD's assisted housing programs.

Subsection (a) would require State unemployment agencies to release information to HUD and public housing agencies concerning applicants' wage information and unemployment benefits. The State agencies would be required to establish safeguards, pursuant to regulations issued by the Secretary of Labor, to assure that disclosed information is used only to determine eligibility for benefits or amount of benefits under HUD programs.

Subsection (b) would provide that the entity responsible for determining eligibility and/or level of benefits under the United States Housing Act of 1937, section 101 of the Housing and Urban Development Act of 1965 or section 221(d)(3) (BMIR) or 236 of the National Housing Act, including PHA's and owners of such projects, shall deny participation in the particular program benefits to any applicant who knowingly submitted incorrect or misleading statements, concealed or withheld any relevant facts or otherwise violated these Acts or any of their regulations.

Subsection (d) would amend section 214(b) of the Housing and Community Development Act of 1980 to extend the prohibition against financial assistance to certain aliens to include the section 221(d)(3) (BMIR) program.

Access to data bases maintained by State unemployment agencies, as authorized by subsection (a), is needed to enable the Department to undertake post-audit, quality control, and other investigative reviews based on computer matching to such data bases. This authority would help the Department to assure that complete and accurate information has been submitted by beneficiaries of HUD programs. The Department of Agriculture has been given similar authority in connection with its food stamp program.

Subsection (b) would provide clear statutory authority for public housing agencies and owners of projects assisted under the section 8, Rent Supplement, section 221(d)(3) (BMIR) and section 236 programs to disqualify an applicant from eligibility for admission or for continued benefit if the applicant has made incorrect or misleading statements or concealed relevant facts. The public housing agencies and owners of assisted projects would follow up and verify information affecting eligibility and benefit level based on data furnished by the Secretary. By allowing resolution of such matters at the local level, several goals are achieved. The Department will be providing a means for combating fraud, assisting in debt collection efforts, and allowing for greater local administration of the program.

Since the section 221(d)(3) (BMIR) program also provides a financial benefit to tenants, it should be included, as provided by subsection (d), along with the other rental assistance programs in the prohibition against financial assistance to aliens.

Also, the amendment is needed to prevent the anomalous situations where some of the tenants in a section 221(d)(3) (BMIR) project are subject to the 1980 prohibition (Rent Supplement tenants) while others are not.

TITLE III—PROGRAM AMENDMENTS AND EXTENSIONS

EXTENSION OF FEDERAL HOUSING ADMINISTRATION MORTGAGE INSURANCE PROGRAMS

Section 301 of the bill would extend (through September 30, 1985) the authority of the Secretary of Housing and Urban Development to insure mortgages or loans under certain HUD-FHA mortgage or loan insurance programs contained in the National Housing Act. A technical amendment has also been included to make clear, for authorities proposed for extension, that the authority to make commitments to insure under these programs also is extended through September 30, 1985. An extension through September 30, 1983 is proposed for the section 235 program of homeownership for lower income families.

Under existing law, the authority of the Secretary of Housing and Urban Development to insure mortgages and loans under these programs will expire on May 20, 1983. After that date, the Secretary may not insure mortgages or loans under any of the major HUD-FHA insuring authorities contained in the National Housing Act, except pursuant to a commitment to insure issued before that date.

Insuring authorities which will expire on May 20, 1983 and are proposed for extension through September 30, 1985, include those for the following HUD-FHA mortgage or loan insurance programs: title I—property improvement and manufactured home loan insurance; section 203—basic home mortgage insurance; section 207—rental housing insurance; section 213—cooperative housing insurance; section 220—rehabilitation and neighborhood conservation housing insurance; section 221—housing for moderate-income and displaced families; section 223—miscellaneous housing insurance, including insurance in older, declining urban areas and for existing multifamily housing projects and hospitals; section 231—housing for the elderly; section 233—experimental housing; section 234—condominiums; section 237—special mortgagors; section 240—homeowner purchases of fee simple title; section 241—supplemental loans for multifamily housing projects, health facilities and energy conserving improvements; section 243—homeownership for middle-income families; section 244—mortgage insurance on a co-insurance basis; section 245—mortgages insurance on graduated payment mortgages; and title X—land development. The text of the extension for section 245 appears in the proposed rewrite of that provision in section 324 of this bill.

The proposed extensions of the above-listed mortgage insuring authorities are designed to guarantee the continued availability of FHA mortgage insurance and thus to maintain and enhance the Department's capacity to contribute to achievement of the national housing goal of "a decent home and a suitable living environment for every American family."

In the last session of Congress, the Administration, as part of its proposed Housing and Community Development Amendments of 1982 (H.R. 6020 and S. 2361), sought an extension of section 235 of the National Housing Act until September 30, 1983 in order to assure that units in the pipeline prior to that time could be insured. The 1982 extension also provided for the unconditional termination of section 235 insurance authority on September 30, 1983. That proposal has been repeated in this section.

Extensions have not been included for the following provisions of the National Housing Act: section 235(q) (countercyclical economic stimulus), section 236 (rental and cooperative housing for lower income families), section 222 (mortgage insurance for servicemen), section 232 (nursing homes), section 242 (hospitals), title VIII (armed forces-related housing) and title XI (group practice facilities).

The section 235(q) authority (countercyclical economic stimulus), scheduled to expire on May 20, 1983, is not proposed for extension. This emergency authority has never been activated.

Section 236 was routinely extended until May 20, 1983 by H.J. Resolution 612. It had previously been extended until September 30, 1982 to permit projects in the pipeline to be processed. Most such projects have not been processed or cancelled, and those still in the pipeline have secured commitments which will make possible the provision of insurance after May 20, 1983 pursuant to a commitment to insure made before that date. Thus, there is no necessity to extend the insuring authority.

The program of mortgage insurance for servicemen under section 222 would be permitted to expire on May 20, 1983. Military personnel, Coast Guard personnel and employees of the National Oceanic and Atmospheric Administration certified as requiring housing by the Secretaries of Defense, Transportation and Commerce, respectively, are eligible under this program. However, since the Department of Defense no longer participates in the program, it has fallen into disuse. In FY 1981 only 260 mortgages were insured, and in FY 1982 this number fell to 11.

An extension of the authority to provide insurance for nursing homes and intermediate care facilities under section 232 is not being sought beyond the present May 20, 1983 expiration date. Nursing homes and intermediate care facilities are eligible for Medicare and Medicaid reimbursement. Many such facilities currently in existence have been developed and financed without the benefit of federally insured mortgages. Section 232 has not been a high-volume mortgage insurance program, and there appears to be no reason to believe that the private market cannot meet the financing needs of such facilities in the absence of the section 232 program.

The Section 242 hospital insurance program similarly would appear to require no extension. The Administration's attempts to bring cost containment to the health and medical sector, plus the fact that many areas are already over-bedded due to excess hospital facilities, suggest that only a very limited need exists for financing hospitals. Since the private market has provided financing to many of the hospitals currently in existence, and appears quite capable of meeting credit needs in those few cases where new hospital construction is appropriate, extension of section 242 is not being sought beyond the current expiration date of May 20, 1983.

While the section 244 coinsurance program is proposed for extension, the limitation contained in section 244(d) will be permitted to expire. That provision limits the amount of mortgages and loans which may be coinsured before May 21, 1983, to 20 percent of the aggregate principal amount of all mortgages and loans insured under Title II of the Act each year. The 20 percent limitation applies separately to multifamily and single family mortgages.

With respect to multifamily mortgages, HUD anticipates a drop in the overall amount of multifamily mortgage insurance written in the FY 1983-1984 period. This will occur at a time when HUD has developed coinsurance regulations for the purchase of refinancing of multifamily properties (under section 223(f)) and for private lender financing of new construction or substantial rehabilitation (under section 221). The coincidence of the anticipated decrease in the overall amount of multifamily insurance to be written and increased policy and program emphasis upon coinsurance makes the existing 20 percent limtitation of section 244(d) an inhibiting factor in carrying out FHA multifamily operations. Expiration of the restriction will permit a more extensive and more effective FHA multifamily insurance program than would otherwise be possible.

With respect to single family insurance, HUD estimates that both applications and the amount of insurance written in FY 1983 and FY 1984 will exceed the FY 1982 level. Although single family operations may continue to work within the 20 percent limit for the present, HUD will be making improvements in its coinsurance regulations with a view toward making the coinsurance approach more attractive to lenders. HUD anticipates a substantial increase in coinsurance activity as a consequence.

The benefits of coinsurance are clear and compelling: it maximizes the role of the private sector, it reduces processing time through delegated processing, and it limits HUD's exposure to losses through risk-sharing. By permitting expiration of the current 20 percent restriction, increased cooperation and direct involvement of the private sector in FHA insurance programs will be enhanced.

The authority to insure armed forces housing under title VIII of the National Housing Act (sections 809-810) is not proposed for extension beyond the current May 20, 1983 expiration date. These programs have been inactive for several years—no insurance was written under their authority during fiscal years 1981 and 1982 and no applications for insurance are currently pending.

Finally, there has been little activity under the Title XI authority to insure Group Practice Facilities, suggesting that whatever need exists is being met adequately by the private market. Accordingly, no further extension of this authority is being sought.

AUTHORIZATION FOR APPROPRIATIONS TO COVER LOSSES TO THE GENERAL INSURANCE FUND

Section 302 would amend section 519(f) of the National Housing Act to authorize the appropriation of such sums as may be necessary to cover losses of the General Insurance Fund. Existing law contains an overall ceiling on the amounts which may be appropriated for this purpose, which would be removed by this amendment.

Losses sustained as a result of the sale of acquired property are not a function of the amount authorized for appropriations to restore the losses. The losses represent the difference between the purchase price of units acquired through the Department's insurance activities, expenses incurred through maintenance and repair, and the

proceeds realized from sale of these properties. The authorization does not limit the loss but merely places a limitation on the amount which may be sought in recompense for losses already sustained. The present authorization limitation requires the Department to seek an increase in the amount authorized for appropriation before an appropriation to restore the losses can be enacted. The proposal would simplify this process by removing the limitation and authorizing the appropriation of the sums necessary for this purpose.

RESEARCH AUTHORIZATIONS

Section 303 would authorize the appropriation of $18 million in fiscal year 1984 and necessary sums for fiscal year 1985 for the Department's Research and Technology Program. Particular areas of study in fiscal year 1984 will include:

The efficiency and effectiveness of assisted housing programs through reforms of existing programs and evaluation of alternative programs;

Issues relating to the Department's mortgage insurance programs, including alternative housing finance mechanisms (such as alternative mortgage instruments), alternative tax and other financial incentives for housing, and the role of secondary mortgage markets;

Encouragement of affordable housing and homeownership by reducing the component costs of housing (costs of development, building, financing, and operating);

The effectiveness of the Department's community development programs;

Better methods of community management and delivery of local government services;

Successful neighborhood strategies;

New or improved approaches to urban economic developing, including the Administration's Enterprise Zone Program; and

Issues related to fair and nondiscriminatory housing.

Inclusion of the $18 million funding authorization for fiscal year 1983 is a technical amendment to reflect the amount which was in fact appropriated for Research and Technology for that year.

CANCELLATION OF DEBT OWED THE TREASURY AND LIQUIDATION OF NEW COMMUNITIES PROGRAM

Section 304 authorizes liquidation of the New Communities Program and contains provisions needed for its orderly termination. This program was first authorized in title IV of the Housing and Urban Development Act of 1968, and was reauthorized with certain statutory amendments in title VII of the Housing and Urban Development Act of 1970. Between February 1970 and July 1979, HUD approved 16 new communities, of which 13 were financed in part with the proceeds of the sale of debentures guaranteed as to principal and interest by the Secretary.

Section 304(a) would authorize liquidation of the program and the transfer of the assets and liabilities of the New Communities Revolving Fund to HUD's Revolving Fund (Liquidating Programs) Account. The New Communities Revolving Fund was established to provide for the timely payments of liabilities incurred as a result of debenture guarantees. This revolving fund includes fees and income received in the program, and the statute provides that, in the event of a shortfall in the revolving fund, obligations may be issued to the Secretary of the Treasury in order to borrow sufficient monies to cover these costs. The costs of salaries and expenses for operating the New Communities Program, including administrative and nonadministrative expenses, have also been funded from the revolving fund. Interest accrues on the Treasury borrowing at rates periodically established by the Treasury. Because of interest compounding and because the return on disposition of assets acquired by foreclosure or otherwise has been substantially smaller than the costs of paying off the guaranteed debentures, the revolving fund has accumulated a debt to the Treasury estimated to be $399 million at the end of fiscal year 1983.

The transfer which section 304(a) would authorize would take place upon enactment of section 304(a) and approval of the transfer in an appropriation Act.

Section 304(b) makes clear that the authority governing HUD's Revolving Fund (Liquidating Programs) is sufficient to permit all necessary functions regarding the liquidation of the program to be performed. The second sentence of this subsection is based directly on the New Communities Revolving Fund's authority under section 717(c) of title VII, and is also intended to assure that there will be adequate authority for the liquidation. Residual program personnel would no longer be paid from the New Communities Revolving Fund but would be paid from the Department's Salaries and Expenses, HUD account.

Section 304(c) would confer Treasury borrowing authority on the Secretary, and contains conventional language concerning the Secretary of the Treasury's reciprocal duties and powers. The central purpose of the borrowing authority is to assure that payments on guaranteed debentures can be made, notwithstanding the cash position of the Revolving Fund (Liquidating Programs) at any given time. This authority would also permit the redemption of debentures, if the levels of the Treasury borrowing rate made such action advantageous to the Government. Were this borrowing authority omitted, HUD would be vulnerable to claims by debenture holders of impairment of their rights.

Section 304(d) provides that the Secretary's duty to repay principal and accrued interest on obligations issued to the Treasury for the New Communities Program is cancelled, upon transfer of the New Communities Fund's assets and liabilities to the Revolving Fund (Liquidating Programs). The cancellation of this debt to the Treasury, estimated to be $399 million at the end of fiscal year 1983, is proposed because it is unrecoverable, and the cost of servicing it is escalating. In fiscal year 1983 alone, the interest to Treasury is estimated to be $34.5 million. If the debt to Treasury remains outstanding, the interest in 1984 is estimated to be more than $37 million. To continue to service this debt would require further borrowings from the Treasury, creating more debt that will forever be beyond the capability of the program to repay. Cancellation of the debt will clear the books and allow the New Communities Program to be terminated. In 1984, it is expected that program costs (excluding any Treasury interest) can be funded from program funds. However, depending on the timing of receipts and the transfer to the Revolving Fund (Liquidating Programs), additional borrowings from the Treasury during the year for the New Communities Program may be necessary. In any event, under the authority of the Revolving Fund (Liquidating Programs), amounts in the fund which are excess to its needs are required to be paid to the Treasury at least annually.

Section 304(e) repeals titles IV and VII except for those sections technically necessary to remain in effect in order to enable the Department to meet its obligations under these titles. A savings clause is also included for those guarantees already made under titles IV and VII.

The proposed cancellation of obligations, including principal and accrued interest, is patterned on the analogous legislation for the Saint Lawrence Seaway Development Corporation, 33 U.S.C. § 985(b) (as to interest) and § 311, Department of Transportation and Related Agencies Appropriation Act, 1983, Pub. L. 97-369 (as to principal).

CANCELLATION OF DEBT OF SPECIAL ASSISTANCE AND EMERGENCY MORTGAGE PURCHASE ASSISTANCE FUNDS OF THE GOVERNMENT NATIONAL MORTGAGE ASSOCIATION

Section 305(a) would cancel the Government National Mortgage Association's (GNMA's) duty to repay approximately $8 billion which it owes the Treasury from operations in its Special Assistance Functions (SAF) and Emergency Home Purchase Assistance (EMPA) Programs, and accrued interest on these borrowings. It would also provide for the cancellation of any indebtedness incurred by these programs in the future, on an annual basis.

In these programs, GNMA has borrowed funds from the U.S. Treasury to finance mortgage purchases, up to commitment levels approved by Congress. GNMA then places these mortgages in its inventory or sells them to private investors at a discount which reflects current market yields. The difference between the price at which GNMA purchases mortgages and the price at which these mortgages are then sold to private investors is a subsidy to encourage the construction of certain types of housing. No monies have ever been appropriated to fund this subsidy. GNMA uses the proceeds of mortgage sales to retire its Treasury debt and to finance its operations.

The $8 billion figure cited above represents the total amount of debt incurred by GNMA in its SAF and EMPA Programs in excess of the face value of the mortgages held in its portfolio. This figure includes interest accrued on the debt. Interest is compounded daily, thereby inflating the principal amount owed to the Treasury. Given the statutory structure of the programs, GNMA has no effective means of ever repaying this debt. Thus, the debt should be regarded as a paper debt—an artificial liability of GNMA as well as an artificial asset of the Treasury—and cancelled.

GNMA's authority to issue commitments to purchase mortgages under the EMPA authority expired on October 1, 1981. Some purchases are still being made, however, pursuant to commitments issued before expiration. Its commitment authority under SAF expired on September 30, 1982, but an additional $500 million in commitment authority was included in the 1983 Continuing Resolution. GNMA will still have to borrow funds from the U.S. Treasury for some time in order to meet its outstanding purchase commitments. Due to the large accumulation of GNMA debt, provision for annual cancellation of this debt is needed in order to prevent the recurrence of existing problems.

Section 305(b) would provide for the transfer of all assets and liabilities acquired or incurred pursuant to sections 305 (SAF) and 313 (EMPA) to a management and liquidation functions fund established pursuant to section 306 of the FNMA Charter Act.

Section 305(c) would repeal sections 305 and 313, but with a savings clause regarding purchases or commitments to purchase mortgages under these sections prior to their repeal. As a technical conforming amendment section 3(b) of the Emergency Home Purchase Assistance Act of 1974 would also be repealed. The Administration does not intend to reactivate the EMPA function or seek an extension of its SAF commitment authority. The Tandem Program used in SAF and EMPA is an excessively expensive method of increasing the housing supply. Moreover, this costly subsidy often tends to benefit those with little or no need for financial assistance in order to obtain decent, safe and sanitary housing.

ELIMINATION OF REQUIREMENT THAT FHA INTEREST RATES BE SET BY LAW

Section 306 would amend the insuring authorities in the National Housing Act which are proposed for extension beyond fiscal year 1983 to allow an insured mortgage or loan to bear interest at a rate agreed upon by the borrower and the lender. These authorities are: title I—property improvement and manufactured home loan insurance; section 203—basic home mortgage insurance; section 207—rental housing insurance; section 213—cooperative housing insurance; section 220—rehabilitation and neighborhood conservation housing insurance; section 221—housing for moderate-income and displaced families; section 231—housing for the elderly; section 234—condominiums; section 240—homeowner purchcses of fee simple title; section 241—supplemental loans for multifamily housing projects, health facilities and energy conserving improvements; and title X—land development.

The proposal would repeal section 3 of P.L. 90-301—HUD's interim authority to establish maximum FHA interest rates—as well as section 4 of that Act, which established a commission on interest rates which expired in 1969.

Section 306(b)(11) would amend section 235 of the National Housing Act to provide for continuation of the Secretary's authority to set interest ceilings essentially in the same manner as is authorized under present law. Since the section 235 subsidy is the difference between the actual interest rate on the mortgage and a below market rate set by HUD, to allow negotiated interest rates in this program might prove prohibitively expensive.

The administered ceiling on the FHA contract interest rate has outlived its usefulness. The ceiling is an outdated manifestation of concern that some lenders would take advantage of buyer ignorance and charge an "above market" rate of interest. Mortgage rates were relatively stable in the post-World War II years by today's standards, but differed among various regions of the country. This difference reflected the relatively greater demand for funds in some areas and the immobility of mortgage funds across regions. In the interest of promoting a truly national mortgage market and facilitating the flow of funds between regions, FHA attempted to set a national mortgage rate.

Over the years the perception has developed that, by setting a ceiling, FHA determines mortgage interest rates. This is simply not the case. FHA mortgages are sold to investors at market yields. Investors discount the loans to bring the yield up to those available on alternative investments. These discount "points," although they cannot legally be charged directly to the borrower, can be ultimately passed on indirectly, typically in the price charged by the seller.

Mortgage markets are now national in scope and extremely competitive. Homebuyers can readily obtain information on the going rate for a mortgage loan, and can negotiate for themselves a market interest rate. Thus, the ceiling is no longer needed.

The recent volatility in interest rates has made the ceiling extremely difficult to administer. The FHA ceiling must reflect current market interest rates if homebuyers are to obtain mortgage credit. When interest rates move by as much as five discount points within a week, as they have in the recent past, it becomes increasingly difficult to administer the contract interest rate effectively.

In summary, the FHA will follow the conventional mortgage market by letting the borrower and lender determine the mortgage interest rate.

REPEAL OF SECTION 367(b)(2)(A) OF THE MULTIFAMILY MORTGAGE FORECLOSURE ACT OF 1981

Section 307 would repeal section 367(b)(2)(A) of the Multifamily Mortgage Foreclosure Act of 1981. This section requires that, if the majority of housing units in a project foreclosed under the Act are occupied at the time of sale, the purchaser shall be required to continue operating the project in accordance with the terms of the title II insurance program or section 312 loan program under which assistance was originally provided, or any applicable regulatory or other agreement in effect immediately before foreclosure.

This repeal of section 367(b)(2)(A) would remove a potentially burdensome obstacle to the disposition of foreclosed properties to private purchasers. In some instances, the present language would mandate the continued use of such properties for low- and moderate-income housing, without regard for the economic consequences to the Federal Government or the purchaser of such a requirement. The amendment would retain section 367(b)(1), which provides the Secretary with discretionary authority to require continued operation in accordance with the original program terms, but does not compel the use of this authority if conditions warrant a different approach.

TREATMENT OF FHA SINGLE FAMILY PREMIUMS

Section 308 would make certain technical corrections relating to the treatment of mortgage insurance premiums (MIP's) under HUD's single family mortgage insurance programs. HUD is proposing to implement by regulation its authority to charge a single, lump-sum MIP covering the full term of the mortgage at the time the loan is closed. As part of implementing the new system, HUD proposed last year to amend certain sections of the National Housing Act to increase the otherwise applicable maximum dollar mortgage amounts by the amount of the MIP, and to exclude the amount of the premium from "cost of acquisition" for purposes of determining minimum down payment requirements. Congress enacted these proposals as section 201 of the Omnibus Budget Reconciliation Act of 1982.

One of the purposes of the amendments was to permit the homebuyer to add the amount of the MIP to the amount of the insured loan, thereby assuring that implementation of the new system would not increase existing downpayment requirements. Because of their placement, however, the amendments did not completely fulfill this intent.

In addition to statutory provisions directly addressing downpayment requirements, the amount of the required downpayment is also affected by maximum loan-to-value ratios. For example, section 203(b)(2) of the National Housing Act provides that insured loans may not exceed an amount equal to the sum of 97 percent of the first $25,000 of the "appraised value" of the property and 95 percent of the "appraised value" in excess of $25,000. No amendment to this and other loan-to-value ratio requirements was included in the 1982 Reconciliation Act.

By longstanding administrative practice, the Department has calculated maximum loan-to-value ratios on a basis which included closing costs in "appraised value." Consistent with this practice, the Department intend to include also the amount of the up-front premium as an element of "appraised value" for the purpose of calculation of the maximum loan-to-value ratio. The result of this will be that in the case of loans which are at the maximum ratio before consideration of the up-front premium, the required downpayment will be increased by the percentage resulting from the applicable loan-to-value ratio (5 percent in the case of a loan covered by the ratio provision cited above where the value exceeds $25,000).

Subsection (a) would correct this unintended result by providing in one place the general authority to increase, by the amount of the MIP, the otherwise applicable single family maximum mortgage amount—irrespective of whether the amount is arrived at as a result of the relevant dollar or loan-to-value limitation. Subsection (b) contains technical conforming amendments to strike certain amendments made by the 1982 Reconciliation Act which would be subsumed under the general authority proposed in subsection (a).

Subsection (c) contains a technical amendment to assure the continued applicability of the prohibition stated in section 201(g) of the 1982 Reconciliation Act against implementation of the provisions providing for increases in mortgage amounts and exclusions from down payment requirements unless HUD determines that the one-time MIP collection plan is actuarially sound.

AUTHORITY TO USE THE MULTIFAMILY MORTGAGE FORECLOSURE ACT OF 1981 FOR MORTGAGES INSURED UNDER THE COINSURANCE PROGRAM

Section 309 would amend the Multifamily Mortgage Foreclosure Act of 1981 to authorize lenders participating in the Multifamily Coinsurance Program to use the Act's nonjudicial foreclosure procedures for mortgages in default. The Act is currently limited to certain multifamily mortgages held by the Secretary.

The Coinsurance Program authorized by section 244 of the National Housing Act requires that eligible mortgagees participating in the program assume a percentage of any loss on an insured mortgage, advance, or loan in direct proportion to the amount of the coinsurance. The mortgagee, in turn, is delegated the authority to carry out a full range of underwriting functions and appropriate responsibilities for servicing, management oversight, foreclosure and property disposition pursuant to regulations issued by the Secretary.

This amendment is being proposed to reduce unnecessary delay and, therefore, save money. Delays in foreclosing defaulted mortgages, caused by extensive foreclosure periods, increase the risk of property deterioration and loss by vandalism, waste or

other damage. They result in increased loss to the mortgage insurance fund and increased costs associated with management and holding expenses. The flexibility afforded by use of nonjudicial foreclosure procedures would permit the Secretary to assure that such mortgages are dealt with as expeditiously as those held by HUD, while providing appropriate protections for the best interests of owners, residents of the involved projects, local communities and the Federal government. Minimizing the adverse effects of lengthy foreclosure proceedings and reducing unnecessary litigation should encourage more lenders to participate in the Coinsurance Program.

The amendments would generally make the Act's non-judicial foreclosure procedures available for coinsured lenders on the same basis as for the Secretary. This would include retention of the mortgagor protections presently contained in the Act. Specifically, the amendments would continue the requirement that the Secretary be the guarantor of any misconduct or financial default on the part of the foreclosure commissioner. They would also require that a coinsured lender's designation of a commissioner be subject to regulation by HUD.

REPEAL OF REQUIREMENT TO PUBLISH PROTOTYPE HOUSING COSTS FOR ONE- TO FOUR-FAMILY DWELLING UNITS

Section 310 would repeal section 904 of the Housing and Community Development Act of 1977, which requires HUD to prepare and publish annually prototype housing costs for one- to four-family dwelling units for each of the approximate 650 housing market areas in the United States.

Preparation and publication of prototype costs under section 904 is expensive and unnecessary. The legislative history provides no specific reason for the requirement to prepare and publish this information other than for "public" information. These figures are not used for operation of any HUD program. Neither the general public nor any public agency or private entity has expressed the view that the information is useful. The main area of comment has been from mortgagees, builders and developers challenging the accuracy of the figures.

INCREASED LOAN LIMITS FOR MANUFACTURED HOMES AND LOTS UNDER TITLE I OF THE NATIONAL HOUSING ACT

Section 311(a) of the bill would amend section 2(b) of the National Housing Act to increase the maximum loan limits for manufactured homes, lots and home-and-lot combinations under the title I program. The maximum loan amounts would be increased to $40,500 for manufactured homes (60 percent of the section 203(b) mortgage limit); $13,500 for lots (20 percent of the 203(b) limit); and $54,000 for combination home and lot loans (80 percent of the 203(b) limit). High-cost area adjustments would be authorized as described below. The revised home limits would apply to all manufactured homes, irrespective of the number of modules.

These increases in the title I loan limits are needed to reflect the rising costs for manufactured homes, land acquisition and site preparation. Based on present trends, the price of a new multi-module home is expected to average $37-39,000 by 1984. Developed lot prices vary greatly from one part of the nation to another, but amounts in the range of $12-14,000 are not unusual.

The new loan limits are related to the basic mortgage limit for single family homes under section 203(b) of the Act, but are adjusted for the lower sales prices and different site development and foundation requirements where manufactured housing under the title I program is involved. Since there is a considerable overlap in unit sizes and sales prices between single-module and multi-module homes, there is no longer any necessity for differing maximum loan amounts for single-module and multi-module homes.

Subsection (b) would authorize the Secretary to increase the maximum limits for lot loans and for combination home-and-lot loans in high-cost areas to the extent the Secretary deems necessary. However, the percentage increase from the basic loan limits could not exceed the percentage by which the maximum loan amount for a one-family residence in the area is increased by the Secretary under section 203(b)(2) of the National Housing Act. The Secretary is authorized to increase the section 203(b) dollar limit for one-family residences on an area-by-area basis up to the lesser of 133⅓ percent of that limit or 95 percent of the median one-family house price in the area.

This provision would make title I insurance available in those market areas where the higher costs of land acquisition and site development are the major factors limiting the program's usefulness. This subsection would replace the Secretary's existing authority under section 2(b)(2), which limits high-cost area adjustments for lot loans and combination loans to $7,500. The provision in section 2(b)(2) authorizing the Secretary to increase the dollar limit on loans for manufactured homes or lots in Alaska, Guam or Hawaii by up to 40 percent would remain unchanged.

Manufactured homes constitute a significant portion of the housing market. In 1982, manufactured homes represented more than 25 percent of all new single family homes constructed in the United States. This proposal would permit the Department to serve better the needs of low- and moderate-income homebuyers by expanding their options to purchase a home.

AUTHORITY FOR REFINANCING MANUFACTURED HOMES UNDER TITLE I OF THE NATIONAL HOUSING ACT

Section 312 would amend section 2(b) of the National Housing Act to permit owner-occupied manufactured homes or home and lot combinations which were purchased without title I insurance to be refinanced under title I.

The Housing and Community Development Amendments of 1981 amended title I to authorize the refinancing of a manufactured home lot under title I, even if it was previously purchased without such assistance, so long as the refinancing is in connection with the purchase of a home to place on the lot. This proposal would extend this refinancing authority to situations where the home (or home and lot combination) was previously purchased without title I insurance, if the home was constructed in accordance with standards established under section 604 of the National Manufactured Housing Construction and Safety Standards Act of 1974, is owner-occupied and otherwise meets the requirements for title I insurance.

The proposal is consistent with the policy of eliminating unnecessary restrictions and discriminatory treatment of manufactured housing. It would permit manufactured homes to be treated the same as site-built homes with regard to refinancing under an FHA insurance program.

CHANGE IN MAXIMUM LOAN-TO-VALUE RATIO FOR MODESTLY PRICED SINGLE FAMILY HOMES

Section 313 would amend section 203(b)(2) of the National Housing Act to increase the maximum loan-to-value ratio for homebuyers purchasing modestly-priced single family homes.

The current loan-to-value provision in section 203(b)(2) establishes, for most cases, a maximum mortgage amount on a one- to four-family residence as the sum of 97 percent of the first $25,000 of appraised value and 95 percent of such value in excess of $25,000 (subject to the maximum dollar limits prescribed in section 203(b)(2)). Section 313 would permit a maximum mortgage amount of 97 percent of the first $50,000 of appraised value and 90 percent of such value in excess of $50,000, again subject to the maximum dollar limits.

The amendment would significantly reduce the downpayment requirement for purchasers of modestly priced single family housing. Reducing the initial cash investment should permit more low- and moderate-income, first-time homebuyers to own their own homes. The amendment would increase downpayment requirements for purchasers of more expensive housing, thus reducing FHA's competitive role in the market stratum served by private mortgage insurers. Thus, the proposal would target FHA activities to those least well served by the private market.

NON-OCCUPANT SINGLE FAMILY MORTGAGORS

Section 314 would provide higher maximum mortgage amounts for non-occupant owner one- to four-unit dwellings insured under section 203(b) of the National Housing Act.

Present law limits the principal amount of an owner-occupant mortgage which may be insured under section 203(b) to the lesser of specified dollar amounts or amounts resulting from specified loan-to-value ratios. Thus, the maximum insurable amount for a typical single family home is the lesser of $67,500 or the sum of 97 percent of the first $25,000 of value and 95 percent of the remainder. Section 203(b)(8) of the Act limits the maximum insurable amount for investor-owners to 85 percent of the owner-occupant ceiling. Thus, for a typical single family home, the limit is 85 percent of $67,500, or $57,375.

This amendment would set the investor limit at the lesser of the otherwise applicable dollar amount or 85 percent of the appraised value of the property as of the date the mortgage is accepted for insurance. This would make the maximum dollar amount which may be insured for investors the same as that for owner-occupants, while at the same time restricting the percent of value which could be insured for investor-owners to 85 percent of appraised value. The proposed change would help stimulate investor interest in one- to four-unit dwellings, thereby resulting in increased rental housing supply.

INCREASE IN MORTGAGE INSURANCE PREMIUMS

Section 315 would amend section 203(c) of the National Housing Act to authorize the Secretary to establish mortgage insurance premiums (MIP's) for the insurance of mortgages under title II of the Act on a subsection-by-subsection basis at amounts up to 3 percent of the amount of the outstanding principal balance. At present, except for MIP's under sections 203(k) (rehabilitation loans) and (n) (individual units in cooperatives), premium charges must be uniform on

a section-by-section basis, and the per annum statutory limit for all programs is set at one percent.

This amendment recognizes that the actuarial risk to the FHA Insurance Funds can vary by program within individual sections of the Act, and that the present one percent limit may be inadequate to assure the actuarial soundness of all programs. Thus, the Secretary would be given discretionary authority to set MIP's as necessary for individual programs which may present higher risks. These include the section 223(e) program, which is available only in older, declining urban areas, and programs using alternative mortgage instruments, which may involve greater risk than the traditional level payment, fully amortizing mortgage. The one-time MIP collection system which the Department intends to implement by regulation will apply only to MIP's of one percent or less.

SHELL HOME CONSTRUCTION

Section 316 of the bill would amend section 203(k) of the National Housing Act to permit the Secretary to insure, on a coinsurance basis pursuant to section 244 of the Act, mortgage loans (including staged advances made during construction) for the purchase and construction of single family "shell homes" for occupancy by the homebuyer. No more than 30,000 mortgages covering shell homes could be insured pursuant to this authority.

The authority would be similar to that now provided in section 203(k) for the rehabilitation of family dwellings. The insured advances ordinarily would cover the costs of acquisition and preparation of the home site; purchase of and construction by a contractor of the "shell home;" and exterior/interior finishing work, some or all of which may be done by the homebuyer.

At the time of closing for purchase of the lot, the lender would release only those funds needed to finance the acquisition and preparation of the site and the purchase and construction of the "shell." The remaining mortgage proceeds would be disbursed only at various stages based upon the lender's inspection and certification that the completed work met all applicable HUD and local standards.

The maximum mortgage limit for a shell home would be limited by the provisions of section 203(b)(2) which apply to the basic FHA single family mortgage program. As was proposed by the Department for FY 1983 for all FHA single family programs (except section 235), and is proposed by section 306 of this bill, the interest rate on shell home loans would be a matter to be negotiated by the borrower and the lender.

The Secretary would encourage borrowers, to the maximum extent possible, to contribute their own labor to the completion of the home. The amount of work to be done by the buyer would depend on his or her relative skill levels. A contribution of labor would reduce the amount of the mortgage, increase the borrower's equity, and make homeownership more affordable.

Innovative self-help housing programs to help homebuyers reduce the cost of home purchases have been developed throughout the country. They have included the use of modular housing and prefabricated and other types of partially constructed housing, in addition to shell housing. These types of self-help programs in the non-FHA market are often unavailable to homebuyers traditionally served by HUD—moderate-income and first-time buyers—because of the cost of high interest rates on interim or construction financing and the lack of guaranteed permanent, long-term financing after completion of construction. This proposal is designed to make this type of housing alternative available to the traditional FHA homebuyer and, thus, extend the availability of affordable housing to many more Americans.

PAYMENT OF CLAIMS WITHOUT HUD ACQUISITION OF TITLE

Section 317 would amend section 204(a) of the National Housing Act to give HUD discretion to permit mortgagees to submit claims on foreclosed insured single family properties and be paid without transferring title to HUD.

Under the current system, the mortgagee must transfer title or assign the mortgage to HUD before a claim for the full amount of indebtedness can be paid. The mortgagee acquires title after default by either a deed in lieu of foreclosure or by bidding the property's outstanding indebtedness at the foreclosure sale and being the highest bidder. Title is then transferred to HUD. Upon conveyance of title, HUD pays 90 percent of the claim (i.e., 90 percent of the outstanding indebtedness). HUD also reimburses the mortgagee for operation, maintenance and a portion of the foreclosure expenses. Once title is determined to be marketable, HUD pays the remaining 10 percent. Upon transfer of title, HUD is responsible for holding costs, marketing and sale of the property.

Subsection (a) would permit HUD to pay off the insurance claim without requiring transfer of title, where the property is sold at foreclosure for at least its fair market value (FMV), with such adjustments as the Secretary deems appropriate. Mortgagees would continue to be required to notify the Secretary of default and the institution of foreclosure. Before the foreclosure sale, HUD would establish the property's FMV through use of an appraiser or by other appropriate means, and make any needed adjustment to that amount. The amount HUD would pay to the mortgagee should foreclosure be necessary would be the lesser of the difference between (1) the outstanding indebtedness and the adjusted FMV or (2) the outstanding indebtedness and the sale price received at the foreclosure sale. HUD would continue to reimburse mortgagees for operation, maintenance and a portion of the foreclosure expenses. Thus, assuming an insured property with an adjusted FMV of $20,000 which is sold for that amount and an outstanding indebtedness of $30,000, HUD would pay the mortgagee $10,000, plus reimbursement for expenses. If a bid at the foreclosure sale were received for $21,000, HUD would pay $9,000, plus expenses.

If no bids were received at the foreclosure sale for at least the property's adjusted FMV, the mortgagee would bid at the sale, transfer title and file a claim with HUD in accordance with the current program. Taking the example above, if a bid were received for $9,000, the mortgagee would bid more and convey title to HUD. HUD would then pay the mortgagee as it does now under the current program.

The proposed system would be implemented by regulations as a standard feature of all single family insurance programs, and would apply with respect to mortgages insured pursuant to commitments issued on or after the provision's effective date, and, with mortgagee approval, with respect to insured mortgages for which commitments were insured before that date. Claims where title is acquired by the mortgagee through a deed in lieu of foreclosure would be processed in accordance with current practice.

As with the current program, if a default were due to circumstances beyond the mortgagor's control, the Secretary would be able to take an assignment of the mortgage as provided by section 230 of the National Housing Act. Claims on assigned mortgages would be paid to mortgagees in accordance with current practice. In addition, mortgagors would remain eligible for Temporary Mortgage Assistance Payments as provided by section 230 of the Act. This proposal would not affect the coinsurance program under section 244 of the National Housing Act.

For insurance claims paid under the new system, the proposal would reduce HUD outlays significantly. HUD would not be responsible for holding, marketing and sale costs for properties sold at foreclosure for at least the adjusted FMV. In addition, unlike the current system, HUD would only be paying a portion of the total outstanding indebtedness at the time the claim is paid. Thus, upfront outlays and overall costs would be cut. This approach is consistent with the Administration's policy of making use of private sector expertise wherever possible. Not only would the Federal role in free market activities be reduced to the greatest extent possible, but also the procedure would be similar to that used by the private mortgage insurance industry. In addition, because the foreclosure sale and subsequent availability of the property for resale would be expedited, the potentially deleterious effect on the surrounding neighborhood from the property standing vacant for a long period of time would be reduced.

DISCRETIONARY AUTHORITY TO REGULATE RENTS OR CHARGES

Section 318(a) would remove language in section 207 of the National Housing Act mandating that the Secretary regulate project rents and rates of return, and would substitute discretionary authority in the Secretary to provide for such regulation. This change (and the parallel amendment of section 234(d)(2) contained in subsection (b)) would conform these authorities to other National Housing Act multifamily authorities (sections 220(d)(2)(A), 201(d)(4), and 231) which provide for discretionary authority to regulate rents and charges.

The purpose of these changes is to permit the Department to deregulate rent levels in unsubsidized, insured projects. Deregulation is expected to help assure the financial stability of insured projects, and will reduce administrative costs for the Department by eliminating the review and processing of applications for rent increases.

This deregulation would apply to existing mortgages as well as to future unsubsidized project mortgages. After appropriate regulatory changes are promulgated pursuant to these amendments, existing mortgagors would be invited to amend their regulatory agreements to remove requirements for HUD approval of rent increases. The Department would, however, reserve the right to resume regulation of rents and charges for any such project in the future.

MORTGAGE INSURANCE FOR MANUFACTURED HOME PARKS FOR THE ELDERLY

Section 319 would amend section 207(b)(2) of the National Housing Act to permit the insurance of manufactured home parks designed exclusively for occupancy by the elderly. Present law states that the insurance of section 207 mortgages is intended to facilitate particularly the production of rental

accommodations "suitable for family living." Section 207(b)(2) goes on to prohibit the provision of insurance under section 207 unless the mortgagor certifies under oath that there will be no discrimination "by reason of the fact that there are children in the family. . . ."

The proposed amendment would retain this basic rule, but would provide language clarifying that exception may be made with regard to manufactured home parks designed exclusively for the elderly. Recent surveys indicate that about one-third of all manufactured home units are occupied by elderly persons. Since section 207 is the only authority for insuring manufactured home parks, the change in section 207(b)(2) is necessary to meet the need for insurance to develop parks designed, constructed and managed for occupancy exclusively by the elderly.

REMOVAL OF REFINANCING LIMITATIONS ON CERTAIN MULTIFAMILY PROJECTS

Section 320 would amend the mortgage limit provisions of sections 220(d)(3), 221(d)(3) and 221(d)(4) of the National Housing Act to facilitate refinancing to perform substantial rehabilitation. Currently under these provisions, the limits on mortgages for substantial rehabilitation of properties are based upon the sum of the cost of repair plus the value of the property before rehabilitation. However, where there is an existing mortgage, and application to insure a new mortgage under one of these provisions is made, the mortgage limits would be based upon the sum of the estimated cost of repair plus the existing indebtedness (rather than the value of the property before repair). The amendment would delete the latter formula, so that the mortgage limits would be the same for refinancing as it is for new financing for substantial rehabilitation.

The limitation involving existing indebtedness for refinancing in the current laws prevents owners from realizing any of their equity if they wish to rehabilitate a project and retain ownership. This forces sales of the properties if the owners are to realize any equity from the projects. This limitation is contrary to a policy of encouraging rehabilitation and retention of rental property by present owners. As a result of this inequity, many projects requiring rehabilitation cannot receive the benefits of rehabilitation without the sale to another owner.

ASSIGNMENT OF SECTION 221(g)(4) MORTGAGES TO GNMA

Section 321 would amend section 221(g)(4) of the National Housing Act which permits mortgagees holding section 221 mortgages which are not in default to assign them—twenty years from the date of insurance endorsement—to the Secretary, and to receive the benefits of insurance.

The purpose of section 321 is to authorize the Secretary to direct mortgagees exercising this assignment option to deliver the mortgage and credit instruments directly to the Government National Mortgage Association. Upon such an assignment to GNMA, the rights of the mortgagee would be identical to those provided in the present law. The proposal would, however, establish a more effective process within HUD for dealing with these assignments. GNMA, acting as agent for the Secretary, would take delivery of the mortgages. However, FHA would continue to process the claims on these mortgages and assure that all assignments are legally sufficient and properly completed. GNMA would pay for them with debentures issued pursuant to the current procedure outlined in section 221(g)(4). These debentures would be debited against the FHA fund. Upon sale of the loans, GNMA would provide the proceeds to FHA. GNMA would be reimbursed for all administrative costs.

Without this amendment, FHA could continue to be responsible for taking assignment and servicing these mortgages, but an increase in staffing in HUD's Office of Finance and Accounting would be required, since that office is not prepared to take on the additional responsibility caused by the forthcoming eligibility of numerous section 221 mortgages for 20-year assignment.

Explicit statutory authority to instruct mortgagees to transfer these mortgages directly to GNMA would eliminate the paperwork and time delays within HUD involved in requiring receipt of the mortgages by the Office of Finance and Accounting, and subsequent transfer to GNMA for purposes of handling debenture issuance and subsequent sale of the mortgages.

GNMA has greater experience in handling such sales, and will also be in a position to "space" its sales, so that HUD mortgages will not be sold in competition with GNMA's own mortgage sales.

REPEAL OF SECTION 221 BUY-BACK PROVISION

Section 322 would amend section 221(g)(4) of the National Housing Act to eliminate the "buy-back" feature of that provision with respect to commitments to insure under section 221 entered into on or after the effective date of the Housing and Community Development Act of 1983. Section 221(g)(4) now permits mortgagees to assign to HUD current mortgages which are in their 20th year of amortization. HUD exchanges the mortgages for debentures at the going rate for the face value of the outstanding debt because of the current high interest rates, it has become more and more advantageous for mortgagees to assign mortgages to HUD and take debentures at the "going rate" of interest. This proposal would avoid expected future losses to the FHA insurance funds based on business transacted after the provision's effective date.

ELIMINATE EXISTING RESTRAINTS ON FHA INSURANCE FOR CONDOMINIUM UNITS

Section 323 would amend section 234(c) of the National Housing Act of eliminate the special conditions contained in existing law for the insurance of individual condominium units. Under current law, HUD may insure individual condominium units only if one of the following conditions is met: (1) the project is or has been FHA-insured or VA-approved; (2) there are less than 12 units in the building; or (3) if the building has 12 or more units, it is more than a year old. In addition, the mortgagor must acquire a family unit for his own use or occupancy and not own more than four units covered by mortgages insured under section 234(c). The amendment would delete these requirements.

Elimination of these conditions would lessen the constraints on insured financing for condominium units and would result in expanded homeownership opportunities. Additionally, the proposal would simplify the insuring process and eliminate the amount and degree of FHA review and regulation.

As noted above, present provisions limit mortgagors to ownership of not more than four one-family units insured under the section 234 program, one of which must be acquired for the mortgagor's own use and occupancy. A recent opinion by HUD's Office of General Counsel has interpreted this provision to mean four insured units anywhere in the Nation, rather than in a particular project. Unless this provision is deleted, investor participation in the section 234 program will be severely constrained. The Secretary will continue to exercise discretionary authoritiy to prescribe terms and conditions assuring that a sufficient percentage of condominium units in any project are owner-occupied in order to ensure stability and sound management.

This proposal would bring HUD into line with what the Veterans Administration has been doing for several years. Since 1974, the VA has allowed insurance for any condominium unit. The enactment of similar FHA and VA condominium insuring authorities would facilitate implementation of the paperwork reduction requirements of section 905 of the Housing and Community Development Amendments of 1978. Section 905 specifies that, insofar as practicable, HUD, the VA, and the Farmers Home Administration shall develop uniform application and other requirements for their single family and multifamily programs.

GRADUATED PAYMENT MORTGAGES FOR MULTIFAMILY AND SINGLE FAMILY HOUSING

Section 324 would amend section 245 of the National Housing Act to consolidate the separate authorities now contained in sections 245(a) and (b) into a single graduated payment mortgage (GPM) authority for one—to four-family dwellings in accordance with the more generous limitations now contained in section 245(b), and to eliminate certain restrictive features of the present section 245(b) GPM program. In addition, amendments are proposed in a new subsection (b) to make possible the use of GPM's for multifamily projects.

The proposed revisions to section 245(b) would delete the threshold requirement that a mortgagor be unable reasonably to afford to finance a purchase by means of any other mortgage insurance program. This change would make any otherwise qualified mortgagor eligible for an insured graduated payment mortgage.

The requirement limiting section 245(b) insurance to mortgagors who have not owned dwelling units within the preceding three years would be stricken.

Finally, restrictions on the number of mortgages or the aggregate amount of initial principal obligation of mortgages insured under section 245 are also proposed to be removed.

Section 245(c) as proposed to be amended would provide authority for GPM's for multifamily insured projects. A major deterrent to the production of multifamily housing is the high cost of financing. Availability of GPM's would assure lower principal and interest payments on the mortgage in the early years of a project. Later, as debt service payments increased, reasonable rental increases would cover these costs. Use of the GPM approach in the multifamily context would assist the sluggish rental housing market without the help of Federal subsidies.

GPM's for multifamily projects would not, however, have requirements identical to those applicable to single family insuring authorities. The initial principal obligation of a multifamily mortgage would not be permitted to exceed the percentage of value or replacement cost required by the particular title II insuring authority with which the

GPM authorization was linked. During the term of the mortgage, the principal obligation (including interest deferred and added to principal) would not be permitted to exceed the property's projected value at any time.

Projected value of a multifamily project would be determined in the same manner as under the current section 245 for single family dwellings—by means of a HUD calculation based on the initial value of the property, projecting increased value at a rate not to exceed 2½ percent per year.

Authority under section 245 would expire September 30, 1985.

ADJUSTABLE RATE MORTGAGES FOR SINGLE FAMILY HOUSING

Section 325 would amend the National Housing Act by adding a new section 247 to provide authority for HUD to insure single family Adjustable Rate Mortgages (ARM's) on a limited basis. Under the authority, insurance activity would be limited to 125,000 mortgages in any fiscal year. Interest rate adjustments would be indexed to a national interest rate index which the Secretary of HUD would specifically approve in regulations. This authority would expire September 30, 1985.

These FHA-insured adjustable rate mortgages would include safeguards for the consumer. To protect participating homeowners, statutory limits would control the size and frequency of interest rate adjustments. A limit of one adjustment per year, with maximum increases in the interest rate of 1 point a year and 5 points over the life of the mortgage, would be established. The mortgagee would be required to provide information to the mortgagor describing particular features of the variable rate mortgage, including a hypothetical "worst case" payment schedule.

At present, HUD cannot insure a mortgage financed with a variable interest rate. When inflation rates and interest rates are high, the ARM is likely to become a primary mortgage instrument available to a purchaser in the conventional market. In that event, it would be desirable for FHA to be able to offer a choice between ARM's and fixed-rate mortgages.

SHARED APPRECIATION MORTGAGES FOR SINGLE FAMILY HOUSING

Section 326 would amend the National Housing Act by adding a new section 248 authorizing the Secretary to insure Shared Appreciation Mortgages (SAM's) for single family housing, including cooperatives. Insurance activity would be limited to 50,000 mortgages in any fiscal year, and the authority would expire on September 30, 1985.

The new authority would permit a lender to share in a predetermined percentage of the net appreciated value of the property or stock in a cooperative secured by the mortgage. The lender's share would be due and payable at the time the insured property is sold or transferred, or, absent a sale or transfer, upon full payment of the mortgage.

The mortgage would: (a) meet conditions, including interest rate limitations, as the Secretary may prescribe, (b) provide for amortization over a period not to exceed 30 years, but the actual term (excluding refinancing) would be for not less than 10 nor more than 30 years, and (c) contain such provisions relating to refinancing and any contingent deferred interest as the Secretary may provide. In the event of default, the mortgagee's right to insurance benefits would not include the mortgagee's share of net appreciated value.

The Secretary would be authorized to provide, by regulation adequate consumer protection and disclosure requirements.

This proposal provides homebuyers with an alternative to the Department's fixed-rate mortgages, Graduated Payment Mortgage (GPM) program, and the proposed Adjustable Rate Mortgage (ARM) program. In order to stimulate a healthy housing market, it is important in terms of current and future market conditions that both home purchasers and mortgage lenders have the broadest possible choice of financial mechanisms. SAM's increase the affordability of housing by making possible substantial reductions in monthly payments due to the reduced interest rate offered by the lender in return for the lender receiving a share of any appreciation in the value of the property. In addition, mortgagors would be allowed to take advantage of the generally lower interest rates available when the mortgage term is less than 30 years.

SHARED APPRECIATION MORTGAGES FOR MULTIFAMILY HOUSING

Section 327 would amend the National Housing Act by adding a new section 249 to provide authority for HUD to insure Shared Appreciation Mortgages (SAM's) for multifamily housing. This authority would expire September 30, 1985. In addition, subsections (b) through (e) would amend sections 207(c)(3), 220(d)(4), 221(d)(6), and 231(c)(5), respectively, to allow HUD discretion to insure loans which do not completely amortize over the loans term, whether or not a multifamily SAM mortgage is involved.

Under the SAM approach permitted by section 327(a), the multifamily developer would benefit from a lower interest rate on the mortgage loan, in return for the lender's receiving a share of any appreciation in the value of the property.

Recent economic conditions have made the production of multifamily rental housing difficult, and lenders remain cautious. A particular problem facing the multifamily housing industry is the reluctance of lenders to invest in fixed-rate mortgages of 30 or 40 years duration. Alternatives to traditional long-term mortgage instruments need to be insurable by HUD in order to stimulate unsubsidized rental construction.

The multifamily SAM proposed would allow HUD to insure loans of 15 years or longer which have level payment amortization schedules which would completely amortize in 30 years or less. Mortgagors would be allowed to take advantage of the generally lower interest rates available for shorter term financing. The lender's share of the appreciated value would be due and payable at the time the insured property is sold or transferred or at the expiration of the loan term.

Used either in tandem or separately, the multifamily SAM proposal and the proposed discretion in the Secretary to insure mortgages which do not provide for complete amortization will substantially lower the monthly mortgage payments on multifamily loans and thereby encourage the production of rental housing.

DEMONSTRATION AUTHORITY TO INSURE HOME EQUITY CONVERSION MORTGAGES FOR ELDERLY HOMEOWNERS

Section 328 would amend title II of the National Housing Act by adding a new section 250 to authorize the Secretary to insure up to 1,000 home equity conversion mortgages for elderly homeowners on a demonstration basis. These mortgages would reduce the financial hardships of elderly homeowners by permitting them to tap accumulated equity to meet expenses such as paying maintenance, tax, utility and other living expenses without being forced to move. The authority to insure the mortgages would expire September 30, 1986.

The increasing number of elderly persons has far-reaching ramifications which have been chronicled by many studies, articles, public and private debates, and governmental inquiries. The need to develop new programs for elderly homeowners is underscored by the fact that a significant portion of the elderly population has substantial home equity, but is burdened by limited incomes and hig housing costs. The proposal would demonstrate the feasibility and desirability of insuring home equity conversion mortgages as a means of addressing this problem.

Although home equity conversion mortgages are a relatively new concept, they appear to offer a reasonable way of improving the income level and quality of life of a significant number of elderly homeowners by providing access to accumulated equity. Programs have been initiated in California, Wisconsin, New York, and New Jersey by public or not-for-profit groups, with the assistance of private or public contributions. The programs include the marketing of the mortgages, interest rate reduction opportunities, and the provision of interest-free or reduced interest rate deferred loans for home rehabilitation. There is currently in the planning and organizing stage a major private endeavor designed solely for the purpose of financing home equity conversion mortgages.

It is too early to evaluate the effect and scope of these programs. However, initial results support the view that home equity conversion mortgages can meet the legitimate needs of some elderly homeowners. These early assessments indicate, also, that public and private entities want HUD to take a more active role in the area of home equity conversion mortgages.

The demonstration program would be designed to:

(1) Concentrate use of FHA-insured equity conversion mortgages in a few geographic areas and provide guidance, as needed, to encourage participation of mortgage lenders and increase their familiarity with the program;

(2) Identify and evaluate various forms of home equity conversion mechanisms to assure that the interests of homeowners, lenders, investors and the Federal government are appropriately protected;

(3) Ascertain whether there is a need for a HUD role and, if so, the appropriate extent of HUD involvement in this area; and

(4) Determine the extent of need and demand for equity conversion financing.

To ensure that effective consumer protections are afforded elderly homeowners who may wish to participate in the program, participating lenders would be required to provide each prospective borrower at the time of application with a written statement explaining the home equity conversion mortgage, including the type of mortgage being offered, its specific terms and a clear explanation of its effect on such matters as tax and estate planning and eligibility for certain government benefits, grants or pensions.

Subsection (a) would set forth the purposes of the demonstration program to include: the insuring of home equity conversion mortgages to assist elderly homeowners in converting a portion of their home equity

into liquid assets, and the securing of data to determine the extent of need for the program and the appropriate scope and nature of the Secretary's participation in the home equity conversion mortgage market.

Subsection (b) would set forth definitions of "elderly homeowner" and "home equity conversion mortgage", and subsection (c) would authorize the Secretary to insure such mortgages after a determination that such mortgages, in addition to having the potential to meet the special needs of elderly homeowners and increase participation by private lenders, include safeguards for mortgagors to offset the special risks of such mortgages.

Subsection (d) would prescribe the requirements for eligibility of a mortgage, including that the mortgage be secured by a property designed principally as a one-family residence and that it be executed by a mortgagor who is the owner-occupant of the property and who meets the prescribed minimum age. The maximum mortgage would be limited to that established for a one-family residence in section (b)(2) of the National Housing Act and may not exceed 90 per centum of the appraised value of the property. The mortgage would permit the interest rate to be fixed or adjusted periodically as agreed to by the parties and would contain provisions for full satisfaction of the obligation satisfactory to the Secretary.

Subsection (e) would establish that mortgages insured under this section are eligible for insurance benefits provided in section 204 of this Act.

Subsection (f) contains the consumer safeguards noted above.

Subsection (g) would limit the Secretary's authority to insure mortgages under this section to a total number of mortgages not to exceed 1,000, and would set September 30, 1986 as the final date for insurance of such a mortgage, except for commitments to insure which are issued on or before that date.

Subsection (h) would authorize the Secretary to enter into such contracts and agreements and to undertake such studies as the Secretary determines are appropriate to the purpose of the demonstration.

Subsection (i) would provide for preemption of any State constitution, statute, court decree, common law, rule or public policy limiting or prohibiting sharing appreciation, increases in outstanding balances after execution of the mortgage, disbursement of mortgage proceeds over an extended time, or requiring that the term of the mortgage be fixed.

Subsection (j) would authorize the Secretary to make any disbursements to the mortgagor required by a mortgage insured under this section or by an ancillary contract in the event of default by the party responsible for payment. The Secretary is further authorized to take any action necessary to obtain repayment of such disbursements including, but not limited to: accepting an assignment of the insured mortgage, calculating the amount and making the payment of an insurance claim on such assigned mortgage, requiring a junior mortgage from the mortgagor to secure repayment of funds advanced by the mortgagor, and imposing premium charges. Actions undertaken by the Secretary would preempt any State or local law prohibiting or limiting such actions. Payments would be made from the General Insurance Fund.

STRUCTURAL DEFECTS IN VA-APPROVED, FHA-INSURED NEW HOMES

Section 329 would amend section 518(a) of the National Housing Act, which authorizes the Secretary to make expenditures to correct or compensate for structural defects in single family homes which were approved for FHA insurance prior to construction. As amended, section 518(a) would specify that the Secretary may also correct or compensate for structural defects in FHA-insured new homes which were approved for loan guaranty by the Veterans Administration prior to construction.

Section 203 of the National Housing Act states that VA loan guaranty, insurance or direct loan approval prior to the beginning of construction may be substituted for the Secretary's approval. The proposal would clarify that VA approval is the equivalent of the Secretary's for purposes of correcting or compensating for structural defects.

TIME OF PAYMENT OF MORTGAGE INSURANCE PREMIUMS

Section 330 would amend section 530 of the National Housing Act to clarify that the Department's obligation to collect mortgage insurance premiums on a monthly basis, and to charge interest for late payment of monthly premiums, applies only to the Department's single family programs. The amendment would permit continuation of the existing practice of collecting premium payments from multifamily mortgagees on an annual basis, with interest payable only in the case of late remittance of the annual payment. Monthly collection of premiums would, of course, not apply in the case of mortgages subject to up-front premium collection requirements.

In the past, HUD has not required monthly collection of premiums for its multifamily mortgages. Premiums for those programs are paid by the mortgagor in advance and are escrowed by the mortgagee. Collection of these premium payments on a monthly basis would increase paperwork and would be staff-intensive. It would also unnecessarily disrupt existing finance and accounting operations, which are geared to annual receipt of such payments.

As amended, section 530 would continue to require that premiums be paid "promptly upon their receipt from the borrower" in the case of the single family programs, but would require, for all other insuring authorities, that premiums be paid "promptly when due to the Secretary" (i.e., annually). Interest payable to the Secretary would continue to be required for late payment of premiums, but such interest would accrue beginning twenty days after the mortgagee's receipt of premium payments from the borrower in the case of single-family mortgages, while in the multifamily programs, interest would be due for the period beginning twenty days after the premium payment's due date.

SINGLE FAMILY MORTGAGE INSURANCE ON INDIAN RESERVATIONS AND HAWAIIAN HOME LANDS

Section 331 would add a new section to title V of the National Housing Act authorizing the Secretary to insure certain mortgages without regard to limitations in the National Housing Act, such as those regarding marketability of title, or any other statutory restriction which impedes the availability of mortgage insurance on Indian lands or Hawaiian home lands. The eligible mortgages would be those covering one- to four-family dwellings executed (1) by an Indian tribe (or a member of an Indian tribe and an Indian tribe as co-mortgagors) covering property located on an Indian reservation, (2) by a native Hawaiian covering property located on Hawaiian home lands, provided the Department of Hawaiian Home Lands is a co-mortgagor or guarantor or offers other security acceptable to the Secretary, or (3) in connection with a property assisted under the Indian Housing Program under section 202 of the bill. The insured dwelling would have to be the principal residence of the member of the Indian tribe or native Hawaiian.

The unique nature of the ownership of land on Indian reservations and laws governing the disposition of Indian land makes lenders unwilling to provide mortgage financing for housing on reservations. HUD cannot induce lenders to make mortgage loans by providing insurance because the National Housing Act has requirements for insurability relating to marketability of title that cannot be met by Indian reservation land. The proposal would enable the Secretary to make mortgage insurance available without regard to such statutory restrictions.

The nature of ownership of Hawaiian home lands is similarly unique. Pursuant to the Hawaiian Homes Commission Act of 1920, control but not title to thousands of acres of federally-owned land designated as Hawaiian home lands was transferred to the Hawaiian Homes Commission. When Hawaii was admitted to the Union, the title to the land was conveyed from the Federal government to the State of Hawaii. The new Department of Hawaiian Home Lands has the same powers as the superseded Commission. The Department may lease land for terms of up to 99 years to native Hawaiians only. The lessee may transfer, mortgage or pledge his or her interest only with the approval of the Department and only to another native Hawaiian.

As in the case of Indian lands, HUD cannot encourage lenders to make such loans by insuring the mortgages on the properties, due to requirements of the National Housing Act that cannot be met because of the restrictive provisions of the Hawaiian Homes Commission Act of 1920. The proposal would enable the Secretary to make mortgage insurance available without regard to those requirements.

In order to facilitate the use of FHA insurance on Indian reservations and Hawaiian home lands, this section would contain provisions, similar to those in section 202 of this Act relating to the Indian Housing Program, permitting the Secretary to insure construction advances and applying the higher owner-occupant loan-to-value ratio for all mortgages insured pursuant to this section. Also, as provided in section 202, the Secretary could require Indian tribes to pledge income from tribal resources or tribal assets or pledge Federal grants to reimburse the Secretary for any claims paid in connection with dwellings assisted under this section.

Mortgages insured under this section would be obligations of the General Insurance Fund.

REPEAL OF AUTHORITY TO MAKE GRANTS OR CONTRACTS FOR HOUSING COUNSELING ASSISTANCE

Section 332 would amend section 106(a) of the Housing and Urban Development Act of 1968 to eliminate the Secretary's authority to make grants or contract for housing counseling and other activities authorized by that section. The authorization for ap-

propriations under 106(a)(3) for housing counseling would be repealed. Additionally, section 101(e) of the Act, which authorizes housing counseling assistance for mortgagors under section 235(i) or 235(j)(4) of the National Housing Act, would be repealed. Finally, section 230(d) of the National Housing Act, which directs the Secretary to provide housing counseling to persons assisted under the TMAP program, would be repealed.

Localities can use other sources of Federal revenues (such as community development block grants and general revenue sharing) to fund the activities specified in the above authorities. Accordingly, all authority to appropriate funds for grants and contracts for these purposes (including the Housing Counseling Assistance Program) would be eliminated. However, HUD's authority to provide information, advice and technical assistance for the purposes contained in these provisions would remain unchanged. For example, HUD staff could continue to work with housing counseling agencies that provide mortgage default and rent delinquency counseling on a voluntary basis. The HUD staff activity would include approving counseling agencies and providing technical assistance, making referrals of delinquent mortgagors to counseling agencies, and using counseling agencies to help keep forbearance agreements current. The only expenditures to the Federal government under section 106(a) for the provision of these services would be the salaries and related expenses of the HUD employees involved.

PROHIBITION ON USE OF FHA COINSURANCE IN CONNECTION WITH TAX-EXEMPT OBLIGATIONS

Section 333 would amend section 244 of the National Housing Act to prohibit the tax-exempt status of any obligations issued by a State, political subdivision, or governmental entity, the proceeds of which are used to finance mortgages insured pursuant to section 244 (the Coinsurance Programs). The Administration has been concerned with the coupling of mortgage insurance and tax-exempt financings, under which government guarantees backup tax-exempt obligations. The Department intends not to allow such arrangements with respect to its Coinsurance Programs.

These programs are expected to be used more widely over the next several years for both single family and multifamily housing. The amendment would ensure that development financed by public bodies and employing coinsured mortgages will be done so on a taxable basis. In this way, the availability of coinsurance will not contribute to revenue foregone on tax-exempt housing obligations.●

By Mr. DOLE (for himself, Mr. HEFLIN, and Mr. THURMOND):

S. 645. A bill to establish an intercircuit tribunal, and for other purposes; to the Committee on the Judiciary.

COURT IMPROVEMENTS ACT OF 1983

● Mr. DOLE. Mr. President, on behalf of myself and Senators HEFLIN and THURMOND, I am pleased to introduce the Court Improvements Act of 1983.

The most significant of the reforms included in the package is the creation of an intercircuit tribunal to exercise jurisdiction over cases referred to it by the Supreme Court.

The purpose of the tribunal is to relieve the dramatically increased workload of the Supreme Court. In recent months, in highly unusual fashion, eight Justices of the Court have spoken publicly about the problem of docket congestion. A few weeks ago, the Chief Justice of the United States specifically endorsed the creation of a temporary intercircuit tribunal to help alleviate the growing overload.

For years, judicial commentators and scholars have tracked the alarming rise in the number of cases before the Court. In the Court's past session, there were more than 6,000 petitions for certiorari, an increase of more than 80 percent over the past 10 years. Of sheer necessity, an increasing number of these requests for High Court review were decided in summary, or per curiam fashion.

Almost 10 years ago, the Hruska Commission, which was established to study the Federal appellate system, recommended that a national court of appeals be created to serve as a safety valve for an increasingly overloaded and overworked Supreme Court. In the intervening years, the pressures which led to this recommendation have intensified and the Hruska proposal has continued to receive interest and support. In this and the past Congress, Senator HEFLIN, the ranking minority member of the Courts Subcommittee, has proposed the creation of a permanent National Court of Appeals along the lines recommended by the Hruska Commission, and his well-recognized expertise in this area was instrumental in the development of this intercircuit tribunal proposal.

The intercircuit tribunal can be an important new tool to ease the alarming burdens on the Court.

The elements of the proposal are straight-forward: A temporary court would be created for a 5-year period to settle important matters referred to it by the Supreme Court. The proposal follows the recommendations of the Hruska Commission in that the tribunal would have no original jurisdiction. It would decide only cases which the Supreme Court referred to it by majority vote. The Supreme Court would retain the power to overrule or modify any decision of the tribunal, consistent with its constitutional role as the highest court in the land.

The circuit council of each circuit court of appeals would nominate two judges to sit on the 26-member tribunal. Five judge panels would then be formed within the tribunal to hear and decide cases. No two judges from the same circuit could sit on the same panel. Judges would be designated to sit on panels by a lottery system in such a way that all judges of the tribunal would hear and decide cases that represent all types of cases before the tribunal.

The legislation also incorporates Senator HEFLIN's proposal to establish a Chancellor of the United States who would be appointed by the Chief Justice from among circuit judges in regular active service. The Chancellor would be responsible for assisting the Chief Justice with the ever increasing administrative burdens of the position of Chief Justice. He would also serve as a member of the intercircuit tribunal and be responsible for the administration of that court.

Mr. President, this proposal constitutes a balanced and cost-efficient response to the Supreme Court's urgent need for relief from its burgeoning caseload. Because the proposal does not involve the creation of new judgeships, nor the establishment of a separate administrative support structure, its costs should be minimal. In addition, the temporary nature of the tribunal should address the reservations of some about creating a new appellate layer to the Federal court structure in the form of a permanent National Court of Appeals. Rather, this 5-year experiment will provide the Congress with needed information concerning the feasibility and wisdom of taking such a step. At the same time, the tribunal will provide desperately needed additional decisional capacity for the resolution of disputes where nationwide uniformity is needed, many of which are now left unresolved because the Supreme Court cannot make room on its docket.

The remaining components of this court improvements package consist of proposals which are similar or identical to bills which were introduced in the last Congress. All were mentioned in the year end report of the Chief Justice as needed improvements in judicial administration.

First, title I would eliminate the mandatory jurisdiction of the Supreme Court. Under current law, certain cases may be appealed directly to the Supreme Court and the Court is obligated to hear and decide them. The majority of these cases do not involve important issues, are summarily dealt with, and essentially serve only to clog the Court's docket. Identical proposals have passed at least one House of Congress in the past three Congresses.

Title II would eliminate most civil priorities. Over the past several years, the Congress has enacted so many statutory provisions requiring the courts to give expedited consideration to certain civil cases, that they have become virtually meaningless. Title II would eliminate all these identified priorities, except for habeas corpus, civil rights, and FOIA cases, and applications for temporary restraining orders or injunctions. A proposal virtually identical to title II passed the House last year as part of the Railsback court reform package.

Title III would make certain improvements to judicial survivor's benefits to make them more comparable to

those provided by State judicial systems and in private law practice. These improvements should help turn the tide on the increasing number of Federal judges resigning and help maintain the high caliber of those accepting appointments to the Federal bench. Included in the improvements are: Basing children's annuities on a percentage of salary, as opposed to a fixed dollar amount; creating a minimum annuity of 30 percent of salary for surviving spouses; and increasing the factoring figure upon which surviving spouses' annuities are based. Participating judges would be required to contribute an increased percentage of their salary to help offset additional costs.

Title IV would create a State justice institute. This nonprofit corporation would administer federally funded assistance programs to State courts to improve judicial administration at the State level. It is identical to a bill introduced by Senator HEFLIN, and which passed the Senate in the last Congress.

Title V would create a temporary Federal courts study commission to look beyond the immediate problems confronting the judiciary and to undertake comprehensive, long-range planning. Specifically, the major purposes of the commission would be to conduct a 2-year study of the jurisdiction of the Federal and State courts, appraise the problems confronting the courts and develop a long-range plan for their future needs. The bipartisan commission would consist of 14 members appointed by the heads of the three branches of Government, and would submit periodic reports on the state of the judiciary and a final report at the end of 10 years. It is identical to a proposal sponsored by Senators THURMOND and HEFLIN which passed the Senate last year.

Mr. President. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 645

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Court Improvements Act of 1983".

TITLE I—SUPREME COURT REVIEW

REVIEW OF DECISIONS INVALIDATING ACTS OF CONGRESS

SEC. 101. Section 1252 of title 28, United States Code, and the item relating to that section in the section analysis of chapter 81 of such title, are repealed.

REVIEW OF DECISIONS INVALIDATING STATE STATUTES

SEC. 102. (a) Section 1254 of title 28, United States Code, is amended by striking out paragraph (2) and redesignating paragraph (3) as paragraph (2).

(b) The section heading for section 1254 of such title is amended by striking out "appeal;".

(c) The item relating to section 1254 in the section analysis of chapter 81 of title 28, United States Code, is amended by striking out "appeal;".

REVIEW OF STATE COURT DECISIONS INVOLVING VALIDITY OF STATUTES

SEC. 103. Section 1257 of title 28, United States Code, is amended to read as follows:

"§ 1257. State courts; certiorari

"(a) Final judgments or decrees rendered by the highest court of a State in which a decision could be had, may be reviewed by the Supreme Court by writ of certiorari where the validity of a treaty or statute of the United States is drawn in question or where the validity of a statute of any State is drawn in question on the ground of its being repugnant to the Constitution, treaties, or laws of the United States, or where any title, right, privilege, or immunity is specially set up or claimed under the Constitution or the treaties or statutes of, or any commission held or authority exercised under, the United States.

"(b) For the purposes of this section, the term 'highest court of a State' includes the District of Columbia Court of Appeals.".

REVIEW OF DECISIONS FROM SUPREME COURT OF PUERTO RICO

SEC. 104. Section 1258 of title 28, United States Code, is amended to read as follows:

"§ 1258. Supreme Court of Puerto Rico; certiorari

"Final judgments or decrees rendered by the Supreme Court of the Commonwealth of Puerto Rico may be reviewed by the Supreme Court by writ of certiorari where the validity of a treaty or statute of the United States is drawn in question or where the validity of a statute of the Commonwealth of Puerto Rico is drawn in question on the ground of its being repugnant to the Constitution, treaties, or laws of the United States, or where any title, right, privilege, or immunity is specially set up or claimed under the Constitution or the treaties or statutes of, or any commission held or authority exercised under, the United States.".

CONFORMING AMENDMENTS

SEC. 105. (a) The items relating to sections 1257 and 1258 in the section analysis of chapter 81 of title 28, United States Code, are amended to read as follows:

"1257. State courts; certiorari.
"1258. Supreme Court of Puerto Rico; certiorari.".

(b) Section 2101(a) of title 28, United States Code, is amended by striking out "sections 1252, 1253 and 2282" and inserting in lieu thereof "section 1253".

(c)(1) Section 2104 of title 28, United States Code, is amended to read as follows:

"§ 2104. Reviews of State court decisions

"A review by the Supreme Court of a judgment or decree of a State court shall be conducted in the same manner and under the same regulations, and shall have the same effect, as if the judgment or decree reviewed had been rendered in a court of the United States.".

(2) The item relating to section 2104 in the section analysis of chapter 133 of title 28, United States Code, is amended to read as follows:

"2104. Reviews of State court decisions.".

(d) Section 2350(b) of title 28, United States Code, is amended by striking out "1254(3)" and inserting in lieu thereof "1254(2)".

AMENDMENTS TO OTHER LAWS

SEC. 106. (a) Section 310 of the Federal Election Campaign Act (2 U.S.C. 437h) is amended by repealing subsection (b), and redesignating subsection (c) as subsection (b).

(b) Section 2 of the Act of May 18, 1928 (25 U.S.C. 652), is amended by striking out ", with the right of either party to appeal to the United States Court of Appeals for the Federal Circuit".

(c) The last sentence of section 203(d) of the Trans-Alaska Pipeline Authorization Act (43 U.S.C. 1652(d)) is amended to read as follows: "An interlocutory or final judgment, decree, or order of such distinct court may be reviewed only upon petition for a writ of certiorari to the Supreme Court of the United States.".

(d) Section 209(e)(3) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 719(e)(3)) is amended—

(1) in the first sentence by striking out ", except that" and all that follows through the end of the sentence and inserting in lieu thereof a period; and

(2) in the second sentence by striking out "petition or appeal shall be filed" and inserting in lieu thereof "such petition shall be filed in the Supreme Court".

(e) Section 303(d) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 743(d)) is amended to read as follows:

"(d) REVIEW.—A finding or determination entered by the special court pursuant to subsection (c) of this section or section 306 of this title shall be reviewable only upon petition for a writ of certiorari to the Supreme Court of the United States. Such review is exclusive and any such petition shall be filed in the Supreme Court not more than 20 days after entry of such finding or determination.".

(f) Section 1152(b) of the Omnibus Budget Reconciliation Act of 1981 (45 U.S.C. 1105(b)) is amended—

(1) in the first sentence by striking out ", except that" and all that follows through the end of the sentence and inserting in lieu thereof a period; and

(2) in the second sentence by striking out "petition or appeal shall be filed" and inserting in lieu thereof "such petition shall be filed in the Supreme Court".

(g) Section 206 of the International Claims Settlement Act of 1949 (22 U.S.C. 1631e) is amended by striking out "1252, 1254, 1291," and inserting in lieu thereof "1291".

(h) Section 12(a) of the Act of May 13, 1954, commonly known as the Saint Lawrence Seaway Act (33 U.S.C. 988(a)), is amended by striking out "1254(3)" and inserting in lieu thereof "1254(2)".

EFFECTIVE DATE

SEC. 107. The amendments made by this title shall take effect ninety days after the date of the enactment of this title, except that such amendments shall not apply to cases pending in the Supreme Court on the effective date of such amendments or affect the right to review or the manner of reviewing the judgment or decree of a court which was entered before such effective date.

TITLE II—CIVIL PRIORITIES

ESTABLISHMENT OF PRIORITY OF CIVIL ACTIONS

SEC. 201. (a) Chapter 111 of title 28, United States Code, is amended by adding at the end thereof the following new section:

"§ 1657. Priority of civil actions

"(a) Notwithstanding any other provisions of law, each court of the United States shall determine the order in which civil actions are heard and determined, except that the court shall expedite the consideration of any action brought under chapter 153 or section 1826 of this title, any action for temporary or preliminary injunctive relief, or any other action if good cause therefor is shown.

"(b) The Judicial Conference of the United States may modify the rules adopted by the courts to determine the order in which civil actions are heard and determined, in order to establish consistency among the judicial circuits."

(b) The section analysis of chapter 111 of title 28, United States Code, is amended by adding at the end thereof the following new item:

"1657. Priority of civil actions.".

AMENDMENTS TO OTHER LAWS

SEC. 202. The following provisions of law are amended:

(1)(A) Section 309(a)(10) of the Federal Election Campaign Act of 1971 (2 U.S.C. 437g(a)(11) is repealed.

(B) Section 310 of the Federal Election Campaign Act of 1971 (2 U.S.C. 437h), as amended by section 106(a) of this Act, is further amended—

(i) by striking out "(a)" after "SEC. 310."; and

(ii) by repealing subsection (b), as redesignated by section 106(a) of this Act.

(2) Section 6(a) of the Commodity Exchange Act (7 U.S.C. 8(a)) is amended by striking out "The proceedings in such cases in the court of appeals shall be made a preferred cause and shall be expedited in every way.".

(3)(A) Section 6(c)(4) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136d(c)(4)) is amended by striking out the second sentence.

(B) Section 10(d)(3) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136h(d)(3)) is amended by striking out "The court shall give expedited consideration to any such action.".

(C) Section 16(b) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136n(b)) is amended by striking out the last sentence.

(D) Section 25(a)(4)(E)(iii) of the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136w(a)(4)(E)(iii)) is repealed.

(4) Section 204(d) of the Packers and Stockyards Act, 1921 (7 U.S.C. 194(d)), is amended by striking out the second sentence.

(5) Section 366 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1366) is amended in the fourth sentence by striking out "At the earliest convenient time, the court, in term time or vacation, ' and inserting in lieu thereof "The court".

(6)(A) Section 410 of the Federal Seed Act (7 U.S.C. 1600) is amended by striking out "The proceedings in such cases in the court of appeals shall be made a preferred cause and shall be expedited in every way.".

(B) Section 411 of the Federal Seed Act (7 U.S.C. 1601) is amended by striking out "The proceedings in such cases shall be made a preferred cause and shall be expedited in every way.".

(7) Section 816(c)(4) of the Act of October 7, 1975, commonly known as the Department of Defense Appropriation Authorization Act of 1976 (10 U.S.C. 2304 note) is amended by striking out the last sentence.

(8) Section 5(d)(6)(A) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464(d)(6)(A)) is amended by striking out "Such proceedings shall be given precedence over other cases pending in such courts, and shall be in every way expedited.".

(9)(A) Section 7A(f)(2) of the Clayton Act (15 U.S.C. 18a(f)(2)) is amended to read as follows: "(2) certifies to the United States district court for the judicial district within which the respondent resides or carries on business, or in which the action is brought, that it or he believes that the public interest requires relief pendente lite pursuant to this subsection, then upon the filing of such motion and certification, the chief judge of such district court shall immediately notify the chief judge of the United States court of appeals for the circuit in which such district court is located, who shall designate a United States district judge to whom such action shall be assigned for all purposes.".

(B) Section 11(e) of the Clayton Act (15 U.S.C. 21(e)) is amended by striking out the first sentence.

(10) Section 1 of the Act of February 11, 1903, commonly known as the Expediting Act (15 U.S.C. 28) is repealed.

(11) Section 5(e) of the Federal Trade Commission Act (15 U.S.C. 45(e)) is amended by striking out the first sentence.

(12) Section 21(f)(3) of the Federal Trade Commission Improvements Act of 1980 (15 U.S.C. 57a-1(f)(3)) is repealed.

(13) Section 11A(c)(4) of the Securities Exchange Act of 1934 (15 U.S.C. 78k-1(c)(4)) is amended—

(A) by striking out "(A)" after "(4)"; and

(B) by striking out subparagraph (B).

(14)(A) Section 309(e) of the Small Business Investment Act of 1958 (15 U.S.C. 687a(e)) is amended by striking out the sixth sentence.

(B) Section 309(f) of the Small Business Investment Act of 1958 (15 U.S.C. 687a(f)) is amended by striking out the last sentence.

(C) Section 311(a) of the Small Business Investment Act of 1958 (15 U.S.C. 687c(a)) is amended by striking out the last sentence.

(15) Section 10(c)(2) of the Alaska Natural Gas Transportation Act (15 U.S.C. 719h(c)(2)) is repealed.

(16) Section 155(a) of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1415(a)) is amended by striking out "(1)" and by striking out paragraph (2).

(17) Section 503(b)(3)(E) of the Motor Vehicle Information and Cost Savings Act (15 U.S.C. 2003(b)(3)(E)) is amended by striking out clause (ii) and redesignating clauses (iii) and (iv) as clauses (ii) and (iii), respectively.

(18) Section 23(d) of the Toxic Substances Control Act (15 U.S.C. 2622(d)) is amended by striking out the last sentence.

(19) Section 12(e)(3) of the Coastal Zone Management Improvement Act of 1980 (16 U.S.C. 1463a(e)(3)) is repealed.

(20) Section 11 of the Act of September 28, 1976 (16 U.S.C. 1910), is amended by striking out the last sentence.

(21)(A) Section 807(b) of the Alaska National Interest Lands Conservation Act (16 U.S.C. 3117(b)) is repealed.

(B) Section 1108 of the Alaska National Interest Lands Conservation Act (16 U.S.C. 3168) is amended to read as follows:

"INJUNCTIVE RELIEF

"SEC. 1108. No court shall have jurisdiction to grant any injunctive relief lasting longer than ninety days against any action pursuant to this title except in conjunction with a final judgment entered in a case involving an action pursuant to this title.".

(22)(A) Section 10(b)(3) of the Central Idaho Wilderness Act of 1980 (Public Law 96-312; 94 Stat. 948) is repealed.

(B) Section 10(c) of the Central Idaho Wilderness Act of 1980 is amended to read as follows:

"(c) Any review of any decision of the United States District Court for the District of Idaho shall be made by the Ninth Circuit Court of Appeals of the United States.".

(23)(A) Section 1964(b) of title 18, United States Code, is amended by striking out the second sentence.

(B) Section 1966 of title 18, United States Code, is amended by striking out the last sentence.

(24)(A) Section 408(i)(5) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(i)(5)) is amended by striking out the last sentence.

(B) Section 409(g)(2) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 348(g)(2)) is amended by striking out the last sentence.

(25) Section 8(f) of the Foreign Agents Registration Act of 1938 (22 U.S.C. 618(f)) is amended by striking out the last sentence.

(26) Section 4 of the Act of December 22, 1974 (25 U.S.C. 640d-3), is amended by striking out "(a)" and by striking out subsection (b).

(27)(A) Section 3310(e) of the Internal Revenue Code of 1954 (26 U.S.C. 3310(e)) is repealed.

(B) Section 6110(f)(5) of the Internal Revenue Code of 1954 (26 U.S.C. 6110(f)(5)) is amended by striking out "and the Court of Appeals shall expedite any review of such decision in every way possible".

(C) Section 6363(d)(4) of the Internal Revenue Code of 1954 (26 U.S.C. 6363(d)(4)) is repealed.

(D) Section 7609(h)(3) of the Internal Revenue Code of 1954 (26 U.S.C. 7609(h)(3)) is repealed.

(E) Section 9010(c) of the Internal Revenue Code of 1954 (26 U.S.C. 9010(c)) is amended by striking out the last sentence.

(F) Section 9011(b)(2) of the Internal Revenue Code of 1954 (26 U.S.C. 9011(b)(2)) is amended by striking out the last sentence.

(28)(A) Section 596(a)(3) of title 28, United States Code, is amended by striking out the last sentence.

(B) Section 636(c)(4) of title 28, United States Code, is amended in the second sentence by striking out "expeditious and".

(C) Section 1296 of title 28, United States Code, and the item relating to that section in the section analysis of chapter 83 of that title, are repealed.

(D) Subsection (c) of section 1364 of title 28, United States Code, the section heading of which reads "Senate actions", is repealed.

(E) Section 2284(b)(2) of title 28, United States Code, is amended by striking out the last sentence.

(F) Section 2349(b) of title 28, United States Code, is amended by striking out the last two sentences.

(G) Section 2647 of title 28, United States Code, and the item relating to that section in the section analysis of chapter 169 of that title, are repealed.

(29) Section 10 of the Act of March 23, 1932, commonly known as the Norris-LaGuardia Act (29 U.S.C. 110), is amended by striking out "with the greatest possible expedition" and all that follows through the end of the sentence and inserting in lieu thereof "expeditiously".

(30) Section 10(i) of the National Labor Relations Act (29 U.S.C. 160(i)) is repealed.

(31) Section 11(a) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 660(a)) is amended by striking out the last sentence.

(32) Section 4003(e)(4) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1303(e)(4)) is repealed.

(33) Section 106(a)(1) of the Federal Coal Mine Health and Safety Act of 1969 (30 U.S.C. 816(a)(1)) is amended by striking out the last sentence.

(34) Section 1016 of the Impoundment Control Act of 1974 (31 U.S.C. 1406) is amended by striking out the second sentence.

(35) Section 2022 of title 38, United States Code, is amended by striking out "The court shall order speedy hearing in any such case and shall advance it on the calendar.".

(36) Section 3628 of title 39, United States Code, is amended by striking out the fourth sentence.

(37) Section 1450(i)(4) of the Public Health Service Act (42 U.S.C. 300j-9(i)(4)) is amended by striking out the last sentence.

(38) Section 304(e) of the Social Security Act (42 U.S.C. 504(e)) is repealed.

(39) Section 814 of the Act of April 11, 1968 (42 U.S.C. 3614), is repealed.

(40) The matter under subheading "EXPLORATION OF NATIONAL PETROLEUM RESERVE IN ALASKA" under the headings "ENERGY AND MINERALS" and "GEOLOGICAL SURVEY" in title I of the Act of December 12, 1980 (94 Stat. 2964; 42 U.S.C. 6508), is amended in the third paragraph by striking out the last sentence.

(41) Section 214(b) of The Emergency Energy Conservation Act of 1979 (42 U.S.C. 8514(b)) is repealed.

(42) Section 2 of the Act of February 25, 1885 (43 U.S.C. 1062), is amended by striking out "; and any suit brought under the provisions of this section shall have precedence for hearing and trial over other cases on the civil docket of the court, and shall be tried and determined at the earliest practicable day".

(43) Section 23(d) of the Outer Continental Shelf Lands Act (43 U.S.C. 1349(d)) is repealed.

(44) Section 511(c) of the Public Utilities Regulatory Policies Act of 1978 (43 U.S.C. 2011(c)) is amended by striking out "Any such proceeding shall be assigned for hearing at the earliest possible date and shall be expedited by such court.".

(45) Section 203(d) of the Trans-Alaska Pipeline Authorization Act (43 U.S.C. 1652(d)) is amended by striking out the fourth sentence.

(46) Section 5(f) of the Railroad Unemployment Insurance Act (45 U.S.C. 355(f)) is amended by striking out ", and shall be given precedence in the adjudication thereof over all other civil cases not otherwise entitled by law to precedence".

(47) Section 305(d)(2) of the Regional Rail Reorganization Act of 1973 (45 U.S.C. 745(d)(2)) is amended—

(A) in the first sentence by striking out "Within 180 days after" and inserting in lieu thereof "After"; and

(B) in the last sentence by striking out "Within 90 days after" and inserting in lieu thereof "After".

(48) Section 124(b) of the Rock Island Transition and Employee Assistance Act (45 U.S.C. 1018(b)) is amended by striking out ", and shall render a final decision no later than 60 days after the date the last such appeal is filed".

(49) Section 402(g) of the Communications Act of 1934 (47 U.S.C. 402(g)) is amended—

(A) by striking out "At the earliest convenient time the" and inserting in lieu thereof "The"; and

(B) by striking out "10(e) of the Administrative Procedure Act" and inserting in lieu thereof "706 of title 5, United States Code".

(50) Section 13A(a) of the Subversive Activities Control Act of 1950 (50 U.S.C. 792a note) is amended in the third sentence by striking out "or any court".

(51) Section 12(a) of the Military Selective Service Act of 1967 (50 U.S.C. App. 462(a)) is amended by striking out the last sentence.

(52) Section 4(b) of the Act of July 2, 1948 (50 U.S.C. App. 1984(b)), is amended by striking out the last sentence.

EFFECTIVE DATE

SEC. 203. The amendments made by this title shall not apply to cases pending on the date of the enactment of this title.

TITLE III—JUDICIAL SURVIVORS' ANNUITIES

SHORT TITLE

SEC. 301. This title may be cited as the "Judicial Survivors' Annuities Reform Act of 1982".

ANNUITIES FOR SURVIVORS

SEC. 302. (a) Subsections (b) and (d) of section 376 of title 28, United States Code, are amended by striking out "4.5 percent" each place it appears and inserting in lieu thereof "5.0 percent".

(b) Subsection (c) of section 376 of title 28, United States Code, is amended by striking the first sentence and inserting in lieu thereof the following: "There shall also be deposited to the credit of the 'Judicial Survivors' Annuities Fund', in accordance with such procedures as may be prescribed by the Comptroller General of the United States, amounts required to maintain the actuarial balance of the program as such amounts are actuarially determined on an annual basis in accordance with the provisions of subtitle C of part II of title I of the Budget and Accounting Procedures Act of 1950 (Public Law 95-595; 31 U.S.C. 68a).".

(c) Subsection (h)(1)(B) of section 376 of title 28, United States Code, is amended by striking out clauses (i) and (ii) and inserting in lieu thereof the following:

"(i) 10 percent of the average annual salary amount determined in accordance with the provisions of subsection (l) of this section; or

"(ii) 20 percent of such average annual salary amount, divided by the number of children; or".

(d) Subsection (h)(1)(C) of section 376 of title 28, United States Code, is amended by striking out clauses (ii) and (iii) and inserting in lieu thereof the following:

"(ii) 20 percent of the average annual salary amount determined in accordance with the provisions of subsection (l) of this section; or

"(iii) 40 percent of such average annual salary amount, divided by the number of children.".

(e) Subsection (l) of section 376 of title 28, United States Code, is amended—

(1) by striking out "1¼ percent" and inserting in lieu thereof "1.5 percent"; and

(2) by striking out all after "of this subsection" in paragraph (2) and inserting in lieu thereof the following: ", except that such annuity shall not exceed an amount equal to 50 percent of such average annual salary, nor be less than an amount equal to 30 percent of such average annual salary, and that any amount determined in accordance with the provisions of this subsection shall be reduced to the extent required by subsection (d) of this section, if applicable.".

(f) Subsection (h)(2) of section 376 of title 28, United States Code, is amended by inserting before the period, "prior to the attainment of sixty years of age".

AVAILABILITY OF BENEFITS

SEC. 303. The benefits conferred by this title shall immediately become available to any individual becoming eligible for an annuity under section 376 of title 28, United States Code, on or after the date upon which this title becomes effective, except that, although the rights of any judicial official electing to come within the purview of section 376 of title 28, United States Code, on or after the date upon which this title becomes effective, shall be determined exclusively under the provisions of that section as amended by this title, nothing in this title shall be interpreted to cancel, abrogate, or diminish any rights to which an individual or his or her survivors may be entitled by virtue of that individual having contributed to the judicial survivors annuity fund before the date upon which this title becomes effective.

RIGHT TO REVOKE ELECTION TO PARTICIPATE

SEC. 304. At any time within one hundred and eighty days after the date upon which this title becomes effective, any judicial official who has been participating in the judicial survivors annuity program created by the Judicial Survivors' Annuities Reform Act (90 Stat. 2603), shall be entitled to revoke his or her earlier election to participate in that program and thereby completely withdraw from participation in the program as reformed by this title, except that—

(a) any such revocation may be effected only by means of a writing filed with the Director of the Administrative Office of the United States Courts,

(b) any such writing shall be deemed to have become effective no sooner than the date upon which that writing is received by the Director,

(c) upon receipt of such a writing by the Director, any and all rights to survivorship benefits for such judicial official's survivors shall terminate, and all amounts credited to such judicial official's individual account, together with interest at 3 percent per annum, compounded on December 31 of each year to that date of revocation, shall thereafter be returned to that judicial official in a lump-sum refund payment, and

(d) any judicial official who effects such a revocation and who subsequently again becomes eligible and elects to join the judicial survivors annuities program created by this title under the provisions of section 376 of title 28, United States Code, as amended by this title, shall be permitted to do so only upon the redeposit of the full amount of the refund obtained under this section plus interest at 3 percent per annum, compounded on December 31 of each year from the date of the revocation until the date upon which that amount is redeposited.

Any judicial offical who fails to effect a revocation in accordance with the right conferred by this section within one hundred and eighty days after the date upon which this title becomes effective shall be deemed to have irrevocably waived the right to that revocation.

EFFECTIVE DATE

SEC. 305. This title shall become effective on the first day of the third month following the month in which it is enacted.

TITLE IV—STATE JUSTICE INSTITUTE

SHORT TITLE

SEC. 401. This title may be cited as the "State Justice Institute Act of 1982".

DEFINITIONS

SEC. 402. As used in this title, the term—

(1) "Board" means the Board of Directors of the Institute;

(2) "Director" means the Executive Director of the Institute;

(3) "Governor" means the Chief Executive Officer of a State;

(4) "Institute" means the State Justice Institute;

(5) "recipient" means any grantee, contractor, or recipient of financial assistance under this title;

(6) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and any other territory or possession of the United States; and

(7) "Supreme Court" means the highest appellate court within a State unless, for the purposes of this title, a constitutionally or legislatively established judicial council acts in place of that court.

ESTABLISHMENT OF INSTITUTE; DUTIES

SEC. 403. (a) There is established a private nonprofit corporation which shall be known as the State Justice Institute. The purpose of the Institute shall be to further the development and adoption of improved judicial administration in State courts in the United States. The Institute may be incorporated in the District of Columbia or in any other State. To the extent consistent with the provisions of this title, the Institute shall exercise the powers conferred upon a nonprofit corporation by the laws of the State in which it is incorporated.

(b) The Institute shall—

(1) direct a national program of assistance designed to assure each person ready access to a fair and effective system of justice by providing funds to—

(A) State courts;

(B) national organizations which support and are supported by State courts; and

(C) any other nonprofit organization that will support and achieve the purposes of this title;

(2) foster coordination and cooperation with the Federal judiciary in areas of mutual concern;

(3) make recommendations to government agencies concerning programs and activities relating to the administration of justice in State courts;

(4) promote recognition of the importance of the separation of powers doctrine to an independent judiciary; and

(5) encourage education for judges and support personnel of State court systems through national and State organizations, including universities.

(c) The Institute shall not duplicate functions adequately performed by existing nonprofit organizations and shall promote, on the part of agencies of State judicial administration, responsibility for the success and effectiveness of State court improvement programs supported by Federal funding.

(d) The Institute shall maintain its principal offices in the State in which it is incorporated and shall maintain therein a designated agent to accept service of process for the Institute. Notice to or service upon the agent shall be deemed notice to or service upon the Institute.

(e) The Institute, and any program assisted by the Institute, shall be eligible to be treated as an organization described in section 170(c)(2)(B) of the Internal Revenue Code of 1954 and as an organization described in section 501(c)(3) of the Internal Revenue Code of 1954 which is exempt from taxation under section 501(a) of such Code. If such treatments are conferred in accordance with the provisions of such Code, the Institute, and programs assisted by the Institute, shall be subject to all provisions of such Code relevant to the conduct of organizations exempt from taxation.

(f) The Institute shall afford notice and reasonable opportunity for comment to interested parties prior to issuing rules, regulations, guidelines, and instructions under this title, and it shall publish in the Federal Register, at least thirty days prior to their effective date, all rules, regulations, guidelines, and instructions.

BOARD OF DIRECTORS

SEC. 404. (a)(1) The Institute shall be supervised by a Board of Directors, consisting of eleven voting members to be appointed by the President, by and with the advice and consent of the Senate. The Board shall have both judicial and nonjudicial members, and shall, to the extent practicable, have a membership representing a variety of backgrounds and reflecting participation and interest in the administration of justice.

(2) The Board shall consist of—

(A) six judges, to be appointed in the manner provided in paragraph (3);

(B) one State court administrator, to be appointed in the manner provided in paragraph (3); and

(C) four public members, no more than two of whom shall be of the same political party, to be appointed in the manner provided in paragraph (4).

(3) The President shall appoint six judges and one State court administrator from a list of candidates submitted by the Conference of Chief Justices. The Conference of Chief Justices shall submit a list of at least fourteen individuals, including judges and State court administrators, whom the conference considers best qualified to serve on the Board. The President may reject such list and request another list of individuals. Prior to consulting with or submitting a list to the President, the Conference of Chief Justices shall obtain and consider the recommendations of all interested organizations and individuals concerned with the administration of justice and the objectives of this title.

(4) In addition to those members appointed under paragraph (3), the President shall appoint four members from the public sector to serve on the Board.

(5) The President shall appoint the members under this subsection within sixty days after the date of enactment of this title.

(6) The members of the Board of Directors shall be the incorporators of the Institute and shall determine the State in which the Institute is to be incorporated.

(b)(1) Except as provided in paragraph (2), the term of each voting member of the Board shall be three years. Each member of the Board shall continue to serve until the successor to such member has been appointed and qualified.

(2) Five of the members first appointed by the President shall serve for a term of two years. Any member appointed to serve for an unexpired term arising by virtue of the death, disability, retirement, or resignation of a member shall be appointed only for such unexpired term, but shall be eligible for reappointment.

(3) The term of initial members shall commence from the date of the first meeting of the Board, and the term of each member other than an initial member shall commence from the date of termination of the preceding term.

(c) No member shall be reappointed to more than two consecutive terms immediately following such member's initial term.

(d) Members of the Board shall serve without compensation, but shall be reimbursed for actual and necessary expenses incurred in the performance of their official duties.

(e) The members of the Board shall not, by reason of such membership, be considered officers or employees of the United States.

(f) Each member of the Board shall be entitled to one vote. A simple majority of the membership shall constitute a quorum for the conduct of business. The Board shall act upon the concurrence of a simple majority of the membership present and voting.

(g) The Board shall select from among the voting members of the Board a chairman, the first of whom shall serve for a term of three years. Thereafter, the Board shall annually elect a chairman from among its voting members.

(h) A member of the Board may be removed by a vote of seven members for malfeasance in office, persistent neglect of, or inability to discharge duties, or for any offense involving moral turpitude, but for no other cause.

(i) Regular meetings of the Board shall be held quarterly. Special meetings shall be held from time to time upon the call of the chairman, acting at his own discretion or pursuant to the petition of any seven members.

(j) All meetings of the Board, any executive committee of the Board, and any council established in connection with this title, shall be open and subject to the requirements and provisions of section 552b of title 5, United States Code, relating to open meetings.

(k) In its direction and supervision of the activities of the Institute, the Board shall—

(1) establish such policies and develop such programs for the Institute as will further achievement of its purpose and performance of its functions;

(2) establish policy and funding priorities and issue rules, regulations, guidelines, and instructions pursuant to such priorities;

(3) appoint and fix the duties of the Executive Director of the Institute, who shall serve at the pleasure of the Board and shall be a nonvoting ex officio member of the Board;

(4) present to other Government departments, agencies, and instrumentalities whose programs or activities relate to the administration of justice in the State judiciaries of the United States, the recommendations of the Institute for the improvement of such programs or activities;

(5) consider and recommend to both public and private agencies aspects of the operation of the State courts of the United States considered worthy of special study; and

(6) award grants and enter into cooperative agreements or contracts pursuant to section 406(a).

OFFICERS AND EMPLOYEES

SEC. 405. (a)(1) The Director, subject to general policies established by the Board,

shall supervise the activities of persons employed by the Institute and may appoint and remove such employees as he determines necessary to carry out the purposes of the Institute. The Director shall be responsible for the executive and administrative operations of the Institute, and shall perform such duties as are delegated to such Director by the Board and the Institute.

(2) No political test or political qualification shall be used in selecting, appointing, promoting, or taking any other personnel action with respect to any officer, agent, or employee of the Institute, or in selecting or monitoring any grantee, contractor, person, or entity receiving financial assistance under this title.

(b) Officers and employees of the Institute shall be compensated at rates determined by the Board, but not in excess of the rate of level V of the Executive Schedule specified in section 5316 of title 5, United States Code.

(c)(1) Except as otherwise specifically provided in this title, the Institute shall not be considered a department, agency, or instrumentality of the Federal Government.

(2) This title does not limit the authority of the Office of Management and Budget to review and submit comments upon the Institute's annual budget request at the time it is transmitted to the Congress.

(d)(1) Except as provided in paragraph (2), officers and employees of the Institute shall not be considered officers or employees of the United States.

(2) Officers and employees of the Institute shall be considered officers and employees of the United States solely for the purposes of the following provisions of title 5, United States Code: Subchapter I of chapter 81 (relating to compensation for work injuries); chapter 83 (relating to civil service retirement); chapter 87 (relating to life insurance); and chapter 89 (relating to health insurance). The Institute shall make contributions under the provisions referred to in this subsection at the same rates applicable to agencies of the Federal Government.

(e) The Institute and its officers and employees shall be subject to the provisions of section 552 of title 5, United States Code, relating to freedom of information.

GRANTS AND CONTRACTS

SEC. 406. (a) The Institute is authorized to award grants and enter into cooperative agreements or contracts, in a manner consistent with subsection (b), in order to—

(1) conduct research, demonstrations, or special projects pertaining to the purposes described in this title, and provide technical assistance and training in support of tests, demonstrations, and special projects;

(2) serve as a clearinghouse and information center, where not otherwise adequately provided, for the preparation, publication, and dissemination of information regarding State judicial systems;

(3) participate in joint projects with other agencies, including the Federal Judicial Center, with respect to the purposes of this title;

(4) evaluate, when appropriate, the programs and projects carried out under this title to determine their impact upon the quality of criminal, civil, and juvenile justice and the extent to which they have met or failed to meet the purposes and policies of this title;

(5) encourage and assist in the furtherance of judicial education;

(6) encourage, assist, and serve in a consulting capacity to State and local justice system agencies in the development, maintenance, and coordination of criminal, civil, and juvenile justice programs and services; and

(7) be responsible for the certification of national programs that are intended to aid and improve State judicial systems.

(b) The Institute is empowered to award grants and enter into cooperative agreements or contracts as follows:

(1) The Institute shall give priority to grants, cooperative agreements, or contracts with—

(A) State and local courts and their agencies,

(B) national nonprofit organizations controlled by, operating in conjunction with, and serving the judicial branches of State governments; and

(C) national nonprofit organizations for the education and training of judges and support personnel of the judicial branch of State governments.

(2) The Institute may, if the objective can better be served thereby, award grants or enter into cooperative agreements or contracts with—

(A) other nonprofit organizations with expertise in judicial administration;

(B) institutions of higher education;

(C) individuals, partnerships, firms, or corporations; and

(D) private agencies with expertise in judicial administration.

(3) Upon application by an appropriate Federal, State, or local agency or institution and if the arrangements to be made by such agency or institution will provide services which could not be provided adequately through nongovernmental arrangements, the Institute may award a grant or enter into a cooperative agreement or contract with a unit of Federal, State, or local government other than a court.

(4) Each application for funding by a State or local court shall be approved by the State's supreme court, or its designated agency or council, which shall receive, administer, and be accountable for all funds awarded by the Institute to such courts.

(c) Funds available pursuant to grants, cooperative agreements, or contracts awarded under this section may be used—

(1) to assist State and local court systems in establishing appropriate procedures for the selection and removal of judges and other court personnel and in determining appropriate levels of compensation;

(2) to support education and training programs for judges and other court personnel, for the performance of their general duties and for specialized functions, and to support national and regional conferences and seminars for the dissemination of information on new developments and innovative techniques;

(3) to conduct research on alternative means for using nonjudicial personnel in court decisionmaking activities, to implement demonstration programs to test innovative approaches, and to conduct evaluations of their effectiveness;

(4) to assist State and local courts in meeting requirements of Federal law applicable to recipients of Federal funds;

(5) to support studies of the appropriateness and efficacy of court organizations and financing structures in particular States, and to enable States to implement plans for improved court organization and finance;

(6) to support State court planning and budgeting staffs and to provide technical assistance in resource allocation and service forecasting techniques;

(7) to support studies of the adequacy of court management systems in State and local courts and to implement and evaluate innovative responses to problems of record management, data processing, court personnel management, reporting and transcription of court proceedings, and juror utilization and management;

(8) to collect and compile statistical data and other information on the work of the courts and on the work of other agencies which relate to and effect the work of courts;

(9) to conduct studies of the causes of trial and appellate court delay in resolving cases, and to establish and evaluate experimental programs for reducing case processing time;

(10) to develop and test methods for measuring the performance of judges and courts and to conduct experiments in the use of such measures to improve their functioning;

(11) to support studies of court rules and procedures, discovery devices, and evidentiary standards, to identify problems with their operation, to devise alternative approaches to better reconcile the requirements of due process with the needs for swift and certain justice, and to test their utility;

(12) to support studies of the outcomes of cases in selected subject matter areas to identify instances in which the substance of justice meted out by the courts diverges from public expectations of fairness, consistency, or equity, to propose alternative approaches to the resolving of cases in problem areas, and to test and evaluate those alternatives;

(13) to support programs to increase court responsiveness to the needs of citizens through citizen education, improvement of court treatment of witnesses, victims, and jurors, and development of procedures for obtaining and using measures of public satisfaction with court processes to improve court performance;

(14) to test and evaluate experimental approaches to providing increased citizen access to justice, including processes which reduce the cost of litigating common grievances and alternative techniques and mechanisms for resolving disputes between citizens; and

(15) to carry out such other programs, consistent with the purposes of this title, as may be deemed appropriate by the Institute.

(d) The Institute shall incorporate in any grant, cooperative agreement, or contract awarded under this section in which a State or local judicial system is the recipient, the requirement that the recipient provide a match, from private or public sources, equal to 25 per centum of the total cost of such grant, cooperative agreement, or contract, except that such requirement may be waived in exceptionally rare circumstances upon the approval of the chief justice of the highest court of the State and a majority of the Board of Directors.

(e) The Institute shall monitor and evaluate, or provide for independent evaluations of, programs supported in whole or in part under this title to insure that the provisions of this title, the bylaws of the Institute, and the applicable rules, regulations, and guidelines promulgated pursuant to this title, are carried out.

(f) The Institute shall provide for an independent study of the financial and technical assistance programs under this title.

LIMITATIONS ON GRANTS AND CONTRACTS

SEC. 407. (a) With respect to grants or contracts made under this title, the Institute shall—

(1) insure that no funds made available to recipients by the Institute shall be used at any time, directly or indirectly, to influence the issuance, amendment, or revocation of any Executive order or similar promulgation by any Federal, State, or local agency, or to undertake to influence the passage or defeat of any legislation by the Congress of the United States, or by any State or local legislative body, or any State proposal by initiative petition, unless a governmental agency, legislative body, a committee, or a member thereof—

(A) requests personnel of the recipients to testify, draft, or review measures or to make representations to such agency, body, committee, or member; or

(B) is considering a measure directly affecting the activities under this title of the recipient or the Institute;

(2) insure all personnel engaged in grant or contract assistance activities supported in whole or part by the Institute refrain, while so engaged, from any partisan political activity; and

(3) insure that every grantee, contractor, person, or entity receiving financial assistance under this title which files with the Institute a timely application for refunding is provided interim funding necessary to maintain its current level of activities until—

(A) the application for refunding has been approved and funds pursuant thereto received; or

(B) the application for refunding has been finally denied in accordance with section 509 of this title.

(b) No funds made available by the Institute under this title, either by grant or contract, may be used to support or conduct training programs for the purpose of advocating particular nonjudicial public policies or encouraging nonjudicial political activities.

(c) The authorization to enter into contracts or any other obligation under this title shall be effective only to the exent, and in such amounts, as are provided in appropriation Acts.

(d) To insure that funds made available under this title are used to supplement and improve the operation of State courts, rather than to support basic court services, funds shall not be used—

(1) to supplant State or local funds currently supporting a program or activity; or

(2) to construct court facilities or structures, except to remodel existing facilities to demonstrate new architectural or technological techniques, or to provide temporary facilities for new personnel or for personnel involved in a demonstration or experimental program.

RESTRICTIONS ON ACTIVITIES OF THE INSTITUTE

SEC. 408. (a) The Institute shall not—

(1) participate in litigation unless the Institute or a recipient of the Institute is a party, and shall not participate on behalf of any client other than itself;

(2) interfere with the independent nature of any State judicial system nor allow sums to be used for the funding of regular judicial and administrative activities of any State judicial system other than pursuant to the terms of any grant, cooperative agreement, or contract with the Institute, consistent with the requirements of this title; or

(3) undertake to influence the passage or defeat of any legislation by the Congress of the United States or by any State or local legislative body, except that personnel of the Institute may testify or make other appropriate communication—

(A) when formally requested to do so by a legislative body, committee, or a member thereof;

(B) in connection with legislation or appropriations directly affecting the activities of the Institute; or

(C) in connection with legislation or appropriations dealing with improvements in the State judiciary, consistent with the provisions of this title.

(b)(1) The Institute shall have no power to issue any shares of stock, or to declare or pay any dividends.

(2) No part of the income or assets of the Institute shall inure to the benefit of any director, officer, or employee, except as reasonable compensation for services or reimbursement for expenses.

(3) Neither the Institute nor any recipient shall contribute or make available Institute funds or program personnel or equipment to any political party or association, or the campaign of any candidate for public or party office.

(4) The Institute shall not contribute or make available Institute funds or program personnel or equipment for use in advocating or opposing any ballot measure, initiative, or referendum, except those dealing with improvement of the State judiciary, consistent with the purposes of this title.

(c) Officers and employees of the Institute or of recipients shall not at any time intentionally identify the Institute or the recipient with any partisan or nonpartisan political activity associated with a political party or association, or the campaign of any candidate for public or party office.

SPECIAL PROCEDURES

SEC. 409. The Institute shall prescribe procedures to insure that—

(1) financial assistance under this title shall not be suspended unless the grantee, contractor, person, or entity receiving financial assistance under this title has been given reasonable notice and opportunity to show cause why such actions should not be taken; and

(2) financial assistance under this title shall not be terminated, an application for refunding shall not be denied, and a suspension of financial assistance shall not be continued for longer than thirty days, unless the grantee, contractor, person, or entity receiving financial assistance under this has been afforded reasonable notice and opportunity for a timely, full, and fair hearing, and, when requested, such hearing shall be conducted by an independent hearing examiner. Such hearing shall be held prior to any final decision by the Institute to terminate financial assistance or suspend or deny funding. Hearing examiners shall be appointed by the Institute in accordance with procedures established in regulations promulgated by the Institute.

PRESIDENTIAL COORDINATION

SEC. 410. The President may, to the extent not inconsistent with any other applicable law, direct that appropriate support functions of the Federal Government may be made available to the Institute in carrying out its functions under this title.

RECORDS AND REPORTS

SEC. 411. (a) The Institute is authorized to require such reports as it deems necessary from any grantee, contractor, person, or entity receiving financial assistance under this title regarding activities carried out pursuant to this title.

(b) The Institute is authorized to prescribe the keeping of records with respect to funds provided by grant or contract and shall have access to such records at all reasonable times for the purpose of insuring compliance with the grant or contract or the terms and conditions upon which financial assistance was provided.

(c) Copies of all reports pertinent to the evaluation, inspection, or monitoring of any grantee, contractor, person, or entity receiving financial assistance under this title shall be submitted on a timely basis to such grantee, contractor, or person or entity, and shall be maintained in the principal office of the Institute for a period of at least five years after such evaluation, inspection, or monitoring. Such reports shall be available for public inspection during regular business hours, and copies shall be furnished, upon request, to interested parties upon payment of such reasonable fees as the Institute may establish.

(d) Non-Federal funds received by the Institute, and funds received for projects funded in part by the Institute or by any recipient from a source other than the Institute, shall be accounted for and reported as receipts and disbursements separate and distinct from Federal funds.

AUDITS

SEC. 412. (a)(1) The accounts of the Institute shall be audited annually. Such audits shall be conducted in accordance with generally accepted auditing standards by independent certified public accountants who are certified by a regulatory authority of the jurisdiction in which the audit is undertaken.

(2) The audits shall be conducted at the place or places where the accounts of the Institute are normally kept. All books, accounts, financial records, reports, files, and other papers or property belonging to or in use by the Institute and necessary to facilitate the audits shall be made available to the person or persons conducting the audits. The full facilities for verifying transactions with the balances and securities held by depositories, fiscal agents, and custodians shall be afforded to any such person.

(3) The report of the annual audit shall be filed with the General Accounting Office and shall be available for public inspection during business hours at the principal office of the Institute.

(b)(1) In addition to the annual audit, the financial transactions of the Institute for any fiscal year during which Federal funds are available to finance any portion of its operations may be audited by the General Accounting Office in accordance with such rules and regulations as may be prescribed by the Comptroller General of the United States.

(2) Any such audit shall be conducted at the place or places where accounts of the Institute are normally kept. The representatives of the General Accounting Office shall have access to all books, accounts, financial records, reports, files, and other papers or property belonging to or in use by the Institute and necessary to facilitate the audit. The full facilities for verifying transactions with the balances and securities held by depositories, fiscal agents, and custodians shall be afforded to such representatives. All such books, accounts, financial records, reports, files, and other papers or property of the Institute shall remain in the possession and custody of the Institute through-

out the period beginning on the date such possession or custody commences and ending three years after such date, but the General Accounting Office may require the retention of such books, accounts, financial records, reports, files, and other papers or property for a longer period under section 117(b) of the Accounting and Auditing Act of 1950 (31 U.S.C. 67(b)).

(3) A report of such audit shall be made by the Comptroller General to the Congress and to the Attorney General, together with such recommendations with respect thereto as the Comptroller General deems advisable.

(c)(1) The Institute shall conduct, or require each grantee, contractor, person, or entity receiving financial assistance under this title to provide for, an annual fiscal audit. The report of each such audit shall be maintained for a period of at least five years at the principal office of the Institute.

(2) The Institute shall submit to the Comptroller General of the United States copies of such reports, and the Comptroller General may, in addition, inspect the books, accounts, financial records, files, and other papers or property belonging to or in use by such grantee, contractor, person, or entity, which relate to the disposition or use of funds received from the Institute. Such audit reports shall be available for public inspection during regular business hours, at the principal office of the Institute.

AMENDMENTS TO OTHER LAWS

SEC. 413. Section 620(b) of title 28, United States Code, is amended—

(1) striking out "and" at the end of paragraph (3);

(2) striking out the period at the end of paragraph (4) and inserting in lieu thereof "; and"; and

(3) inserting the following new paragraph (5) at the end thereof:

"(5) Insofar as may be consistent with the performance of the other functions set forth in this section, to cooperate with the State Justice Institute in the establishment and coordination of research and programs concerning the administration of justice.".

AUTHORIZATIONS

SEC. 414. There are authorized to be appropriated to carry out the purposes of this title, $20,000,000 for fiscal year 1984, $25,000,000 for fiscal year 1985, and $25,000,000 for fiscal year 1986.

EFFECTIVE DATE

SEC. 415. The provisions of this title shall take effect upon the date of enactment of such title.

TITLE V—FEDERAL COURTS STUDY COMMISSION

SHORT TITLE

SEC. 501. This title may be cited as the "Federal Courts Study Act".

ESTABLISHMENT AND PURPOSES OF THE COMMISSION

SEC. 502. (a) There is hereby established a Federal Courts Study Commission on the future of the Federal Judiciary (hereafter referred to as the "Commission").

(b) The purposes of the Commission are to—

(1) study the jurisdiction of the courts of the United States;

(2) evaluate the procedures, personnel, business and administration of the courts;

(3) stimulate the examination of problems currently facing the courts;

(4) order, receive, and review reports from all dispute resolving bodies, including courts, administrative agencies, and alternative dispute resolution entities; and further, collect, and review all private and public studies concerning the effectiveness of courts of the United States, the jurisdiction of the courts and their procedures, personnel, business, and administration;

(5) report to the President, the Congress, the Judicial Conference of the United States, and the State Justice Institute, on the revisions, if any, in the Constitution and laws of the United States where the Commission, based on its study and evaluation, deems advisable; and

(6) develop a long-range plan for the future of the Federal Judiciary, including assessments involving—

(A) alternative methods of dispute resolution;

(B) the actual structure and administration of the Federal court system;

(C) the manner in which courts handle cases;

(D) methods of resolving intracircuit and intercircuit conflicts in the court of appeals; and

(E) the types of disputes resolved by the Federal courts and Federal agencies.

MEMBERSHIP OF THE COMMISSION

SEC. 503. (a) The Commission shall be composed of fourteen members appointed, within ninety days after the effective date of this title, as follows:

(1) four members appointed by the President of the United States with not more than two members from any major political party;

(2) two members of the Senate appointed by the President pro tempore of the Senate, one of whom shall be appointed upon the recommendation of the majority leader and one of whom shall be appointed upon the recommendation of the minority leader;

(3) two members of the House of Representatives appointed by the Speaker of the House of Representatives, one of whom shall be appointed upon the recommendation of the majority leader and one of whom shall be appointed upon the recommendation of the minority leader;

(4) four members appointed by the Chief Justice of the United States with no more than two of such members from any major political party; and

(5) two members appointed by the Conference of Chief Justices, with no more than one such member being from any major political party.

(b) The membership of the Commission shall be selected in such a manner as to be broadly representative of the various interests, needs, and concerns which may be affected by the jurisdiction of the Federal courts.

(c) The term of office of each Commission member shall be five years. Any member who was appointed pursuant to paragraph (2) or (3) of subsection (a) who vacates such office during his term of office with the Commission shall vacate his position on the Commission also. A member appointed to fill any such vacancy shall be appointed only for the remainder of his predecessor's term. Vacancies in the Commission shall not affect its powers and shall be filled in the same manner in which the original appointment was made.

(d) The Commission shall select a Chairman and a Vice Chairman from among its members.

(e) Eight members of the Commission shall constitute a quorum.

POWERS OF THE COMMISSION

SEC. 504. (a) The Commission or, on the authorization of the Commission, any subcommittee thereof may, for the purpose of carrying out its functions and duties, hold such hearings and sit and act at such times and places, administer such oaths, and request the attendance and testimony of such witnesses, and the production of such books, records, correspondence, memorandums, papers, and documents as the Commission, or any such subcommittee may deem advisable.

(b) The Administrative Office of the United States Courts, and the Federal Judicial Center, and each department, agency, and instrumentality of the executive branch of the Government, including the National Institute of Justice and independent agencies, shall furnish to the Commission, upon request made by the Chairman or Vice Chairman, such information and assistance as the Commission may reasonably deem necessary to carry out its functions under this title, consistent with other applicable provisions of law governing the release of such information.

(c) Subject to such rules and regulations as may be adopted by the Commission, the Chairman shall have the power to—

(1) appoint and fix the compensation of an Executive Director, and such additional staff personnel as he deems necessary, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at rates not in excess of the maximum rate for GS-18 of the General Schedule under section 5332 of such title, and

(2) procure temporary and intermittent services to the same extent as is authorized by section 3109 of title 5, United States Code, but at rates not to exceed $200 a day for individuals.

(d) To the extent or in such amounts as are provided in appropriation Acts, the Commission is authorized to enter into interagency agreements or contracts with the Federal Judicial Center, the National Center for State Courts, Federal or State agencies, private firms, institutions, and individuals for the conduct of research or surveys, the preparation of reports, and other activities necessary to the discharge of its duties.

(e) The Commission is authorized to receive financial assistance from sources other than the Federal Government, including assistance from private foundations.

(f) The Commission is authorized, for the purpose of carrying out its functions and duties pursuant to this title, to establish advisory panels consisting of members either of the Commission or of the public. Such panels shall be established to provide expertise and assistance in specific areas, as the Commission deems necessary.

FUNCTIONS AND DUTIES

SEC. 505. (a) The Commission shall—

(1) make a complete study of the jurisdiction of the courts of the United States and of the several States and report to the President and the Congress on such study within two years after the effective date of this title;

(2) recommend revisions to be made to the Constitution and laws of the United States as the Commission, on the basis of such study, deems advisable;

(3) collect and review studies on the effectiveness of the courts;

(4) develop a long-range plan for the judicial system;

(5) submit written reports to the President and the Congress on the condition of the judiciary, including a summary of their findings, recommendations, and conclusions annually, submitting the first such report within one year after the study concluded pursuant to paragraph (1); and

(6) make any recommendations and conclusions it deems advisable every year thereafter.

(b) The study of the jurisdiction of the courts conducted by the Commission pursuant to paragraph (1) of subsection (a) shall be completed within two years after the effective date of this title and prior to the other functions and duties provided for in this section.

COMPENSATION OF MEMBERS

SEC. 506. (a) A member of the Commission who is an officer or full-time employee of the United States shall receive no additional compensation for his or her services, but shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of duties vested in the Commission, but such amount shall not exceed the maximum amounts authorized under section 456 of title 28, United States Code.

(b) A member of the Commission who is from the private sector shall receive $200 per diem for each day (including traveltime) during which he or she is engaged in the actual performance of duties vested in the Commission, plus reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of such duties, but such amounts shall not be in excess of the maximum amounts authorized under section 456 of title 28, United States Code.

REPORTS

SEC. 507. (a)(1) The Commission shall transmit to the President and to the Congress, not later than two years after the effective date of this title, a study of the jurisdiction of the courts of the United States and of the several States pursuant to section 505(a)(1) of this title. The Commission shall thereafter, in keeping with its functions, annually transmit to the President and the Congress a report on the condition of the judiciary and summarize any findings, and make any recommendations and conclusions it deems advisable on the basis of its previous activities.

(2) Not later than 10 years after the effective date of this title the Commission shall submit a final report containing a detailed statement of the findings and conclusions of the study conducted pursuant to this title, together with any recommendations it deems advisable.

EXPIRATION OF THE COMMISSION

SEC. 508. The Commission shall cease to exist on the date 90 days after it transmits the final report pursuant to section 507 of this title.

AUTHORIZATION OF APPROPRIATIONS

SEC. 509. To carry out the purposes of this title there are authorized to be appropriated $700,000 for each of the fiscal years 1984 and 1985, and $800,000 for each of the eight succeeding fiscal years 1986 through 1993.

EFFECTIVE DATE

SEC. 510. This title shall become effective on the date of enactment of this title.

TITLE VI—INTERCIRCUIT TRIBUNAL

SHORT TITLE

SEC. 601. This title may be cited as the "Intercircuit Tribunal of the United States Courts of Appeals Act".

ESTABLISHMENT OF TRIBUNAL

SEC. 602. (a) Part I of title 28, United States Code, is amended by inserting immediately after chapter 3 the following new chapter:

"CHAPTER 4—INTERCIRCUIT TRIBUNAL OF THE UNITED STATES COURTS OF APPEALS

"Sec.
"61. Establishment and composition of Intercircuit Tribunal; sitting panels.
"62. Establishment and duties of the Chancellor of the United States.
"63. Principal office and terms.
"64. Seal.
"65. Sessions.

"§ 61. Establishment and composition of Intercircuit Tribunal; sitting panels

"(a)(1) There shall be established an Intercircuit Tribunal of the United States Courts of Appeals which shall be composed of the Chancellor of the United States and twenty-six circuit judges who are in regular active service or who are senior judges. The circuit council of each circuit shall designate two judges to serve on the Tribunal for a period of not more than five years from the date of such designation.

"(2) Cases and controversies shall be heard and determined by sitting panels, composed of five judges on each panel, as designated by rule of the court, from among judges serving on the Intercircuit Tribunal, except that no two judges from the same circuit may be designated to serve on a sitting panel at the same time. Judges shall be designated by a lottery system to serve on sitting panels in such a manner that all of the judges on the Tribunal hear and determine cases that are representative of all types of cases reviewed by the Tribunal. The judge on the sitting panel who is senior in service shall preside over that panel.

"(b) Rules of procedure shall be promulgated and published by vote of a majority of the full membership of the Intercircuit Tribunal before any cases are heard.

"(c) In the event of the death, resignation, or disability of any judge designated under subsection (a), the circuit council from which such judge had been selected shall, subject to the provisions of subsection (a), fill the vacancy for the remainder of the period for which such judge was designated to serve.

"§ 62. Establishment and duties of the Chancellor of the United States

"(a)(1) There shall be a Chancellor of the United States appointed by the Chief Justice from amongst judges on active duty as members of a United States Circuit Court of Appeals. The President shall appoint a replacement for the vacated circuit judgeship.

"(2) The Chancellor shall be subject to removal by the Chief Justice.

"(3)(A) The Chancellor may return to his former position as a judge of the United States Circuit Court of Appeals and serve in the same manner as he did prior to becoming Chancellor if he is dismissed, or voluntarily vacates such position.

"(B) The time spent as Chancellor shall be treated as years of judicial service for purposes of such judge's seniority status.

"(C) If such Chancellor returns to his former circuit judgeship position, such circuit shall be permitted to have its authorized number of judgeships plus the one additional judgeship resulting from the return of the former Chancellor until such time as one judge leaves the circuit by assuming senior status, by retirement, or death.

"(4) The Chancellor shall take the oath or affirmation as provided in section 453 of title 28, United States Code, before performing the duties of his office.

"(5) The Chancellor shall be provided with travel expenses pursuant to section 456 of title 28, United States Code, to the same extent such expenses are provided each Justice or judge of the United States.

"(b) The Chancellor shall serve as a member of the Intercircuit Tribunal and shall be responsible for the administration of the court.

"(c) The Chancellor shall supervise all administrative matters assigned to him by the Chief Justice and, as requested by the Chief Justice, assist with nonjudicial functions of the position of Chief Justice including administrative duties.".

"§ 63. Principal office and terms

"The principal office of the Intercircuit Tribunal of the United States Courts of Appeals shall be in the District of Columbia, but the Tribunal may hold court at such times and places within the United States as the Tribunal may fix by rule.

"§ 64. Seal

"The Intercircuit Tribunal of the United States Courts of Appeals shall have a seal which shall be judicially noticed.

"§ 65. Sessions

"The time and place of the sessions of the Intercircuit Tribunal of the United States Courts of Appeals shall be prescribed by rule of the court.".

(b) The analysis of part I of title 28, United States Code, is amended by inserting immediately after the item relating to chapter 3 the following new item:

"4. Intercircuit Tribunal of the United States Courts of Appeals.. 61".

OFFICERS AND EMPLOYEES

SEC. 603. (a) Part III of title 28, United States Code, is amended by inserting immediately after chapter 47 the following new chapter:

"CHAPTER 48—INTERCIRCUIT TRIBUNAL OF THE UNITED STATES COURTS OF APPEALS

"Sec.
"731. Clerk and employees.
"732. Marshal and bailiffs.

"§ 731. Clerk and employees

"(a) The Intercircuit Tribunal of the United States Courts of Appeals may appoint a clerk who shall be subject to removal by the Tribunal. The Tribunal may appoint or authorize the appointment of such other officers and employees in such number as may be approved by the Director of the Administrative Office of the United States Courts.

"(b) The officers and employees of the Tribunal shall be subject to removal by the Tribunal or, if the Tribunal so determines, shall, with the approval of the Tribunal, be subject to removal by the clerk or other officer who appointed them.

"(c) The clerk shall pay into the Treasury all fees, costs, and other moneys collected by the clerk and shall make returns thereof to the Director of the Administrative Office of the United States Courts under regulations prescribed by the Director.

"§ 732. Marshal and bailiffs

"(a) The Intercircuit Tribunal of the United States Courts of Appeals may request the services of the marshal of the court of appeals in the judicial district in which the Tribunal is sitting. The marshal shall attend the Tribunal at its sessions, take charge of all property of the United States used by the Tribunal or its employees, and perform such other duties as the Tribunal may direct. The marshal, with the approval of the Tribunal, may request necessary bailiffs from the court of appeals which the marshal serves. Such bailiffs shall attend the Tribunal, preserve order, and perform such other necessary duties as the Tribunal or the marshal may direct.".

(b) The analysis of part III of title 28, United States Code, is amended by inserting immediately after the item relating to chapter 47 of such title the following new item:

"48. Intercircuit Tribunal of the United States Courts of Appeals.. 731".

JURISDICTION AND REVIEW

SEC. 604. (a)(1) Chapter 81 of title 28, United States Code, is amended by adding at the end thereof the following new section:

"§ 1259. Referral to Intercircuit Tribunal of the United States Courts of Appeals

"(a) After granting or denying certiorari or noting probable jurisdiction of an appeal in cases before it, or while an application for review of a case by appeal or by writ of certiorari is pending in the Supreme Court, the Supreme Court may refer to the Intercircuit Tribunal of the United States Courts of Appeals any such case which is before the Supreme Court, by the affirmative vote of five of its members. The Supreme Court shall direct the Intercircuit Tribunal of the United States Courts of Appeals to decide any case so referred.

"(b) Any judgment of the Intercircuit Tribunal of the United States Courts of Appeals, in any case referred to the Tribunal under subsection (a), may be reviewed by the Supreme Court by writ of certiorari granted upon the petition of any party to any such case before or after rendition of judgment or decree by the Tribunal.".

(2) The analysis of chapter 81 of title 28, United States Code, is amended by adding at the end thereof the following new item:

"1259. Referral to Intercircuit Tribunal of the United States Courts of Appeals.".

(b)(1) Part IV of title 28, United States Code, is amended by adding immediately after chapter 81 of such title the following new chapter;

"CHAPTER 82—INTERCIRCUIT TRIBUNAL OF THE UNITED STATES COURTS OF APPEALS

"Sec.
"1271. Jurisdiction.
"1272. Finality of decisions.

"§ 1271. Jurisdiction

"The Intercircuit Tribunal of the United States Courts of Appeals shall have jurisdiction of cases referred to the Tribunal by the Supreme Court.

"§ 1272. Finality of decisions

"(a) The Intercircuit Tribunal of the United States Courts of Appeals may deny review in any case referred to the Tribunal by the Supreme Court which is subject to review by writ of certiorari, unless the Tribunal is directed by the Supreme Court to decide the case.

"(b) Unless modified or overruled by the Supreme Court, decisions of the Intercircuit Tribunal of the United States Courts of Appeals other than decisions denying review under subsection (a) shall be binding on all courts of the United States and, with respect to questions arising under the Constitution, laws, or treaties of the United States, on all other courts.".

(2) The analysis of part IV of title 28, United States Code, is amended by inserting immediately after the item relating to chapter 81 of such title the following new item:

"82. Intercircuit Tribunal of the United States Courts of Appeals.. 1271".

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 605. (a) Section 1913 of title 28, United States Code, is amended to read as follows:

"§ 1913. Courts of appeals; Intercircuit Tribunal of the United States Courts of Appeals

"The fees and costs to be charged and collected in each court of appeals and in the Intercircuit Tribunal of the United States Courts of Appeals shall be prescribed from time to time by the Judicial Conference of the United States. Such fees and costs shall be reasonable and, in the case of the courts of appeals, shall be uniform for all the courts.".

(b) The item relating to section 1913 of title 28, United States Code, in the analysis of chapter 123 of such title, is amended to read as follows:

"1913. Courts of appeals; Intercircuit Tribunal of the United States Courts of Appeals.".

(c) The first paragraph of section 2072 of title 28, United States Code, is amended by inserting after "courts of appeals of the United States" the following: ", and of the Intercircuit Tribunal of the United States Courts of Appeals".

(d) Section 2106 of title 28, United States Code, is amended by inserting immediately after "Supreme Court" the following: ", the Intercircuit Tribunal of the United States Courts of Appeals,".

AUTHORIZATION OF APPROPRIATIONS

SEC. 606. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this title.

EFFECTIVE DATE; REPORTS; TERMINATION OF INTERCIRCUIT TRIBUNAL

SEC. 607. (a) This title, and the amendments made by this title, shall take effect on October 1, 1983.

(b) Section 604(d) of title 28, United States Code, is amended—

(1) in paragraph (4) by striking out the period at the end thereof and inserting in lieu thereof "; and"; and

(2) by adding at the end thereof the following:

"(5) lay before Congress annually statistical tables and other information which will accurately reflect the business which has come before the Intercircuit Tribunal of the United States Courts of Appeals.".

(c) The Intercircuit Tribunal of the United States Courts of Appeals, in consultation with the Director of the Administrative Office of the United States Courts, shall submit to the Congress, not later than October 1, 1987, a comprehensive report on its activities from the effective date of this title.

(d)(1) The Intercircuit Tribunal of the United States Courts of Appeals shall terminate on September 30, 1988.

(2) This title, and the amendments made by this title, shall cease to be effective on September 30, 1988.●

By Mr. DOLE:

S. 646. A bill to amend title 18, United States Code, for the purpose of providing authority to the Attorney General to prosecute acts obstructing the flow of commerce, and for other purposes; to the Committee on the Judiciary.

INTERSTATE COMMERCE PROTECTION ACT OF 1983

● Mr. DOLE. Mr. President, today I am introducing the Interstate Commerce Protection Act of 1983, a bill to amend title 18 of the United States Code for the purpose of providing additional tools to the President and Attorney General where the movement of persons or property in interstate commerece is threatened by actual or potential violence.

The impetus for this legislation was the recently concluded "strike" by a minority of independent truck operators which affected the flow of products in interstate commerce throughout the United States. The strike activities of the independent operators who led the work stoppage were marked by numerous incidents of violence against the majority of truckers who refused to participate. The violence was, for the most part, random and unplanned. but it was, at the same time, encouraged by the stridency of certain leaders of the Independent Trucker's Associations who, in my view, callously disregarded the importance of protecting the interests of all parties traveling on the roadways of our Nation and those involved in the production and distribution of goods which flow in the channels of commerce.

As we in Congress watched the spectacle of one irresponsible, violent act after another unfold during the duration of this strike, it became obvious to me that the Federal Government—which is utltimately responsible for the proper management of the Federal highway system—needed a strengthened hand in dealing with renegade groups which thrive on unlawful disruption to the flow of commerce in order to rivet public attention on their grievances, thus was born this legislative initiative.

The legislation focuses upon two problem areas in the law as it currently exists.

First, the Federal criminal statues are unclear with regard to the Attorney General's authority to prosecute a violent act, the sole purpose of which is to disrupt the flow of goods in commerce. There presently exists authority to prosecute persons who damage, destroy, or disable motor vehicles carrying passengers—or passengers and freight—for hire; but the statutes are apparently limited by their terms to commercial vehicles carrying passengers, and further do not cover the commission of acts—such as blockades—which are done for the purpose

of blocking the movement of goods, and not destroying property.

Second, the utilization of criminal prosecutions as the primary response to such violence does not meet the need for quick, effective deterrent action against organized groups of individuals who act in concert to stop the flow of goods in commerce, or threaten so to do. Thus, the Government—when faced with spontaneous action by a group of independent contractors who threaten to disrupt commerce to call attention to their complaints—has no remedy except the time-consuming process of criminal indictment and prosecution. Valuable time is lost while criminal investigations are commenced and grand juries are convened, as the movement of persons and property in commerce is disrupted.

An example of the anomalous situation our Government finds itself in in such situations was the trucker's strike. If the Teamsters Union had called a nationwide trucking strike, the President could have acted under the powers granted to him by the Taft-Hartley Act, and sought injunctive relief against the union on the grounds of threat to the national welfare posed by the prospective strike. Yet when a group of independent truckers announces and carries out a work stoppage involving acts of violence and blockades, the President can do little else except seek indictment of individuals committing specific acts of violence. It is this imbalance that the legislation I offer today is intended to correct.

The legislation would amend title 18 of the United States Code in two principal respects. First, it would make unlawful the commission of any act the purpose of which is to obstruct or delay the flow of persons or property in interstate commerce, or to do material injury thereto; and it would further make unlawful the incitement or encouragement of any such act. Second, it would provide the Attorney General with the authority to seek injuctive relief in Federal courts against any individual who is committing such an act or encouraging others to commit such acts. Thus, it provides a more effective deterrent against those who would interfere with commerce than present law does, and it would provide quick civil remedies which could be used to control actual or threatened disruptions to the flow of goods in commerce by organized groups seeking public attention.

The bill is carefully written to insure that it does not infringe upon the legitimate exercise of collective bargaining rights by a labor union involved in a legitimate labor dispute. The language of the proposed measure expressly exempts any acts which are done within the parameters of a proper judicial order or statutory enactment. Thus, a strike action which is permitted by law—one protected by the provisions of statutes and case law governing labor relations—would not be affected by its provisions.

Mr. President, the legislation is brief in content and self-explanatory. I ask that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 646

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. That this Act may be cited as the "Interstate Commerce Protection Act of 1983".

SEC. 2. Title 18, United States Code, is amended by adding after Chapter 53 thereof a new chapter, which shall be designated as Chapter 54 and which shall read as follows:

"Chapter 54.—INTERSTATE COMMERCE

"Sec. 1170. Obstruction of Commerce: Criminal Acts and Penalties

"Sec. 1171. Obstruction of Commerce: Civil Remedies

"§ 1170. Obstruction of Commerce: Criminal Acts and Penalties.

(a) It shall be unlawful for any person to knowingly and intentionally commit, or attempt to commit, any act the purpose of which is to obstruct or delay the movement of persons or property in interstate commerce, or to inflict material damage or injury upon any person or item of property which is moving in interstate commerce.

(b) It shall be unlawful for any person to incite, encourage, aid, or abet the commission of any act which is prohibited under the provisions of paragraph (a) of this section.

(c) The provisions of this section shall not prohibit the commission of any act which is permitted by proper judicial order or by law, including but not limited to laws relating to labor disputes.

(d) Any person found guilty of violating the provisions of this section shall be fined not more than $10,000 for each such violation or imprisoned not more than ten years, or both.

(e) The term 'insurance commerce' as used in this section shall include any person or item of property which is engaged in trade, commerce, transportation, transmission, or communication among the several states or with foreign nations, or engaged in the production of goods for commerce."

"§ 1171. Obstruction of Commerce: Civil Remedies

(a) Any person injured in his person, business, or property by reason of a violation of section 1170 of this title may sue therefor in any appropriate United States district court, and shall recover such damages as may be sustained and shall be entitled to such equitable relief as may be proper.

(b) The Attorney General of the United States, or his designee, may petition any district court of the United States having jurisdiction over the parties to enjoin any person or group of persons who threaten to commit, or who is committing, any act which is in violation of section 1170 of this title from committing such act; and, upon a showing by a preponderance of the evidence, the court shall have jurisdiction to grant such injunctive relief as may be appropriate, as well as to enter such further orders as may be necessary under the circumstances of the case."

SEC. 3. Title 18, United States Code is further amended, in section 1961(1) thereof, by inserting the words "section 1170 (relating to obstruction of commerce)," after the words "section 1084 (relating to the transmission of gambling information),".●

By Mr. DOMENICI (for himself, Mr. PERCY, and Mr. RIEGLE):

S.J. Res. 43. Joint resolution to declare "Baltic Freedom Day"; to the Committee on the Judiciary.

BALTIC FREEDOM DAY

● Mr. DOMENICI. Mr. President, 43 years ago, in June of 1940, the Soviet Union in a flagrant violation of international, and indeed moral law annexed the Baltic States of Latvia, Lithuania, and Estonia. Their occupation of these states, characterized by religious persecution, dilution of century-old ethnic and cultural tradition, and the squelching of individual right of expression has been a source of great concern to people throughout the world.

The plight of these people, equal in gravity to that of the Poles and Afghans has not received the intense media attention that these more recent examples of Soviet expansionism and tyrrany have for the simple reason that their battle for freedom is an old one. Yet they persist, with a determination and strength that deserves the admiration of all those who wish to permanently eliminate the horror of imperialism. While under the yoke of Soviet hegemony, the Balts have not only endured the denial of their basic human rights, they have battled against the ongoing attempts of their oppressors to deprive them of their national identities. This identity, rich in cultural wealth, and value has clearly provided them with the strength and resolve that prevents them from giving up their struggle for freedom.

Mr. President, despite their 43-year fight for autonomy, these states remain under Soviet domination. Yet this has neither dampened their spirit of determination, nor lessened the strong sense of culture and tradition that unifies them. What is even more admirable is that the value they place on freedom extends beyond their own situation to that of others. Few groups of people stood as supportively behind the Polish people as the Balts.

We, who are so fortunate to live in freedom must extend to these brave people our ongoing support and commitment to their purpose. Thus, I ask that my colleagues join me in again designating June 14 as Baltic Freedom Day to commemorate and applaud the unyielding courage of the Balts in their pursuit of freedom.●

ADDITIONAL COSPONSORS

S. 4

At the request of Mr. CRANSTON, the name of the Senator from West Virginia (Mr. RANDOLPH) was added as a cosponsor of S. 4, a bill to provide assistance and coordination in the provision of child care services for children living in homes with working parents, and for other purposes.

S. 17

At the request of Mr. DOLE, the names of the Senator from Alaska (Mr. STEVENS), the Senator from Vermont (Mr. STAFFORD), the Senator from Texas (Mr. BENTSEN), and the Senator from Oklahoma (Mr. NICKLES) were added as cosponsors of S. 17, a bill to expand and improve the domestic commodity distribution program.

S. 39

At the request of Mr. BOREN, the name of the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 39, a bill to amend the Internal Revenue Code of 1954 to repeal the withholding of tax on interest and dividends.

S. 97

At the request of Mr. FORD, the name of the Senator from Maine (Mr. MITCHELL) was added as a cosponsor of S. 97, a bill to amend the Railroad Unemployment Insurance Act to provide supplemental unemployment benefits to certain employees with less than 10 years of services.

S. 213

At the request of Mr. LUGAR, the names of the Senator from Idaho (Mr. SYMMS), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Nebraska (Mr. EXON), the Senator from Iowa (Mr. GRASSLEY), the Senator from Oklahoma (Mr. NICKLES), the Senator from Florida (Mrs. HAWKINS), and the Senator from Alabama (Mr. HEFLIN), were added as cosponsors of S. 213, a bill to amend title II of the Social Security Act to provide generally that benefits thereunder may be paid to aliens only after they have been lawfully admitted to the United States for permanent residence, and to improve further restrictions on the right of any alien in a foreign country to receive such benefits.

S. 216

At the request of Mr. THURMOND, the name of the Senator from Maine (Mr. MITCHELL), was added as a cosponsor of S. 216, a bill to amend title 18, United States Code, to combat, deter, and punish individuals who adulterate or otherwise tamper with food, drug, cosmetic, and other products with intent to cause personal injury, death, or other harm.

S. 253

At the request of Mr. PRESSLER, the name of the Senator from Minnesota (Mr. BOSCHWITZ), was added as a cosponsor of S. 253, a bill to amend the Internal Revenue Code of 1954 to reduce the rate of tax imposed on certain petroleum products that are mixed with alcohol, and for other purposes.

S. 306

At the request of Mr. CRANSTON, the name of the Senator from California (Mr. WILSON), was added as a cosponsor of S. 306, a bill for the relief of Elga Bouilliant-Linet.

S. 427

At the request of Mr. BAUCUS, the names of the Senator from Vermont (Mr. STAFFORD), the Senator from Maryland (Mr. MATHIAS), the Senator from Wyoming (Mr. SIMPSON), the Senator from West Virginia (Mr. RANDOLPH), and the Senator from North Dakota (Mr. ANDREWS), were added as cosponsors of S. 427, a bill to amend the Internal Revenue Code of 1954 to remove certain limitations on charitable contributions of certain literary, musical, or artistic compositions.

S. 464

At the request of Mr. LONG, the name of the Senator from Alaska (Mr. MURKOWSKI) was added as a cosponsor of S. 464, a bill to exempt newly discovered oil from the windfall profit tax.

S. 476

At the request of Mr. LEVIN, the name of the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 476, a bill to amend title II of the Social Security Act to require a finding of medical improvement when disability benefits are terminated, to provide for a review and right to personal appearance prior to termination of disability benefits, to provide for uniform standards in determining disability, to provide continued payment of disability benefits during the appeals process, and for other purposes.

S. 480

At the request of Mr. PRESSLER, the names of the Senator from South Dakota (Mr. ABDNOR), the Senator from Maryland (Mr. SARBANES), and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of S. 480, a bill relating to the transfer of civil land remote sensing space satellite systems and meteorological satellite systems to the private sector.

S. 498

At the request of Mr. D'AMATO, the names of the Senator from South Dakota (Mr. PRESSLER), and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of S. 498, a bill to amend the Agricultural Act of 1949 to modify the dairy price support program.

S. 527

At the request of Mr. GRASSLEY, the name of the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 527, a bill to amend the Internal Revenue Code of 1954 with respect to the tax treatment of agricultural commodities received under a payment-in-kind program.

S. 549

At the request of Mr. HATCH, the name of the Senator from South Carolina (Mr. THURMOND) was added as a cosponsor of S. 549, a bill to amend title 11, United States Code, to improve the protections for shopping centers and their tenants under the Bankruptcy Code.

S. 553

At the request of Mr. HART, the name of the Senator from Massachusetts (Mr. TSONGAS) was added as a cosponsor of S. 553, a bill to authorize a national program of improving the quality of education.

S. 563

At the request of Mr. CHILES, the name of the Senator from Vermont (Mr. STAFFORD) was added as a cosponsor of S. 563, a bill to reform the laws relating to former Presidents.

S. 571

At the request of Mr. ROTH, the names of the Senator from Montana (Mr. MELCHER), and the Senator from Oklahoma (Mr. NICKLES) were added as cosponsors of S. 571, a bill to amend the Federal Property and Administrative Services Act of 1949 to make Federal surplus property more accessible to local emergency preparedness and volunteer firefighting organizations and to authorize and direct the Federal Emergency Management Agency to recommend available Federal surplus to the Administrator of the General Services Administration, and for other purposes.

S. 599

At the request of Mr. LEVIN, the names of the Senator from Rhode Island (Mr. PELL), and the Senator from Montana (Mr. MELCHER) were added as cosponsors of S. 599, a bill to provide that the amount of unnegotiated social security checks shall be returned to the social security trust funds.

SENATE JOINT RESOLUTION 11

At the request of Mr. ROTH, the name of the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of Senate Joint Resolution 11, a joint resolution entitled "National Safety in the Workplace Week."

SENATE JOINT RESOLUTION 37

At the request of Mr. HATCH, the name of the Senator from Rhode Island (Mr. CHAFEE) was added as a cosponsor of Senate Joint Resolution 37, a joint resoluton providing that the week containing March 8 of 1983, 1984, and 1985 shall be designated as "Women's History Week."

SENATE CONCURRENT RESOLUTION 6

At the request of Mr. BOSCHWITZ, the names of the Senator from Dela-

ware (Mr. BIDEN), the Senator from Georgia (Mr. NUNN), the Senator from Oklahoma (Mr. BOREN), the Senator from Montana (Mr. BAUCUS), and the Senator from Hawaii (Mr. INOUYE) were added as cosponsors of Senate Concurrent Resolution 6, a concurrent resolution expressing the sense of the Congress that the Federal Government should maintain current efforts in Federal nutrition programs to prevent increases in domestic hunger.

SENATE RESOLUTION 49

At the request of Mr. HOLLINGS, the names of the Senator from Oklahoma (Mr. BOREN), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Minnesota (Mr. BOSCHWITZ), and the Senator from Montana (Mr. MELCHER) were added as cosponsors of Senator Resolution 49, a resolution disapproving deferral D83-43, relating to economic development assistance programs.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that at the next printing of Senate Resolution 49, the following Senators be added as cosponsors: Mr. BOREN, Mr. DURENBERGER, Mr. BOSCHWITZ, and Mr. MELCHER.

With the addition of the above Senators, we now have a total of 49 Senators sponsoring Senate Resolution 49. The Committee on Appropriations has Senate Resolution 49 on the agenda for its meeting on Friday, March 4. I urge the leadership to schedule the resolution for early Senate action.

SENATE CONCURRENT RESOLUTION 12—REGARDING TREATY TERMINATION

Mr. GOLDWATER submitted the following concurrent resolution; which was referred to the Committee on Foreign Relations:

S. CON. RES. 12

Resolved by the Senate (the House of Representatives concurring),

PURPOSE AND DECLARATIONS

SECTION 1. (a) The purpose of this concurrent resolution is to provide for the greatest effectiveness of treaties to which the United States is a party, and to uphold the reputation of the United States as a treaty partner, by declaring the sense of Congress regarding the termination of, or withdrawal from, treaties by the United States.

(b) The Congress declares that the provisions of this concurrent resolution are an assertion and reaffirmation of—

(1) the powers of the Congress pursuant to the Constitution of the United States, to declare war, provide for the common defense, establish and regulate the Armed Forces of the United States, defend and protect the United States against foreign invasion, preserve a republican form of government, and enforce the supreme law of the land and the separation of powers between the executive and legislative branches of the United States;

(2) the power of the Congress under article I, section 8, of the Constitution, to make all laws necessary and proper for carrying into execution all powers vested by the Constitution in the government of the United States, or in any department or officer thereof, including the duty of the President to take care that the laws be faithfully executed; and

(3) the advice and consent and treaty powers of the Senate, under article II, section 2, clause 2, of the Constitution.

TREATIES OF MILITARY ALLIANCE, DEFENSE OR NATIONAL SECURITY

SEC. 2. Whenever the President or any officer acting for the President, without the prior advice and consent of the Senate or approval of the Congress—

(1) gives notice, on behalf of the United States, to any foreign government, foreign entity, or international organization of an intention to terminate or withdraw from a treaty of military alliance, defense, or national security to which the United States is a party, which treaty or resolution of ratification does not specifically identify the President as the officer who shall give such notice for the United States; or

(2) determines that any such treaty is terminated because it has lapsed or expired, or

(3) determines that the operation of any such treaty is temporarily suspended with respect to the United States,

the United States will not be considered as having terminated or withdrawn from such a treaty, unless and until the Senate have given its advice and consent to, or the Congress has authorized, directed, or otherwise approved or ratified, such termination or withdrawal.

REPORT TO CONGRESS OF CHANGE IN STATUS OF A TREATY

SEC. 3. Whenever the President—

(1) gives notice, on behalf of the United States, to any foreign government, foreign entity, or international organization, of an intention to terminate or withdraw from any treaty to which the United States is a party, or

(2) determines that such such treaty has lapsed or expired, or

(3) determines that the operation of any such treaty is temporarily suspended with respect to the United States—

the President, as soon as practicable under the circumstances, but no later than thirty days after the date of giving such notice of making such determination, is requested to prepare and transmit to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate a report setting forth the substance of such notice or determination. The President may transmit any such report in classified form under such rules of confidentiality and secrecy for the receipt and retention of such report as the President and the Congress may establish if he finds such a form of transmittal necessary in the interest of national security.

DEFINITION

SEC. 4. For purposes of this concurrent resolution—

(1) the term "treaty" is used within the meaning of article II, section 2, clause 2 of the Constitution of the United States and includes.

(A) a bilateral or multilateral treaty, whether or not it is inoperative or suspended, which is in effect with the United States on the date of approval of this concurrent resolution, and

(B) any provision of any such treaty; and

(2) the term "advice and consent of the Senate" means an affirmative vote of the Senate, with at least a majority of the Senators present concurring.

Mr. GOLDWATER. Mr. President, I propose today to define the rules which should be followed before any formal treaty to which the United States is a party can be terminated by the President. After giving the matter much thought, I have decided to submit a concurrent resolution which will be acted on only by the Congress. It will not be signed by the President. I will explain the reason for this approach later in my statement.

The resolution contains two basic features. First, it sets forth a procedure which the President should follow whenever he wishes to terminate any major military, defense, or national security treaty. The resolution says to the President that no matter what action he has taken with respect to such a treaty, he must come to the legislative branch first, before the treaty will lose its status as being part of the supreme law of the land of the United States.

The resolution does not attempt to deny the President any constitutional authority he may possess to consider a treaty as being temporarily suspended. This feature of the resolution will, I hope, answer anyone who is concerned about situations where treaties cannot be given effect "as black letter law," such as with respect to our treaties with Iran or Cuba.

The resolution sets forth clearly the position of the Congress that a formal treaty shall not be considered as having been finally terminated under the laws of the United States unless and until the President has obtained some form of legislative approval or ratification of his action. The resolution gives the President a choice. He may seek to obtain the advice and consent of the Senate, or he may choose to ask both Houses of Congress, for approval or ratification of his action.

Although I, personally, believe that the Senate should give a two-thirds vote when it acts alone with the President to terminate a treaty, the resolution provides that a majority vote will be sufficient whether he goes to the Senate or to both Houses of Congress for consent. The important thing is that there must be some manner of legislative participation in making a major decision which affects the security of the whole Nation and people.

The second provision of the resolution requests the President to inform Congress whenever he has given notice, on behalf of the United States, to any foreign government, entity or international body of his intention to terminate or withdraw from a treaty, whether it is a military or commercial or any other kind of treaty.

Also, the resolution asks the President to inform Congress whenever he finds that a treaty has lapsed or expired, or that the operation of any treaty with respect to the United

States is temporarily suspended. The President often gives notice of his intention to foreign governments in this situation, but the Congress is the last to hear or never is told.

Mr. President, the basic purpose of the resolution is to uphold the essence of our American system of constitutional government, which is the limitation of power, the purpose of preventing the accumulation of total power in any one branch or unit of government. This is unquestionably the foremost of the principles derived from the Revolutionary period and the Constitutional Convention of 1787.

My colleagues in Congress will be well aware that I first gained an intense interest in this subject as a result of former President Carter's action in abrogating the Mutual Defense Treaty with the Republic of China. His action was completely unprecedented in U.S. history. It stands among the worst violations of the separation of powers in the nearly 200 years of constitutional Government of our Nation.

When President Carter first announced his decision to terminate the Taiwan Defense Treaty, I filed suit in the Federal courts challenging the constitutionality of his action. That lawsuit went all the way to the Supreme Court. The district court upheld my challenge and declared the President's action to be unconstitutional. The court of appeals, by a 4 to 1 vote, supported the President's authority to unilaterally end a treaty. The Supreme Court granted certiorari in the case, but avoided ruling on the constitutional issue. The High Court did, however, specifically vacate and thereby overturn the court of appeals' decision leaving the President without any judicial approval of his action.

Instead, the plurality opinion by four members of the Supreme Court stated that treaty termination is a subject to be worked out between the Congress and the Executive, with no judicial intervention. The plurality opinion characterized the case as involving a "dispute between coequal branches of our Government, each of which has resources available to protect and assert its interest * * *."

Accordingly, Mr. President, I am submitting this resolution in direct response to the urging of the Supreme Court. I believe Congress will be able to address the issue at this time free of any emotional arguments about this Nation's relationship with the People's Republic of China and with the Republic of China on Taiwan. The issue of the Taiwan Defense Treaty is behind us. We should now consider the important issue of what is the proper role for the legislature to play in the termination of the law of the land, without regard to partisan politics or our feelings regarding a particular treaty.

Mr. President, the truth is that there are numerous significant treaties which may some day raise the same question that was presented with abrogation of the Taiwan treaty. For example, there is the recurring question of our Nation's participation in the United Nations under the U.N. Charter. There is the issue of our Government's adherence to the ABM Treaty in the face of suspected violations by the Soviets. There is the subject of our continued commitments under the defense treaties with South Korea and Japan.

There are any number of major treaties relating to national security that might be called into question in the future for reasons which are unknown at this time. We should have a systematic policy ready for dealing with these matters before the next crisis occurs.

Mr. President, the great flaw in the Supreme Court plurality opinion is that a treaty will have been terminated before Congress can do anything about it.

Congress can impeach the President. The treaty will still remain broken. Congress can deny all funds to operate the State Department. The treaty will still not exist. It is done, wiped off the slate, whatever happens later to the President, or his lieutenants or to his programs.

Under the decision of the Supreme Court to duck the constitutional issue, all the President has to do is to announce that a treaty is terminated effective immediately. It will not matter whether the treaty itself called for a grace period prior to termination, because the judicial branch has said it will not hear the matter. It has told us to find our own way to check the President. But Congress has no resources by which it can keep a treaty alive that is already terminated. Even the President himself cannot withdraw his final act of clear and unequivocal termination of a treaty.

The Senate cannot make a treaty by itself. By digging in his heels and refusing to negotiate a replacement to the abrogated treaty, the President can make a permanent grave for any treaty.

Even if the inconceivable should happen, and the same or another President should be persuaded by Congress to negotiate a new treaty containing the identical terms as the old one, a lengthy period of time will likely have transpired during which the original treaty will no longer exist. If the Supreme Court has found a way for Congress to move time backward, and I am not speaking just of minutes at the end of a congressional session, but for weeks and months and possibly years backward, and to have our Nation's action recognized by the international community, I wish the court would tell us how to do it.

Mr. President, I announced at the beginning of my statement that I have reached the decision of introducing a concurrent resolution instead of a bill or joint resolution. I do this for two reasons. First, I believe Congress should declare at the earliest possible time just where we stand on the issue of treaty termination. I think we can and will act on the matter faster if the President does not have to sign the legislation.

Second, I do not feel it will make any difference as a matter of law whether we agree to a concurrent resolution or a formal statute. In either event it is the Constitution itself that is the real source of the mandate for legislative participation in the termination of a treaty.

Once Congress conclusively announces its position on the subject, I believe the President will cooperate with the legislature. If the President should fail to cooperate with us, and I am speaking of whomever may sit in the Oval Office in the future, I am hopeful that the Supreme Court will change its mind on the political question issue. I believe that by adopting a formal resolution, we will confer standing on the legislative branch to contest any future unilateral treaty termination by the President.

But the first step is up to us. We must announce our view of the constitutional law which governs the termination of treaties. We must assert our interest in carrying out the constitutional requirement of legislative participation in the decision of the President to terminate a security treaty.

This subject cannot be left to case-by-case developments whenever a world crisis may next arise. We should act now to set forth reasoned and systematic standards applicable to the termination of security treaties. By doing so, we will restore credibility and permanence to our treaty alliances and improve the effectiveness of our treaty arrangements.

Finally, Mr. President, I would point out that the resolution will apply to a very limited number of treaty situations. In all of our history the United States has terminated less than 60 treaties. Most of the thousands of treaties that have been terminated have lost their force as a result of actions by other governments.

SENATE RESOLUTION 76—OMNIBUS COMMITTEE FUNDING RESOLUTION OF 1983

Mr. MATHIAS, from the Committee on Rules and Administration, reported the following original resolution; which was placed on the calendar:

S. RES. 76

Resolved, That this resolution may be cited as the "Omnibus Committee Funding Resolution of 1983".

AGGREGATE AUTHORIZATION

SEC. 2. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, and under the appropriate authorizing resolutions of the Senate, there is authorized in the aggregate $44,937,945, in accordance with the provisions of this resolution, for all Standing Committees of the Senate, the Special Committee on Aging, the Select Committee on Intelligence, and the Select Committee on Indian Affairs.

(b) Each committee referred to in subsection (a) shall report its findings, together with such recommendations for legislation as it deems advisable, to the Senate at the earliest practicable date, but not later than January 2, 1984, in the case of the Select Committee on Indian Affairs, and not later than February 29, 1984, in the case of any other such committee.

(c) Any expenses of a committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee, except that vouchers shall not be required for the disbursement of salaries of employees of the committee who are paid at an annual rate.

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

SEC. 3. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Agriculture, Nutrition, and Forestry is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $1,363,825, of which amount (1) not to exceed $2,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended), and (2) not to exceed $4,000 may be expended for the training of the professional staff of such committee (under procedures specified by section 202(j) of such Act).

COMMITTEE ON APPROPRIATIONS

SEC. 4. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraph 1 of rule XXVI of the Standing Rules of the Senate, the Committee on Appropriations is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $4,080,310, of which amount (1) not to exceed $80,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended), and (2) not to exceed $8,000 may be expended for the training of the professional staff of such committee (under procedures specified by section 202(j) of such Act).

COMMITTEE ON ARMED SERVICES

SEC. 5. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Armed Services is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $1,907,807, of which amount (1) not to exceed $15,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(I) of the Legislative Reorganization Act of 1946, as amended), and (2) not to exceed $10,000 may be expended for the training of the professional staff of such committee (under procedures specified by section 202(j) of such Act).

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

SEC. 6. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Banking, Housing, and Urban Affairs is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $1,704,116, of which amount (1) not to exceed $1,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended), and (2) not to exceed $1,000 may be expended for the training of the professional staff of such committee (under procedures specified by section 202(j) of such Act).

COMMITTEE ON THE BUDGET

SEC. 7. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraph 1 of rule XXVI of the Standing Rules of the Senate, the Committee on the Budget is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $2,945,961, of which amount not to exceed $50,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

SEC. 8 (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Commerce, Science, and Transportation is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $3,461,746, of which amount (1) not to exceed $20,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended), and (2) not to exceed $8,000 may be expended for the training of the professional staff of such committee (under procedures specified by section 202(j) of such Act).

COMMITTEE ON ENERGY AND NATURAL RESOURCES

SEC. 9. (a) In carrying out its powers, duties, and functions under the standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Energy and Natural Resources is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $2,338,584.

COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

SEC. 10. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such

hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Environment and Public Works is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $2,373,286, of which amount (1) not to exceed $10,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended), and (2) not to exceed $3,000 may be expended for the training of the professional staff of such committee (under procedures specified by section 202(j) of such Act).

COMMITTEE ON FINANCE

SEC. 11. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Finance is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $2,223,306, of which amount not to exceed $30,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the legislative Reorganization Act of 1946, as amended).

COMMITTEE ON FOREIGN RELATIONS

SEC. 12. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Foreign Relations is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $2,540,911, of which amount not to exceed $18,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

COMMITTEE ON GOVERNMENTAL AFFAIRS

SEC. 13. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Governmental Affairs is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $4,574,249 of which amount (1) not to exceed $189,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended), and (2) not to exceed $4,725 may be expended for the training of the professional staff of such committee (under procedures specified by section 202(j) of such Act).

(c)(1) The committee, or any duly authorized subcommittee thereof, is authorized to study or investigate—

(A) the efficiency and economy of operations of all branches of the Government including the possible existence of fraud, misfeasance, malfeasance, collusion, mismanagement, incompetence, corruption, or unethical practices, waste, extravagance, conflicts of interest, and the improper expenditure of Government funds in transactions, contracts, and activities of the Government or of Government officials and employees and any and all such improper practices between Government personnel and corporations, individuals, companies, or persons affiliated therewith, doing business with the Government; and the compliance or noncompliance of such corporations, companies, or individuals or other entities with the rules, regulations, and laws governing the various governmental agencies and its relationships with the public;

(B) the extent to which criminal or other improper practices or activities are, or have been, engaged in the field of labor-management relations or in groups or organizations of employees or employers, to the detriment of interests of the public, employers, or employees, and to determine whether any changes are required in the laws of the United States in order to protect such interests against the occurrence of such practices or activities;

(C) organized criminal activity which may operate in or otherwise utilize the facilities of interstate or international commerce in furtherance of any transactions and the manner and extent to which, and the identity of the persons, firms, or corporations, or other entities by whom such utilization is being made, and further, to study and investigate the manner in which and the extent to which persons engaged in organized criminal activity have infiltrated lawful business enterprise, and to study the adequacy of Federal laws to prevent the operations of organized crime in interstate or international commerce; and to determine whether any changes are required in the laws of the United States in order to protect the public against such practices or activities;

(D) all other aspects of crime and lawlessness within the United States which have an impact upon or affect the national health, welfare, and safety; including but not limited to investment fraud schemes, commodity and security fraud, computer fraud and the use of off-shore banking and corporate facilities to carry out criminal objectives;

(E) the efficiency and economy of operations of all branches and functions of the Government with particular reference to—

(i) the effectiveness of present national security methods, staffing, and processes as tested against the requirements imposed by the rapidly mounting complexity of national security problems;

(ii) the capacity of present national security staffing, methods, and processes to make full use of the Nation's resources of knowledge, talents;

(iii) the adequacy of present intergovernmental relationships between the United States and international organizations principally concerned with national security of which the United States is a member; and

(iv) legislative and other proposals to improve these methods, processes, and relationships;

(F) the efficiency, economy, and effectiveness of all agencies and departments of the Government involved in the control and management of energy shortages including, but not limited to, their performance with respect to—

(i) the collection and dissemination of accurate statistics on fuel demand and supply;

(ii) the implementation of effective energy conservation measures;

(iii) the pricing of energy in all forms;

(iv) coordination of energy programs with State and local government;

(v) control of exports of scarce fuels;

(vi) the management of tax, import, pricing, and other policies affecting energy supplies;

(vii) maintenance of the independent sector of the petroleum industry as a strong competitive force;

(viii) the allocation of fuels in short supply by public and private entities;

(ix) the management of energy supplies owned or controlled by the Government;

(x) relations with other oil producing and consuming countries;

(xi) the monitoring of compliance by governments, corporations, or individuals with the laws and regulations governing the allocation, conservation, or pricing of energy supplies; and

(xii) research into the discovery and development of alternative energy supplies; and

(G) the efficiency and economy of all branches and functions of Government with particular reference to the operations and management of Federal regulatory policies and programs:

Provided, That, in carrying out the duties herein set forth, the inquiries of this committee or any subcommittee thereof shall not be deemed limited to the records, functions, and operations of any particular branch of the Government; but may extend to the records and activities of any persons, corporation, or other entity.

(2) Nothing contained in this section shall affect or impair the exercise of any other standing committee of the Senate of any power, or the discharge by such committee of any duty, conferred or imposed upon it by the Standing Rules of the Senate or by

the Legislative Reorganization Act of 1946, as amended.

(3) For the purpose of this section the committee, or any duly authorized subcommittee thereof, or its chairman, or any other member of the committee or subcommittee designated by the chairman, from March 1, 1983, through February 29, 1984, is authorized, in its, his, or their discretion (A) to require by subpena or otherwise the attendance or witnesses and production of correspondence, books, papers, and documents, (B) to hold hearings, (C) to sit and act at any time or place during the sessions, recess, and adjournment periods of the Senate, (D) to administer oaths, and (E) to take testimony, either orally or by sworn statement, or, in the case of staff members of the Permanent Subcommittee on Investigations specifically authorized by the chairman, by deposition.

(4) All subpenas and related legal processes of the committee and its subcommittees authorized under S. Res. 57 of the Ninety-seventh Congress, first session, and S. Res. 333 of the Ninety-seventh Congress, second session, are authorized to continue.

(5) In voting whether to close any meeting or hearing of the Permanent Subcommittee on Investigations pursuant to rule XXVI(5)(b) of the Standing Rules of the Senate, written proxies specifically identifying the subject of the hearing may be counted.

COMMITTEE ON THE JUDICIARY

SEC. 14. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on the Judiciary is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $4,451,074, of which amount (1) not to exceed $66,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended), and (2) not to exceed $1,400 may be expended for the training of the professional staff of such committee (under procedures specified by section 202(j) of such Act).

COMMITTEE ON LABOR AND HUMAN RESOURCES

SEC. 15. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Labor and Human Resources is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $4,346,000, of which amount not to exceed $90,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

COMMITTEE ON RULES AND ADMINISTRATION

SEC. 16. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Rules and Administration is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $1,298,033, of which amount not to exceed $5,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

COMMITTEE ON SMALL BUSINESS

SEC. 17. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Small Business is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $934,680.

COMMITTEE ON VETERANS' AFFAIRS

SEC. 18. (a) In carrying out its powers, duties, and functions under the Standing Rules of the Senate, in accordance with its jurisdiction under rule XXV of such rules, including holding hearings, reporting such hearings, and making investigations as authorized by paragraphs 1 and 8 of rule XXVI of the Standing Rules of the Senate, the Committee on Veterans' Affairs is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $852,029.

SPECIAL COMMITTEE ON AGING

SEC. 19. (a) In carrying out the duties and functions imposed by section 104 of S. Res. 4, Ninety-fifth Congress, agreed to February 4, 1977, and in exercising the authority conferred on it by such section, the Special Committee on Aging is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the special committee under this section shall not exceed $1,036,131, of which amount (1) not to exceed $35,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended), and (2) not to exceed $1,000 may be expended for the training of the professional staff af such committee (under procedures specified by section 202(j) of such Act).

SELECT COMMITTEE ON INTELLIGENCE

SEC. 20. (a) In carrying out its powers, duties, and functions under S. Res. 400, May 19, 1976, in accordance with its juridiction under section 3(a) of such resolution, including holding hearings, reporting such hearings, and making investigations as authorized by section 5 of such resolution, the Select Committee on Intelligence is authorized from March 1, 1983, through February 29, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of personnel of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $1,882,407, of which amount (1) not to exceed $20,000 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

SELECT COMMITTEE ON INDIAN AFFAIRS

SEC. 21. (a) In carrying out the duties and functions imposed on it by section 105 of S. Res. 4, Ninety-fifth Congress, agreed to February 4 (legislative day, February 1), 1977, as amended, and in exercising the authority conferred on it by such section, the Select Committee on Indian Affairs is authorized from March 1, 1983, through January 2, 1984, in its discretion (1) to make expenditures from the contingent fund of the Senate, (2) to employ personnel, and (3) with the prior consent of the Government department or agency concerned and the Committee on Rules and Administration, to use on a reimbursable basis the services of any such department or agency.

(b) The expenses of the committee under this section shall not exceed $623,490, of which amount not to exceed $16,667 may be expended for the procurement of the services of individual consultants, or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

REPEALER

SEC. 22. Senate Resolution 59 of the Ninety-eighth Congress, agreed to February 16, 1983, is repealed.

NOTICES OF HEARINGS

COMMITTEE ON RULES AND ADMINISTRATION

Mr. MATHIAS. Mr. President, I wish to announce that the Committee on Rules and Administration will meet on Thursday, March 3, 1983, at 9:30 a.m., in SR-301, to receive testimony from Members of Congress and other interested parties on Senate Concurrent Resolution 7, a bill introduced by Senator GOLDWATER and cosponsored by Senator DECONCINI and myself, which would authorize and provide for a bust of Carl Hayden to be placed in the Capitol.

It is fitting and appropriate that we so honor this distinguished and highly respected legislator who spent more than half his life in service to his country. As you may know, Carl Hayden served in the U.S. Congress longer than any other person in history—a total of 56 years, 10 months, and 17 days, an alltime record. With Arizona's admission to the Union in 1912, Carl Hayden became the State's first Representative, serving from 1912 to 1927. In 1926 he was elected to the U.S. Senate and served from 1927 until he retired in 1969. The Sheriff, a nickname he earned from serving as Maricopa County sheriff from 1907 to 1912, was Senate President pro tempore from 1957 to 1969. Upon his retirement from the Senate, he returned to Arizona where he died in January of 1972 at the age of 94.

Members of Congress and other interested persons who wish to testify or to submit a statement for the record should contact Carole Blessington of the Rules Committee staff on 224-0278.

COMMITTEE ON SMALL BUSINESS

Mr. WEICKER. Mr. President, I would like to announce that the Senate Small Business Committee will hold an oversight hearing on the Federal minority business development programs on March 8, 1983, at 2 p.m., in room 428A-SR. Senator WEICKER will chair the hearing.

Mr. President, I would like to announce that the Senate Small Business Committee will hold a full committee markup on S. 499, a bill to require the usage of tax-exempt financing in connection with the Small Business Administration's section 503 loan program, on March 9, 1983, at 2 p.m., in room 428A-SR.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON FOREIGN RELATIONS

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Tuesday, March 1, at 11 a.m., to hold a business meeting to discuss the March 1 letter to the budget chairman, and to vote on the following nominations:

Morton I. Abramowitz for the rank of Ambassador during the tenure of his service as the representative of the United States of America for Mutual and Balanced Force Reductions Negotiations.

Manfred Eimer to be an Assistant Director of the Arms Control and Disarmament Agency.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, March 2, at 10 a.m., to hold a hearing on Foreign Relations Legislation: 1983, to consider U.S. Information Agency authorization.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, March 2, at 11:30 a.m., to hold a hearing on Foreign Relations Legislation: 1983, to consider Board for International Broadcasting authorization.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON NEAR EASTERN AND SOUTH ASIAN AFFAIRS

Mr. BAKER. I ask unanimous consent that the Subcommittee on Near Eastern and South Asian Affairs of the Committee on Foreign Relations be authorized to meet during the session of the Senate on Wednesday, March 2, at 2:30 p.m., to hold a hearing on Foreign Relations Legislation: 1983, to consider Mideast—legislative issues.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE ON THE JUDICIARY

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, March 2, in order to receive testimony concerning low-level radioactive waste disposal compacts.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Wednesday, March 2, to resume hearings on organized crime in the United States.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Thursday, March 3, to resume hearings on organized crime in the United States.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on the Judiciary be authorized to meet during the session of the Senate on Friday, March 4, in order to receive testimony concerning S. 216, the Federal Anti-Tampering Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

SOVIET UNION RESIGNS FROM WORLD PSYCHIATRIC ASSOCIATION, FEARING REJECTION

● Mr. DOLE. Mr. President, the international psychiatric community learned recently that the Soviet Society of Psychiatrists and Neuropathologists, the official organization of practicing psychiatrists in the Soviet Union, had decided to withdraw from membership in the World Psychiatric Association (WPA). Although this news came as a surprise to many observers, both within and outside the field of psychiatric medicine, there was a certain rationale to the Soviet decision. There have been a number of allegations, many of them well documented, by Western psychiatric experts and former inmates of Soviet psychiatric facilities, that psychiatry is being used as a method of suppressing dissent in the Soviet Union. Even a leading Soviet psychiatrist admitted that Soviet citizens are routinely hospitalized in psychiatric hospitals for making "groundless complaints" or "slanderous statements." It was for this reason that several psychiatric organizations within the World Psychiatric Association had been considering a move to expel the Soviet Union at the upcoming WPA Congress in Vienna, if the Soviet organization did not cooperate in providing information on alleged abuses of dissidents.

The Commission on Security and Cooperation in Europe, on which I serve as Cochairman, is charged by law with monitoring and encouraging compliance with the Helsinki Final Act of 1975, which was signed by both the United States and the Soviet Union, and which guarantees in part basic, individual human rights. The Commission is in receipt of several documents from the Soviet Union attesting to the abuse of psychiatry as practiced against Soviet dissidents. These victims of psychiatric abuse include religious dissenters such as Father Joseph Mikhailov, Ukrainian patriot Hanna Mykhailenko, the late Russian nationalist Boris Evdokimov, emigration activist Nikloai Barats,

Gen. Petro Grigorenko, and labor reformers Vladimir Klebanov and Aleksei Nikitin, to name just a few of those about whom the free world has received information. And these are, in the words of a former Soviet psychiatrist now living in the West, "just the tip of the iceberg."

SMUGGLED LETTER FROM LABOR CAMP

It is against the backdrop that I call the attention of my colleagues to a letter smuggled out of Labor Camp No. 37, in the Soviet region of Perm. The letter describes the continuing persecution by Soviet authorities against Soviet psychiatrist and Prisoner of Conscience, Dr. Anatoly Koryagin. Dr. Koryagin had bravely come to the defense of healthy citizens—particularly in the case of mining engineer Aleksei Nikitin—who had been diagnosed as mentally incompetent by "official" Soviet psychiatrists for having protested against injustices in Soviet society. For this "crime" Dr. Koryagin was sentenced to 7 years labor camp and 5 years subsequent internal exile. In July of last year, he was retried at Labor Camp No. 37 and sentenced to spend 3 years of his sentence in the dread confines of Chistopol Prison, a facility of whose harsh reputation the world has become particularly aware, particularly in connection with the recent hunger strike by another of its unfortunate occupants, Anatoly Shcharansky.

The letter to which I refer provides an accurate description of the price that Anatoly Koryagin is paying for his principled defense of his fellow man, both as a physician and human being. I ask to have printed in the RECORD the text of this letter, as translated by the Commission on Security and Cooperation in Europe.

The letter follows:

FOR MEDICAL AID—GO TO PRISON

On July 13, 1982, a lightning-quick parody of a trial (for medical aid—go to prison) took just a few minutes to sentence Kharkov psychiatrist and inmate of Perm Camp No. 37, Anatoly Koryagin, to three years in prison. This kangaroo court took place in the administration office on the second floor, where two guards stood at the entrance and refused admittance to any of the inmates, except for the accused. The inmates of the camp were not informed as to what were the charges against Koryagin. But the prisoners themselves know that he had taken an active part in exposing the agents and provocateurs of the KGB, Robert Magdeev, Oleg Mihailov, and Vladimir Sverdlov. He had gone on strike in October-November 1981, was the author of several works exposing the criminal interference of the KGB in psychiatry as it is applied against political prisoners (PZKS). He had been the coauthor of a number of factual texts, exposing KGB activities in the political zone at Camp No. 37. He has refused to talk with KGB operatives. He had resisted the punishment-educational measures conducted by the KGB and corrective labor administration authorities, and for this has been subjected on several occasions to the torture of hunger, cold and insomnia—through incarceration in solitary confinement cells and camp prison cells. But a number of other prisoners have done the same thing. Why was Koryagin brought up on charges? Undoubtedly because he helped inmates in his capacity as a highly qualified physician, frequently coming into conflict with the medical personnel, who are now required to follow the precepts of Dzerzhinsky, rather than those of Hippocrates. He rendered medical aid, and provided consultation, in particular, to political prisoner Marzpet Arutyunyan, who had been savagely beaten by KGB operatives at the Rostovskaya prison, and to whom the doctors had refused to give the necessary medical assistance; (he aided) V. Arutyunyan, T. Madisson, I. Izevkov, G. Yakunin, N. Ivlyushkin, Yu. Orlov, and A. Tsurkov, whom doctors had also refused to treat on the grounds that "camp is not a resort, no one is going to take care of you here, and if something happens to you, it's no loss for the country." This is the professional opinion of corrective labor administration doctor and MVD captain, G. Chepkasovaya, who is responsible for caring for people. But, alas, taking her orders from the KGB, she does not do this. The only one who did this was Koryagin, carrying out his duties as a physician and following the dictates of his conscience as a human being.

AN APPEAL FOR A TRUCE IN EL SALVADOR FEBRUARY 28, 1983

● Mr. PELL. Mr. President, on Friday, February 25, identical letters initiated by me in the Senate and by Representative MICHAEL BARNES in the House of Representatives were sent to President Magana of El Salvador and Dr. Guillermo Ungo, head of the Democratic Revolutionary Front, the political arm of the insurgent movement, calling on them to urge their forces to observe a truce during the visit of the Pope on March 6. The letters which were signed by Senators DODD, LEVIN, PRESSLER, EAGLETON, RIEGLE, HATFIELD, BINGAMAN, CRANSTON, BOSCHWITZ, KASSEBAUM, HART, TSONGAS, KENNEDY, and myself and by 83 Members of the House also called on both sides to observe the truce indefinitely in order to allow initiatives for a political settlement to surface. Senator CHAFEE, although not an initial signer of the letter, also associates himself with it.

It is clear from recent events in El Salvador that neither the Government nor the guerrilla forces can hope to win a military victory. We are urging that the fighting and bloodletting be stopped so that the search for a political solution can begin. The visit of the Pope offers the first opportunity in a long time for a breakthrough toward peace in El Salvador which the people of that beleaguered nation so much want and deserve.

Mr. President, I ask that the text of the two letters be printed in the RECORD.

The letters follow:

UNITED STATES SENATE,
Washington, D.C., February 25, 1983.

His Excellency ALVARO ALFREDO MAGANA BORJO,
President, Republic of El Salvador, National Palace, San Salvador, El Salvador.

DEAR MR. PRESIDENT: It has been reported in the United States press that Msgr. Arturo Rivera y Damas, Acting Archbishop of San Salvador, has called upon both Government and guerrilla forces to observe a truce in observance of the visit of His Holiness John Paul II in early March.

We strongly endorse this proposal and urge the forces on both sides to observe such a truce. Furthermore, we urge the forces of both sides to observe the truce indefinitely, in order to give initiatives for a political settlement of the conflict an opportunity to surface and to take effect.

The people of El Salvador want peace, and they believe that the visit of His Holiness can help bring peace. It is our strong hope that this constructive initiative of Msgr. Rivera y Damas could lead to a break in the unhappy cycle of violence that has afflicted your country and could open up avenues for a peaceful resolution of the conflict.

With every good wish.

Sincerely,

Claiborne Pell, Carl Levin, Thomas F. Eagleton, Mark O. Hatfield, Alan Cranston, Nancy L. Kassebaum, Paul E. Tsongas, Christopher J. Dodd, Larry Pressler, Donald W. Riegle, Jr., Jeff Bingaman, Rudy Boschwitz, Gary Hart, Edward M. Kennedy.

UNITED STATES SENATE,
Washington, D.C., February 25, 1983.

Dr. GUILLERMO MANUEL UNGO,
President, Democratic Revolutionary Front.

DEAR DR. UNGO: It has been reported in the United States press that Msgr. Arturo Rivera y Damas, Acting Archbishop of San Salvador, has called upon both Government and guerrilla forces to observe a truce in observance of the visit of His Holiness John Paul II in early March.

We strongly endorse this proposal and urge the forces on both sides to observe such a truce. Furthermore, we urge the forces of both sides to observe the truce indefinitely, in order to give initiatives for a political settlement of the conflict an opportunity to surface and to take effect.

The people of El Salvador want peace, and they believe that the visit of His Holiness can help bring peace. It is our strong hope that this constructive initiative of Msgr. Rivera y Damas could lead to a break in the unhappy cycle of violence that has afflicted your country and could open up avenues for a peaceful resolution of the conflict.

With every good wish.

Sincerely,

Claiborne Pell, Carl Levin, Tom F. Eagleton, Mark Hatfield, Alan Cranston, Nancy Landon Kassebaum, Paul Tsongas, Christopher J. Dodd, Larry Pressler, Don Riegle, Jeff Bingaman, Rudy Boschwitz, Gary Hart, Edward M. Kennedy.●

FREEDOM FOR THE BALTIC NATIONS

● Mr. DOLE. Mr. President, it is the privilege of many Members of this body, including myself, to frequently call attention to the plight of the three formerly independent Baltic na-

tions, Estonia, Latvia, and Lithuania, which are currently occupied by the Soviet Union.

With this in mind, I take pleasure in noting that on January 13, 1983, the European Parliament, meeting in Strasbourg, France, voted to adopt a resolution calling for the restoration of independence to the three Baltic nations to which I have referred. The resolution was passed by a 98-to-6 margin, which indicates the strength of the commitment of the members of the European Parliament to the restoration of independence to the captive Baltic nations.

I commend the action of the European Parliament and request that the text of the resolution be entered into the RECORD.

The text of the resolution follows:

BALTIC ISSUE BEFORE THE EUROPEAN PARLIAMENT—MOTION FOR A RESOLUTION ON THE SITUATION IN ESTONIA, LATVIA, AND LITHUANIA

The European Parliament:

A. having regard to the joint declaration of 45 nationals of Estonia, Latvia, and Lithuania, in April 1979, calling on the United Nations to recognize the rights of the Baltic States to self-determination and independence, and demanding a referendum on this issue,

B. having regard to the bilateral peace treaties between the Soviet Union and the three Baltic States in Dorpat (2 February 1920), Moscow (12 July 1920) and Riga (11 August 1920), in which the Soviet Union guaranteed the three Baltic States the inviolability of their territory and eternal peace,

C. having regard to Article VIII of the Final Act of the Helsinki Conference on Security and Cooperation, which secures the right of self-determination of people and their right, in full freedom, to determine, when and as they wish, their internal and external political status,

D. condemning the fact that the occupation of these formerly independent and neutral states by the Soviet Union occurred in 1940 pursuant to the Molotov/Ribbentrop Pact, and continues,

E. whereas the Soviet annexias of the three Baltic States has still not been formally recognized by most European states and the USA, Canada, the United Kingdom, Australia and the Vatican still adhere to the concept of the Baltic States,

F. having regard to the eight-year long struggle and armed resistence of Estonians, Latvians, and Lithuanians fighting for their freedom, the thousands of victims of this struggle and the 665,000 Estonians, Latvians, and Lithuanians who have been resettled and removed to labor camps in Siberia by the Soviet rulers since 1940,

G. having regard to the motion for a resolution on the situation in Estonia, Latvia, and Lithuania (Doc. 1-777/80),

H. having regard to the report of the Political Affairs Committee (Doc. 1-656/82),

1. Calls on the Conference of Foreign Ministers meeting in political cooperation to attempt to form a common favourable approach to the declaration addressed to the United Nations in 1979;

2. Suggests that they submit the issue of the Baltic states to the Decolonization Subcommittee of the UN,

3. Considers that the plight of the peoples of these states should be the subject of review during the conferences to monitor implementation of the Helsinki Final Act;

4. Expresses the hope that the Conference of Foreign Ministers will use their best endevours to see that the aspirations of the peoples of these states as to their form of government are realized,

5. Instructs its President to forward this resolution to the Foreign Ministers of the Member States of the European Community meeting in political cooperation, and to the governments of the Member States.●

THE BOLAND PROVISION REVISITED

● Mr. DODD. Mr. President, in the waning hours of the 97th Congress, my colleagues will recall that the Boland provision relating to U.S. policy toward Nicaragua was adopted as part of the continuing resolution.

The intent of this provision, as I understand it, is to bar the Central Intelligence Agency and the Pentagon from using or furnishing military equipment, training, or advice, or funding any military activities for the purpose of overthrowing the Government of Nicaragua or provoking a military exchange between Honduras and Nicaragua.

So far, so good, Mr. President. But the difficulty is this: To what extent does the Boland provision permit either the CIA or the Pentagon to do indirectly what it is prohibited from doing directly? In other words, to what extent does the Boland provision contain a significant loophole? To what extent does this provision allow funding for paramilitary groups whose objective are decidedly different from our stated policy? More to the point, Mr. President, to what extent does the existing legal requirement permit continued funding for the Somocista forces who fled to Honduras and who are determined to topple the new government in Managua, a government with which we have regular diplomatic relations. Finally—and to be blunt about it—to what extent is the Boland provision little more than a "toothless tiger," or perhaps the legislative equivalent of a denture adhesive?

These are the questions that arise from the language of the Boland provision. These are the questions that serve to underscore the controversy surrounding it. And these are the questions that must be answered clearly and definitively.

To my way of thinking, Mr. President, the Boland provision at a minimum must be modified to prohibit U.S. support for any paramilitary group or irregular military force whose goals and objectives include overthrowing the Nicaraguan Government or provoking a military confrontation between Honduras and Nicaragua. Such a prohibition is absolutely essential if there is to be any hope of restoring a measure of peace and stability in the Central American region.

The fact of the matter is, I would prefer to see a broader prohibition—a blanket prohibition—against any U.S. funding for paramilitary operations in Central America. Such a prohibition not only makes good commonsense, but it also makes good foreign policy as well. Sooner or later we must come to the realization that gunboat diplomacy is no more popular in Central America today that it was at the turn of the century.

In the meantime, Mr. President, I will reluctantly settle for something less, providing it amounts to more than the Boland provision presently offers. It must be modified and strengthened. And I will lend my full support to this effort.

By the time the existing Boland provision expires September 30, a stronger, tougher measure must be in place. To this end, I look forward in the coming weeks to working closely with the members of the Intelligence Committee, as well as with my colleagues on the Foreign Relations Committee. I am confident this matter can be resolved satisfactorily and in a way which avoids taking up additional time on the Senate floor.●

INTERNATIONAL DAY OF THE SEAL

● Mr. WEICKER. Mr. President, I am proud today to recognize the International Day of the Seal. Last year, I introduced a resolution to set apart today in order to heighten public awareness of the plight of seals and to perpetuate a 3-year tradition of celebrating such a day. March 1 was chosen because it represents the high point in the life cycle of the Canadian harp seal, which is probably the species most familiar to the general public.

Seals are an essential part of the ocean environment. They are warmblooded, fur-bearing predators that inhabit coastal areas all over the world. Predominantly fish eaters, they occasionally feed on squid, decapods, crustaceans, krill, and other invertebrates. Usually, they are cold and temperate water dwellers. In one season, an individual seal may migrate thousands of miles.

The seal has been hunted for food and its fine fur for centuries. As a result, some species have been depleted to the point that a number of nations, including the United States, now protect seals along with other marine mammals. In 1972, public outrage in the United States was the impetus for passage of the Marine Mammal Protection Act. The act has so far had a great impact on the protection and rehabilitation of several species of marine mammals.

One of the few tropical seals, the Hawaiian Monk Seal, is the most endangered marine mammal within the jurisdiction of the United States. Only the awareness by a concerned citizenry of the special role these mammals play in the world's web of life has prevented their total disappearance.

The only exemption for the hunting of seals in this country is by Alaskan natives on the Pribilof Islands for subsistence and commercial purposes. An average annual harvest of more than 25,000 of the North Pacific fur seals has been taken in recent years. The Pribilof seals are clubbed to death in the same manner that the harp seal pups are harvested in northern Canada.

I was indeed encouraged to find out that public opinion in Europe has resulted in a halt of all imports of baby sealskins by the European Economic Community. Because of this economic sanction, the Canadian Government announced last week that it has canceled the harp seal hunt.

Mr. President, the seal stands as a symbol of man's attempts to conserve and to live in harmony with the natural realm. Therefore, I commend to all the recognition of the International Day of the Seal.●

BERNARD J. WUNDER, JR.

● Mr. PACKWOOD. This week, the Reagan Subcabinet loses one of its best. Bernard J. Wunder, Jr. is resigning as Assistant Secretary of Commerce for Communications and Information, a position that he has held since June 1981. Bernie, with his genuine and unflagging enthusiasm and diligence, has accomplished much in support of the Commerce Committee's deregulatory initiatives in the telecommunications field. Indeed, without Bernie's help and counsel, and the extensive technical and policy assistance provided by the National Telecommunications and Information Administration he headed, we could not have achieved more than a fraction of the goals sought by our committee and the Reagan administration in fostering competition in this key high-tech, sunrise industry. Bernie, in short, has been a great resource.

Bernie Wunder began his Government service in 1969 when he joined the staff of Congressman Jim Collins of Texas. Later, he worked with the House Commerce Committee's Subcommittee on Oversight and Investigations, served as Republican counsel for the House Telecommunications Subcommittee, and ultimately, was named chief counsel for that subcommittee. In 1981, the President nominated him as Assistant Secretary and the Senate promptly confirmed him to this position.

Bernie played a pivotal role in obtaining Senate passage of its first bill containing significant reforms in domestic common carrier regulation. It was a bill that would have promoted competition in our Nation's telephone industry, while preserving the quality of service to the consumer. Congress had been debating how to deregulate the communications field more than 6 years. Finally, with Bernie's help, the Senate passed a bill.

In other areas, Bernie helped the Congress pass a bill which reauthorized a number of needed changes in the Public Broadcasting Act. He also worked with the Senate to help us enact the first broadcasting reforms in 12 years, by using the 1981 omnibus budget reconciliation measure. Bernie has been working with the Senate Communications Subcommittee to develop sound cable television legislation and reform the copyright laws. Last week, he submitted to Congress, on behalf of NTIA, an exhaustive study of U.S. policies and goals in the international telecommunications and information policies that the United States must pursue in future multilateral and bilateral meetings.

Bernie must count as one of his most important accomplishments the elevation of the level of attention accorded telecommunications issues in the executive branch. In conjunction with Secretary of Commerce Malcolm Baldrige's leadership and interest, Bernie worked in the Cabinet Council on Commerce and Trade to identify issues and adopt strategies that have helped to resolve many of the problems clouding the future of U.S. domestic and international telecommunications policy. He accomplished all this even as he was streamlining NTIA and making it a more effective voice in the telecommunications field.

Telecommunications is one of the most important sectors of our competitive, free-enterprise economy. How we address policy issues in this area, and what caliber of leadership the executive branch demonstrates, are of great importance. They signal at home and abroad the priority that we accord to this crucial part of our economy. By naming Bernie Wunder, President Reagan sent the signal that he and the administration cared enough to appoint just about the very best. I am personally sorry to see Bernie leave Government, but I know all the members of our committee join me in wishing him all the best in his new endeavors in Texas.●

INTERVIEW WITH JAMES ROWE

● Mr. BAUCUS. Mr. President, the February 27 Washington Post contains an interview with James Rowe, one of President Franklin Roosevelt's closest advisers.

Rarely does a man of Jim Rowe's talents come along. He has left his mark on public policy since the New Deal. For 50 years Presidents, Senators, Congressman, and others have valued his wise counsel.

Jim Rowe is also a native of Butte, Mont. I will always remember and cherish the advice and help the gave me when I came to Washington some years ago as a freshman Congressman.

Sunday's interview gives us a glimpse of this great man's contribution to politics in America. I ask that the article be printed in the RECORD.

The article follows:

[From the Washington Post, Feb. 27, 1983]

FDR'S ERA MAY HAVE BEEN BETTER THAN THE FOUNDING FATHERS'

(By Robert G. Kaiser)

Q. Let's talk about how Washington is different then to now. What are the big changes?

A. People, mostly. There was a small government compared to what we have now. I get very startled when somebody points out that the staff on the Hill consists of 25,000 people. It just boggles my mind. But it is true. And it means that there are substantive changes.

In my day, if you had a problem, you went up and saw the senator and discussed it with him and he'd say, "Well, I agree" or "Let me think about it, come on back." You'd come on back and you'd discuss it again. You see a senator today, he'll say, "Well, there's something to that, talk about it with my staff," and you never see him again. The staff makes the decisions. The senator's got too many balls in the air, I guess. I don't think it's a very efficient system. Tip O'Neill said one day his real problem was the staff. He says they have all these very well-educated people with not much to do. They go around drafting and getting ideas and, he said, "They give me most of my trouble."

In my day, if you had a problem to solve you had to talk to two or three people and if you convinced them, you were on the way. I think today, you have to talk to 23 people. By the time you get to the 23rd, the first three are dead and you have to start over again.

Q. Is this inevitable, what's happened? Or was it stupidity that allowed it to happen?

A. I keep thinking about the growth of the White House staff, for instance. Something I've been yelling about forever and getting nowhere. I remember I went off in the Navy during the war, so I was away about three years. Roosevelt had died and Truman was president and I had some friends who worked in the White House and I was talking with them and said, "Who does this that I used to do? And who does this that I used to do?" And I remember saying, "My God! You've got nine people doing what I used to do."

Every president that comes in screams. I remember Lyndon Johnson said, "I'll cut it if it's the last thing I'll ever do. I'll cut it down, cut it down, cut it down." And he, like any other president, ended up with more than the last fellow. I guess this is true of Reagan today. I'm sure his White House staff is larger than Carter's and Carter's was larger than Ford's and so forth. I don't know why. It seems to be no reason. Except there don't seem to be any internal controls. The president wants to cut his staff down, but never does.

When I first went [to the White House], there were three secretaries and, I think, one assistant secretary. And that was a

great expansion from Hoover, who had only one secretary. Who did everything, I might add. While we were building the arsenal for democracy and getting ready for the war, it started expanding. It's never stopped since.

Q. What was it like for you? You were, what, 25 or 26 years old?

A. I was 28 when I first went in the White House. Roosevelt said, "Your job is to be a bird dog." I said "What does that mean?" "Just run around town and find out what's happening." So that's what I did. He'd send me off on errands or I'd go find something and bring it to his attention. Pretty good job.

Q. What sort of hours did you work?

A. Long hours. When Jimmy Carter was first president, I remember watching him fly out to Camp David with these reports under his arms. I said, my God, that'll kill that fellow. In Roosevelt's day he got the big reports and sent them over to me and say I want a one-page memorandum tomorrow morning. So I was up all night, but he wasn't.

Q. Who brought you to his attention?

A. Jimmy Roosevelt was secretary to the president. But he also wanted to be governor of Massachusetts. So he spent a lot of time up there, where his business was. And he made speeches. In those days everybody seemed to write their own speeches. He was handling a large part of the government, but whenever he stared to write his speech, he closed his office down. Nobody in the government could get near him for about three days. Tommy Corcoran started screaming about this. He said, "You can't do that." Jimmy said, "I've got to make these speeches." So [Corcoran] said, "I'll get you a speech writer." So I turned up. Part time, occasionally to write a speech. And Jimmy liked them and one day said, "Why don't you come over and work full time?" And I think they almost doubled my pay. That's the real reason I went, I had just gotten married and could use the money. I don't think I was that overcome with the glamour of the White House. The glamour of the money is what got me. I think it was $6,000.

Q. I'd like to go back before this phase. The businessman's son from Butte arrives in Cambridge, in, what, 1927? How did it come that you went off to Harvard from there?

A. I was out in California, Santa Clara, in a Jesuit prep school, and I liked it. And they had a college. I think my father was afraid I was going to be a priest, so he sent me out.

I didn't want to go to Harvard. I didn't even know where the hell it was. But at that time, Lowell was the president and he was starting to make Harvard a national university rather than a regional New England university. So a Westerner could practically walk in free. They said, all right, come along, if you came from Montana.

Q. Did you feel like a bumpkin?

A. It was hard educationally. Out West, I'd always been first in my class. When I got in this place, hell, these fellows just ran over me. I almost flunked out. I was on probation for about a year and a half. My father wrote a letter to this freshman dean, saying, "My son is fairly big and he probably would be a good truck driver. Do you think he'd be a better truck driver? Tell me and I'll take him out of there." I got mad about that, so I started to go to work. I think that saved my day. I, in effect, said the hell with you fellows, I'll show you. And I worked from then on.

Q. Somebody told me a story about [Supreme Court Justice Louis Brandeis] inviting you to tea on Sundays and always asking when you were going back to Montana?

A. Bradeis had this concept—and he may have been right—that the states were the place to do the experimenting—you should never have a strong federal government. Therefore the brains of the country should be diffused. If a fellow came from Montana he ought to go back to Montana. He used to have those teas where you used to see people but the food was dreadful. He always said to me, "Mr. Rowe, when are you going back to Montana?" I would say, "Oh, maybe another six months." One day he passed by and said, "You're not going back to Montana, are you?" I was never asked back. Interesting man, Brandeis.

Q. Did you ever think about going back?

A. I thought about it a lot. I thought to get into politics out there. I remember once when I was in the White House, I went out to see my family. A gangly fellow whom I knew said, "I hear you're going to run for the House." I said, "Well, no, I'm not." He said, "If you're not going to run, will you support me?" I said, "Well, yes, I will." His name was Mike Mansfield. So I always supported Mike.

Q. When you came in '34, what was the atmosphere? Was there this infectious enthusiasm that we hear about in the New Deal?

A. There was indeed. Rex Tugwell used the phrase that got him in trouble, saying, "We will roll up our sleeves and make America over." The press raised hell about it, and business. We privately thought that was just what we were doing, and it was clear that there was a black-and-white situation. The businessmen and bankers were bastards and we knew it, and something had to be done. And they thought we were bastards. So the issues were very clear. We worked all the time on legislation. It was a heady atmosphere. Roosevelt's enthusiasm brought the young here. It was a young government. He had no prejudice against the young. Which I thought then was fine. I'm not so sure it's so good now.

But he was, I hate to use the word, a charismatic fellow. He had great appeal and charm. I keep thinking—I watch Reagan on television and I remember Roosevelt on radio. Roosevelt's radio appeal is the same kind that Reagan seems to have on television. Roosevelt was a more exciting fellow. And certainly knew a lot more about government than Reagan does. But it was a very exciting period. I don't think there has ever been one like it. When Tommy Corcoran died I did his eulogy in the church. I said something about, "With the possible exception of the Founding Fathers there's never been [such] a period." And I'm not so damned sure about the Founding Fathers, but I didn't say so. They were pretty good, I admit.

Q. How did Roosevelt treat the staff?

A. They all adored him. Roosevelt didn't like the law much, and he didn't need money, so he never really worked at it. He never really worked at anything except politics. And people. I think the reason the staff loved him is all his life he'd been charming people. It was just instinctive. You walk in the room, "Bob, how are you." Call you Bob first thing. And if he didn't like what you did he got a little cold but he never got angry. He never yelled at you. His entire staff, secretaries and everybody else, just worshipped him. They might get a little critical about him in the back room, but that was as far as they went.

Q. Would he invite you in for a drink at the end of the day?

A. Sometimes. Or we used to have lunch. Which I hated because I handled all the appointments at the time and I didn't get enough time with him. If he asked me for lunch I knew I'd be filibustered. I'd go in to talk about appointments and then he'd get off on Hyde Park. I know more about Hyde Park than anybody around. Have you ever heard that Claude Pepper story about him? He was a young congressman. He had a project in Florida he just had to have and he was not getting it. He got an appointment with Roosevelt. For some reason Roosevelt was really against it. [Pepper] was given this 15 minutes. So he walked in, sat down and Roosevelt looked up and said, "Claude have I ever told you about my wife's ancestor Robert Livingstone?" And Claude sat there for a lecture about Livingstone, and at the end of 20 minutes, photographers and reporters started coming in. And [Roosevelt] said, "Claude, I've got a press conference. I've just got to stop. And thank you for comining in." And Claude said, "Mr. President, my project?" "You'll have to talk about that some other day." Claude said, "I never got my project, but I was the best-informed man on Livingstone in the United States."

He did that a great deal. If he didn't want to give you something he'd just talk and charm you. And with me, there was no reason to charm me. But he'd rather talk about Hyde Park than make the appointments. He wasn't against any of them, he just didn't want to go through the drudgery.

Q. What about the theory that the presidency just doesn't work anymore, that you can't be an effective president?

A. I'm not sure that's true. It's harder to be [effective]. I don't want to make the usual dull attack on the press or the media; you're responsible for a great deal of it, though. But I think if you put aside Vietnam Lyndon Johnson was a helluva good president. And he was an imperial president—he made the damn thing work. Occasionally I see signs that Reagan can, too. If he worked harder he'd do better.

I've always felt that we ought to pick our presidents from a very narrow class. They all ought to be professional politicians. They should have spent their lives at it. You can see that in Roosevelt. I think the most important part of his life, that people never watch, was the eight years here as assistant secretary of the Navy. He knew everything about Washington before he [became president.] He was governor of the largest state and therefore had to be a good administrator. He had one campaign as vice president under his belt. He was a very experienced, professional fellow. Johnson was the same type. Kennedy. He never did anything except politics. They learned how the system ran. I don't think Jimmy Carter ever did. He never managed to get along with Congress or learn how to make things work in this business.

And again the White House has become a staff problem. We were very careful with the Cabinet. He didn't pay much attention to the Cabinet as an institution, but he thought they were important people, and so did we. And we better damn well had! And I don't think they're important people anymore. And it's too bad, because I don't think a centralized staff can run a government of this size.

Q. Let's talk about LBJ.

A. He came to Washington as a young congressman just about the time I went to the White House, and we became great friends. Have you read the [controversial new

Robert] Caro book [biography of Johnson]? I'm very hard on Caro. I think he's a son of a bitch, and I think he's a hatchet man and a few other things. I was a great admirer of Johnson. God knows he had his faults, as we all know, but Caro doesn't give him credit for anything. I went down to the University of Virginia and made a speech. Rather arrogant speech—"Presidents I Have Known." Talked about five of them. And I said I thought Johnson was the brightest of all of them. The most complicated man, the most insecure man, but certainly he was the brightest of any of them. And I even include Roosevelt in that.

Q. It seems surprising that the two of you would hit it off.

A. Oh, yes, we were good friends. He realized the power in those days was with the New Dealers, not with the Congress. So if he wanted anything done he'd better know the New Dealers. And he did. He had tremendous energy, swept around, knew everybody. He used to come to dinner and he was a great talker. You'd walk in a room and you'd never met him and he'd just captivate you. After about half an hour you might wander off in another conversation. Most of the dinner guests did that. And when they did Johnson would just sit there and go to sleep. His wife would go over and wake him up and then he'd pick up again and grab the crowd. And when he lost 'em he'd go to sleep.

Q. You've sat here in Cleveland Park and watched an incredible number of characters come and go in this town. How does that look from your point of view?

A. As I explained to my children—or as they tell me—it's getting to be my old age. I do say there were giants in my day. And I'll fight for that. I said the other day, "You know, you don't have senators the way they were in my day. All these [new] fellows have the same damn hair stylist!" In my day they had long hair and they had string ties and they were colorful fellows. And they knew their stuff. All these [new] fellows—

Q. How do you explain it?

A. Television, I guess. The kind of fellow who appeals to the public through television is the sort of slick fellow with the hair cuts.

Q. How do you feel about what's happened to the Democratic Party?

A. I don't think there is such a thing as a party. I don't think there has been for a long time. And I don't know how to resurrect it. I've got to say that about both parties. The Republicans are better off at the moment, but I've watched the rise of the PACs, that's where the money is. That's what Congress is interested in. The party just isn't there.

Q. Is there going to be a revival of the progressive impulse in American government? Is the pendulum going to come back again?

A. It always has. A lot of the motivation is there. Unemployed, people starving. I think it'll come back. In what form I don't know. Pretty much the same as the New Deal. The country's more complicated but the problems are more serious. I think the progressives will come back. They always do.●

THE BUDGET CRISIS

● Mr. HATFIELD. Mr. President, last month, an extraordinary group of American leaders issued a call for the President and Congress to address our severe and damaging budget crisis. The credibility of the group to speak on this subject is striking. Known as the Bi-Partisan Budget Appeal, it is led by former Secretary of Commerce Peter Peterson and five former Secretaries of the Treasury—John Connally, Henry Fowler, Michael Blumenthal, Douglas Dillon, and William Simon. Supporters of the Appeal include a broad crosssection of prominent individuals in business, education, banking, economics, and law.

As its title and leadership suggest, the Appeal is thoroughly bipartisan. It is motivated not only by concern over current economic conditions, but by a substantial and well-grounded fear that unless budget deficits are brought under control now, the economy will be locked into fiscal crisis for decades to come. I am not certain I agree with every aspect to the program but the goal and the Appeal is certainly commendable.

As Congress begins its review of the President's budget, we would do well to consider the Appeal's exhortations and its program. For that purpose, Mr. President, I ask that a message from the Appeal be printed in the RECORD at this point.

The material follows:

[From the Washington Post, Jan. 20, 1985]

TO THE PRESIDENT AND THE CONGRESS—A BI-PARTISAN APPEAL TO RESOLVE THE BUDGET CRISIS

The federal budget is now out of control. It is primed to generate immense deficits, year after year, for decades ahead—deficits far larger than any in our history. This fiscal course is senseless. It threatens to lock the economy in stagnation for the remainder of this century. Massive deficits would absorb savings urgently needed for investment in plant and equipment, infrastructure and R&D. Productivity would sag and inflation resurface. Interest-sensitive industries would be smothered and exports would dwindle. The result would be a period of gradual decline, punctuated by high unemployment and social conflict and culminating in an America that is permanently poorer and weaker.

The Nation cannot afford to leave the budget to politics as usual. It is time to set aside differences of party, region and ideology. We appeal to you, our leaders, to display true leadership in the spirit of national unity, to resolve the current crisis. Only if you do so can the balance of this century yet be a time of prosperity and growth, of new jobs and higher standards of living. And only if it is, can we leave future generations with a richer and stronger America.

THE BUDGET DISASTER

Despite the budget actions of 1981 and 1982, the deficit has just topped 100 billion dollars for the first time in history and will rise beyond 200 billion dollars—5% to 6% or more of GNP—by the mid-1980's. After 1985, the deficit outlook actually worsens.

We are rapidly moving into uncharted fiscal territory. Deficits now in prospect have no precedent in our peacetime history, either in periods of sturdy growth or recession.

Furthermore, it is now widely realized that the solvency of the Social Security system is clearly threatened. It is now acknowledged that from 1983 to 1990, the Social Security system alone will run cumulative deficits approaching 200 billion dollars. By the year 2000, the system's annual deficit, including Medicare, could reach over 350 billion dollars, in spite of significant increases in Social Security taxes between now and 1990.

THE SOURCES OF DISASTER

Today's deficit is partly caused by the recession, reflecting a shortfall in tax revenue caused by today's weak economy. The present recession has clearly been aggravated by a collision between tight money and loose budget. Recovery requires a better balance between the two policies. Making the budgets even looser will make such a balance and thus a healthy recovery virtually impossible.

The crux of the budget problem resides not in 1983 but in the ensuing years. The startling growth in the deficits projected for the mid-1980s and beyond is not recession-related. These immense, structural deficits will take place even on the happy assumption that economic recovery commences immediately and proceeds at a sustained, healthy pace. We cannot "grow out of" this deficit shadow. Even if real GNP grows at a buoyant annual rate of 5% over the next 3 years, the 1985 deficit still will be about 200 billion dollars. On the other hand, if economic recovery is partial or halting (a more likely case, because massive federal borrowing will itself retard the recovery) the 1985 deficit could reach 250 to 300 billion dollars.

The growth in tomorrow's deficits arises not from today's economic recession but from yesterday's government policies. Recent tax legislation will keep relatively constant the share of national income going to federal taxes over the next several years. But federal spending, already authorized or announced, will be rising as a share of national income.

Federal spending no longer fluctuates in parallel with national needs. It no longer rises and falls much due to emergency defense programs to meet temporary crisis, or due to cyclical outlays designed to counter recession, such as unemployment compensation or jobs programs. Rather, 75% of the budget now flows into open-ended social entitlement programs, contractual interest expenses, and long-term defense modernization, and by 1985 this proportion would grow to over 80%. These long-term commitments have enormous momentum. They are scheduled to grow rapidly—in absolute terms, as a share of the budget, and as a share of GNP—for as far as we can project. That is why, as now structured, the federal budget would never achieve balance, but would sink deeper into the red with each passing year.

Thus, we face a basic mismatch of tax and spending policies:

Recent tax cuts will keep total federal revenues fixed at 18% to 20% of GNP over the 1980s.

By contrast, the growth in total spending has not been reduced. Quite the contrary. Without further budget cutting, spending in 1985 is projected to equal 25% or more of GNP, up from 22.4% in 1980—an increase of about 380 billion dollars.

This spending growth comes from three sources: social *entitlement programs* unrelated to means tests, such as Social Security, Medicare, and federal pensions; the *defense* buildup; and *interest* on the debt.

Under current laws, these non-means-tested social "entitlement" programs would grow by over 150 billion dollars—from 227

billion dollars in 1980 to 380 billion dollars in 1985—rising from 8.8% to about 9.9% of GNP. (By contrast, social programs targeted to the poor will decline relative to the economy, from 2.2% to about 2% of GNP. Budget actions to date have reduced the growth in these means-tested programs by more than twice as much on a percentage basis as non-means-tested programs.)

Defense spending, under the currently planned buildup, will increase by 150 billion dollars, a real (after inflation) increase of about 9% a year—over 15% per year in hardware items—lifting defense (not including military retirement) from 4.8% in 1980 to about 7.1% of GNP in 1985. (By contrast, public investment, grants to state and local governments, and federal operating expenses will actually decline from about 4.6% to about 2.9% of GNP.)

THE CONSEQUENCES

Huge deficits—and high real interest rates, with few precedents in modern history—risk denying too many Americans any chance at sustained jobs and prosperity in the new decade, after a decade in which real median income per worker showed little or no increase and unemployment rose to higher levels.

Recovery from today's recession could be feeble and temporary as a result. Depression conditions now prevail in most industries which sell their product on long-term credit; housing, automobile, construction, durable goods and the like.

High long-term real interest rates, largely attributable to concern over future government policy, would remain abnormally high, holding back new investment, which in recent years has been the lowest of any industrial country and is now declining still further. High short-term real interest rates would threaten to push thousands of small businesses and farms into bankruptcy—to say nothing of the adverse effects on the fragile economies of the developing world as well as on the global financial system.

Dollar exchange rates—now at lofty levels that have already crushed our export industries, overwhelmed our manufacturers in practically every international market, and have cost us an estimated one to two million job opportunities in the current period—would remain artificially high; they would continue to choke off American exports, such in imports, destroy U.S. jobs, and could make the temptation of full-scale protectionism irresistible.

As a result, capital formlation and job creation would continue to stagnate, making unacceptable high unemployment a fixed feature of the industrial landscape.

Thus, tomorrow's big deficits, and the high long-term real interest rates that will accompany them, are already doing serious damage now and will wreak even more havoc in the coming decade and beyond. Without savings available to fuel productive investments, the economy will face nearly perpetual stagnation.

In short, by losing control of the budget, we are sacrificing the jobs and prosperity of our children and grandchildren, and shrinking America's stature and influence in the world.

PRINCIPLES FOR BUDGET REFORM

Budget crisis transcends conventional politics. No solution is possible through partisan maneuver. We, the undersigned, believe Americans must now rally around three basic principles of budget reform:

1. Focus on the Long-Term. Financial markets, and the American people, are worried by today's deficits, but much more by the huge deficits now in prospect for the mid-1980s and beyond. Today's government action must commit to a substantial, progressive scaling down of those outyear deficits. The reforms must be large, structural, and permanent—equal to the size and duration of the problem itself. Temporary, one-shot actions won't do any good.

2. Fairness. Balancing the budget on the back of just one group or one set of programs is not feasible, and trying to do so would not be fair. So far in 1981 and 1982, the budget cuts have focused on the means-tested programs, through reductions in Medicaid, AFDC, food stamps, legal services and the like. The much larger programs which have been barely touched are those social programs that confer a large part of their benefits on middle and upper income groups (such as Social Security and federal pensions) and the military defense programs. Together, such programs in 1985 would amount to over 650 billion dollars in spending or 68% of the budget (interest on the national debt would be another 12%). It is now time for a wider sharing of the burden.

3. Focus on Investment. The chief vice of uncontrolled spending and big deficits is that they rob the future, by absorbing investment capital needed to build up productive jobs and real income for tomorrow. (Beginning in 1983, budget deficits will amount to a stunning and unprecedented 100% of the net savings generated by individuals and families in the U.S.) The 1980s should be a decade of investment, not a decade of red ink. Cutting deficits by measures that would simultaneously reduce savings and productive investment would make no sense. Budget reform should protect the future. As we squeeze the share of GNP taken up by federal spending—which we must—we should concentrate on programs that subsidize consumption (e.g., the social entitlemant programs) and spare programs of public investment (e.g., R&D and economically sound public works). When increasing revenues, we must focus our new taxes on private consumption and not on private savings and investment.

THE GOAL

We must put the budget on a multi-year path toward balance.

To achieve credibility in long-term financial markets, a project of fiscal reform must aim, at a minimum, to cut the projected 1985 deficit by about 175 billion dollars. This would bring the 1985 deficit to the 75 billion dollar range. Also, specific actions taken in 1983 should assure budget balance within a few years thereafter. If we do less than this, future deficits will likely remain well above 2% of GNP for years to come, which would make the nation's financial and investment situation in the 1980s even worse than in the 1970s. The last decade was bad enough for the nation's economic performance. To invite a further drop in our economic performance would be totally irresponsible.

We recognize that this budget reform is not the only action necessary to achieve long-term economic recovery. Many who signed this statement also favor other changes, such as in monetary policy, in the structure of the Social Security and federal pension systems to assure their long-term affordability and financial integrity, in support for research and development, in tax incentives for savings and capital investment, in manpower retraining, in rebuilding public infrastructure, in reformed exchange rate systems, in export policies, etc. But we are firmly united in our conviction that such measures will not prove effective without basic and major changes in budget policies.

A PROGRAM FOR IMMEDIATE ACTION

We can remake the budget without gutting our military security, without starving private savings and investment, and without putting harsh burdens on the poor. But we will have to address head-on each of the three major sources of runaway deficit: the growth of large social entitlement programs, the growth of defense spending, and the inadequacy of tax revenues. If any of these areas is placed "out-of-bounds", no fair or effective solution to the problem is possible.

We, the undersigned, rarely stand together on political and economic issues. But we believe Americans must rally to the common cause of fiscal responsibility. We support this plan as a fair, realistic, and bipartisan approach toward regaining mastery over our economic destiny, and we commend it to you for early action:

1. Entitlements and other Non-Defense Programs. We should now slow down the growth in non-defense spending so as to reduce the deficit by about 60 billion dollars in 1985. The best way to begin is with a one-year freeze in the growth of benefit levels of cash payments flowing from the large, non-means-tested entitlement programs: Social Security, veteran's benefits, civil service and military retirement, and other non-defense subsidies and payments that are not means-tested. Thereafter, there should be limits on the automatic inflation indexing of benefits (e.g., by capping inflation adjustments at 60% of the CPI, or at 4% per year, or by providing adjustments only for the amount of inflation in excess of 3% per year). However difficult politically, controlling the budget requires controls on the large entitlement programs and on the inflation indexing process that drives the cost of those programs upward. If those programs are instead placed off-limits, it will be impossible to make budget savings now necessary for financial stability. Similar restraint is required on all transfers, subsidies, and programs other than those essential to the needy.

These measures can be carried out in ways to protect those citizens truly in need.

2. Defense. The defense budget increases now planned should be moderated so as to save about 25 billion dollars in FY 1985. This would still provide for a major and sustained defense buildup, an overall increase in real terms between 1981 and 1985 of about 7% and an increase in hardware purchases of about 11% per annum. It would encourage more explicit planning for that buildup and lead to wider, sustained public support for a strong defense posture.

3. Taxes. Revenues should be increased by about 60 billion dollars in FY 1985. The principal source of these increases in revenue should be from consumption-based taxes, and by imposing user fees for the government's commercially valuable services. Modifying, delaying, or stretching out the income tax cut for 1983 has the unanimous approval of the undersigned members only in the context of a prior agreement on the kind and magnitude of spending cuts referred to in parts 1 and 2 of this program.

These steps, if undertaken now, would cut the FY 1985 deficit by about 145 billion dollars. This in turn could lead, through less federal borrowing, to a further deficit reduction of about 30 billion dollars in lower

interest payments. We would then meet the overall target of about 175 billion dollars in FY 1985 deficit reductions.

LEADERSHIP

The program we suggest would require tangible sacrifices from many middle and upper income citizens. But the sacrifices would not be severe, and they are simply necessary to avoid economic chaos and stagnation. Inaction would exact enormous and unnecessary sacrifices from every American.

The budget crisis is a national crisis. Only a united leadership in Washington, extending across both parties and embracing liberals and conservatives alike, can avert a fiscal disaster. Let us work together, as Americans, to rescue the future of our economy . . . and our country.

FOUNDING MEMBERS

The Honorable W. Michael Blumenthal, Secretary of the Treasury, 1977-1979.

The Honorable John B. Connally, Secretary of the Treasury, 1971-1972.

The Honorable C. Douglas Dillon, Secretary of the Treasury, 1961-1965.

The Honorable Henry H. Fowler, Secretary of the Treasury, 1965-1968.

The Honorable Peter G. Peterson, Secretary of Commerce, 1972-1973.

The Honorable William E. Simon, Secretary of the Treasury, 1974-1976.●

NAZI WAR CRIMINALS

● Mrs. HAWKINS. Mr. President, the horrors of the Holocaust were perpetrated almost 40 years ago. With the passage of time, some, especially the young, may forget, or be tempted to think that the memory of those brutal days should be allowed to fade. That would be a tragedy. If we are ever to hope to learn from history, we can never turn our back on events such as these, no matter how much time passes—be it 40 or 4,000 years.

The Holocaust stands as a bitter reminder of how cruel man can be to man. Some would urge us now to forgive and forget those men still living who participated in the murder of millions of Jews, Slavs, and other Europeans. An editorial in the February 3, 1983, USA Today sheds a valuable light on the error of this misplaced compassion. I ask, Mr. President, that the editorial be printed in the RECORD.

The editorial follows:

STOP SEARCHING FOR NAZIS? NEVER!

Half a century ago, Adolf Hitler was named chancellor of Germany. Crowds marched by torchlight in front of the Reichstag; flags with swastikas waved in the night.

That long night is not yet over. Thousands of Nazi war criminals live comfortably in South America, in Europe, in the United States—and though their trail grows colder with each passing year, the search for them continues.

Klaus Barbie, a Gestapo chief known as "the butcher of Lyons," is about to be extradited to West Germany from Bolivia, where he has been sheltered for decades.

Last month Maurice Papon, a top official in the French government until 1981, was charged with "crimes against humanity" for deporting Jews to death camps.

Dr. Josef Mengele, who tortured thousands of children at Auschwitz with hideous medical experiments, reportedly was sighted last month in the jungles of Paraguay.

And in America, a special unit of the Justice Department will spend $2.6 million this year to track down and deport war criminals. Twenty-five cases are in court now; 210 investigations are active.

Why didn't the U.S. government go after these murderers 30 years ago, when memories were fresher and witnesses easier to find?

Many Americans were tired of the horrors of war. After the trials of Nazi leaders at Nuremberg, zeal for finding smaller fry diminished. And in the cold war confusion, it was hard to verify the identity of 400,000 European immigrants—whose anti-communist views were appreciated.

So it was easy for a storm trooper or concentration camp guard to come to America, lie to immigration officials and even become a citizen. Not until 1979 did the Justice Department begin to compile lists of war criminals and match them against immigration records.

But the question remains: Why pursue a few old men who will die soon anyway? Why not forgive and forget?

Because the pursuit of war criminals is not a matter of vengeance. It is a matter of justice. The law does not excuse ordinary murderers simply because they are old; it should never excuse those who participated in the most unspeakable crimes ever committed.

And it is dangerous to forget. When thousands of German children were polled several years ago, some said Hitler was an astronaut, or a communist, or an Italian. Others admired him for curbing unemployment. No wonder that neo-Nazi groups sprout in Germany with depressing regularity.

The failings of the past do not justify complacency now. While there is still time, every nation owes it to the living as well as the dead to find those guilty of genocide, and to bring them to justice.●

JUDGE JOHN H. PIERCY TO RETIRE

● Mr. LEVIN. Mr. President, I would like to pay tribute to a dedicated Michiganite who has served the 14th Circuit Court in Muskegon, Mich., for more than 20 years.

Judge John H. Piercy is a native of Kentucky; he received his law degree from the University of Louisville in 1949. While at the university he was a member of the student government and became active in civil rights activities.

John Piercy settled in Muskegon as a young man and he has given much to his community. He founded the Muskegon Alcoholism Information Center, served on the board of the Urban League, the scholarship committee of the Muskegon Foundation, the building committee of the Norton Shores Library, and is an active member of St. Gregory's Episcopal Church. He has been active in Democratic politics and ran for Congress, albeit unsuccessfully, in 1952.

His long career in the legal profession has included private practice, the Michigan Labor Mediation Board, the American Arbitration Association, and 3 years as municipal court judge before becoming a circuit court judge in 1962.

Judge John H. Piercy is loved and respected by his family, friends, and colleagues. His presence on the bench will be missed, but his dedication to his community and to serving all the people will continue. I join with all those who will honor him at a retirement dinner on March 5, in wishing him a long, productive, and fulfilling retirement.●

PROPOSED INCREASE IN THE IMF QUOTA SUBSCRIPTION

● Mr. HUMPHREY. Mr. President, Congress will soon be asked to approve an administration request for an approximate $8.4 billion increase in the U.S. quota to the International Monetary Fund and the General Arrangements to Borrow. I for one am not at all satisfied with the arguments that have been advanced to date in support of this request, and I respectfully submit that, if my colleagues take the time to poll their constituents on this question, they will find very little support for this proposal at the grassroots level as well.

The fact of the matter, Mr. President, is that the United States is being pressured by the IMF, the banks, and other harbingers of doomsday scenarios to push ourselves more deeply into the black hole of international debt. We are being asked to authorize the Treasury to crowd out private borrowers to the tune of over $8 billion, at a time of long-awaited economic recovery, in order to pump precious dollars into an organization that at this very moment sits atop a $47.3 billion horde of gold, the partial liquidation of which could easily see the Fund through this short-term crisis. We are being asked to perpetuate the notion that careless bank lenders and the mismanagers of struggling LDC economies need not fear the consequences of poor business practices. Why should they, when Uncle Sam stands ready as an indirect lender of last resort every time the IMF directs us to sign on the dotted line?

Perhaps most gravely, Mr. President, we are being asked to shore up a pool of funds which will be drawn upon by our ideological adversaries the world over. In this regard, I submit to the attention of my colleagues a recent article by the distinguished columnist Patrick J. Buchanan, entitled "The Credit Trap." In it, Mr. Buchanan examines the mechanism through which "American capitalist dollars are * * * sent abroad to enable socialist countries to undercut American products and destroy American jobs."

I respectfully urge my colleagues to consider the sentiments expressed in this column when formulating their

views on this proposal. This is our opportunity to get off this debt-ridden merry-go-round while we still can see the light of day.

The article follows:

THE CREDIT TRAP

(By Patrick J. Buchanan)

My government has become a "tyranny" that no longer listens to its own people. With that painful admission, near treasonous to the Marxist regime that named him envoy to Washington, the Nicaraguan ambassador to the United States, Francisco Fiallos, resigned.

On a return home to Managua he was shaken by reports of a government-inspired mob assaulting a Catholic priest, and saw for himself how far the Sandinista Revolution had been delivered up to the Soviet Bloc and the Cubans.

The isolation of this squalid little regime continues to grow; but, fortunately for the Ortega brothers, it is not yet complete. Confronted with a $40 million interest payment on a near $3 billion debt it cannot hope to pay, the Ortegas sent their financial minister to the last, best hope of the Communist Bloc—the Western banks. And not in vain.

A $30 million loan was put together by the facile officers of the Bank of America, the biggest bank in the United States, the angel of the revolution.

Paradoxical is it not? While 50 American soldiers instruct the beleaguered Salvadorans how to resist a Sandinista-style takeover in their country next door, the already successful Sandinista Revolution in Central America is propped up with good hard Yankee dollars from the biggest banks in the United States. From the Reagan administration, that implacable antagonist of Castroism in the hemisphere not a word of reproach.

What has happened, said Brian Crozier who occupies James Burnham's chair at The National Review, is that the West has become ensnared in "the credit trap." With over $100 billion in loans outstanding to the Warsaw Pact allies, communist Yugoslavia, Cuba and Nicaragua, the Western banks that hold most of the unsecured paper have no choice but to go on feeding the monster with new morsels of credit, if there is to endure any hope of retrieving the lost wealth.

The Soviet Bloc, noting a far greater sense of desperation in the lenders than in the lendees, has gotten the point: The banks are more frightened than we; they don't own us; we own them!

So, Poland is kept on the books of the German banks. Hungary and Romania are provided admission to the credit windows of the International Monetary Fund. Yugoslavia suddenly becomes an object of stated concern and a billion-dollar rescue effort by the American secretary of state. The World Bank starts us down the identical road by providing the first hundreds of millions in long-term, no-interest loans to the People's Republic of China.

How long do the nonchalant and amoral men of the international banking community think this game can go on? How long do they think the simple-minded American middle class will consent to arm, train, equip and dispatch its young men to places like Guantanamo, Roosevelt Roads, West Germany and South Korea, the Med and the Malacca Straits to resist with their lives an empire that is being "carried" by the big banks of the United States?

When the American people saw Richard Nixon toasting the Godfather of Asian communism in Peking, any lingering disposition to spend more American blood to resist the advance of Asian communism a thousand miles to the south evaporated.

If Ronald Reagan comes before the country, in 1983, to argue the importance of keeping Hungary and Stalinist Romania afloat with American dollars, of not forcing poor down-and-out Gen. Wojciech Jaruzelski into default and ruining his credit rating, his defense consensus is gone.

More than any president in modern times, Mr. Reagan, instinctively, recognizes the centrality of morale, of spirit, of enthusiasm, of elan in maintaining steadfastness and courage in the twilight struggle with the Soviet Empire. What a demoralizing effect it would have upon his followers to learn that he, Ronald Reagan, had approved the IMF transfer of American dollars and NATO capital to maintain the bank standing of the military subdivisions of the Warsaw Pact.

According to Paul MacAvoy, Yale economics professor, it was the capacity of Chile, Peru and Zaire to siphon billions out of the World Bank, the regional banks and the Western banks terrified of default that enabled them to maintain and even expand copper production in a time of falling world demand. As a result, almost all the unemployment in the world copper industry was absorbed by American miners in Arizona, Colorado and Montana. American capitalist dollars are thus sent abroad to enable socialist countries to undercut American products and destroy American jobs.

For every dollar the IMF or the World Bank, the Fed or the Bank of International Settlements in Switzerland uses to bail out Brazil or Mexico or Argentina or the Soviet Bloc, there is one less dollar available for American businesses and consumers to restoke their own economy. With the sources of credit thus depleted, the cost of credit—interest rates—rises; and the recession endures.

When the latest, largest demands of the IMF and the World Bank—backed by the quietly desperate American bankers—reach Congress, we shall at long last find out who really owns the Republican Party.●

SENATOR HOWARD BAKER

● Mr. D'AMATO. Mr. President, a recent editorial by the Albany (N.Y.) Times-Union, a Hearst newspaper, aptly displays the high regard which each of us shares for our distinguished colleague, the majority leader, Senator HOWARD BAKER.

I ask that this article be printed in the RECORD in its entirety.

The article follows:

BAKER LEAVES A GREAT VOID

Tennessee's Senator Howard Baker has become one of the most highly respected and influential politicians in Washington. Anyone who doubts this need only to observe the political ripples caused by the Republican majority leader's decision not to seek re-election in 1984.

The announcement sparked discussion of Mr. Baker as a candidate for the presidency. Although he reconfirmed the other day his support for President Reagan for a second term, the senator clearly is standing in the wings in the event Mr. Reagan chooses not to run.

Respect for Senator Baker knows no party lines. A Democratic senator spoke warmly recently of the Republican leader, saying: "If there were a secret vote in the Senate for president, Baker would get 80 to 90 votes."

Senate Republicans will miss him. Wyoming Senator Alan Simpson said Baker's announcement "• • • will slow the pace for the Republican majority. There will be an aura of conjecture about successors and where do we go from here. Howard Baker leaves a great void." The size of the void can best be measured by remembering that many of President Reagan's budget and tax proposals would not have reached first base without Mr. Baker's skillful leadership. He has been a persuasive leader on both sides of the aisle.

Senator Simpson put Senator Baker in a class by himself as he noted:

"He has great respect and credibility. They are the currency of this place. It will be a long time before anyone else has those kinds of credentials."●

NUTRITIONAL VALUE OF MEAT

● Mr. EAGLETON. Mr. President, for many years consumers have been confused by conflicting advice over the value of meat in their diet. Recently, Dr. Jean Mayer, one of the top nutritionists in our country, wrote an excellent article extolling the virtues of meat as an important source of iron, essential minerals, and high quality protein.

Dr. Mayer points out that consumers concerned about their intake of saturated fat and cholesterol may still take advantage of the nutritional value of meat by selecting lean cuts and a cooking method that will reduce the amount of ingested fat.

I ask that the article by Dr. Mayer and Jeanne Goldberg be printed in the RECORD.

The article follows:

[From the Washington Post, Feb. 6, 1983]

NUTRITION

(By Dr. Jean Mayer and Jeanne Goldberg)

There's no doubt about it. Most Americans like meat. Last year alone, the average American ate 77 pounds of beef and 65 pounds of pork. So why, you may wonder, is the meat industry beginning a new advertising campaign?

The meat industry may not be as hard pressed financially as the grain farmers, but it has not had an easy time, and would naturally not like to see a further drop-off in consumption.

The use of pork has held steady over the years, but that 77 pounds of beef eaten last year is almost 19 pounds less than was eaten in 1976. Similarly, interest in veal and lamb has declined steadily.

Like fish and poultry, meats have a number of nutritional points in their favor. Their major drawback is that, unlike fish and poultry, many cuts are high in fat and the fat is predominately saturated. Fat is high in calories (nine per gram compared with four for protein and carbohydrate). Both saturated fat and dietary cholesterol tend to raise the level of blood cholesterol. Thus, the choice of cut and the method of preparation are important when trying to

limit total fat intake or when watching serum cholesterol.

However, contrary to what seems to be a widely held belief, meats, like fish and poultry, are not unduly high in cholesterol itself, although they contain some, as do all animal products. Only organ meats, like liver and kidneys, have enough cholesterol to cause concern (though they are low in fat, liver in particular). For example, two ounces of beef liver contain about 370 milligrams of cholesterol, half again as much as the 240 in the yolk of a medium egg. By contrast, three ounces of lean beef contain only about 75 milligrams, the same as three ounces of dark meat chicken.

One special nutritional value of meat, and fish and poultry, is that they are good sources of iron. A high proportion is heme iron, from the red pigment hemoglobin in blood and myoglobin in muscles. Heme iron is much better absorbed by the body than nonheme iron, which is also in animal foods but is the only kind in vegetables. In addition, meats, fish and poultry contain a still mysterious "meat factor" that helps the body absorb more nonheme iron, if it is eaten at the same meal.

Meats in general are good sources of essential minerals, like zinc, copper, and magnesium, and of the B vitamins. Pork is especially rich in thiamin. Liver is the body's storehouse for many nutrients. It supplies good amounts of a number of vitamins and minerals besides iron, including a lot of Vitamin A and even some Vitamin C. Its only drawback is cholesterol, which makes it a fine food for children and young women, but one to be eaten only now and then by adolescent boys, adult men, and women over the age of menopause.

Like every animal food, meat supplies high-quality protein. The leaner the meat, the higher the proportion of protein to fat. Choose lean cuts, without much marbling, and cut away visible fat both before cooking and at the table. You can also get more fat out of hamburger for sauces or stew and casserole meats by browning first, then draining. Still more can be skimmed off the stews, casseroles, and sauces and soups by cooling and taking off the congealed fat.

When roasting meats, use low temperatures and a rack so that the fat can drip off. Broiling or roasting is better than frying, and if you don't have time to cook cuts that require long cooking to be tender, use a tenderizer or a low-heat crockpot that can be left simmering safely during the day.

Please don't forget that while meat is useful, so are fish and poultry. We're not advocating a return to meat once a day, or the 12-ounce steak. Use all these foods in your weekly menus, and vegetable-protein main dishes, as well. The greater variety of good foods a diet contains, the better nutritior you'll be practicing.●

U.S. PARTICIPATION IN THE IAEA BOARD OF GOVERNORS MEETING

● Mr. McCLURE. Mr. President, a strong and effective International Atomic Energy Agency is essential if we are to realize the peaceful benefits of nuclear energy while controlling its dangers. Over the past several years, however, the introduction of divisive political controversy into the workings of that body have increasingly threatened its ability to carry out its basic technical mandate. This climaxed with the illegal rejection of Israel's credentials at the General Conference of the IAEA last September.

Since that time, many of us have given much thought to where the Agency was headed and whether it still is possible to reorient it to the purposes of its founders—fostering the peaceful uses of nuclear energy under adequate safeguards. The executive branch has carried out a deep and searching reassessment of U.S. participation in the Agency. Here in Congress, we passed the Kasten-McClure amendment to the continuing resolution requiring certification that Israel remains a full participant in the activities of the Agency, as a condition precedent to continued voluntary contributions of $10 million to the Agency in fiscal year 1983.

President Reagan has now reviewed the results of the U.S. reassessment. He has determined that the IAEA is critical to U.S. national security interests and our nonproliferations policy, and that the United States should resume participation in the Agency at an appropriate time. The President also decided that the United States should send a delegation to the IAEA Board of Governors meeting which took place in Vienna last week. Ambassador Richard Kennedy, the President's special representative for nuclear nonproliferation matters, led the U.S. delegation which returned to the IAEA.

I most strongly welcome these decisions, and hope that after the deliberations of last week's Board meeting, it will be possible to resume full U.S. participation in the Agency, including payment of our financial contributions. I am confident that the U.S. delegation once again made clear the seriousness of the U.S. reassessment, the depth of our concern, and the steadfastness of our opposition to political confrontation and divisive debate. There must be no doubt that we will not stand by and participate in the gradual self-destruction of this vital Agency. I also urge the other members of this Agency to take stock of where the Agency was headed last September. It is the responsiblity of all of the members to insure that the Agency respects the legal mandates of its charter.

Working together with other nations, I am confident that we can yet realize the promise of the Agency's founding 25 years ago. Our presence in Vienna and our resumed participation in the Agency are an important step in that direction.

Mr. President, in January I had the privilege of addressing an international conference on international nuclear commerce in San Diego sponsored by the American Nuclear Society. In my remarks, I discussed the IAEA reassessment generally, and specifically reviewed the legal situation created by the Kasten-McClure amendment with regard to voluntary contributions to the IAEA, as follows:

As you all know, the events related to the Israeli credentials at the IAEA General Conference in September 1981 led to a U.S. withdrawal from that conference and a subsequent reassessment of U.S. participation in the IAEA. Let me say at the outset of this discussion that I think it is imperative that the IAEA not be politicized by Arab-Israeli politics, no more than it should be politicized by U.S.-Soviet or East-West politics. While I was tremendously disturbed and disappointed by the Israeli air strike on the Iraqi nuclear facilities outside Baghdad on June 7, 1981, and even considered them to be a clear example of the failure of the nonproliferation policies of the past Administration, I cannot support politicization of the IAEA along pro-Arab or pro-Israeli lines. The events at the annual conference in September of last year were most unfortunate and the U.S. must assert its leadership to prevent any further actions of that nature. Having said that, however, it is imperative that the U.S. reassessment be completed as early as possible and result in the reaffirmation of United States participation in the IAEA. The reassessment is in its final stages now, with the inter-agency groups completing their review and preparing the final report and recommendation for Secretary Schultz and ultimately the President. I am optimistic that the reassessment will conclude that it is imperative, in the vital national interests of the United States, for American participation to continue and that the United States will return to the IAEA. I cannot emphasize too greatly the importance of the IAEA to this country's, and indeed the world's nuclear nonproliferation programs. IAEA safeguards are the critical element of over 100 nations' adherence to the Nuclear Nonproliferation Treaty. Even this nation, under the 1980 U.S.-IAEA Treaty to which the Senate gave advice and consent in the last Congress, utilizes IAEA safeguards for domestic nuclear power activities. Neither this nation nor the world can afford to allow such a catastrophic abandonment of our three-decade commitment to internationally safeguarded nuclear power.

During last December, the Senate Appropriations Subcommittee with responsibility for voluntary funds to the IAEA concluded that the events of last September required a total cut-off of U.S. voluntary funding for the IAEA. This matter became the subject of Senate attention during our consideration of the Continuing Resolution for fiscal year 1983 in mid-December. At that time, I proposed to offer an amendment to the Continuing Resolution which would have had the effect of unconditionally restoring all funding for the IAEA from voluntary funds. If the United States were to withdraw its financial support for the IAEA, the consequences would be extremely damaging to our national security interests. The loss of this funding would cripple our efforts to improve the IAEA safeguards program. It also would seriously undercut the firm U.S. policy of supporting and strengthening IAEA safeguards, a policy established by the Congress in the Nuclear Nonproliferation Act itself. A cutoff of U.S. voluntary funding would directly affect the safeguards inspection program and the availability of cost-free experts to work with the IAEA in developing procedures used in the safeguards program, as well as training at Los

Alamos for safeguards inspectors, technical assistance, and special training. Such a cutoff also would have a substantial negative impact on our nuclear-related exports, since the IAEA purchases much of its equipment and services from U.S. suppliers. Additionally, if IAEA safeguards were ultimately impacted by the reduction in funding, American nuclear exports across the board could be jeopardized because the Nuclear Nonproliferation Act requires the NRC to make findings on the application of safeguards to exported materials and technology.

In light of all of these factors I entered into negotiations with the Subcommittee Chairman, Senator Kasten, and we reached a compromise which was incorporated in the Continuing Resolution law enacted at the end of December. The compromise provision in the law requires a certification from the IAEA to the Secretary of State that the State of Israel is participating fully as a member nation in the activities of the Agency. As a matter of fact, Israel is now, and has been throughout the past year, participating fully in the activities of the agency and nothing which occurred at the September, 1981, Conference has changed that result. Consequently, I urge the IAEA officials, Ambassador Kennedy and the State Department to act quickly to provide the necessary certification of what is already established fact required by the Kasten-McClure amendment to the Continuing Resolution. The IAEA programs must continue with the fullest possible funding and action must be taken now to ensure that result. Neither this nation nor the world can afford any lack of predictability with regards to the continuation of the IAEA program. I can assure this audience that upon my return to Washington I will urge all of the parties involved in this provision of law to remove this impediment to the IAEA program.

Mr. President, I am particulary pleased and proud to inform the Senate that the State Department has informed me that last week the IAEA Board of Governors in Vienna appropriately acted on the letter of certification by Director General Blix, which will satisfy the certification requirements of the Kasten-McClure amendment in section 159 of the continuing appropriations for fiscal year 1983 (Public Law 97-377). As soon as the Secretary of State transmits the Director General's letter to the Congress, the requirement will be satisfied and the legal condition precedent on the voluntary contributions to the IAEA will be removed. At that point, which will hopefully be momentarily, the United States will have reestablished its historic support and full participation in the IAEA.

Mr. President, I believe the events of the past 5 months involving the U.S. reassessment of its participation in the IAEA and the efforts more recently related to the satisfaction of the Kasten-McClure amendment are a testament to the resolve of the President, Secretary Shultz, and Ambassador Kennedy to insure the ever-increasing strength and vitality of the IAEA as part of our Nation's vital nuclear nonproliferation policy. Their leadership has restored a depoliticized IAEA and preserved the important rights of the State of Israel to participate fully in the IAEA, as certified by the Board of Governors yesterday in Vienna. I want to commend the President, the Secretary, and Ambassador Kennedy for the dramatic and most difficult success in decoupling international Arab-Israeli politics from this vital international organizations in the world's nuclear nonproliferation program. I especially wish to commend Ambassador Dick Kennedy for his skill and tenacity in the conduct of the U.S. reassessment and the sensitive diplomatic and congressional negotiations leading to the action by the Board of Governors. This country, and indeed, the entire world have been served well in the quest for peace by the results of the Vienna meeting.

I ask that Ambassador Kennedy's statement to the Board of Governors be printed in the RECORD.

The statement follows:

STATEMENT BY AMBASSADOR RICHARD T. KENNEDY

Mr. Chairman: I would like to make a statement on the report of the Technical Assistance and Cooperation Committee. First, however, I wish to advise the Board of certain decisions recently taken by my government. As you all are aware, last September the United States suspended its participation in the IAEA. Since that time my government has been engaged in an extensive review and assessment of the IAEA and the future role of the United States in this Agency. I would like to use this opportunity to share with you briefly some of the conclusions which we have reached from our intensive study, which is now completed.

Let me begin by recalling for Governors the message President Reagan sent to the Delegates on the occasion of the 26th General Conference. At that time the President said:

"The United States is determined to work with other countries to assure that this Agency can successfully meet the challenges ahead—from strengthening technical cooperation for sharing the benefits of nuclear energy, to finding ways of improving further the technical and institutional safeguards against its misuse. It is our profound hope that others will share this determination—for it would be a tragedy for succeeding generations if we permit this organization to be weakened or undermined by political issues and concerns, which, however strong the emotions they arouse, are extraneous to the central technical purposes for which the Agency was founded."

It was with these thoughts in mind that our assessment was conducted. Our assessment underscored two basic points. First, it is overwhelmingly clear that the IAEA has played and should continue to play a critical role in support of very substantial interests of all of its member states. The IAEA has contributed in a major way to progress in the expanded and safe use of nuclear generated electric power, and through its other development programs such as those in medicine, industry, agriculture, health and safety. At the same time, we are all beneficiaries of the assurance provided though the application of international safeguards that nuclear material is not being misused for illicit and destructive purposes. Perpetuation of this assurance is essential if progress in peaceful nuclear development is to continue. We therefore need to work together to improve the effectiveness of IAEA technical assistance programs, to improve the Agency's safeguard system, and to maintain an effective secretariat. The Director General is aware of the concerns we have expressed, and I am confident that we can achieve these needed improvements if we all exert our best efforts to that end.

The second major point emerging from our assessment is that, just as we are all the beneficiaries of the work conducted by the IAEA, we will all pay a considerable price if the viability and effectiveness of the IAEA are threatened. Yet it is clear to us that the growing trend toward controversy and divisiveness over political issues extraneous to the work of the IAEA is such a direct threat. We believe that unless this tendency is promptly checked, it will render the IAEA ineffective, and will fatally corrode the enthusiasm with which member states have participated here for the last 2½ decades. This is not to say that there will not continue to be legitimate differences among us regarding the allocation of Agency resources and the relative emphasis placed on its programs. There are, of course, legitimate differences in perspectives and interests among the member states of the Agency. We must not, however, abandon debate of issues germane to the IAEA in favor of debate of controversial political issues which should be addressed elsewhere. To do that would be to abandon our mutual and important interests in the IAEA.

In short, Mr. Chairman, the Agency must respect the statute and not, for reasons of political expediency, act in ways that are inconsistent with that statute. The Agency's role in promoting the peaceful use of nuclear energy during this critical period depends entirely on the credibility of its technical expertise.

Fellow Governors, as members of the IAEA's governing body we bear a singular responsibility for determining the Agency's future course. I believe we should make a determined effort to re-establish the tradition of member state cooperation which characterized its first 25 years. I look forward to working actively toward this end with you.

My government and, we are confident, other concerned governments will be watching carefully to see which direction the Agency pursues in the months ahead. We hope and trust that the Agency can put behind it the unfortunate political wrangling of the recent past and get back to the basic purposes which brought us all together in the first place.

Mr. Chairman, the United States for its part then is prepared to renew its commitment to the IAEA and its important program. Within the constraints of U.S. law, the United States intends to support fully these programs. At the same time, I must note that our commitment must depend on the degree to which other members are also determined to return this Agency to its status as an effective international technical organization. It is our deep desire that all member states will join us in this sincere effort. Together we can strengthen this unique international organization and see that the Agency lives up to the principles contained in its statute.●

NUTRITION EDUCATION EFFORTS SHOULD NOT BE REDUCED

● Mr. EAGLETON. Mr. President, we have heard over and over again about the shortsightedness of many of the Reagan administration's budget proposals and their impact on the Federal feeding programs. It makes little sense to try to scrimp on nutrition programs aimed at feeding the poorest of our society when we know full well that these programs are highly successful and when the present economic climate has forced more and more Americans to become reliant on these programs.

Just as this policy is incomprehensible, it makes absolutely no sense to substantially reduce the nutrition education programs which are designed to teach our children proper nutrition, and to aid those on low incomes obtain the most for their food dollar.

This past Sunday, the Washington Post carried an excellent summary of the Department of Agriculture's nutrition education programs and how President Reagan's fiscal year 1984 budget would treat them. I believe it is important that my colleagues take note of these proposals.

I ask that an article entitled "The Tug of War Over Proposed Cuts in Nutrition Education Programs" be printed in the RECORD.

The article follows:

THE TUG OF WAR OVER PROPOSED CUTS IN NUTRITION EDUCATION PROGRAMS

(By Patricia Picone Mitchell)

Several nutrition education programs at the Department of Agriculture are in jeopardy, standing squarely in the path of the Reagan administration's 1984 budget ax. Administration officials believe the cuts are necessary in view of increasing budget constraints.

The following activities are on the endangered list:

The Nutrition Education and Training (NET) program would be eliminated in 1984. The program, funded at $5 million this year, is operated by the states and teaches school children, teachers and school food service personnel about food, nutrition and good eating habits.

Consumer and nutrition groups can be expected to fight the proposed elimination. Robert Leard, acting food and nutrition service administrator says there were never plans for the program "to go on forever," adding, "It's a very small program, it's done its duty over the years, and if states want to continue it, now is the time." In its budget presentation, USDA says the program is being eliminated because its mandate, the development of curriculum materials, has been fulfilled.

However, Elizabeth Shipley-Moses, public policy coordinator for a professional group, the Society for Nutrition Education (SNE), argues that the program "is much more than curriculum development." She says the program has turned school cafeterias into learning centers and has been cost-effective, reducing plate waste because of improvements in meal management by food service workers.

The Expanded Food and Nutrition Education Program (EFNEP), operated through Extension Service grants to states, would be cut 42 percent, from $60 million in 1983 to $35 million in 1984. The program provides for trained aides to work one-on-one with low-income families, especially those with young children, to teach them how to plan healthy meals on a limited budget.

EFNEP is popular in Congress and with the states, and a previous attempt to shift federal funds from the program failed. The proposed cut comes on the heels of a congressionally mandated evaluation that gave the program high marks for effectively targeting the neediest families and for keeping program goals in sharp focus.

In the budget proposal, USDA says EFNEP funding will permit states the flexibility to maintain the program by "using other available funds."

Funding for Human Nutrition Information Service (HNIS), the USDA agency responsible for collecting data on nutrient content in foods, conducting periodic nationwide surveys of what people eat, sponsoring nutrition education research and providing nutrition information and library services to the public, would be cut 20 percent, from $8.2 million this year to $6.6 million in 1984.

The service was saved from a more devastating blow by concerned nutrition groups which, last fall, got wind that the Office of Management and Budget was planning to cut the agency's budget in half and its staff of 85 by more than one-third. In December, the Society for Nutrition Education (SNE) sent a letter to OMB complaining that the cuts were shortsighted since, the group said, both private and public sector agencies and groups depend on the HNIS nutrition surveys and data for program planning. SNE and the National Nutrition Consortium, a group of six major scientific and educational nutrition associations, also issued a press release charging the government with "abandoning nutrition."

Assistant Secretary of Agriculture Mary Jarratt, who oversees the nutrition service, said recently the 20 percent cut would permit work to continue on the consumption survey and data bank. But other HNIS activities would have to be postponed, she said.

"USDA has made a very systematic effort, practically since day one, to demolish education programs," charged Michael Jacobson of the Center for Science in the Public Interest. He said Secretary of Agriculture John Block has ignored requests to meet with consumer groups, and he complained about the administration's decision to cease publication of certain nutrition pamphlets and charge what he characterized as outrageous prices for others.

Not all nutrition education activities at USDA are imperiled, however. In line with the department's efforts to work with private-sector groups on nutrition education projects, USDA is planning a multifaceted "Food and Fitness" campaign.

To be funded in large part by groups that represent producers of commodities such as meat, egg and dairy products, the campaign will officially begin in May with a "commodity fair" on the Mall. USDA's coordinator for the program, George Trapp, says the theme of the fair will be, "Try a new food today," and will attempt to broaden people's awareness of the variety of food produced by American farmers.

Trapp was unable to estimate USDA costs for the campaign, which will include production of a documentary, publications and regional commodity fairs. Plans for other activities are still being worked out, Trapp said.

Not surprisingly, the U.S. dietary guidelines won't be used in the campaign. Commodity groups have opposed the set of nutrition recommendations, which advocate less fat and cholesterol in the diet. "The program is not designed to be a prescription like that," says Trapp. Contending that "there's no one answer that's right for everyone," Trapp said the aim of the program is to raise people's awareness about the kinds of food they are eating and the level of physical activity they are getting. However, there will be nutrition messages targeted to particular groups of people, he says, including pregnant women, grade school children, teen-agers, adult men and women, and older Americans.●

PRELIMINARY NOTIFICATION ON PROPOSED ARMS SALES

● Mr. PERCY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $50 million, or in the case of major defense equipment as defined in the act, those in excess of $14 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sales shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that 2 such notifications were received on February 28, 1983.

Interested Senators may inquire as to the details of these preliminary notifications at the offices of the Committee on Foreign Relations, room SD-427.

The notification follows:

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., February 28, 1983.

In reply refer to: I-00070/83ct.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Middle Eastern country for

major defense equipment tentatively estimated to cost in excess of $14 million.

Sincerely,

WALTER B. LIGON,
Acting Director.

DEFENSE SECURITY ASSISTANCE AGENCY,
Washington, D.C., Feb. 28, 1983.

In reply refer to: I-00436/83.

Dr. HANS BINNENDIJK,
Professional Staff Member, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR DR. BINNENDIJK: By letter dated 18 February 1976, the Director, Defense Security Assistance Agency, indicated that you would be advised of possible transmittals to Congress of information as required by Section 36(b) of the Arms Export Control Act. At the instruction of the Department of State, I wish to provide the following advance notification.

The Department of State is considering an offer to a Middle Eastern country tentatively estimated to cost in excess of $50 million.

Sincerely,

WALTER B. LIGON,
Acting Director.●

SPECIAL COMMITTEE ON AGING RULES

● Mr. HEINZ. Mr. President, in accordance with rule XXVI of the Standing Rules of the Senate, requiring the publication of the rules of each Senate Committee in the CONGRESSIONAL RECORD not later than March 1 of each year, I submit the rules of the Special Committee on Aging and ask that they be printed in the RECORD as follows:

The rules follow:

RULES OF THE SPECIAL COMMITTEE ON AGING OF THE UNITED STATES SENATE

RULE 1. CONVENING OF MEETINGS AND HEARINGS

1.1 Meetings. The Committee shall meet to conduct Committee business at the call of the Chairman.

1.2 Special meetings. The members of the Committee may call additional meetings as provided in Senate Rule XXVI(3).

1.3 Notice and agenda. (a) Hearings. The Committee shall make public announcement of the date, place, and subject matter of any hearing at least one week before its commencement.

(b) Meetings. The Chairman shall give the members written notice of any Committee meeting, accompanied by an agenda enumerating the items of business to be considered, at least 5 days in advance of such meeting.

(c) Shortened notice. A hearing or meeting may be called on not less than 24 hours notice if the Chairman, with the concurrence of the ranking minority member, determines that there is good cause to begin the hearing or meeting on shortened notice. An agenda will be furnished prior to such a meeting.

1.4 Presiding officer. The Chairman shall preside when present. If the Chairman is not present at any meeting or hearing, the ranking majority member present shall preside. Any member of the Committee may preside over the conduct of a hearing.

RULE 2. CLOSED SESSIONS AND CONFIDENTIAL MATERIALS

2.1 Procedure. All meetings and hearings shall be open to the public unless closed. To close a meeting or hearing or portion thereof, a motion shall be made and seconded to go into closed discussion of whether the meeting or hearing will concern the matters enumerated in Rule 2.3. Immediately after such discussion, the meetings or hearing may be closed by a vote in open session of a majority of the members of the Committee present.

2.2 Witness request. Any witness called for a hearing may submit a written request to the Chairman no later than twenty-four hours in advance for his examination to be in closed or open session. The Chairman shall inform the Committee of any such request.

2.3 Closed session subjects. A meeting or hearing or portion thereof may be closed if the matters to be discussed concern: (1) national security; (2) Committee staff personnel or internal staff management or procedure; (3) matters tending to reflect adversely on the character or reputation or to invade the privacy of the individuals; (4) Committee investigations; (5) other matters enumerated in Senate Rule IIVI (5)(b).

2.4 Confidential matter. No record made of a closed session, or material declared confidential by a majority of the Committee, or report of the proceedings of a closed session, shall be made public, in whole or in part or by way of summary, unless specifically authorized by the Chairman and ranking minority member.

2.5 Broadcasting. (a) Control. Any meeting or hearing open to the public may be covered by television, radio, or still photography. Such coverage must be conducted in an orderly and unobtrusive manner, and the Chairman may for good cause terminate such coverage in whole or in part, or take such other action to control it as the circumstances may warrant.

(b) Request. A witness may request of the Chairman, on grounds of distraction, harassment, personal safety, or physical discomfort, that during his testimony cameras, media microphones, and lights shall not be directed at him.

RULE 3. QUORUMS AND VOTING

3.1 Reporting. A majority shall constitute a quorum for reporting a resolution, recommendation or report to the Senate.

3.2 Committee business. A third shall constitute a quorum for the conduct of Committee business, other than a final vote on reporting, providing a minority member is present. One member shall constitute a quorum for the receipt of evidence, the swearing of witnesses, and the taking of testimony at hearings.

3.3 Polling. (a) Subjects. The Committee may poll 1) internal Committee matters including those concerning the Committee's staff, records, and budget; 2) other Committee business which has been designated for polling at a meeting.

(b) Procedure. The Chairman shall circulate polling sheets to each member specifying the matter being polled and the time limit for completion of the poll. If any member so requests in advance of the meeting, the matter shall be held for meeting rather than being polled. The clerk shall keep a record of polls; if the Chairman determines that the polled matter is one of the areas enumerated in rule 2.3, the record of the poll shall be confidential. Any member may move at the Committee meeting following a poll for a vote on the polled decision.

RULE 4. INVESTIGATIONS

4.1 Authorization for investigations. All investigations shall be conducted upon a bipartisan basis by Committee staff. Investigations may be initiated by the Committee staff upon the approval of the Chairman and the ranking Minority member. Staff shall keep the Committee fully informed of the progress of continuing investigations, except where the Chairman and the ranking Minority member agree that there exists temporary cause for more limited knowledge.

4.2 Subpoenas. Subpoenas for the attendance of witnesses or the production of memoranda, documents, records, or any other materials shall be issued by the Chairman, or by any other member of the Committee designated by him. Prior to the issuance of each subpoena, the ranking minority member, and any other member so requesting, shall be notified regarding the identity of the person to whom the subpoena will be issued and the nature of the information sought, and its relationship to the investigation.

4.3 Investigative Reports. All reports containing findings or recommendations stemming from Committee investigations shall be printed only with the approval of a majority of the members of the Committee.

RULE 5. HEARINGS

5.1 Notice. Witnesses called before the Committee shall be given, absent extraordinary circumstances, at least forty-eight hours' notice, and all witnesses called shall be furnished with a copy of these rules upon request.

5.2 Oath. All witnesses who testify to matters of fact shall be sworn unless the Committee waives the oath. The Chairman, or any member, may request and administer the oath.

5.3 Statement. Any witness desiring to make an introductory statement shall file 50 copies of such statement with the Chairman or clerk of the Committee 24 hours in advance of his appearance, unless the Chairman and Ranking Minority Member determine that there is good cause for a witness's failure to do so. A witness shall be allowed no more than ten minutes to orally summarize his prepared statement.

5.4 Counsel. (a) A witness's counsel shall be permitted to be present during his testimony at any public or closed hearing or deposition or staff interview to advise such witness of his rights, provided, however, that in the case of any witness who is an officer or employee of the government, or of a corporation or association, the Chairman may rule that representation by counsel from the government, corporation, or association creates a conflict of interest, and that the witness shall be represented by personal counsel not from the government, corporation or association.

(b) A witness who is unable for economic reasons to obtain counsel may inform the Committee at least 48 hours prior to the witness's appearance, and it will endeavor to obtain volunteer counsel for the witness. Such counsel shall be subject solely to the control of the witness and not the Committee. Failure to obtain counsel will not excuse the witness from appearing and testifying.

5.5 Transcript. An accurate electronic or stenographic record shall be kept of the testimony of all witnesses in executive and public hearings. Any witness shall be afforded, upon request, the right to review that portion of such record, and for this purpose, a copy of a witness's testimony in pulbic or closed session shall be provided to the witness. Upon inspecting his transcript, within

a time limit set by the committee clerk, a witness may request changes in testimony to correct errors of transcription, grammatical errors, and obvious errors of fact; the Chairman or a staff officer designated by him shall rule on such request.

5.6 Impugned persons. Any person who believes that evidence presented, or comment made by a member of staff, at a public hearing or at a closed hearing concerning which there have been public reports, tends to impugn his character or adversely affect his reputation may;

(a) file a sworn statement of facts relevant to the evidence or comment, which shall be placed in the hearing record;

(b) request the opportunity to appear personally before the Committee to testify in his own behalf; and

(c) submit questions in writing which he requests be used for the cross-examination of other witnesses called by the Committee. The Chairman shall inform the Committee of such requests for appearance or cross-examination. If the Committee so decides, the requested questions, or paraphrased versions or portions of them, shall be put to the other witnesses by a member or by staff.

5.7 Minority witnesses. Whenever any hearing is conducted by the Committee, the minority on the Committee shall be entitled, upon request made by a majority of the minority members to the Chairman, to call witnesses selected by the minority to testify or produce documents with respect to the measure or matter under consideration during at least one day of hearing. Such request must be made before the completion of the hearing or, if subpoenas are required to call the minority witnesses, no later than three days before the completion of the hearing.

5.8 Conduct of witnesses, counsel and members of the audience. If, during public or executive sessions, a witness, his counsel, or any spectator conducts himself in such a manner as to prevent, impede, disrupt, obstruct, or interfere with the orderly administration of such hearing the Chairman or presiding Member of the subcommittee present during such hearing may request the Sergeant at Arms of the Senate, his representative or any law enforcement official to eject said person from the hearing room.

RULE 6. DEPOSITIONS AND COMMISSIONS

6.1 Notice. Notices for the taking of depositions in an investigation authorized by the Committee shall be authorized and issued by the Chairman or by a staff officer designated by him. Such notices shall specify a time and place for examination, and the name of the staff officer or officers who will take the deposition. Unless otherwise specified, the deposition shall be in private. The Committee shall not initiate procedures leading to criminal or civil enforcement proceedings for a witness's failure to appear unless the deposition notice was accompanied by a Committee subpoena.

6.2 Counsel. Witnesses may be accompanied at a deposition by counsel to advise them of their rights, subject to the provisions of Rule 5.4.

6.3 Procedure. Witnesses shall be examined upon oath administered by an individual authorized by local law to administer oaths. Questions shall be propounded orally by Committee staff. Objections by the witness as to the form of questions shall be noted by the record. If a witness objects to a question and refuses to testify on the basis of relevance or privilege, the Committee staff may proceed with the deposition, or may, at that time or at a subsequent time, seek a ruling by telephone or otherwise on the objection from a member of the Committee. If the member overrules the objection, he may refer the matter to the Committee or he may order and direct the witness to answer the question, but the Committee shall not initiate procedures leading to civil or criminal enforcement unless the witness refuses to testify after he has been ordered and directed to answer by a member of the Committee.

6.4 Filing. The Committee staff shall see that the testimony is transcribed or electronically recorded. If it is transcribed, the witness shall be furnished with a copy for review. No later than five days thereafter, the witness shall return a signed copy, and the staff shall enter the changes, if any, requested by the witness in accordance with Rule 5.6. If the witness fails to return a signed copy, the staff shall note on the transcript the date a copy was provided and the failure to return it. The individual administering the oath shall certify on the transcript that the witness was duly sworn in his presence, the transcriber shall certify that the transcript is a true record of the testimony, and the transcript shall then be filed with the Committee clerk. Committee staff may stipulate with the witness to changes in this procedure; deviations from this procedure which do not substantially impair the reliability of the record shall not relieve the witness from his obligation to testify truthfully.

6.5 Commissions. The Committee may authorize the staff, by issuance of commissions, to fill in prepared subpoenas, conduct field hearings, inspect locations, facilities, of systems or records, or otherwise act on behalf of the Committee. Commissions shall be accompanied by instructions from the Committee regulating their use.

RULE 7. SUBCOMMITTEES

7.1 Establishment. The Committee will operate as a Committee of the Whole, reserving to itself the right to establish temporary subcommittees at any time by majority vote. The Chairman of the full Committee and the Ranking Minority Member shall be ex officio members of all subcommittees.

7.2 Jurisdiction. Within its jurisdiction, as described in the Standing Rules of the Senate, each subcommittee is authorized to conduct investigations, including use of subpoenas, depositions, and commissions.

7.3 Rules. A subcommittee shall be governed by the Committee rules, except that its quorum for all business shall be one third of the subcommittee membership, and for hearings shall be one member.

8. Reports. Committee reports incorporating Committee findings and recommendations shall be printed only with the prior approval of the Committee, after an adequate period for review and comment. The printing, as Committee documents, of materials prepared by staff for informational purposes, or the printing of materials not originating with the Committee or staff, shall require prior consultation with the minority staff; these publications shall have the following language printed on the cover of the document: "Note: This document has been printed for informational purposes. It does not represent either findings or recommendations formally adopted by the Committee."

9. Amendment of Rules. The rules of the Committee may be amended or revised at any time, provided that not less than a majority of the Committee present so determine at a Committee meeting preceded by at least 3 days notice of the amendments or revisions proposed.●

PERFORMANCE RECORD OF THE UNIFORMED SERVICES UNIVERSITY OF THE HEALTH SCIENCES

● Mr. JOHNSTON. Recently I received a copy of a letter which was written by Dr. Norman E. McSwain, professor of surgery at Tulane University Medical Center in New Orleans, to Dr. Jay P. Sanford, dean of the Uniformed Services University of the Health Sciences (USUHS). Dr. McSwain's letter to Dr. Sanford evaluates the performance of certain students from USUHS with whom Dr. McSwain had the opportunity to work. Basically, Dr. McSwain—who has no affiliation at all with USUHS—found that the students of our military medical school reflected training and competence of the highest level. He further observed that these students showed a special understanding of their future role as military physicians. Mr. President, I would ask that Dr. McSwain's letter be printed in its entirety in the RECORD so that all Senators will be able to review his observations.

It was in 1972 that the Congress passed the Uniformed Services Health Professions Revitalization Act, Public Law 92-426, establishing USUHS. There was much controversy after that authorizing legislation was enacted about the school, its mission, and its cost effectiveness. A majority of the Congress time and again voted to continue with the project, and the school has been operating for 6 years. It is located on the grounds of the Bethesda Naval Hospital. This year the school will graduate 122 physicians who will then enter the military and will probably spend a career in the armed services.

Mr. President, I think Dr. McSwain's letter is testimony to the wisdom of this project. This medical institution is creating a corps of physicians who view themselves as military medical professionals and have a career commitment to service to their country. The school is also providing an opportunity for physicians already in the military to teach, to do research, and generally to be part of an academic medical setting for their own professional training and career enhancement. Such opportunities were not previously available. I understand that the Surgeons General of the Services believe that the university has improved morale in the medical corps.

Mr. President, I would also note that the university's operating expenses on a per capita basis are comparable to those of the average of all medical schools in the United States. In addition, since the obligated service of a USUHS graduate is sufficiently long

so as to strongly indicate that we can expect a career involvement in the military from such a graduate, the training cost per year of service will be more economical than the cost of paying the tuition of a civilian medical school. And, as Dr. McSwain indicated in his letter, the USUHS graduate is specially trained and specially oriented toward service in our armed services. This is a program which has been a great success, and I hope that all my colleagues will recognize that.

The letter follows:

TULANE UNIVERSITY MEDICAL CENTER, DEPARTMENT OF SURGERY,
New Orleans, La., November 22, 1982.

JAY P. SANFORD, M.D.,
Dean, School of Medicine, Uniformed Services University of the Health Sciences, Bethesda, Md.

DEAR DR. SANFORD: When we began to receive medical students for a trauma emergency department clinical rotation from your university, I noted and was very impressed that they were able to function and had the maturity of our PG II's. They worked far above the level of one of our senior medical students. I was also impressed that their orientation was toward their ultimate career of being a military physician, and that of an individual going into the civilian practice of medicine. I felt that they would be much better able to handle themselves in a military career upon finishing school than would a civilian student upon completing civilian medical school and joining the military. They seemed so much more mature than our medical students.

I had the opportunity this past week to accompany a portion of the present senior class on the Bushmaster Course in San Antonio. I watched a very scared, disorganized, immature group of people begin their training and saw a well motivated cohesive, mature, self-assured group of individuals come out a week later. Now I understand why they can triage, evaluate and care for patients in a much more mature and determined manner than can our medical students at the same level. They have been taught this. We don't do that in our medical school. The ATLS and ACLS training program sets the stage and the emergency department rotation completes it.

You are preparing medical students for an entirely different career than a civilian medical school and are doing a superb job of it. Your medical students think like military physicians.

Having personally been on both sides of the fence, that is, two years in the Air Force, and having a lot of friends who are still in the military; plus having spent the majority of my life in a civilian situation, I can certainly see the difference between the two groups of people. A military career is simply not like a civilian career. There are administrative responsibilities, military responsibilities, public health responsibilities, as well as standards of patient care responsibilities, that physicians working in the military world will need to know and understand. I can see that students graduating from a civilian medical school and coming into the military are going to have a tremendously difficult time competing with your students in the career opportunities, because your students are so much better trained for their job. You are now developing the individuals who will be leaders in the military medical corps 15 and 25 years from now. I believe that I can state that it is the Bushmaster course and the training period that surrounds it that is a major contributor to this.

You are to be congratulated on it.

I don't have any idea how much such a training program costs, but as a tax payer having seen it, I can certainly state that the benefits are greater then whatever it cost you. I feel much more comfortable now knowing that the future Medical Corps of the United States Armed Services is being so well trained. As a citizen of this country, I feel very much at ease. If the rest of the military is doing as much as you are to train superb individuals, then there is no question in my mind that the United States of America will always be safe for its citizens.

I am proud that we at Tulane are able to contribute to your outstanding educational program.

Sincerely,

NORMAN E. MCSWAIN, Jr., M.D.,
Professor of Surgery.●

RULES OF THE SELECT COMMITTEE ON INDIAN AFFAIRS FOR THE 98TH CONGRESS

● Mr. ANDREWS. Mr. President, in compliance with section 133(b) of the Legislative Reorganization Act of 1946, as amended, the Select Committee on Indian Affairs is publishing the committee's rules, which I ask be printed in the RECORD.

The rules are as follows:

RULES OF THE SENATE SELECT COMMITTEE ON INDIAN AFFAIRS FOR THE 98TH CONGRESS

COMMITTEE RULES

Rule 1. The Standing Rules of the Senate. Senate Resolution 4, and the provisions of the Legislative Reorganization Act of 1946, as amended by the Legislative Reorganization Act of 1970, to the extent that the provisions of such are applicable to the Select Committee on Indian Affairs and as supplemented by these rules, are adopted as the rules of the Committee.

MEETINGS OF THE COMMITTEE

Rule 2. The Committee shall meet on the first Wednesday of each month while the Congress is in session for the purpose of conducting business, unless, for the convenience of Members, the Chairman shall set some other day for a meeting. Additional meetings may be called by the Chairman as he may deem necessary.

OPEN HEARINGS AND MEETINGS

Rule 3. Hearings and business meetings of the Committee shall be open to the public except when the Committee by majority vote orders a closed hearing or meeting.

HEARING PROCEDURE

Rule 4. (a) Public notice shall be given of the date, place, and subject matter of any hearing to be held by the Committee at least one week in advance of such hearing unless the Chairman of the Committee determines that the hearing is noncontroversial or that special circumstances require expedited procedures and a majority of the Committee concurs. In no case shall a hearing be conducted with less than 24 hours notice.

(b) Each witness who is to appear before the Committee shall file with the Committee, at least 24 hours in advance of the hearing, a written statement of his or her testimony in as many copies as the Chairman of the Committee prescribes.

(c) Each member shall be limited to 5 minutes in the questioning of any witness until such time as all Members who so desire have had an opportunity to question the witness unless the Committee shall decide otherwise.

(d) The Chairman and ranking Minority Member or the ranking Majority and Minority Members present at the hearing may each appoint one Committee staff member to question each witness. Such staff member may question the witness only after all Members present have completed their questioning of the witness or at such other time as the Chairman and the ranking Majority and Minority Members present may agree.

BUSINESS MEETING AGENDA

Rule 5. (a) A legislative measure or subject shall be included in the agenda of the next following business meeting of the Committee if a written request for such inclusion has been filed with the Chairman of the Committee at least 1 week prior to such meeting. Nothing in this rule shall be construed to limit the authority of the Chairman of the Committee to include legislative measures or subjects on the Committee agenda in the absence of such request.

(b) The agenda for any business meeting of the Committee shall be provided to each Member and made available to the public at least 3 days prior to such meeting, and no new items may be added after the agenda is so published except by the approval of a majority of the Members of the Committee. The Clerk shall promptly notify absent Members of any action taken by the Committee on matters not included in the published agenda.

Rule 6. (a) Except as provided in subsecs. (b) and (c), four Members shall constitute a quorum for the conduct of business of the Committee.

(b) A measure may be ordered reported from the Committee by a motion made in proper order by a Member followed by the polling of the Members in the absence of a quorum at a regular or special meeting.

(c) One Member shall constitute a quorum for the purpose of conducting a hearing or taking testimony on any measure before the Committee.

VOTING

Rule 7. (a) A rollcall of the Members shall be taken upon the request of any Member.

(b) Proxy voting shall be permitted on all matters, except that proxies may be counted for the purpose of determining the presence of a quorum. Unless further limited, a proxy shall be exercised only upon the date for which it is given and upon the items published in the agenda for that date.

SWORN TESTIMONY AND FINANCIAL STATEMENTS

Rule 8. Witnesses in Committee hearings may be required to give testimony under oath whenever the Chairman or ranking Minority Member of the Committee deems such to be necessary. At any hearing to confirm a Presidential nomination, the testimony of the nominee, and at the request of any member, any other witness shall be taken under oath. Every nominee shall submit a financial statement on forms to be perfected by the Committee, which shall be sworn to by the nominee as to its completeness and accuracy. All such statements shall be made public by the Committee unless the Committee on executive session determines that special circumstances require a full or

partial exception to this rule. Members of the Committee are urged to make public a complete disclosure of their financial interests on forms to be perfected by the Committee in the manner required in the case of Presidential nominees.

CONFIDENTIAL TESTIMONY

Rule 9. No confidential testimony taken by or confidential material presented to the Committee or any report of the proceedings of a closed Committee hearing or business meeting shall be made public in whole or in part or by way of summary, unless authorized by a majority of the Members of the Committee at a business meeting called for the purpose of making such a determination.

DEFAMATORY STATEMENTS

Rule 10. Any person whose name is mentioned or who is specifically identified in, or who believes that testimony or other evidence presented at, an open Committee hearing tends to defame him or otherwise adversely affect his reputation may file with the Committee for its consideration and action a sworn statement of facts relevant to such testimony or evidence.

BROADCASTING OF HEARINGS OR MEETINGS

Rule 11. Any meeting or hearing by the Committee which is open to the public may be covered in whole or in part by television broadcast, radio broadcast, or still photography. Photographers and reporters using mechanical recording, filming, or broadcasting devices shall position their equipment so as not to interfere with the seating, vision, and hearing of Members and staff on the dais or with the orderly process of the meeting or hearing.

AMENDING THE RULES

Rule 12. These rules may be amended only by a vote of a majority of all Members of the Committee in a business meeting of the Committee:

Provided, That no vote may be taken on any proposed amendment unless such amendment is reproduced in full in the Committee agenda for such meeting at least three days in advance of such meeting. Such proposed amendments shall be mailed to each Member of the Committee at least seven (7) calendar days in advance of the meeting.●

DOMESTIC COMMODITY DISTRIBUTION AND FOOD ASSISTANCE ACT OF 1983

● Mr. NICKLES. Mr. President, today I join my colleague from Kansas and 16 other Members of the Senate in cosponsoring S. 17, the Domestic Commodity Distribution and Food Assistance Act of 1983.

The paradox in American food policy is overwhelming. While making outlays of over $17 billion annually to support private and institutional feeding programs, Uncle Sam also garners and stores excess commodities. In 1982, USDA estimates that it spent $628,000 each day—that's a yearly total of $220 million—to store foodstuff valued by December 31 at $3.9 billion.

Surely no American housewife would be so foolish as to spend hundreds of dollars a week purchasing supermarket and restaurant food for her family, while at the same time spending hundreds of dollars more to keep pantries and refrigerators stocked with high-quality food, much of which obviously would spoil before it could be eaten.

Under this legislation, surplus commodities would be made available to eligible recipient agencies like food banks, soup kitchens, churches, and other nonprofit charitable organizations. S. 17 would not only provide for the distribution of these products, but would allow funds which would otherwise be expended to maintain these huge stockpiles to go toward processing and distributing the bounty to those who need it.

It is certainly time for the American Government to use some common sense in addressing its domestic food policies. I commend Senator DOLE for his practical solution to a continuing problem, and urge its swift adoption.●

THE RULES OF PROCEDURE OF THE COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

● Mr. GARN. Mr. President, in accordance with paragraph 2 of rule XXVI of the Standing Rules of the Senate, I submit the "Rules of Procedure of the Committee on Banking, Housing, and Urban Affairs," to be printed in the RECORD.

There have been no changes to the rules since they were last adopted by the committee on February 4, 1981, nor have there been any requests for rule changes.

The rules follow:

RULES OF PROCEDURE FOR THE COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

[Adopted in executive session, Feb. 4, 1981]

RULE 1.—REGULAR MEETING DATE FOR COMMITTEE

The regular meeting day for the Committee to transact its business shall be the last Tuesday in each month; except that if the Committee has met at any time during the month prior to the last Tuesday of the month, the regular meeting of the Committee may be canceled at the discretion of the Chairman.

RULE 2.—COMMITTEE

(a) Investigations.—No investigation shall be initiated by the Committee unless the Senate or the full Committee has specifically authorized such investigation.

(b) Hearings.—No hearing of the Committee shall be scheduled outside the District of Columbia except by agreement between the Chairman of the Committee and the ranking minority member of the Committee or by a majority vote of the Committee.

(c) Confidential testimony.—No confidential testimony taken or confidential material presented at an executive session of the Committee or any report of the proceedings of such executive session shall be made public either in whole or in part by way of summary, unless specifically authorized by the Chairman of the Committee and the ranking minority member of the Committee or by a majority vote of the Committee.

(d) Interrogation of witnesses.—Committee interrogation of a witness shall be conducted only by members of the Committee or such professional staff as is authorized by the Chairman or the ranking minority member of the Committee.

(e) Prior notice of mark-up sessions.—No session of the Committee or a Subcommittee for marking up any measure shall be held unless (1) each member of the Committee or the Subcommittee, as the case may be, has been notified in writing of the date, time, and place of such session at least 48 hours prior to the commencement of such session, or (2) the Chairman of the Committee or Subcommittee determines that exigent circumstances exist requiring that the session be held sooner.

(f) Prior notice of first degree amendments.—It shall not be in order for the Committee or Subcommittee to consider any amendment in the first degree proposed to any measure under consideration by the Committee or Subcommittee unless twenty written copies of such amendment have been delivered to the office of the Committee at or before 2:00 p.m. on the business day prior to the meeting. This subsection may be waived by a majority of the Members of the Committee or Subcommittee voting. This subsection shall apply only when at least 48 hours written notice of a session to mark up a measure is required to be given under subsection (e) of this rule.

(g) Cordon rule.—Whenever a bill or joint resolution repealing or amending any statute or part thereof shall be before the Committee or Subcommittee, from initial consideration in hearings through final consideration, the Clerk shall place before each member of the Committee or Subcommittee a print of the statute or the part or section thereof to be amended or repealed showing by stricken-through type, the part or parts to be omitted, and in italics, the matter proposed to be added. In addition, whenever a member of the Committee or Subcommittee offers an amendment to a bill or joint resolution under consideration, those amendments shall be presented to the Committee or Subcommittee in a like form, showing by typographical devices the effect of the proposed amendment on existing law. The requirements of this subsection may be waived when, in the opinion of the Committee or Subcommittee chairman, it is necessary to expedite the business of the Committee or Subcommittee.

RULE 3.—SUBCOMMITTEES

(a) Authorization for.—A Subcommittee of the Committee may be authorized only by the action of a majority of the Committee.

(b) Membership.—No member may be a member of more than three Subcommittees and no member may chair more than one Subcommittee. No member will receive assignment to a second Subcommittee until, in order of seniority, all members of the Committee have chosen assignments to one Subcommittee, and no member shall receive assignment to a third Subcommittee until, in order of seniority, all members have chosen assignments to two Subcommittees.

(c) Investigations.—No investigation shall be initiated by a Subcommittee unless the Senate or the full Committee has specifically authorized such investigation.

(d) Hearings.—No hearing of a Subcommittee shall be scheduled outside the District of Columbia without prior consultation with the Chairman and then only by agreement between the Chairman of the Subcommittee and the ranking minority member of the Subcommittee or by a majority vote of the Committee.

(e) Confidential testimony.—No confidential testimony taken or confidential material presented at an executive session of the Subcommittee or any report of the proceedings of such executive session shall be made public, either in whole or in part or by way of summary, unless specifically authorized by the Chairman of the Subcommittee and the ranking minority member of the Subcommittee, or by a majority vote of the Subcommittee.

(f) Interrogation of witnesses.—Subcommittee interrogation of a witness shall be conducted only by members of the Subcommittee or such professional staff as is authorized by the Chairman or the ranking minority member of the Subcommittee.

(g) Special meetings.—If at least three members of a Subcommittee desire that a special meeting of the Subcommittee be called by the Chairman of the Subcommittee, those members may file in the offices of the Committee their written request to the Chairman of the Subcommittee for that special meeting. Immediately upon the filing of the request, the Clerk of the Committee shall notify the Chairman of the Subcommittee of the filing of the request. If, within 3 calendar days after the filing of the request, the Chairman of the Subcommittee does not call the requested special meeting, to be held within 7 calendar days after the filing of the request, a majority of the members of the Subcommittee may file in the offices of the Committee their written notice that a special meeting of the Subcommittee will be held, specifying the date and hour of that special meeting. The Subcommittee shall meet on that date and hour. Immediately upon the filing of the notice, the Clerk of the Committee shall notify all members of the Subcommittee that such special meeting will be held and inform them of its date and hour. If the Chairman of the Subcommittee is not present at any regular, additional, or special meeting of the Subcommittee, the ranking member of the majority party on the Subcommittee who is present shall preside at that meeting.

(h) Voting.—No measure or matter shall be recommended from a Subcommittee to the Committee unless a majority of the Subcommittee are actually present. The vote of the Subcommittee to recommend a measure or matter to the Committee shall require the concurrence of a majority of the members of the Subcommittee voting. On Subcommittee matters other than a vote to recommend a measure or matter to the Committee no record vote shall be taken unless a majority of the Subcommittee are actually present. Any absent member of a Subcommittee may affirmatively request that his vote to recommend a measure or matter to the Committee or his vote on any such other matter on which a record vote is taken, be cast by proxy. The proxy shall be in writing and shall be sufficiently clear to identify the subject matter and to inform the Subcommittee as to how the member wishes his vote to be recorded thereon. By written notice to the Chairman of the Subcommittee any time before the record vote on the measure or matter concerned is taken, the member may withdraw a proxy previously given. All proxies shall be kept in the files of the Committee.

RULE 4.—WITNESSES

(a) Filing of statements.—Any witness appearing before the Committee or Subcommittee (including any witness representing a Government agency) must file with the Committee or Subcommittee (before noon, 24 hours preceding his appearance) 75 copies of his statement to the Committee or Subcommittee. In the event that the witness fails to file a written statement in accordance with this rule, the Chairman of the Committee or Subcommittee has the discretion to deny the witness the privilege of testifying before the Committee or Subcommittee until the witness has properly complied with the rule.

(b) Length of statements.—Written statements properly filed with the Committee or Subcommittee may be as lengthy as the witness desires and may contain such documents or other addenda as the witness feels is necessary to present properly his views to the Committee or Subcommittee. It shall be left to the discretion of the Chairman of the Committee or Subcommittee as to what portion of the documents presented to the Committee or Subcommittee shall be published in the printed transcript of the hearings.

(c) Fifteen-minute duration.—Oral statements of witnesses shall be based upon their filed statements but shall be limited to 15 minutes duration. This period may be extended at the discretion of the Chairman presiding at the hearings.

(d) Subpoena of witnesses.—Witnesses may be subpoenaed by the Chairman of the Committee or a Subcommittee with the agreement of the ranking minority member of the Committee or Subcommittee or by a majority vote of the Committee or Subcommittee.

(e) Counsel permitted.—Any witness subpoenaed by the Committee or Subcommittee to a public or executive hearing may be accompanied by counsel of his own choosing who shall be permitted, while the witness is testifying, to advise him of his legal rights.

(f) Expenses of witnesses.—No witness shall be reimbursed for his appearance at a public or executive hearing before the Committee or Subcommittee unless such reimbursement is agreed to by the Chairman and ranking minority member of the Committee or by a majority vote of the Committee.

(g) Limits of questions.—Questioning of a witness by members shall be limited to 10 minutes duration, except that if a member is unable to finish his questioning in the 10-minute period, he may be permitted further questions of the witness after all members have been given an opportunity to question the witness.

Additional opportunity to question a witness shall be limited to a duration of 10 minutes until all members have been given the opportunity of questioning the witness for a second time. This 10-minute time period per member will be continued until all members have exhausted their questions of the witness.

RULE 5.—VOTING

(a) Vote to report a measure or matter.—No measure or matter shall be reported from the Committee unless a majority of the Committee are actually present. The vote of the Committee to report a measure or matter shall require the concurrence of a majority of the members of the Committee who are present.

Any absent member may affirmatively request that his vote to report a matter be cast by proxy. The proxy shall be sufficiently clear to identify the subject matter, and to inform the Committee as to how the member wishes his vote to be recorded thereon. By written notice to the Chairman any time before the record vote on the measure or matter concerned is taken, any member may withdraw a proxy previously given. All proxies shall be kept in the files of the Committee, along with the record of the rollcall vote of the members present and voting, as an official record of the vote on the measure or matter.

(b) Vote on matters other than a report on a measure or matter.—On Committee matters other than a vote to report a measure or matter, no record vote shall be taken unless a majority of the Committee are actually present. On any such other matter, a member of the Committee may request that his vote may be cast by proxy. The proxy shall be in writing and shall be sufficiently clear to identify the subject matter, and to inform the Committee as to how the member wishes his vote to be recorded thereon. By written notice to the Chairman any time before the vote on such other matter is taken, the member may withdraw a proxy previously given. All proxies relating to such other matters shall be kept in the files of the Committee.

RULE 6.—QUORUM

No executive session of a Committee or a Subcommittee shall be called to order unless a majority of the Committee or Subcommittee, as the case may be, are actually present. Unless the Committee otherwise provides or is required by the Rules of the Senate, one member shall constitute a quorum for the receipt of evidence, the swearing of witnesses, and the taking of testimony.

RULE 7.—STAFF PRESENT ON DAIS

Only members and the Clerk of the Committee shall be permitted on the dais during public or executive hearings, except that a member may have one staff person accompany him during such public or executive hearing on the dais. If a member desires a second staff person to accompany him on the dais he must make a request to the Chairman for that purpose.●

RULES OF THE COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

● Mr. STAFFORD. Mr. President, Senate rule XXVI requires that by March 1 standing committees of the Senate publish their rules in the CONGRESSIONAL RECORD. The rules of the Committee on Environment and Public Works remain, with one exception, identical to the rules under which the committee has for a number of years functioned effectively and harmoniously.

At its meeting on Monday, February 28, the committee voted a revision to its rules approved at the beginning of the 98th Congress., It voted to delete old rule 15, delegating committee resolutions to review water resources reports and to study public building projects. Instead, in conformance with what has increasingly become committee practice over the past several years, full committee review and approval of water resources and public building studies will now be required. A new rule 15 was then adopted which incorporates our procedure with respect to public building prospectuses

submitted by the General Services Administration.

The new rule, which was first proposed by Senator SIMPSON at our organizational meeting on January 26, is consistent with legislation this committee adopted unanimously and which was subsequently passed by the Senate in both the 96th and 97th Congresses (S. 2080 and S. 533). It illuminates the point that Senator SIMPSON, with Senators RANDOLPH, MOYNIHAN, and myself, remains keenly interested in reform of the Nation's public building policy. To this end, we introduced S. 452 earlier in this session and expect to act on it promptly.

Mr. President, I ask that a brief description of the new rule 15 be printed in the RECORD immediately following the rules of procedure of the Committee on Environment and Public Works.

The material follows:

RULES OF PROCEDURE OF THE COMMITTEE ON ENVIRONMENT AND PUBLIC WORKS

Rule 1. Regular Meeting Days.—The regular meeting days of the Committee shall be the first and third Thursday of each month at 10:00 A.M., except that if there be no business before the Committee, the regular meeting shall be omitted.

Rule 2. Committee Meetings.—Subject to section 133(a) of the Legislative Reorganization Act of 1946, as amended, Committee meetings for the conduct of business, for the purpose of holding hearings, or for any other purpose, shall be called by the Chairman, after consultation with the ranking Minority Member. Subcommittee meetings shall be called by the Chairman of the respective subcommittee, after consultation with the ranking Minority Member. Notice of a meeting and the agenda of business to be discussed by the Committee will be provided to all Members not less than twenty-four hours in advance of such meeting. Additions to the agenda after that time may be made with the concurrence of the ranking Minority Member. Such 24-hour notice may be waived in an emergency by the Chairman, with the concurrence of the ranking Minority Member.

Rule 3.—Open Committee Meetings and Legislative Mark-up Sessions.—Meetings of the Committee, including hearings and legislative mark-ups, shall be open to the public, except that a portion or portions of any such meeting may be closed to the public if the Committee determines by record vote of a majority of the members of the Committee present that the matters to be discussed or the testimony to be taken at such portion or portions—

(1) will disclose matters necesary to be kept secret in the interest of national defense or the confidential conduct of the foreign relations of the United States;

(2) will relate solely to matters of committee staff personnel or internal staff management or procedure; or

(3) consititute any other grounds for closure under paragraph 7(b) of rule XXV of the Standing Rules of the Senate (as amended by Senate Resolution 9, 94th Congress).

Rule 4. Presiding Officer.—(a) The Chairman shall preside at all meetings and hearings of the Committee except that in his absence of ranking Majority Member who is present at the meeting shall preside;

(b) Subcommittee Chairman shall preside at all meetings and hearings of their respective Subcommittees, except that in the absence of the Subcommittee Chairman, the ranking Majority Member of the Subcommittee who is present at the meeting shall preside;

(c) Notwithstanding the rule prescribed by subsections (a) and (b), any Member of the Committee may preside over the conduct of a hearing.

Rule 5. Quorums.—(a) Except as provided in subsections (b) and (d), five Members, two of whom shall be Members of the Minority party, shall constitute a quorum for the conduct of business, except for the purpose of reporting any measure or matter.

(b) Quorums for the conduct of business by the Subcommittees shall be a simple majority of the Membership of the Subcommittees with at least one Minority Member present.

(c) Once a quorum as prescribed in subsections (a) and (b) has been established for the conduct of business, the Committee may continue to conduct business.

(d) Notwithstanding the rule prescribed in subsection (a), one Member shall constitute a quorum for the purpose of conducting a hearing.

Rule 6. Proxy Voting.—(a) Proxy voting shall be allowed on all measures, amendments, resolutions, or any other issue before the Committee or any Subcommittees. Any Member who is unable to attend the meeting may submit his vote on any such issue, in writing or through personal instructions; however, proxies shall not be voted for the purpose of reporting any measure or matter except when the absent Committee Member has been informed of the matter on which he is being recorded and has affirmatively requested that he be so recorded. A proxy given in writing shall be valid until revoked, while a proxy given orally or by personal instructions is valid only on the day given.

(b) At the discretion of the Chairman, after consultation with the Ranking Minority Member, Members who are unable to be present and whose vote has not been cast by proxy may have their positions recorded on any vote on the same business day so long as the vote will not change the outcome.

Rule 7. Public Announcement of Vote.—Whenever the Committee by rollcall vote reports any measure or matter, or acts upon any measure or amendments thereto, the report of the Committee on such measure or matter shall include a tabulation of the votes cast in favor of and the votes cast in opposition to such measure by each Member of the Committee.

Rule 8. Announcement of Hearing.—The Committee, or any Subcommittee thereof, shall make public announcement and provide notice to Members of the date, place, time and subject matter of any hearings to be conducted on any measure or matter, at least one week in advance of such hearing, unless the Committee Chairman, or Subcommittee Chairman, with the concurrence of the ranking Minority Member, determines that there is good cause to begin such hearing at an earlier date, in which event not less than twenty-four hours notice shall be given.

Rule 9. Statements of Witnesses at Hearings.—(a) Each witness who is scheduled to testify at any hearing of the Committee, or any Subcommittee thereof, shall file a written statement of his proposed testimony not later than noon of the last business day preceding the day on which he is scheduled to appear. At the time of his appearance, he shall supply for the use of the Committee or Subcommittee, 25 copies of his prepared testimony or such greater number as may be requested in the letter of invitation. Except for witnesses from the Federal Government, this rule may be waived with regard to field hearings.

(b) The presiding officer at a hearing may have a witness confine his oral presentation to a summary of his statement.

Rule 10. Regularly Established Subcommittees.—The Committee shall have six regularly established Subcommittees as follows:

Subcommittee on Environmental Pollution;

Subcommittee on Nuclear Regulation;

Subcommittee on Water Resources;

Subcommittee on Transportation;

Subcommittee on Toxic Substances and Environmental Oversight; and

Subcommittee on Regional and Community Development.

Rule 11. Subcommittee Membership. Following consultation with the Majority Members and the Ranking Minority Member of the Committee, the Chairman shall announce selections for membership of the Subcommittees referred to in Rule 10.

Rule 12. Environmental Impact Statements.—No project or legislation proposed by the Administration shall be approved or other action taken on such project or legislation unless the Committee has received a final environmental impact statement relative to it, in accordance with section 102(2)(C) of the National Environmental Policy Act of 1970, and the written comments of the Administrator of the Environmental Protection Agency, in accordance with section 309 of the Clean Air Act. This rule is not intended to broaden, narrow, or otherwise modify the class of projects or legislative proposals for which environmental impact statements are required under section 102(2)(C).

Rule 13. Whenever the Committee authorizes a project, under Public Law 89-298, Rivers and Harbors Act of 1965, Public Law 83-566, Watershed Protection and Flood Protection Act, or Public Law 86-249, Public Buildings Act of 1959, as amended, the Chairman shall submit for printing in the Congressional Record, and the Committee shall publish periodically as a committee print, a report that describes the project and the reasons for its approval, together with any dissenting or individual views.

Rule 14. Naming of Public Facilities.—No building, structure or facility authorized by the Committee, shall be named for any living person, except former Presidents or former Vice Presidents of the United States, or former Members of Congress over 70 years of age.

Rule 15. (a) The Committee shall act on all prospectuses for construction (including construction of buildings for lease by the Government), alteration and repair, or acquisition submitted by the General Services Administration in accordance with section 7(a) of the Public Buildings Act of 1959, as amended, and such action shall be completed by the date of May 15 during the same session in which such prospectuses are submitted to the Congress. The Committee may consider prospectuses submitted for alterations or repairs necessitated by emergency building conditions at any time during the same session of the Congress in which they are submitted. Prospectuses rejected by majority vote of the Committee or not contained in any bill reported to the Senate shall be returned to the GSA and

must then be resubmitted in order to be considered for action by the Committee during the next session of the Congress.

(b) Reports of building project surveys submitted by the General Services Administration to the Committee under section 11(b) of the Public Buildings Act of 1959, as amended, shall not be considered by the Committee as being prospectuses subject to approval by committee resolution in accordance with section 7(a) of that Act. Projects described in such survey reports shall be considered for Committee action only if they are submitted as prospectuses in accordance with section 7(a) and they shall be subject to the provisions of subsection (a) of this rule.

Rule 16. Broadcasting of Hearings.—Public hearings of the Committee, or any Subcommittee thereof, may be televised or broadcast, or recorded for television or broadcast, upon notification in advance to the Chairman through the Chief Clerk. During public hearings, photographers and other reporters using mechanical recording or filming devices shall position and use their equipment in such fashion as will not interfere with the seating, vision, or hearing of Committee Members or Staff on the dais, nor with the orderly process of the hearing.

Rule 17. Amendment of Rules.—The rules may be added to, modified, amended or suspended by a majority of the Committee Membership.

PROPOSED RULE ON PUBLIC BUILDINGS

The proposed rule in general incorporates the same procedure the Committee has been following informally (without rule); it conforms to the legislation which the Committee adopted unanimously in both the 96th and 97th Congresses (S. 2080 and S. 533).

1. Except for leases (which the Committee has refused to approve for 4 years) and emergency repair projects, the Committee would act on all prospectuses by May 15 in the same session in which they are submitted. Prospectuses rejected by majority vote, or not contained in any bill reported to the Senate, would be returned to the GSA and must be resubmitted in order to be considered for action by the Committee during the next session of the Congress.

2. Building project surveys submitted under section 11(b) of the Public Buildings Act of 1959 would not be considered by the Committee as being prospectuses subject to approval by committee resolution in accordance with section 7(a) of that Act. Such projects would be considered for Committee action only if they are submitted as prospectuses in accordance with section 7(a) of the Act.

These new procedures would: (A) Help to nullify arguments encountered by the Committee last year that no action is tantamount to approval. (B) Put authorizations of buildings on the same schedule as other authorizations (May 15). (C) Require GSA to send all prospectuses up before May 15, instead of in a piecemeal fashion throughout the year. The Committee cannot make rational judgments on the program when it is submitted piecemeal, and it should not be required to act on one group of projects when it does not know what else may later be submitted the same year.●

TECHNOLOGY TRANSFER AND SOVIET INDUSTRIAL ESPIONAGE

● Mr. GARN. Mr. President, recently I introduced legislation, S. 434, that would remove the primary administrative and enforcement responsibilities for export controls from the Commerce Department and vest them in an independent Federal agency, the Office of Strategic Trade.

The Soviets and their Warsaw Pact allies have obtained vast amounts of militarily significant Western technology and equipment through legal and illegal means. The Soviet effort is massive, well planned, and well managed—a national program approved at the highest levels of government.

In view of the high priority assigned to obtaining Western technology by the Soviet Union, the United States must organize more effectively than it has in the past to protect the mutual security interests of ourselves and our allies. The Office of Strategic Trade Act of 1983 addresses the inability of the current export control system, as administered by the Department of Commerce, to carry out its responsibilities under the Export Administration Act. The bill is a rewrite of the Export Administration Act of 1979 and if adopted would replace that act when it expires on September 30, 1983.

Recently, I read a copy of a speech given by Rear Adm. E. A. Burkhalter, Jr., USN to the Armed Forces Communications and Electronics Associations's western conference and exposition. In his speech, Admiral Burkhalter, the Director of the Intelligence Community Staff, states that—

Stealing technology has been assigned the highest priority for KGB (Soviet Intelligence Service) and GRU (Military Intelligence Service) collection.

The Soviet State Committee for Science and Technology relies on these two agencies to acquire about 70 percent of its technology acquisition requirements. The Soviet Union, a nation plagued with overcentralization, low productivity, and lack of imagination, has a fundamental dependency upon American technology for its own military expansion. These are not unwarranted suspicions, these are facts. We need to be sensitive to the extent of Soviet efforts to acquire Western technology through illegal means. I therefore commend Admiral Burkhalter for his fine statement on this subject, and I urge my colleagues to review his remarks.

I ask that Admiral Burkhalter's statement be printed in the RECORD.

The statement follows:

SOVIET INDUSTRIAL ESPIONAGE

(Remarks by RADM E.A. Burkhalter, Jr., USN Director, Intelligence Community Staff)

It was Lenin who first said that the Soviet Union could depend upon the West for military technology, back in the 1920s. "The capitalists," said Lenin, "will sell us the rope we need to hang them."

He was right.

Both the Soviet Union and the United States have come a long way in the past sixty years, but we are still selling them rope.

The latest Soviet ICBMs use gyros, accelerometers, and precision bearings manufactured by American equipment.

Many of the trucks that carried Soviet troops into Afghanistan were built at the Kama Truck Plant, constructed with 1.5 billion dollars worth of modern American and European automotive production machinery.

The new Soviet strategic transport plane incorporates many distinctive features of our C-5A.

Over the past ten years, the Soviets acquired enough state-of-the-art Western microelectronics production equipment to fit out their own fledgling industry. We in intelligence are only just beginning to see the resulting enhancements in Soviet weapons and sensors.

It is not news to any of you that the Soviet Union has been embarked on a massive military buildup for nearly two decades now. They have fielded some 200 new weapon systems per decade since the early 1960s, and the pace continues. Soviet military manufacturing capacity expanded 80 percent over this period. Today, one quarter of all these plants are undergoing further expansion. The Soviets are building new tanks, new bombers, new fighters, missiles, submarines, cruisers, even full-scale aircraft carriers.

You in this room know better than anyone else that today's weapon systems depend upon modern technology: microelectronics, communications, computers, advanced propulsion systems and materials. It takes a highly motivated and sophisticated industry to invent, develop, and produce the weapons of modern warfare. Here in the Bay Area, we stand in the heart of the greatest concentration of high-technology industry in the Western World. Surely the Soviets must have a Silicon Valley of their own, supporting their massive military buildup.

Yes, the Soviets do have such an industry. Unfortunately, you are part of it.

Anyone who has studied the Soviet economy knows that it is plagued by overcentralization, bureaucratic inertia, low productivity, and lack of imagination. There are selected areas of their military industry marked by aggressive research and development efforts; but, by and large, those who innovate, who take risks in research and development, come to grief if they cannot show immediate, tangible results.

So where does the Soviet Union turn for ready-made, proven, state-of-the-art technology? Technology that is cheap, and sometimes free? Technology that is necessary not only to Soviet military expansion, but to the development of its industrial base, even its agriculture? The Soviet Union turns to you, to the best technological minds in the world, for what it needs.

What I am about to describe for you in the next few minutes is not conjecture. It is not theory. It is certainly not alarmist propaganda. I am going to describe the Soviet Union's espionage effort directed against the high-technology industries of the United States. These are not allegations, but facts, substantiated by the American intelligence community, and in many cases proven in courts of law.

As voracious as the Soviet appetite for American technology is, their collection effort is not like a simple vacuum cleaner. At the highest level, the Soviet State Committee for Science and Technology consid-

ers the needs of the Soviet military, and—to a lesser extent—the civilian scientific and industrial communities. It formulates these technology needs into acquisition requirements.

About 30 percent of these technology requirements can be met by legal, open means: subscribing to periodicals such as Aviation Week, attending international conferences, sending scientists to do research at American universities, or buying equipment that is available for unrestricted international sale. One of the more productive means by which the Soviets have acquired large amounts of valuable information in recent years has been adroit use of the Freedom of Information Act. Just by asking the right questions, the Soviets are able to pull from federal government files reams of technical data not otherwise available to the public, much of it only recently declassified.

As voluminous and valuable as this openly available information is—and who in this room has not been shocked by the details of sensitive projects being published in the open press?—as voluminous as this unrestricted information is, it constitutes less than a third of what the Soviet State Committee for Science and Technology figures it needs. For about 70 percent of its technology acquisition requirements, the Committee turns to the Soviet intelligence services: the KGB, and the military intelligence service, the GRU.

Technology acquisition is not just another requirement laid on Soviet intelligence, relegated to a position low on the priority list. Former KGB officers and their agents, now in the West, have told us quite clearly that acquiring—stealing—technology has been assigned the highest priority for KGB and GRU collection. Because of the tangible nature of the target, success is easily measured: collection of technical information and devices wins sure praise for Soviet intelligence officers from the KGB and GRU bosses. In fact, the two services compete strenuously for such recognition, each trying to outdo the other in sending high-value technology back to Moscow.

Now let me describe the Soviet industrial espionage effort in this country by the use of examples. Each of these recent cases illustrates various facets of the Soviet intelligence threat to American high-technology industry.

First, let me emphasize that the Soviets have been at the technology transfer game for a long time, as Lenin's comment about the capitalists and the rope indicates. It is not just a recent phenomenon. Everyone recalls the Soviet theft of our atomic weapons technology after World War II. They copied the B-29 bomber, calling it a Tu-4. The engine in their Korean War-vintage Mig-15 fighter was copied from Rolls Royce.

Unfortunately, there are many cases from more recent times which hit a little close to home.

In 1977, a man named William Holden Bell was working as a radar engineer in the Los Angeles area. Bell had gotten himself into financial problems; he was burdened by overdue debts and back taxes. He had a neighbor named Marian Zacharsky, who made no secret of the fact that he was the West Coast manager of a Polish machinery importing firm named POLAMCO. POLAMCO is incorporated in Delaware and Illinois, and has offices not only in Los Angeles, but also in Chicago and Detroit.

Now Zacharsky did not strong-arm Bell into giving him secrets. He was much more subtle. They played tennis together, saw each other socially. They became friends, and if Bell needed anything, he needed a friend. A friend able to help him out of his financial difficulties. Bell provided Zacharsky several business contacts, quite harmless, and was surprised when in return Zacharsky gave him $4,000 in cash. Zacharsky went on to tell Bell that if he continued to provide valuable assistance to POLAMCO, he might even be hired as a well-paid consultant. My friends, the hook was in and set.

Bell was anxious to cinch the job, and to prove his value to Zacharsky, gave him a SECRET document he had been working on. More money changed hands. Seeing the light at the end of his financial tunnel, Bell laid his hands on more classified documents and gave them to his new-found friend: specifications for the F-15 fighter's look down/shoot down radar, the B-1 and Stealth quiet radar, an all-weather tank radar, the Phoenix air-to-air missile, the Patriot and Improved Hawk surface-to-air missiles, a towed-array submarine sonar.

Over a three-year period, Zacharsky gave Bell $110,000 for all this information. A lot of money for Bell, but for the Soviets it was dirt cheap. They saved hundreds of millions of dollars and years of research and development time.

The Bell/Zacharsky case illustrates several facts about Soviet industrial espionage that I would like to point out.

Note first that I said Soviet espionage, while Zacharsky was a Polish agent. Eastern European agents who have defected to the West or who have been apprehended and questioned have made it perfectly clear: their intelligence services are closely entwined with those of the Soviet Union. They respond to Soviet collection tasking, and the USSR benefits from everything of value that they collect.

Note too that Zacharsky represented an overt, legal, Polish trading company while also conducting clandestine intelligence operations. There are more than 30 such firms in the United States, under Soviet or East European ownership, and all of them provide cover for intelligence collection operations. In fact, these firms chartered in the U.S. can legally buy controlled technology. Only when they attempt to export it are they breaking the law. To say the least, this is a distinction that is tremendously difficult to police.

Let me point out another important fact. Bell was not a political radical or a subversive; he did not seek out Zacharsky and try to sell him secrets; nor was he blackmailed. In virtually every case, Soviet recruitment—and that's what it was in the Bell case—Soviet recruitment is more subtle. Bell needed a friend, so Zacharsky was friendly. Bell needed money, so Zacharsky provided it. Zacharsky was not a heavy-handed, trench-coated caricature of the Soviet agent. He was in his 30s, tanned, athletic, little accent.

Note too that Bell kept up his treason for three years. He had little difficulty in getting access to projects he had no need to know about. He had little difficulty in getting documents out of the building in which he worked. His superiors and co-workers knew he was under financial duress, but paid no special attention when his problems suddenly ceased. He made no secret of his association with POLAMCO, and in fact traveled openly to Austria and Switzerland, where he met with Polish agents. As of the time Bell was arrested in 1980, his security background investigation had not been updated in 28 years. Twenty-eight years.

Let me move on to another case, a very different one.

There is a computer software company in a Virginia suburb of Washington, named Software AG of North America. The company had developed a highly sophisticated program for data base management named ADABAS. In 1979, a Belgian purchasing agent contacted Software and tried to buy the ADABAS program. It soon became clear that the Belgian was representing the Soviet Union, and the company contacted the FBI. Software AG strung the agent along for seven months, during which time the amount he offered for the program tripled, and he made repeated assurances that the company's proprietary interest would not be compromised, as the Soviets were not about to turn around and sell the program to Software's competitors.

Finally, the Belgian got discouraged, but that was not the end of the Soviet effort. The Belgian purchasing agent next went to another company in the same building and asked them to procure the ADABAS program for him. They too called the FBI. Finally, an FBI agent posing as a Software employee who had stolen the program tape delivered it to the Belgian, who was promptly arrested.

Still that was not the end of the Soviet quest for the ADABAS program. In 1981, at two trade shows in Washington, Soviet diplomats tried to buy the program from the company. When they were turned down, inquiries came in from the Hungarian embassies in the United States, and later in West Germany and Japan. When the Hungarians were turned down, the Poles began to show an interest in getting the program.

Well, what lessons are to be learned from the Software/ADABAS case?

First, note that it was a Belgian purchasing agent who was so closely involved in the case. While there are more than 30 Soviet and East European trading companies and other commercial offices in the United States, there are more than 300 of them in Western Europe. As in the United States, almost all of them are engaged in acquiring Western technology for Soviet use.

The West European connection is important, and has many variations. Sometimes, these Soviet front organizations will try to buy restricted technology directly from American firms. Sometimes, they engage bona fide European firms as middlemen to obscure the ultimate destination of restricted equipment. Often they will deal with European subsidiaries of U.S. companies, hoping that controls may be a bit more lax. The variations are numerous. The results are the same. The Soviet intelligence services are involved in all such operations.

Second, take note that the Soviets knew exactly what they wanted. They were not just shopping around for a useful computer program. While the technology acquisition effort has been compared by some to a vacuum cleaner, in fact, it is a highly focused, well-managed collection program. Soviet agents have very specific shopping lists, right down to the model numbers.

Note too that the Belgian purchasing agent finally struck a deal with a man he thought was a Software employee out to make a fast buck by selling a computer tape. This did not seem odd to the Belgian, because as we all know, employee theft of high-technology materials is a severe and unfortunately common problem. For all its benefits, miniaturization has made pilfering

relatively easy. Whether we are talking about tapes, chips, or production tools, we know that some of these materials are finding their way into Soviet hands.

Finally, note once again the use of Eastern European services for Soviet purposes: in this case, both the Hungarians and the Poles.

The third example is different from either of the two cases I have already described.
